For cloths containing yarns the average number of which does not exceed No. 30; exceeding No. 30, 15 per cent ad valorem.

And inserting—

In no case shall the duty or duties imposed upon cotton cloth in paragraph 903 or 905a exceed 45 per cent ad valorem.

Mr. LENROOT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. LENROOT. May I ask what was disagreed to? I thought the first two paragraphs in paragraph 905 were pending.

Mr. SMOOT. They have been stricken out.

Mr. LENROOT. Paragraph 905a has not been touched except as by the amendment now reported?

Mr. SMOOT. Except the amendment just agreed to, inserting the provision in regard to paragraph 903.

Mr. SIMMONS. What is the pending amendment?

Mr. SMOOT. The pending amendment is to strike out on line 16, after the words "ad valorem," down to and including the words "ad valorem," on line 19, reading as follows:

For cloths containing yarns the average number of which does not exceed No. 30; exceeding No. 30, 15 per cent ad valorem.

And to insert the following:

In no case shall the duty or duties imposed upon cotton cloth in paragraphs 903 and 905a exceed 45 per cent ad valorem.

That would leave it open, so that if the Senator from Wisconsin desires to offer an amendment to strike out "12" and insert "5," he can offer it.

SENATOR JAMES A. REED.

Mr. STANLEY. Mr. President, I am troubled in heart, I am sore grieved, at a grave act of injustice done—I say in all tenderness, not in anger, but in regret—by the press of the United States, which means to be just; by the Senate of the United States, which means to be fair; possibly by the people of this country, whose impulses are always wholesome and square and disingenuous—to the amiable junior Senator from Missouri [Mr. SPENCER]. He has been charged with sinister motives in his ardent advocacy of a Democratic candidate in a Democratic primary.

Of course many may urge that, having defeated his opponent, having demonstrated his opponent's inability to win—though not against the most formidable of Republican adversaries—he might assume that his proved incapacity to win was the best assurance of his certainty to lose in subsequent elections. Nevertheless, there has been an attempt made to charge him with selfish and sinister motives. In that he is absolutely innocent. I never knew a more innocent statesman. There is not a more ladylike Senator on this floor than the junior Senator from Missouri—kindly, eminently respectable, always proper—oh, this cruel criticism of the junior Senator from Missouri grieves me sorely.

In what I say I am not inspired by any hostility to Mr. Breckenridge Long. I feel very kindly toward any scion of the race of Breckenridge. Were it not for the fact that the most vital interests of the Democratic Party and of the Nation intervened I should be still, because the very name of Breckenridge is sacred in Kentucky. The greatest Presbyterian divine in that great denomination is of the family of Breckenridge. The greatest soldier Kentucky ever sent to glory or to death, an Adonis, a Solon in council, a Mars in war, was John C. Breckenridge, a Senator from Kentucky and Vice President of the United States. His name is enshrined in the hearts of every Kentuckian. The most versatile statesman Kentucky ever produced, he who adorned the world of letters, of art, of law, and of statesmanship, was William Cabell Preston Breckenridge, the silver-tongued orator of Kentucky, the worthy successor of Henry Clay. The name of Breckenridge is one to charm in Kentucky. Mr. Long comes of a race interwoven with the proudest tradition, the social, religious, and martial life of the Commonwealth. There is no part of it it has not touched, and, touching, has not adorned.

And yet I am here, Mr. President, to speak the simple truth. The Senate knows and the country knows that since the days of Benton and Cockrell and Vest there has appeared in this Senate no more towering figure than that of JAMES A. REED, of Missouri. It is recorded that after the Battle of Chancellorsville, when Stonewall Jackson fell, shot through by his own forces, there was rejoicing in the Federal camp; and justly so, for they said, "In the death of Stonewall Jackson we are more blessed than if Lee had lost a division." To-day there is not a secret caucus in the Republican Party, there is not a time when one Republican meets another, that he does not say, "My brother, is REED defeated?" When these protectionists go down on their knees to a protectionist god they say, "O Lord, keep REED out of the Senate."

There is not a doubt that this guileless, innocent, somewhat blundering junior Senator from Missouri simply expresses the wish of all his colleagues that the god of protectionism, the god of Republicanism, the genius of all that is mistaken in politics, will smite this mighty champion of the truth in Missouri hip and thigh. It is unkind, it is unjust, it is cruel in the press to blame the poor junior Senator from Missouri for saying what every Republican thinks and wishes and prays.

I speak from no personal interest in JAMES A. REED. I never voted with him in any of his differences with the President.

There are not a baker's dozen here who have followed Woodrow Wilson with the same devoutness that I have. I never voted against a Wilson policy in my life. Whether I was right or wrong, it remains for history to say, but it is the truth. I have followed him. I have followed him when I thought he was right and I have followed him sometimes when I was not so certain about it, because I had absolute trust in the disinterestedness of his patriotism and the transcendent brilliancy of his genius. Be that as it may, no man can question my loyalty to the President of the United States, but I shall never agree that any mortal man, be he inspired, shall say to a Senator, "You shall do as I say, and not as your conscience and not as the interests of your constituents may dictate." Whenever we give to the President of the United States the power to vote for Senators, we have destroyed this Government, we have made a scrap of paper of the Constitution of the United States, we have established an absolute autocracy which President Wilson would abhor as much as I do. Every Senator here, as an ambassador from a sovereign State, has a right to express his opinion as God, as his conscience, as his people's interest dictate.

I wish to say here and now that when I learn that Wilbur R. Crafts, a known Republican from Pennsylvania, has invaded the State of Missouri to assail JAMES A. REED, when a Senator on this floor as a Republican expresses a sincere desire that the Republican Party may be benefited by the destruction of JAMES A. REED, I rise in my place to say that the national democracy has an interest, that if that towering figure shall be stricken down it is not only the loss of Missouri, it is the loss of democracy, the national democracy.

There is not on either side of this Chamber a greater lawyer, a more profound scholar, a more dauntless advocate of the truth, a quicker or a doughtier champion of those things for which Jefferson stood. There was never a day nor an hour from the time he entered this body when the most of us were not impressed with the consciousness that few, indeed, could bend the bow of Ulysses. He is, as was Benton and Cockrell, Clark and Vest and Stone, a tall man from an imperial State, such as Missouri can produce, full of vigor and courage, with the truth of Jeffersonian democracy in his big heart, a champion of the great cause for which we stand, without fear and without reproach. I say to the junior Senator from Missouri that he may, jackallike, nibble at his heels, send Crafts and his kind to do their bidding, but there is not power enough in the secret and sinister conspiracy of Republicanism on the other side of the Chamber to down or to damn the brave and dauntless JAMES A. REED, of Missouri.

Mr. SPENCER. Mr. President, I was not in the Senate on Saturday when the senior Senator from Tennessee [Mr. SHIELDS] made some reference to me, of which he notified me last Friday, and I just entered the Chamber a moment ago as the senior Senator from Kentucky [Mr. STANLEY] was making some reference to me. So far as personal allusions are concerned, I have nothing to say. I shall not even attempt to reply in the same vein in which the senior Senator from Kentucky was pleased to speak. But I do want to say what the fact is in connection with the senior Senator from Missouri [Mr. REED]. I have never upon the floor of the Senate said one word about Senator REED's candidacy in Missouri until this moment. I do not propose to discuss it now. It is a Democratic primary. The Democratic voters of Missouri will settle it among themselves. It is not the business of the Republicans.

I did have in mind a real curiosity to know how the people in the Democratic Party of Missouri were feeling about the primary election, which occurs on the 1st day of August next. Therefore I sent to every county in the State of Missouri a personal inquiry, directed to leading Republicans in the county, asking what, in their judgment, was a fair statement of the condition in the Democratic Party in Missouri in regard to Senator REED and Mr. Long. I did not express any preference one way or the other. I asked for a survey of the situation and asked for it because, mainly from the other side of the Chamber, and also from this side of the Chamber, there had come to me repeated inquiries, "What is going to be done in Missouri? What will be the result of the Democratic primary? Who will win out, Senator REED or Mr. Long?

I could have given an expression of personal opinion, as I did frequently, but I did not have the foundation of facts back of it. So I had a query sent to every one of the 114 counties in Missouri asking what the general situation was. I received answers from about 110 of those counties. By those answers it was shown that 65 counties were in favor of Mr. Long, that 20 counties were in favor of Senator REED, and that the rest of the counties were either undecided or were about 50–50. I have, as inquiries were made of me, given the result of this survey. So far as Republicans are concerned it does not matter which of the Democratic contestants wins in the primary. Either will be defeated in November.

Mr. STANLEY. Mr. President, it is worse than I thought it was. The confession of guilt on the part of the junior Senator from Missouri is simply appalling. Think of it. The junior Senator from Missouri, with his own business to attend to, his own party to look after, his own affairs to concern him, makes a survey of Missouri. Why a survey of Missouri? Why should a Republican Senator make a poll of the Democratic vote in Missouri? Why go to all the trouble and all the time and all the expense of making the wires hot between Republican headquarters in Washington and Republican headquarters in St. Louis, except that he knew, as does every Republican in the Senate, that he had better defeat 10 ordinary men than to let JIM REED get back here to damn the Republican delinquencies with the eloquence of the traditional Missouri Senator and with the courage of a southern hero? The junior Senator from Missouri knew, as the rest of his kind know, that it was a dangerous and a most unfortunate thing, that it spelt disaster in the midst of their blunders, to have that clear intellect, that burning eloquence, turned upon their shattered columns and their multiplied iniquities, and yet he did, neglecting his own legitimate business, make, as he now confesses, a survey of the whole State of Missouri to find what were the chances of defeating JIM REED.

Oh, it is perfectly plain; it is perfectly manifest. They sent for Crafts, a nigger-equality Republican from Pennsylvania, and shipped him into Missouri, and then sent for the junior Senator from Missouri to use all the multitudinous means of information and put his organization into a Democratic primary, and to my utter amazement without a blush, the debonnaire and innocent junior Senator from Missouri confesses his iniquitous, damnable, and pernicious interference in the Democratic primary. Every self-respecting Democrat in Missouri should resent it. It should be posted everywhere that the Republican Senator from Missouri is making a survey of the Democratic situation.

The Missouri that followed Benton in the days of Jackson, the Missouri that thrilled with pride when Champ Clark was almost President; the Missouri that treasures the memory of Cockrell and Vest will remember the pernicious activities of the junior Senator from Missouri; and that same Missouri will remember that JIM REED measures up in eloquence, in learning, in courage, in disinterested devotion to the principles of Jeffersonian democracy with all his titanic predecessors.

Shakespeare tells the story of how—

> A falcon, towering in his pride of place,
> Was by a mousing owl hawk'd at and killed.

May history not record the pathetic story that the stalwart REED was by the malicious junior Senator from Missouri "hawk'd at and killed?"

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDING OFFICER (Mr. STERLING in the chair). The question is on the committee amendment in paragraph 905a, which the Secretary will state.

The READING CLERK. The Committee on Finance proposes to modify the committee amendment on page 125, paragraph 905a, line 16, after the words "ad valorem," by striking out "for cloths containing yarns the average number of which does not exceed No. 30; exceeding No. 30, 15 per cent ad valorem," and in lieu thereof inserting: "In no case shall the duty or duties imposed upon cotton cloth in paragraphs 903 or 905a exceed 45 per cent ad valorem."

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Utah to the committee amendment.

The amendment to the committee amendment was agreed to.

Mr. LENROOT. I now move to amend the committee amendment on page 125, paragraph 905a, line 16, before the words "per cent," by striking out the numeral "12" and inserting the numeral "5."

Just a word in explanation of the amendment. If my amendment to the amendment shall be adopted, it will leave the rate upon cloths of 80 count and over exactly the same as the rates proposed by the committee, but it will lower the rate upon cloths of a lower count.

Mr. SIMMONS. I ask for the yeas and nays upon the amendment proposed by the Senator from Wisconsin to the committee amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. CALDER (when his name was called). I have a general pair with the senior Senator from Georgia [Mr. HARRIS]. I transfer that pair to the senior Senator from Pennsylvania [Mr. CROW], and vote "nay."

Mr. NEW (when his name was called). Transferring my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from Vermont [Mr. PAGE], I vote "nay."

Mr. POMERENE (when his name was called). I am paired for the afternoon with my colleague [Mr. WILLIS]. I transfer that pair to the Senator from Rhode Island [Mr. GERRY], and will vote. I vote "yea."

Mr. SMITH (when his name was called). I have a general pair with the Senator from New York [Mr. WADSWORTH] on this question. I transfer that pair to the Senator from Montana [Mr. MYERS], and vote "yea."

Mr. WALSH of Montana (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Missouri [Mr. REED], and vote "yea."

The roll call was concluded.

Mr. GLASS. I have a general pair with the senior Senator from Vermont [Mr. DILLINGHAM] which I transfer to the Senator from Nevada [Mr. PITTMAN] and will vote. I vote "yea."

Mr. BALL (after having voted in the negative). I inquire if the senior Senator from Florida [Mr. FLETCHER] has voted?

The PRESIDING OFFICER. The Chair is informed that the senior Senator from Florida has not voted.

Mr. BALL. I transfer my pair with that Senator to my colleague the junior Senator from Delaware [Mr. DU PONT] and allow my vote to stand.

Mr. EDGE. I transfer my pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Oregon [Mr. STANFIELD] and vote "nay."

Mr. JONES of Washington (after having voted in the negative). I notice that the senior Senator from Virginia [Mr. SWANSON] has not voted. That Senator is necessarily absent, and I promised to pair with him for the afternoon. I find, however, that I can transfer that pair to the junior Senator from Maryland [Mr. WELLER]. I do so and allow my vote to stand.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from West Virginia [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. ROBINSON]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 24, nays 33, as follows:

YEAS—24.

Ashurst	Glass	Lenroot	Shields
Borah	Heflin	Nelson	Simmons
Capper	Hitchcock	Overman	Smith
Caraway	Jones, N. Mex.	Pomerene	Underwood
Culberson	Kellogg	Ransdell	Walsh, Mass.
Dial	King	Sheppard	Walsh, Mont.

NAYS—33.

Ball	Hale	McKinley	Shortridge
Broussard	Harreld	McLean	Smoot
Bursum	Johnson	McNary	Spencer
Calder	Jones, Wash.	Moses	Sterling
Curtis	Kendrick	New	Townsend
Edge	Keyes	Nicholson	Warren
Ernst	Ladd	Oddie	
Fernald	Lodge	Pepper	
Gooding	McCumber	Phipps	

NOT VOTING—39.

Brandegee	Frelinghuysen	Norris	Sutherland
Cameron	Gerry	Owen	Swanson
Colt	Harris	Page	Trammell
Crow	Harrison	Pittman	Wadsworth
Cummins	La Follette	Poindexter	Watson, Ga.
Dillingham	McCormick	Rawson	Watson, Ind.
du Pont	McKellar	Reed	Weller
Elkins	Myers	Robinson	Williams
Fletcher	Newberry	Stanfield	Willis
France	Norbeck	Stanley	

So Mr. LENROOT'S amendment to the committee amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. SMITH. Mr. President, before the vote is taken I wish merely to call the attention of the Senate to the fact that we have up to the present maintained a parity between yarns and cloth. Now we have come to that character of goods of which it is claimed more are imported than of any other kind of cotton goods. I wish to call the attention of the Senate to the fact that there never was a more outrageous piece of legislation perpetrated than we are now about to confirm, if we shall vote to accept the amendment of the committee as it is now proposed. Cotton cloth provided for in paragraph 903, according to the amendment that is inserted in that paragraph, already bears a differential of 10 per cent. Identically the same cloths are included in paragraph 903 that are included in this. They bear 10 per cent, and then, in addition, there are separated certain kinds of goods on which an additional 12 per cent is imposed, which would, unless the limitation intended to be proposed by the Senator from Utah, as I understand, is agreed to—to the effect that the maximum rate shall not exceed 45 per cent—by the accumulation of these different duties, run the total rate up to the neighborhood of 50 per cent. Although we practically do not compete in this character of cloths with the imported article—they are specialties and novelties that are made out of cotton not produced in America and imported into this country and are sold at higher prices than the nearest comparable domestic cloth—we are adding a duty which will reflect itself and be compensatory throughout the entire scale of cotton goods. It is absolutely uncalled for. The Senator from Wisconsin [Mr. LENROOT] offered an amendment to reduce it to 5 per cent, which, according to that, would have brought it up to the 45 per cent, just by the addition of the cumulative duties, so that the maximum would obtain all the time; and there is absolutely no excuse whatever for the imposition of this additional duty, in view of the fact that it is taken care of by a differential of 10 per cent.

I call for the yeas and nays on the adoption of the committee amendment as modified.

Mr. SMOOT. Mr. President, I join the Senator from South Carolina in asking for the yeas and nays. If there is any one thing in this whole cotton schedule that has been limited so that the duty on the finest and the most costly goods coming into this country shall be limited to 45 per cent ad valorem, it is this very paragraph.

I want to say that in the first four months of 1922 the importations into this country have been 67,000,000 square yards, and yet the Senator says that there is no competition! If that is carried on through the year, there will be 197,000,000 square yards coming into this country, and yet the Senator says there is no competition! I say that the limit of 45 per cent is put here because the committee felt that they did not want the duty in all the cotton schedules to be less than 45 per cent.

Mr. LENROOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Wisconsin?

Mr. SMOOT. I yield.

Mr. LENROOT. Where does the Senator get his information that there are 67,000,000 square yards of this kind of goods coming in?

Mr. SMOOT. I say it is cotton goods, and the Senator knows very well that they are not the common, ordinary goods.

Mr. LENROOT. Oh, but they are not this kind of goods. They cover all goods in the cotton paragraphs.

Mr. LODGE. Mr. President, if the Senator will allow me one moment, they do not cover all goods in the cotton paragraphs. They cover only cotton cloths.

Mr. LENROOT. Well, that is cotton cloths.

Mr. LODGE. That is not all goods in the cotton paragraphs.

Mr. SMOOT. There is no need of trying to camouflage the thing. This additional duty is given upon a certain kind of goods that are woven upon certain looms. They are all fancy weaves, and they are all luxuries of the highest type; and, notwithstanding that, the committee says that there shall not be a duty of more than 45 per cent ad valorem, and that is what we are voting upon.

I call for the yeas and nays.

Mr. SMITH. I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified. Upon that question the yeas and nays have been called for and ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. BALL (when his name was called). Making the same transfer as before, I vote "yea."

Mr. GLASS (when his name was called). Making the same announcement as on the previous roll call, I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the Senator from Rhode Island [Mr. GERRY] and will vote. I vote "nay."

Mr. SMITH (when his name was called). Making the same announcement as to my pair and its transfer, I vote "nay."

Mr. WALSH of Montana (when his name was called). Transferring my pair as announced on the preceding roll call, I vote "nay."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before, I vote "yea."

Mr. JONES of Washington. Making the same announcement as before with respect to my pair and its transfer, I vote "yea."

Mr. CALDER. Making the same announcement as before, I vote "yea."

Mr. ROBINSON. I have a pair with the Senator from West Virginia [Mr. SUTHERLAND]. Being unable to obtain a transfer, I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 34, nays 24, as follows:

YEAS—34.

Ball	Gooding	McCumber	Phipps
Broussard	Hale	McKinley	Shortridge
Bursum	Harreld	McLean	Smoot
Calder	Johnson	McNary	Spencer
Curtis	Jones, Wash.	Moses	Sterling
Edge	Kendrick	Nelson	Townsend
Ernst	Keyes	Nicholson	Warren
Fernald	Ladd	Oddie	
France	Lodge	Pepper	

NAYS—24.

Ashurst	Glass	Lenroot	Simmons
Borah	Heflin	Overman	Smith
Capper	Hitchcock	Pomerene	Stanley
Caraway	Jones, N. Mex.	Ransdell	Underwood
Culberson	Kellogg	Sheppard	Walsh, Mass.
Dial	King	Shields	Walsh, Mont.

NOT VOTING—38.

Brandegee	Gerry	Norris	Swanson
Cameron	Harris	Owen	Trammell
Colt	Harrison	Page	Wadsworth
Crow	La Follette	Pittman	Watson, Ga.
Cummins	McCormick	Poindexter	Watson, Ind.
Dillingham	McKellar	Rawson	Weller
du Pont	Myers	Reed	Williams
Elkins	New	Robinson	Willis
Fletcher	Newberry	Stanfield	
Frelinghuysen	Norbeck	Sutherland	

So the committee amendment as modified was agreed to.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. The committee proposes to insert a new paragraph, in which it suggests the following changes:

In the first place, begin line 20 with the numerals "905b"; in line 21, strike out the word "and" between the numerals "903" and "905"; after the numerals "905" insert "and 905a"; on line 25, strike out the word "coarser" and insert the words "not finer"; and on page 126, line 1, strike out the word "coarser" and insert the words "not finer," so that the paragraph will read as follows:

PAR. 905b. In addition to the duties imposed in paragraphs 901, 902, 903, 905, and 905a, there shall be paid on all yarns finer than No. 60, and on all yarns finer than No. 60 contained in threads and cloth, if constituting more than 10 per cent in weight of such threads or cloth, 10 cents per pound; and on all laps, sliver, and roving, and on all yarns not finer than No. 60, and on all yarns not finer than No. 60 contained in threads and cloth, if containing cotton of 1⅜-inch staple or longer, 10 cents per pound.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

Mr. SMITH. Mr. President, it is only necessary to call attention to the fact that this paragraph is incorporated here for the purpose of taking care of the 7 per cent duty that was placed on the Arizona cotton; and, as has been contended here, it means that in order to take care of this small percentage of Arizona cotton the American people will be compelled to pay perhaps four or five times the value of all the cotton grown in Arizona. It means that in order to protect this small part of the cotton production of the country the American people consuming the imported cloth that contains any cotton having a length of staple equal to that shall pay this additional duty of 10 cents per pound.

Mr. POMERENE. Mr. President——

Mr. SMITH. I yield.

Mr. POMERENE. Can the Senator from South Carolina give us a statement as to the imports of this long-staple cotton as well as the imports of fabrics and other articles manufactured out of it?

Mr. SMITH. I can not give those figures, Mr. President; but at least 75 per cent of the goods imported into this country are made out of long-staple cotton.

You must understand that the wording in this paragraph is "composed wholly or in part." If you should have in an importation of goods a percentage of cotton of this character, those goods would carry this duty. It is the old idea of saying that if there is one thread of silk in goods, they take the silk duty. The paragraph covers goods containing cotton 10 per cent in weight.

If there were any justification for duties at all in a protective sense, surely on this character of goods there is no justification whatever. There might be a justification of a duty for revenue, because our mills produce hardly a yard of this character of goods. It comes in almost without any competition. We have no comparable cloths produced in this country. Yet we are putting this duty up, not for the purpose of obtaining protection but for the purpose, if possible, of shutting out a kind of goods our mills do not care to go to the expense and trouble to produce, but leaving the American market to such goods as the American mills do produce. The consequence is that for certain fabrics our people have to pay this fabulous unheard-of price.

Mr. POMERENE. Mr. President, the Senator has given a great deal of attention to the study of this subject, and I have not gone into the details of it. He has just made the statement that under the phraseology of this paragraph, if a fabric were made up wholly or in part of long-staple cotton it would have to pay these compensatory duties.

Mr. SMITH. Certainly.

Mr. POMERENE. Are those compensatory duties based upon the long-staple cotton or on the long and short cotton which may be in vogue?

Mr. SMITH. We have two kinds covered here. There is the extra duty by reason of the Jacquard figure. There is the extra duty by virtue of paragraph 903, which takes the vat dyes, and the specification that "All cloths printed, dyed, colored, woven, or figured," carry 10 per cent. In addition to that, this particular paragraph puts on the duty of 12 per cent, and now we come to the compensatory duty of 10 cents a pound for all that contain any yarns of 1⅜ inches.

Mr. POMERENE. What amount of imports of cotton fabrics are made partly of short staple and partly of long staple?

Mr. SMITH. So far as imports of that kind are concerned, they are negligible. But it must be remembered that our own manufacturers can take advantage of this paragraph, and with a minimum of 1⅜-inch cotton, put into the ordinary standard, it would take this duty, and they would get behind it in order that they might raise the price. One can see at a glance that with practically a handful of 1⅜-inch staple, woven into any cloth in this coutnry in the per cent indicated in this paragraph, the goods carry these duties.

As a matter of course, I want it definitely understood that, coming from a State which up to 1920 derived the greater portion of its income from the production of raw cotton, I stand here and plead for such a condition in our financial arrangements that we may be able to spin in American mills every yard of cotton goods made in America. We do not need any duty whatever to reach that happy condition. We have the raw cotton. Ninety per cent of the spinnable cotton of the world is produced on American soil. We may speak about the freight rate from here to Europe being no greater than the rate from Galveston to Boston. That calls for our correction. It does not take a very great strain of our imaginations to picture the condition if this present crop, which promises not to exceed 8,000,000 bales of cotton, is consumed by American mills, as at the peak of consumption in 1919 the American mills consumed 7,000,000 bales of American cotton. If the American cotton crop did not exceed the supply for American spindles, and no cotton were shipped abroad to be converted into the foreign goods and shipped back, what need would there be for a duty on cotton?

We have 90 per cent of the raw material, and if the American cotton crop produced only enough to supply American spindles, we would not have a competitor on the globe. Outside of a small percentage of cotton known as Egyptian cotton, spun into the very finest kinds of yarn, American cotton furnishes the stuff out of which all of the European and oriental manufactures make their ordinary cotton cloths.

Let us suppose what is within the range of probability, that this year the American cotton crop should not exceed the demand of the American spindles; on what ground could a duty on cotton cloth be justified? Nobody outside of America could

get the supply of the raw material; no foreign manufacturer could convert it, and therefore we would not have a competitor. Why should we have a competitor now?

As I started to say a moment ago, though the freight rate has been so manipulated and gerrymandered that the rate from American fields of production to the American mills in the New England States may be exactly equal to the rate to foreign countries, no man can deny that time and distance are the principal elements of the cost in transportation. You can remit the rate, you can rebate it, but you can not eliminate the elements of time and space, and 3,000 miles across the ocean is farther than 700 or 800 miles to New England.

Who has brought this about? It is to the benefit of the American spinner to have American cotton shipped abroad, because he gets the advantage of a duty he could not stand up and ask for otherwise. If no American cotton were shipped abroad there would be practically no reason for any duty on cotton cloth, because we would have a monopoly of the world's production of cotton goods, except the small amount produced out of Egyptian cotton. Yet, with a monopoly of the raw material, with the machinery and the skilled labor to convert this stuff into the finished product, from the coarsest yarns to the finest, we are imposing a duty which would spell the difference between the pauper labor of Europe and the American labor, when American labor produces every pound of cotton, and the only competitor we have is England, whose civilization is equal to ours, and whose wage is practically equal to ours. Then why this duty? It is simply a subterfuge behind which the manufacturer can demand a price from the consumer which he could not justify otherwise.

When you come to the question of Egyptian cotton, the American manufacturer stands on all fours with the English and other European manufacturers, because he can get his Egyptian cotton laid down in America for just about the same it brings laid down in Europe. So that even there we need no protection. The cost of the raw material is the same, and the processes of conversion are as perfect in America, and when it comes to the output of the product per man, it is greater in America than elsewhere. Therefore, aside from the revenue, there is no justification for any duty on American cotton goods.

These are facts of which any man who will take the time to study must be convinced. I do not believe we should open our doors to the influx of European goods without the payment of a duty. I believe the magnificent market we have built up, and the splendid civilized population we have, in a country which is such an inviting field for commerce for those who desire to come here and enjoy the benefits of our market, demand that the foreigners should at least pay their proportionate share in keeping up the machinery to perpetuate that market. But I shall never vote to take money from the pockets of the American people, who civilization and decency decree shall wear clothes, by the imposition of a high duty in a case like this. The great article par excellence out of which the teeming millions of the earth make their clothes is cotton, and, thank God, the southeastern part of North America, under the decree of God, is given a monopoly of the raw material out of which the clothing of 900,000,000 people is made.

We need no tariff to protect us in that gift of God. He has provided a tariff, through seasons and climate, which no man can break down or take away. The imposition upon the American people of these duties is an open declaration that you desire to lay a duty and an impost upon those who toil and desire to be clothed for the benefit of a few. We can spin every pound of American cotton on American soil, and the difference between the freight on the raw material shipped abroad and on the finished product is enough security for the American spinner.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

Mr. SMOOT. Mr. President, for the RECORD I want to make a somewhat different statement in regard to this matter from that which has already been made. The Senator from North Carolina and also the Senator from South Carolina have made the statement that if there were a few threads of this yarn in a piece of cloth there would be a duty of 10 cents a pound on the whole amount. Both the Senators are mistaken.

There must be a number assumed which will mark the dividing line between cloth made out of short-staple and that made out of long-staple cotton. That is about a 60, and this amendment does not apply to a yarn finer than 60. We provide that the cotton must constitute a minimum of 10 per cent of the cloth in order to take the duty, so that if there were two broad selvidges of long-staple cotton and the balance of it made of short-staple cotton the cloth would not bear the extra amount of duty.

There are two reasons why long-staple cotton is used. One is that a thread may be spun finer than the short-staple cotton can produce. The other is that the cloth can be finished only by Egyptian cotton and can not be finished by short-staple cotton. The committee have guarded that, so that no mistake can be made.

Mr. POMERENE. Do I understand the Senator correctly that it is his position that there must be 10 per cent of the long-staple cotton in the fabric before it would be subject to the additional tax?

Mr. SMOOT. It is said that—

> If constituting more than 10 per cent in weight of such threads or cloth.

Mr. POMERENE. That is the Senator's construction?

Mr. SMOOT. Certainly; it says so in the amendment. Not only that, but I want the Senator to understand that language is put in there—and I would not care if it were the law now—so that they can not bring in a piece of fancy cloth with a plaid of 2 or 3 or 4 inches and in the markings of the plaid have the long-staple cotton and the balance of the cotton short staple, and draw the extra 10 cents a pound on all of the cloth. When it comes to the cloth that is woven straight out, so that there is a plain cotton warp of the short-staple cotton and the long-staple cotton, no manufacturer would ever think of doing it in the world. This will take care of every situation that can be thought of by the experts and by men who pass upon the goods at the ports of entry.

I simply rose to say this much, Mr. President, and I am now ready for a vote upon the amendment.

Mr. KING. Mr. President, will my colleague yield?

Mr. SMOOT. Certainly.

Mr. KING. I understood the Senator from South Carolina to state that the provision was in the nature of a compensatory rate occasioned by the tariff which was granted to the long-staple cotton from Arizona.

Mr. SMOOT. That is true.

Mr. KING. Does the Senator assent to that?

Mr. SMOOT. Absolutely. There is no question about it at all.

Mr. KING. Has the Senator determined how much this compensatory duty will add to the cost of the products which will be formed out of long-staple cotton?

Mr. SMOOT. Taking the class of goods as a whole into which the long-staple cotton enters, it will amount to an ad valorem duty of between 4 and 5 per cent. Take spool cotton, for instance, because that is perhaps the most extreme case I can think of now. That is 2 cents a pound to-day. The cotton is used in that. If it is 10 cents a pound, 5 per cent on $2 would be 10 cents, and it is 5 per cent upon that. I could take some other threads not so fine as that, and it would not amount to that, but I want to say to the Senator that the Senate having imposed a 7-cent duty upon long-staple cotton, which no manufacturer in the United States wanted, they must be compensated for it in the manufacture of these goods.

Mr. KING. I wish to ask the Senator approximately the aggregate value of the goods and textiles produced in the United States and sold in the United States or imported into the United States that would get the benefit of this compensatory duty?

Mr. SMOOT. On the goods that are produced in the United States it would not be a very large per cent, but of the goods that are imported in the United States I think there would be about 75 per cent of them that would fall under the provisions of this amendment.

Mr. KING. So, then, of course it would add materially to the cost of the imported article.

Mr. SMOOT. It would.

Mr. KING. And it would add materially to the cost of the domestically produced article?

Mr. SMOOT. No; I do not think it will, because that is given as a compensatory duty, although if they did not have the compensatory duty they could sell it for that percentage less. I first had in mind the profits to the manufacturers rather than the cost to the American consumer.

Mr. KING. What I was trying to elicit, if I may be pardoned for taking a moment's further time, was the approximate number of yards, or the value of the yards that would be affected by this duty, with a view to determining approximately the additional cost to the American people in order to afford the protection to this limited number of pounds of long-staple cotton produced in Arizona.

Mr. SMOOT. I will say to the Senator that if there is imported into the United States the same proportion for the balance of the year 1922 as has been imported for the first four months of this year, it will apply to at least 75 per cent of 197,000,000 yards of cloth. I do not want to be exact as to

75 per cent, but I think I am well within the figures when I say that.

Mr. LENROOT. Mr. President, I can give the Senator the figures under the present compensatory duty provision for the imports of 1921, but it is to be remembered that that applies to the cotton where the long-staple cotton is the component article of chief value. Under that provision in 1921——

Mr. SMOOT. It is not the same rate.

Mr. LENROOT. The Senator is very much mistaken in his 75 per cent, if that is true, because the countable cotton cloth not bleached of the short staple was 10,331,000 yards and of the long staple 1,294,000 yards; of the bleached, 12,240 short staple and 7,223 long staple; of the printed, dyed, and so forth, of short-staple cotton 52,000,000 and of long-staple cotton 22,000,000—about 33 to 40 per cent.

Mr. SMOOT. I say that those figures are under the present rate of duty. This is how it would figure out on the higher classes of goods that perhaps carry more of the long-staple cotton than otherwise. It will not be higher than 75 per cent, and perhaps lower.

Mr. POMERENE. Mr. President, I would like to ask the Senator from Utah a question. If I am wrong in my figures, I want to be set right. I am told that the production of long-staple cotton in this country amounts to about 5,000,000 pounds. Those are the figures given by the experts. On page 864 of the Tariff Commission Survey I find that the production in 1919 of tire duck was 121,745,000 square yards, or 128,174,000 pounds, valued at $143,086,000; and of other tire fabrics 36,806,000 square yards, or 29,917,000 pounds, valued at $32,602,000. The United States produces over 80 per cent of the automobile tires of the world and a corresponding amount of tire fabric. Now, this is long-staple cotton, and a large part of it is used for the making of these fabrics.

Mr. SMOOT. That is true.

Mr. POMERENE. I know that our tire manufacturers are planting some of this cotton down in Arizona. It would seem that while 80 per cent of the automobile tires are produced here, at the same time we are only producing about 5,000,000 pounds of that cotton.

Mr. SMITH. I think that should be 50,000,000 pounds.

Mr. SMOOT. I was going to suggest to the Senator that should be multiplied by 10. It should be 50,000,000. It is a mistake in the computation.

Mr. POMERENE. What I am trying to find out, if I can, is how much this duty of 7 cents a pound on long-staple cotton is going to cost the industries of this country?

Mr. SMOOT. I think no one could say that right offhand; but, of course, it will not be 5 per cent, because that is on very high-priced goods.

Mr. SMITH. It would be very nearly 5 per cent.

Mr. SMOOT. No; not on that tire fabric.

Mr. SMITH. Yes; it would on that character of goods.

Mr. SMOOT. I will say to the Senator that the expert, Mr. Clark, of the Tariff Commission, advises me that the value is about $1 a pound. So if that were the case the 10 cents would be about 10 per cent ad valorem on the cloth if it weighs 1 pound to the yard, but I doubt whether the tire fabric weighs a pound to the yard. I would not want to give a definite answer until I could look it up further.

Mr. POMERENE. I was misled in the early part of my inquiry by the statement as to the amount produced, but, of course, the long-staple cotton is used for many other purposes.

Mr. SMOOT. Yes; it is.

Mr. POMERENE. It would seem, however, that we were producing probably as much long-staple cotton as would be necessary for the automobile business if it were all used for that purpose. I would like to know, if I may, just what this is going to mean in cost to the entire industrial and consuming public of the country.

Mr. SMOOT. If I knew, I would be glad to tell the Senator just what it is, but I do not think I can give the exact figures.

Mr. POMERENE. I would like to have one of the experts take up that subject and advise us. I would like to know something about it if it is possible to get the information.

Mr. SMITH. One thing is very certain, and that is that all the fabric made out of Egyptian cotton, or the fabric that is made of cotton of that length, all cloths imported that have this cotton in it, up to 10 per cent and above, all mercerized silk, all forms of finer goods, all such that is imported into this country that has above 10 per cent of long-staple cotton, including the 150,000,000 pounds produced here and what we import, would be affected by this duty. It is difficult to figure out just what proportion of our cotton fabric is of this character of goods.

Mr. POMERENE. It rather seems to me we could afford to take all the long-staple cotton producers and board them at the Waldorf-Astoria Hotel for the balance of their lives rather than pay this amount of duty.

Mr. McCUMBER. Mr. President, if we were to take the imports of 1921, after the emergency tariff law went into effect, which gave 7 cents a pound duty, there would be about 37,559,000 square yards. For a year at the same rate it would be equivalent to about 66,000,000 square yards. There are on the average about 5 square yards, I am informed, to a pound of cloth. That would give us about 11,000,000 pounds. Eleven million pounds at 10 cents a pound would be $1,100,000. That would give us at least something of an estimate of what it would cost provided it was always added to the cost of the goods.

Mr. POMERENE. Do I understand the Senator from North Dakota now to be referring solely to tire fabrics?

Mr. McCUMBER. No; I was referring to the importation of cloth which came in under that provision which allows 10 per cent where the cloth is composed of cotton of 1⅛-inch length of fiber.

Mr. SMOOT. I will say to the Senator from Ohio that tire-fabric cloth weighs a great deal more than cloth that is referred to by the Senator. It is true that of ordinary dress cloths there are about 5 square yards to the pound, but there is not nearly so much in the case of tire fabrics; in fact, I think they do not exceed 2 yards to the pound, and some say not that much. If they average 2 yards, with a foreign valuation of a dollar, then there would be 5 per cent added.

Mr. POMERENE. As I understand, then, the effect of this provision, according to the figures which have been given by the Senator from North Dakota—and I do not think he means to say that they are entirely accurate—this would be in addition to other duties which these fabrics must pay when they come in?

Mr. McCUMBER. Yes; I had reference simply to the different kinds of cloth embraced in the paragraphs we have just mentioned, and on which a duty of 10 cents per pound is imposed to cover the duty on long-staple cotton.

Mr. POMERENE. That 10 cents is in addition to all the other duties.

Mr. McCUMBER. Certainly; and it is to cover the 7 cents per pound duty on the imported long-staple cotton, the waste, and so forth.

Mr. LENROOT. I should like to ask the Senator from Utah why a change is made in the provision of the present emergency tariff law in providing for this compensatory duty? Why was it necessary? Why was it done? The present law seems to work out satisfactorily. Why did not the committee continue the compensatory duty that is provided in the emergency tariff act?

Mr. SMOOT. I will say to the Senator that it has been found very difficult to administer the provision of the emergency tariff act, and in order to clarify it these words were suggested so that the administration of the law would be very much more simple.

Mr. LENROOT. The administration of the law might be very much more simple, and yet the provision which the committee has incorporated in the bill might give a very great advantage to the cotton manufacturers of this country.

Mr. SMOOT. No. If a manufacturer should try to make a thread above 60 out of short-staple cotton he would lose more than he would gain. It would be just like trying to make a fine thread of wool out of a coarse piece of wool. It might be done, but it would cost more than it would to buy the fine wool and make the finer thread from it. So it is in this case. Therefore the committee fixed 60 as the minimum.

Mr. LENROOT. The Senator says that the provision does not apply to anything under 60.

Mr. SMOOT. Yes; in the first part of the paragraph.

Mr. LENROOT. What about the second part?

Mr. SMOOT. The manufacturers will never attempt to make yarn of a mixture of long-staple and short-staple cotton; no manufacturer will do that.

Mr. LENROOT. Is not the thread in the cloth just the same? And is not the same language used?

Mr. SMOOT. The same language is used as to all yarn finer than No. 60.

Mr. LENROOT. Does not the paragraph impose a duty of 10 cents a pound on the total weight of the cloth?

Mr. SMOOT. It would on shoe threads, for instance, which are all made of that kind of yarn, and which are not computed in yards at all. Shoe threads are all made of long-staple cotton; they are not computed in square yards; so we have got to make the computation by the pound. It is to take care of in-

stances of that kind. As another illustration, take cotton heddles. Where a heddle breaks during the weaving of the cloth the only way that situation can be taken care of is to use the very finest piece of cotton in place of the wire that has been broken. Therefore the strongest possible cotton has to be used, and it comes not in yards but by the pound.

Mr. LENROOT. Would it be possible—the Senator is personally familiar with this question—to have the warp of long-staple cotton and the woof of threads of short-staple cotton?

Mr. SMOOT. The cloth would have a very different finish, I will say to the Senator.

Mr. LENROOT. Why?

Mr. SMOOT. Because one finishes entirely different than the other; there is more luster in one than in the other.

Mr. SMITH. But the Senator will not pretend to say that the warp could not be of one and the filling of the other.

Mr. SMOOT. I did not say that could not be done; but who is going to do it?

Mr. LENROOT. Does the Senator say that there is no cloth of that kind made?

Mr. SMITH. It is done, just as cloth is made with a cotton warp and a wool filling; of course it is done.

Mr. SMOOT. The same as cloth is made of a cotton warp and a wool filling?

Mr. SMITH. Yes.

Mr. SMOOT. Not at all.

Mr. LENROOT. Does the Senator say there is no cloth of that kind?

Mr. SMOOT. I would not say that there is not, but I can not conceive of much of it ever being used.

Mr. LENROOT. If that is true, why did not the committee retain the language "component material of chief value," and then apply the numbers as they have been applied? That would have taken care of the administrative feature, and yet it would not have permitted, if it is possible to have cloth of which 15 per cent is long staple and 85 per cent of short staple, to have a duty of 10 cents a pound imposed upon the whole fabric.

Mr. SMITH. I am informed there is considerable India lawn where the warp is 60's, made of 1⅛ staple, and the filling is 100's, made of 1⅛ staple.

Mr. SMOOT. The warp is made of one kind of cotton?

Mr. SMITH. Yes; and the filling made of another kind, just as there may be a cotton warp and a wool filling. The finish appears in the filling.

Mr. SMOOT. Possibly such a cloth may be woven.

Mr. SMITH. As a matter of course, the filling is what appears as the cloth; the other is the material that holds it together, just as in the case of a Brussels carpet, the threads which bind it together are made out of one kind of material and the carpet is made out of another.

Mr. SMOOT. The filling holds the cloth together just as much as does the warp. The filling holds it when it is stretched one way and the warp holds it when it is stretched the other way.

Mr. SMITH. That may be true; but the appearance is given by the filling, and it sells on the basis of the filling.

Mr. LENROOT. One other question. This seems to be the only compensation provided for in the bill on account of the duty on long-staple cotton. Why is it provided for in the case of cotton cloth and not provided for in the case of other cotton articles?

Mr. SMOOT. For instance, I will take plushes. We know that they can not be made of anything else than long-staple cotton. I have seen cotton plushes made with 400 picks to the inch, and no cotton but long-staple cotton can be used for such material. We provide for a direct rate upon such goods; compensatory duties are not mentioned; but in the rate that is provided as to all plushes the duty on long-staple cotton has been taken into consideration.

Mr. LENROOT. That is to say, on all other articles in this schedule other than cloth, in fixing the rates the committee took into consideration the compensatory duty.

Mr. SMOOT. Wherever the long-staple cotton is used. I say again that the Arizona cotton can not make the kind of thread that goes into plushes; it can not be drawn that fine. I thought there was a mistake when a witness said that there were 400 picks to the inch, but I took the plush myself and counted them, and there happened to be not quite 400 to the inch but there were 377 to the inch.

Mr. HITCHCOCK. I did not quite understand the Senator's reply to the Senator from Wisconsin. The Senator from Wisconsin asked when the yarn in cloth containing one-tenth of the long-staple cotton was included whether the duty of 10 cents a pound was applied to the whole article?

Mr. SMOOT. The limitation has been put in so that the manufacturers could not put in a few threads of the long-staple cotton or put in a selvage of such material and then claim the duty. As to the finish of the cloth, it does not make any difference whether the selvage is cotton or hemp or anything else, for it is not a part of the cloth. So that without the limitation of 10 per cent they could put finer yarns in the selvages and claim the whole duty. We put that limitation in so that it would not apply, as it applied in the Payne-Aldrich law in the event one such thread was used in the fabric. I will say to the Senator now that this applies as to all laces, and when we reach that schedule, if the question comes up again, I will go into it in detail.

Mr. HITCHCOCK. As I understand, then, the 10 cents a pound applies to all cloth in which at least 10 per cent of long-staple cotton is used?

Mr. SMOOT. Absolutely; and if any less than that has been used, the 10 cents a pound rate does not apply. For instance, as I have already explained and while the Senator was out, the manufacturers could make a fancy piece of cloth, say a 4-inch plaid, with only two or three threads constituting the plaid, and then claim the duty, unless we provided a minimum.

Mr. HITCHCOCK. What object would an importer or a foreign manufacturer have in doing that?

Mr. SMOOT. To get the duty of 10 cents a pound on the cloth.

Mr. HITCHCOCK. Is the Senator referring to the importer or the foreign manufacturer?

Mr. SMOOT. Yes; or anyone else who may want to sell the goods. It might be the importer or it might be the manufacturer.

Mr. HITCHCOCK. What object could the foreign manufacturer or the importer possibly have in desiring to increase the duty?

Mr. SMOOT. It would be the manufacturer in this country who would complain against a practice of that kind.

Mr. HITCHCOCK. Then, in fact, the duty of 10 cents a pound on an article having only 10 per cent of long-staple cotton in it is a 100 per cent duty?

Mr. SMOOT. No; because it will never operate.

Mr. HITCHCOCK. I mean, taking it just as it reads here, it is equivalent to a duty of $1 a pound on the long-staple cotton.

Mr. SMOOT. Yes; providing the goods could be made with only 10 per cent of the long-staple cotton, and then claim the full amount of duty.

Mr. HITCHCOCK. In that case it amounts to $1 a pound.

Mr. SMOOT. It would in such a case, but there can be no such case.

Mr. LENROOT. If there be none, why did not the committee confine it, as the custom and general practice has been, so as to make it read "the component material of chief value"? Then the situation would have been fully taken care of, would it not?

Mr. SIMMONS. That expression runs all through the wool schedule. Where the material is made partly of wool and partly of something else, the duty is imposed on the basis of "the component material of chief value." Why was not that done here?

Mr. SMOOT. Because of the difficulty of administration of the law. The provision which has been inserted here is a provision which the department asked for, and so the committee put it in.

Mr. SIMMONS. The 10-cent duty provided in this instance is upon the entire weight of the cloth, although it may not contain in weight one-half of long-staple cotton.

Mr. SMOOT. There are no such cases.

Mr. SIMMONS. I wish to say to the Senator from Utah that I think he is mistaken.

Mr. SMOOT. Of course the Senator is entitled to his opinion.

Mr. SIMMONS. Egyptian cotton is brought in and used, as our long-staple cotton is used, mostly in conjunction with short-staple cotton.

Mr. SMOOT. Oh, no.

Mr. SIMMONS. In the manufacture of cotton goods.

Mr. SMOOT. This paragraph applies only to No. 60 and finer yarns; it does not apply to anything under 60's.

Mr. SIMMONS. The Senator does not mean to say, if it is above 60, that the cloth is made entirely of long-staple cotton?

Mr. SMOOT. Does the Senator mean threads made of long-staple cotton?

Mr. SIMMONS. Yes; yarns or cloth.

Mr. SMOOT. I want to say that it does not pay very well to try to make a finer thread than No. 60 of shorter staple cotton.

Mr. SIMMONS. Not altogether with short staple, but it would pay to mix the two.

Mr. SMOOT. Oh, no; it would not.

Mr. SIMMONS. I am quite sure that is done.

Mr. SMOOT. That is not done.

Mr. SIMMONS. I am quite sure it is done.

Mr. SMITH. The Senator from Utah will admit that the great dividing line between the long and short staple—that is, between 1⅛ and that which is shorter—is 80.

Mr. SMOOT. No; I will admit that the very longest cotton that falls under the 1⅛ can be spun to 80's and has been spun in a few cases to 80's, but it never pays; the loss is too heavy.

Mr. SMITH. When you get up to 1¼ you can make 60's.

Mr. SMOOT. Yes; you can make the 60's very comfortably.

Mr. SMITH. And you can make the 70's. You have a leeway there of 20 ounces into which cotton of a staple other than 1⅛ will enter. I will submit that to any reputable millman in America. Any reputable spinner will tell you that he can use shorter staple up to 80's. With cotton below 1⅛ you can make up to 80's, but when you get up to that very fine twist in 80's you will have too much loss and too much breakage; but from 60's to 80's you have 20 counts in which you can use a shorter staple than 1⅛.

Mr. SMOOT. But what is the practice? They do not use it; that is all. There may be a bale of cotton picked out here and there or sold specially that would run very close to 1⅛ where they could go above 60's, but they do not try it, because it is just like taking cotswold and trying to make a 30 thread out of it. You can do it; there is not any doubt about it; you can do it, but in doing it the loss is so great that it never pays.

Mr. SMITH. The experience of the spinning mills throughout this country is that in the bulk of the yarn spun up to, I should say, 70's they use very little of the 1⅛-inch staple, because they have not got it. You have a tremendous amount of 60's; but, of course, when you get up to 80's you have entered the domain of the longer staple cotton. Your amendment here drops the count down to 60's, and there is no telling what amount of cotton of a staple less than 1⅛ is coming under that.

Mr. SMOOT. Suppose all that the Senator says is the fact. Let me read this to him: It is simply the threads that are contained in it; it is not the whole of it.

Mr. SMITH. Oh, I recognize that.

Mr. SMOOT. The Senator from North Carolina [Mr. SIMMONS] did not recognize it.

Mr. SMITH. It is in the last paragraph, not in the first. Read it from the beginning.

Mr. SMOOT. That is exactly what I say. The first part reads:

There shall be paid on all yarns finer than No. 60, and on all yarns finer than No. 60 contained in threads and cloth—

The yarns, not the cloth—

if constituting more than 10 per cent in weight of such threads or cloth, 10 cents per pound.

Even the threads in the cloth will not be taken into consideration unless they are 10 per cent of the whole number of threads in the cloth. Even then that 10 cents a pound will not be imposed.

Then it says here:

And on all yarns not finer than No. 60, and on all yarns not finer than No. 60 contained in threads and cloth—

If there are any threads there in which it is not contained, it does not take the duty of 10 cents a pound.

Mr. SMITH. Mr. President, does not the Senator from Utah think that he has given a leeway there to the manufacturers that is not justified by the practice when he has lowered to 60s the count below which, of course, this duty does not apply?

Mr. SMOOT. No; I will say to the Senator that I do not. If all the threads have this cotton in them they ought to have the duty of 10 cents a pound. If 5 per cent of them have it, they will not get anything for it. If 9 per cent of them have it, they will not get anything for it. It has to be 10 per cent before they get anything, and when they get anything it is for the threads that are in the cloth and the cotton that is contained therein.

Mr. SMITH. Yes; but you have lowered your count to a point where you have taken in a lot that is not 1⅛. That is the most liberal concessions to a manufacturer that was ever written into a bill. You have 20 counts there in which he can employ any other cotton and get the duty on a staple of 1⅛ inches.

Mr. SMOOT. He can not do it. It will not pay him to do it.

Mr. LENROOT. Mr. President, do I understand from the Senator from Utah that no yarns of 60 or upward are made of ordinary cotton—that they are all made of this long-staple cotton?

Mr. SMOOT. I stated that with picked cotton with a staple of a little less than 1⅛ inches they have been able to spin up to 80, but it is so small that it amounts to hardly anything. Every manufacturer will tell you that the dividing line is 60's, and therefore we did not take into consideration anything outside of 60's.

Mr. LENROOT. Why should not the first part of this paragraph have the same provision as the latter part—

if containing cotton of 1⅛-inch staple or longer?

It is as easy to determine that in one case as it is in the other, is it not? In the yarn referred to in the first part of the paragraph there does not need to be one particle of this long-staple cotton, and yet it will carry 10 cents a pound compensatory duty. I do not know why in the second part of the paragraph it is provided that if any part of that coarser yarn has long-staple cotton in it it shall take the duty, but there is no reference at all in the first part of the paragraph to long-staple cotton.

Mr. SMITH. Not a bit.

Mr. LENROOT. And the pretense is, or the purpose is, to make this a compensatory duty.

Mr. SMOOT. I would not care if you wanted to put it at 70's, but all of the people who came before the committee agreed that 60's was the dividing line, and it was suggested by the appraisers themselves that there was the place to put it. I do not want to pay them a single penny more than absolutely necessary in the shape of a compensatory duty for long-staple cotton.

Mr. SMITH. Mr. President, the bulk of the American yarns or threads are made up to and including 40's, from 40's down.

Mr. SMOOT. Ninety-three per cent.

Mr. SMITH. After you get above 40's you enter the domain of what is known as staple cotton—that is, 1 inch and above. You get 1 inch, 1⅛, 1¼, 1⅜——

Mr. SMOOT. One and one-eighth.

Mr. SMITH. One and one-eighth, and then you get up to about the longest that is produced in America, 1⅜, of that kind of cotton—sea-island cotton—but when you leave 40's, up to at least 70's, you have a domain there in which the South Atlantic States, the Gulf States, Mississippi and Texas, all produce cotton that is longer than an inch in staple. You have an inch and a sixteenth, and that can be spun into 60's; and when you get up to an inch and an eighth, or an inch and a quarter, you have a tremendous amount of North Carolina cotton and South Carolina cotton that would come in under that first paragraph.

Mr. SMOOT. If you want 70, take 70. I do not care about it. As I have already said, I do not want to give one penny in the way of compensation to which they are not entitled. I say again that everyone that appeared before the committee stated that the dividing line is 60, and I am quite sure that that is the practice; but if the Senator from Wisconsin desires to increase that to 70, I have not any objection at all.

Mr. LENROOT. It will still take care of it, because the latter part of the paragraph takes care of less than 70. Then suppose we change them both to 70.

Mr. SMOOT. That is what I say. If you change one, you should change the other.

Mr. LENROOT. Certainly.

Mr. SMITH. Just change them both to 70.

Mr. SMOOT. Then I ask that "70" be inserted instead of "60" in two places on line 22 and in two places on line 1 of page 126. There are four places where the number "60" applies in that amendment. I desire that each one be changed to "70."

The VICE PRESIDENT. The question is on the committee amendment as modified, which will be stated.

The ASSISTANT SECRETARY. On line 22, page 125, it is proposed to change "60" to "70," and on line 1, page 126, it is proposed to change "60" to "70."

Mr. SMOOT. In both places.

Mr. POMERENE. Mr. President, I want to ask the Senator from Utah another question. Of course, this provision here, which reads "if constituting more than 10 per cent in weight of such threads or cloth, 10 cents per pound," means that if 10 pounds in weight come in, and one pound of it, or 10 per cent, is long-staple cotton, then the duty of 10 cents per pound would be $1 on the entire amount?

Mr. SMOOT. In practice it means that if they try to put long-staple cotton in a selvage and try to get it in here, the 10 per cent is more than the selvage would be, and therefore they will not get any compensation for the cloth.

Mr. POMERENE. That does not quite answer the question.

Mr. SMOOT. The other way, with 70's, it is impossible to do it. Does that answer the Senator's question?

Mr. POMERENE. No; I think not.

Mr. SMOOT. Then I do not know how to answer it.

Mr. POMERENE. Just let me state my position. Suppose we have a fabric coming in here that weighs 10 pounds and 10 per cent of it in weight is long-staple cotton. Then the 10 cents per pound applies to the entire 10 pounds, or $1.

Mr. SMOOT. If there was "such an animal"; but I want to say to the Senator——

Mr. POMERENE. You have assumed that there was "such an animal"; otherwise, you would not have phrased this as it is.

Mr. SMOOT. No; I will say to the Senator that that is not what this means, either. If the Senator will follow this, he will see that it reads:

There shall be paid on all yarns finer than No. 60 and on all yarns finer than No. 60 contained in threads and cloth—

So, if it is not contained there, it does not pay anything——

Mr. POMERENE. Of course not.

Mr. SMOOT. No matter what it is. If it is 10 per cent, or 20 per cent, or 30 per cent, it will be just what is contained in the cloth. Ten per cent is the limit. So they will not pay them anything if 9 per cent of the cloth contains these threads. They will not pay them anything if 5 per cent of the cloth contains these threads. It has to be over 10 per cent, and when it is 10 per cent they pay it upon the amount contained in the thread or cloth.

Mr. POMERENE. Then the Senator's construction of this language is, to use the illustration which I have used, that they would pay only 10 cents on the 10 pounds?

Mr. SMOOT. It could not be otherwise.

Mr. POMERENE. That answers my question.

Mr. SMOOT. On any part of the 10 pounds they would pay the proper proportion of the 10 cents a pound, with the single exception that unless there is at least 1 pound of it, they do not pay anything. If there are only 14 ounces of that 10 pounds, they will not get any compensation whatever.

The VICE PRESIDENT. The question is on agreeing to the committee amendment as modified.

Mr. SMITH. Is that on paragraph 905a?

Mr. SMOOT. It is.

Mr. SMITH. That is, the question is on the paragraph as amended?

Mr. SMOOT. It is.

Mr. SMITH. It is the final vote on the paragraph, and I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. POMERENE (when his name was called). I have a general pair with my colleague [Mr. WILLIS]. Not being able to obtain a transfer, I withhold my vote. If at liberty to vote I would vote "nay."

Mr. ROBINSON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Missouri [Mr. REED] and vote "nay."

Mr. SMITH (when his name was called). Transferring my pair with the Senator from New York [Mr. WADSWORTH] to the Senator from Texas [Mr. CULBERSON], I vote "nay."

Mr. TRAMMELL (when his name was called). In the absence of my pair, the Senator from Rhode Island [Mr. COLT], and being unable to get a transfer, I withhold my vote. If permitted to vote, I would vote "nay."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before as to the transfer of my pair, I vote "yea."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from New York [Mr. CALDER] with the Senator from Georgia [Mr. HARRIS];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Montana [Mr. MYERS].

Mr. NEW. Transferring my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from Vermont [Mr. PAGE], I vote "yea."

Mr. GLASS. Making the same announcement as on the previous vote, I vote "nay."

Mr. LODGE (after having voted in the affirmative). The senior Senator from Alabama [Mr. UNDERWOOD] has not voted, and I therefore transfer my pair with that Senator to the Senator from Maryland [Mr. WELLER] and allow my vote to stand.

The result was announced—yeas 32, nays 22, as follows:

YEAS—32.

Ball	France	Lodge	Oddie
Brandegee	Gooding	McCumber	Pepper
Broussard	Hale	McKinley	Phipps
Capper	Harreld	McLean	Shortridge
Curtis	Johnson	McNary	Smoot
Edge	Jones, Wash.	Moses	Sterling
Ernst	Kendrick	Nelson	Townsend
Fernald	Keyes	New	Warren

NAYS—22.

Ashurst	Glass	Lenroot	Smith
Borah	Heflin	Overman	Stanley
Caraway	Hitchcock	Robinson	Swanson
Dial	Jones, N. Mex.	Sheppard	Walsh, Mass.
Fletcher	Kellogg	Shields	
Gerry	King	Simmons	

NOT VOTING—42.

Bursum	Harris	Owen	Trammell
Calder	Harrison	Page	Underwood
Cameron	Ladd	Pittman	Wadsworth
Colt	La Follette	Poindexter	Walsh, Mont.
Crow	McCormick	Pomerene	Watson, Ga.
Culberson	McKellar	Ransdell	Watson, Ind.
Cummins	Myers	Rawson	Weller
Dillingham	Newberry	Reed	Williams
du Pont	Nicholson	Spencer	Willis
Elkins	Norbeck	Stanfield	
Frelinghuysen	Norris	Sutherland	

So the committee amendment as modified was agreed to.

The VICE PRESIDENT. The Secretary will state the next amendment.

The READING CLERK. The next amendment is, in paragraph 906, the paragraph covering tracing cloth, page 126, line 4, to strike out "17" and insert "20" before the words "per cent ad valorem."

Mr. SMOOT. I rose to say just a few words for the RECORD, but if Senators are ready to vote I will not say anything. Does the Senator from South Carolina desire to say anything on the amendment?

Mr. SMITH. I think, taking into consideration the difference in the American and foreign valuations, the rate as adopted by the House and the Senate committee are about the same, and it is about equal to the rate of duty in the present law.

Mr. SMOOT. The rate of duty upon tracing cloth is within 1 per cent of the rate in the Underwood law.

The amendment was agreed to.

The next amendment was, in paragraph 906, on page 126, line 8, to strike out "17" and insert "20."

Mr. SMOOT. The same explanation applies to that amendment.

The amendment was agreed to.

The next amendment was, on line 11, to strike out "20" and insert "30."

Mr. SMITH. I think the Senator will agree with me that that rate is too high.

Mr. SMOOT. The Senator has reference to waterproof cloth?

Mr. SMITH. Yes. The rate in the present law is 25 per cent, and this rate amounts to about 37 per cent. So it is an increase of 12 per cent, when the waterproof cloth, of which I have a sample here, is nothing but very heavy, tight-woven cloth. It is not waterproofed; it is just waterproof cloth. Any mill can make it. I am informed that the value of the imports for 1921 was only $63,000, whereas the amount we use is something like $10,000,000 worth. I would suggest to the Senator that we reduce that rate to the House rate. That would about take care of the situation.

Mr. SMOOT. The Underwood Act places a duty of 25 per cent on this article, and the equivalent duty provided for by the amendment is only 37 per cent. The Payne-Aldrich duty was 50 per cent. Perhaps if this waterproof cloth were just single cloth, it would be enough to impose a duty of 30 per cent, but sometimes it is composed of threefold or twofold cloth, and an immense amount of expensive work is required to make it. This duty is put on to take care of that kind of cloth, and I can not see why it should be reduced below 37 per cent.

Mr. SMITH. The equivalent ad valorem under the Payne-Aldrich law, calculated upon the valuation of the cloth now, would be 34 and a fraction per cent, and under this amendment it is 37.09 per cent.

Mr. SMOOT. It is unfortunate that that statement has so often been taken by a number of Senators as being a just statement. There is no one who does not know that at this time cotton cloths of all kinds are double the prices they brought in 1910. It is true that if you take those prices of 1910, with this ad valorem duty, the rate would be about 34 per cent; but the

prices of cloth are not the same to-day as they were in 1910, and it is unfair to compare the equivalent ad valorem. Under the Payne-Aldrich law in 1910 the import duty was 50 per cent.

Mr. SMITH. It was 49.7.

Mr. SMOOT. It was practically 50 per cent, and with the prices of cloth as they are to-day this rate is the equivalent of 37.09 per cent. That is the difference. In other words, it is a reduction from the Payne-Aldrich rate of 12½ per cent.

Mr. SMITH. Oh, no; it is not fair to bring in the Payne-Aldrich law.

Mr. SMOOT. We can not go back and take the price of 1910. Taking the price of to-day the equivalent ad valorem is 37.09.

Mr. SMITH. Under this bill?

Mr. SMOOT. Yes; and the equivalent ad valorem under the Payne-Aldrich law was 50.

Mr. SMITH. It was 34.17.

Mr. SMOOT. No; that is, provided the price was as of to-day; but I am speaking of the price to which the Payne-Aldrich law was applied.

Mr. SMITH. Yes; and it amounted to 49.73.

Mr. SMOOT. Yes; I said 50.

Mr. SMITH. This fabric is made out of very coarse yarn. It is whole woven. It is just a very tight weave, made for automobile covers.

Mr. SMOOT. That is one type. I just stated that we could get along with the one-ply type, but we have the three ply and the two ply, and we have to protect them.

Mr. SMITH. The Senator knows the character of this cloth even where it is of more plies or where it is waterproofed, where rubber is compressed into it, and any mill may perform that act, but he can not claim that these goods are of a very highly technical composition.

Mr. SMOOT. Not of the one ply, but it is of the two ply and three ply.

Mr. SMITH. Even in the other plies it is very easily woven. I do not see why we should add to the already exorbitant cost of the ordinary automobile by putting a duty that is from 10 to 15 or 20 per cent higher on the covers of the cars, when we are importing practically none and are furnishing more than our own people can consume.

The House had a duty, whether or not in part of India rubber, of 5 cents per square yard and 20 per cent.

Mr. SMOOT. That was the American valuation.

Mr. SMITH. Yes; I will admit that it was American valuation. The Senate committee changed it to 5 cents per square yard and 30 per cent, but it seems to me that 5 cents a yard and 20 per cent ad valorem would be adequate to protect.

Mr. HITCHCOCK. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. EDGE in the chair). Does the Senator from South Carolina yield to the Senator from Nebraska?

Mr. SMITH. I yield.

Mr. HITCHCOCK. I would like to inquire, combining the 5 cents per square yard with the 30 per cent ad valorem, what total ad valorem protection is given?

Mr. SMITH. Under the present bill it is 37.09 on the cloth.

Mr. HITCHCOCK. It is something, of course, that is made by machinery here just as well as elsewhere?

Mr. SMITH. Certainly. We imported practically none. The Senator has some idea of the number of automobiles in the country that have been covered with this kind of cloth. I have not the exact figures, but 99 per cent of the cloth that we have used of this kind is produced in this country.

Mr. HITCHCOCK. Does the Senator from Utah concede that the imports are practically negligible?

Mr. SMOOT. The imports for 1921 were negligible, but there were $63,898 worth.

Mr. HITCHCOCK. How were they for 1920 and other years?

Mr. SMOOT. I have not the figures here.

Mr. HITCHCOCK. I mean under the Underwood-Simmons tariff law have they ever amounted to much?

Mr. SMOOT. No; I do not think they have been heavy.

Mr. HITCHCOCK. Then why increase the duty?

Mr. SIMMONS. I have the figures. In 1914 the importations were $88,427. Since then they have increased. In 1918 they were $191,000; in 1919, $139,000; in 1920, $121,000; and for the first nine months of 1922 they were $73,000.

Mr. SMITH. The Tariff Information Survey on waterproofed cotton and other vegetable waterproofed fiber contains a table beginning with the year 1899. It reached its maximum in 1909. It then dropped off rapidly down to 1914, when the war interfered and importations were practically shut off. Then in 1914–15 it went back to 151,000 square yards and reached its maximum in 1917, and has declined since until we have about 133,000 square yards. But, taking any year, the number of yards is absolutely negligible measured by the millions of yards used in the country.

Mr. SIMMONS. That shows that the present rate is practically a prohibitory rate.

Mr. SMITH. That is true. The importations from 1913 up to the present would indicate that the present rate of duty is not only a protective duty but practically a prohibitory duty.

Mr. SMOOT. I admit that on the singles it is.

Mr. SMITH. It is on all of them.

Mr. SMOOT. I know that, but almost all of the European importations are twofold and threefold.

Mr. SIMMONS. Then, if we want to make the tariff higher to cover these highly specialized articles, why not differentiate? Why impose it upon all characters of waterproofed cloth when it is admitted that there are no importations of certain characters of cloth?

Mr. SMOOT. As long as goods do not come in under the rate we have to-day, why go to work and take account of all those goods? We could write a tariff here a thousand miles long if we undertook to separate every type within a class. That has never been done that I know of in the history of tariff making.

Mr. SMITH. I am of the impression that three-quarters of the importations are of the single ply.

Mr. SMOOT. I do not so understand it.

Mr. SIMMONS. Why not separate it, as I have suggested? The 20 per cent duty has been absolutely prohibitory as to probably 95 or 96 per cent of all of the cloth coming into the country. Now, the Senator has said there is a special variety that this does not exclude. Why not describe that variety and increase the rate as to that particular variety?

Mr. SMITH. Taking all that is imported, it was negligible. That being true and the evidence being to the effect that they have not sent in enough to seriously interfere with the manufacture of that kind of cloth, I see no reason in the world why the rates of duty should be raised.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee on page 126, line 11.

The amendment was agreed to.

Mr. SMOOT. In the next paragraph I want to submit an amendment. I will submit it at this time before the first amendment is agreed to, so that Senators can see just what the amendment will provide.

On page 126, in line 15, beginning with the word "less," strike out the balance of the paragraph and insert "rate of duty of more than 45 per cent ad valorem," so as to read:

Provided, That none of the foregoing shall pay a rate of duty of more than 45 per cent ad valorem.

The House provided that it shall not pay a less duty, and the committee decided that in this case they did not want to impose a duty upon these cotton cloths containing silk and artificial silk higher than the fancy cloths that we have provided for in paragraph 905a. The object of the amendment is to make it conform to that paragraph. They are all specialties

Mr. SMITH. The showing on cloths containing silk is worse than as to the imports of fine cotton cloths, because our imports of cotton cloths containing silk were only $79,882 in value. The quantity was 297,000 square yards. The domestic production was $29,759 worth. The quantity produced was 81,591 square yards. We have no statistics showing the exports, because these were not differentiated in our exports from other cloths, but, according to the experts, the amount that we imported into this country is practically negligible, showing that the present rate of duty on these cloths has acted more prohibitorily and has had more restraint than it had even on the cotton cloths. Yet it is proposed to increase the rate of duty, when we practically have imported none under the present rate of duty and where it appears that these cloths that are imported into this country have no competition.

The Senator from Utah proposed in effect to amend by striking out "less" and inserting the word "more" between the words "duty" and "than," and in place of "33" to insert "45." Does the Senator propose to adhere to the "25" as against the "17"?

Mr. SMOOT. Yes; because the specific duty, in case these goods went down in price, of course might be altogether too high, and therefore we limit it to 45 per cent, the same as we limited the fancy cloths in paragraph 905a. Of course, there is not nearly the amount of these goods used as of the other goods. There is very little comparison as to the amount of yardage or value, but the committee desired to limit it to 45 per cent. The Payne-Aldrich law has a minimum of 50 per cent, no matter what the equivalent ad valorem was, taking the specific and the given ad valorem together, and with that minimum ad valorem

under the prices existing in 1910 the equivalent ad valorem was 58 per cent. But the committee now say that in no case, no matter whether prices go back to the 1910 basis or not, shall the rate be more than 45 per cent.

Mr. SMITH. But under the present law the duty is 30 per cent. As it now stands proposed by the committee it would be 54.77 per cent, which shows that when we say it "shall not be more than," it means a straight duty of 45 per cent.

Mr. SMOOT. Yes; with the prices as of to-day. But suppose the prices fall, then, of course, the maximum of 45 per cent would apply. It would apply to-day. There is no doubt about that. When the rates of the Dingley law applied the equivalent ad valorem was 58 per cent, and now it can not be more than 45 per cent, the way the committee have changed it. The House reported it just the same as it was under the Payne-Aldrich law, expressed in American valuation instead of foreign valuation, for they said "a less rate of duty than 33½ per cent ad valorem" and under the transposition of American valuation into foreign valuation it amounted to 50 per cent.

Mr. SMITH. The point I am making is that we have just raised the rate on this article 15 per cent—from 30 per cent to 45 per cent.

Mr. SMOOT. That is true under the prices of to-day. There is no doubt about that.

Mr. SMITH. But the importations are negligible. If the Senator thinks that so large a duty should be imposed on goods, which are composed in part of silk, with such a minimum importation and such a vast volume of them being used in this country, the consumption amounting to $29,000,000 worth as against only $79,000 worth imported, I think we ought to have a roll call on the proposition, in order that Senators may go on record as to whether or not, despite the fact that there are no importations, the people of this country who buy cotton goods in which there is an admixture of silk shall be compelled to pay an increased duty of about 45 or 50 per cent.

Mr. SMOOT. I want to say one thing more and then I am through. Unless we provide a rate the same as that which is fixed in paragraph 905, there will be nothing otherwise to prevent putting in one thread of artificial silk in any part of the goods and then having them fall under this paragraph. We do not want to leave that loophole, Mr. President. It seems to me as to this class of cotton goods containing silk and artificial silk, that anybody who wants to buy any particular style which is not made in America should not object to paying the 45 per cent duty.

Mr. SMITH. Though the figures as to the different classes can not be separated, because of the fact that our exports of these particular goods are covered in the general statistics with reference to the export of cotton cloths, I am informed by those who know, by experts, that of these cotton-silk shirtings we export a great deal more than we import, showing that under the present rate of duty the industry is not only amply protected but really that the present law operates as an embargo, in that we are underselling manufacturers of like goods in Europe.

The PRESIDING OFFICER. The question is on the committee amendment.

Mr. SMITH. In that paragraph, I move that the House rate——

Mr. SMOOT. If the Senator from South Carolina wishes to adjust the matter, the only way to do so is to move that the maximum rate of 45 per cent, which is provided by the amendment which I have just offered, be decreased.

Mr. SMITH. I recognize that the Senator has his percentages a little out of line in stating that their relation is 17 to 25. As I figure it out, the difference between the foreign valuation and American valuation would be 17 to 20. That would be about their relation.

Mr. SMOOT. That would all depend upon the price of the goods, because this is a compound duty.

Mr. SMITH. I know; but that is the general percentage.

Mr. SMOOT. The only way the Senator can change it would be to substitute a lower rate than 45 per cent for the maximum rate to be charged for the goods falling in that paragraph.

Mr. SMITH. I accept the Senator's wording. I move to amend the paragraph so that it will read:

That none of the foregoing shall pay a rate of duty more than 30 per cent.

Mr. SMOOT. That would be the rate provided for in the existing Underwood tariff law.

Mr. SMITH. I move to change the rate of 45 per cent to 30 per cent. That reduces the duty 15 per cent and maintains the parity.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from South Carolina [Mr. SMITH] to the amendment of the committee.

Mr. LENROOT. Mr. President, I merely wanted to ask the Senator from Utah [Mr. SMOOT] one question. The Senator contends that unless this rate is made 45 per cent all the other cloths for which we have provided a maximum duty of 45 per cent might come in under this rate?

Mr. SMOOT. It is the other way, I will say to the Senator from Wisconsin. I have spoken the way I have in justification of the committee amendment.

Mr. LENROOT. I understand.

Mr. SMOOT. If we did not have the 45 per cent duty in this case, if we made it 50 per cent, I will say, with one thread of silk in the goods, they could be brought in under a less rate of duty.

Mr. LENROOT. It is upon the highest counts where the 45 per cent applies. Are shirtings and goods of that kind of higher or lower counts?

Mr. SMOOT. I will say to the Senator that most of the shirtings, I think, run about 65, 66, 68, and 70.

Mr. LENROOT. Does not the Senator think that the rate could be made 40 per cent, in view of the fact that 30 per cent is now practically prohibitive? Would not that still harmonize with what we have done?

Mr. SMOOT. I would not want to do that unless I had examined the samples, I will say to the Senator from Wisconsin.

Mr. SMITH. I think an examination of the samples even of the finer grades of shirting will disclose that they are made out of counts which contain as low as 30 threads.

Mr. LENROOT. I think the Senator from Utah could well accept 40 per cent instead of 45 per cent.

Mr. SMOOT. Mr. President, without any further examination of the matter I could not do so.

Mr. LENROOT. Upon the face of the figures, there are no imports.

Mr. SMOOT. If the Senator wants the paragraph to go over, I am perfectly willing that it shall go over in order that it may be examined; but it is not now a question of imports particularly.

Mr. LENROOT. We merely want a proper relationship.

Mr. SMOOT. I want this balanced up so that goods properly falling in some other paragraph can not come in under this paragraph.

Mr. LENROOT. Very well, but the Senator will understand that if these goods come in of a lower count they will not take a rate of 40 per cent, because in the lower counts the manufacturers would still prefer that they should come in under the countable paragraphs.

Mr. SMOOT. I wish to be sure of that before I agree to the Senator's proposition.

Mr. SMITH. I think when the Senator from Utah investigates the matter he will find that by far the greater quantity of silk and cotton shirtings are of the lower count; and I think that a duty of 30 per cent would be ample to take care of the situation because we are selling these goods in Manchester, England. I think an investigation by the Tariff Commission will show that to be the fact.

Mr. SMOOT. The Senator from Arizona [Mr. ASHURST] the other day showed samples of cloths which were made in southern mills in this country with 120 counts of yarn; and, by the way, I will say to the Senator that as to shirtings—I am not positive of it, but my information is—they come in here of 64, 66, 68, and 70 counts.

Mr. LENROOT. They must be of lower counts, because I find the average value in 1921 is only 21.3 cents per yard.

Mr. McLEAN. That may be so, but I suggest to the Senator from Utah that under this paragraph cloth, no matter how fine, could be brought in if it contained a thread of silk.

Mr. SMOOT. Silk or artificial silk.

I ask that this paragraph go over in order that we may ascertain just what the counts are. I notice here by an examination of the compilation of samples selected by the Tariff Commission that there are no goods mentioned falling under this paragraph, and so I should like to have the matter investigated.

Mr. SMITH. Very well.

The PRESIDING OFFICER. Is there objection to passing over the committee amendment as modified? The Chair hears no objection. The Secretary will state the next amendment.

Mr. SMOOT. Paragraph 908 covers tapestries and other Jacquard woven unholstery cloth, Jacquard woven blankets, and Jacquard woven napped cloths. I move that 45 per cent be substituted for 50 per cent in line 20.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. The Senator from Utah proposes to amend the committee amendment by striking out "50" and inserting "45," so as to read "45 per cent ad valorem."

Mr. SMITH. Mr. President, just a moment. I desire to see if the amendment conforms to the amendment which the Senator is going to propose in paragraph 907.

Mr. SMOOT. That is a straight 45 per cent ad valorem duty.

Mr. SMITH. Does the Senator do that to conform with the amendments in the preceding paragraph?

Mr. SMOOT. Yes; with the Jacquard woven cloth provided for in the preceding paragraph. In this instance a straight 45 per cent ad valorem duty is proposed.

Mr. LENROOT. The present rate is 35 per cent, and there are large imports.

Mr. SMOOT. Yes; there are large imports.

The READING CLERK. On page 126, line 17, after the word "cloths" and the comma, it is proposed to insert "Jacquard woven blankets and Jacquard woven napped cloths, all the foregoing," so as to read:

PAR. 908. Tapestries, and other Jacquard woven upholstery cloths, Jacquard woven blankets and Jacquard woven napped cloths, all the foregoing, in the piece or otherwise, composed wholly or in chief value of cotton or other vegetable fiber——

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

Mr. SMITH. I find that the duty on the class of goods covered by the paragraph is 10 per cent higher than the present rate.

Mr. SMOOT. Yes; but the Senator must know that of Jacquard figured upholstery goods there have been imported 63,573,872 square yards. The paragraph also covers tapestry piece goods, of which there have been 4,013,687 square yards imported.

Further I wish to say to the Senate that under a recent decision of the Treasury Department the Jacquard woven netting falls under this paragraph also.

Mr. SMITH. I am informed that lace curtains were formerly included but under the decision of the Treasury Department or the court they were eliminated, and therefore the amount of importations under this paragraph would be correspondingly reduced. I have not the table before me showing exactly what the importations into the country were.

Mr. SMOOT. The elimination of the lace curtains could not reduce the figures as to the importation of tapestry and piece goods.

Mr. SMITH. It did include curtains until it was decided they did not fall within the paragraph.

Mr. SMOOT. Yes; nets and nettings.

Mr. SMITH. Mr. President, in view of the action taken by the Senate on the preceding paragraph, I shall let that go.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The READING CLERK. On page 126, line 20, in lieu of the amendment proposed by the committee, "50," it is proposed to insert "45," so that it will read:

Composed wholly or in chief value of cotton or other vegetable fiber, 45 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to.

The READING CLERK. The next amendment is in paragraph 909.

Mr. SMOOT. Mr. President, in that paragraph I desire to substitute "50" for "55" on line 25.

The PRESIDING OFFICER. The amendment, as modified, will be stated.

The READING CLERK. In lieu of the figures proposed by the committee, "55," it is proposed to insert "50," so that it will read:

Pile fabrics, composed wholly or in chief value of cotton, including plush and velvet ribbons, cut or uncut, whether or not the pile covers the whole surface, and manufactures, in any form, made or cut from cotton pile fabrics, 50 per cent ad valorem.

Mr. SMOOT. Mr. President, this applies to plushes and velvet ribbons, cut or uncut, and pile covers and pile cloths of all sorts. They are very difficult articles to manufacture. It is like manufacturing a double cloth, and then they have to cut the pile in two. It is very difficult work, and it runs all the way from 200 picks to 400 picks to the inch, according to the fineness of the face.

Mr. SMITH. Mr. President, under the present rate of duty our imports have steadily decreased, until in 1921 we imported to the value of $270,788.

Mr. SMOOT. I will say to the Senator that my opinion is that that is due to style more than anything else.

Mr. SMITH. We ourselves manufactured 72,255,000 square yards, of a value of $51,251,000. In 1914 we had imports of a value of $1,945,000; in 1910, $518,000; but in 1921 we only had $270,788 worth, or 210,954 square yards.

Mr. SMOOT. Does the Senator know that in 1919, I think, and along in 1917 and 1918, these cotton velvets, so called, were worn by ladies as dresses of luxury, and no lady's wardrobe was complete without one? I suppose now you could go to any gathering and you would not find a lady there dressed in a cotton velvet or a silk dress, either. They are out of fashion. This is one style of goods that comes into fashion just so often, and when they come in all the ladies wear them, and when they go out none of them do; and you can not tell by the imports, nor can you tell by the production each year, just what is used in the United States.

Mr. SMITH. Mr. President, regardless of any style or the change of any style, the imports from 1891 to 1920 have steadily decreased. For instance, the quantity in 1902 was 9,659,[illegible]08 square yards. In 1904 it was 6,978,000 square yards. In 1905 it was 5,211,000 square yards. In 1906 it was 3,577,000 square yards. In 1907 it was 3,218,000 square yards. In 1909 it was 1,122,000 square yards. I will skip the next few years, because it gradually goes down. In 1919 it was 533,000 square yards. In 1920 it was 832,000 square yards. These figures show that the importations of all those kinds of fabrics steadily decreased. That was under a 40 per cent duty, showing that it was practically prohibitive. Now, why increase it? Why is not that ample? Why do we propose to increase the rate when the present rate is wholly effective, not as a protection but it seems to be acting as an embargo against the importation of these goods?

I am taking the Senator and his party at their word, that what they want to do is to measure the difference in cost abroad and at home, not in theory but in actual practice, and testing it out when they find that they are satisfied with it. The facts are that under a 40 per cent duty you have practically shut out these goods. What excuse is there for raising the duty? These goods do not come under the classification of any that have preceded them. In view of this plain proof of the adequacy of the present rate of duty, why is it desired to raise it?

I have done my best to help expedite this bill, and I have tried to help Senators on the other side to whip it into some kind of shape, because everybody here recognizes that this thing is something like the Bible said about Melchizedek, "Having neither beginning of days nor end of life." It is a hodgepodge. Whoever composed this bill, as Paul said about the Jews, had "a zeal of God, but not according to knowledge." They had a zeal to put all the duty they could rake and scrape into every nook and corner, without any regard to the scientific structure of the bill. Your own theory is that all you want to do is to measure the difference between the cost abroad and at home. I take you at your word and ask you to apply your own doctrine, and you will not do it.

Mr. SIMMONS. We have no information at all as to the cost of production abroad and at home.

Mr. SMOOT. Oh, no; I know we have not. The Senator does not think that we have given any time at all to it; but I want to call the attention of the Senator from South Carolina to the fact that in the rate we give here is included the compensatory duty for long-staple cotton. If you take the price of these goods, and take the 40 per cent that is in the Underwood-Simmons bill, and figure the cost of these goods to-day, and give them the compensatory duty for the 7 cents a pound on long-staple cotton, I want to tell you that there is very little difference between the rate imposed under this bill and that imposed in the existing law. We are not asking for a compensatory duty in this paragraph for long-staple cotton, but we know that long-staple cotton is what is used in the manufacture of these goods.

Mr. LENROOT. Mr. President, will the Senator yield at that point?

Mr. SMITH. If the Senator will allow me, I have those figures right here. If the Senator has them, I should be glad to have him insert them in the RECORD.

Mr. LENROOT. About one-eighth of the imports in 1921 were of long-staple cotton and seven-eighths were not of long-staple cotton, and therefore did not carry the compensatory duty.

Mr. SMOOT. That may be on the cheaper lines, of course.

Mr. LENROOT. That is all the imports of pile fabrics.

Mr. SMOOT. Then those are the ones that came in.

Mr. LENROOT. The average was $1.26 per square yard for the ordinary cottons and $1.56 per square yard for long-staple cotton.

Mr. SMOOT. Yes; but I want to say to the Senator that they run up as high as $4 and $5 a yard. Those are the cheaper lines of goods.

Mr. SMITH. Mr. President, this bears out the contention that was made by the Senator from North Carolina [Mr. SIMMONS] and others here that you are going to penalize the great bulk of cotton goods by virtue of the compensatory duty on the Arizona cotton. Here is an illustration of that fact.

Mr. SMOOT. Oh, no.

Mr. SMITH. Well, read the language of it. It says here:

In any form, made or cut from cotton-pile fabrics, 45 per cent ad valorem.

You do not say whether composed of 1⅛-inch cotton or not. You say "all these fabrics," and the Senator from Wisconsin [Mr. LENROOT] has shown that about one-eighth of them are composed of that kind of cotton, and yet you impose a compensatory duty upon the whole business.

Mr. SMOOT. Yes; and to-day, under the existing law, all kinds of these fabrics carry a duty of 40 per cent, and there is no duty upon long-staple cotton.

Mr. LENROOT. Mr. President, will the Senator yield? I wish to make a correction. The expert calls my attention to the fact that the imports that I read of the first five months did not carry a compensatory duty.

Mr. SMOOT. Mr. President, the question of policy came up as to whether we should undertake to enumerate all of these tapestries and pile fabrics of all kinds, and in each case put on a compensatory duty according to the amount of cotton used in the goods; and it was decided to apply it to paragraphs 903 and 905a only and provide the rates to take care of that outside. The House gave a duty of 45 per cent on foreign valuation, 30 per cent on American valuation. That meant 45 per cent. That is one-third off. At that time they had no rate of duty upon long-staple cotton, so we have cut the rate by whatever amount the duty upon long-staple cotton may affect the price of those goods. That, of course, is 10 cents a pound upon every pound of it that goes into the pile fabrics, and it is a large decrease from the House rate.

The PRESIDING OFFICER. The question is upon agreeing to the amendment of the committee, as modified.

The amendment, as modified, was agreed to.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The READING CLERK. On page 127, line 2, it is proposed to strike out "25" and insert "40," so as to read:

terry-woven fabrics, composed wholly or in chief value of cotton, and manufactures, in any form, made or cut from terry-woven fabrics, 40 per cent ad valorem.

Mr. SMOOT. In that case we gave just exactly the duty provided by the present law.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. SMOOT. Mr. President, in paragraph 910, I want to modify the 40 per cent ad valorem to 30 per cent ad valorem.

The PRESIDING OFFICER. The question is upon agreeing to the committee amendment as modified, which the Secretary will state.

The READING CLERK. In paragraph 910, page 127, line 6, the Senator from Utah proposes to strike out "28" and to insert in lieu thereof "30," so as to read:

PAR. 910. Table damask, composed wholly or in chief value of cotton, and manufactures, in any form, composed wholly or in chief value of such damask, 30 per cent ad valorem.

Mr. SMITH. Of course, I will have another chance at that. I will let the vote be taken.

The amendment as modified was agreed to.

The next amendment of the committee was, in paragraph 911, page 127, line 8, after the words "bedspreads," to insert the words "in the piece or otherwise," and a comma.

Mr. SIMMONS. Mr. President——

Mr. SMOOT. This is just to correct the wording.

Mr. SIMMONS. I have no objection to that amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The READING CLERK. The next amendment is, on page 127, line 11, where the Senator from Utah [Mr. SMOOT] proposes to strike out "30" and insert in lieu thereof "40," in lieu of the 45 per cent proposed by the committee.

Mr. SMITH. The present rate is 25 per cent.

Mr. SMOOT. No; it is 30 per cent.

Mr. SMITH. The maximum was 30 per cent. I see that the present law makes a distinction between bedspreads and quilts.

Mr. SMOOT. No; they both bear a rate of 30 per cent.

Mr. SMITH. One is under paragraph 264, and the other is under paragraph 266. One is 30 per cent, and the other is 25 per cent.

Mr. SMOOT. If the Senator will notice, on the other quilts—bedspreads, wholly or in chief value of cotton—I propose to amend by striking out "30" and inserting "25." The rate in the existing law is 30 per cent. This proposed rate is 5 per cent less than the rate in existing law.

Mr. SMITH. I did not quite catch that.

Mr. SMOOT. The Senator was speaking of other quilts or bedspreads, in line 12, wholly or in chief value of cotton. I have offered an amendment to substitute "25" for the 30 per cent ad valorem, and if the Senator will look up the existing law he will find that the rate is 30 per cent. In other words, the rate in the amendment is 5 per cent lower than the rate in existing law.

Mr. SMITH. Let us take the facts in reference to the quilts and blankets.

Mr. SMOOT. That is quilts and bedspreads woven of two or more sets of warp threads or of two or more sets of filling threads. On that we propose a duty of 40 per cent. The rate in existing law is 30 per cent, and the Payne-Aldrich rate was 45 per cent. When we come to other quilts or bedspreads, the second part of this paragraph——

Mr. SMITH. The present law does not separate them. It gives them together, and the imports into this country were valued at $230,000, whereas the domestic production in value was $42,000,000. The production of quilts alone amounted to $10,000,000, and of blankets to $32,000,000, whereas the value of the imports was $230,000, against a combined production of $42,000,000. We have the very same difference in this as we had in the other paragraph to which I called the Senator's attention. A 25 per cent for one and 30 per cent for the other acted as a practical prohibition. On what ground does the Senator raise this duty?

Mr. SMOOT. It was a typographical error, I see, which led me to say that the rate of duty on other quilts and bedspreads under existing law is 30 per cent. It is 25 per cent, just as we propose to make this rate 25 per cent. But the production the Senator speaks of is for all quilts, of every name and nature.

Mr. SMITH. Under the Senator's proposed arrangement he will have the latter classification exactly as it is now, and dividing them, as you do, the other classification would be 15 per cent higher, so that your average would be possibly 10 per cent higher than the present.

Mr. SMOOT. The existing rate is 30 per cent on the quilts and bedspreads woven of two or more sets of warp threads or of two or more sets of filling threads.

Mr. SMITH. It is 30 per cent, and you propose to make it 40 per cent.

Mr. SMOOT. And 25 per cent.

Mr. SMITH. Then, if they were evenly divided you would have 30 per cent and 25 per cent, and your 45 per cent and 25 per cent would be 70 per cent, and you would have 20 per cent additional on the two, when, under the report of the Tariff Commission, you have no imports to speak of. Why the raise? I am simply taking your theory of protection.

Mr. SMOOT. I do not know what the Senator means by 20 per cent more.

Mr. SMITH. You take 25 per cent and 30 per cent. Those are the minimum and maximum under the present law. Add them together, and divide them by 2, and you would have the average.

Mr. SMOOT. That would be 27½ per cent.

Mr. SMITH. The rates under this amendment are 45 per cent and 30 per cent, which would make 75 per cent. The average would be 37½.

Mr. SMOOT. As against 27½.

Mr. SMITH. That would be exactly 10 per cent difference.

Mr. SMOOT. Yes; but that is not the way to take an average.

Mr. SMITH That is the nearest we can approximate it with the figures now before us. In view of the fact that you have all the protection you could ask for in the world, why do you want to increase the rate?

Mr. SMOOT. We are not increasing it.

Mr. SMITH. You are increasing it 15 per cent—that is, you are adding that much more—whereas the present rate of duty seems to be absolutely ample.

Mr. SMOOT. The present rate of duty is ample on other quilts and bedspreads, other than those woven of two or more sets of warp threads or two or more sets of filling thread.

Mr. SMITH. But the Senator has no more statistics than I have to show that the double woven comes in in any greater quantity than the single woven. There are no figures here to show it; so that we must take them all in the same category. The total amount coming in is absolutely negligible in comparison with the domestic production and consumption. So, why add the 10 per cent?

It is not a question of protection. This proves the fact that what you are driving at is to enable the manufacturers of this country to raise their own prices, because under the present rate you are shutting out importations. There is no competition. Why do you add to the rate which seems to be so effective? The only answer can be that you want to give the manufacturers an excuse for adding that much to the prices.

I am going to put into the RECORD the average dividends made by the standard and organized mills of this country, and let the people know what manufacturers need along these lines, as compared with those who have to take their chances with the seasons and with the boll weevil and demoralized finance, and go out and fight with nature to see whether they will make any crop, and when they have made a crop stand at the mercy of the gamblers as to whether they will get anything for it or not. But we sit down and build a wall around those who manufacture the stuff, and impose rates which will compel the American people to pay more than is justified by any doctrine of tariff whatsoever.

Those are the facts I want the American people to know, and I am glad this is going into the RECORD. Here are the figures of the imports, showing that the present rate is not only protective but almost prohibitory. Yet we are asked to add 10 per cent to it.

Mr. SIMMONS. Mr. President, this is one case where I think the facts ought to be fully set out in the RECORD, and I wish to set them out as fully as I can.

This paragraph divides itself into a number of separate articles, and the Tariff Commission in its report has dealt with each one of those separate articles in the statistics as to production, imports, and exports. It appears that the production of bedspreads and quilts in 1919 was valued at $10,250,000. That is the first thing dealt with in the paragraph.

Next is sheets and pillowcases. The production was valued at $3,369,000.

The production of cotton blankets of all kinds was valued at $32,640,000.

The production of towels, toweling, and bath mats, wiping and polishing cloths, was valued at $16,000,000.

The production of dimity, and so forth, is not recorded.

Adding up the value of the production of the several articles provided for in the paragraph, you have something around $60,000,000. That represents the production of the articles covered by this paragraph, which are practically all household cotton products used in connection with the furnishing of the house, quilts for the beds, towels, pillowcases, cotton blankets, mats, and so forth.

Fortunately the Tariff Commission, in dealing with the importations of these articles, divides them up into four parts, just as they divided up the production. First, they give the importations of cotton blankets and quilts, and I find that in the nine months of 1921 the value of the imports of these articles was only $147,433.

Next, they segregate and give the importations of cotton sheets and pillowcases for nine months in 1921, the value being $21,042.

Third, they give the figures as to cotton towels and mats, stating that the imports for the nine months of 1921 were valued at $48,513.

Then we have cotton cloths for polishing, mop cloths, and wash cloths, imports for 1921, $28,378. That would amount in all to around $250,000. In other words, $60,000,000 production and $250,000 imports.

They also, fortunately, in the same way and making the same divisions, give the exportations. They are not all recorded. The exports are not recorded, but are substantial. Their volume is indicated by Canadian statistics, which show imports from the United States for the fiscal year—and this is to Canada—March 31, 1921, valued as follows: Bed quilts and spreads, $235,932; sheets and pillowcases, $125,595; blankets, $257,632; also toweling, $285,995, the greater part of which, however, may have been the Turkish toweling. That gives a total of something over $1,000,000. It seems to be confined to our exports to Canada.

It is a very remarkable thing that we are able to export to Canada about four times as much of these products in value as we imported from all the world. Canada, which is a Dominion of Great Britain, which has a preferential tariff with Great Britain, is able or prefers to buy our products instead of buying the British products. Of course, the tariff, being preferential in favor of the mother country, is lower upon the British products than it is upon the American products, and yet Canada buys from us, which indicates that we can sell for less than Great Britain, who is our great competitor in these products. Then we have the additional fact that while we produce $60,000,000 of these necessary household articles, which have to be used in the humblest home as well as in the palaces of the rich, we are able to supply our domestic demands and supply the domestic demands of our next-door neighbor, and probably, although the facts are not given about it, we export larger quantities to other countries than to Canada.

Of course, if these quilts, blankets, pillowcases, sheets, and towels could be produced more cheaply in Europe than they are here, if the present rate of duty were not sufficient to keep them out of this country, we would have, considering the large use of the products in this country, a larger importation than $250,000 in one year. That is about the total amount of our importations. If there is any object of taxation which we have had to discuss since we have taken up the cotton schedule that would seem to me to be fully protected by the present duty, it would be these particular products.

The Canadian exportations show very conclusively to my mind that we must be making these products, even if there were no duty upon them, at a price that would enable us to hold our markets against Great Britain without a duty, because we do hold and supply the Canadian market with a preferential tariff in favor of Great Britain.

I do not care to haggle with the Senator from Utah about the increase that he wants to make, but I do think that the committee ought to be satisfied with the rates of the present law in the face of the facts furnished us by the Tariff Commission, especially when it is remembered that we are asked, in the face of those fundamental facts with reference to production, export, and import, to increase the rate which seems not to be required, without any information being given to us even so much as tending to show that any greater protection is required in order to equalize the differences in cost of production here and abroad, or in order to harmonize prices here and abroad, and produce a competitive condition in this market.

In other words—and I can not repeat it too often—it is a very remarkable thing to me that Senators come here and say, "We are proposing to pass a protective measure and we are proposing to give the American producer a protection equal to the difference in the cost of production here and abroad, or a protection which will bring selling prices upon a basis of competition," and yet do not offer us a single line of evidence to show that there is any difference in the cost of production here and abroad, or that there is any difference in the selling price of the product here and in the competing market, if there is any competing market. I say that the facts show that there is no competing market. When we are consuming $60,000,000 worth of the products in this country and only importing $250,000 worth of them from abroad, I say that the facts show that there is no competition between this country and any other country in the world under the present rate of duty.

I asked Senators on the other side, when we began the discussions, to give us some evidence when they proposed a duty, either an original duty or an increase in duty, that the duty was warranted by the principles upon which they say they are operating and the principles upon which they say they have a commission from the people to impose taxes upon them. The people have not authorized them to come here and propose taxes at will or to suit the producers of these products in the country. The people have not authorized them to come here and give to Mr. Lippitt or Mr. Wood or Mr. Littauer whatever they ask. The people have only commissioned them to act in the premises when they find that there are conditions which, according to the platform and the claims of the Republican orators when they were discussing the protective tariff before the people, would justify the rates. Yet they come here day after day, jacking up these rates and giving us not one particle of evidence to show that the facts justify the increase according to the authority which the people have given them. It has been days and days since we have had a word of explanation as to any difference in the cost of production here and abroad or the selling prices of the domestic and the foreign products. We are told that "somebody wants a little more duty and we think the present rates ought to be raised somewhat, or we think there ought to be a compensatory duty here and there to cover dyestuffs or cotton or something else," and that is the end of their statement.

Now, here we are confronted with a case where we have an enormous production, equal to our entire consumption, with

heavy exports to our neighbor, Canada, which has a preferential rate with England, our only competitor, and which country is still buying our goods, with American importations that do not amount to a bagatelle, not worth mentioning, not as many goods as would be consumed in a little village of 10,000 people in one year. Yet the majority want the whole 110,000,000 people in the United States to pay an additional tax upon a thing that we produced to the extent of $60,000,000, the full requirements of the country, because $250,000 worth of goods of the same character come in from somewhere else, without any evidence whatsoever to show that there is any justification for their action in the principle upon which they operate and upon which alone they have authority from the people to act.

Mr. President, I rather feel that I should beg the pardon of the Senate when I discuss a situation of this sort. It rather causes me to lose patience and show unwonted heat. What the majority proposes is so absurd!

Mr. SMOOT. Mr. President, quilts and bedspreads other than those woven of two or more sets of warp or fillings of threads carry exactly the same rates as in the existing law, and as the other quilts cost about four or five times the amount to make and as there is three times the amount of labor in them that there is in the particular quilts mentioned at 25 per cent, the committee have asked that the rates be reduced from 45 per cent to 40 per cent. The existing rate is 30 per cent on these high-grade quilts, which are very costly to make.

Mr. SMITH. Mr. President, I had said all that I wanted to say on this item, and still I do not want the statement the Senator from Utah just made to go into the RECORD without the additional statement that no matter what may be the cost, the proof is that it did not go sufficiently high in this country to cause importations to come in. It does not make any difference whether the double weave costs more than or twice as much as the single weave. The fact is that the statistics show that we exported more than we imported, and the domestic production was infinitely greater, being in the millions, while the importation was only in the thousands. Yet, notwithstanding that fact, because one character of article costs a little more than the other, it is now proposed to increase the duty on the higher-priced goods, when the present duty is prohibitory so far as competition from abroad is concerned. I am willing now that a vote may be taken on the amendment.

Mr. SIMMONS. Let us have a yea-and-nay vote on it.

Mr. SMITH. We shall have to have a yea-and-nay vote on these articles, for the reason that they are articles in such universal and common use. The American people are entitled to have some of the burdens which are placed upon them now removed. They have to bear the income tax; they have to pay the interest on $26,000,000,000 of Government obligations; they have to pay higher freight rates and a higher general average of wages, and local taxes are piling up. Organized society is costing much more than ever before, and yet on top of all that it is now proposed to impose this intolerable burden for the benefit of those who notoriously pay less taxes because their investments so often are largely in Government securities which are nontaxable, while those who are not so fortunate must in the last analysis pay all of this additional cost.

Mr. SMOOT. Mr. President, the manufacturers pay this duty, and, with all these added burdens of which the Senator from South Carolina has spoken, he is now insisting that the rate of protection shall be reduced.

Mr. McCUMBER. Mr. President, if the Senator from Utah will yield to me——

Mr. SMOOT. I yield.

Mr. McCUMBER. I ask unanimous consent that when the Senate concludes its session on this calendar day it take a recess until to-morrow at 11 o'clock a. m.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered. The question is on the committee amendment.

Mr. SMITH. I believe the first committee amendment we have agreed to.

Mr. SMOOT. The first committee amendment has been agreed to.

Mr. SMITH. The next amendment is to reduce the rate from 45 per cent to 40 per cent, and on that I think we should have a yea-and-nay vote.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 127, paragraph 911, line 11, before the words "per cent," the Senator from Utah, on behalf of the committee, proposes to modify the amendment of the committee by striking out the numeral "45" and inserting in lieu thereof the numeral "40."

Mr. SMITH. I have asked for the yeas and nays on the amendment as modified because I shall take the vote thereon as a test vote of the Senate as to whether, without any justification at all in the statistics furnished by the Tariff Commission, it is proposed to impose an additional tax on these prime necessities of the household.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. LODGE (when his name was called). I have a general pair with the Senator from Alabama. I transfer that pair to the junior Senator from Maryland [Mr. WELLER] and vote "yea."

Mr. NEW (when his name was called). Repeating the announcement made on previous ballots this day as to the transfer of my pair, I vote "yea."

Mr. POMERENE (when his name was called). I have a pair for the day with my colleague [Mr. WILLIS]. I am not able to secure a transfer. I do not know how my colleague would vote if present. If I were permitted to vote, I should vote "nay."

Mr. ROBINSON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Missouri [Mr. REED] and vote "nay."

Mr. SMITH (when his name was called). Making the same announcement as previously with regard to the transfer of my pair, I vote "nay."

Mr. WALSH of Montana (when his name was called). I have a general pair with the Senator from New Jersey [Mr. FRELINGHUYSEN]. In his absence, being unable to secure a transfer, I withhold my vote. If at liberty to vote, I should vote "nay."

The roll call was concluded.

Mr. BALL. Transferring my general pair with the senior Senator from Florida [Mr. FLETCHER] to my colleague, the junior Senator from Delaware (Mr. DU PONT), I vote "yea."

Mr. EDGE. Making the same announcement as heretofore with regard to the transfer of my pair, I vote "yea."

Mr. OVERMAN (after having voted in the negative). Noticing that my pair, the senior Senator from Wyoming [Mr. WARREN], has not voted, I am compelled to withdraw my vote.

Mr. GLASS. Repeating the announcement that I made on previous votes as to my pair and its transfer, I vote "nay."

Mr. McCUMBER (after having voted in the affirmative). I transfer my pair with the junior Senator from Utah [Mr. KING] to the senior Senator from Pennsylvania [Mr. CROW] and allow my vote to stand.

Mr. JONES of New Mexico. I am unable to secure a transfer of my general pair, and therefore withhold my vote. If I were permitted to vote, I should vote "nay."

The result was announced—yeas 29, nays 14, as follows:

YEAS—29.

Ball	Hale	McCumber	Phipps
Brandegee	Johnson	McKinley	Shortridge
Broussard	Jones, Wash.	McNary	Smoot
Bursum	Kellogg	Moses	Sterling
Capper	Kendrick	Nelson	Townsend
Curtis	Keyes	New	
Edge	Lenroot	Oddie	
Ernst	Lodge	Pepper	

NAYS—14.

Caraway	Heflin	Sheppard	Swanson
Dial	Hitchcock	Shields	Walsh, Mass.
Gerry	Ransdell	Simmons	
Glass	Robinson	Smith	

NOT VOTING—53.

Ashurst	Frelinghuysen	Nicholson	Sutherland
Borah	Gooding	Norbeck	Trammell
Calder	Harreld	Norris	Underwood
Cameron	Harris	Overman	Wadsworth
Colt	Harrison	Owen	Walsh, Mont.
Crow	Jones, N. Mex.	Page	Warren
Culberson	King	Pittman	Watson, Ga.
Cummins	Ladd	Poindexter	Watson, Ind.
Dillingham	La Follette	Pomerene	Weller
du Pont	McCormick	Rawson	Williams
Elkins	McKellar	Reed	Willis
Fernald	McLean	Spencer	
Fletcher	Myers	Stanfield	
France	Newberry	Stanley	

The VICE PRESIDENT. A quorum not having voted, the Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ball	Dial	Hitchcock	McKinley
Borah	Edge	Jones, N. Mex.	McNary
Brandegee	Ernst	Jones, Wash.	Moses
Broussard	Gerry	Kellogg	Nelson
Bursum	Glass	Kendrick	New
Capper	Gooding	Keyes	Nicholson
Caraway	Hale	Lenroot	Oddie
Cummins	Harreld	Lodge	Overman
Curtis	Heflin	McCumber	Pepper

Phipps	Sheppard	Smoot	Walsh, Mass.
Pomerene	Shortridge	Sterling	Walsh, Mont.
Ransdell	Simmons	Swanson	Warren
Robinson	Smith	Townsend	

The VICE PRESIDENT. Fifty-one Senators have answered to their names. A quorum is present. The Secretary will call the roll on the amendment of the committee as modified.

The reading clerk proceeded to call the roll.

Mr. BALL (when his name was called). Making the same announcement as before as to the transfer of my pair, I vote "yea."

Mr. SMITH. Mr. President, a parliamentary inquiry. We are now voting on the same proposition that we had before us when we had no quorum?

The VICE PRESIDENT. Yes; on the committee amendment as modified.

Mr. EDGE (when his name was called.) Making the same announcement as before, I vote "yea."

Mr. ERNST (when his name was called). I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Michigan [Mr. NEWBERRY] and will vote. I vote "yea."

Mr. GLASS (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as on the previous roll call, I withhold my vote.

Mr. LODGE (when his name was called). Making the same announcement as before as to my pair, I vote "yea."

Mr. McCUMBER (when his name was called). Transferring my pair as on the last vote, I vote "yea."

Mr. NEW (when his name was called). Repeating the announcement as to the transfer of my pair, I vote "yea."

Mr. POMERENE (when his name was called). Announcing my pair as on the previous vote with my colleague [Mr. WILLIS], I find that I can transfer that pair to the senior Senator from Arizona [Mr. ASHURST]. I do so, and will vote. I vote "nay."

Mr. ROBINSON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Missouri [Mr. REED], and will vote. I vote "nay."

Mr. SMITH (when his name was called). I have a general pair with the Senator from New York [Mr. WADSWORTH]. I transfer that pair to the Senator from Texas [Mr. CULBERSON], and will vote. I vote "nay."

Mr. WALSH of Montana (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Louisiana [Mr. RANSDELL], and will vote. I vote "nay."

The roll call was concluded.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from New York [Mr. CALDER] with the Senator from Georgia [Mr. HARRIS];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES];

The Senator from Missouri [Mr. SPENCER] with the Senator from Montana [Mr. MYERS]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 33, nays 17, as follows:

YEAS—33.

Ball	Gooding	McCumber	Phipps
Brandegee	Hale	McKinley	Shortridge
Broussard	Harreld	McNary	Smoot
Bursum	Jones, Wash.	Moses	Sterling
Capper	Kellogg	Nelson	Townsend
Cummins	Kendrick	New	Warren
Curtis	Keyes	Nicholson	
Edge	Lenroot	Oddie	
Ernst	Lodge	Pepper	

NAYS—17.

Borah	Heflin	Sheppard	Walsh, Mass.
Caraway	Hitchcock	Shields	Walsh, Mont.
Dial	Overman	Simmons	
Gerry	Pomerene	Smith	
Glass	Robinson	Swanson	

NOT VOTING—46.

Ashurst	Culberson	Fletcher	Johnson
Calder	Dillingham	France	Jones, N. Mex.
Cameron	du Pont	Frelinghuysen	King
Colt	Elkins	Harris	Ladd
Crow	Fernald	Harrison	La Follette
McCormick	Owen	Spencer	Watson, Ga.
McKellar	Page	Stanfield	Watson, Ind.
McLean	Pittman	Stanley	Weller
Myers	Poindexter	Sutherland	Williams
Newberry	Ransdell	Trammell	Willis
Norbeck	Rawson	Underwood	
Norris	Reed	Wadsworth	

So the amendment of the committee as modified was agreed to.

Mr. SMOOT. On line 12, I ask to substitute "25" for "30." That is the existing rate in the Underwood law.

The VICE PRESIDENT. The amendment as modified will be stated.

The READING CLERK. On page 127, line 12, it is proposed to strike out "20" and insert "25," so as to read:

Other quilts or bedspreads, wholly or in chief value of cotton, 25 per cent ad valorem.

The amendment as modified was agreed to.

Mr. SMOOT. On line 17, I ask to substitute "25" for "30."

The VICE PRESIDENT. The amendment as modified will be stated.

The READING CLERK. On page 127, line 17, it is proposed to strike out "20" and insert "25," so as to read:

Sheets, pillowcases, blankets, towels, polishing cloths, dust cloths, and mop cloths, composed wholly or in chief value of cotton, not Jacquard figured or terry woven, nor made of pile fabrics, and not specially provided for, 25 per cent ad valorem.

The amendment as modified was agreed to.

The READING CLERK. On line 20 of the same page——

Mr. SMOOT. I ask to substitute "30" for "35."

The VICE PRESIDENT. The amendment as modified will be stated.

The READING CLERK. On page 127, line 20, it is proposed to strike out "23" and insert "30," so as to read:

Table and bureau covers, centerpieces, runners, scarfs, napkins, and doilies, made of plain-woven cotton cloth and not specially provided for, 30 per cent ad valorem.

The amendment as modified was agreed to.

Mr. SMOOT. Mr. President, on line 1, page 128, I move to substitute "35" for "40."

The VICE PRESIDENT. The amendment as modified will be stated.

The READING CLERK. On page 128, line 1, it is proposed to strike out "25" and insert "35," so as to read:

Fabrics with fast edges not exceeding 12 inches in width, and articles made therefrom; tubings, garters, suspenders, braces, cords, tassels, and cords and tassels; all the foregoing composed wholly or in chief value of cotton or of cotton and india rubber, and not specially provided for, 35 per cent ad valorem.

Mr. SMITH. Mr. President, I should like to put in the RECORD the fact that the total value of articles of this kind produced in this country was $15,104,000, as against a value of imports of $350,000. The present rate of duty is 25 per cent. The proposed rate is 35 per cent, an increase of 10 per cent. The same argument would apply to this that applied to the rest of them.

Mr. SMOOT. The Payne-Aldrich rate was 60 per cent.

Mr. SMITH. That is true.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

The READING CLERK. On the same page, page 128, line 3, it is proposed to strike out "12½" and insert "15," so as to read:

Spindle banding, and lamp, stove, or candle wicking, made of cotton or other vegetable fiber, 10 cents per pound and 15 per cent ad valorem.

Mr. SMOOT. I ask that that amendment be rejected, so as to leave it 12½ per cent.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

Mr. SMOOT. In paragraph 912, page 128, line 10, I move to strike out "50 cents per pound and 20 per cent ad valorem" and insert "60 per cent ad valorem."

Mr. SMITH. The Senator has passed over an amendment on line 5.

Mr. SMOOT. That is true.

The VICE PRESIDENT. The Secretary will state the amendment in line 5.

The READING CLERK. On page 128, line 5, the committee proposes to strike out "12½" and to insert in lieu thereof "20," so as to read:

Boot, shoe, or corset lacings, made of cotton or other vegetable fiber, 15 cents per pound and 20 per cent ad valorem.

Mr. SMITH. Does the Senator wish to amend that?

Mr. SMOOT. There is no amendment of that amendment, because that is the duty on corset laces, and I will say to the Senator that the manufacturers have asked for about three times that rate. From the testimony produced before the committee there is no question but that it is a small business, but

as long as we have it in this country we must at least give it protection.

Mr. SMITH. Very well; let us vote on it.

The amendment was agreed to.

The next amendment of the committee was, on page 128, line 8, to strike out "20" before "per cent" and insert in lieu thereof "25," so as to read:

Loom harness, healds, and collets, made wholly or in chief value of cotton or other vegetable fiber, 25 cents per pound and 25 per cent ad valorem.

The amendment was agreed to.

The VICE PRESIDENT. The Secretary will state the next amendment.

The READING CLERK. On page 128, line 10, the Senator from Utah proposes to strike from the House text "50 cents per pound and."

Mr. SMOOT. I will state briefly that that applies to labels in which the name or the advertisement of whatever is made is woven into the cloth. In fact, they can weave a figure or any name right into the cloth, and those are used as labels, on very costly goods, generally, with the name of the maker and the article itself.

Mr. SIMMONS. That is a duty on labels for garments or other articles composed of cotton or other vegetable fiber——

Mr. SMOOT. Fifty cents per pound and 25 per cent ad valorem, as proposed by the committee originally. This is 60 per cent—a reduction.

Mr. SIMMONS. I am just in receipt of a telegram which I wish to read to the Senate. It is from Pitts & Kitts Manufacturing & Supply Co., of New York. I do not know anything about them. They say:

To-day's papers report Senate's committee recommendations tariff section 912 on labels, 60 per cent ad valorem. This represents 140 per cent increase over present schedules and 90 per cent over original Senate Finance Committee report. Rates absolutely unfair, confiscatory, and prohibitive.

PITTS & KITTS MANUFACTURING & SUPPLY CO.

I have not had time since I got that telegram to look into this matter, and I will ask the Senator from Utah to let the amendment go over. I want to look into the item, unless the Senator from South Carolina has already investigated it. That is a startling statement.

Mr. SMITH. I would like to state that our imports are about $36,000 and our domestic production $624,000. A good portion of the imports were by our Government for Army purposes, under the urge of the war, and this is an increase. The label covered by it is just a simple device, a figure woven into the cloth. The amount imported, outside of our war emergency, was practically negligible, and by this we increase it——

Mr. SIMMONS. This firm says 140 per cent.

Mr. SMOOT. I am perfectly willing that it shall go over.

Mr. SIMMONS. I would like to look into it.

Mr. SMOOT. Taking it as a whole—that is, all widths, and whether it be closely woven, or only a name without anything else—it is an increase. On certain lines it is not an increase, but the average equivalent ad valorem, taking them all together, is 49 per cent, and this is an increase from 49 over what the House gave.

Mr. SMITH. In the particular form in which it is stated here, eo nomine, the rate is 25 per cent, and now it is proposed to make it 60 per cent.

Mr. SIMMONS. No; it was 50 cents a pound and 25 per cent ad valorem.

Mr. SMOOT. The Senator means the rate in the present act.

Mr. SMITH. I mean in comparison with the present law.

Mr. SMOOT. These goods are just beginning to come here from Germany. This is one of the articles Germany always made, and they are made now in Germany. If the invoices which were shown to the committee are correct, the prices for which they can sell the goods will absolutely prohibit the making of very many of these goods in the United States. Whether those invoices are correct or not, I do not know. All I can say is that the examiners at the port of entry at New York say they are coming in at those prices to-day, and they are very much worried over the industry in the United States. It is a small matter. It does not amount to anything in a suit of clothes, and the manufacturers say that unless they get this rate they will be virtually put out of business. But the amendment may go over.

The VICE PRESIDENT. The amendment will be passed over.

The next amendment of the committee was, on page 128, line 13, to strike out "20" and insert in lieu thereof "30," so as to read:

Belting for machinery, composed wholly or in chief value of cotton or other vegetable fiber, or cotton or other vegetable fiber and india rubber, 30 per cent ad valorem.

The amendment was agreed to.

Mr. SMOOT. That is as far as we will ask the Senate to go to-night.

Mr. SMITH. I understand that the bill will lie over until to-morrow.

Mr. SMOOT. Until to-morrow.

EXECUTIVE SESSION.

Mr. McCUMBER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened and (at 5 o'clock and 55 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Tuesday, July 18, 1922, at 11 o'clock a. m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 17 (legislative day of April 20), 1922.

APPRAISER OF MERCHANDISE.

George O'Brien to be appraiser of merchandise at Philadelphia, Pa.

POSTMASTERS.

COLORADO.

Will J. Wood, Crawford.

CONNECTICUT.

Louis E. Chaffee, Stafford Springs.

FLORIDA.

Add Joyce, Cedar Keys.
Gillian A. Sandifer, Lake Helen.
John W. Philip, Sarasota.

INDIANA.

Shad R. Young, Cicero.
Homer E. Wright, Crandall.
Thomas C. Dodd, Gosport.
Calvin Ulrey, North Manchester.

MASSACHUSETTS.

John P. Brown, Bass River.
Burton D. Webber, Fiskdale.

MICHIGAN.

Natalie G. Noble, Elk Rapids.
Victor H. Sisson, Freeport.
Ward R. Rice, Galesburg.
Otis J. Cliffe, Lakeview.

MINNESOTA.

Fritz Von Ohlen, Henning.
Kenneth S. Keller, Kasson.
Charles A. Allen, Milaca.
Peter G. Peterson, Villard.

SOUTH CAROLINA.

Alice Singletary, Bowman.

SOUTH DAKOTA.

Signora Hjermstad, Wallace.

SENATE.

TUESDAY, *July 18, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

DISTRIBUTION OF SPEECHES BY FEDERAL RESERVE BANK.

The PRESIDENT pro tempore. The Chair lays before the Senate a communication from the governor of the Federal Reserve Board, transmitting, pursuant to Senate Resolution 308, a letter from the Federal Reserve Bank of San Francisco, relative to the circulation of a speech delivered by Senator GLASS on the Federal reserve system. The communication and accompanying letter will lie on the table for the present.

PERSONAL PRIVILEGE—MUSCLE SHOALS PROJECT.

Mr. NORRIS. Mr. President, I rise to a question of personal privilege. On Saturday last the Senator from Arkansas [Mr. CARAWAY] made some remarks in regard to what happened in the Committee on Agriculture and Forestry, which I feel justify me in taking the floor as a matter of privilege.

In the first place, I want to absolve entirely the Senator from Arkansas from any intention of putting me in a false attitude. I think under the circumstances it was not to be wondered that any member of the committee might have a

misunderstanding of what occurred, and some of the things which he said happened there I am not going to deny. The Senator from Arkansas is entirely mistaken on the one thing that causes me to say anything on the subject, because it has direct reference to myself. I was not present when the Senator spoke, but I saw the Senator shortly after he spoke on Saturday afternoon and he told me in substance what he had said.

It was stated by the Senator from Arkansas in his remarks that the chairman of the Committee on Agriculture and Forestry, which, of course, could refer to no one but myself, decided that the Senator from Vermont [Mr. PAGE] was entitled to vote on the question as to whether that Senator had a right to vote. In that respect the Senator from Arkansas was entirely mistaken. The chairman of the committee never made such a decision. I do not believe that such a decision would be right. When the Senator from Arkansas told me what he had understood, I said that would of course be erroneous, and I would not make such a decision. I do not believe that would be a proper decision to make. I never did, as a matter of fact, make such a decision.

The Senator from Arkansas stated to me at the same time that on the question as to whether Senator PAGE had a right to have his vote recorded, Senator PAGE had voted. I did not know that at the time I talked with him, but I told him at that time that if that were true it was wrong, of course. I looked up the record immediately after I had my conversation with the Senator from Arkansas and I found that in that respect the Senator from Arkansas was right; that the Senator from Vermont was recorded as voting on that proposition. I agree with the Senator from Arkansas that that was wrong. If that had ever been called to my attention I would have so ruled. It never was called to my attention. On the other hand, if that vote would have made a difference in the result I would have felt in honor bound immediately to call a meeting of the Committee on Agriculture and Forestry in order that we might rectify it.

I went back and had the clerk of the committee show me the roll calls and found that on the vote to determine whether Senator PAGE's vote should be counted, the result was 10 to 6 in favor of counting it. Therefore, eliminating the vote that I concede was wrong, Senator PAGE's vote, the result would have been 9 to 6, and hence no wrong was in fact done, although I concede that the vote ought not to have been counted.

The question came up in the committee when the vote was being taken on the Ford offer. When the name of Senator PAGE was reached, the Senator from New Hampshire [Mr. KEYES] announced that he was authorized to cast the vote of Senator PAGE, and he read a telegram which he deemed sufficient to give him that authority.

I ought to pause here to say that at a previous meeting it had been agreed by unanimous consent of the committee that at the meeting on Saturday the vote on the bids should be taken without further debate; and that no absent member of the committee could be voted unless he had given authority in writing to some member of the committee to vote him. Unfortunately, as to just what that unanimous-consent agreement was, there was a misunderstanding on Saturday, it appears, and while I can not see how there could be any misunderstanding, I concede to those who think otherwise a perfectly conscientious and honorable motive in reaching their conclusions.

Senator KEYES read the telegram from Senator PAGE, the telegram which I now have in my possession and which I now read to the Senate, as follows:

HYDE PARK, VT., *July 14, 1922.*

Hon. HENRY W. KEYES,
Senate Chamber, Washington, D. C.:

You are authorized to vote for me on Muscle Shoals proposal at meeting of Committee on Agriculture to-morrow morning.

C. S. PAGE.

The point was made when the telegram was read that under our unanimous-consent agreement it did not give Senator KEYES authority to cast that vote. Upon that point the chair held that it did give the proper authority and that Senator KEYES was authorized under the telegram and under our unanimous-consent agreement to cast the vote of Senator PAGE, and he did cast it when the roll was finally completed. But at that point the roll call was interrupted by the other motion which was made, when the chair held that the telegram was sufficient authority. An appeal was taken from the decision of the chair or the question was submitted by the chair to the committee—I think both things occurred—and the roll was called upon that question.

When the name of Senator PAGE was reached, I presume from the roll call, Senator KEYES voted him and the clerk so recorded him, and in that way Senator PAGE did vote on the question of his own right to vote which, as I have said, was in my judgment absolutely wrong, and which, if it had been a vote that would have changed the result, would have caused me to feel in honor compelled to call the committee together in order to rectify it. Upon that vote the result was 10 to 6, showing that at least one of the Ford adherents believed that under the telegram Senator KEYES had a right to cast the vote of Senator PAGE.

We had those two roll calls, one interrupting the other. When the roll was partly called on the question of the acceptance or rejection of Henry Ford's bid it was interrupted by the other roll call as to whether Senator KEYES had a right to cast the vote of Senator PAGE. So there were two rolls, one interlocking in the other. The chair did decide, and still adheres to it and still believes he was right, that Senator KEYES did have the authority to cast the vote of Senator PAGE. As to whether he had the right to cast his vote on that particular roll call there never was a point raised. It is easy to understand how Senators, these two things interlocking and coming together, would get them mixed, because as a matter of fact it was rather a tempestuous meeting and it often occurred that everybody was talking and nobody was listening.

So, Mr. President, I want to say most emphatically that as chairman of that meeting I did not decide and I never have made such a decision—it would have been contrary to every idea of mine as to what was right—that upon the vote to determine whether or not Senator KEYES had a right to vote Senator PAGE, Senator PAGE could vote. When that roll call was completed, which, as I said, resulted in agreeing that Senator KEYES did have the authority to vote for Senator PAGE, the roll call being 10 to 6, which would have been 9 to 6 if the vote had been properly recorded, then the other roll call was completed on the bid of Henry Ford, which roll call had been interrupted by this parliamentary proceeding. It was on that question or any other question pertaining to Muscle Shoals that the chair would have held that Senator KEYES had a right to cast the vote of Senator PAGE. Upon that roll call the result was 9 to 7 against the bid of Henry Ford.

Another point that the Senator from Arkansas made, and which I concede is correct, was that upon an appeal from the decision of the chairman of the committee and the roll call being had, the chair voted. That is true. The chair did vote. I contend now that the chair had a right to vote. It was not questioned then. I believe that anyone who will examine the logic of the situation or the decisions and precedents must reach that conclusion. A committee is in session and a point comes up and the chair decides the point of order of procedure and an appeal is taken from the decision of the chair. The clerk calls the roll and the chairman votes just the same as everybody else on the committee. Otherwise, Mr. President, the chairman would be deprived of a right which, under the Constitution of the United States, he has as a member of the committee, and that is to vote on every question coming before the committee where he has no personal or financial interest in the result.

If the other theory be right, it would mean that the control of the committee by the majority would be turned over to the minority in every case where that majority did not exceed more than one, because it would exclude the chairman from voting and would always leave the minority in control. So that, as a matter of fact, if it is followed out to its logical conclusion, if we had a committee composed of eight of the majority and seven of the minority and we deprived the chairman of the right to vote, the minority could absolutely control the committee and always would.

Mr. CARAWAY. Mr. President, may I interrupt the Senator?

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Arkansas?

Mr. NORRIS. I yield.

Mr. CARAWAY. The rule touching appeals from the decision of the chair never could arise upon the merits of legislation, and therefore the fault of the Senator's reasoning is there. It lies only upon rulings that the chair may have made as to questions of parliamentary procedure. In that there are not presumed to be any majorities or any minorities, because the parliamentary rules are for the government of both. The Senator seems to think we might deprive the chairman of his right to vote upon legislative matters pending. That never could be, because the question of an appeal is the only parliamentary ruling which the chairman as chairman may make. He participates as any other member of the committee on legislative matters, and from his participation therein no question could arise from which an appeal could lie.

Mr. NORRIS. If the Senator's theory is right, it would not be a difficult thing for anyone with ordinary knowledge of parliamentary law to get the decisions on a legislative question. Every Member of the Senate realizes that upon a main question there may be hundreds of subsidiary questions and often there are questions of procedure. It would be possible to present a most objectionable method in that way and carry it through in order to prevent the chairman from voting.

Mr. President, I have not been able adequately to look up the authorities but I have made a slight examination. This is the only place where I think such a question was ever raised. I have been on committees of the Senate for a good many years, but I have never yet heard the objection raised that the chairman is not entitled to vote. That objection was not made in this case in the committee; it was made the first time on the floor of the Senate. Hinds' Precedents, volume 4, page 930, section 4569, reads as follows:

On an appeal from a decision of the chairman in a committee the chair voted to sustain his ruling, thereby producing a tie, and so the decision was sustained.

Mr. President, on the main proposition—for instance, on the vote in regard to the Ford offer—if the chair had been overruled and it had been held that the junior Senator from New Hampshire [Mr. KEYES] had no authority to cast the vote of the junior Senator from Vermont [Mr. PAGE] and the vote had been excluded, there would, after all, have been no difference in the result of the vote; for the vote would merely have been 8 to 7, instead of 9 to 7.

Mr. President, as to what actually occurred, whether I am right or whether I am wrong, I do not have any desire to conceal the facts; I want it all known. I did not feel, however, that I could permit to go unchallenged the statement that I had made a certain decision when in fact I had not made it, although, as I said when I decided that the Senator from Vermont had a right to vote in the committee, since both of the roll calls interlocked with each other, it is not surprising at all that a Senator should be mistaken, as I am confident that the junior Senator from Arkansas [Mr. CARAWAY] was mistaken on that proposition.

That is the only thing which the Senator said to which I felt I had a right to take exception. Although I do not agree with other statements he has made, what he has said which corresponded with my idea of the record I have frankly admitted. I thought I was right, and I think so yet; but on that one point I desire to be emphatic; I can not be mistaken about it, because the very idea of doing such a thing would be abhorrent to me; I would not do it, and I can not be put in the attitude of doing it, although, as I have said, under all the circumstances which surrounded that meeting of the committee it is not surprising that any Senator should get such an idea.

However, the clerk of the committee has all the roll calls, and I have looked at all of them so as to be positive as to whether or not such a thing occurred; and there was no such roll call.

So far as I was concerned, the fact was absolutely unnoticed; I did not know that it had occurred, and that that vote had been recorded, as I have stated, at least until the Senator from Arkansas told me so on Saturday afternoon. Then I looked the matter up and found that the vote had been actually recorded. It ought not to have been recorded; but the fact that it was recorded did not change the result; it had no effect on the proceedings.

Mr. CARAWAY. Mr. President, I am always willing to concede that those who differ from me are honest; I am not raising that question; but I am certain that the Senator from Nebraska, the chairman of the Committee on Agriculture, does not know all that took place in the committee room on the occasion to which reference is now made. As he suggested, all Senators were talking at once, and, without any disrespect to him, I rather think that the chairman of the committee talked as much as any other of the 15 members present. I am going to say now, for I know that the Senator from Nebraska will always tell the truth, that what I say I do not want him to think is a reflection upon him. I know that I called attention to the matter when the vote was about to be taken to sustain the contention as to the validity of the proxy of the Senator from Vermont, but my suggestion evidently did not reach the chairman, and I am not surprised. There was much confusion.

What happened was this: I am informed that the absent Senator had sent a telegram to some member of the committee—I was told it was to the chairman of the committee—on Tuesday stating that he knew nothing about the matters in controversy or did not think——

Mr. NORRIS. Now, let me correct the Senator, if he will allow an interruption.

Mr. CARAWAY. I yield.

Mr. NORRIS. The Senator from Vermont sent no such telegram. I never had a telegram from that Senator.

Mr. CARAWAY. Did the Senator from Nebraska ever see such a telegram?

Mr. NORRIS. I did not.

Mr. CARAWAY. Does the Senator from Nebraska know whether or not such a telegram was sent?

Mr. NORRIS. I never saw it. I heard the same rumor the Senator from Arkansas has heard, but I never received a telegram, although I did send a telegram to the Senator from Vermont and suggested that he wire some Senator authority to vote him in reference to the Muscle Shoals proposition; but I never had an answer to my telegram, and I never saw any answer.

Mr. CARAWAY. I am going to say that I have heard it stated—and I think it is true, although I say now, as I have said before, that I never saw the telegram—that the Senator from Vermont disclaimed having sufficient information to vote intelligently upon the matters involved. Senators who were very vitally opposed to Ford's offer were not willing for a vote to be taken on Tuesday. I am not complaining about that. I think that every member of the committee ought to have had an opportunity to have his vote recorded.

It went over until Saturday, and then a telegram was produced by the Senator from New Hampshire [Mr. KEYES] and read to the committee, as it was read here. It was the understanding of every member of the committee with whom I have talked that the proxy should direct how the absent Senator wished his vote cast. There was insistence that there should be no agreement that an absent Senator should vote until the committee should have met on Saturday. I did not agree with that contention, because I realized it did not give Senators a chance to be notified, and I thought they ought to be notified; but, to show just what the unanimous consent really was, the Senator from Louisiana [Mr. RANSDELL] argued that the Senator from Vermont ought to have a right to vote under certain circumstances, and he called attention to the form of a proxy which he thought ought to be adopted. He said that he himself had recently authorized the Senator from North Carolina [Mr. SIMMONS] to vote him for the acquisition of the Dismal Swamp and Cape Cod Canals. It was my understanding, and it was the understanding of every member of the committee with whom I have talked—and there were several—that if any Senator were absent he should send his proxy to some other member of the committee directing how his vote should be cast. I know the question of whether he might telephone his instructions was discussed, and it was decided that he should not do that, but that, in such an important matter, he should direct in writing or by telegram how his vote was to be cast. That question arose. I myself first suggested when the telegram from Senator PAGE was read that it did not correspond with the agreement entered into on Tuesday.

The chair—and I concede him what he concedes to me that he is absolutely honest in his recollection of the matter—thought differently. He thought that that telegram was in compliance with the agreement we entered into on Tuesday with reference to absent Senators, and so held. An appeal was taken from the chair's holding that that proxy was in compliance with the agreement, and on the vote on the appeal from the ruling of the chair the chair himself voted that his ruling was correct, and the proxy of the Senator from Vermont was voted that the proxy was valid.

Mr. NORRIS. Mr. President, will the Senator permit an interruption there?

The PRESIDENT pro tempore. Does the Senator from Arkansas yield to the Senator from Nebraska?

Mr. CARAWAY. Yes, sir.

Mr. NORRIS. If the Senator will eliminate the vote of the Senator from Vermont, which I concede ought to be eliminated, and also eliminate my vote, still authority was left to cast the vote; there was still a majority in favor of it.

Mr. CARAWAY. That may be true, Mr. President, but the question of whether it is correct or not is not determined by whether it was a success or a failure. I am complaining now in rather good humor, although all of us had just as well be frank about it and admit that everyone of us was angry on Saturday. The chair was just as angry as I was, and I was as angry as the chair. It may not have changed the result, but I am going to say, because I am now absolutely without any feeling concerning it, that for the chairman I have the very highest regard, and I am satisfied he did what he thought was

right; but I think every ruling he made was wrong, except one, and everybody else with whom I have talked went away with the same opinion.

The chairman has correctly stated the situation. He has said that everybody talked at once, and that is true. It was impossible to get any kind of a conception of what was going on, because members of the committee could not get the attention of the chair and the chair could not get the attention of the committee. The parliamentary situation was as I have described it. I am not criticizing the chairman for his rulings. He frankly says now that the voting of the proxy of the Senator from Vermont—that the proxy was a good proxy; or, in other words, that a proxy might vote to sustain itself—would not have been counted if called to his attention. I tried to call it to the chair's attention, but he did not hear me. It struck me as absolutely abhorrent that, a man's right to vote being challenged, he himself had a right to determine that he had a right to vote. As I suggested the other day, it would be as consistent to put the accused on the jury and let him vote upon the question of whether he was guilty or innocent as to say that a man who is trying to vote by proxy shall have his proxy voted to determine that his proxy is a legal and correct proxy. That is what I said about it Saturday, and that is what I am reiterating about it to-day.

I am not falling out with the chairman. He told me—and I know he does not object to the conversation being repeated because he repeated a part of it himself—on Saturday, standing right there in his place, that he did not think Senator PAGE's proxy had been voted, and he said, if it had been, it was wrong, but he knew that no such thing could have happened. Now, he finds that it did happen, because the roll call shows it, and I am sure that if there had not been so much confusion—I will put it in that way—the chair would not have made two or three of the rulings which he did make. I do not know that any of the rulings changed the result. I thought at the time they did. I have not examined the roll calls since, but it was my impression that the rulings of the chair changed the result of the voting. Evidently in that my memory has not served me well. I thought that at the most it would have been a tie vote. However, that is a matter that the roll call itself will disclose, and I have not had any opportunity to examine it.

I want to say, as I said in the beginning, that I am not criticizing the chairman. I think that he made his rulings under rather tempestuous circumstances.

SOUTHERN PACIFIC-CENTRAL PACIFIC SYSTEM.

Mr. SHORTRIDGE. Mr. President, I ask the indulgence of the Senate and the attention of Senators for a moment only.

On May 29, 1922, the Supreme Court of the United States handed down its decision in the case of United States of America, appellant, against Southern Pacific Co., Central Pacific Railway Co., Union Trust Co. of New York, and others. The opinion of the court was delivered by Mr. Justice Day. Neither Mr. Justice McReynolds nor Mr. Justice Brandeis took any part in the consideration or decision of the case. Mr. Justice McKenna dissented, filing his reasons for so doing.

The decision, which reverses the decree of the District Court of the United States for the District of Utah, has far-reaching consequences. It very naturally has interested the people from the Atlantic to the Pacific seaboards, particularly, perhaps, those of the intermediate and the far Western States.

I hold in my hand two telegrams addressed to me by Mr. Wallace M. Alexander, one signed by him as president of the San Francisco Chamber of Commerce and the other signed by him as chairman of the State-wide Committee Against Dismemberment of the Southern Pacific-Central Pacific System. I shall not consume the time of the Senate in reading them, but, in order that Senators and others may know their contents, I respectfully ask that they may be printed in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

SAN FRANCISCO, CALIF., *July 15, 1922.*

Hon. SAMUEL M. SHORTRIDGE,
United States Senate, Senate Office Building, Washington, D. C.:

The Chamber of Commerce of San Francisco greatly appreciates having presented as matter of record to the Senate the following resolutions adopted by the chamber, and putting that body strongly on record against the dismemberment of the Southern Pacific-Central Pacific System. In presenting this matter, I assure you that you will be performing a service for the shippers and general public of the State, who have very generally indorsed the stand of the San Francisco Chamber of Commerce.

Resolutions of the San Francisco Chamber of Commerce:

"Whereas by decree of the United States Supreme Court under the Sherman antitrust law, it has been ordered that the Central Pacific-Southern Pacific Railroads be placed under separate ownership; and

"Whereas the San Francisco Chamber of Commerce has been on record for a period of years protesting against any change in the unified operation of these roads, recognizing the disaster and calamity to the public interest if these two roads be divorced; and

"Whereas this chamber recognizes the value to California and the Pacific coast territory of the possession of a strong, powerful, unified, and comprehensive transportation system which serves symmetrically and proportionately tributary territory to San Francisco; and

"Whereas, while respecting to the fullest degree the authority and decision of the United States Supreme Court, we believe that the Interstate Commerce Commission, under the transportation act of 1920, has full power consistent with the decision of the Supreme Court and in the public interest to authorize the operation of these two roads as a unit: Therefore be it

"*Resolved*, That the San Francisco Chamber of Commerce request the Attorney General of the United States to acquaint himself fully with the facts showing the disaster to service and to the interests of the Pacific coast from any segregation of such parts of said railway system, and that he have these matters in mind in carrying out the details of the enforcement of the Supreme Court decision; and that the chamber request the Interstate Commerce Commission to hold necessary hearings to the end that the Southern Pacific and the Central Pacific be continued in operation as a unit, and that said railway system be so considered in whatever grouping of roads shall be deemed necessary to conduct the transportation system of the country in the public interest; that this chamber secure the expressions of opinion of the shippers, not only in its membership but throughout this territory, and that a strong state-wide committee be appointed, and that cooperation be given to all public and shipping organizations, to the end that the necessary facts of the disaster and calamity involved in the dismemberment of these roads be brought to the attention of the Federal authorities."

WALLACE M. ALEXANDER,
President San Francisco Chamber of Commerce.

SAN FRANCISCO, CALIF., *July 15, 1922.*

Hon. SAMUEL M. SHORTRIDGE,
Senate Office Building, Washington, D. C.:

In view of the efforts being made by certain inspired interests in Washington to becloud the issue regarding the recent decision ordering the unmerger of the Southern Pacific-Central Pacific system, and that the attitude of California shippers, as represented by the state-wide committee against dismemberment, of which I am chairman, and also the attitude of the San Francisco Chamber of Commerce in this matter may be made clearer, I would greatly appreciate having the following statement made a matter of record before the Senate:

STATEMENT BY WALLACE M. ALEXANDER, CHAIRMAN OF THE STATE-WIDE COMMITTEE AGAINST SOUTHERN PACIFIC-CENTRAL PACIFIC DISMEMBERMENT.

"My attention is called to press dispatches from Washington asserting that 'on behalf of producers and shippers of the Pacific coast' the Department of Justice has been asked to take cognizance of certain alleged activities of the Southern Pacific system.

"Of these alleged Southern Pacific activities I am not informed, but of the shippers and growers of the Pacific coast and their views I necessarily know a great deal, because the state-wide committee, of which I am chairman, represents to-day the expressed views and sentiments of a very high percentage of all organized shippers and growers in this State, and the record of these great organizations is to date unanimously in favor of action by the Interstate Commerce Commission that will continue the unified operation of this system as a unit. The supposed protest can not represent, for instance, the state-wide committee of about 100 large shippers, of which I have the honor to be chairman; it can not represent the Chambers of Commerce of San Francisco, Los Angeles, Sacramento, Fresno, San Jose, Oakland, Berkeley, Bakersfield, San Diego, and a hundred or so other cities of California, since these also have gone on record of their own volition supporting the state-wide committee in its lawful appeal to the Interstate Commerce Commission to maintain the unified operation of this great system, because, in their judgment, the people of the State will be hurt by its dismemberment; nor can this alleged protest represent the agricultural interests, such as the California Vegetable Union, the Canning & Peach Growers' Association, the California Pear Growers' Association, the California Cooperative Canners, the California Walnut Growers' Association, the California Almond Growers' Association, all of which, with others, are on record supporting the action of the state-wide committee, as are the California Development Association, with a state-wide membership of 35 chambers of commerce and more than 1,500 individual shippers, the Los Angeles Jobbers' Association, the California Manufacturers' Association, the Northern California Counties Association, the United Chambers of Commerce of the Sacramento Valley, the California Fruit Distributers' Association, and a great many individual wholesale and retail shippers.

"Any intimation or suggestion that the supposed organization in Washington stands in any way for the views and judgments of California and Pacific coast shippers and producers is, in the face of the above evidence, an outrageous perversion of the truth. Leading shippers, intimately connected with growers and manufacturers' associations for years, are unable to tell me who, if anyone, these people represent. The correspondent of the Portland Oregonian telegraphed his paper that he had inquired at the Washington offices of this supposed organization to find out who sponsors the flood of press releases being sent out from there. He reported in the Sunday Oregonian, of July 2, as follows:

"'The person in charge of the office, one of the most successful publicity men in Washington, apologized for not being able to disclose any of the personnel of the association which he pretended to represent. He said he expected to be able to give some information of that character within the next few days.'

"Here we have the amazing spectacle of an organization in Washington appealing to the Department of Justice in the name of the California and Pacific coast shippers, when its Washington representative can not or will not give the name of a single man or organization it purports to represent. I challenge this organization to publish its officers and membership. I challenge it to show what organizations or men, if any, have gone on record in its support as against the many thousands of shippers, growers, and merchants who have come into the open on their own initiative and at the request of the state-wide committee against dismemberment; and I respectfully urge my fellow citizens throughout California and the Pacific coast to continue placing themselves on record against the dismemberment of the Southern Pacific-Central Pacific system, to the end that there shall be no possible

misunderstanding of our position as shippers, growers, merchants, and citizens. In doing this we hold no brief for any railroad, and represent only the public interest."

WALLACE M. ALEXANDER,
Chairman State-wide Committee Against Dismemberment of the Southern Pacific-Central Pacific System.

PETITIONS.

Mr. CAPPER presented resolutions of the Chambers of Commerce of Ellsworth, Clyde, Wamego, and Salina, and the Plainville Commercial Club, all in the State of Kansas, favoring enforcement of the United States Supreme Court decree ordering divorcement of the Central Pacific Railway from the Southern Pacific Co., etc., which were referred to the Committee on Interstate Commerce.

REPORTS OF COMMITTEE ON PUBLIC LANDS AND SURVEYS.

Mr. BURSUM, from the Committee on Public Lands and Surveys, to which was referred the bill (H. R. 7967) granting certain lands to Escambia County, Fla., for a public park, reported it with an amendment and submitted a report (No. 829) thereon.

He also, from the same committee, to which was referred the bill (S. 3702) providing for the acquirement by the United States of privately owned lands situated within certain townships in the Lincoln National Forest, in the State of New Mexico, by exchanging therefor lands on the public domain also within such State, reported it with amendments and submitted a report (No. 830) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McLEAN:

A bill (S. 3840) to amend section 5147 of the Revised Statutes; to the Committee on Banking and Currency.

By Mr. NORRIS:

A bill (S. 3841) granting a pension to Maggie E. Campbell; to the Committee on Pensions.

By Mr. SPENCER:

A bill (S. 3842) granting a pension to Essie Buckley Killgore (with accompanying papers); to the Committee on Pensions.

By Mr. LENROOT:

A bill (S. 3843) for the relief of the owners of the steamship *Kin-Dave;* to the Committee on Claims.

TARIFF BILL AMENDMENTS.

Mr. DIAL and Mr. SHIELDS each submitted an amendment intended to be proposed by them to House bill 7456, the tariff bill, which were ordered to lie on the table and to be printed.

AMENDMENT TO RIVER AND HARBOR BILL.

Mr. SHIELDS submitted an amendment providing that such portion of available funds deemed advisable by the Secretary of War, heretofore appropriated and allotted for improvement of the Tennessee River above Chattanooga and from Chattanooga to Riverton, may be expended on a survey of the river recommended in House Document No. 319, Sixty-seventh Congress, second session, intended to be proposed by him to House bill 10766, the river and harbor authorization bill, which was ordered to lie on the table and to be printed.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. DIAL. I offer an amendment to the pending bill, which I ask to have printed and lie on the table.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. SMOOT. Mr. President, I ask now that we return to paragraph 907, on page 126. I send to the desk an amendment to paragraph 907, and ask that it be read.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 126, it is proposed to strike out lines 12 to 15, both inclusive, and to insert in lieu thereof the following:

PAR. 907. Cloth in chief value of cotton containing silk or artificial silk shall be classified for duty as cotton cloth under paragraphs 903, 904, 905a, and 905b, and in addition thereto there shall be paid on all such cloth 5 per cent ad valorem: *Provided*, That none of the foregoing shall pay a rate of duty of more than 45 per cent ad valorem.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Utah in lieu of the amendment of the committee.

Mr. SMITH. Mr. President, I understand that this is to bring this paragraph in line with and under the same rate of duty that the Senate has already provided shall obtain in the paragraphs referred to.

Mr. SMOOT. That is the case, Mr. President. I will say to the Senator that the only reason why we put paragraph 904 in this amendment is so that the same definition as to the term "cotton cloth" shall apply in this that applies in all other parts of the schedule. It is only a matter of safety. It may be done, but we do not want any question at all about it.

Mr. SMITH. Mr. President, before the vote is taken I desire to say that under the paragraphs referred to here we have raised the duty to 45 per cent where there is specified the count of the yarn. Under this provision the count of the yarn is not specified, and there is a lower count of yarn obtaining in this paragraph; and I take it that we are putting it under the higher rate by virtue of the fact that a component part of it, per cent not stated, is silk. I presume that is the reason why, in spite of the fact that the cotton element might be of a less count of yarn than the other paragraphs that have the higher rate of duty, yet, by virtue of the fact that it was combined with silk, putting it into a class distinct to itself, the committee thought it should bear this rate of duty.

Mr. SMOOT. No; the Senator will notice that we take in paragraph 903, and this is to be classified for duty as cotton cloth under paragraph 903. It makes no difference what the count of the yarn is; it shall be as provided for in paragraph 903, the low counts as well as the high, but in no case shall it be higher than 45 per cent—the same provision that we have in paragraph 905a.

Mr. SMITH. Let me understand this clearly. Where we say "thread or yarn," and the yarn is in the cloth, it would apply to this paragraph, would it?

Mr. SMOOT. In the case of the lower counts in paragraph 903 it would apply to this paragraph; and if they put silk in it, then there would be 5 per cent additional duty, provided it fell under 45 per cent.

Mr. SMITH. I see. The Senator means to say that in case the count of the yarn did not justify, as it does in some of the paragraphs, the 45 per cent, then it would take the rate that that count of yarn would come under?

Mr. SMOOT. Yes; plus 5 per cent if there was silk in it, and that, of course, in many cases of the lower-count yarns would not amount to 45 per cent; but we put the maximum at 45, which would be on the finer yarns, just the same as we did in paragraph 905a.

Mr. SMITH. I am ready for a vote, Mr. President.

Mr. LENROOT. Mr. President, I want to say just a word to congratulate the committee upon presenting this amendment, because on certain varieties it is a very substantial reduction from the original amendment; and I think it is a logical provision as it now stands, which it was not as originally proposed.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Utah in lieu of the amendment of the committee.

The amendment was agreed to.

Mr. SMOOT. Now, Mr. President, I desire to refer to paragraph 912, the amendment that was passed over last night, on line 10, page 128; and I desire to modify the amendment in accordance with the wording which I send to the desk. I will say that this refers to labels for garments. The Senator from North Carolina referred to it last night.

The PRESIDENT pro tempore. The Secretary will state the committee amendment as now modified.

The READING CLERK. On page 128, line 10, it is proposed to modify the committee amendment as follows: Strike out "50 cents per pound and 20," and insert in lieu thereof "50."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee as modified.

Mr. SIMMONS. Mr. President, I did not expect the Senator to call up this amendment just at this second. I am endeavoring to get some further information about the matter.

Mr. SMOOT. If the Senator wants it to go over, I will ask that it go over.

Mr. SIMMONS. I should like to have that done. I am trying to get some information about it.

Mr. SMOOT. I will ask, then, that the amendment go over for future consideration.

The PRESIDENT pro tempore. Without objection, the amendment will be passed over.

Mr. SMITH. Mr. President, before it goes over, I understand that the proposition of the Senator from Utah is that we make it a straight 50 per cent ad valorem.

Mr. SMOOT. That is correct.

Mr. SIMMONS. That might be higher than the rate we have.

Mr. SMOOT. Sixty per cent.

Mr. SMITH. Mr. President, I have here a table which I will ask to have inserted in the RECORD at this point.

There being no objection, the table referred to was ordered to be printed in the RECORD, as follows:

Labels for garments and other articles.

Calendar years.	Rates of duty.	Values.	Duties collected.	Actual and computed ad valorem rate.
				Per cent.
1914 [1]	25 per cent	$23,378	$5,844	25.00
1915 [2]	do	15,292	3,823	25.00
1916 [2]	do	2,787	697	25.00
1917 [2]	do	8,736	2,184	25.00
1918 [2]	do	8,278	2,070	25.00
1918 [3]	do	5,477	1,369	25.00
1919 [4]	do	5,831	1,458	25.00
1920 [4]	do	35,466	8,867	25.00
1921 [4]	[5]	38,304	10,020	26.16
Annual average [6]		17,399	4,404	25.13

[1] Oct. 4, 1913, to June 30, 1914, inclusive.
[2] Fiscal year ending June 30.
[3] July 1, 1918, to Dec. 31, 1918, inclusive.
[4] Calendar year.
[5] Twenty-five per cent plus 7 cents per pound for cotton having a staple of 1⅛ inches or more in length.
[6] Annual average, 8¼ year period.

Domestic production in 1919, $624,000.

The PRESIDENT pro tempore. The Senator from North Carolina has asked that the provision may be passed over.

Mr. SMITH. I know, but I wanted to inform the Senator from North Carolina that the value of our importations has been practically negligible. In 1914 it was only $33,000; in 1915, $15,000; in 1916, $2,000; in 1917, $8,000; in the fiscal year 1918, $8,000; in the last six months of the calendar year 1918, $5,000; in the calendar year 1919, $5,000; in 1920, $35,000; in 1921, $38,000. The annual average was $17,000, against a domestic production of $624,000, with an average ad valorem rate, actual and computed, of 25.13 per cent. I can not see what justification there would be for raising the rate arbitrarily and flatly 100 per cent.

The PRESIDENT pro tempore. The Chair understands, then, that the Senator from South Carolina objects to passing over this amendment.

Mr. McCUMBER. Mr. President——

Mr. SIMMONS. Mr. President, in view of the fact that the Senator from South Carolina has been discussing the matter, I will withdraw the objection and let it go on now. I had objected simply because I wanted to get some information as to what the domestic product was selling for.

Mr. SMITH. All right; we will let it go over.

The PRESIDENT pro tempore. The proposed amendment is passed over.

Mr. McCUMBER. Mr. President, I simply wanted to ask the Senator if he considered that a fair method of arriving at an average, when he takes most of his figures from war years, in which, of course, almost nothing came in?

Mr. SMOOT. Mr. President, I will ask the Senator now to let the amendment go over.

Mr. SMITH. Certainly.

Mr. SMOOT. I merely want to say for the record that when it is up for consideration we shall want to show that in one month of 1922 there have been more imports of these goods than there have been in two or three years combined in the past; and if there is one thing that needs protection, if the imports are correct beginning with February of this year, it is this very article; but it has gone over now.

The PRESIDENT pro tempore. The Secretary will state the next amendment of the committee.

The READING CLERK. In paragraph 913, page 128, line 16, it is proposed to strike out "35" and insert in lieu thereof "60."

Mr. SMOOT. I am compelled to ask that this paragraph be passed over on account of the absence of one Senator who is very anxious to be present when it is considered.

The PRESIDENT pro tempore. The paragraph will be passed over.

Mr. SMOOT. I make the same request in regard to paragraph 914. Two Senators who are deeply interested in that paragraph are not present, and on the request of those Senators I ask that it may go over.

The PRESIDENT pro tempore. Without objection, paragraph 914 will be passed over.

Mr. POMERENE. Does the Senator expect to take up paragraph 914 during the session to-day?

Mr. SMOOT. No; I do not expect to take it up until to-morrow. In paragraph 915, the hosiery paragraph, I move to strike out all after the word "hand" and the comma in line 8——

The PRESIDENT pro tempore. The Chair calls the attention of the Senator from Utah to the fact that there is an amendment in that paragraph which has not been agreed to preceding the line to which he refers.

Mr. SMOOT. I do not think there is any objection to that amendment.

The PRESIDENT pro tempore. The Secretary will report the amendment.

The READING CLERK. On page 129, line 5, after the word "half hose" and the comma, insert the word "selvaged" and a comma.

Mr. SMITH. I do not know that there will be any objection to including that word. It is simply an addition to a part of these goods, which practically would mean nothing.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was agreed to.

Mr. SIMMONS. Mr. President, if I understand the Senator from Utah, I understand that after the word "hand," on line 8, he moves to strike out the balance of that paragraph.

Mr. SMOOT. Yes; and to offer an amendment from that point down.

Mr. SIMMONS. What will be the nature of the amendment?

Mr. SMOOT. "Fifty per cent ad valorem, if such hose or half hose contains cotton wholly or in chief value of 1⅛ inches staple or longer, 10 cents per pound and 50 per cent ad valorem."

Mr. SIMMONS. If the Senator will pardon me, I want a little information. The rates in that paragraph as now written start with 70 cents per dozen pairs, then 80 cents per dozen pairs, 90 cents per dozen pairs, $1.20 per dozen pairs, and so on. The Senator is seeking to change that to an ad valorem, and I assume he has made the calculations. Can the Senator tell me what reduction that would be? The method of taxing is entirely different, and I can not without taking time ascertain the difference, but I assume the Senator can tell us.

Mr. SMOOT. In some of the cases it is a reduction of a great deal over one-half. For instance, take the first class, valued at not more than $1 per dozen pairs, 70 cents per dozen pairs. That is 70 cents on the high bracket. If they were 50 cents, it would be 140 per cent, and valued at more than $1 and not more than $1.50 it would be 80 per cent.

Mr. POMERENE. In order that I may be able to follow the Senator, do I understand that the amendment will be a reduction of practically 50 per cent on the rates in the committee amendment as proposed?

Mr. SMOOT. No; I would not say all the way through, but practically that.

Mr. SIMMONS. The Senator means that the reduction made by his amendment from the rates originally proposed by the committee would be something like 50 per cent?

Mr. SMOOT. Practically that. In some cases not that, of course, and in other cases more than that.

Mr. POMERENE. What would be the maximum and minimum?

Mr. SMOOT. When hosiery was valued at 50 cents a dozen it would be 140 per cent. That is the outside limit I could think of under the House provision. When it gets down to hose of $5, of course then it would be about eighty-odd per cent.

Mr. POMERENE. Then the higher rates would be continued on all of the low-grade goods, according to the statement the Senator has just made.

Mr. SMOOT. The rates on the low-grade goods were higher in the bill as reported from the House, but now we will have a 50 per cent rate on all hosiery, no matter what the value of it may be.

Mr. SMITH. This would be very easily computed, because I have some facts I want to submit. After naming the kind of goods, hose and half hose, and so forth, where does the Senator propose to insert his amendment?

Mr. SMOOT. After the word "hand," on line 8.

Mr. SMITH. That is what I thought. The Senator proposes to strike out all the balance, the 50 per cent and the 10 cents.

Mr. SMOOT. In case it is used in the yarn. Will the Senator allow me to present the amendment and have it read into the RECORD?

Mr. SMITH. Certainly.

Mr. SMOOT. I offer the following amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment offered by the Senator from Utah.

The READING CLERK. It is proposed, in paragraph 915, page 129, line 8, beginning with the word "valued," after the comma, to strike out the remainder of the paragraph, down to and including the words "ad valorem," on line 18, as follows:

valued at not more than $1 per dozen pairs, 35 cents per dozen pairs; valued at more than $1 and not more than $1.50 per dozen pairs, 45 cents per dozen pairs; valued at more than $1.50 and not more than

$2 per dozen pairs, 65 cents per dozen pairs; valued at more than $2 and not more than $3 per dozen pairs, $1.20 per dozen pairs; valued at more than $3 and not more than $5 per dozen pairs, $2 per dozen pairs; and, in addition thereto, on all of the foregoing, 12½ per cent ad valorem; valued at more than $5 per dozen pairs, 35 per cent ad valorem.

And to insert in lieu thereof the following words:

50 per cent ad valorem, if such hose or half-hose contains cotton wholly or in chief value of 1⅜ inches staple or longer 10 cents per pound and 50 per cent ad valorem.

So as to make the paragraph read:

PAR. 915. Hose and half-hose, selvedged, fashioned, seamless, or mock-seamed, finished or unfinished, composed of cotton or other vegetable fiber, made wholly or in part on knitting machines, or knit by hand, 50 per cent ad valorem if such hose or half-hose contains, etc.

Mr. SMOOT. There is very little long-staple cotton used in hosiery. It is mostly all made of the ordinary cotton; but there is some hosiery which requires a certain finish, and in cases where they want a particular strength the long-staple cotton is used. The Senate will notice that we have provided that, in addition thereto, there shall be 10 cents a pound imposed if such hose or half-hose contains cotton wholly or in chief value of 1⅜-inch staple and longer.

Mr. SMITH. I am informed that that would involve a destructive analysis; that is, that you would have to destroy the cotton and give the fiber a microscopic test to see whether it did contain that kind of cotton or not.

Mr. SMOOT. There is so little of it used that perhaps we could even take that out altogether as to hosiery, but it is not safe to do it, as there are yarns used in hosiery made of the long-staple cotton.

Mr. SMITH. When it comes to the administration of this provision it would be practically impossible to tell which did contain and which did not contain the long staple, and then to whom would the benefit of the doubt go?

Mr. LENROOT. Will the Senator from Utah yield?

Mr. SMOOT. I yield.

Mr. LENROOT. I would like to say that there is a similar provision in the present law, and there is no difficulty in its administration. The figures of imports show the hosiery which contains long-staple cotton and that which does not. That which contains the long-staple cotton is a very substantial amount.

Mr. SMOOT. I will say to the Senator that our investigators in a foreign country always know when the long-staple cotton is used in those articles. What the Senator says is true, that if it were necessary in the case of every shipment to determine the fact, it could only be determined by a microscopic investigation of the hosiery itself.

Mr. SMITH. My information is to the effect that even under the present administration of the law there is more guesswork than an actual knowledge of the contents of the goods.

Mr. SMOOT. That is not what our examiners at the port of New York say. I did not want to give any compensatory duty on long-staple cotton unless it actually went into the yarn making the hose, and when it does of course it ought to be compensated for, and that is what we have provided. We have guarded it, I think, just as carefully as we can.

Mr. SMITH. I want to say in this connection that in the light of the facts furnished me by the Commerce Reports and the investigation of the Tariff Commission, I do not hesitate to say that even the present rate of duty is more than a protective duty. The figures will disclose the fact that our importations have gradually decreased. But I am going to read to the Senate what our Department of Commerce has to say in reference to this matter. I have a sheet here from the Commerce Reports which reads:

In the shrinkage of United States exports of cotton knit goods from a total value of $54,500,000 in the peak year 1920 to $10,250,000 in 1921 it is apparent that this export trade is now readjusted on a basis of complete liquidation. Ordinarily somewhat over two-thirds of this trade is in hosiery exported to a great number of markets throughout the world. In recent years the United Kingdom, France, Argentina, Cuba, and Australia have been the leading buyers of American knit goods.

March exports of cotton hosiery exceeded 375,000 dozen pairs, a total considerably more than double the shipments of the same month a year ago, and 50 per cent greater than those of January or February this year. The value of March hosiery exports was in excess of $816,000, by far the largest monthly value for more than a year. The principal markets to which these goods have recently been going are Argentina, United Kingdom, and Canada. The Australian market, which has been very large, seems of late to have curtailed purchases greatly.

Although not apparent in the export figures, large manufacturers and exporters report that they have recently been receiving substantial orders for cotton hosiery from several of the world's chief consuming countries, namely, Belgium, France, Great Britain, Netherlands, and Mexico.

The department gives a table, and says:

From the following table exports of cotton hosiery for the years 1920 and 1921 and for the first quarter of 1922, by principal countries of destination, may be ascertained:

Countries of destination.	1920		1921		First quarter, 1922.	
	Dozen pairs.	Value.	Dozen pairs.	Value.	Dozen pairs.	Value.
Belgium	151,062	$447,968	14,276	$28,820	2,600	$3,037
Denmark	293,943	1,013,612	36,362	132,279	1,280	4,139
France	905,817	2,685,521	16,121	52,771	4,576	19,762

Total	11,575,655	37,879,665	2,508,258	6,232,198	855,256	1,775,458

[1] Includes Turkey in Europe, 230,454 dozen pairs.
[2] Includes Poland and Danzig, 65,774 dozen pairs.
[3] Includes Egypt, 169,284 dozen pairs.

This table bears out the facts I have just presented. I continue reading:

Trend in underwear exports—

Which is comprised in this knit-goods proposition.

Mr. SMOOT. That is the next paragraph.

Mr. SMITH. I know it is, but I will take occasion now to show what the Department of Commerce thinks of this knit-goods proposition, including hosiery. I continue reading:

Knit underwear exports in 1921 were valued at $3,600,000, a substantial decrease from the 1920 total of $14,000,000. However, February and March shipments of this year have exceeded in value those of the corresponding months a year ago by nearly 100 per cent, the March totals alone approximating 300 per cent of the March shipments last year.

Despite this recent tendency to increase, the total value of these exports for the nine months ending March, 1922, was slightly under $3,000,000, while for the corresponding period a year ago it approximated $8,000,000. For the calendar years 1920 and 1921 and the first quarter of 1922 exports of American cotton knit underwear had the following values.

It is very interesting to analyze this table carefully. I ask that the table may be inserted in the RECORD without reading.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The table is as follows:

United States exports of cotton and knit underwear.

Countries of destination.	1920	1921	First quarter, 1922.
Esthonia	.....	[1] $66,100	$1,768
Netherlands	$394,741	224,150	15,066
Poland and Danzig	82,832	231,161	.....
England	1,906,037	706,846	211,010
Scotland	228,513	51,894	9,914
Ireland	247,265	92,076	7,283
Other Europe	1,955,178	86,999	6,261
Canada	449,449	458,629	114,499
Mexico	138,277	96,913	16,429
Other North America	107,786	67,256	32,676
Panama	162,486	65,856	7,779
Other Central America	314,988	41,570	18,633

Other West Indies	480,816	91,438	24,421
Argentina	1,363,401	406,547	324,781
Uruguay	532,523	152,611	102,174
Other South America	1,470,647	147,794	24,573
Asia	[2] 589,765	52,785	11,680
East Indies	120,584	12,618	731
Australia	1,096,668	236,736	68,150
Philippine Islands	403,228	55,219	13,450
Other Oceania	86,111	33,299	4,654
British South Africa	256,804	73,709	44,132
Other Africa	78,292	10,443	162
Total	14,067,839	3,602,493	1,084,157

[1] July 1 to Dec. 31 only. [2] Includes Russia in Asia, $282,549.

Mr. SMITH. I continue reading from the Commerce Reports, as follows:

IMPORTS OF COTTON HOSIERY.

A marked expansion in the imports of cotton knit goods, particularly stockings, has been anticipated, due to the large pre-war hosiery imports from Germany. Other foreign sources of hosiery were negligible. In an average pre-war year about 2,227,000 dozen pairs of stockings, hose, and half-hose, valued at approximately $2,785,000, entered the United States from all countries, while the total for the calendar year 1921 was but 756,000 dozen pair, valued at $1,358,000, figures which fail to substantiate current market impression that present-day imports of German hosiery are abnormally large.

Mr. SIMMONS. Is that the declaration of the Tariff Commission?

Mr. SMITH. This is from the Commerce Reports issued by the Department of Commerce.

In the first quarter of this year imports of cotton hosiery have amounted to 420,000 dozen pairs, valued at $447,000, totals considerably larger than those a year ago, yet still far below pre-war imports.

In view of this calm, dispassionate, unbiased statement on the part of our Department of Commerce, which is charged with giving us trade information, and further, in view of the fact that we export such a vast volume and import such a comparatively small quantity, and the American production for home consumption is so enormous, I can not see any reason why we should raise the rate on this character of goods.

As I said last evening, the Republican Party is committed to the doctrine of protection. The tables I have submitted show that the present rate not only gives ample protection but really borders, in the general trend of these goods, on prohibition. Now, on what ground do they propose to raise the rate of duty above that existing when we are informed that the bugaboo of German importation has not materialized?

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. SMITH. Certainly.

Mr. LENROOT. I would like to know if I understand the amendment. If I understand the amendment correctly, the rate will not be raised over the rates contained in the Underwood law on all hose valued at over $1.20 per dozen pairs.

Mr. SMOOT. It is the same rate as in the old law.

Mr. SMITH. I was calling attention to the fact that the Senator from Wisconsin had stated that the goods which come in, containing a dutiable percentage of the 1⅜-inch staple, were in considerable quantity.

Mr. LENROOT. Upon that article the present rate is 50 per cent plus 7 cents a pound.

Mr. SMITH. I was calling attention to the fact that that duty imposing 10 cents as a compensatory duty upon long-staple cotton is, according to my information, very difficult of administration, and it is largely guesswork. I have no objection to a vote on the paragraph under the amendment proposed by the Senator from Utah.

I ask permission to have inserted in the RECORD in connection with my remarks two tables from the Tariff Information Survey on cotton knit goods, relating to cotton hosiery and showing the total imports for consumption and the revenue.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The tables are as follows:

TABLE 5.—*Cotton hosiery—Total imports for consumption—Revenue.*

Fiscal year.	Rate of duty.	Quantity.	Value.	Duty collected.	Value per unit of quantity.	Actual and computed ad valorem rate.
		Dozen pairs.				*Per cent.*
1891		2,627,098	[1] $5,648,878	[1] $3,250,237	$2.15	57.54
1892		4,893,840	5,176,537	3,567,445	1.06	68.92
1893		5,365,029	5,752,710	3,953,614	1.07	68.73
1894		2,476,936	3,670,858	2,513,161	1.06	68.46
1895		5,921,503	6,135,777	3,113,740	1.04	50.75
1896		5,215,281	5,623,737	2,808,169	1.08	49.93
1897		5,402,180	5,491,061	2,744,425	1.02	49.98
1898		3,100,832	3,583,331	2,258,662	1.16	63.03
1899		3,328,209	3,895,911	2,489,785	1.17	63.91
1900		3,488,106	4,207,755	2,658,213	1.21	63.17
1901		3,519,723	4,799,106	2,885,185	1.36	60.12
1902		3,519,925	4,786,413	2,882,266	1.36	60.22
1903		3,814,058	5,247,383	3,149,861	1.38	60.03
1904		4,119,784	5,430,914	3,264,088	1.32	60.10
1905		4,232,031	5,431,063	3,287,522	1.28	60.53
1906		4,690,759	6,119,196	3,675,230	1.30	60.06
1907		5,128,730	7,035,398	4,138,742	1.37	58.83
1908		4,829,125	6,855,080	3,994,827	1.42	58.28
1909		5,068,004	6,390,923	3,860,419	1.26	60.40
1910		4,477,783	5,825,100	4,141,689	1.30	71.10
1911		2,933,129	3,824,970	2,803,950	1.30	73.31
1912		2,349,663	2,912,430	2,116,086	1.24	72.66
1913		2,028,988	2,553,928	1,792,592	1.26	70.19

[1] Includes hosiery (quantity not given) valued at $2,158,398.22, on which $862,626.89 duty was assessed.

TABLE 5.—*Cotton hosiery—Total imports for consumption—Revenue*—Continued.

Fiscal year.	Rate of duty.	Quantity.	Value.	Duty collected.	Value per unit of quantity.	Actual and computed ad valorem rate.
		Dozen pairs.				*Per cent.*
1914		2,194,371	$2,949,678	$1,407,112	$1.34	47.70

[1] From Oct. 6, 1890, to June 30, 1891.

Mr. POMERENE. Mr. President, I would like to ask the Senator a question. Some reference was made a moment ago by the Senator from Wisconsin to the rate under the Underwood law. These duties seem to vary from a certain percentage ad valorem plus 7 cents a pound under the Underwood bill. The Senator has proposed to change that to a flat 50 per cent ad valorem rate?

Mr. SMOOT. Yes.

Mr. POMERENE. I wanted to ask in that connection two questions. Is the 50 per cent higher or lower than the rates contained in the House bill as it came over to the Senate, and, again, are they higher or lower than the average rates contained in the Underwood law, and, if so, how much?

Mr. SMOOT. They are lower than the rates reported from the House.

Mr. POMERENE. Approximately how much?

Mr. SMOOT. Approximately one-third, I will say. I am quite safe in saying one-third.

Mr. POMERENE. Keeping in mind the two plans of valuation?

Mr. SMOOT. Yes; keeping that in mind, of course. I want to say to the Senator as to the existing law that whenever the hose is valued at more than $1.20 the rate provided here is exactly the same as in the existing law.

Mr. POMERENE. Per dozen?

Mr. SMOOT. Yes. The ad valorem rate is exactly the same as existing law. I want the record to show that the rate on hose valued at more than $1 per dozen under the Payne-Aldrich law was 70 cents per dozen and 50 per cent ad valorem, and the equivalent ad valorem was 91 per cent. That was the equivalent ad valorem on that class of goods under the Payne-Aldrich law. The amendment just offered is 50 per cent. In

the year 1910 under that extreme rate, so called, there were imported into the United States 3,252,621 dozen pairs of hose.

I want to be perfectly frank with the Senate and say that I do not believe the 50 per cent rate is going to take care of certain hose, particularly children's hose, shipped into the United States, if the wage rate in the industry is maintained as it is to-day. I expect that the wage will have to be decreased. I do not know whether it is true or not, but I am told that the manufacturers are paying as high as $105 a week for knitters. There has been a strike once or twice and they have maintained the wage. I do not know how the manufacturers are going to make this class of goods with that wage paid and live. I frankly admit it. I told the manufacturers here the other day that I did not see how they were going to make that class of goods and pay that wage. Then they replied, "We can not do anything other than pay it, or close up our factories." That is the situation. All I am afraid of is that under existing conditions the rate of 50 per cent is going to interfere greatly with one class of hosiery manufactured in the United States.

Mr. POMERENE. I have not analyzed the cost and I am not prepared to express myself on that subject, but I do know that there has been a wave of protest against these very high rates on hosiery coming from retail dealers and people generally throughout the country who have studied the question. It is not as a result of propaganda alone, but because some of these people have gone very scientifically into an analysis of the costs themselves.

Mr. SMOOT. I will admit to the Senator that the way the bill was reported to the House, where the value of hose was 50 cents a dozen foreign valuation and up to $1 a dozen, and they gave 70 cents duty per dozen pairs, that meant 140 per cent rate of duty. That I admitted before, but now there is no hose of any kind here with a rate of 50 per cent, unless it contains the long-staple cotton, and then we only give the compensatory duty wherever that is used.

Mr. POMERENE. I am very glad the Senator from Utah and the committee have seen fit to offer the amendment to the Finance Committee amendment. I think it is a very good move.

Mr. SIMMONS. Mr. President, I, like the Senator from Ohio, am appreciative of this very substantial reduction which the committee has made. The Senate committee rate is very much higher than the House rate; in one instance it is nearly double.

Mr. SMOOT. But that is on the American valuation plan.

Mr. SIMMONS. I am not discussing that phase of it. I am just saying that the rate as written in the bill by the Senate committee is higher than the House rate. I do not know anything about the difference that may result between the American valuation and the foreign valuation. Probably if we take that into consideration, if the difference is as much as contended by Senators on the other side of the Chamber, they might be something like equal.

My own judgment, from information I have received and statistics I have with reference to knit goods and gloves and hosiery, is that the difference to-day between the American valuation and the foreign valuation is nothing like that upon which the Senate committee based their rate. The Senate committee based their rate, in going from the American valuation to the foreign valuation, upon the selling price of the foreign products as of the 1st of August, 1921. Admitting that the data which they then had as to rates of duty were accurate, they are wholly out of line as to the present time, because there have been very radical advances, heavy advances in the foreign article, and decreases in the American article, reducing the differentiation at both ends of the line.

But the proposed rate is a substantial reduction. The Senator said it is something like a 50 per cent reduction, and I am inclined to think he is not far from right. I am glad the light is dawning upon the committee and that they are seeing that the rates which they proposed and against which we have so vigorously protested in the interest of the consumers of the country and in the interest of fair dealing and justice were not warranted. I am glad they have come to that realization and have acted upon it in this paragraph.

The PRESIDENT pro tempore. The question is upon agreeing to the committee amendment as modified.

The amendment as modified was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. On page 129, line 21, the committee proposed to strike out "23" and to insert "45," and now proposes to modify the amendment by striking out "45" and inserting "30," so as to read:

Hose and half-hose, finished or unfinished, made or cut from knitted fabric composed of cotton or other vegetable fiber, and not specially provided for, 30 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

Mr. SMOOT. Mr. President, I have here a telegram from Hon. Henry F. Lippitt, which he is desirous that I read into the RECORD, and I shall do so at this time. It is as follows:

PAWTUCKET, R. I., *July 17, 1922.*

Senator REED SMOOT,
Washington, D. C.:

Am informed that in reply to question of Senator LENROOT you stated to-day that paragraph 905a was proposed by me. The hearings on cotton schedule show that this paragraph was first proposed by Arthur H. Lowe, as chairman of Consolidated Tariff Committee of Cotton Manufacturers, consisting of both northern and southern representatives, and was subsequently advocated by me. The reason only Mr. Lowe and myself appeared for the general industry was because your committee specifically requested that testimony should be limited to as few witnesses as possible. For the sake of accuracy think this correction should appear in the RECORD. HENRY F. LIPPITT.

Of course the Senator from Wisconsin [Mr. LENROOT] knows that I called attention to the fact that there had been a material change in the paragraph as recommended by Mr. Lippitt and also as recommended by Mr. Lowe. We discussed the question of the effect of the inclusion of one thread, but, that clause being entirely eliminated, the whole result of the proposed amendment was changed. The newspaper reporters, however, can not always follow these details, it being a complicated question, and I am not complaining that they made the mistake; but Mr. Lippitt desired his telegram to appear in the RECORD, and I have read it in order that the matter may be made clear.

Mr. LENROOT. Mr. President, just a word in connection with what the Senator from Utah has said in reference to the statement I made. I was reading the hearings of the testimony of Mr. Lippitt where this particular amendment was placed in the record, proposed as a substitute for paragraph 905. It is true that I originally stated that the paragraph as reported by the committee was word for word as suggested by Mr. Lippitt. The Senator from Utah, however, later called my attention to the fact that there was one phrase that was omitted, and later in the day I made the correction.

Mr. SMOOT. There is no doubt about that, but the newspapers did not carry the correction, that was all, and I have merely read Mr. Lippitt's telegram for the record.

The PRESIDENT pro tempore. The Secretary will state the next committee amendment.

The ASSISTANT SECRETARY. On page 130, paragraph 916, beginning with the word "valued," in line 2, the Committee on Finance propose to strike out down to and including the words "ad valorem," at the end of line 13, as follows:

valued at not more than $1.50 per dozen, 40 cents per dozen and 12½ per cent ad valorem; valued at more than $1.50 and not more than $3 per dozen, 70 cents per dozen and 12½ per cent ad valorem; valued at more than $3 and not more than $5 per dozen, $1.20 per dozen and 20 per cent ad valorem; valued at more than $5 and not more than $7 per dozen, $1.40 per dozen and 25 per cent ad valorem; valued at more than $7 and not more than $12 per dozen, $2.25 per dozen and 25 per cent ad valorem; valued at more than $12 and not more than $20 per dozen, $4 per dozen and 28 per cent ad valorem; valued at more than $20 per dozen, 40 per cent ad valorem.

And in lieu thereof to insert "50 per cent ad valorem," so as to make the paragraph read:

PAR. 916. Underwear and all other wearing apparel of every description, finished or unfinished, composed of cotton or other vegetable fiber, made wholly or in part on knitting machines, or knit by hand, and not specially provided for, 50 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

Mr. SIMMONS. Mr. President, I think it will go without saying that to those who take the same view of the object and purpose of tariff taxation that I do the rates proposed in the House bill as proposed to be amended by the Senate committee are wholly unwarranted. These knit goods, underwear and other wearing apparel, which are composed of cotton or other fiber, constitute such a large part of the cotton goods which are consumed in this country that the importance of the product to the taxpayer and to the people generally is so apparent that it need not be stated or discussed.

The rates proposed by the committee in this instance have probably reached the peak of the rates of this bill. I doubt very much whether any other paragraph in the bill carries higher rates than the paragraph we have just disposed of and the paragraph we have now taken up for consideration. I want, for the purpose of having it go in the RECORD, Mr. President, to read the remainder of the paragraph showing the rates which the Finance Committee originally proposed as compared with the rate they are now graciously, very much to my delight, offering to substitute.

After mentioning the goods—

Underwear and all other wearing apparel of every description, finished or unfinished, composed of cotton or other vegetable fiber, made wholly or in part on knitting machines, or knit by hand, and not specially provided for—

Then follow the rates as the committee proposed them originally—

valued at not more than $1.50 per dozen, 40 cents per dozen and 12½ per cent ad valorem; valued at more than $1.50 and not more than $3 per dozen, 70 cents per dozen and 12½ per cent ad valorem; valued at more than $3 and not more than $5 per dozen, $1.20 per dozen and 20 per cent ad valorem; valued at more than $5 and not more than $7 per dozen, $1.40 per dozen and 25 per cent ad valorem; valued at more than $7 and not more than $12 per dozen, $2.25 per dozen and 25 per cent ad valorem; valued at more than $12 and not more than $20 per dozen, $4 per dozen and 28 per cent ad valorem; valued at more than $20 per dozen, 40 per cent ad valorem.

I do not know what would be the ad valorem equivalent of those rates. I imagine—and I should like to ask the Senator from Utah if I am correct—that it would be over a hundred per cent.

Mr. SMOOT. The rates on what particular goods?

Mr. SIMMONS. The ad valorem equivalent of the various rates on knit underwear and other goods provided for in the paragraph as originally written in the bill by the Committee on Finance.

Mr. SMOOT. Taking goods valued, say, at a dollar, the specific duty of 40 cents per dozen would be equivalent to 40 per cent, and adding 12½ per cent would give a total equivalent ad valorem of 52½ per cent in that bracket.

If the goods were valued at $2, the specific duty of 70 cents per dozen would be equivalent to 35 per cent, and 12½ per cent added would be 47½ per cent.

On goods costing $3 the specific duty of $1.20 would be equivalent to 40 per cent, and the 20 per cent ad valorem additional would give a total equivalent ad valorem of 60 per cent. But the committee has proposed to amend the paragraph by making the rate 50 per cent clear through.

Mr. SIMMONS. I understand that, but I was asking the Senator what would be the average ad valorem equivalent on all the items in the paragraph.

Mr. SMOOT. The equivalent ad valorem as provided for by the House bill?

Mr. SIMMONS. Yes; the average equivalent ad valorem.

Mr. SMOOT. It would of course depend upon the valuation of the goods imported, but I should think it would be above 50 per cent.

Mr. SIMMONS. And the Senator is now proposing to reduce it to 50 per cent.

Mr. SMOOT. To 50 per cent. I will say to the Senator that in the Payne-Aldrich law——

Mr. SIMMONS. The Senator must be mistaken in saying the ad valorem equivalent of the rates now written in the bill will average but slightly more than 50 per cent, because some of them bear in addition to the specific rate per dozen as high as 28 per cent ad valorem additional.

Mr. SMOOT. The 28 per cent ad valorem applies on goods valued at more than $12 but not more than $20.

Mr. SIMMONS. Yes; and in addition there is a specific duty of $4 a dozen.

Mr. SMOOT. On goods valued at $12, $4 a dozen would be equivalent to 33⅓ per cent, and the additional 28 per cent would make a total ad valorem duty of 61⅓ per cent.

Mr. McCUMBER. Mr. President, may I correct the Senator from Utah? The Senator is basing those ad valorems upon the foreign valuation. As a matter of fact, in the House bill they were based on the American valuation. The equivalent ad valorem on the House rates based on the American valuation will run as high as 70 or 80 per cent.

Mr. SIMMONS. Yes; but what would it be, estimated upon the foreign valuation?

Mr. SMOOT. I think a little over 50 per cent.

Mr. McCUMBER. Under the amendment now proposed by the committee the rate will be 50 per cent.

Mr. SMOOT. It will be 50 per cent under the rate now proposed.

Mr. SIMMONS. I am not speaking about the amendment now proposed, but I am speaking of the paragraph as the committee reported it to the Senate. I am trying to find out, I will say to the Senator from North Dakota, what is the amount of the reduction that is proposed now by the new amendment which has just been offered. An amendment has just been offered to fix a flat 50 per cent ad valorem rate, and I am trying to find out what the reduction involved in that change amounts to as compared to the rates in the bill as it was reported to the Senate by the Finance Committee.

Mr. McCUMBER. The expert says that the rate now proposed is about 10 per cent less than the original rates; that the original rates were about 60 per cent, and it is now proposed to reduce them to 50 per cent.

I wish to call attention to the fact that under the Payne-Aldrich law the rates ranged from 57 to 64 per cent. So the rates now proposed by the committee are a very considerable reduction below the rates carried in the act of 1909.

Mr. POMERENE. Mr. President, I notice that the duty on this class of goods under the Underwood bill—and there are some few exceptions to what I am stating now—was practically 30 per cent. The total production in 1919 was $143,687,000; the total imports for that year were $296,734; the exports during 1919 of cotton knit underwear were $8,602,293; the exports of other cotton knit goods for that year were $1,508,995.

Mr. SIMMONS. Mr. President, where is the Senator reading from?

Mr. POMERENE. Page 892 of the Tariff Summary. For the year 1920 the exports of cotton knit underwear were $14,067,839, and of other cotton knit goods $2,510,558. For nine months of 1921 the exports of cotton knit underwear were $2,535,434, and of other cotton knit goods $340,024. We have had all of this export business, and very modest imports, as I have indicated.

Mr. SMOOT. Mr. President, if the Senator had the imports up to date, they would show quite a different state of affairs.

Mr. POMERENE. I do not have them. I assume that there has been some increase, but what I am trying to get at now is this: Certainly 1920 and perhaps 1921 more nearly approached normal conditions than the present time. I say that in view of the pendency of the present bill. If we had these large exports and these comparatively small imports during that more or less normal period under the Underwood rates of 30 per cent, I do not quite see the reason for increasing this rate to 50 per cent. I have been informed, too, that latterly there have been substantial increases; but I dare say——

Mr. SMOOT. Mr. President, for the first five months of this year there has been imported over twenty times the amount that was imported in the year 1921.

Mr. LENROOT. Mr. President, will the Senator give the amount?

Mr. SMOOT. Three million eighty-four thousand six hundred and three dollars.

Mr. LENROOT. For five months?

Mr. SMOOT. That is five months, less the $160,342. In other words, for the first five months of 1922 there has been imported into the United States twenty times all that was imported in the year 1921.

Mr. POMERENE. Mr. President, I have been shown here the copy of the Monthly Summary of Foreign Commerce for May, 1922, and this gives the imports of knit goods, all others except gloves and stockings, as $84,849. That is for the 11 months ending May 30.

Mr. SMOOT. That is $3,084,603.

Mr. POMERENE. No; I am advised by the expert sitting by me here that the item to which the Senator refers, and which reads "all other wearing apparel," does not include underwear at all.

Mr. SMOOT. It says "knit goods," and these are knit goods, and it then says "gloves and stockings and all others." That is the wearing apparel.

Mr. POMERENE. I have no personal knowledge of the matter; but the record here shows that the imports of knit goods amounted to $84,849, and the expert here advises me that that includes the underwear, and that the other item is something else.

The exports of knit goods—I read now from page 40 of the Monthly Summary of Foreign Commerce—for 11 months ending May 30, 1922, were $3,604,694, and in the case of the other knitted wear—sweaters, shawls, and other knit goods—the exports were $298,745 for the same 11 months.

Mr. SIMMONS. Mr. President, I call the attention of the Senator to the fact that in line 25 of page 129, in this paragraph, the underwear and other wearing apparel referred to is limited to that "made wholly or in part on knitting machines, or knit by hand," so that he is correct about it.

Mr. POMERENE. Mr. President, if these figures are correct—and they seem to me to be—I confess that I do not see the reason for increasing this duty from 30 per cent ad valorem to 50 per cent ad valorem, particularly as I am advised that during recent months there has been considerable increase in the wages in Germany and to some extent a reduction in wages in this country. It has been pointed out here repeatedly that the raw material comes from this country. I deplore these larger increases of duties, particularly at this time and for this reason:

We are having very, very serious wage troubles now. Some of them may be justified; but when it comes to the matter of a reduction of wage scales, whether in mining or in the railroads, one of the objections to these decreases now is based

upon the fact that there has not been a corresponding reduction in the cost of living. I have not analyzed that problem, and I am not expressing any opinion about it; but when the Congress of the United States is passing a tariff law here which adds materially to the cost of many articles of food, to the cost of many articles of wearing apparel, the cost of many of the articles of necessity which enter into all of the households of the country, it seems to me that it adds to the feeling of unrest which we have everywhere.

I am not disposed to do anything here, and do not want anything done, that is going to injure any line of activity; but I know, as Senators all know if they will be frank with one another, that a tariff bill never comes up here, no matter what the rates are, but that somebody comes in here and says: "Oh, we must have higher rates, because we can not do business under the pending rates," and so forth. That is nothing new. We hear it on every side.

If I may illustrate, some months ago I had a conversation with a very distinguished manufacturer from my own State. He was insisting upon the American-valuation plan as his only security against closing his factories because of the importations of his product that were coming from other countries. I was interested a little later in a statement which he had made in the first conversation, in which he said that Italian-made goods were coming into this country and selling at 90 per cent off list price; but he was very careful in his letter not to tell me what the list price was or what his own price was, and insisted that as the result of these sales he must close down his plant. Within three or four months after that conversation the local papers announced that he was running his plant at nearly full capacity, and had just given an increase of 10 per cent in wages to his men. I suspect, if we were to go into the details of many of these articles of manufacture, that we would find substantially the same condition.

I know that the Finance Committee have had very great difficulty in ascertaining what the cost of manufacture is, because this cost has been changing from time to time, due in part to changing economic conditions abroad, due in part to the difference in the cost of exchange. I understand that fully; but it does seem to me that we ought to be equally careful lest we place too great burdens upon those who must buy as well as upon those who may perhaps be producing and selling.

I am glad to know that this reduction has been submitted by the committee, but it does seem to me that the rate of duty proposed by the revised amendment is still entirely too high.

Mr. McCUMBER. Mr. President, I think it opportune at this time to put in the RECORD a statement of the conditions of cost of living as compared with wage costs in the United States, because it meets the inquiry made by the Senator from Ohio [Mr. POMERENE].

As a matter of fact, there is no excuse in many instances, in my judgment, for the present high price of many commodities. They are simply held up to the full price that the sellers can obtain, and the profits, I think, are very heavy along certain lines; but, notwithstanding all this, the cost of living has gone down very materially below that of the cost of labor, and the wholesale costs of commodities have gone down very much more than the average retail costs of the same commodities.

I ask permission to introduce into the RECORD a statement on this matter that I obtained from the Department of Labor but a few days ago.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Index numbers of wholesale prices of commodities, by groups, and of union wage rates per hour of labor in the United States.

(1913=100.)

Commodities.	1914	1915	1916	1917	1918	1919	1920	1921	
								Year.	December.
Wholesale prices:									
Farm products	103	104	123	190	218	231	218	124	120
Foods	102	105	121	167	188	207	220	144	136
Cloths and clothing	98	98	127	175	228	253	295	180	180
Fuel and lighting	93	88	126	169	170	181	241	199	199
Metals and metal products	85	99	162	231	187	162	192	129	113
Building materials	92	94	120	157	172	201	284	165	158
Chemicals and drugs	101	134	181	202	215	169	200	136	127
House furnishings	100	100	106	125	153	184	254	195	178
Miscellaneous	95	95	121	148	156	175	196	128	121
All commodities	98	101	127	177	194	206	226	147	140
Union wages	102	103	107	114	133	155	199	205	.....

Mr. McCUMBER. It will be seen from this table that they take 1913 as the basis. That is 100. The wholesale price of farm products in 1914 was 103, or 3 per cent above 1913. In 1921, for the year, it was 124, or 24 per cent higher than in 1913. Taking the month of December, 1921, it was 120, or 20 per cent higher than in 1913.

Mr. POMERENE. Is the Senator speaking of wholesale prices now?

Mr. McCUMBER. I am speaking of wholesale prices of farm products. That is all we can go by, because it is almost impossible to get the average retail prices.

Now, I will give the statistics as to foods, starting with 1913 at 100. In 1914 it was 102; in December, 1921, it was 136.

Clothes and clothing, 100 in 1913; it dropped to 98 in 1914 and went up to 180 in December, 1921.

Fuel and lighting, which was the highest, 100 in 1913, 93 in 1914, and 199 in 1921.

Metals and metal products were 85 in 1914—all being 100 in 1913—and 113 in December, 1921. There was less rise in that than in any other article.

In building material it was 92 in 1914 and 158 in December, 1921. Chemicals and drugs were 101 in 1914 and 127 in December, 1921. House furnishings were 100 in 1914 and 178 in December, 1921. All other, miscellaneous, 95 in 1914 and 121 in December, 1921. Taking all commodities together, they were 98 in 1914 and 140 in December, 1921. The union wage scale was 100 in 1913, 102 in 1914, and 205 in 1921.

Mr. POMERENE. Let me ask the Senator, again, when he is speaking of the rise in the price of house furnishings and clothing, is he speaking of wholesale prices?

Mr. McCUMBER. Wholesale prices. I have stated that the retail prices have not gone down to the same extent that wholesale prices have. I had a statement a short time ago upon retail prices which I have not with me to-day and, therefore, will not take any chances in misquoting. They have gone down quite considerably, but nothing in comparison with the wholesale prices.

Mr. POMERENE. I think I agree with the Senator from North Dakota in the statement that the wholesale prices have gone down relatively very much lower than the retail prices, and that is regrettable; but I am satisfied from conversations I have had with leading retail merchants in Ohio, as well as from correspondence I have had with them, that there has been a very determined effort to bring down the retail prices. They have had their embarrassments as well, because many of the goods they have on their shelves they have had to pay for at excessively high wholesale prices. That is a problem which every business man has to deal with. I had not expected to talk upon this subject to-day, but I may later. One of the most strenuous objections they make is that while many of them are exerting themselves to reduce these prices, which is what the Senator from North Dakota and I both want, they come here and say to me and to others that with these increased tariff rates there is coming an excuse to add to the wholesale price, to the manufacturer's cost, and necessarily to the retailer's cost, and they fear that there is going to be just what there was a year or two ago, another buyers' strike; and if so, what are they to do, looking at it from their own selfish standpoint? It is going to mean financial embarrassment to them, and with a buyers' strike comes the inability of the breadwinner to buy the articles of clothing and of food which he would like to have for his family, but which he feels he can not buy because of the increase in prices. That is the difficulty about it, and, bringing my thought down so as to apply it to the pending amendment, we have here confessedly an increase from 30 per cent ad valorem, under the Underwood Act, to 50 per cent under the pending bill. In other words, you are almost doubling this duty; and when I turn to the records I find that our imports of these knit goods are relatively small, compared with the exports from our country, and the fact that we are exporting any substantial amounts would indicate that we are selling in competition in the foreign markets, and we are doing all of that under the Underwood tariff of 30 per cent ad valorem, or thereabouts. For that reason why should we be increasing this duty to 50 per cent, or nearly doubling it?

I do not believe it is going to redound to the good of the manufacturers, and certainly it is not going to aid the struggling masses, who are now having difficulty in paying their grocery bills and their clothing bills.

Mr. McCUMBER. Mr. President, I want to answer a suggestion just made by the Senator from Ohio, and I want to answer it because he and other Senators have referred to the same thing, that is, that since we are exporting a certain line of goods such imports should be credited against our exports,

even though the class of articles imported are not exported at all.

We seldom import and export the same thing or a comparable thing. We manufacture certain lines of articles. Many of these paragraphs have a large number of brackets. The imports of the articles included in 10 or 12 of those brackets may be heavy, and in the case of the article covered by the next one, it may be that there are no imports at all, or they may be very unimportant, if there are any whatever. We may be exporting to Cuba, where we have a differential, or we may be exporting to other countries, in South America, for instance, a very considerable amount of those things which are not imported. Certainly we could not import and export the same thing. We could not get a sufficient profit to pay the duty and then reexport, and I think in most cases the Senator will not find any comparison between the imported article and the exported article if he will examine carefully into the statistics of the goods which are coming in and those which we export. In some instances there may be some, but as a rule we export different articles, although they come under the general schedule.

Mr. POMERENE. Mr. President, I very candidly admit that my good friend from North Dakota may be in part right in that statement, but I think also he is part wrong in what he is trying to do. It may be that at the port of New York we could import. It may be that at the port of San Francisco we could export these very articles. When the Senator says that we export under certain brackets and import under certain other brackets, I assume that is true, but the Senator comes here and insists upon a duty of 50 per cent upon all these articles, whether they come in or are exported in the one bracket or the other bracket. That is the vice of this bill in part.

Mr. McCUMBER. Just let me say there, there are sometimes peculiar reasons why we are not importing certain articles at a certain time, and yet, if we place no duty upon them whatever, the conditions might almost instantly change and change very suddenly the whole course of commerce. Therefore we have to guard against, not that possibility, but that probability.

Mr. POMERENE. Of course, circumstances alter conditions. I can conceive that if there were to be a revolution in Germany—and I hope there will not be—it might necessitate some additional changes in our financial legislation, or, if it did not necessitate changes, at least it might render them advisable. We all understand that. But I hope the distinguished chairman and his associates on the Finance Committee can see their way clear to leave this rate at least where it was under the Underwood law, as applied to these knit fabrics.

Mr. McCUMBER. If we wanted to surrender our market in the future, of course I would favor such a proposition. I differ with the Senator in his thought that there is no danger of the future, because we have not suffered materially in the last two years. If the Senator were in the channel of the river above Niagara Falls, he would not wait until he got into the rapids before he would pull for the shore. It would be no answer for him to say: "I am gliding along smoothly now. I do not feel any particular danger." He might continue until he got to the brink, and even a third of the way down, and he might say, "I am not suffering even yet. I will wait until I get to the bottom." The Senator would not do that, and when I see the capability of production in a given line, and recall what they could do, I think it is safe to look ahead and guard against probabilities, although we need not go to the extent of guarding against mere possibilities.

Mr. POMERENE. Mr. President, the only difficulty with the Senator's illustration is that if I were in the river above Niagara Falls I would know, as a matter of fact, that there were falls there; but when he fancies that there is a fall or catastrophe ahead of us in our manufacturing industry he must reflect that Congress is going to be in session, and that Congress can meet that situation when we have a Niagara Falls in our industrial life, and we will meet it.

Mr. McCUMBER. The country might not be able to meet it, however, after it got over the brink, even though we had a succeeding Congress.

Now, I want to answer another suggestion made by the Senator upon the retail prices. I stated in opening the discussion upon the tariff bill that we could not expect the retailers to reduce very materially their prices until at least they had gotten rid of the old stock of goods on which they had paid very heavy additional costs over previous years. Now, I think they have had about time enough to get rid of most of it, and they ought to begin to make a showing in their reductions. I appreciate, with new conditions, in which clerks are limited to so many hours per day and under which they must open their stores at 9 or a quarter after 9 and then be careful that they do not keep a woman clerk longer than eight hours or longer than so many hours per week, that their overhead costs are very much more than they were previous to the enactment of those hour-saving laws, and we must allow them full credit for the overhead charges. But I am inclined to think that they are still charging all the trade will bear.

The Senator said they will make the tariff an excuse for raising their prices. They will not, because they will not raise them. I will tell you why they will not raise them. It will not be because they will not have the inclination, because they have raised them already as much as the trade will bear, and that is the real thing, after all, which governs. Whenever the public ceases to buy along a certain line because the prices are too high, they immediately begin a rapid reduction. The Senator will remember in 1920, during the first half of the year, how the prices, wholesale and retail, mounted higher and higher, and in a month began a very big slump because we had reached the end of the purchasing power of the pocketbook and the people would not pay the prices. Whenever the people will not pay the price they will have to sell at a less amount, both at wholesale and at retail.

The Senator is not blind to the fact that many people are claiming that they will raise their prices on account of the tariff, when he knows and I know that the tariff, instead of being raised, has been lowered. The Senator heard a very short time ago a statement by a large clothing establishment to the effect that they would have to raise the average price of suits $4.50, if I remember rightly, because of the tariff; and yet the Senator knows that the present tariff law upon the scoured wool is 45 cents per pound and the present bill proposes 33 cents a pound, or 12 cents a pound on the scoured content less than the present law.

I am not surprised that some of the Ohio retail stores who have not studied the wool schedule may have been misled by the declarations of—what shall I call the kind of man who makes a statement of that character in the face of those facts? I can not use the language in the Senate, Mr. President, but we all know what it is. He knew when he penned those words that the proposed tariff rate on wool was less than the present-law rate upon wool on the scoured contents. Yet a great many retailers, without considering that fact, will say, "The wholesale clothier will raise his prices and we will have to raise ours." I am not surprised that they are disturbed, and that will be the case as to a great many other articles. But, Mr. President, prices are going to come down.

Some of the manufacturers of knit goods, stockings, hosiery, and so forth, stated to us that they wanted at least 90 per cent where we gave them 50 per cent. Upon what do they base their claim? As stated by the Senator from Utah, they said, "We are paying $105 a week for a knitter, almost $450 a month," and they ask the American people and have the effrontery to ask Congress to give them a rate that would protect them with those absurd wages and compel the American people to foot the bill. Now, wages are going to come down. They have got to come down. The cost of production must come down, and if it does not come down, then, for the protection of the American people, let Germany furnish us with the hosiery. No such protection can be given, but when we say, "We will give you a protection of 50 per cent," I do not think it is excessive. The Senator from Ohio, I know, does think so because of the somewhat limited importations under the present law, but, as the Senator from Utah suggests, on the higher-priced class, we are down to about present rates, and I think that protection will be needed in the future.

Mr. LENROOT. Mr. President, it seems to me the rate proposed by the committee is higher than justified by the imports which are being received. It seems to me that it would average higher than the rates originally proposed by the committee, while heretofore the rates proposed by the committee have been reduced. I have made a very hasty computation on the 50 per cent ad valorem rate applied to all these articles as compared with the specific rate provided in the bill. Unless I have made a mistake in the calculation upon articles valued at $1.50 a dozen the rate now provided would be 50 per cent ad valorem, while the rate originally reported would be 40 per cent ad valorem.

Mr. SMOOT. I will say to the Senator that the way those goods are imported, not only hosiery but all other goods, they always come in just——

Mr. LENROOT. This does not include hosiery.

Mr. SMOOT. I say including hosiery. Those goods come in just over the low bracket. They never come in just under the high bracket. The goods are always billed that way.

Therefore the Senator can not take the high price in the bracket and get the equivalent ad valorem because that is not the practice in importing goods of any kind or character.

Mr. LENROOT. Let us take a cost of $2 per dozen, falling in the bracket between $1.50 and $3.

Mr. SMOOT. They would come in at $1.50 where the rate would be 70 cents a dozen. That is 46 per cent, and 12½ per cent added would be 58½ per cent.

Mr. LENROOT. But the Senator says they do not come in under that price.

Mr. SMOOT. Yes; they would come right there, just above the low bracket.

Mr. LENROOT. No; certainly an import does not come in at $1.50. It would come in at $1.49.

Mr. SMOOT. It would come in at that figure wherever it came in at all. Take $1.60. That would be in round numbers 43 per cent, and 12½ per cent added would be 55½ per cent.

Mr. LENROOT. But the Senator just said they do not come in that way, and I agree with him. They come in the other way wherever they take the low rate.

Mr. SMOOT. Then you would have to say that they come in under $2.99, and that would be not more than $5, which would carry a rate of $1.20 a dozen and 20 per cent ad valorem. If the Senator will figure it out, he will find that to be correct. It is the rate which is the lowest on the last bracket of $20, because they are luxuries, and we do not care anything about those. That would be in round numbers 60 per cent or 59 per cent.

Mr. LENROOT. No; $2.99 would take 70 cents.

Mr. SMOOT. No; $2.99 would be 20 per cent.

Mr. LENROOT. It would be 22 per cent.

Mr. SMOOT. No; the Senator is wrong. Two dollars and ninty-nine cents would take a rate of $1.20 a dozen.

Mr. LENROOT. No; $2.99 would carry 70 cents a dozen rate.

Mr. SMOOT. If the Senator puts it that way, of course.

Mr. LENROOT. That is what we are doing. Let the Senator figure it himself. It is very much less than 50 per cent.

Mr. SMOOT. Yes; provided they would take the higher bracket.

Mr. LENROOT. Of course they will. Here is a rate that might be $3.10 where they can get a difference of 50 cents a dozen by making it $2.99, and of course it will come in at $2.99. The Senator will find that going through the whole paragraph. I think he will find that this actually works out as an increase over the House rate and not a decrease at all.

Mr. POMERENE. Mr. President, the Senator means by that the proposed rate of 50 per cent ad valorem?

Mr. LENROOT. Yes.

Mr. SMOOT. The Senator must take into consideration that the ad valorem rates are on the American valuation, and on the hosiery with the American valuation the whole rate would be away above what the Senate committee has proposed.

Mr. LENROOT. No; but the Senate committee reported this same ad valorem on the foreign valuation. That is the point I am making. I am taking the original action of the Senate committee; and I insist that 50 per cent ad valorem will constitute a higher rate than those originally proposed by the Senate committee. That is the point.

Mr. KING. If the Senator will pardon me, I think as to a number of these items, the 50 per cent ad valorem rate is higher than the rates in the House bill. For instance, on the item "valued at more than $5 and not more than $7 per dozen," the equivalent ad valorem would be 45 per cent; and on the item "valued at more than $7 and not more than $12 per dozen," the equivalent ad valorem would be 43 per cent.

Mr. LENROOT. Yes; that is the way it runs.

Mr. KING. On line 11 it would be 48 per cent. Then, of course, on line 13 there is a flat increase of 10 per cent.

Mr. SMOOT. Those are luxuries and we do not care anything about that.

Mr. LENROOT. The 40 per cent upon the highest bracket is actually a less rate ad valorem than is imposed upon the lower brackets? Is not that true?

Mr. SMOOT. There is no question about that, so far as the equivalent ad valorem is concerned.

Mr. LENROOT. Mr. President, with reference to imports, the Senator from Utah——

Mr. SMOOT. In looking over the statistics as to imports, I see that the figures include the items which are found in paragraph 918 as well as those found in paragraph 916.

Mr. LENROOT. Exactly. That makes, of course, a very great difference. I am very sorry that, though both the Senator from Utah and I have endeavored to get the actual figures of imports under paragraph 916, we have been unable to do so; but there are nothing like the quantity of imports under paragraph 916 that the Senator, perfectly innocently, of course, asserted did come in under that paragraph. As a matter of fact, during the year 1921 the 30 per cent rate was practically prohibitive under this paragraph, for the total imports for the full year 1921 under the paragraph amounted in value only to $189,000.

Mr. POMERENE. Mr. President——

Mr. LENROOT. Let me finish this statement. At the same time our exports of goods under the same paragraph amounted to $10,232,000. Now I yield to the Senator from Ohio.

Mr. POMERENE. The Senator from Wisconsin stated a moment ago, if I understood him correctly, that the Senator from Utah was mistaken in the assertion as to the amount of imports?

Mr. SMOOT. Under paragraph 916.

Mr. POMERENE. Yes. Now, is the Senator able to inform us just what those imports are?

Mr. LENROOT. No; I could not get them. Both the Senator from Utah and I tried to do so, but the commerce reports do not separate imports under paragraphs 916 and 918.

Mr. POMERENE. Have either of the Senators been able to get the information as to whether or not there were substantial imports?

Mr. SMOOT. There were $3,000,000 worth, as I stated, which came in under both paragraphs; but I can not get the figures applying to the separate paragraphs.

Mr. POMERENE. Those figures include articles other than knit wear.

Mr. SMOOT. Yes; they include wearing apparel of both kinds. I can not say what the division was.

Mr. POMERENE. I am quite sure—because I had the expert at my elbow at the time—as to the amount of the imports of knit goods, and I think the figures as I gave them were accurate.

Mr. SMOOT. I will say to the Senator that I tried to ascertain from the Treasury Department, but could not do so, because they have not separated the figures.

Mr. LENROOT. The Senator made the statement that the imports were twenty times greater. Combining the imports for 1921 under paragraphs 916 and 918, as I roughly figure it, they ran to a little over $1,000,000, when now combined they are a little over $3,000,000.

Mr. SMOOT. Combining both paragraphs?

Mr. LENROOT. Combining both paragraphs.

Mr. SMOOT. But we can not tell how much fell within each of the paragraphs.

Mr. LENROOT. So that I think under the showing that has been made some increase is justified; but an increase of 66⅔ per cent can not be justified, in my judgment. Upon the showing that has been made of exports under this paragraph an increase of 40 per cent would be ample to protect the American industry. The exports, as I have stated, were around $10,000,000, while the imports were but $189,000. The imports under paragraph 918 were, in 1921, in the neighborhood of $1,000,000, while our exports under that paragraph during the same period were over $5,000,000.

So I am going to propose, Mr. President, an amendment reducing this duty from 50 per cent to 40 per cent.

Mr. SMOOT. Mr. President, in hastily figuring on the basis of $1, $2, $4, $6, $9.50, and $16—that is, taking the figure midway between the higher and the lower values within each bracket—I will say to the Senator the result is as follows: On the article valued at $1, the rate is 52½ per cent; on the $2 article it is 47½ per cent; on the $4 article it is 50 per cent; on the $6 article it is 48 per cent; on the $9.50 article it is 49.7 per cent; on the $16 article it is 53 per cent; and on articles valued at over $20 it is 40 per cent.

Mr. LENROOT. I will simply say, in response to that, that I agree with the statement which the Senator from Utah has just made, that imports as they actually come in always come in, so far as possible, just under the next higher bracket. Therefore I think it is fair to figure, so far as the average is concerned, what the ad valorem would be for imports just under the next higher bracket. That I am quite sure, Mr. President, will figure out less than 50 per cent.

I wish to say a word with reference to the statement of the Senator from North Dakota [Mr. McCUMBER], the chairman of the Committee on Finance, with regard to the possibilities of the future, that this bill ought to take care of those possibilities in the specific rates which are imposed. That was discussed during the early part of the debate, but I have not heard anything of it lately. I supposed that it had been ac-

cepted, in so far as mere possibilities in the future are concerned; that the committee had taken care of that by the provision for flexible rates. I presume that was the purpose of that provision. If that was not its purpose, why was it reported by the committee at all? I insist, Mr. President, that where a showing can not be made for the increase of a specific rate or a showing can not be made for a rate as high as is proposed by the committee, it is not fair, it is not right to appeal to the fears for the future, based upon possibilities, when the committee itself has reported a provision, which I shall support and which is intended to take care of those possibilities, enabling the rate to be increased if it shall be found too low in a given case. So I insist that the argument of the Senator from North Dakota ought not to be considered at all in connection with the specific paragraphs.

Mr. President, I want to support and I do support throughout this bill rates which, to my mind, are amply protective, and I have been resolving doubts in favor of the committee and the bill, but there has been no showing made here why the rates originally proposed by the committee should be increased, and they will be increased if the ad valorem rate shall be made 50 per cent. Therefore, Mr. President, I move, if it be in order——

Mr. SMOOT. The Senator wants, then, to disagree to the committee amendment, which would leave the rate 40 per cent?

Mr. LENROOT. Yes; that would be all right.

Mr. SIMMONS. Mr. President, the Senator from Wisconsin is absolutely right. The proposed amendment of the committee will not reduce the rates in this paragraph as we were led to believe and probably most of us did believe it would when the amendment was first stated. It will materially increase the rates in some of the brackets. I have asked the expert who has been assisting the Senator from South Carolina [Mr. SMITH] in the management of this schedule to make a calculation as to the different brackets in this paragraph, and I find that in the first bracket, embracing goods valued at not more than $1.50 a dozen, on which a rate of 40 cents per dozen and 12½ per cent ad valorem is proposed, the rate under the bill as it passed the House would be 39½ per cent, so that the rate proposed by the committee would be an increase of about 11 per cent.

In the next bracket the lower-priced commodities would be taxed at a rate of 60 per cent and the higher priced at a rate of 36 per cent; in the next bracket the rate would be 60 per cent on one portion of the fabrics covered by the bracket as compared with 44 per cent on the other portion; in the next bracket the rate would be 53 per cent on the minimum-priced underwear and 45 per cent on the maximum-priced underwear in that bracket; in the next bracket the rate would be 60 per cent on the minimum-priced underwear and 43 per cent on the maximum; in the next bracket the rate would be 61 per cent on the minimum priced and 48 per cent on the higher priced; and in the last bracket on the highest-priced product the rate in the bill as now written would be only 40 per cent.

So it is clear, I think, that the proposed amendment rather increases instead of decreases the rates. How much it increases them would be a matter of nice calculation, but I should say from 5 to 10 per cent.

There is another fact to which I desire to call the attention of the Senator from Utah. I am advised that certainly the Payne-Aldrich bill and the Underwood bill placed a higher duty upon hosiery than upon underwear. The equivalent ad valorem on hosiery in the Payne-Aldrich law was 71.66 per cent.

Mr. SMOOT. That is the average?

Mr. SIMMONS. Yes; while on underwear under the Payne-Aldrich law the average rate was 59 per cent. So under the Underwood law the rates on hosiery were 30, 40, and 50 per cent, while on underwear the rate was 30 per cent flat.

In this bill it is proposed to place exactly the same duty upon underwear that is placed upon hosiery, in violation of the rule which has heretofore obtained with reference to the relativity of rates on those two commodities. In other words, if we observe the same differentiation that seems to have been recognized in the Payne-Aldrich law and in the Underwood law, and I am told in other tariff bills, if the rate on hosiery is 50 per cent the rate on underwear ought not to exceed 40 per cent.

I am going to ask the Senator to take that into consideration if it is his purpose to consider further the rate proposed. Since it has been shown that the Senator was mistaken in the opinion which I understood him to express when we first took up this paragraph, that this 50 per cent flat rate would be a reduction, I assume that the Senator will either reduce that rate or that he will hold up this paragraph for further consideration.

Mr. SMOOT. I will say to the Senator that the way I figured that it was a reduction was by taking the low price in each bracket, not by taking the high price. By taking the high price in each bracket the equivalent ad valorem would be less; there is not any doubt about that; but taking the average of all, or taking $1, $2, $4, $6, $9.50, $16, and over $20, the average of all of those is a little over 50 per cent, just the average between the prices of the brackets; but, as I said to the Senator from Wisconsin, they do not generally come in that way.

Mr. SIMMONS. The same thing was true with reference to hosiery, but you did fix a rate with reference to hosiery that was a reduction; that is, I mean to say, on an average.

Mr. SMOOT. Oh, certainly; but the House had a rate on hosiery that I think was beyond all reason.

Mr. SIMMONS. I am merely making a suggestion that we ought not to place, and we never before have placed, I think, in any tariff bill—certainly in none that I had anything to do with—as high a duty on underwear as we did on hosiery.

Mr. SMOOT. There is no provision in this for a compensatory duty for long-staple cotton.

Mr. LENROOT. Mr. President, I will say to the Senator that in the amendment I propose to offer I propose to give a compensatory duty for long-staple cotton.

Mr. SIMMONS. What is the amendment that the Senator proposes to offer?

Mr. LENROOT. The amendment that I shall offer is to strike out all after "50 per cent" and insert:

40 per cent ad valorem; if such underwear or wearing apparel contains cotton wholly or in chief value of 1⅛-inch staple or longer, 10 cents per pound and 40 per cent ad valorem.

Mr. SIMMONS. I think that would be a very much more equitable arrangement than this one.

Mr. KING. Mr. President, may I inquire of the Senator whether that is to take the place in its entirety of paragraph 916?

Mr. LENROOT. That is to take the place of the rate now offered by the committee—50 per cent.

Mr. KING. Mr. President, I have not heard the committee's amendment; but, as I understand, the committee's amendment would take the place entirely of paragraph 916.

Mr. LENROOT. Yes.

Mr. KING. And make a flat rate?

Mr. LENROOT. So far as all these rates are concerned, it would make a flat 50 per cent rate.

Mr. KING. And the Senator now proposes to make a flat rate of 40 per cent upon all the items in the paragraph?

Mr. LENROOT. With a compensatory duty. I offer the amendment, Mr. President.

Mr. KING. Mr. President, I should like to inquire, for information, in view of the limited imports, approximately $84,000——

Mr. LENROOT. One hundred and eighty-nine thousand dollars, I think.

Mr. KING. For what year?

Mr. LENROOT. Nineteen hundred and twenty-one.

Mr. KING. The Summary of Foreign Commerce of the United States for May, 1922, shows for the 11 months ending May, 1922, imports of $84,849, and my information is that the exports of the same character of goods and for the same period aggregate approximately $4,000,000—indeed, a little more than $4,000,000.

Mr. President, I am quite unable to understand upon what theory such a high duty as 50 per cent or even 40 per cent is justified with respect to the articles and commodities embraced within this paragraph. All Senators must have been interested in, indeed instructed by, the admirable address delivered yesterday by the Senator from South Carolina [Mr. SMITH], in which he called attention to the manifold advantages which the American manufacturer of cotton goods possesses over the foreign manufacturer, and indicated that all of these goods might with propriety be manufactured in the United States. Most of these goods that have been imported, comprised within this $84,000 in 11 months, came from England. The greater part of the cotton utilized in the production of these goods was produced in the United States and carried overseas, with the freight and the insurance and the costs necessarily added. We produce these goods of a comparable character in the United States from cotton produced in the United States. Why we should grant a bounty, a duty, a tax, whatever you want to call it, of 50 per cent in the light of these circumstances, is something that I can not comprehend.

Mr. President, it seems to me that the rate offered by the Senator from Wisconsin is entirely too high; and if I had any thought that a lower amendment would receive any support I should move to strike out the numerals "40" in his amendment and insert in lieu thereof the numerals "25." However, I shall not offer that amendment, at least for the present.

The PRESIDING OFFICER (Mr. LADD in the chair). The question is on the amendment offered by the Senator from Wisconsin to the amendment proposed by the Senator from Utah.

Mr. LENROOT. Mr. President, I want to say in connection with my amendment, so that it may be understood, that the amendment I now offer is for a duty of 40 per cent, and if the articles are made of long-staple cotton it adds 10 cents a pound compensatory duty.

I ask for the yeas and nays upon my amendment.

The yeas and nays were ordered.

Mr. SMITH. Mr. President, before this vote is taken I want to call the attention of the Senate to the fact that the greater percentage, in fact practically the entire production, of this kind of goods is made out of a less count of cotton thread than those that carry an equal duty in the body of the bill. The fact of the matter is that this knitting cotton can be made out of the lower grades of our cotton. It has a loose weave. It does not have to stand the test of tight weave; and for that reason not only do you have a lower grade of cotton but it is the cheapest possible process of manufacture. In all the little villages and hamlets you can set up a knitting factory.

Mr. SMOOT. This is wearing apparel.

Mr. KING. This is paragraph 916.

Mr. SIMMONS. Underwear.

Mr. SMOOT. Underwear and other wearing apparel.

Mr. SMITH. But it says "made wholly or in part on knitting machines, or knit by hand." It comprises the whole category of the ordinary goods that ordinary people use, and yet we impose a duty upon that. We preempt the markets of the world; these goods are made out of the lower grades of cotton, made in part by the cheapest form of manufacturing machinery; and yet we are placing this burden upon the American people for no reason in the world that can be given save to pay an additional bonus to the manufacturers.

We have gone over schedules here where the plea was made that they were especially fine goods and needed special treatment, and for that reason we have put on a special duty; but here, where we have the goods used by the common people, the rank and file of the American people, their knit goods and their underwear, we now propose to put on a duty here that is equivalent to the duty that is carried upon specialties and novelties.

I shall not go further into this subject but I sincerely hope that, at least, the amendment proposed by the Senator from Wisconsin [Mr. LENROOT] will prevail.

Mr. SMOOT. Mr. President, I ask that the pending amendment be stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. The Senator from Utah proposes to strike out, on page 130, line 2, commencing with the word "valued," down to and including the words "ad valorem," in line 13, and to insert "50 per cent ad valorem." The Senator from Wisconsin proposes, in lieu of the amendment proposed by the Senator from Utah, to strike out all commencing with the word "valued," in line 2, down to and including the words "ad valorem," in line 13, and to insert:

Forty per cent ad valorem; if such underwear or wearing apparel contains cotton wholly or in chief value of 1⅛ inches staple or longer, 10 cents per pound and 40 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Wisconsin to the amendment of the Senator from Utah. On this question the yeas and nays have been ordered.

Mr. WILLIS. Mr. President, I am not clear in the matter, and I will ask the Chair to state if the question now is on the amendment offered by the Senator from Wisconsin to the amendment offered on behalf of the committee by the Senator from Utah.

The PRESIDING OFFICER. It is. The yeas and nays having been ordered, the Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. NEW (when his name was called). I transfer my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. WARREN], which I transfer to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. ROBINSON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Missouri [Mr. REED] and vote "yea."

Mr. TRAMMELL (when his name was called). I transfer my pair with the Senator from Rhode Island [Mr. COLT] to the Senator from South Carolina [Mr. DIAL] and vote "yea."

Mr. WALSH of Montana. I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Montana [Mr. MYERS] and vote "yea."

The roll call was concluded.

Mr. UNDERWOOD. I desire to announce that the junior Senator from Georgia [Mr. WATSON] is absent on account of illness; that the senior Senator from Nevada [Mr. PITTMAN] is absent on account of illness in his family; and that the junior Senator from Massachusetts [Mr. WALSH] is absent on official business.

Mr. CAMERON. I have a pair with the junior Senator from Georgia [Mr. WATSON]. I transfer that pair to the junior Senator from Vermont [Mr. PAGE] and vote "nay."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from New York [Mr. CALDER] with the Senator from Georgia [Mr. HARRIS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

Mr. HALE. I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. GLASS. I have a general pair with the senior Senator from Vermont [Mr. DILLINGHAM] which I transfer to the senior Senator from Nevada [Mr. PITTMAN] and vote "yea."

Mr. JONES of Washington (after having voted in the affirmative). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent, and I have promised to pair with him for the day. I am informed, however, that if present he would vote as I have voted on this amendment, so I allow my vote to stand.

The result was announced—yeas 26, nays 29—as follows:

YEAS—26.

Ashurst	Hitchcock	Pomerene	Sterling
Borah	Jones, N. Mex.	Ransdell	Trammell
Capper	Jones, Wash.	Robinson	Underwood
Caraway	Kellogg	Sheppard	Walsh, Mont.
Fletcher	King	Simmons	Willis
Glass	Lenroot	Smith	
Heflin	Overman	Stanley	

NAYS—29.

Ball	Johnson	Moses	Rawson
Cameron	Kendrick	Nelson	Shortridge
Curtis	Keyes	New	Smoot
Ernst	Ladd	Newberry	Spencer
France	Lodge	Nicholson	Wadsworth
Gooding	McCumber	Oddie	
Hale	McLean	Pepper	
Harreld	McNary	Phipps	

NOT VOTING—41.

Brandegee	Edge	Myers	Swanson
Broussard	Elkins	Norbeck	Townsend
Bursum	Fernald	Norris	Walsh, Mass.
Calder	Frelinghuysen	Owen	Warren
Colt	Gerry	Page	Watson, Ga.
Crow	Harris	Pittman	Watson, Ind.
Culberson	Harrison	Poindexter	Weller
Cummins	La Follette	Reed	Williams
Dial	McCormick	Shields	
Dillingham	McKellar	Stanfield	
du Pont	McKinley	Sutherland	

So Mr. LENROOT's amendment to Mr. SMOOT's amendment was rejected.

The PRESIDING OFFICER. The question recurs on the amendment proposed by the Senator from Utah [Mr. SMOOT].

Mr. LENROOT. Mr. President, there are a good many Senators in the Chamber now and I want to take this opportunity of saying just a word. Here was an amendment proposed which, if finally agreed to, will have the effect of increasing, on the whole, the rate originally proposed by the committee on an article the imports of which are absolutely negligible. While the Senator from Utah, in perfect good faith and innocently, stated that the imports for the 11 months ending with May of this year were over $3,000,000—and I supposed that was a fact, as he did—I find upon a subsequent examination of the committee report that the imports are only $84,000, and that the present rate of 30 per cent is practically prohibitive. Yet the Senate has just voted for a 50 per cent rate.

It is not for me to make any comment upon the action of Senators, but I do make this statement: I doubt if 10 per cent of the Senators who have just voted upon this increase, upon

this side or upon the other side, had any knowledge or information or apparent care as to how they were voting.

Mr. President, we are engaged in an important work here, and I am glad to say that during the past week or two the debate has really been confined to the bill. It does seem to me that it is the duty of Senators to form some independent judgment upon these rates. They are blindly following or blindly opposing the committee. The committee might make a 500 per cent increase and Senators would come in and vote in the affirmative with the committee.

Is it any wonder that this bill is being criticized the country over, when Republican Senators take the attitude with reference to it which they have taken, when Republican Senators do not take the pains to try to inform themselves as to the correctness of the rates?

I am not impugning the motives of any Senator; I am not criticizing; I am merely stating facts which they will all admit. Senators justify themselves by saying that the committee has examined into these questions, and that they are following the committee. I suppose that is their right and that it is their privilege; but I do say that if we want to make a tariff bill which will command the confidence of the country, and which Republicans can defend, Republican Senators ought to exercise some responsibility with reference to their individual votes.

One more word. Last week there was a very considerable break on this side in the beginning of the consideration of the cotton schedule, and the committee was defeated in a number of instances. Immediately word went around the Republican side of this Chamber that there would be retaliation if that were continued; that if these cotton rates were disturbed, and if the committee was not blindly followed with reference to them, the agricultural schedule would suffer when the bill came into the Senate. Whether or not those threats have had any effect, it is not for me to say; but the way these amendments are being voted upon is not to the credit of the Republican side. I am making no criticism whatever of members of the committee. They are defending their rates as best they can, and I do not question their good faith; but when showings are made, as they have been made in this case, where the committee itself will not justify the increased rates, I do say that Republican Senators at least ought to have some independent judgment of their own about it, and most of them have none.

That is all I care to say at this time.

Mr. McLEAN. Mr. President, it is true that the importations of this particular article—knit underwear—are not very large; but importations are coming in, and when the Committee on Finance fixed this rate it had information more accurate with regard to the rate required than the Committee on Finance of any other Congress has had in the history of this country. We had experts at work, as Senators know, and they compared the foreign selling price of this article with the American selling price, and upon their report some of these goods were entitled to an ad valorem rate of 73 per cent. The committee cut it to 50 per cent.

I do not know what information the Senator from Wisconsin has on this subject. He may know what rate would equalize the difference in the production costs here and abroad, and he may not know. Nobody on the other side of the Chamber knows what rate is required. Your committee followed the report of the experts. I say followed; we had the report of our experts indicating that a rate of 73 per cent was required on some of these articles, and, I repeat, we cut it to 50.

Mr. LENROOT. I would like to ask the Senator this question: If the 30 per cent rate keeps the importations out, does the Senator think that 73 per cent, or a higher rate, is necessary to keep them out?

Mr. McLEAN. I said that the importations at present were not large, but I understand they are increasing. I have in my possession reports of offers of these goods in this country, and if the prices quoted are correct, 50 per cent will not begin to cover the difference between the cost of production here and the cost of production abroad.

We know that there is a wide difference between the wages paid here and those paid in Germany and in France. Permit me to say that the articles upon which the experts based their reports to the Finance Committee were imports coming from France, where, as I have stated, a rate of 73 per cent ad valorem was necessary.

I say this in reply to the Senator from Wisconsin. He may know what rate is required. If he does, I wish he would give the Senate the benefit of his knowledge. We took the most reliable information we could get, and our rate falls far short of the rate required.

Mr. LENROOT. Mr. President, I simply say, in reply to the Senator from Connecticut, that the 30 per cent rate was practically keeping imports out down to May of this year; but resolving every doubt in favor of the American manufacturer, my amendment proposed to increase the rate to 40 per cent.

Now, Mr. President, I am going to offer one other amendment. The proposition to reduce the rate to 40 per cent was defeated. I now move to strike out "50" and insert "45," and upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. CAMERON (when his name was called). Making the same announcement as before, I vote "nay."

Mr. GLASS (when his name was called). Making the same announcement as on the previous vote as to my pair and its transfer, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as to my pair and its transfer, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement with reference to my pair, I vote "yea."

Mr. NEW (when his name was called). Repeating the announcement made on the previous vote as to the transfer of my pair, I vote "nay."

Mr. ROBINSON (when his name was called). Announcing the same pair and transfer as on the previous vote, I vote "yea."

Mr. TRAMMELL (when his name was called). Announcing the same transfer of my pair as on the last vote, I vote "yea."

Mr. WALSH of Montana (when his name was called). I transfer my pair as heretofore announced and vote "yea."

The roll call was concluded.

Mr. UNDERWOOD. I wish to announce that the Senator from Massachusetts [Mr. WALSH] is detained on official business.

Mr. TRAMMELL (after having voted in the affirmative). The Senator from South Carolina [Mr. DIAL], to whom I transferred my pair, having entered the Chamber and voted, I transfer my pair with the Senator from Rhode Island [Mr. COLT] to the junior Senator from Massachusetts [Mr. WALSH] and allow my vote to stand.

Mr. OVERMAN. Making the same announcement as to my pair and transfer as on the previous vote, I vote "yea."

Mr. DIAL. I have a pair for the day with the Senator from Michigan [Mr. TOWNSEND]. I understand, however, that if he were present the Senator from Michigan would vote as I intend to vote. Therefore I vote "yea."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from New York [Mr. CALDER] with the Senator from Georgia [Mr. HARRIS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 28, nays 27, as follows:

YEAS—28.

Ashurst	Jones, N. Mex.	Overman	Smith
Borah	Jones, Wash.	Pomerene	Stanley
Capper	Kellogg	Ransdell	Sterling
Dial	King	Rawson	Trammell
Fletcher	Lenroot	Robinson	Underwood
Glass	Nelson	Sheppard	Walsh, Mont.
Hitchcock	Norbeck	Simmons	Willis

NAYS—27.

Ball	Harreld	McLean	Pepper
Cameron	Johnson	McNary	Phipps
Curtis	Kendrick	Moses	Shortridge
Ernst	Keyes	New	Smoot
France	Ladd	Newberry	Spencer
Gooding	Lodge	Nicholson	Wadsworth
Hale	McCumber	Oddie	

NOT VOTING—41.

Brandegee	Culberson	Frelinghuysen	McKellar
Broussard	Cummins	Gerry	McKinley
Bursum	Dillingham	Harris	Myers
Calder	du Pont	Harrison	Norris
Caraway	Edge	Heflin	Owen
Colt	Elkins	La Follette	Page
Crow	Fernald	McCormick	Pittman

Poindexter	Sutherland	Warren	Williams
Reed	Swanson	Watson, Ga.	
Shields	Townsend	Watson, Ind.	
Stanfield	Walsh, Mass.	Weller	

So Mr. LENROOT's amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SMOOT. Mr. President, I do not know whether the amendment offered by the Senator from Wisconsin included the compensatory duty for long staple cotton.

Mr. LENROOT. It did not, but I am willing the same provision be made as to compensatory duty as was proposed on the 40 per cent amendment which was defeated.

Mr. SMOOT. I think that ought to be done, and I ask that that language be added.

Mr. LENROOT. I offer the further amendment. Let the record show that it was offered as to the 45 per cent in the same form as to the 40 per cent, so that it will include the compensatory duty.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SMOOT. Will the Secretary read the amendment as now worded?

The READING CLERK. On page 130, in line 2, strike out all beginning with the word "valued" and insert the following:

Forty-five per cent ad valorem; if such underwear or wearing apparel contains cotton wholly or in chief value of 1⅛ inches staple or longer, 10 cents per pound and 40 per cent ad valorem.

Mr. SMOOT. The original amendment was to reduce the rate to 40 per cent from 50. It should now be 10 cents a pound and 45 per cent ad valorem, so as to conform with the 45 per cent rate which has just been voted upon by the Senate.

The PRESIDING OFFICER. Without objection, the change will be made, and as modified the amendment is agreed to. The Secretary will report the next amendment.

The READING CLERK. On page 130, line 20, the committee proposes to strike out "25" and insert "30" before "per cent," and in line 21 to strike out "30" and insert "40" before "per cent," so as to make the paragraph read:

PAR. 917. Handkerchiefs and mufflers, composed wholly or in chief value of cotton, finished or unfinished, not hemmed, shall pay duty as cloth; hemmed or hemstitched, shall pay, in addition thereto, 10 per cent ad valorem: *Provided*, That none of the foregoing, when containing yarns the average number of which does not exceed No. 40, shall pay less than 30 per cent ad valorem; nor when exceeding No. 40, less than 40 per cent ad valorem.

The amendment was agreed to.

The next amendment of the committee was, in paragraph 918, page 130, in line 25, to strike out "33⅓" and insert "45," so as to read:

Clothing and articles of wearing apparel of every description, manufactured wholly or in part, composed wholly or in chief value of cotton, and not specially provided for, 45 per cent ad valorem.

Mr. MCCUMBER. I understand the Senator from Utah has asked that this paragraph may go over.

Mr. SMOOT. Yes; the Senator from Florida [Mr. FLETCHER] is going to address the Senate on the merchant marine.

Mr. FLETCHER. I understand the paragraph goes over. I propose now to discuss another subject.

The PRESIDING OFFICER. The paragraph will go over.

THE MERCHANT MARINE.

Mr. FLETCHER. Mr. President, on the 28th of February, 1922, there was introduced Senate bill 3217, and about the same time House bill 10644 in practically identical terms. The Senate bill (S. 3217) was referred to the Committee on Commerce, and the House bill (H. R. 10644) was referred to the Committee on the Merchant Marine and Fisheries.

Joint hearings were arranged, and these were conducted from April 4 to May 28 daily, except Sundays, and occasional parts of days. In all during that time probably there were not more than five days when the joint meetings were not held. Of course it was utterly impossible for Members to attend the hearings, because both Houses were in session, other committees were meeting, and there was other pressing work to do at the same time. There seemed to be a desire to obtain speedy action and the matter was treated as urgent.

No report has been made to the Senate, but as a result of these hearings another bill was introduced in the House and has been reported on, to wit, H. R. 12021, the majority report having been filed June 16 and the minority report June 28. This bill differs from and improves the original bills in some respects, but it retains the principal provisions, some of them somewhat modified, and is open to many of the objections to which the first bills were subject.

The question is a national one, involving definite principles of far-reaching importance. The provisions for subventions, indirect subsidies, and direct subsidies are presented upon a scale never before contemplated; and I feel, particularly just at this time, it would be a serious mistake and most unfortunate for the country to enact them into law. The subject is of such great importance to the whole country that I venture now to offer something of an analysis of the material provisions of the bill and submit some observations thereon, and to some extent on the whole situation respecting our merchant marine.

1. Under section 1 "all persons who are citizens of the United States" will enjoy the favorable terms of sale of all vessels owned by the board. The completion of the payment of the purchase price and interest in each instance may be deferred as long as 15 years, and the interest on the unpaid purchase price may be 4 per cent per annum, payable annually.

Mr. Homer Ferguson stated—page 333 of hearings—that the useful life of a steel cargo ship, well constructed and skillfully operated, is about 10 to 14 years. In view of this statement it would seem that the exercise of reasonable care would require that the time limit mentioned in this section should not exceed 10 years. The rate of interest might be made as low as 3 per cent. The first payment in cash might better be placed at 25 per cent of the purchase price. Surely these favorable terms ought to induce the purchaser and lead to the sale of the ships if there is any demand whatever for them. This involves no outlay by the Government and would facilitate the sale of the ships and promote the accomplishment of one of the purposes of the bill to a very liberal extent.

2. Under section 3 a loan fund up to $125,000,000 is established, created by "revenues from sales and operations" heretofore received and placed in such fund, and shall include hereafter all receipts of the board except appropriations made by law and all profits of the board from the operation of vessels, which fund is to be used in making loans to aid persons, citizens of the United States, in the construction by them in private shipyards of the United States of vessels or in the equipping by them of vessels already built. These loans may be made for as long a time as 15 years and the rate of interest may be 2 per cent, payable annually. The loans may be made for as much as two-thirds of the cost of the vessels to be constructed or two-thirds of the cost of the equipment in each case. All payments on principal or interest on such loans shall be covered into the loan fund.

It can be readily seen that by the favorable terms as to time, amount, and interest of such loans the Government is making a generous contribution toward encouraging the construction and equipment of ships in American yards.

Out of sales and settlements derived from the extensive assets of the board this fund should easily reach the maximum proposed.

No interest, industry, or enterprise is afforded by governmental action such a favorable rate of interest or allowed it otherwise.

Hereafter all receipts of the board, outside of appropriations, will go directly into that fund without any action or checking by Congress. It means this very considerable fund of one-eighth of a billion dollars will be handled by the board at its discretion for the purposes named.

3. Under section 201, respecting the income tax of vessel owners, it is provided that the owner of a vessel of 1,500 gross tons or more registered or enrolled and licensed under the laws of the United States, whether engaged in foreign or coastwise trade, shall, for the taxable year of 1921 and for each of the eight taxable years following, be allowed as a deduction in computing net income, in addition to the other deductions allowed, an amount arrived at in a rather complicated way, but intended, it is believed, to mean equal to the income derived from the operations of the vessel in foreign trade, provided an amount equal to double the saving in tax is invested in the building of new vessels of a type and kind approved by the Shipping Board in American yards, to be placed under the American flag.

This means, by way of illustration, the United Fruit Co. will be allowed all the income derived from the operation of its vessels in foreign trade, even though they do both a coastwise and foreign trade business, as a deduction in computing their net income. Not merely the net income from such operations but the total gross income will be deducted. The only limitation is that they shall invest double the amount of tax thus saved in building in American yards, and this is no restriction in fact, because they are constantly building vessels for their own use. They are obliged to replace and maintain, if not add to, their already handsome fleet. This would mean a very great saving in income taxes to them. It undoubtedly would induce them to build their vessels in American yards rather than in Liverpool, but it would much more than compensate them for the difference in the cost of such vessels.

The section further permits them, if they do not wish to build a vessel during the tax year, to set aside the amount in a trust fund to be used for that purpose "within a reasonable time." The amount allowable as a deduction is not paid to the Secretary of the Treasury as trustee, nor to any designated trustee, but is apparently just to be "set aside" on their books. They will, of course, use the fund in building, so then they add it to their deductions from taxes, and by this means they will be able to keep up their fleet, construct their new ships out of the earnings from operations, and escape all taxes.

This applies to the Steel Corporation, the Standard and other oil companies, and all vessels employed wholly or partially in foreign trade.

This section also exempts from taxation any gain derived from the sale of any vessel launched prior to January 1, 1914, for the same period of time if the owner invests the proceeds of such sale in the building of new vessels, approved by the board, in American shipyards.

There are the same provisions with reference to setting aside the amount in a trust fund as in the case of the income.

I doubt if there are many vessels launched prior to January 1, 1914, that when sold hereafter will produce or show a profit or gain, but evidently there are instances where it is believed this provision will be of value to the shipowner.

Section 203 will permit of very liberal deductions from income taxes for depreciation.

This section will be freely availed of when it comes to computing income taxes by vessel owners.

It will give trouble to the Treasury Department, because it will keep open and subject to reexamination such returns until March 15, 1927.

If the chairman of the board, instead of furnishing arguments to Congressmen and spending money on a publicity campaign to persuade the voters of the country to favor this bill, would spend his time and devote his energies to persuading American shipowners that they ought to patronize our own shipyards, and American merchants that they ought to give their business to American ships, and American bankers, that they ought to encourage American shipping, that would be much more helpful in establishing an American merchant marine. That would be a real, lasting, and effective assistance upon which to build and grow.

I am prompted to suggest this by the following clippings from the news items of the day:

[From the Public Ledger.]

ORDER SHIPS BUILT ABROAD—LIVERPOOL FIRM TO BUILD THREE FOR BOSTON CONCERN.

(Special cable dispatch.)

LONDON, June 25.—Three electric motor-driven refrigerator ships have been ordered by the United Fruit Co., of Boston, from Liverpool shipbuilders, it was announced to-day.

The operative power will consist of Diesel engines, and each ship will be about 4,000 gross tons, making them the largest ships in American fruit trade to make use of this new type of engine.

—

[From the Manufacturers' News of Chicago.]

CHICAGO.—The arrival June 12 of the Cunard Line steamship *Mauretania* at Cherbourg with Morris & Co. products from Chicago again demonstrated the practicability of a fast overseas freight service from Chicago to Europe in seven days. On June 4 the shipment left Chicago over the Erie Railroad at 4.30 a. m. and after a fast run to New York was loaded aboard the *Mauretania* early Tuesday morning. The ship sailed at 1.30 p. m. same day. Cablegrams announce the arrival of the ship after a world's record-breaking ocean voyage, 5 days 8 hours and 10 minutes to Cherbourg, France, making a total running time from Chicago of 7 days 9 hours and 40 minutes.

Two weeks before the White Star Liner *Majestic* carried a shipment from Chicago to Southampton in 7 days 11 hours and 56 minutes in connection with a fast New York Central train.

Another refrigerator trainload of provisions from Chicago, over the Erie Railroad, was loaded Saturday on to the fast Cunard liner *Caronia*, for Hamburg, Germany, and on the White Star Liner *Majestic*, which also sailed Saturday noon.

Section 304: Not very much is said about this section in reports on the bill, and it has not received very full consideration in the discussion. Yet it is a most important and far-reaching provision.

Under it any person making expenditures for the transportation of property in an American vessel in foreign trade shall be allowed 5 per cent of the amount of such expenditure as a credit against the amount of his income tax. This credit is not allowed persons transporting property in their own vessels or in vessels of corporations with which they are affiliated to the extent of more than 50 per cent of stock. It will be somewhat difficult to enforce the observance of the limitations, but they greatly improve the bill as now presented over the proposal as first submitted and considered in the joint hearings.

It will be observed that this 5 per cent is not simply allowed as a deduction in computing the income tax of the party concerned, but is to become a credit on the amount of that tax as fixed after all allowable deductions are made.

It will be a credit on the net income of any party paying freight money to any American vessel engaged in foreign trade.

In other words, if A has a net income of $40,000 on which he must now pay taxes, and he pays out in ocean freight $200,000 a year, he will have a credit on his net income of $10,000, and he will pay income taxes on $30,000 instead of $40,000.

To illustrate, if Morris & Co. ship a refrigerator trainload of provisions out of Chicago to Europe every two weeks, the freight money must be very considerable for a year. They will subtract 5 per cent of that from the amount of their net income now taxable and pay taxes only on the remainder.

Great importing houses will enjoy the same privilege. Hundreds of large concerns will thus pay to the Government on their incomes many thousands of dollars less than they would otherwise pay. Thousands of small shippers enjoying this right will also be able to save, at Government expense and at the expense of all other taxpayers, perhaps only a comparatively small amount each, but aggregating millions of dollars.

Keep in mind this 5 per cent of freight money is a credit on net income, not a deduction allowed in computing the income.

If we estimate that American shippers pay $400,000,000 annually to carry their goods and that one-half of that would go to American ships, 5 per cent of that one-half would amount to $10,000,000, which sum annually would go into the Treasury but for this section and by reason of it is retained by the shippers alone.

Section 206 will double the tonnage duties, tonnage taxes, or light money, except in the case of vessels of less than 1,500 gross tons and sailing vessels of less than 1,000 tons.

These dues and taxes will go into the direct subsidy fund under section 402 and be paid to vessels under section 404.

The effect will be to add to the burden placed on foreign commerce.

Sections 301–304 are intended to insure that one-half, or thereabouts, of immigrants admitted to the United States in any fiscal year shall be transported in American vessels. The provision shall not take effect as to vessels of any foreign country until the President proclaims that such provision and regulations made thereunder are not in conflict with any treaty with such country.

It is very doubtful whether the purpose of this provision will not meet with the same fate as section 34 of the merchant marine act of 1920 and the revenue act of 1913 regarding discriminating duties. Most of our treaties will be found, most likely, to contain clauses respecting equality of treatment of vessels of foreign countries which will be held in conflict with this provision, which, if we have not tied our hands, would be the one provision in the bill unusually helpful to our shipping.

This is very clearly and forcibly shown by the statement of Mr. Rossbottom (p. 356 et seq. of hearings).

That provision might give to American transport companies a gross income from that source alone of $8,800,000 a year. It would give profitable occupation to not less than 25 good-sized passenger ships on the north Atlantic (p. 358 hearings).

Whether this provision will avail us or can be made effective is uncertain, to say the least, because of the existence of commercial treaties of long standing.

The navigation clauses in our commercial treaties may, unless such treaties are denounced or modified, interfere with such freedom of action as we feel we should exercise in aid of our shipping. I do not know what those provisions are, but the usual clauses are to this effect:

(1) GENERAL FREEDOM OF NAVIGATION.

There shall be between the territories of the two contracting parties reciprocal freedom of commerce and navigation.

The subjects or citizens of the two contracting parties (a) shall have liberty freely to come with their ships and cargoes to all places and ports in the territories of the other to which subjects or citizens of that State are or may be permitted to come, and (b) shall enjoy the same rights, privileges, liberties, favors, immunities, and exemptions in matters of commerce and navigation as are or may be enjoyed by subjects or citizens of that State. * * *

(2) STATIONING, LOADING, ETC., OF VESSELS.

In all that regards the stationing, loading, and unloading of vessels in the ports, docks, roadsteads, and harbors of the territories of the contracting parties, no privilege or facility shall be granted by either party to national vessels which are not equally granted to vessels of the other country, the intention of the contracting parties being that in this respect also the vessels of the two countries shall be treated on the footing of perfect equality.

It is usual to give full national treatment in the above respect, but sometimes the most-favored-nation treatment only is given.

(3) DUTIES OF TONNAGE, HARBOR, ETC.

No duties of tonnage, harbor, pilotage, lighthouse, quarantine, or other analogous duties or charges of whatever nature, or under whatever denomination levied, in the name or for the profit of the Government, public functionaries, private individuals, corporations, or establishments of any kind, shall be imposed in the ports of the territories of either of the contracting parties upon the vessel of the other country which shall not equally and under the same conditions be imposed in the like cases on national vessels in general. Such equality of treatment shall apply to the respective vessels from whatever port or place they may arrive and whatever may be their destination.

(4) FLAG DISCRIMINATION.

Each of the contracting parties shall permit the importation or exportation on the vessels of the other of all merchandise which may be legally imported or exported, and such vessels and their cargoes shall enjoy the same privileges and shall not be subjected to any other or higher duties or charges than national vessels and their cargoes.

We come now to the direct subsidy provisions:

Sections 401–419, title 4, deal with direct subsidy under the head of "Compensation to vessels of the United States."

Section 402 is intended to establish in the Treasury a fund to be known as the "Merchant marine fund," to be composed of the following sums paid into the Treasury, to wit:

(a) All tonnage duties, tonnage taxes, or light money paid under section 206.

(b) Ten per cent of the amount of all customs duties paid under law now in force or hereafter enacted.

(c) The amount which the Post Office Department would otherwise pay to any vessel for the transportation of mails.

(d) All excess earnings paid by the owner of any vessel under section 417, being one-half of net earnings in excess of 10 per cent of invested capital.

In estimating what this fund will in all probability amount to for distribution as direct subsidy to vessels in accordance with the plan and on the basis set forth under this title, I think we need not place any definite figure as to paragraph (d).

It will be so easy for vessel owners to absorb income by high salaries to officials, by improvements, repairs, and manipulation of accounts that it would be unwarranted to count on any accretion to this fund under that clause. I have no doubt a very considerable addition could be made to the fund under this clause, but I question that it will be.

Clause (c) should yield approaching $5,000,000 a year. (Page 22 of the hearings.)

The Government through the Post Office Department, instead of paying for transporting the mails, individual vessels actually performing the service, will pay the amount upon certificate of the Postmaster General monthly to the Secretary of the Treasury, who will place it to the credit of this fund, to be subsequently disbursed by the Shipping Board in pursuance of contracts it will make.

This clause ought to bring to the fund approximately $5,000,000.

We can get a fairly reliable estimate as to what clause (a) should yield. Of course it will depend on the volume of shipping, and sooner or later we can consider that conditions will become nearer normal.

The statements at the hearings indicate that this clause should bring to the subsidy fund as much as $4,000,000 annually.

The most important of the sources of supply for this fund is embraced in clause (b).

The Finance Committee of the Senate estimates that the pending tariff bill will yield to the Treasury $350,000,000 a year revenue from tariff duties. If this is true, the duties paid at the customhouses will considerably exceed that sum, assuming that the cost of collecting is to be added to it. Ten per cent of that sum would be $35,000,000. This amount will be taken out of the general fund derived from customs duties, and will be placed in this special "merchant marine fund," and subsequently pass to vessel owners through the Shipping Board.

Without considering clause (c), because that amount would be paid by the Government for transportation of the mails in any event, and eliminating clause (d) as being too doubtful of results to base any calculations upon, these provisions for direct subsidy to be paid out of the Treasury to vessel owners would amount to, annually—

Clause (a)	$4,000,000
Clause (b)	35,000,000

The benefits to vessel owners under the provisions for indirect subsidy, exclusive of the immigration provisions and sales provisions, would, as we have seen, amount to—

Loan fund, 3 per cent	$3,750,000
Exemption from taxes	15,000,000
Credits for amount paid for transportation	10,000,000
Taking over transport service (p. 18 of hearing)	5,000,000

Total direct and indirect aid, annually, $72,750,000, besides other possible and contingent benefits.

The direct subsidy is based on tonnage, speed, and distance. An ordinary cargo vessel of 10,000 tons would receive $16,500 each year, while the *Leviathan* would be entitled to, or might receive, $1,700,000.

The Shipping Board is given authority to deny all aid or to double the amount indicated in any case, according to its sole discretion.

To illustrate what the specific and general aids supplied by the Government to shipping interests under this measure would be, let us suppose that three or more persons organize a corporation for the purpose of engaging in the business of overseas shipping, and it purchases from the Shipping Board one steel vessel of 10,000 dead-weight tons at $30 per ton. Such a corporation would get—

First. The vessel at about one-half of what it would cost to build her anywhere.

Second. Terms such that a good portion of its capital investment would be supplied by the Government at a rate of interest less than one-half of what it would cost it in financial circles.

Third. The gross income from the operation of the vessel is to be deducted in computing the net income of the corporation. Thus, all the earnings of the vessel are exempt from taxation, provided the amount of the deduction is invested or is set aside to be invested within a reasonable time in the building in private yards in the United States of new vessels of a type to be approved by the Shipping Board, to be registered or documented under the laws of the United States. If the corporation desired to build or recondition a ship, it could obtain a loan up to two-thirds of the cost at the rate of 2 per cent per annum.

Fourth. In case the corporation sells the vessel it will pay no income tax on any gain derived from the sale.

Fifth. Cash subsidy of $16,500 for 10 years from the date of the contract with the Shipping Board. Total, $165,000, which the Shipping Board will have the power to increase to double that amount. It will be observed that this runs from the date of the contract, not from the date of the approval of this act. The contract may be made 10 years from now.

Sixth. If the corporation should purchase a vessel adapted to the carrying of passengers, while the price would be presumably greater, the subsidy would be increased, depending on her speed, and she would have other benefits, such as transporting immigrants and mails (to be considered in fixing the subsidy), under the bill.

Seventh. The encouragement and promotion of business, and assistance arising indirectly by the exemption of 5 per cent of freight money to American shippers, customs duties, and other provisions in the bill.

The question arises, Are all the people willing to make these contributions to this private corporation, organized to engage in shipping primarily for its own benefit?

Is this the price they must pay in order to get rid of their ships?

When the contract expires the useful life of the ship will be exhausted; she will be obsolete and worn out, and that will probably be the end of the ship and her owner.

They say we already have a merchant marine, and it is simply a question of maintaining it. What they mean is we already have ships; but that is not a merchant marine. They seem to regard that as a curse; at least, a serious and objectionable burden. It is, of course, essential to have ships if we hope to have a merchant marine; but while they cry out for a merchant marine, they complain of this war-time infliction—ships.

The chairman asserts on every occasion the fact that the agency he heads is incapable of directing efficiently and successfully a shipping business. He fairly boasts of losing $50,000,000 a year in attempting to operate the ships, when he has the power to operate as many or as few as he wants, when and where he wants, all furnished him free, and yet he wants more power and greater privileges. He asks to take over the Army and Navy transports that have saved the Government money and are economically and splendidly operated. He wants them taken from the control of honest, capable management and turned over to his board, which shouts its utter incapacity and failure as an argument for subsidy.

Although the bureau he heads has been the notorious resort of political place hunters, and has been used to a disgusting and scandalous extent as a political machine with an inexcusable overhead, swollen by taking on inexperienced and a superabundance of employees at excessively high salaries, thus inevitably bringing the organization into disrepute to such an extent that he himself says it is difficult to get men of the class and standing needed to become connected with it because

the association would be injurious to their reputations, notwithstanding all this the chairman urges Congress to extend and enlarge the powers and authority of this organization to an extent unheard of heretofore as to any department or bureau, giving this board the power of life and death over any shipping company or vessel owner, the privilege of rewarding favorites to an unlimited extent, and of ruining those not liked, building up ports and routes or destroying them as the board might determine, with no obligation to account for its acts to Congress or to the courts, vesting an organization already in disrepute and already notoriously partisan, already in politics at Government expense, already such a failure that it brazenly boasts of it, with arbitrary and unlimited control over billions of dollars' worth of property, the fortunes of people running into millions, the fates of ports and established business, the power to destroy but not to create, if it desired, the last vestige of an American merchant marine!

The chairman says we already have a merchant marine, and that it is already subsidized.

We have the troublesome ships regarded as a war-time injury, and they are so abused it is a wonder they do not muster the nerve to measure intelligence with their masters, and, like the *Naukauna*, slip their moorings and go down through the channel, without a soul on board, out to sea and commit suicide.

If what we have been doing amounts to a subsidy, then I submit our experience proves that it is utterly futile and hopeless to attempt to establish an American merchant marine by or through subsidies.

The chairman himself says that subsidy must be ample or we had better have none at all. I again submit that no subsidy we can devise can be more ample than having the Government build and equip and turn over 1,500 vessels to private operators and tell them to "put them in service, proceed to operate them, get business for them, spare no expense, and we will pay you a commission on the gross receipts and stand all the losses."

Can you conceive of more liberal governmental support than that? The result has been, it is claimed, a Government loss of over $4,000,000 a month. Certainly the withdrawal of all but 420 ships from service and an utter failure to get the merchant marine established. Suppose we admit that our flag will go off the seas unless something is done; obviously subsidy is not the way out. Equally plain it is that we need a different management and a different plan and different methods and practices in the operation. It is a question not of laws but of administration.

They say Government operation can never succeed—we have tried it. We have done nothing of the kind. The Shipping Board plan has been to turn the Government ships over to private operators, selected by them, many of whom were operating their own ships alongside the Government ships, with what result might easily have been foretold. On this point Mr. Philip Manson stated at the hearings:

> A good deal of the time of this committee has been wasted in listening to testimony presuming to show the need of an American merchant marine. This testimony has been positively harmful to a proper consideration of the bill because it confuses the issues by making it appear that the question for the committee to decide is whether the need for an American merchant marine is great enough to justify the payment of subsidies, the committee being repeatedly told that subsidies will ipso facto create an American merchant marine. No one questions the vital need of an American merchant marine. The reasonable question for the committee to decide is, Will subsidies create a merchant marine? I will prove to you that subsidies will not create a merchant marine, and I will also prove that subsidies will, on the contrary, seriously retard the proper development of a permanent American merchant marine. I ask you to carefully note the following: During the last three and a half years this Government has given to American shipping interests a subsidy so vast that even the most brazen subsidists would not have dared to ask for it. There were turned over to American shipping interests, free of all costs to them, a fleet of over 1,500 vessels, including some of the finest passenger liners afloat. Not only have American shipping interests had the free use of this fleet of ships, which has cost the American people over $4,000,000,000—I say over $4,000,000,000 because to the amount actually appropriated must be added the interest which the Government must pay on this money—but the shipping interests to whom these ships were turned over for operation received in addition from the Government hundreds of millions of dollars in cash to cover alleged losses in the operation of these ships, notwithstanding that during much of the period during which they have had these ships high freight rates prevailed and large profits should have easily been earned. Not only has this vast subsidy to American shipping interests during the last three and a half years failed to create a permanent American merchant marine but it has fastened upon American shipping a curse of incompetence and graft which it will take many years to eradicate. In the light of these indisputable facts, how dare anyone say that a permanent American merchant marine can be created through subsidies, no matter how extensive those subsidies may be? I say to you that the only thing subsidies will do will be to transfer from the Public Treasury to the pockets of a few favored steamship men, some of whom have appeared before the committee, large sums of taxpayers' money, and, what is worse, it will perpetuate the graft and incompetence which is now the real reason for our failure to have a merchant marine worthy of this Nation. That subsidies are not necessary to create an American merchant marine and that American ships, if honestly and efficiently operated, can compete with the shipping of the world is proved by the fact that notwithstanding the present low state of shipping many American steamship companies are to-day operating American ships without subsidies in the foreign trade in competition with the shipping of other countries.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER (Mr. HEFLIN in the chair). Does the Senator from Florida yield to the Senator from Ohio?

Mr. FLETCHER. I yield.

Mr. POMERENE. Some time ago some manufacturer in Ohio wrote me telling me that the United States Shipping Board gave rates on certain classes of merchandise from German ports on United States Shipping Board ships to South American ports which were less, on the same kind of merchandise, than were the rates established by the United States Shipping Board from New York to the same South American ports. When I took that subject up with the Shipping Board, I received what seemed to me a half-hearted denial that there was anything of that kind prevailing now, but I regarded it as a virtual admission that that practice had obtained at least for awhile. I can understand how our ships might be operated at a gain or a loss, but I have never been able to understand why the Shipping Board, under any circumstances, should give a lesser freight rate on the same goods from German ports to South America than were given to American manufacturers from New York to South America. That would be subsidizing German manufacturers. I wonder what investigation, if any, the Senator from Florida has made into that subject, and what, if any, knowledge he has bearing upon it.

Mr. FLETCHER. I have no information regarding it. There was no inquiry in the hearings, as I recall, respecting the question of rates, except in the most general way. I know nothing of the circumstances mentioned by the Senator, and I do not think there was any mention of such a case in the hearings. There may be some explanation of it. The question of rates is a very complicated one. There was an effort made at one time to arrange with the old Hamburg-American Line people, they having terminals, docks, and warehouses on the other side, so that the Shipping Board might do business in connection with their old facilities, and there may have been some arrangement of that kind made under those circumstances.

Mr. POMERENE. Mr. President, I understood in an indirect way that the excuse given for it was that these ships leaving German ports had to have freight, they had to compete in the German ports with German-owned vessels, or other foreign-owned vessels. They had to do that in order to get the necessary cargo and to pay their expenses. It may be that, if we simply considered the shipping proposition alone and by itself, some excuse might have been given for that; but when they were taking the German-made goods into South American ports at a less freight rate than they were giving the American manufacturers on American-made goods I could not understand it. I do not think any defense can be made of that kind of a policy.

Mr. FLETCHER. That would scarcely seem like preserving American commerce and certainly not expanding it. But I have no information to suggest regarding the subject.

General Dawes, after spending a year looking into governmental affairs, says:

> One thing that has been demonstrated fully has been that the Federal Government can be run more efficiently and economically than a private business, provided that serious efforts and sincere cooperation are forthcoming.

Suppose we try real Government operation a while and see if it is true that there is so much graft, corruption, dishonesty, chicanery, trickery, knavery, political intrigue, and absence of intelligence in the Government's officials and employees that we must throw up our hands in despair.

I have not reached that point yet, and if the present Shipping Board insists on that view and declines to make a genuine, energetic effort to succeed, I suggest our first move should be to reorganize the board. I do not believe the board will refuse to carry out the will of Congress when it is clearly expressed. If this bill is rejected, the spirit of the act of 1920 remains and Government operation should take place.

The first thing needed in any case is to cut to the bone the grossly extravagant overhead. There is no sense in a pay roll in connection with Fleet Corporation operations alone of $5,880,874. Nor is there any sort of justification for employing 2,719 people in the operating division, when the Fleet Corporation is only operating, and that recently, directly 13 ships, the United States Line, under Mr. Rossbottom, and merely supervises the operators of the other ships, when all construction has

ceased and we are operating through agencies only 420 ships. There is no necessity for 8,000 employees here in Washington. It is absurd, too, to hold that the overhead will continue substantially at this wicked figure so long as we operate any ships. The chairman states the overhead will be practically the same whether we operate 400 or 40 ships. It is unreasonable to put on the Government an annual general administrative expense of $15,306,000 in this bureau. Of this total expense allocated to vessel operations is $9,337,000, a huge, grossly extravagant sum (p. 984 of hearings).

This brings me to inquire what becomes of the claim that if this bill is passed the Government will be saved the present loss of fifty millions a year.

No one is foolish enough to suppose the fleet will be immediately sold. The chairman hopes that within about 30 months—2½ years—he can sell the pick of the boats—say, 400 to 700. What will you do with the 1,100 others? If you operate them, or any of them, your overhead keeps up. Do you propose to sell only the best boats, less than one-half, and sink the others? Mr. Lasker testified at the hearing:

> You can not give a ship away to-day. * * * We can not sell ships to-day at all.

At any rate, you will begin extending the aids, benefits, compensations, subventions, or subsidies, call it what you will, provided in this bill as soon as it passes, and you will continue present losses for at least two years, adding one to the other on the shoulders of the taxpayers, and really the time when they would be separated or cease would be most remote and indefinite.

I wish I could see a different picture. The vision of a merchant marine coming out of this bill is a deceptive mirage. It is a false light. It means wreckage. The end will be what the Shipping Board apparently would enjoy as they sit in their offices and draw their salaries, relieved of the burden of these ships, beholding the American merchant marine on their walls, "painted ships on a painted ocean."

I do not mean to be understood as favoring permanent Government ownership or operation of merchant ships, but until we get routes opened up, trade developed where it is only waiting transportation, and our carriers established in overseas business the Government should directly operate the ships it owns that are fit and serviceable, disposing of the others, and later on, when conditions become more normal, it will be found feasible to sell and transfer the boats, routes, lines, and good will to Americans who will continue the services.

I am weary of such statements as "successful Government operation, directly or indirectly, is an impossibility," and to the effect that all the losses shouted about are due to "Government operation"—when the fact is that, except in the case of the Panama Steamship Line and the United States Line, no merchant ships have been or are being operated by the Government.

Mr. Rossbottom testified to the successful operation of the Government-owned and Government-operated Panama Line during a period of more than 20 years. He also stated that the United States Line, now under his management and operated directly by the Fleet Corporation, despite the depression now obtaining in shipping, and notwithstanding it is operating a mongrel fleet, composed in part of unsuitable old German ships, and is in competition with the most efficient private steamship lines in the world, of all nationalities, operating the finest ships afloat, is being operated profitably and successfully.

It appears that the sinister purpose to show a failure of Government operation of any ships owned by the Government is manifested against the United States Line. Instead of taking out the 20-year-old expensive boats and substituting other modern ones, they are continued, and this honest and faithful and capable public servant, who is loaned to the Shipping Board by the Panama Steamship Co. to put life into this United States Line, is hampered and hindered in his undertaking. The success Mr. Rossbottom is achieving is due to no real encouragement or support, material or moral, on the part of the Shipping Board, and his success follows the discreditable failure of this line under private operation, although those operators were acclaimed as 100 per cent American and had millions of dollars' worth of the finest passenger lines belonging to the board turned over to them without a dollar of investment by these operators of their own funds.

In addition to these two, and only two instances of Government operation, we have, to wit, the Panama Steamship Line and the United States Line, it was testified by Mr. Manson, who put in the record a detailed statement proving his assertion, that the Australian Government's operation of its merchant marine has been an extraordinary success.

So the only experience we have, the only proof in evidence, contradicts squarely the oft-repeated assertion that the losses proclaimed arose from Government operation and that Government operation is an impossibility.

All we need is more Rossbottoms and a desire and sincere determination to succeed.

Since so much has been said about "economic wreck," "colossal waste," "shocking failure," by way of slurring the Democratic administration under which the ships were built and operation was begun, and in justice to the stanch Republicans who were in charge of the work as well as in justice to the former Shipping Board, which, by reason of resignations, interims between appointments, and refusal to confirm appointments, a good portion of the time consisted of one or two men, such Republicans, I mean, as General Goethals, Charles Piez, Charles M. Schwab, who looked after construction, and J. H. Rossiter, who directed operations when all this waste, wreck, and failure occurred, I desire to insert in the RECORD a summary of some of the work done and accomplished before the present board took charge.

I will let this statement by the present Shipping Board go at the close of these remarks and speak for itself. (See Appendix E.) It gives an idea of what was accomplished from 1916 to 1921. It deals with the Shipping Board fleet, which, we are told by those advocating this bill, is "that costly heritage from the Wilson administration." Think of it! The finest fleet owned or controlled by any maritime power in the world, or by any organization, denominated "a costly heritage"! These people claim to want an adequate American merchant marine—American owned and American operated—for the benefit of American commerce and American industry, and yet the first essential to such a merchant marine is ships, which they complain of as a "costly heritage." If we could only get rid of the ships, the Shipping Board would be relieved of annoyance and the friends of this measure would be happy. Their main purpose would be accomplished.

I must confess to being glad we have the ships, and I value them as a distinct asset, which I would not like to see dissipated and wasted. I want to see them taken care of and properly employed. They constitute the first essential requirement to a merchant marine, and instead of giving them away or sinking them or paying people to relieve us of them, I would put them in service and operate them as our needs demand and our interests call for until such time as they are wanted by those who will keep them under our flag, who will take pride in their country's status on the seas, who understand the business they would engage in, and who will see that they render the service the people of this country are entitled to have and must have.

"The Nation is cumbered by a great fleet of merchant vessels," they say. It is like saying to a man wanting to open a bank he is cumbered by capital, or to a merchant who would like to engage in foreign trade he is cumbered by goods or other assets.

THE WOOD SHIPS.

One of the favorite slurs cast unsparingly on the first Shipping Board has been in connection with the wood ship. The alleged folly and waste has been charged to the extent of saying they are worse than worthless. I never have believed the case was as bad as represented by those who wanted to find fault. There are those who can see a fly on a barn door 100 feet away, but can never see the door. It is not conceivable to me that there is no longer any use for the wood ship. Ever since a basketwork boat, calked with bitumen, was used in which to hide Moses by his mother, the "ark of bullrushes," boats other than of metal have been employed. Before the refilling of the Mediterranean by the Atlantic waters boats were used on the Levantine Lake. Upon the Euphrates and Tigris, when these rivers, in 7000 B. C., fell by separate mouths into the Persian Gulf, there were boats and ships not of steel or iron.

Carthage, about 800 B. C., founded by Tyre, was the greatest of Phœnician cities, probably having a population of a million, because she was the greatest maritime power in the world up to that time, and wooden ships were operated from there to Liberia and along the African coast.

Wooden ships carried discoverers and pioneers throughout the world. The three boats that brought the first colonists to Jamestown in 1607 were of wood, and only 100, 80, and 40 tons, respectively. The famous clippers were wooden sailers. To-day the wood ship is still in use throughout the world. Some of those built by the Shipping Board are now in profitable

employment. It is absurd to say these 385 vessels are worthless. I have here a statement which appeared in the Washington Post of June 27 last, which reads as follows:

NEED NOT SELL 285 VESSELS—SHIP BOARD DEFEATS MANDAMUS PLEA TO FORCE BID ACCEPTANCE.

United States Attorney Peyton Gordon and First Assistant Vernon E. West were successful yesterday in preventing the Ship Construction Co. of New York from obtaining a writ of mandamus to compel the Shipping Board to accept a bid of $2,100 each for 285 wooden ships, Justice Stafford dismissing the petition of the construction company.

The company contended that the bid was the highest made, and that when the time came for the bidder to take title to the ships the board decided not to sell. Chairman Lasker held that the board had the right to refuse to sell or sell as it saw fit. The company noted an appeal.

It is refreshing to have a responsible and successful shipbuilder, owner, and operator who has been in the business in this country all his life and whose progenitors for generations back were likewise so engaged give us the facts regarding these vessels. He has purchased 5 of them complete and is operating them. He has also recently purchased 31 unfinished ones and will operate them. He has successfully operated 240 wooden vessels and knows the wood ship well. I refer to Capt. Fields S. Pendleton, of New York and Maine, and I ask to insert extracts from his statement beginning on page 1995 of the hearings and ending on page 2003. To my mind this statement is both specific and convincing as to the character of these wooden vessels and shows they are not useless or valueless. (See Appendix A.)

Mr. FLETCHER. Mr. President, in the Washington Star of July 15 I found the following statement:

THREE HUNDRED UNITED STATES WOODEN SHIPS ARE TO BE SCRAPPED—COST GOVERNMENT FORTUNES APIECE AND ARE NOW WORTH BUT $1,500 EACH.

NEWPORT NEWS, VA., July 15.—Three hundred wooden steamers, all but 65 of the huge fleet anchored in James River at Claremont, are to be scrapped for junk in the near future, according to unofficial advices here.

One hundred of the ships are to be sent to New York and junked, 100 are going to Baltimore to be scrapped and sold, and another hundred are to be torn to pieces by a New Jersey firm, it is said.

The wooden ships cost the United States Government hundreds of thousands of dollars each, and it is said they will not net more than $1,500 each when scrapped for junk.

Of course, these statements are inconsistent. I do not know what explanation there is for them. I can not fully understand why the Shipping Board refused to accept a bid of $2,100 each when it now proposes to scrap them and realize only $1,500 each. In either case I think it is an absurd proposition. I think it is wicked to sacrifice the ships upon any such basis. They may not be available just now, but, as Captain Pendleton said, they are valuable ships, especially for short voyages limited to 2,000 miles. They are well equipped and furnished in every respect. The machinery, the brass and metal parts of them ought to be worth twenty times $1,500.

I have here a picture entitled "Twenty years on a reef. Old four-master sails again," and the following statement appears beneath the picture:

After lying stranded on a reef in the Strait of Magellan for 20 years the old British ship *Andrina*, rechristened the *Alexjandrina*, has been hauled off, scraped, overhauled, and put into the coastwise service again. She is now in New York Harbor, having brought a heavy cargo of wool up from Punta Arenas. The decision to resurrect the abandoned old tub was reached when the war reduced floating bottoms to such low figures. The ship was refloated by the Argentine Government.

I take it she is a wooden vessel, an old sailer, which laid on the reef for 20 years, and has now been resurrected and put into service. She is a four-masted sailer. The picture would indicate she is of wood, but at any rate Captain Pendleton said a wooden vessel would stand a strain of that sort much better than a steel vessel. I can not bring myself to believe that the wooden ships ought to be scrapped and disposed of in this reckless way indicated by this statement.

SPECIFIC REASONS FOR ASKING SUBSIDIES.

The reasons assigned for proposing and in support of this measure are:

1. To overcome the difference between the cost of operating vessels under the American flag and under foreign flags, this difference arising by reason of higher labor cost, greater construction cost and overhead, greater cost of subsistence as to American vessels, making it impossible to compete in overseas trade.

2. To bring about a sale of the Government ships to private individuals and shipping concerns, and thus get the Government out of the shipping business.

3. To save the amount of loss arising by the present plan of operation, estimated at $50,000,000 per annum.

Much testimony was taken. Many arguments were advanced. Unnecessary time was consumed in the hearing to show what no one questioned, that this country needs an adequate merchant marine, both to care for and build up and expand our foreign trade and to supply auxiliaries to our Navy. Our experience and the lessons taught during the World War proved conclusively the absolute necessities in these respects. There is no controversy whatever about our vital needs in these regards. No one disputes the wisdom of our having merchant ships sufficient to carry 60 per cent of our overseas commerce and adequate to serve efficiently our Navy if and when the call comes. The only question is, How can this be accomplished? If in more ways than one, what is the best way? The reasons assigned in support of the way proposed in this bill are unsound. That support is unwise and unwarranted.

1. The testimony showed the difference in wage cost and subsistence cost, the difference in cost of operation between vessels of the United States and foreign vessels was largely a myth, and if there was a difference against us it was so slight as to be practically a negligible quantity when considered along with the whole enterprise. In other words, the small percentage of the difference would cut no material figure in calculating the profit and loss of each ship. The testimony of Mr. Furuseth and Mr. Philip Manson and others established that clearly. The truth is American seamen's wages are lower than Canada and Australia and on a level with British. The only maritime power where American wages are substantially higher is that of the Japanese. Crews have been reduced by order of the Shipping Board until in some classes of ships the American advantage is 20 per cent.

Mr. POMERENE. Is that statement pretty well substantiated? The statement that the wages of our seamen are no higher than British wages surprises me.

Mr. FLETCHER. The Senator will find that gone into fully in the hearings, and I think it is thoroughly established, just as I have stated.

While ordinarily it may cost more to build ships in our yards than abroad, as we have the material right at hand, that excess cost must be due entirely to labor. Aside from the use of machinery, standardization, fabrication, and the kind of work we inaugurated and performed so well at Hog Island, and our greater production per man, which might be cited in our favor, there is no merit in this claim, because the Shipping Board is offering these ships, which cost approximately $200 per ton, at $30 per ton. Granted original cost was excessive and that they were constructed under abnormal conditions, there never was a time when these ships could have been built in this country or any other country at $30 per ton. There will never come a time when that can be done. Mr. Manson said (p. 1631):

That ($30 a ton) is a figure very much less than I think ships will be built for in our lives.

The statement furnished by the Shipping Board says:

Cables from London and Glasgow give prices per dead-weight ton as varying from $55 to $65 per ton (p. 163).

In American yards that price ranges from $80 to $117.85.

I have here a clipping from the Washington Post of July 16 with reference to a sale by the Shipping Board, and which shows they are willing to let them go for less. The item reads:

MUNSON LINE BUYS TWO SHIPPING BOARD BOATS.

The United States Shipping Board has sold to the Munson Line the steamships *Courtois* and *Covedale*, "Laker" type of boats, 4,100 dead-weight tons, for $76,000 each.

The New York & Porto Rico Steamship Co. has purchased the passenger steamer *Porto Rico*, formerly the ex-German liner *Prinz Joachim*. This vessel has been operated on a bare boat charter basis.

So while the Shipping Board is offering these first-class steel ships for $30 a ton, it is actually selling the Lake type of boats of 4,100 dead-weight tons at less than $20 per ton.

So that the capital cost as to these ships would be greatly in favor of the American owners over any foreign competition. The argument, therefore, that it costs more for us to build here than abroad fails.

2. Granted that the subsidies provided in this bill will increase the possibilities of the sale of the ships, the result will be that the pick of the ships will be acquired by a few strong lines, and the less desirable ships will be left on the hands of the Shipping Board, which is greatly troubled even by the best of them. Mr. Manson (p. 1632) states:

What I believe is this: That under a subsidy bill, as the bill is now framed, the ships will be sold to substantially the big fellows in the business now. There will be no wide distribution of ship ownership in America, in the United States, and that the provisions of the bill, feeding into the treasuries of these ship operators millions of dollars, will act as a sort of—or, rather, encourage the continuation of inefficient methods and extravagance that exist in American shipping now.

Back of all this I contend there is no overreaching necessity for us to dispose of the ships, except in an orderly way, as routes are opened up and trade developed and lines established, thus creating by that process rather than by raids on the Treasury a demand for the ships. In the meantime the Shipping Board should serve as a board of directors, meeting every day,

ordering the operation through the Fleet Corporation, directly, of each ship.

3. There is no need for any such loss, in the first place. The evidence is the ships have earned a profit in the past when business was good, and the present depression we have no right to assume will continue indefinitely. The only lines operated by the Government are to-day succeeding satisfactorily. The losses alleged are being reduced. It is not the purpose to discontinue using the Government ships immediately on the passage of this bill. Mr. Lasker believes we must go on for at least 30 months. By that time, he thinks, the best ships, probably 400 to 700, will be sold, but the others will be on our hands.

He further says that if the operation of any ships is continued it means the keeping up of an enormous overhead, and there is where the loss is found. It would appear to make no material difference in this enormous, unwarranted overhead expense whether we continue to use and operate, as we have been doing, 400 or 40 ships. Consequently, when this avowed saving of expense will begin is wholly uncertain, even though this measure is enacted. The prospect is, the overhead will continue indefinitely, and to that stupendous cost and expense will be added the subsidies therein provided.

The reasons given, therefore, for the necessity alleged to exist for this measure all fail and are without merit.

ALLEGED SUPPORT.

The point is made that a great majority of those appearing before the joint committee were in favor of the bill, and a large number of commercial bodies passed resolutions favoring it. Remember that Chairman Lasker has been exercising his talent for publicity and utilizing his force of experts paid by the Government to create support and bring about such action.

Mr. POMERENE. Mr. President, if the Senator will yield again, I was told the other day that a shipping man, Mr. Robert Dollar, has given out an interview or, in any event, has made a statement to the effect that there was no need to subsidize American shipping; that it could be operated successfully without subsidies. I should like to ask the Senator from Florida if he knows whether Mr. Dollar has given expression to such an opinion?

Mr. FLETCHER. I will refer to that opinion of Mr. Dollar and give the reference to it. I will reach that directly, as soon as I discuss the question to which I am now devoting my attention.

Suppose I were to advertise that I propose to organize a great corporation to engage in a big business that would yield fine dividends to stockholders, and I proposed to furnish all the capital and give away the shares to all who applied? Do you suppose I would have any trouble finding an unlimited number of people who would come forward in favor of the scheme? Those opposed would probably say nothing unless specifically summoned. Thousands of business men are opposed to any policy of subsidy. No one called them here to express their views. We know such men as Mr. Edward N. Hurley, former chairman of the Shipping Board; Mr. James A. Farrell, president of Foreign Trade Council; as well as those who appeared voluntarily as witnesses, as the record shows, are not in favor of this measure. All of the farm organizations, without exception, are against it. The American Federation of Labor denounces it. Many of the chambers of commerce qualified their indorsement, and the Mississippi Valley and Midwest people expressed conditions which, if not complied with—and they have not been—will oblige them to oppose the bill. These facts should be borne in mind, and the further fact that the Shipping Board set out to make its case and controlled the hearing in its own way. It was unreasonable to insist on meetings every day and all day while Congress was in session and members of the committee were obliged to give attention to matters on the floor and before other committees and elsewhere while these hearings were proceeding.

The hearings were so arranged that it was impossible for me to attend them, except on occasions, for the simple reason one can not be in two or three places at the same time. However, I was willing the Shipping Board should make out its case, if it could. I think it failed. I think the views of the board's own expert on subsidies, as set forth in the appendix, pages 67–103, are sound in the main, particularly the conclusion that—

> A study of the authorities on subsidies, taking into account the policies adopted by the various countries, would serve to indicate that, with the exception of Japan, the policy has not been important (p. 101).

Let it be observed that Japan's shipping is at a low ebb and her situation is not at all satisfactory in the building up of a merchant marine. The following newspaper dispatch bears out that statement:

JAPANESE WORRIED OVER DECLINE IN SHIPPING.

> HONOLULU, HAWAII, July 5.—Officials of Japanese steamship lines operating between the United States and points in the Orient are worried about a recent falling off in passenger traffic, which they attribute to sharp competition now being offered by American-owned lines, according to a report in Nippu Jiji, a leading Japanese language newspaper of Honolulu.
>
> One American line particularly, operating ships for the United States Shipping Board, has greatly increased its passenger-carrying facilities in the past two years and is said to have cut into the business of the Japanese lines very heavily.

An examination of the subject will disclose that "subsidies have never, since the days of the sea kings of Crete down to the American Shipping Board, created or maintained a merchant marine. Governments have lent money to build vessels and paid for service rendered. The largest marine interest visible on the high seas began with necessity and has continued without subsidy unless for mail service."

Capt. Robert Dollar, in the Nation's Business, June, 1922, says:

> I have been operating ships for a good many years, and I feel that I ought to know something about the subject. I have always felt that a shipowner who must have "pap" from the Government does not deserve to be in the business. We do not need any advantage over the other fellow. We can take care of ourselves. But we do ask for an even break. Government interference and foolish laws have so far prevented that.

Captain Dollar began with the *Newsboy*, of about 300 tons, in 1893. She paid for herself in less than a year.

I may say in passing that Captain Dollar has always been very much opposed to the seamen's act, but the evidence is overwhelming everywhere that that act has not cut the figure, so far as interfering with the building up of an American merchant marine is concerned, that some people have claimed or supposed. He then bought several more vessels. His idea has been to "start on a small scale and work up from a sure foundation." Now, they have 11 offices in the Far East and 6 in the United States. The fleet has grown until it includes 13 good cargo steamers and 10 sailing vessels. He gives some interesting experiences about securing return cargoes and urges the importance of foreign trade. Those vitally interested in promoting it, in the order of their interest, he says, are: First, the farmer; second, the manufacturer; third, the merchant, with branches or representatives in foreign countries; fourth, the banker, who finances and furnishes exchange; fifth, the shipowner, who furnishes bottoms for the carriage of ocean trade.

Mr. James A. Farrell, president of the United States Steel Corporation and chairman of the National Foreign Trade Council, another very successful and farseeing business man, expresses the view, which must commend itself as sound, in a forceful address before the Ninth National Foreign Trade Convention in Philadelphia, May 10, 1922, when in that excellent address he said:

> Whatever may be the fate of these particular proposals, some things are quite clear. The greatest subsidy our ships can have in overseas trade would be the support of the American people. The greatest hardship under which they are at present laboring is the lack of such support. We shall not have a successful American merchant marine unless its ships are more largely used by American shippers. * * * Other nations have developed this spirit of cooperation in a high degree, and much of their success is attributable thereto.

In an address to the National Merchant Marine Association on March 8, 1922, I said—and nothing has been developed to alter those views—among other things:

> 1. It can not be shown in the whole history of shipping that subsidies have ever been effective in permanently developing a nation's merchant marine.
>
> 2. The countries which have subsidized most have accomplished least in building up their shipping.
>
> 3. The experience of the United States is that subsidies are ineffective, indeed harmful, and the policy is vicious.
>
> 4. The great maritime powers of the world have flourished on a policy opposed to subsidies.

The British Board of Trade has declared against subsidies, and so has the French Chamber of Deputies.

SOME DETAILS.

Under the provisions of the proposed bill a 10,000 gross-ton steamship, 10-knot speed, with average annual miles steamed, to wit, 33,000 miles at one-half cent per 100 miles per gross ton, would receive a total gross subsidy per annum of $16,500. A 20,000 gross-ton steamship, 20-knot speed, with average miles steamed per annum, to wit, 90,000 miles at $1.80 per gross ton per 100 miles steamed, would receive $324,000.

The 10,000-ton ship would carry in 12 months approximately 55,000 tons of cargo and her subsidy would amount to approximately 30 cents per ton of cargo carried.

The 20,000-ton ship would carry in 12 months approximately 100,000 tons of cargo and her subsidy would be approximately $3.24 per ton carried. The maximum rate provided is 2.6 cents per ton per 100 miles, which may be paid to vessels of 23 knots

speed, or above. Either ship could operate between European and South American ports 11 months out of the year and make one voyage to an American port and collect a full year's subsidy. This one trip would net the 10,000-ton ship $16,500 subsidy and the 20,000-ton ship $324,000 subsidy for one trip to an American port. The Shipping Board would be empowered, in their discretion, to double the amount of subsidy to any line. Suppose a company had ten 20-knot ships in service; their total amount of subsidy due would be $3,240,000. The Shipping Board would have authority to make this $6,480,000, or pay nothing. The *Leviathan* might receive $1,700,000 per annum. This discretion in the board gives a small body of men most extraordinary power over the expenditure of very large amounts of public funds.

The subsidy would in all probability find its way into the pockets of the bankers and brokers and insurance companies—all interested in foreign shipping, and the latter channel leading directly into foreign hands.

Most likely this is what would happen: The money to buy the ships and operate them would be furnished by the banks and through brokers, who would "rake off" the direct subsidy. Whatever was left, if any, the insurance combine would get.

OUR EXPERIENCE.

Now, let us consider briefly our own experience. Recurring again to the remedies proposed by this measure, let us observe that experience is a name sometimes given to mistakes.

We ought to learn something by experience, at any rate.

The first subsidy authorized by the Federal Government was in the act of March 3, 1845. It consisted in granting mail contracts at a very high rate. We would not dignify that by calling it a subsidy now; we would likely designate it by the more euphonious and less understood name of subvention. We paid the Collins Line $19,250 a trip for 20 trips a year—$385,000 per annum. As is usually the case, it was but a short time before they wanted more. That sort of thing inevitably follows. Accordingly, in 1853 we increased the subsidy to $33,000 per voyage. The schedule was reduced one and one-half days in port at each end.

The line claimed to lose money. In 1858 Congress put back the mail contracts to their original figure. The Collins Line ceased to exist. In 1864 we made an agreement with Brazil to pay $2,500,000 as mail subsidy to a New York and Brazil line, the United States to pay $1,500,000 of this amount and Brazil the remainder. The agreement covered a period of 10 years and expired in 1874.

There was a greater increase in trade after the mail line suspended operations. It was shown that the bulk of trade was carried on by the unsubsidized cargo and sailing vessels.

In 1865 mail subsidies on lines to Hawaii, Japan, and China were established. That continued for from 6 to 10 years, and the companies surrendered the contracts. The benefits were inappreciable and trade was not increased by this Government aid.

From 1847 to 1879 the Government had spent over $21,000,000 in subsidies and subventions, and all the American merchant ships then afloat could have been bought for $7,000,000.

That was the result, so far as creating or adding to our merchant marine was concerned.

We made no further move in that direction after that experience until 1891, when we passed the mail contract law, under which we have been paying several times as much for carrying the mails as would be necessary under the regular sea postal rates.

The privilege of contracting for mail service under that act was extended in 1912 to all vessels admitted to and maintaining United States registry.

March 3, 1917, and again June 5, 1920, the act was amended, mainly by adding provisions.

In 1914 we had several million tons less of overseas shipping under our flag than we had in 1861.

Subsidies have never created or permanently helped to build up our merchant marine. No form of subsidy or subvention has ever created foreign trade or increased it.

Statutes will not do it. Proper administration of sound laws will help mightily. Proper interest, business foresight, real energy, and the right men can do it.

No ship is worth berth room in the hands of inefficient, indifferent, incompetent, inexperienced men. This is the experience of all countries; and recognizing this and applying it, the merchant ships of other countries have earned good returns.

OUR LAWS.

In the past we have sought to encourage by our laws the building of ships in this country and the shipping business.

We threw all the work of building ships documented and licensed in the coastwise trade into American shipyards.

Foreign ships, even wrecked on our coast, salvaged, and purchased at sale by American citizens, could not have American registry unless two-thirds of their value was spent on repairs in American shipyards.

Have the shipyards appreciated the laws which have favored them? See the statement by Carlos de Zafra, which I insert.

We gave monopoly of coastwise trade to American vessels.

We admitted free of duty all material used in the construction and furnishing of vessels.

We terminated the use of our courts and jails by foreign shipowners to compel their crews to stick to their ships.

We have given the right to American ships in the coastwise trade to pass through the Panama Canal without tolls.

We have relieved American shipping from certain taxes.

We have done much to equalize wages with our competitors; and since fuel and supplies are bought where they can be had cheapest, there is no difference in operating cost in that respect.

We continue the mail subvention.

It can not be said that Congress has been inimical to or neglectful of our maritime interests.

There has been a lack of cooperation among those primarily concerned, absence of unity of effort, something wanting in national pride and love of country, and among those who build, own and operate, and invest in ships. The latter spirit has been perhaps overstrained because of the absence of the main principle, cooperation, which was encountered to an appalling degree.

If subsidies would solve the problem, why have we not already found the remedy?

It is averred that we have for several years past been allowing the greatest subsidy ever known. Very well; what greatly concerns us is the result that failure is written all over the record.

Take away the vessels owned by the Shipping Board and the vessels owned by companies which carry their own products, such as the Standard Oil Co., the United States Steel Corporation, and the United Fruit Co., and our merchant marine today is no farther ahead than it was before the war. With the exception of four freighters recently purchased by the Dollar Line, there is not a privately owned American vessel operating in the trans-Pacific trade between the United States and Asia. Captain Dollar runs two boats in a feeder service up the Yangtze River, 1,600 miles, and they fly the American flag. If they touched some foreign port and an American port once a year, they would be entitled to the subsidy.

INSURANCE.

Congress recently passed a law which seeks to legalize and validate combinations among insurance companies—a more or less gigantic trust—but even after that, American concerns must look to big foreign companies to underwrite their lines. Let the Government save to American shipowners 3 to 4 per cent on their insurance and do away with this complicated "general average," which no insured understands and which places him in the hands of the insurance company a helpless suppliant in case of loss. What we need is a plain, understandable policy, which says what it means and means what it understandingly says. No man living two blocks away from a building which is burned should be required to share in the loss or risk. General average requires that.

Marine insurance ought to be placed on the principle of the shortest distance between two points, a direct, straight line, instead of a devious, confused, uncertain conglomeration of wandering provisions, including that indefinite, ambiguous, cumbersome general-average clause, under which investments are tied up for as long a time as 10 years at times.

The average charge for insurance will be 4½ to 6 per cent, and amounts to 6 or 7 per cent of the total operating cost. The rates on steamers are from 4½ to 6 per cent, and on cargoes 2 to 3 per cent (p. 443).

At least 65 per cent of all American vessel insurance is written with foreign companies. All American-flag ships are classified in Lloyd's Register. On this subject I quote from the hearings (p. 381):

With reference to insurance, Mr. Rossbottom, the item of insurance is a very important factor in estimating the operating expense of ships, is it not?

Mr. ROSSBOTTOM. The item of insurance, as far as the ship itself is concerned, is not so important; but the class the insurance company gives to the ship is important to the shipper. For instance, if I am operating a steamer that the insurance companies will charge the shippers 10 per cent or 15 per cent increase in premium over what they will charge another ship of my competitor, I am at a disadvantage with the shipper.

Senator FLETCHER. Is not the most of that insurance based on Lloyd's classification, or Lloyd's Register?

Mr. ROSSBOTTOM. Yes; it is.

Senator FLETCHER. Therefore, Lloyd's is in a position to classify American ships, if they see fit, showing a discrimination, showing favoritism, in a way that would be very harmful to American shipping, would it not?

Mr. ROSSBOTTOM. They are in that position; yes.

Senator FLETCHER. And most of this insurance is either written or underwritten by foreign insurance companies, is it not?

Mr. ROSSBOTTOM. It is.

Senator FLETCHER. Even insurance carried on American ships and cargo?

Mr. ROSSBOTTOM. The bulk of it, I should judge, is written by foreign insurance companies.

Senator FLETCHER. That is quite an important factor in the cost of operation, is it not, Mr. Rossbottom?

Mr. ROSSBOTTOM. Not so much in the cost of operation, Senator, as in getting the business. The rate that I might pay for the insurance of my steamer, to cover all maxine risks, is a fixed charge with me. The insurance companies might charge me a quarter or a half of 1 per cent more than they charge the foreign steamship company, but I can take care of it; but when they go to the shipper and say, "If you ship by Rossbottom's ship you have to pay one-quarter of 1 per cent more than you pay if you ship by Bill Jones's ship," then I lose the shipper there. That is the important part of it.

Mr. CULLEN. Does that happen very often, Mr. Rossbottom?

Mr. ROSSBOTTOM. It has happened frequently. The Shipping Board has had quite some trouble in that respect, because of the insurance companies improperly classifying their steamers. I think they are trying to straighten that out.

Senator FLETCHER. So that under the present situation, in view of the classification by Lloyd's and the strength of foreign insurance companies, American ships encounter very considerable obstacles and difficulties under the head of insurance, do they not?

Mr. ROSSBOTTOM. I think they would.

Senator FLETCHER. And American shippers?

Mr. ROSSBOTTOM. Yes.

Senator FLETCHER. Now, I do not know that you care to express yourself, but if a way could be devised whereby that insurance could be supplied by the United States, and at cost, would not that be a very material help to American shipping?

Mr. ROSSBOTTOM. In other words, you are having the United States establish an insurance department to compete with Lloyd's, so that American ships and American shippers could be assured of getting a square deal, as far as rates are concerned; if they could not get them from Lloyd's, they could get them from the Government. Is that what you are driving at?

Senator FLETCHER. Yes.

Mr. ROSSBOTTOM. Yes; there is no question about that.

ALTERNATIVE PROPOSAL.

It is fair to suggest, as the proponents of this measure do, "if you object to it, propose something else."

My proposal is this:

Just as soon as possible the Shipping Board, through the Fleet Corporation, should take over and operate directly all their ships, precisely as the Government now operates the Panama Steamship Line and the United States Line, heretofore mentioned. To do this they will be obliged to engage men of skill and ability and knowledge of the business, and permit those men to employ only the help they absolutely need, under the supervision of the board, dismissing a large number of political appointees who are simply in each other's way, closing that door to job hunters, timeservers, the inexperienced and incompetent, making it the resort of political patronage runners, and then systematize the work and place it on a strictly commercial business basis.

A sincere effort should first be made to execute in good faith and with real energy the merchant marine act of 1920.

Dismiss more than one-half of the 8,000 employees here in Washington and select the capable, industrious ones actually needed.

Reduce the needless expenses several million dollars a year, and build up a proper, effective organization.

Conduct the affairs on a business basis and according to business principles.

I know they will say it can not be done. My answer is, try it. You have not yet given that plan a full and fair trial.

I think, too, commercial treaties in conflict with section 34 opposed to the proposal to bring 50 per cent of the immigrants in American ships, should be denounced according to their terms. The old treaties should be abrogated in toto, and new treaties should be made permitting of our freedom of action respecting discriminating duties and transportation of immigrants. The Shipping Board should be not merely a supervising body, outlining policies when pressed, but a directing, managing body, in control of a great enterprise, functioning with enthusiasm and vitalizing interest.

There is work for them to do in their offices, learning the shipping business and managing it. They will require, of course, strong, experienced men to assist and advise and execute. They have some, but have merely made a beginning, and are not warranted in saying the Government is impotent, and then want the people to pay individuals or corporations to take the ships off their hands and relieve them of annoyance.

Second. Authorize the Shipping Board, if further legislation in that regard is required, to sell ships to American citizens and bona fide American companies on the payment of 25 per cent in cash, the remainder to be paid in equal annual installments of one-tenth each, deferred payments bearing interest at the rate of 4 per cent per annum, payable annually, secured by first lien upon the vessel, her tackle, apparel, and furniture, with the right to foreclose in case of any default. That would mean, for illustration, a 10,000-ton (dead weight) vessel would be sold for $300,000. Twenty-five per cent cash would amount to $75,000. The remainder would be $225,000. There would be payable each year for 10 years $22,500, with 4 per cent interest, amounting to $9,000 annually on each note for $22,500. The money to purchase one of these ships would ordinarily cost the buyer 9 per cent interest. The Government can obtain money at 4 per cent. Therefore, without its costing the Government anything, it can afford to save these purchasers 5 per cent on the $225,000, which would equal $12,250. The direct subsidy on such a cargo vessel, as provided in this bill, would be $16,500. By this plan we could assist the purchaser practically as much, without its costing anything, as we can by going into the Treasury for the direct subsidy.

Third. At the risk of being charged with socialistic tendencies I would, if it is found necessary to accomplish what the Shipping Board claims to aim at, have the Government furnish insurance, hull and cargo, as to all marine risks, to all American vessels at cost, and either create or so establish the American bureau of shipping as to have it serve the purpose, a classification agency, to have a similar relation to American shipping as Lloyd's has to British shipping. The Government could in this way save American shipowners, without raiding the Treasury at all, approximately 2 to 3 per cent on their item of insurance, which is now a burden on them owing to their dependence on Lloyd's and foreign underwriters and insurance companies. This could be done by an organization under the Shipping Board similar to the War Risk Bureau, which was established and operated during the war in the Treasury Department. This bureau was established at the instance and request of American shipowners. It wrote the war risks at very low rates and netted the Government some $17,000,000. This is an instance of the Government conducting a considerable business efficiently and economically, and disproving the claim that the Government is incapable of conducting a large enterprise like the shipping business successfully. In other words, 2 per cent of the insured value of hull and cargo saved the owners and shippers would amount to an enormous sum, and this could be done by establishing a proper classification agency and writing the insurance at actual cost. Of course marine insurance companies will object, but the chief interference will be with foreign agencies and companies who now dictate both classification and insurance.

Mr. Howard says (p. 1779) that he has made the calculations and finds that the subsidy proposed would amount to about one-quarter of a cent per bushel of wheat, while the insurance amounts to 5½ mills per bushel in winter and 4 mills in summer. The subsidy would be about 2½ mills. As to cotton, the subsidy would be about 10 cents per bale, while the insurance is $1.408 per bale. Now, if the Government would provide that insurance at cost, in the case of cotton it would be of much more assistance than the subsidy, and in the case of wheat it would be worth one-fourth as much and avoid any drain on the Treasury.

I expect to discuss this subject of classification and insurance, which has a very important bearing on shipping, more in detail later. For the present I ask leave to insert at the close of my remarks some extracts from authorities on the subject under the head of "Insurance." (See Appendix B.)

I ask to insert as part of my remarks this statement from the Monthly Summary of Foreign Commerce for April, 1922, showing the value of imports and exports for the month of April, 1921, as compared with the same month of 1922, and for the 10 months ending April, 1921, as compared with the 10 months ending April, 1922; also what proportion was carried in American vessels and what in foreign vessels. (See Appendix C.)

I wish also to insert, without reading, an editorial from the American Economist (see Appendix D), a Republican protective-tariff publication, of June 9, 1922; also an editorial from The Nation of July 5, 1922 (see Appendix F), and other clippings, which are not long, bearing on the matters discussed, which I tender. (See Appendix G.)

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FLETCHER. While the chairman of the Shipping Board is going about the country campaigning, urging the passage of this bill, broadcasting literature, statements, and speeches in support of it, exercising his advertising powers and resources more or less at Government expense, perhaps he will take time to explain the details of the enormous expenditures in his bureau. Of course, he will dilate upon the "mismanagement" and the

awful condition of the records and books, but the people may ask what has become of the great economies promised a year ago and why it is after Congress appropriated $250,000 "to enable you to employ expert accountants" for the purpose of examination and investigation in order to sum up a balance sheet and put the accounts in such shape that monthly profit and loss statements could be prepared, which it was thought could be done in a few months, and was, in fact, accomplished, substantially, last November, that work is still uncompleted?

Perhaps he can make it clear why the only economies thus far effected are those which would have automatically occurred when ship construction ceased and when some 700 ships were taken out of service and tied up. Maybe he can explain why the expenses of the operation division continue as they are, although the number of ship operators have been reduced from 100 to 41. It may be the people will want to know why he discharged people right and left, took some of them back at increased salaries, and added others. They may ask about this bureau being the chief point of attack by that army of the boasted Republican majority which stormed Washington over a year ago and is still unsatisfied in a determined assault directed especially against the Shipping Board pie counter. The people may have some curiosity on the subject of the possibility of practicing economy and obtaining efficient service when places are made for political self-seekers without regard to their fitness for the work and limited only by the demand and pressure.

I dare say the questions will be put, "When are you going to adjust the claims against the Fleet Corporation and the Shipping Board and liquidate the assets left over from war conditions? When are you going to collect from overpaid contractors, from operators and others who justly owe the corporation or the board?"

For instance, there are States where the statute of limitations will soon run against claims which ought to be enforced, and yet those claims still drag their weary length as if there was no purpose or desire to end them. The statute does not run against the Government, but the Fleet Corporation is not the Government and can sue and be sued, says the Supreme Court. The people will most likely inquire, "Within what time do you expect a lot of lawyers receiving salaries of $20,000 a year and a corps of experts and advisers, researchers, investigators, and the like to work themselves out of renumerative, easy positions?"

They will ask, "Why pay storage, guards, accountants, and assistants looking after material scattered all over the country left on hand when building ceased more than a year ago?" "Why should it require more than a year for you to be able to make a complete statement of claims against the Fleet Corporation and of the accounts receivable, and why delay adjustment of them?" "Why continue a lot of unnecessary offices and employees?" "What about the hundreds of engines at Erie and Chicago?" "What does it cost to take care of hundreds of winches and other material in Chicago and yards full of life rafts and lifeboats in Tacoma?" You will be asked if there were not, when you took charge, hundreds of thousands of dollars—as much as $750,000 in Portland and Seattle alone—in liquidated damage claims due the Fleet Corporation. What has been done about them? Suppose you publish the list of bad accounts receivable and specify the Democrats. Publish the list of settled claims and specify the Democrats. Publish the list of unsettled claims pending and specify the Democrats.

I hesitate to mention Democrat or Republican in this discussion, because I do not recognize these matters as party questions, but so much has been said with that meaning by those favoring this measure that I venture to suggest the showing of the books with specific reference to political affiliations.

"Put the Government's house in order before asking for further drafts on the taxpayers, and after you do that we will then be in position to determine whether or not 'Government operation of ships is an impossibility.'"

We can not well say before that is done whether or not the Shipping Board should be speedily relieved of this "costly legacy" of a previous administration, as you designate this superb fleet of new merchant ships, over 13,000,000 dead-weight tons, and close out its business.

A very effective campaign of great public importance could be carried on inside your organization, and there are possibilities of real public benefit in that field, where the exercise of some high-class executive and administrative work would count mightily for an American merchant marine.

THE SITUATION.

Speaking generally, let me say, in addition to what I have mentioned, we inherited, if you please, from the war 2,311 vessels, aggregating 13,600,000 dead-weight tons. Included were 1,689 steel vessels, 592 wooden, 18 composite, 12 concrete.

Some of them, at least 100, have been sold. (P. 2391 of hearings.)

Of the steel vessels 26 are passenger cruisers.

We have 15,418,000 gross tons of ocean-going merchant ships under our flag, consisting of 5,884 vessels.

Great Britain has 10,324 ocean-going merchant vessels, with a gross tonnage of 21,589,000.

The United States is far ahead of every other nation except Great Britain.

The object and purpose of establishing and maintaining a merchant marine is not, primarily at least, to create an enterprise which would be likely to be immediately profitable as a business venture. The real and vital purpose is the preservation, development, and extension of American commerce overseas. The merchant marine is the necessary instrumentality by which this is to be done. We make a mistake to constantly think only in terms of the ship operator and his profits. By that attitude we miss the true greatness of what we are trying to do. Commerce is the thing. Its transportation is the instrumentality—of vital importance, it is true—but an incident required in achieving the real end. While we are establishing new markets and new shipping lines the transportation may not be profitable purely as a business venture. Particularly in times of depression and readjustment we must expect to encounter discouragement and financial loss.

That means a call for prodigious and unflinching effort. Our profit will come from an enriching American commerce beyond the seas and the national advancement sure to follow. Of course, if profits come directly, so much the better, but we should not count on them at once. Essential to the development of our foreign commerce is the creation and maintenance of an American merchant marine.

If we fail to provide this instrumentality our commerce will languish and foreign trade assume a state of arrested development; our rivals in trade, possessing ships and skilled in their operation, may be expected to discriminate against us, and we will find before a great while that those who own the facilities of ocean transportation will control the commerce of the world.

Scarcely secondary in importance to the promotion of foreign trade is the need to provide a fleet of vessels to meet national emergencies, such as we have recently encountered. There is no such thing as sea power without adequate merchant ships.

Liners, trawlers, tankers, tramps, and the ordinary merchant vessel are as essential as dreadnaughts and destroyers.

While the naval fleet represents the striking and protecting half of sea power, the carrying and supplying half consists of the merchant marine, and both are equally vital to the success of military effort. I look upon an American merchant marine therefore as necessary to promote American commerce and as vital to our national life. I would not, if I could help, see it fail for want of well-ordered and consistent governmental encouragement and support.

I can not bring myself to favor the kind of encouragement and support and the ways and means of supplying it as provided in the bill. The spectacle of representatives of private enterprise—shipping or otherwise, established or incipient—crowding to the Capital from every quarter of the country to importune the Congress or the individual Members, or any bureau of the Government conceivably vested with such vast powers, for a participation in governmental favors is a thing not to be tolerated, much less encouraged.

I need not repeat the further reasons already discussed. The Government should not go out of the shipping business. No matter what we decide to do a few years from now, there is work for the Shipping Board outside of operating the vessels. The rates at which American commerce shall be carried, the routes upon which steamship lines shall be established, questions of discrimination, classification, and insurance, and such other regulatory powers as will favor the development of American trade in foreign lands, are matters which clearly should be within the supervision and control of the Government.

Eventually private ownership and management will come, but careful, sympathetic, and intelligent governmental supervision, in the interests of American commerce, must obtain if we are to have "the Starred Banner the talisman of a world commerce."

APPENDIX A.

[Extracts from Captain Pendleton's statement.]

* * * * * * *

Senator FLETCHER. As I understand you, your view is that the Shipping Board ought to go on and operate these ships for five years, directly, themselves.

Mr. PENDLETON. Senator, you can not sell them. In my judgment it is foolish and futile to try to take and sell these ships at the present time.

Senator FLETCHER. Would you continue to operate them as they are now doing, under these agency agreements, whereby they stand the losses and the agents get a commission?

Mr. PENDLETON. Oh, well, that is a mistake to think that. They have to keep up an organization, and I do not think there is any operator who has made much, if any, profit out of the Shipping Board vessels. They are only paying on the outward business the regular ordinary commission that is paid by every private owner, 5 per cent. Out of that he must pay his office expenses, cables, telephones, upkeep of his organization, and on the return business it is 2½ per cent, and that is general and sometimes only half of what the private operator pays.

Senator FLETCHER. Well, now, suppose you were representing the Government with all of these ships, would you continue the present plan of operating or would you undertake to operate directly by the Government?

Mr. PENDLETON. Oh, no; you can not do that. It is impossible, and you could not do it in Washington anyway. They have got to have the same kind of an organization that they have now.

Senator FLETCHER. You think their present plan is all right, only they ought to reduce the freight rates

Mr. PENDLETON. Reduce the rates. As long as there are cargoes to carry, I believe American ships should carry them.

Senator FLETCHER. Do you think they should reduce the rate to a point where they could carry a majority of the business?

Mr. PENDLETON. Up to 50 per cent of it, I would say, to put the ships in use.

Senator FLETCHER. Even at a loss?

* * * * * * *

Senator FLETCHER. Would you also favor the Government insuring its own ships and cargo?

Mr. PENDLETON. Yes, sir. Senator, you may recall that we had some little debate on that in the Senate, and I am very strongly in favor of the Government granting us, as Parliament granted to Lloyd's, a charter so that we can do our insurance business on the same reasonable rates as England does hers.

Mr. DAVIS. Senator, might I interrupt you there to ask one question?

Senator FLETCHER. Yes; I am through.

Mr. DAVIS. I only want to ask one question: Have you examined the Edmonds insurance bill that recently passed Congress?

Mr. PENDLETON. I have not gone over it carefully; no, sir.

Mr. DAVIS. Mr. EDMONDS and the others who were instrumental in the passage of that bill claim that it will remedy our difficulties from the insurance standpoint. That is the reason I want to get your opinion on it.

Mr. PENDLETON. I have talked with Mr. EDMONDS somewhat on that and it is only in the District of Columbia as I see it.

Mr. DAVIS. Well, it authorizes the incorporation of a company here in the District of Columbia, but it could then do business anywhere. And then his idea was it would afford a model for similar incorporations in the States.

Mr. PENDLETON. Yes. We have great difficulty; there is not enough insurance facilities in this country to take care of more than—oh, if our ships were all running, we have not more than enough to take care of more than—a third of it. There are only what you might call half a dozen first-class good marine insurance companies, and it is well known that they never expect to pay more than half of their premiums in losses, and generally about 40 to 45 per cent. Now, if a risk costs 10 per cent and they charge 10 per cent, it costs them anywhere from 4 to 4½; never over 5. That is the way it figures. Of course, the rest goes to salaries and expenses of the organization. Lloyd's figures a 15 per cent profit is a reasonably good return; consequently, the cost of the insurance in Lloyd's would be 4½ to 5 per cent.

Mr. DAVIS. The result is this bill will result in the encouragement and establishment and building up of more and stronger American merchant marine insurance companies.

Mr. PENDLETON. I have tried for 15 years to get an act of incorporation in some way, so that we could form a Lloyd's the same as they have in England, and I do not understand that this bill will do it, although I have not seen it. I had a talk with Mr. EDMONDS some time ago.

Senator FLETCHER. If that can not be done by private companies, do you favor the Government insuring those properties?

Mr. PENDLETON. I do. You might recall, Senator, that I suggested a plan in the statement I made, that I won't go into now—but I suggested a plan for an insurance company at the time about selling the ships, that the Government should take two-thirds of the insurance and leave a third for the private companies, which is all they could take care of, and make it at actual cost.

Senator FLETCHER. And then most of these policies that are issued contain what they call a general-average clause that nobody knows what it means, and the man does not know what his loss is after he has suffered it.

Mr. PENDLETON. That is true, Senator. It cost me $100,000 by not knowing what a policy said once.

* * * * * * *

Senator FLETCHER. Do you think if this bill is passed and these subsidies provided for here are granted, will that prompt private interests to purchase these ships, or will they have to still depend on a reduction of freight rates?

Mr. PENDLETON. I tell you, they have got to reduce freight in order to get into business, because there are all the ships in the business now that the business can stand. If you put another ship into the business, if there are five cargoes and you put in seven ships, there are already five in it now, so when you put in extra ships the other fellow has got to haul up or you have.

Senator FLETCHER. You operate ships, do you, Captain?

Mr. PENDLETON. Yes, sir.

Senator FLETCHER. Steam vessels as well as sailers?

Mr. PENDLETON. Yes, sir.

Senator FLETCHER. Coastwise as well as foreign?

Mr. PENDLETON. All trades, wherever wind and water goes. It don't make any difference where the freight goes, whether to Hongkong, Singapore—wherever I can find anything to take.

Senator FLETCHER. You operate tramps or regular lines?

Mr. PENDLETON. Tramps.

Senator FLETCHER. Did you purchase some of the Shipping Board ships?

Mr. PENDLETON. Yes, sir.

Senator FLETCHER. How many of them?

Mr. PENDLETON. Five.

Senator FLETCHER. Were they all finished?

Mr. PENDLETON. Yes; they were all finished. They have just sold me 31 unfinished ones.

Senator FLETCHER. Are those steel?

Mr. PENDLETON. No; those are wood. I believe in wood, Senator. The salt water preserves wood and rots iron. That is why it will destroy iron so quick.

Senator FLETCHER. I am glad to find a man who has some faith in the wooden ship.

Mr. PENDLETON. Well, I am going on record again right here, just the same as I did two years ago, that in 10 years there will be lots of wooden vessels so much better than the steel ones that for the ordinary tramp carrier steel will never come back. I am going on record again, so they will have it to throw at me 10 years from now.

Senator FLETCHER. Somehow I always believed there was some use that these wooden ships could be put to.

Mr. PENDLETON. Well, Senator, in view of the fact that up to practically 1884 there weren't any cargo carriers but wooden vessels, and they carried niter and coffee and tea and all of that cargo from Australia and China and all these ports all over the world, isn't it strange that the wood should have gone to pieces so quick, in view of the fact that those ships at that time were never steel strapped and these ships are all diagonally steel strapped, and ordinarily when we used to have 12-inch ceiling in our old sailing-ship days we now have 14-inch ceiling in these ships?

Mr. LISSNER. I think we have made a mistake in selling you those ships so cheap.

Mr. PENDLETON. If I hadn't thought so, I should not have bought them at that price. [Laughter.]

Mr. BRIGGS. You believe in wooden ships, then?

Mr. PENDLETON. Yes, sir; I do. I have owned 240—my people have.

Mr. BRIGGS. How many?

Mr. PENDLETON. Two hundred and forty.

Mr. BRIGGS. Have you operated them at a loss or at a profit?

Mr. PENDLETON. Well, I managed to pay my bills every Saturday night.

Mr. BRIGGS. Are you familiar with these Shipping Board wooden ships?

Mr. PENDLETON. Yes, sir.

Mr. BRIGGS. You were speaking about their being double strapped.

Mr. PENDLETON. Steel diagonal strapped; yes, sir.

Mr. BRIGGS. Does that improve them over the other types?

Mr. PENDLETON. Yes, sir.

Mr. BRIGGS. Much or little?

Mr. PENDLETON. Considerable.

Mr. BRIGGS. Are they water-tight?

Mr. PENDLETON. I think they are a stronger ship than the steel ones are. I haven't any question of doubt in my mind that if you put the two crosswise, the steel one will break in two twice as quick as the wooden one.

Mr. BRIGGS. Are you in favor of taking those ships out and sinking them or burning them up?

Mr. PENDLETON. No, sir; notwithstanding it would be the best thing for me that could occur, because they come in competition with me. But if you ask me a fair question, I will tell you no; I think it would be criminal.

Mr. BRIGGS. Why do you think it would be criminal?

Mr. PENDLETON. I think when we have tried to build up a merchant marine and get a lot of tonnage built and then go to work and destroy it—I don't think there is any reason for it. The wooden ships have earned just as much as the steel ones have—just as much. They are earning just as much now.

Mr. BRIGGS. But they are tied up now.

Mr. PENDLETON. The steel ones are tied up. There are four times as many steel ones tied up as there are wooden ones—well, three times, say.

Senator FLETCHER. Are they operating any wooden ships at all now?

Mr. PENDLETON. Not the Shipping Board; no. I guess I am the only fellow operating any wooden ones. I took them out, bought them, and put them into the hardest work I could get, bringing phosphate rock from down South, Senator, just to try them.

Senator FLETCHER. Do you take the machinery out and use them as sailers?

Mr. PENDLETON. No; I am using them as steamers.

Mr. BRIGGS. They are all equipped, these wooden vessels, all equipped with motor power? They are power-driven vessels?

Mr. PENDLETON. Yes, sir; regular steamships. There is the same equipment in them for power as there is in the steel ones.

Mr. BRIGGS. The same equipment?

Mr. PENDLETON. Yes—well, I say most of them, except some ships are oil engines—some steel ships—and the wooden ones are all steam.

Mr. BRIGGS. How many vessels, Shipping Board vessels, are you operating now?

Mr. PENDLETON. Not any at all.

Mr. BRIGGS. How long has it been since you have operated any?

Mr. PENDLETON. We operated a few. Three or four companies got into difficulties, and Tom Scott, when he was commissioner, got me to look after them; and I went over to England and got them back. But we didn't operate many.

Mr. BRIGGS. Is there much difference in the cost of operation of these wooden ships and steel ships, from your experience?

Mr. PENDLETON. Well, they are heavier in fuel consumption, because the ships are heavier. They weigh more.

Mr. BRIGGS. Which does?

Mr. PENDLETON. The wooden ships.

Mr. BRIGGS. The wooden ship weighs more than the steel ship?

Mr. PENDLETON. Yes; 50 per cent more. And you have got to put that volume of weight through the water, you see, and it takes more fuel.

Mr. BRIGGS. It takes more power to drive the vessel along at the same speed?

Mr. PENDLETON. Yes, sir.

Mr. BRIGGS. But do you have to operate them at the same speed as you do the others?

Mr. PENDLETON. No; not necessarily; but, of course, the ordinary tramp ship is 9 knots an hour.

Mr. BRIGGS. What do you carry in these wooden vessels—what kind of cargoes?

Mr. PENDLETON. Anything that offers.

Mr. BRIGGS. But what is the usual cargo?

Mr. PENDLETON. Mostly coal, phosphate rock. I have only just been getting them ready recently, the last three or four months. I only bought them a short time ago and put three of them in commission, and the other two I am starting on now.

Mr. BRIGGS. You expect to put those others in commission, do you?

Mr. PENDLETON. Yes, sir.

Mr. BRIGGS. And those are wooden vessels?

Mr. PENDLETON. Yes, sir.

Mr. BRIGGS. You really think there is some future for the wooden ships, do you?

Mr. PENDLETON. Well, there is just as much future for the wooden one as there is for the steel one for short voyage. You see, the wooden ships are small-sized ships and they never could be used on such long trips.

Mr. BRIGGS. They run about 3,000 tons?

Mr. PENDLETON. Three thousand five hundred dead weight. But they can't operate successfully more than 2,000 miles from the cheapest coaling station; otherwise Hampton Roads. You take it north of the Equator, where there is probably 20,000 tons of cargo carried in a year, they can operate successfully; when you get them farther away than that they burn too much coal for that distance.

Mr. BRIGGS. They are coal burners?

Mr. PENDLETON. Yes, sir; and they are too expensive on coal, and with the larger size ships on long voyages, of course, they can't compete; but for short voyages a 5,000-ton ship in the near-by West Indies trade can carry cargoes per ton per mile just as cheap as an 8,000-ton ship can, because the time of loading and discharging takes so much longer on the 8,000-ton ship that the other vessel can load quicker and get back quicker.

Mr. BRIGGS. How do these ships compare in stanchness and skill with which they are built—seaworthiness—with vessels built before the war of wood, wooden vessels?

Mr. PENDLETON. I think some of them are the best built wooden ships that have ever struck salt water, and some of them that were built in a hurry, when they worked on them nights, not well planned, have had difficulties, but I have never known a wooden ship to go out and fill up in the Atlantic Ocean for want of strength. Steel ones have.

Mr. BRIGGS. What percentage of these vessels, of these wooden vessels that you think are good vessels, well-built vessels, are those that belong in the class that you think are not so good—just roughly?

Mr. PENDLETON. Of course, they are getting—well, down the James River I went over perhaps a couple hundred of them some time ago. We had 25 or such a matter under our charge, I think. I should say that as a class there isn't over 15 to 25 per cent of them that are real bad.

Mr. BRIGGS. Not over 15 or 25 per cent?

Mr. PENDLETON. Not over 25 per cent that are bad. And they are all steel strapped except a few.

Mr. BRIGGS. That increases the strength of the vessel materially?

Mr. PENDLETON. I think so; yes, sir. The model of them is what is against them, Mr. Briggs. I don't know as you perhaps appreciate that, but I might as well say it is the model that is against them, their draft of water.

A steel ship of that size will draw 20 feet—19 to 20 feet—and these ships draw 25 to 26, and that eliminates them from good freight rates. In other words, it limits you to the place where a large-sized ship can go, and it handicaps them a great deal that way, and of course when freight rates are down the way they are now, when all ships are not making very much, unless it is the most economical operation, it is quite a handicap.

Mr. BRIGGS. When rates are down and tonnage is scarce, it handicaps both kinds of ships, steel and wood, doesn't it?

Mr. PENDLETON. Tonnage is not scarce. That is the difficulty now. When rates are down there is always plenty of tonnage. You take now, when you have 10 vessels and 11 cargoes, there are always two merchants bidding for the vessel, and you can jump them up on the freight rate; but when you take 10 vessels and 9 cargoes, there are always two vessels to a merchant bidding against each other.

Mr. BRIGGS. Well, I say, the testimony we have heard has indicated that there is a great deal of shipping tied up in every country of the world to-day, and a great deal of testimony here has been to the effect that for the amount of commerce to be carried now there was really an over amount of tonnage.

Mr. PENDLETON. Yes, sir; there are about 62,000,000 tons and probably business for 45,000 tons.

Mr. BRIGGS. And I say, when you have got that condition, the one that you are referring to, when rates are low, it is difficult for both steel and wooden ships, not only wooden ships but steel as well, to secure cargoes, adequate cargoes; that is true, is it not?

Mr. PENDLETON. Yes, sir.

Mr. BRIGGS. Now, are these wooden ships insurable? Can you get insurance on them?

Mr. PENDLETON. Well, they didn't want to take them, and I said all right; I would take the risk myself, until after they went aboard of them, and then old man Eaton, of Boston, 79 years old, says, "Well, Pendleton, I will take off my hat to you. Those are the best wooden vessels I have ever been aboard of." And after that there was no trouble in insuring them, but the first of them I insured the cargo myself. I never have had a cent of insurance on a hull.

Mr. BRIGGS. Who is "old man Eaton"?

Mr. PENDLETON. Captain Eaton, of the Boston Insurance Co.

Mr. BRIGGS. That is a reputable insurance company?

Mr. PENDLETON. Yes; one of the largest in the country.

Mr. BRIGGS. And you have no trouble insuring wooden ships any longer?

Mr. PENDLETON. Not after he saw that one. Of course, the newspapers had given them such a black eye, you see, that if you undertake to do anything in London they wire you back, "Nothing doing." They won't insure them at all.

Mr. BRIGGS. You don't believe they deserve the black eye they have received?

Mr. PENDLETON. No, sir; I don't, and I never shall.

Mr. BRIGGS. Are the insurance rates, the rates that you have to pay for insuring these vessels, much higher than what you have to pay for insuring steel vessels?

Mr. PENDLETON. Well, the rate is probably double on some cargoes. Of course, until their reputation is rehabilitated, as you might say, they will forbid them from carrying sugar, unless I wanted to take the risk on the whole cargo of sugar myself, and I don't know that I would want to take chances on that.

Mr. BRIGGS. They did carry sugar after the war, didn't they, between Cuba and the United States?

Mr. PENDLETON. Yes; there were a few of them did. There isn't any reason why they should not be able to carry it, because before 1890 practically 90 per cent of every pound of sugar that came into this country came in wooden vessels.

Mr. GREEN. These same vessels are carrying sugar from Hawaii, I think, on the Pacific coast.

Mr. PENDLETON. I think they did out there. There isn't any reason why they can not carry sugar. I delivered a cargo of phosphate rock the other day and the man said it was the best cargo he had ever had there. They didn't even have the sweat on the bottom of the vessel that the steel vessel ordinarily has.

Mr. BRIGGS. And this was a wooden ship?

Mr. PENDLETON. Yes, sir.

Mr. BRIGGS. One of the Shipping Board vessels?

Mr. PENDLETON. One of mine that I bought from the Shipping Board.

Mr. BRIGGS. Is it customary with reference to insurance rates applicable to wooden vessels to charge twice as much as they do for insurance in steel vessels?

Mr. PENDLETON. Yes, more. They will charge you all they can get. You see, we have so few insurance companies, and if a merchant has a policy in a certain company, if you want to take his business you must pay the rate that that company charges or reduce the freight rate so that he can make a profit by taking the ship. You have got to cut enough off the freight rate to equalize it with the steel vessels.

Mr. BRIGGS. Then it is not just simply because it is a Shipping Board wooden ship that the rate is double what it is in the steel boat, but it is because it is a wooden ship, is it not?

Mr. PENDLETON. It is because it is a wooden ship. The steel ship has much cheaper insurance.

Mr. BRIGGS. The same character of rates would be applied to a wooden ship built before the war as well as Shipping Board vessels, would it?

Mr. PENDLETON. Yes, sir; there isn't anything in that claim that these ships are poorer built, except that in some cases where Schwab rushed them so much in that July list when they launched 100 ships—there isn't anything in it that they are built poorer than they were before the war.

Mr. BRIGGS. Your idea is that there is the same amount of misinformation about the character and value of the wooden ship?

Mr. PENDLETON. My idea is that the wooden ship has been abused.

Mr. BRIGGS. The Shipping Board ships?

Mr. PENDLETON. Yes, sir.

Senator FLETCHER. May I ask, Does that difference in insurance rate apply both to the hull and cargo on wooden ships?

Mr. PENDLETON. I don't carry any insurance on anything I have in the world, on the hull.

Senator FLETCHER. You said that the rate on the wooden ship was about twice what it was on the steel ship, as I understood you.

Mr. PENDLETON. Yes, sir.

Senator FLETCHER. Does that apply on the hull and cargo?

Mr. PENDLETON. Oh, yes; certainly.

Mr. BRIGGS. Your idea then is, as I understand it, with reference to the wooden vessels, that they are an asset really instead of a liability?

Mr. PENDLETON. Well, if I had them I should not want to sink them. Of course, I might say, Mr. BRIGGS, that I am the only one perhaps around who you might get to say that. Perhaps I should say that.

Mr. BRIGGS. Why do you think you are the only one around that would say that?

Mr. PENDLETON. I don't know. I really don't.

Mr. BRIGGS. How long did you say you had been in the shipping business and operated wooden ships?

Mr. PENDLETON. Well, my people came over here in 1626, and they have been operating them ever since.

Mr. BRIGGS. Where are your people from, New England?

Mr. PENDLETON. Yes; I live on an old place down in Maine that has been in our family for 160 years, and five generations of shipmasters are buried there, and they have never—they used to be in the whaling business and fishery business, and since *Betsy Ross*, I might say, first hoisted the American flag, they never owned, managed, operated, or controlled a dollar in anything that was not under the American flag, and I guess we have owned more than any other concern in this country.

Mr. BRIGGS. Owned more what?

Mr. PENDLETON. More different vessels. I have owned myself 230 or 240.

Mr. BRIGGS. You know a ship, then, when you see it, a wooden ship?

Mr. PENDLETON. Well, I think I do.

Mr. BRIGGS. Mr. Pendleton, do you think there would be any market for these other wooden ships of the Shipping Board?

Mr. PENDLETON. No.

Mr. BRIGGS. Do you think there is any market for ships of any kind, steel or wood, now?

Mr. PENDLETON. Not much, not for five years.

Mr. BRIGGS. What do you think would be the effect if these ships were thrown upon the market to-day, all the ships the United States owns?

Mr. PENDLETON. You couldn't sell them. You couldn't give them away if you made the purchaser guarantee to run them, to operate them for five years; that is, start right out and operate them in the foreign trade.

Mr. BRIGGS. If they were just thrown on the market, and suppose some syndicate bought them?

Mr. PENDLETON. I don't believe you could get any syndicate to buy them. That is my view of it. In fact, I had suggested one time that the proper way, so that you gentlemen could all have the opportunity to bid and notify your constituents, would be to set these ships up, a certain number, 10 or 15—set them up here in the public hall right here in Washington and notify everybody to come there and bid, and sell them; when you said you were going to sell 15 or 20, sell them; then if they brought a very low price, everybody would be wanting to come to the next auction; therefore, you would get a chance to get some bidders; but where you put out bids and just say—just kind of go it blind—they merely put out feelers. I don't think that is the way to sell a ship.

Mr. BRIGGS. I want to ask you, do you believe with Mr. Raymond? He testified that about two years ago it would have been possible to have arranged a financial syndicate to have bought these ships of the Shipping Board that the United States Government owns, and that that, however, was not taken advantage of but he still thought that if legislation favorable enough were passed, another syndicate might be organized, a financial syndicate, a shipping syndicate.

Mr. PENDLETON. To buy these ships?

Mr. BRIGGS. Yes.

Mr. PENDLETON. Well, I can only answer that by saying that all of the trade of the world is employed now and ships are tied up; what would a man want to buy them for? What would a man want to buy ships for now? He couldn't keep them employed.

Mr. BRIGGS. I think Mr. Raymond testified that he thought if the ships were sold, more of them would have to be tied up than are tied up now.

Mr. PENDLETON. What would a man buy them for to tie them up? There is nobody charitable enough to do that.

Mr. BRIGGS. Well, I don't know. Do you think it might mean an advance in rates through agreement in any way or control of the shipping situation?

Mr. PENDLETON. My opinion is that the Government has got to back this proposition or you have lost the ships, and you have got to put them afloat and operate them regardless of price or profit; take the cargoes when they are offered, to at least 50 per cent of the commerce of this country; then after you drive the foreigner out you will establish your lines, you will build up your connections, you will be able to sell these ships to the men such as us fellows who don't want to go broke now; but when you sold ships to these fellows two or three years ago, as I stated in my statement, you would break every one of them, and there isn't one of them that isn't broke if he carried out his obligations to buy them at $150 or $200 a ton—not one.

Mr. BRIGGS. Are you familiar with the amendment here for continuing the trade route practically by the Shipping Board for another five years unless they can be sold sooner?

Mr. PENDLETON. No, sir.

Mr. BRIGGS. That was a proposed amendment offered here by the Mississippi Valley Association, the Central West Association, I think, and the South Atlantic and Gulf Associations.

Mr. PENDLETON. I have not seen that. Since the Parker bill of 1889, I have been coming down here, but this bill I have not prepared anything on it because I didn't much expect to say anything until I came in here day before yesterday to dictate that little statement yesterday to the stenographer.

Mr. BRIGGS. What do you think of that sort of an amendment, anyway?

Mr. PENDLETON. Keeping up the small ports in the South?

Mr. BRIGGS. Maintaining trade lines that are being carried on now by the Shipping Board.

Mr. PENDLETON. I think it should be done.

Mr. BRIGGS. For a period of five years, and give them time to organize to take over the lines and routes, if it is possible for them to do so?

Mr. PENDLETON. I think it should be done, and I think the Government is the only one that can do it. If you put it into private hands it will swamp anybody that goes into it, because the foreigner will be able to beat them out. If you give them ships to-day there isn't anybody in the South that can go down there and take a line and operate it successfully in competition with the foreigner for five years.

Mr. BRIGGS. In other words, you believe that the operations of the board ought to be continued for five years?

Mr. PENDLETON. I believe that if I owned every ship there is in the Government I would not sell them or try to sell them, and I would give out word that I was not going to sell them—more than a hundred of them. And if I advertised 20 ships I would sell them right here in Washington at auction so that every man could see what they brought and make him bid and put his voice against his brother in bidding them up. Then everybody sees what everybody is offering. You gentlemen can go down there and see what they are bidding for them and see whether you want to let them go or not after they sell 20, and you can stop it if you don't like it. I would like to see every Congressman agree to take one ship and get his constituents to go and bid. [Laughter.] You have got 225,000 people in your district; why not take one ship? That would get away with 500 of them.

* * * * * * *

Mr. BRIGGS. You don't believe in turning the ships loose at this time?

Mr. PENDLETON. I tell you, you can't sell them. There is no question about that. Disabuse your mind of the idea that you can sell these ships. Whenever they have sold 200 of them within two years you send to me for the best suit of clothes you can find in Washington and I will order it for you—in the next two years, regardless of whether you pass this bill or whether you don't. It will help some perhaps to pass the bill and I am in favor of it; I think it ought to be passed, but I don't see anything in the shipping situation except the coastwise trade, for the private shipowner for the next five years, and I am willing to forego my part of it as far as it goes in order that we can get established and then take the trade over.

Mr. BRIGGS. Is it your idea that the Shipping Board should put more ships into the service and operate them at even greater loss, unless they drove out competition wherever it might be?

Mr. PENDLETON. Until they are doing 50 per cent of our carrying, exports and imports in this country.

Mr. BRIGGS. I think the statement filed here the other day by the Shipping Board was that the United States is now carrying 51 per cent.

Mr. PENDLETON. That is tankers.

Mr. BRIGGS. That includes tankers, 51 per cent in American and 49 per cent in foreign vessels; that of tanker cargoes, 75 per cent was carried in American vessels and 25 per cent in foreign vessels.

Mr. PENDLETON. Yes, sir.

Mr. BRIGGS. And that of all cargoes, excluding tankers, 42 per cent was carried in American vessels and 58 per cent in foreign vessels.

Mr. PENDLETON. That has very recently gone up.

Mr. BRIGGS. That has just been brought down to date. The tables have just been furnished here, appearing on page 1747 of the record.

Mr. LISSNER. That is for 1921.

Mr. BRIGGS. Yes; water-borne commerce of the United States, 1921. That is what I say.

Mr. LISSNER. I thought you said that was up to date.

Mr. BRIGGS. Well, I meant for the annual returns for the year, the last year for which statistics were available.

Mr. LISSNER. Well, that is not at the present time. Those are not the figures now.

Mr. BRIGGS. Well, those are the last official statistics for the year. I judge it would be about 25 or 28 per cent at the present time. But this is a statement of the last official annual statistics.

Mr. LISSNER. But the proportion carried in American bottoms is very much less than that now, probably not over 32 per cent.

Mr. BRIGGS. So far as I recollect, Mr. Lissner, from the study that was filed here, it was stated to be 51.5 per cent in Mr. Lasker's statement, if I am not mistaken.

Mr. LISSNER. I think that included tankers.

Mr. BRIGGS. That makes no difference. That is the statement that was made.

Mr. LISSNER. The only point I am taking issue with is that that statement is not up to date.

Mr. BRIGGS. I think Senator FLETCHER or Mr. EDMONDS asked the Shipping Board to supply the data showing what percentage was being carried in American vessels, and Mr. Merrill furnished this table the other day, which was put in the record about three days ago. It is in volume 27. This is the very one, and I presume it was brought down to as late a date as he could get data.

Mr. LISSNER. We have been issuing statements every month from the Bureau of Research showing the proportion by months, and for the first several months of this year the percentages are very much less than those.

Mr. BRIGGS. I presume, Mr. Lissner, they fluctuate during the months.

Mr. LISSNER. They have been steadily going down.

Mr. BRIGGS. I presume they fluctuate during the month. The usual practice, I think, is to take the annual returns, the annual showing. I think that is the way the annual reports of the Government are gotten out, the statistics of foreign and domestic commerce, the statistical abstracts.

Mr. LISSNER. Well, I simply state, Mr. BRIGGS, that if you want the figures up to date you can have them. There has been a steady decline for the past year in the percentage of dry cargoes carried in American-flag ships in the foreign trade.

Mr. BRIGGS. I know, Mr. Lissner, but these are the figures that you furnished, that the Shipping Board furnished, only a few days ago. Of course, I understand that over 500 vessels, I think nearly all of the Shipping Board, have been put out of business since these were made up.

Mr. LISSNER. Because there wasn't any cargo for them to carry.

Mr. BRIGGS. I am not stating that, of course. There has been a great decline, a tremendous decline, in world trade everywhere. Of course, I am sure of that.

I will ask you, Mr. Pendleton, how much you think the Shipping Board or the Government ought to lose in that business?

Mr. PENDLETON. I don't think they will lose anything when they operate the ships. I think every dollar of freight rate that they make is a gain to the country, and for that reason I would keep the ships in business until they were doing 50 to 60 per cent, regardless of what the freight rates were. I would do that amount of business.

Mr. BRIGGS. You mean regardless of how much they lost?

Mr. PENDLETON. Regardless of how much they lost. But personally I don't consider they would be losing anything.

APPENDIX B—INSURANCE.

[Excerpt from article appearing in Pacific Ports, issue of October, 1921, p. 73.]

THE FUTURE OF AMERICAN MARINE INSURANCE.

(Future is giving concern to those appreciating importance of development of insurance business as aiding extension of foreign trade. Urgent need for a strong home market. Ramifications of marine insurance explained.)

(By J. Arthur Bogardus, lecturer on marine insurance, New York University.)

The outlook for the future of American marine insurance is giving grave concern to those in the United States who are sufficiently well versed in foreign trade matters to realize that American marine insurance is absolutely essential to the establishment of a permanent American merchant marine and the fostering of American foreign trade.

[Excerpt from article appearing in Pacific Ports, issue of December, 1921, p. 72.]

UNITED STATES MARINE INSURANCE LINKED WITH MERCHANT MARINE.

Future of American underwriters depends in large measure on future of country as a maritime power. While there have been many withdrawals from the insurance market during the past three years, the capacity of market is much greater than in pre-war times.

(By J. Arthur Bogardus, lecturer on marine insurance, New York University.)

* * * * * * *

As a matter of fact, in analyzing the status of marine insurance in the United States as it existed at the end of 1918 the congressional Committee on Merchant Marine and Fisheries reported a condition which was startling to those who had been led to believe that the American marine insurance interests were fast approaching a position of national independence in so far as concerned the taking care of the requirements of American trade. The following excerpt from the report of this committee will serve to summarize its findings:

AMERICANS LOSE GRIP.

"In view of the strategic importance of marine insurance in the upbuilding of foreign trade and a merchant marine, your committee regrets to report that American interests have largely lost their grip on this type of underwriting. Probably no other vital branch of American commerce has passed so extensively under foreign control."

* * * * * * *

[Excerpt from marine insurance hearings before the Subcommittee on the Merchant Marine and Fisheries, House of Representatives, Sixty-sixth Congress, first session, July 9, 16, 17, and September 25, 1919, p. 70.]

UNITED STATES SHIPPING BOARD
EMERGENCY FLEET CORPORATION,
DIVISION OF INSURANCE,
Washington, July 17, 1919.

Hon. FREDERICK R. LEHLBACH,
Chairman Subcommittee of Committee on the Merchant Marine and Fisheries, House of Representatives, Washington, D. C.

SIR: Referring to my testimony before your committee on the 9th instant and your request for a list of losses for which the insurance fund of the United States Shipping Board Emergency Fleet Corpora-

tion is liable, I hand you the attached. This list shows the accidents, grouped as follows:

	Estimated.		Paid.	
	Marine.	War.	Marine.	War.
Collisions	$1,215,690.00	$60,000.00	$47,676.66	
Strandings	4,319,370.00			
Machinery damage	572,400.00			
Steering-gear trouble	325,800.00		1,539.38	
Heavy weather	522,400.00		1,546.76	$65.00
Fire	980,000.00		1,071.50	
Serious leaks	120,000.00		70,000.00	
Total loss	1,749,750.00	1,870,000.00	2,311,167.11	8,038,406.74
Miscellaneous	174,300.00	175,000.00	1,071.50	
Total	9,979,710.00	2,105,000.00	2,434,072.91	8,038,471.74

* * * * * * *

Yours very truly,

B. K. OGDEN,
Acting Director of Insurance.

[Excerpt from article appearing in "Business Digest and Investment Weekly," vol. 25, January–July, 1920, p. 359.]

FOREIGN TRADE—THE STATUS OF AMERICAN MARINE INSURANCE—AT PRESENT ONLY 63 DIRECT WRITING AMERICAN COMPANIES ARE PARTICIPATING IN OCEAN MARINE INSURANCE.

* * * * * * *

American companies transacted only a little over 50 per cent of the business, and the trend seems to be more and more in the direction of foreign-controlled companies.

Marine risks written and renewed during 1918 by all companies, domestic and foreign, operating in the United States, amounted to $71,258,305,186. This total was arrived at after making an approximate deduction for motor vehicle, tourist baggage, and registered-mail insurance on the basis of premium income received from these sources as compared with the total premium on all "marine and inland" business. This process, it is conceded, is somewhat subject to criticism, but premium figures constituted the only data available, and in any case one uniform plan for making the deduction was applied to all companies. Of the foregoing total branch offices of admitted foreign companies wrote or received $38,613,473,250, or 13 per cent, and other American companies $23,400,821,248, or 32.8 per cent.

[Excerpt from "Marine Insurance in the United States," pp. 265, 266.]

(By Solomon Huebner, University of Pennsylvania.)

[Reprinted from the annals of the American Academy of Political and Social Science, vol. 26, September, 1905.]

THE BUSINESS OF THE PRINCIPAL AMERICAN COMPANIES.

In the United States the marine insurance business which is not written by foreign underwriters is controlled mainly by seven domestic companies. According to the State insurance reports these companies are doing a prosperous business, each collecting over $400,000 of marine premiums annually. Collectively they received, according to the last reports available, $8,608,672, or eight-tenths of the total net marine premiums collected by American companies; possessed assets of $40,782,058, and carried marine risks aggregating $2,323,000,000. But only one of these companies, the Atlantic Mutual of New York, depends solely upon its marine and inland business, its premium receipts amounting to $3,013,944, its marine losses to $1,142,302, and its admitted assets $12,025,021. The other six companies, considered collectively, depend principally upon a fire insurance business, their fire premiums amounting to $15,039,227, as compared with $5,594,728 for marine premiums, thus constituting nearly three-fourths of their total premium income.

THE BUSINESS OF DOMESTIC AND FOREIGN COMPANIES IN THE UNITED STATES COMPARED.

The extent to which foreign companies have acquired control of marine insurance in the United States becomes especially clear if one examines the annual financial reports of the various companies. If a compilation is made of the statistics as found in these reports it will appear that for the year 1903 the total net marine risks assumed by all the foreign and domestic companies operating in the United States aggregated approximately $6,877,006,221, the net premiums received nearly $18,000,000, and the admitted assets $112,912,000. Of these amounts, the American branches of the 20 leading foreign companies—to say nothing of the large number of foreign companies operating on the Pacific coast—wrote $3,723,000,000 of the risks, or 54 per cent of the total, received $7,160,335 of the net premiums, but possess only $21,733,958, or less than one-fourth of the admitted assets. Most of these foreign companies also confine themselves solely to the writing of marine risks, only 6 of the above 20 companies transacting a fire business in addition to their marine business.

[Excerpts from Report on Status of Marine Insurance in the United States, p. 18.]

(By S. S. Huebner, expert in insurance to the United States Shipping Board and the Committee on the Merchant Marine and Fisheries, including the recommendations of the Subcommittee on the Merchant Marine and Fisheries.)

(Approved by the Committee on the Merchant Marine and Fisheries, February 26, 1920.)

VOLUME OF MARINE INSURANCE WRITTEN.

Marine risks written and renewed during 1918 by all companies, domestic and foreign, operating within the United States, amounted to $66,080,295,960. This total was arrived at after making an approximate deduction for motor-vehicle, tourist-baggage, and registered-mail insurance on the basis of premium income received from these sources as compared with the total premium income on all "marine and inland" business. This method, it is conceded, is somewhat subject to criticism, but premium figures constituted the only data available, and, in any case, one uniform plan for making the deduction was applied to all companies. Of the foregoing total, branch offices of admitted foreign companies wrote or renewed $38,613,473,250, or 58.4 per cent; American companies controlled abroad, through stock ownership, $3,275,101,386, or 5 per cent; and other American companies $24,191,720,525, or 36.6 per cent.

After deducting motor-vehicle, tourist-baggage, and registered-mail premiums, the net marine premiums of all American and foreign companies operating in the United States aggregated $109,729,041 for 1918. Of this total, branch offices of admitted foreign companies received $39,437,387, or 35.9 per cent; American companies controlled abroad, through stock ownership, $1,555,128, or 1.4 per cent; and all other American companies $68,736,526, or 62.7 per cent. Similar compilations were made as regards both net premiums and risks for the years 1917 and 1918.

(P. 25.)

DISTRIBUTION OF BUSINESS BETWEEN AMERICAN AND FOREIGN COMPANIES.

As pointed out in the previous chapter, total marine-insurance risks written and renewed during 1918, by all companies, domestic and foreign, operating in the United States amounted to $66,080,295,060, after making an approximate deduction from the published "marine and inland" figures for motor-vehicle, tourist-baggage, and registered-mail insurance. Total net marine premium income, after making a similar deduction, aggregated $109,729,041. Presented in tabular form, and including only American companies composing groups 1 and 2—referred to above—the extent of foreign control as regards the above totals may be indicated as follows:

	Risks written and renewed.		Net marine premiums.	
	Amount.	Percentage of total.	Amount.	Percentage of total.
United States branch office	$38,613,473,250	58.4	$39,437,387	35.9
Companies comprising Group 1	3,275,101,386	5.0	1,555,128	1.4
Companies comprising Group 2	586,103,138	.9	1,176,489	1.0
Total	42,474,677,774	64.3	42,169,004	38.3

(P. 64.)

CONSTRUCTION AND TYPE OF VESSEL—PURPOSE OF CLASSIFICATION SOCIETIES.

As a convenient means of giving such information to underwriters and shippers, various so-called classification societies have been organized for the purpose of promulgating rules for the construction of vessels, of supervising such construction, assigning a "class" to each vessel, and publishing books containing a detailed and classified description of the most essential features of all vessels coming within their jurisdiction. Although classification is entirely optional, vessel owners would find it so difficult to obtain insurance and would meet with so many obstacles in soliciting freight to best advantage that few care not to have their vessels listed in the publications of some one of the leading societies as having been classed by it. Classification means that the vessel was designed and constructed under the supervision and according to the standards of the society. Following the completion of the vessel, surveyors of the society examine the work. If all is found satisfactory as to structural plan, materials, and machinery, the vessel will be assigned to a class, subject to the understanding, however, that periodical surveys and necessary repairs shall be made as the society may direct.

MOST IMPORTANT CLASSIFICATION SOCIETIES.

The most important classification record, and also the first historically, is Lloyd's Register of British and Foreign Shipping. While issued originally by London Lloyd's, this publication is controlled at present by an organization managed by underwriters, merchants, and vessel owners and builders, and is entirely distinct from London Lloyd's. According to advices, however, underwriters assume the dominant rôle in the management of the organization. The publication is designed to indicate the general character of all vessels in the British marine of not less than 100 tons, besides numerous vessels in foreign fleets.

[Excerpt from article appearing in the Economic World, issue of February 19, 1921, pages 278–279.]

FIRST OFFICIAL REPORTS ON THE OPERATIONS OF THE AMERICAN MARINE INSURANCE SYNDICATES.

The three American marine-insurance syndicates which were organized last summer for the purpose of providing the shipping and the foreign trade of the United States with ample marine-insurance facilities recently completed the first six months of their activities, and at a general meeting of the subscribers, held in New York City on January 26, brief reports were submitted on behalf of the management of the syndicates, showing what had been accomplished to the end of 1920. The three reports follow:

I. REPORT OF SYNDICATE "A."

(By C. R. Page, manager.)

From an informal report which has already been in your hands, you will have seen that Syndicate "A" has up to date perfected its organization along the Atlantic and Gulf coasts by the creation of several districts, which have their headquarters in the principal cities. * * *

The surveyors in our service are men of experience in the field of hull work, general machinery, boilers and turbines, and offer, on the whole, excellent material to be educated into thoroughly reliable and competent underwriters' surveyors.

Up to date we have been most fortunate in the hearty cooperation and support of the Division of Construction and Repairs of the United States Shipping Board, and this joint action has, we feel, produced excellent results for both the Shipping Board and the underwriters' interests generally.

The beneficial effects of the policy of calling for competitive bids wherever practicable is reflected in much more advantageous prices having been obtained than have recently prevailed.

* * * * * * *

In the early activities of the syndicate the greatest attention has been paid to this question of repair costs, because here the need seemed to be the greatest. Inspection has, however, also received attention.

That phase of our contractual obligation to the Shipping Board to periodically inspect its own vessels has been carried out, not by our own organization but by the United States Bureau of Survey (Martin and Gardner), under an arrangement tentatively accepted by both parties, subject to the approval of the Shipping Board, which, however, has not yet been given. Acting under this arrangement, the bureau has made some 1,800 surveys, 1,400 of which represent the No. 1 survey and 400 the No. 2. The reports are comprehensive and contain much information and are open to your inspection.

As to risks offered to or accepted by the syndicate, our own surveyors are undertaking inspections, both as to condition of maintenance and repair and as to loading. * * *

The establishment of foreign agencies is also having our attention, although this phase of development has frankly been subordinated to the handling of the immediate damage-repair problem at home and little progress in respect of the former has been made. * * *

Our contact with the various problems of to-day leaves one outstanding impression, which is an appreciation of the extraordinary opportunity which is now afforded to American underwriters to wield a powerful influence in the control of both repair and salvage costs. If, however, this opportunity is to be fully availed of, Syndicate "A" must have the complete and hearty cooperation of all the underwriters, not alone as members of the syndicate but in respect of the damage repairs in which they, as underwriters outside the group, are interested.

* * * * * * *

Already the syndicate has the full and hearty support of the Division of Insurance of the United States Shipping Board and is actively cooperating with the Division of Construction and Repairs, and is, therefore, because of the requirements of the Shipping Board as the largest operator in the ship-repair market, in daily and close contact with the situation, and is, accordingly, in a position, we feel, to not only ask but warrant your complete support. Without the support of the underwriting community the effort we are making will undoubtedly fail to yield anything of permanent advantage, and thus what is an extraordinary opportunity will be lost.

II. REPORT OF SYNDICATE "B."

(By Lawrence J. Brengle, chief underwriter.)

I think it will be of interest to the subscribers to know the amount of premiums which have been written to date.

SYNDICATE B.

The net premium is	$1,123,026.35
Estimated losses	125,000.00
Of which the earned premium as of Dec. 10, 1920, is	188,239.63
Estimated losses as of Dec. 10, 1920	95,000.00

SYNDICATE C.

The net premium is	3,321,596.21
Estimated losses	500,000.00
Of which the earned premium as of Dec. 10, 1920, is	617,216.17
Estimated losses as of Dec. 10, 1920	400,000.00

In connection with the premium we shortly expect to make a further payment to the underwriters which will bring the matter practically up to date. I would also like to say that during the past three or four months our work has been largely constructive; we have had a good many obstacles to overcome, due to a standardized system which it has been necessary to educate people up to, and our work has in consequence been necessarily slow. The brokers have met the syndicate with a great deal of favor and I think the future outlook is very bright.

* * * * * * *

III. REPORT OF SYNDICATE "C" COMMITTEE.

(By Walter Wood Parons, William H. McGee, and Hendon Chubb.)

The managers feel that the members of the syndicate should have a clear idea as to exactly how rates of Syndicate "C" are named, as well as the policies which have governed the managers in making those rates; and it is for this purpose that this report is submitted.

The board of managers have delegated the rate-making power as regards Syndicate "C" to a rate committee. The rate committee consists of all the managers of Syndicate "C," and it holds regular weekly meetings at the syndicate rooms at 11 o'clock every Wednesday. It only differs from the managers' meeting in that two members constitute a quorum. At those meetings it is customary for the committee to consider all fleets or vessels which have been submitted to the underwriter prior to noon of the Tuesday preceding it. In each case it is the endeavor to name rates and terms at that meeting for all the fleets coming before them.

* * * * * * *

It has also been the custom to have the broker personally present his ideas to the committee, and in many instances the owner or his representative has also appeared before the committee.

In arriving at rates for a fleet the rate committee have felt that careful consideration should be given to the record of the owners of the fleet or vessel, where the owner has had a managing experience of three years or more. In this respect the rating for Syndicate "C" must proceed on a very different basis from the rating made on vessels of Syndicate "B." In Syndicate "B" most of the vessels are in the hands of new owners, and until their efficiency or inefficiency has been demonstrated it is necessary to arrive at an average rate to apply to all these vessels; but in the case of Syndicate "C" most of the vessels belong to the owners who have had long experience, and where the results of such experience are available to underwriters this has been taken as an important factor in arriving at the rates asked for.

In all cases the rate committee have also given their careful consideration to the value per ton, as it is recognized that in most cases the cost of repairs depends more upon the tonnage of the vessel than it does upon the insured value, and that any low per ton insured value must be compensated for by a corresponding advance in rates.

In short, the factors which have guided the committee in making rates have been: Record of owners, type and age of vessel, trade engaged in, and value per ton; and in each case the underwriter prepared for the consideration of the committee all available data bearing upon these considerations, together with a record or previous syndicate quotations on vessels of like general character.

—

UNITED STATES SHIPPING BOARD,
Washington, March 22, 1922.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

MY DEAR SENATOR: Replying to your favor of the 7th instant, permit me to say that I took up with my colleague, Commissioner Lissner, under whom matters of insurance have been placed by the board, the subject matter of your letter, and I am inclosing you herewith a copy of his letter to me, answering as far as it is possible to do the questions propounded in your letter.

I will be glad at any time to give you any information in my power.

Yours very sincerely,

GEO. E. CHAMBERLAIN.

—

(Memorandum from Commissioner Lissner to Commissioner Chamberlain in re letter from Senator FLETCHER, dated March 7, 1922.)

MARCH 21, 1922.

Referring to Senator FLETCHER'S letter to you of the 7th instant, making certain inquiries with regard to insurance matters, I am informed by Mr. Ogden, manager of our marine insurance department, as follows:

"It is extremely difficult to answer the questions asked with any degree of accuracy. The latest figures we have, those for the year 1919, show that $88,266,387 is the estimated premium paid to American insurance companies for insurance on American vessels and their cargoes. There are not even any estimated figures for the amount of American insurance placed directly with foreign companies.

Recent figures of Shipping Board operations indicate that insurance is less than 5 per cent of the total operating cost. This is based on extremely low estimates for the insurance, and it is believed that with the cost of commercial insurance the percentage would be as high as 6 or 7 per cent.

It is impossible to give the existing insurance rates, for on cargo they vary from one-twentieth of 1 per cent to 2 or 3 per cent, depending on the merchandise and the voyage. The rates on steamers for annual insurance vary from, say, 3 to 7 per cent.

The proportion of insurance on American vessels and cargoes placed with foreign insurance companies is about 65 per cent of the entire amount. The insurance of cargo is divided about equally between the American and foreign markets, while considerably more hull insurance is placed abroad than in the local markets. The proportion of the hull insurance placed abroad is gradually being reduced.

I believe that practically all American-flag ships, with the exception of those owned by the Government, are classified in Lloyd's Register. I have recently heard representative American underwriters say that it made very little difference to them whether a ship was classified in Lloyd's Register or in the American bureau. However, it does make a difference when arranging either hull or cargo insurance with foreign underwriters, and I think I am correct in saying that as a whole it means more to have a vessel classified by Lloyd's Register than it does to have her classified in the American bureau."

If I can be of any further assistance, please let me know.

MEYER LISSNER, *Commissioner.*

APPENDIX D.

[Excerpt from the American Economist, June 9, 1922.]

SHIP SUBSIDY THREATENED WITH DEFEAT.

If one is to believe the portentous misgivings finding their way into print, emanating from Washington, and said to have originated in the White House, there is anything but plain sailing for the ship subsidy bill framed with such care by the Shipping Board, and so generously fathered by the chairmen of the two committees of Congress that deal with shipping matters. It is declared that if the ship subsidy bill is defeated President Harding will abolish the Shipping Board. It is announced, seemingly authoritatively, that if the ship subsidy bill is not passed by Congress Chairman Lasker, admittedly "the wheel horse for ship-subsidy legislation," will get out of the Shipping Board in disgust. It is even stated (in New York Journal of Commerce's special Washington dispatches) that the President has "to-day (June 2) served notice of his intention to shift the responsibility of finding a solution for the merchant marine problem from the Shipping Board to the leaders in Congress, unless they are willing to accept the advice and recommendations of those charged with the responsibility."

Congress, surely, still possesses the right to initiate legislation and to send it to the President for his approval or veto, and to enact it over the President's veto if such be the will of two-thirds of the Members of each branch of Congress. That this is what the Constitution provides may be forgotten at times by some, but it is never forgotten by the Federal courts. If the President sees fit to "shift the responsibility of finding a solution for the merchant marine problem from the Shipping Board to the leaders in Congress," those same leaders in Congress may prove themselves equal to the task. In fact, if the cooperation of the President had been extended to a provision of a law approved on June 5, 1920, known as the Jones Merchant Marine Act, it would have been "infinitely cheaper" thus to have protected our merchant marine, according to the sworn testimony of the chairman of the Shipping Board himself.

The reason that Congress appears to balk at the passage of the ship subsidy bill, if it is true that it is balking, is because of the huge expense involved, upward of $50,000,000 a year when the bill is in full force as law. Senators and Representatives seeking reelection this fall dread to face their constituents if by their votes they have added this vast additional tax to the already heavily burdened taxpayers. When it becomes better realized, as it is apt to be both by Members of Congress and the press of the country, that at no expense whatever to the National Treasury our shipping in foreign trade could be developed to the point of profitably competing with foreign ships, through the same form of protection that is extended to all other products of the United States requiring protection—that is to say, the tariff—but that it was deemed wiser to go about it by taking from the National Treasury $50,000,000 a year for such protection, the taxpayers are very apt indeed to say that the tariff protection is the better. When to that is added the fact that, previous to the Civil War, our ships in foreign trade were protected through the tariff and at no expense to the National Treasury, and that it was the most successful and prosperous marine we ever possessed, a marine that for 72 years carried an average of 80 per cent of our entire foreign commerce, the taxpayers will be apt to say that a policy that history has proven to have been so efficacious as that should be equally effective now.

It was thought that the subsidy way would be "the easier way" of protecting our shipping in foreign trade, because the old successful way involves the modification—not the abrogation, termination, or cancellation, remember—of a number of terminable trade treaties and conventions now in force. By "easier way" was meant a way that would not be so apt to arouse our foreign rivals to drastic retaliatory enactments, but these are threatened, just the same, by our British

rivals, the very ones we have been so solicitous of appeasing. They profess to see no difference between the tariff and the subsidy protection of American ships, if the result is to deprive British ships of a large part of their ocean carrying, the inevitable result of the success of the subsidy policy. But mid-western voters see a vast difference between taking $50,000,000 a year out of the National Treasury and leaving it there, and adding to it, such as would be the case if the pre-Civil War time shipping policy were readopted.

As we expected, the ship subsidy bill is entering upon parlous times.

APPENDIX E.

[From the Gulf Ports Magazine, June, 1922.]

UNITED STATES SHIPPING BOARD COMPLETES WORLD'S GREATEST SHIPBUILDING PROGRAM.

THE SHIPPING BOARD'S OWN REPORT ON THE FINISHED PROGRAM.

When the Bethlehem Shipbuilding Corporation (Ltd.), Sparrows Point, Md., delivered to the Emergency Fleet Corporation, May 9, to be operated by the Munson Line in the South American service, the new "535" passenger and cargo steamer *Western World*, the greatest shipbuilding program in the history of nations was completed.

From May 24, 1917, when the wood cargo carrier *North Bend*, the first vessel to be built under war-time contracts, was turned over to the Government by Kruse & Banks, North Bend, Oreg., to May 9, 1922, the United States Shipping Board constructed 2,312 vessels of various types of 13,636,711 dead-weight tons. To-day, more than 1,000 of these vessels are laid up, due to the depressing conditions of the world's markets, as well as to the inability of the American operator to compete with his foreign competitors from the standpoint of expenses.

The vessels built during and after the war consisted of requisitioned and contract steel cargo carriers, tankers, refrigerator, transport, collier, and combined passenger and cargo carriers; contract wood cargo carriers, barges, tankers, finished hulls, and sailing vessels; contract composite cargo carriers; contract concrete cargo carriers and tankers; steel and wood ocean tugs; and steel and wood harbor tugs.

The building of this gigantic fleet was not confined entirely to the United States, Japan constructing 30 steel cargo carriers of 243,290 dead-weight tons and China 4 steel cargo carriers of 40,000 dead-weight tons.

Prior to the entrance of the United States into the war, the maximum yearly output of ships in this country was in the year 1908, when 1,457 vessels of 921,324 dead-weight tons, including all vessels of 5 net tons and over, were built; of steamships alone the total was 722,436 dead-weight tons.

The *North Bend*, heretofore mentioned, was the first wood vessel to be turned over to the Government. The first requisitioned steel cargo carrier, the *Limoges*, was delivered August 30, 1917, by the Toledo Shipbuilding Co., Toledo, Ohio, and the first contract steel cargo carrier was the *Seattle*, later changed to the *Western Hero*, which was delivered January 10, 1918, by the Skinner & Eddy plant, at Seattle, Wash.

Considering ocean-going vessels, the output for the month of September, 1919, 150 vessels of 810,386 dead-weight tons, greatly exceeded the maximum pre-war deliveries for the entire year. Compared with the average annual construction of 476,092 dead-weight tons, from 1890 to 1916, inclusive, the contrast is more striking.

The original program called for 3,270 ships of 18,407,276 dead-weight tons. After the armistice all construction was canceled, thus reducing the program by 958 ships of 4,770,565 dead-weight tons, which represented approximately 50 per cent of all vessels that had not reached a degree of completion of 85 to 90 per cent, and more than one-half of the vessels yet to be launched.

On August 3, 1917, 431 vessels under construction in shipyards throughout the United States were requisitioned by the Government. Thirteen of the number were released, before completion, to former owners; 22 were canceled; and the status of 12 changed from requisition to contract vessels, thereby leaving a total of 384 requisitioned vessels on the active construction program of the corporation.

The wood-ship program of the corporation had reached a total of 1,017 vessels of various types at the time construction was curtailed. Of this number 428 were subsequently canceled, 474 were completed, and 115 partially completed.

When the Emergency Fleet Corporation adopted the plan of building fabricated ships and awarded contracts for a total of 390 vessels, representing 2,675,000 dead-weight tons, doubt was expressed in some quarters as to the success of this type of construction, which was a radical change from the accepted methods. It was recognized, however, that by having the hull steel fabricated at the bridge and structural shops throughout the country and then assembled at the shipyards, a considerable expansion of the shipbuilding industry was possible.

Many of these vessels have been in continuous service for a long time, and the results show that they have proved equally as serviceable as others of the fleet, and their utility as cargo carriers has been established. The use of standard parts in the construction of these vessels has simplified the problem of repairs, whether of a minor nature or extensive in scope.

During the fiscal year ending June 30, 1921, 218 ships of 1,737,550 dead-weight tonnage were delivered by the Construction Department of the Division of Construction and Repairs. This tonnage was but 30.5 per cent of that delivered during the previous fiscal year, showing the rapidity with which the construction program was curtailed. On July 1, 1921, a few days after the new Shipping Board came into office, there remained to be constructed but 24 steel contract vessels, totaling 276,800 dead-weight tons. All requisitioned steel, contract wood, and concrete vessels were completed before the end of the fiscal year 1921, and contract composite vessels during the previous fiscal year.

Of the 204 shipyards formerly engaged in ship construction for the Emergency Fleet Corporation, all but 7 in the United States and the yard in China, made their final delivery by the end of June, 1921.

To the Atlantic coast goes the distinction of having turned out the greatest number of ships and the greatest amount of tonnage. On this coast were built 848 vessels of 5,625,188 dead-weight tons. The Pacific coast was second, with 759 vessels of 5,254,150 dead-weight tons. The Great Lakes district was third, with 479 vessels of 1,625,000 dead-weight tons. The Gulf was fourth, with 192 vessels of 849,100 dead-weight tons.

The Philadelphia section is awarded the honors for turning out the greatest number of vessels and tonnage, the grand total being 329 vessels of 2,662,030 dead-weight tons.

San Francisco was second, with a grand total of 241 vessels of 2,051,500 dead-weight tons.

Seattle with third, with 305 vessels of 2,010,350 dead-weight tons.

Portland, Oreg., was fourth, with 213 vessels of 1,192,650 dead-weight tons.

If all the vessels on the program were placed in a straight line, stem to stern, they would extend for a distance of 158 miles, and if steaming a mile and a quarter apart would reach from New York to Southampton, England.

The total dead-weight tonnage is equal to the carrying capacity of 388,363 freight cars loaded 35 tons per car. As there are approximately 2,800,000 freight cars in the United States nearly one-seventh of them would be required to equal the carrying capacity of the vessels.

A total of 4,593,000 horsepower is generated by the propelling machinery.

For the transportation of the hull steel alone, 115,000 flat cars would be required.

For manufacturing the rivets used, a rod of steel three-fourths of an inch in diameter and 37,500 miles long would be necessary. This rod would extend once around the earth, at the Equator, and sufficient would remain to make a three-strand fence from New York to San Francisco.

At the height of the shipbuilding program 218 yards were constructing ships, of which 80 were building steel vessels, 131 had wood and composite ship contracts, and 7 were working on concrete steamers.

While the expenditures for all plant construction, including the yards owned entirely by the corporation, were less than 6 per cent of the cost of the ships, 179 yards, including installation plants, were given financial assistance for plant construction.

It was necessary, in carrying out this stupendous project, to build 13 marine railways, 17 floating docks, and 2 graving docks, as auxiliaries.

At the beginning of the program there was a nucleus of 50,000 first-class mechanics in our shipbuilding industry, and with the assistance of the Emergency Fleet Corporation this number was expanded to 385,000 men, who received a training either directly or indirectly and became proficient in the trade employed in the building of ships.

For purposes of comparison, the total number of ships built in 1900 was 1,447, of 590,685 dead-weight tons. In 1919 the total number of ships completed was 1,953, of 4,989,931 dead-weight tons.

The effect of the shipbuilding program upon our shipping is clearly shown in our increased share of the carrying trade of the world. In 1914 commodities to the value of $368,359,756 were carried in our own ships, representing 9.7 per cent of our water-borne foreign trade. In the fiscal year beginning June 30, 1920, this percentage was increased to 44.8 per cent, and the value of the imports and exports carried in American bottoms amounted to $5,071,905,981. This exceeds by far the total value of our water-borne foreign trade in 1914, representing $3,785,468,512. An industry of immense proportions was therefore established and can be reestablished only by means of Government aid.

The activities of the United States Shipping Board and its agencies have been as wide in scope as the commerce of the whole world. It contracted for the purchase of ships under various types of purchase contracts. In the performance of these contracts it became a coworker in the building of ships. It undertook the duties and responsibilities of a banker and became a party to the financing of the shipbuilding program. It became a general contractor and assisted in providing greater shipbuilding facilities. It became a manufacturer and undertook to increase the output of ship equipment. It became a lumber merchant and acquired timber forests. It became an insurance company and sold protection against insurable losses. It entered transportation fields and built and operated street railways. It built and operated hotels for housing workmen; it built homes for the families of workmen and in so doing created townships with paving, water, gas, sewers, moving-picture theaters, hospitals, and all the necessities and conveniences of municipal life.

Vessels delivered.

Total construction program	2,312	13,636,711

Construction cost of the Shipping Board's passenger fleet.

On May 15 the United States Shipping Board made public a summary of construction costs on the 23 "State" boats, compiled as of May 10, 1922:

New name.	Old name.	Length-B. P.	Builder.	Cost.
		Feet.		
President Van Buren	Old North State	502	New York Shipbuilding Co.	$4,084,695.58
President Hayes	Creole State	502	.....do	4,085,573.61
President Polk	Granite State	502	.....do	4,086,027.46
President Monroe	Pan Handle State	502	.....do	4,085,516.44
President Harrison	Wolverine State	502	.....do	4,085,889.93
President Adams	Centennial State	502	.....do	4,088,466.49

Construction cost of the Shipping Board's passenger fleet—Continued.

New name.	Old name.	Length-B. P.	Builder.	Cost.
		Feet.		
President Garfield	Blue Hen State	502	New York Shipbuilding Co.	$4,088,274.71
President Madison	Bay State	518	.....do	5,887,111.73
President Pierce	Peninsular State	518	.....do	5,887,111.78
President McKinley	Keystone State	518	.....do	7,041,552.23
President Wilson	Empire State	518	.....do	7,041,551.44
President Taft	Lone Star State	518	.....do	7,016,112.64
President Lincoln	Hoosier State	518	.....do	7,008,964.80
President Cleveland	Hawkeye State	518	Bethlehem Shipbuilding Corporation.	6,664,521.20
President Roosevelt	Buckeye State	518	.....do	5,992,652.65
President Grant	Pine Tree State	518	.....do	5,494,496.20
Pan America	Palmetto State	518	.....do	5,318,138.24
Western World	Nutmeg State	518	.....do	4,023,107.47
American Legion	Badger State	518	New York Shipbuilding Co.	7,309,189.37
Southern Cross	Gopher State	518	.....do	7,302,848.15
President Jefferson	Beaver State	518	.....do	7,517,318.15
President Taylor	Golden State	518	Newport News Shipbuilding Co.	2,291,944.92
President Jackson	Silver State	518	.....do	6,353,232.06
				130,554,297.28

The above figures represent the total construction costs as reflected by the books of the home office to date. While they are not to be regarded as final, it is not believed that they will be increased by any great amount.

APPENDIX F.

[Excerpt from the Nation, July 5, 1922.]

SHOVELING MONEY INTO THE SEA.

We can not agree with those who think that in consequence of recent events the ship subsidy bill is already beaten. The New York Times, for instance, says that the decision of the House not to consider the measure until after the summer recess means that no action can be taken at this session, and it quotes President Harding himself as saying that there will not be time to consider the bill at next winter's short session. But, unlike the tariff, the ship-subsidy measure requires no discussion of detailed and lengthy schedules, while President Harding's remark was intended merely as a spur to Congress. He will not repeat it if the winter session comes without the ship-subsidy plan having been disposed of. More damaging to subsidy than delay, probably, is the controversy over the sale of liquor on Shipping Board vessels. Between these two handicaps the subvention plan is certainly confronted with a hard fight, but to call it already beaten is to lose sight of the fact that virtually all the organization and a large part of the propaganda is on the side of subsidy.

It is announced, for instance, that the chairman of the Shipping Board will take the stump for the measure. The announcement is superfluous, since Mr. Lasker has been on the stump in one guise or another for the past several months, scarcely leaving it except for meals. Indeed one of the worst features of the subsidy movement is the way in which an administrative body like the Shipping Board has been distorted into a publicity agency and is spending taxpayers' money to further the fortunes of its personnel. Mr. Lasker said before a congressional committee last summer, "I am not an expert in shipping, but I take a little pride in being an expert in publicity." He has proved both contentions.

As the Nation has pointed out before, if there could be any justification for ship subsidy, it would be on the ground that it would maintain a national merchant marine manned by American sailors and so keep up our traditions as a seafaring people. The present bill does not give the slightest consideration to this aspect, while the Shipping Board, by assisting in the cutting of wages, has been the chief influence in dispersing the fine body of American seamen that we got together during the war.

Even if the country were to grant the legitimacy of taxing the public as a whole to maintain an industry which can not pay its own way, the present ship subsidy bill is indefensible and dangerous. More than the pending tariff, it provides for extraordinary administrative powers, capable of all manner of favoritism and abuse. No shipowner can claim a penny of subsidy as a right under the law. The Shipping Board has authority on its own fiat to deny any subsidy at all or to increase the rates stated in the bill up to 100 per cent. A representative of the Shipping Board has admitted that in the case of the *Leviathan*, for instance, the board would be able under the bill to refuse the owner a penny or two award him as much as $1,800,000 a year. The bill provides that 10 per cent of our customs revenue and various other funds shall automatically go for ship subsidies without appropriation by Congress. Mr. Lasker estimates these at $52,125,000 a year, but Representative DAVIS of Tennessee puts the amount as possibly $75,000,000. If that is true, the Shipping Board is handed a blank check by Congress, told to fill it in to any amount up to $75,000,000, and allowed to expend the money on whoever it likes.

Mr. Lasker has based his appeal for ship subsidy largely on the argument that it would enable the Government to sell its fleet and save the $50,000,000 a year that the Shipping Board is now losing. But it remains to be proved that the proposed bill would induce shipping firms to buy the Government fleet or that the Shipping Board need run up so large a deficit. So far as the Government fleet goes, a large number of the vessels were hastily and badly built and private shipping interests do not want them at any price.

The Nautical Gazette of June 10 prints an illuminating financial statement of two vessels, one Danish and the other under the Shipping Board, on a voyage from Baltimore to Hamburg, with full cargoes of grain, returning in ballast. Both ships were of about the same age and of about 7,000 deadweight tons each. The Shipping Board vessel, however, is an oil burner and should have the advantage over the Danish steamship, which burns coal and so carries a crew of 38 against the other's 30. The total voyage expense of the Danish vessel was $17,558 and a profit was made of $1,910. The voyage expense of the

Shipping Board's craft was $21,030, and there was a loss of $614. The wages paid on the American steamship amounted to $2,105, which was less than the Danish item of $2,355. The big difference was in fuel, which cost the Danish vessel $2,970 and the American $6,300. Oil is not a more expensive fuel than coal. The explanation therefore is that there was a high fuel wastage on the Shipping Board craft due to bad construction, faulty management, or poor steering.

President Harding thinks that by explaining the ship subsidy bill to the people they will be won for its support. In our opinion the less the pap advocates say about the bill, and the more they wave Old Glory, the better their chances will be. Representative DAVIS put it well:

"Our Government-owned merchant tonnage cost the people about $3,000,000,000. It is estimated that we will probably sell the ships for $200,000,000. Consequently, the people will stand a loss by deflation of $2,800,000,000. Furthermore, it is contemplated that either existing shipping companies or companies to be organized, who buy the ships, will capitalize the ships largely in excess of their cost to them and sell the stock and bonds to the American people, so that the people will be standing the war inflation, the post-war deflation, and the the promotion inflation.

"The people, through their Government, will sell the ships for approximately $200,000,000, lend $125,000,000 to recondition those ships or build others, and then pay the owners approximately $750,000,000 in subsidies and aids within the next 10 years. In other words, we will be giving the ships away and paying the recipients over half a billion dollars to operate them for the next 10 years, not to speak of the fact that they will probably be coming back at each succeeding Congress asking for more."

The American people refused to sanction the Hanna ship subsidy, which would have cost $3,222,268 annually, and the Gallinger bill carrying an expenditure of $5,109,355. Can they stomach a bill calling for possibly $75,000,000, which gives no assurances of achieving its object even then? As a means of perpetuating the upper personnel of an inefficient and wasteful Shipping Board, and of allowing it to put money in the pockets of its friends, the present bill would be a great success. For all the good it would do 99,999 out of every 100,000 Americans Congress might as well shovel the money into the sea.

APPENDIX G.

[From the National Grange Monthly, May, 1922.]

TAKING A STAND.

The grange never lacks courage to express its belief, no matter with whose opinions it may conflict nor how influential the plans that the statement of its convictions may upset. Whatever charges its enemies of a half century may have piled up against the grange, it has never been accused of lack of courage—it unhesitatingly took its stand whenever the conditions required and there it stood until the chapter closed.

The ship subsidy issue now confronting the country is one of the big outstanding questions of the hour, with possible consequences far-reaching and involving a precedent that would be full of disaster to the future of American initiative and progress. Sensing these facts, the National Grange has never missed the opportunity to denounce ship subsidies and similar Government benefactions of every sort and with the same old issue raised again and backed by more influential support than it ever had before the grange voice of protest is once more vigorously raised against the intended raid upon the Government Treasury to enrich the few at the expense of the many. At the first preliminary hearing on the question the Washington representative of the National Grange was promptly on hand and put up a strong case, based upon the repeated and emphatic declarations of the organization. However unwisely the representatives of other farm organizations may have acted—even to the extent of making statements which their own membership are likely to repudiate—there was no question about the grange: The farmers are against ship subsidies this time and all the time!

It is very unfortunate that all the representatives of the farm interests did not define an equally clear attitude; all sorts of complications would have been avoided if they had. There is no use quibbling about an issue that so involves the farmers' vital interests as this one does, and the frank, outspoken declarations of the grange have won the ringing approval of thoughtful farmers from Atlantic to Pacific. The grange has a larger paid membership than any other organization of the farm people in America, and for those farm people it speaks emphatically on ship subsidies as well as against every other improper use of Government funds. First, last, and all the time no ship subsidies if the grange can prevent it.

—

[From the Florida Times-Union, April 21, 1922.]

ORDER CONSTRUCTION TWO NEW SHIPS, MERCHANTS & MINERS' IS NOW PLACED—ANNOUNCEMENT DEFINITELY MADE THAT WORK STARTS IMMEDIATELY BUILDING PALATIAL LINERS FOR EXCLUSIVE USE ON JACKSONVILLE-BALTIMORE-PHILADELPHIA ROUTE—WILL BE PLACED IN OPERATION ON JANUARY 1, 1923.

Business is good. Cheer up despondent ones and think of the big tourist crop coming this next winter. The Merchants & Miners' Transportation Co. is, and banking heavily on its judgment. This was definitely learned yesterday, when Sarrol M. Haile, Florida agent of the company, announced that he has received a telegram notifying him that the company has just ordered construction started of two palatial liners for the Jacksonville-Baltimore-Philadelphia run exclusively.

It will be remembered that announcement was made upon the return of local representatives from the Merchants & Miners' conference held in connection with the deeper waterways convention in Savannah last November that a passenger ship was projected at the conclave, with the possibility of two considered. These were to be of the most up-to-date design and equipped with every modern traveling convenience known to builders.

"It pleases me to make this announcement," Mr. Haile said, "as I only announced the possibility of building the one ship in the beginning, preferring to be conservative in my report. The news that two will be built, however, coming unequivocally as it does with the date of January 1, 1923, set for the initial trip, is too good to keep.

"The Merchants & Miners' Transportation Co. will be able to serve Florida and her visitors as never before," he continued. "These ships will accommodate 226 passengers each, and also will have freight capacity of 2,300 tons. Capable of keeping up a fast schedule, as they will be, with the installation of the most up-to-date turbo-electric drive, Jacksonville and the entire State will be drawn that much nearer the North by the more pleasant route."

The ships are to be 366 feet long, 50 feet breadth of beam, and will be five-decked. Dining, smoking, music, and card saloons, beautiful promenade decks, showers and tubs for each cabin, radio telephone and telegraph, and other ultramodern steamer comforts will please the traveling public as much as the relief from congestion in the busy season of migration.

Further details will be announced later.

—

[From the Washington Post, July 5, 1922.]

UNITED STATES SHIP IS SOLD TO BRITISH—WILL BE USED IN OPPOSITION TO AMERICAN VESSELS IN EAST.

[Special cable dispatch.]

CHERBOURG, July 4.—The United States Shipping Board to-day sold to F. C. Strick Co., of London, the big oil-burning ship *West Caruth*, which had been in the West African trade, and which was wrecked off Cherbourg three months ago.

The price paid was $70,000, which was less than the cost of the ship's stores.

It will cost less than $100,000 to conditon the *West Caruth*. It was one of the few American ships equipped for long voyages.

The Strick Co. will use it for Persian Gulf trade in opposition to American bottoms. Shipping circles here consider the sale a gift to the Britsh merchant marine.

—

PRACTICAL SHIPPING MEN FAR FROM SATISFIED WITH HARDING SUBSIDY PLAN—RESPONSIBLE OWNERS APPREHENSIVE OVER THE BILL, WHICH IT IS DECLARED WOULD BUILD UP THE BIGGEST POLITICAL MACHINE THE COUNTRY EVER SAW.

(By Bruce Bliven.)

"If Congress passes the proposed ship subsidy bill it will create the opportunity for building the biggest personal political machine in the Nation's history.

"The old-fashioned pork barrel was bad enough, but at its worst it never offered such opportunities for patronage and favoritism to friends of those on the 'inside' as would be permitted by this bill."

The foregoing is, in substance, the chief contention of opponents of the merchant marine bill, which President Harding supports and on behalf of which Chairman Lasker, of the Shipping Board, is about to stump the country.

There is not the slightest criticism of the honesty and efficiency of any of the members of the present Shipping Board in the minds of these critics when they point out the menace of the proposal. They feel that such powers should not be granted to anyone, regardless of who he may be.

I am in a position to state that these apprehensions as to possible opportunities for favoritism under the law as proposed are shared by responsible American shipowners.

They view with grave concern the prospect of a situation where Government aid may be extended to one company and withheld from another, at the decision of the Shipping Board, with no appeal to any higher authority permitted.

It is an open secret that the practical shipping men are not satisfied with the provisions of the existing ship subsidy bill.

They want Government aid, of course, but their recommendations as to the form it should take were materially different from the contents of the present bill. Whoever may have written the document now before Congress, it does not represent either the matured judgment or the expert knowledge of American shipowners. They are supporting the bill, to be sure, but they are doing so because they think it is a case of this bill or nothing; and they hope that if it is passed it can subsequently be revised to fit the situation as it develops.

This is all very well for the shipowners, but how will the American taxpayers feel about having their money played with in an experiment the results of which seem so dubious even from the outset?

If they knew the facts, would they not be apt to say, "Better no bill at all than a bad one"?

Or, after seeing the Shipping Board lose more than $3,300,000,000 of their money since 1917, have they got to the point where a mere extra fifty or a hundred million a year for the next 10 years is of no consequence?

Under the terms of the proposed law, ships in foreign trade receive a cash subsidy per gross ton per 100 miles of travel. For a ship of 12 knots an hour or less, the sum is one-half of 1 cent per gross ton per 100 nautical miles. The amount is increased for faster ships until a vessel making 23 knots or over receives a subsidization of 2.6 cents.

But the Shipping Board has absolute and final power to double this subsidy for any vessel it chooses.

Or it may refuse the subsidy to any vessel it chooses.

Or it may grant a subsidy of any amount between nothing at all and twice the basic rate.

If there were two competing American companies the Shipping Board with a twist of its wrist could put one company out of business by withholding the subsidy. It could grant huge sums to one company by doubling the subsidy. It could slowly starve one company by making its subsidization just a little smaller than that enjoyed by the other.

Anyone who is familiar with American history must realize that such powers could be used to build up an impregnable political machine, to keep a party in power or an individual in office. No matter how sure we may be of the integrity of the individuals who would first exercise such powers, have we the right to put these temptations before their successors?

There are other aspects of the bill equally dangerous. One such provision creates "The United States Shipping Board construction loan fund." This found of $125,000,000 is to be loaned to private individuals for the construction or the equipment of new ships. It is to be loaned to such persons as the Shipping Board sees fit; it is to be loaned in such sums as the Shipping Board sees fit to the amount of two-thirds of the value of the new ship and equipment; and it is to be loaned at 2 per cent per annum.

To lend money at such a rate is not a loan at all. It is a gift. Incidentally, though this money is to come largely from the United States Treasury, the interest on the individual loans does not revert to the Treasury, but is added to the Shipping Board's loan fund.

The shipowner who is lucky enough to get some of this $125,000,000 will be in a position of immense superiority over his friend who does not. Question: Who will be the favored ones?

Another aspect of the law which puts extraordinary powers in the hands of the Shipping Board provides that it is to be the sole arbiter as to the validity or invalidity of any contract between a railroad and a steamship company. Such contracts are often of vital importance to the life and prosperity of the steamship company in question. If this

bill is passed no company in this situation will know from one day to another what its future is to be.

The situation created by this bill was well summarized in the House of Representatives recently, when it was characterized as "conferring the most autocratic power and the widest discretion perhaps ever conferred upon any board." The speaker, Representative E. L. DAVIS, of Tennessee, went on to say that "it affords boundless opportunities for favoritism, graft, and corruption. Under its provisions the Shipping Board is authorized to usurp powers properly belonging to and now exercised by the President, the Secretary of State, the Secretary of the Treasury, the Secretary of War, the Secretary of the Navy, the Secretary of Labor, the Secretary of Commerce, the Postmaster General, and the Congress. The bill authorizes the Shipping Board to declare valid or invalid existing agreements between common carriers by water and common carriers by land, although some such contracts have been sustained by the courts and others have been declared invalid; so that the Shipping Board is authorized to usurp the power of the judiciary, including the United States Supreme Court, if it so wills."

—

WHY THE PEOPLE MUST PAY.

[From the Florida Times-Union.]

With Republican leaders getting anxious about the ship subsidy bill and President Harding quoted as urging immediate and favorable action upon this plan to rob the public to help the Shipping Board and some others, it is interesting to find in the San Francisco Chronicle, a fairly strong Republican newspaper, the following explanation of why the bill must be passed. Says the Chronicle:

"If Congress deems it wise policy to enact laws under which American ships can not move traffic at as low rates as foreign competitors—and nobody is proposing to repeal those laws—then it is self-evident that the public must pay something toward the operation of the ships or go without them. This money is not really a 'subsidy' in its popular meaning as a free gift. It is pay due to American shipowners for operating American ships as Congress has declared that they must be operated. As receipts from traffic will not pay cost of operation under American law, the public must pay the difference or go without the ships."

One way of reading the preceding paragraph would be: "If Congress which, at the dictation of the union-labor lobby, enacted laws putting the American merchant marine on an unfair basis in the commerce of the world, will not repeal the La Follette law and release the shipowners to fair competition, then the American people must put their hands in their pockets and pay the shipowners and the Shipping Board officials and crews and attachés the money they need to keep going." It is a fair confession, but wouldn't pardon be enough without indemnity?

No use to try any subterfuges. The people are at least well enough informed to know that money taken from the customs receipts is the same as if taken directly from the Treasury. A child out of kindergarten would understand that.

The plea that if the Shipping Board vessels are shown to be receiving money they do not earn they will be bought by private parties at a fair price is the same as saying that the vessels under charge of this war board—now no longer useful or ornamental—should be plated with gold and their ropes twisted with greenbacks. If we must pin money to these hulks to get them off our hands, better let them continue to rot at anchor in the rivers.

The national party which countenances the handing over of money to a class of business directly in order to encourage it in a hopeless competition will not gain in popularity in a country thoroughly awake to the situation.

—

SHIP SUBSIDY IN UNITED STATES—DIVIDENDS IN HAMBURG.

[From the Manufacturers' News.]

HAMBURG, GERMANY, March 4.—The annual report of the Hamburg-South American Steamship Line, issued to-day, showed net profits amounting to more than 7,000,000 marks, twice the amount of the earnings of the previous year. A dividend of 28 per cent was declared, compared to 16 per cent paid last year.

WASHINGTON, D. C., March —.—While the German shipping companies are paying dividends, due to the increasing exports of German manufacturers to South America, President Harding has been compelled to ask Congress for a shipping subsidy for the American merchant marine.

—

[From the Journal of Commerce.]

FUTURE OCEAN RATES.

If the new ship subsidy bill passes Congress, will the result be to establish and maintain a dual kind of shipping management? The indications now point in that direction. There would be, of course, the subsidized ships of private owners, and (unless sold) the ships of the Government would be run as before, and presumably at a continuing deficit. Alongside these ships it may be supposed there would be some American vessels which were run without subsidy and on their own responsibility, while, of course, there will always be American owners who are operating foreign vessels. It does not seem likely that the subsidy will sell many ships, and if not, of course, the probability of Government operation will be with us a long time.

Now, what must be the result on rates of this confusion of ownership? Private owners already find Government competition and interference excessively troublesome. But how much worse will it be under the new plan? The Government, as a subsidizer—and, perhaps, sharer in profits of vessels, if there are any—will necessarily have much to say regarding the rates of the fleet, and, of course, if in competition with them will hardly let privately owned lines drawing a subsidy cut under the rates which it itself has to pay in order to keep going and pay expenses. As for the outsiders who are neither subsidized nor under any direct Government influence, they can scarcely be allowed to fix rates that would destroy the market for freight service, especially if foreigners are driven out through discrimination.

Does not the plan we are following to-day really lead to high rates for freight service maintained by every device in the power of the Government? Certainly Government control and operation has brought that result on land. It will produce it at sea for the same reasons.

—

THE SHIP SUBSIDY BILL.

It is stated that President Harding was assured on Tuesday night by the Republican members of the House Merchant Marine Committee and the Senate Commerce Committee that the ship subsidy bill would be "speeded" and might be sent to him for his signature in less than a month. This is what might be called official optimism. The bill itself has not excited much enthusiasm in Congress. It is said that the President regrets that "the ship subsidy question" has become a matter of party politics. On the same day, however, Benjamin C. Marsh, director of the Farmers' National Council, declared at a joint committee hearing that the bill would "create an ocean-going pork barrel," and maintained that it planned to license favored individuals "to rob the American people." His remarks did not shake the faith of the subsidizers, but were symptomatic of opposition in a class that the party in power is always anxious to conciliate. There are breakers ahead for the Greene-Jones bill.

It is a common argument of the subsidy advocates that there can be no paying American merchant marine without "national assistance." It may take many forms. The "revolving fund" of the bill before Congress is one of them. It is to be raised in part by setting aside a percentage of the customs receipts. But what went into the revolving fund for shipping would have to be balanced by taxation to meet other Government obligations. It is provided that shippers of goods are to be allowed income-tax deductions equal to 5 per cent of the freights on goods shipped under the American flag. There seems to be no "national assistance" in this proposed legislation that is not in effect a borrowing from Peter to pay Paul.

It will have to be proved that the standard of wages on American ships is higher than on foreign ships and that this difference alone justifies "national assistance." Mr. J. H. Rossiter, formerly general manager of the Pacific Mail Steamship Co., declared in a letter to Edward N. Hurley, when the latter was chairman of the Shipping Board, that "the higher pay and extra cost of victualing" amounted to "less than 2 per cent of the total operating expense"; and testimony was recently given before the joint congressional committee that "as a result of reductions the wages of American seamen are now much lower than the wages of Canadian and Australian seamen and are practically on a level with British wages." The Japanese, it is true, operate their ships cheaply. Higher cost of construction in American yards is doubtless a factor to be considered, but extravagant comparisons are made by subsidy advocates. If they were allowed to provide "national assistance" and on their own terms the operation of a merchant marine would be an impracticable undertaking for the American people. "This insistence upon a Government subsidy," Mr. Hurley once said, "is one of the characteristics that the modernization of the steamship business along American lines and the infusion of new blood not infected by the traditions of other days must change. * * * No progress ever can be made by people who continually wail that they can not compete."

—

[From the News, June 19, 1922.]

OUST VETS TO PLAY POLITICS IS CHARGE—SHIPPING BOARD ALLEGED TO BE CHIEF PIE COUNTER AT PRESENT—RECEIVE LOWER SALARIES—EX-SOLDIERS SAID TO BE UNDERPAID, COMPARED WITH CIVILIAN APPOINTEES.

(By Harry B. Hunt.)

Disabled veterans, "rehabilitated" by special courses of training under the Veterans' Bureau and placed in Government departments, are being ousted to make room for political appointees, according to complaints that will be lodged by the Disabled American Veterans of the World War.

Also, it will be charged, veterans fitted for special Government work are paid much less than political appointees doing identical work.

The protest of the disabled veterans will center around the Shipping Board, which is loosely bound by civil service.

POSITIONS IN GREAT DEMAND.

Positions with the Shipping Board are in greatest demand in satisfying political patronage. There are no harrassing examinations.

The Veterans' Bureau has assigned students to the Shipping Board for training as auditors. During training they receive no pay from the board, but draw training pay from the bureau.

When training is completed, they are rated as "rehabilitated" and transferred to the board's pay roll.

Most of the rehabilitated men have been put on at from $1,200 to $1,500 a year. Auditors working alongside these men, doing the same work, but who won their appointment through political channels, draw from $1,800 to $2,500.

On the heels of a recent drive by Republican Congressmen and Senators to finds jobs for insistent constituents auditors recruited from the ranks of the rehabilitated veterans began to be dropped from their jobs.

The explanation given was that the auditing force was being reduced. However, the desks vacated by the ex-service men were almost immediately occupied by new appointees, named outside of civil service, at salaries from 50 to 100 per cent higher than had been paid the Veterans' Bureau graduates.

—

[Reprint from the Marine News, June, 1922, issue.]

The EDITOR THE MARINE NEWS,
New York, N. Y.

DEAR SIR: I was much interested in your editorial comment in the April issue regarding the propositions made by several naval architects whereby the shipbuilders have been called upon to furnish bids at considerable expense to themselves without resultant business, causing a consequent increase in their overhead charges.

Much of this is very true; true that bids have been solicited, expense incurred by the shipbuilders, and that no business has resulted. But the fault is not with the naval architects who solicit those bids in good faith. The fault lies within the shipyard organizations themselves.

Many years' experience in various yards and in various capacities from apprentice boy to executive has convinced the undersigned that the shipbuilding industry in the United States is subject to a great deal of refinement and improvement in organization and executive procedure. It would be safe to say that there is an excessive cost in most shipyards of from three to five dollars per dead-weight ton, not due to labor or physical or mechanical inefficiencies but directly due to what I have termed executive incompetency. This may seem startling, but it is nevertheless true. There are excessive costs due to labor inefficiency, and also to mechanical and physical handicaps in some yards, it is true, but one seldom questions the effectiveness of the organization and the executives behind it with the result that uneconomic organizations continue to exist due to the incompetency of the very executives whose duty it should be to eliminate such uneconomic conditions.

On the basis of the above there would be an excess cost of from $30,000 to $50,000 for each 10,000 dead-weight ton vessel built, and assuming the capacity for a yard to be 10 such vessels per year, the excess cost, due to executive incompetency alone, would amount to

from $300,000 to $500,000 per year. Added to this must be the excess cost due to labor inefficiencies and such mechanical and physical handicaps as are characteristic of the plant.

Modern shop production methods, industrial engineering principles, and organization along basic or fundamental lines seem to be generally lacking in the shipbuilding industry.

I have seen cost data and estimates that were not worth the match to burn them up. The difference of nearly $4,000,000 between the low and the high bids for reconditioning the *Leviathan*, and based on specifications precise in their stipulations, is evidence conclusive that "something" is wrong and that "something" is nothing less than executive incompetency—incompetency on the part of those whose duties and responsibilities should preclude the possibility of useless cost records and uneconomical organizations with consequent absurd estimates and bids that make shipbuilding prohibitive.

Although very few production engineers are at all familiar with shipbuilding as an industry, still fewer are the shipbuilding executives who are familiar with the application of the basic principles of industrial and production engineering to their industry as is evidenced by the fact that in few industries of any magnitude is the application of those principles so conspicuous by their absence.

The sooner the shipyards realize that shipbuilding is a specialized industry only so far as the naval architect and marine engineer are concerned, and a proper subject for modern production engineering, the healthier will shipbuilding become in the United States. The writer has accumulated interesting data and compiled therefrom charts that conclusively substantiate the argument advanced.

Yours very truly,

CARLOS DE ZAFRA.

FATE OF SHIPS BUILT BY UNITED STATES DECIDED SOON—HARDING'S SUGGESTION MAY CAUSE PUBLIC TO BE ENLIGHTENED ON THE SUBSIDY BILL.

(By Bruce Bliven.)

Within the next 60 or 90 days the people of this country will be called upon to decide a very important question: What shall Uncle Sam do with his ships?

President Harding put the question up to the voters when he changed his mind about forcing an immediate decision on the ship subsidy bill and advised the Members of Congress to go and find out what their constituents want done in this important matter.

His suggestion is excellent. Probably not one person in a hundred is familiar with the intricacies of the proposed ship subsidy law or understands the basic problem of the American merchant marine. Unfortunately, nearly all the public discussion thus far has come from interested parties.

The owners of American steamships, who would benefit from the proposed law, claim that it is impossible for them to compete in transoceanic trade against British and other foreign-owned ships. They declare that not only do they need a sudsidy but the subsidy now proposed is not large enough, and should be twice or three times as big. (One wonders why, under the circumstances, the shipowners are advocating the passage of the bill.)

SUBSIDIZATION TO A DEGREE.

The opponents of the measure for the most part concede that Government ownership and operation of the existing fleet is probably out of the question as a permanent policy. Those who are not extremists concede that some degree of subsidization of our merchant marine is probably desirable for a period of a few years.

Their opposition to the bill now before Congress is based on the fact that it proposes several kinds of assistance, some of which are good and some of which are very bad.

They claim that it will be impossible to determine how much aid is being given any shipowner, and under the terms of the contracts proposed, impossible to terminate subsidization at any given time in the future, even by act of Congress.

They believe the present bill puts into the hands of the Shipping Board enormous power—more than should be granted to any group of individuals no matter how praiseworthy their purposes and irreproachable their characters.

They also point out that the world-wide severe slump in shipping makes the present a particularly bad time to attempt to sell off our ships, and they urge with the return of normal conditions it would probably not be necessary to offer so many nor such expensive inducements to purchasers as are provided by Mr. Lasker.

To understand this specific problem now facing the American people, it is necessary to recall just what the Shipping Board has done since 1917.

Its record since that time is undoubtedly the most astounding instance of short-sightedness, waste, and incompetency in our national history.

More than $3,600,000,000 of the taxpayers' money has been spent in building ships. A very large part of all this sum was expended after the signing of the armistice, so that it can not be excused on the ground of war necessity.

For this $3,600,000,000 we have about 10,000,000 tons of ships on our hands to-day.

Of these 10,000,000 tons just about one-half are good for anything. The other half, through bad design or faulty construction, or both, are worthless.

Our fleet is supposed to consist of 1,400 ships to-day. Chairman Lasker himself has estimated that only about 700 of them are good enough to be salable. Private individuals have put the number of first-class ships much lower.

VALUE ONLY $250,000,000.

Experts testifying before the joint congressional committee hearings on this bill put the present value of the fleet at not more than $250,000,000.

The present world market for ships is about $30 a gross ton. This is less than actual construction cost, which is probably from $40 to $60 a ton. If 5,000,000 tons of our fleet are salable—and this is the highest estimate made by anyone I know of—the value of the ships is only $150,000,000.

We spent $3,600,000,000, and we have at most only $250,000,000 to show for it. In other words, the most expensive property the country ever created has shrunk in value by just about 94 per cent in five years. If the Shipping Board went bankrupt it could settle on a basis of 6 cents on the dollar.

According to the American Steamship Owners' Association, private shipping in this country amounts to about 8,500,000 gross tons, of which approximately one-half is in foreign trade. If the ship subsidy bill passes, the shipowners are planning to buy from 3,000,000 to 5,000,000 tons of the Government's ships, which will also be used in foreign trade. With this fleet of 7,250,000 to 9,250,000 tons, the shipowners hope to do at least 60 per cent of America's import and export trade. They are now doing about 33 per cent, the remainder being carried in foreign ships.

In order to enable American ships to do this in spite of the higher cost under which they are said to operate, Chairman Lasker proposes direct subsidies of at least $52,000,000 a year and perhaps very much more than that.

In other words, even if he sold his ships at a replacement value of, say, $50 a ton instead of the present world-market rate of $30 a ton, he proposes to grant to the owners of these and all other American ships subsidies equivalent to the full purchase price of the Shipping Board vessels about every five years after the plan is in complete operation.

To these direct subsidies will be added indirect aid in the form of tax exemptions, etc. No man can say with certainty what these indirect aids will amount to, but they will be considerable.

Yet the steamship owners believe that even these subsidies, which seem so large to the layman, are not sufficient to enable them to compete with the British and other foreign vessels.

The details of the subsidy bill are themselves extremely interesting. They will be considered at length in another article in the Globe.

—

[From the American Economist, April 28, 1922.]

SHIP SUBSIDIES TO TOTAL $55,000,000.

It took a great deal of questioning of Chairman Lasker, of the Shipping Board, to induce him to state precisely the sum that would be drawn annually from the National Treasury if the pending ship subsidy bill is passed as introduced. He was so anxious to qualify so many of his statements and so unwilling to be precise that it was difficult to induce him to admit what is obvious. During his examination, or rather cross-examination, while he was on the stand testifying as to what would be accomplished if the ship subsidy bill was passed, he was questioned at great length by Representative EWIN L. DAVIS, of Tennessee. A few of the questions and answers are of more than passing interest, considering that before the ship subsidy bill was talked of plans were under way to protect our ships adequately and, instead of drawing money from the National Treasury, actually add money to it, just as a protective tariff does in all other cases.

HOW DISCRIMINATING DUTIES WOULD OPERATE.

This was to have been accomplished in two ways: 1. By placing a higher duty on imports when they come in foreign vessels than imports in American vessels would be compelled to pay. 2. By placing a higher tax on the tonnage of foreign ships than was placed on American ships. Section 34 of the merchant marine act of 1920 was drawn with that very purpose in view, but it has never been enforced. To those who fear retaliation let it be said that this policy was in full or partial effect for 61 years in pre-Civil War times, and that during all of that time and for 10 years after it was generally suspended American ships carried an average of 80 per cent of our foreign commerce. That percentage obtained for 72 years. It will be plain to the reader that under this policy, to the extent that imports come to us in foreign vessels, there would be an increase in the money paid into the Nation Treasury, but in no event would the policy draw a dollar from the National Treasury. But to some it seems that an annual subsidy of approximately $55,000,000 is the better way of protecting our ships.

DIFFERENT DRAFTS ON NATIONAL TREASURY.

In the printed copies of the testimony brought out at the ship subsidy bill hearings Representative DAVIS was questioning Mr. Lasker (pp. 239 to 242, inclusive of Part II) on April 5. Here are a few of the questions and answers:

"Mr. DAVIS. Now, Mr. Lasker, on yesterday you referred to the amount of the direct subsidies, and so did the President in his message, as being $32,000,000. I presume that $30,000,000 of that is based upon 10 per cent of the import dutites, is it not?

"Mr. LASKER. That is where we get the $30,000,000. But, of course, that might be $32,000,000 or $28,000,000 or $34,000,000. It is all according to how much the tariffs are.

* * * * * * *

"Mr. DAVIS. Well, take your own statement, then, at $30,000,000 for that. Now, I presume the $2,000,000 additional you stated was intended to represent the tonnage dues, was it not?

"Mr. LASKER. Four million dollars, isn't it?

"Mr. DAVIS. You said $32,000,000, and that is what I wanted to get at.

"Mr. LASKER. They are $2,000,000 now, but we hope to see them doubled."

(For the sake of clarity it should be said that the ship subsidy bill provides for deducting 10 per cent of the revenue received from customs duties and all of the money received from tonnage dues, and segregating it as a fund from which to pay the direct, as distinct from the indirect, aids.)

"Mr. DAVIS. In other words, this bill itself provides for all tonnage dues being doubled?

"Mr. LASKER. Yes.

"Mr. DAVIS. You mean $30,000,000 for the 10 per cent of imports and $4,000,000 for tonnage dues?

"Mr. LASKER. After five years we think the amount of disbursements for direct aid will be $30,000,000.

"Mr. DAVIS. Well, I am wanting to get at what you propose to be paid into the fund as soon as the bill goes into effect?

"Mr. LASKER. We propose to be paid into the fund as soon as the bill goes into effect 10 per cent of the tariffs, whatever they may be.

"Mr. DAVIS. Which you said was $30,000,000.

"Mr. LASKER. The tonnage tax, which we hope will increase to $4,000,000. And then the postal receipts would go into it, which is $4,000,000. That would make it $38,000,000.

"Mr. DAVIS. Right on that point, it is stated repeatedly in this report of yours, of the Shipping Board, that it is $5,000,000.

"Mr. LASKER. It is approaching $5,000,000.

"Mr. DAVIS. I want to ask you furthermore in this report it does not give the exact figures to show that the amounts paid out for ocean postage and postal contracts in 1921 were $6,085,000.

"Mr. LASKER. Mr. Nicholson is going on the stand with a lengthy discussion of all this, with an elaborately prepared statement. That in itself may be a whole day's examination, so let us check it till he comes on.

"Mr. DAVIS. But I want to enumerate the amount of all these aids.

"Mr. LASKER. Yes, sir; we have got it all prepared, to prove what we say.

"Mr. DAVIS. Now, which do you want to insist on putting down now, the $5,000,000?

"Mr. LASKER. No; the $6,000,000 that you have included what we pay foreign ships for carrying the mails.

"Mr. DAVIS. But you say in your report that you expect when this gets into operation American ships will be able to take over that business.

"Mr. LASKER. Not until the ships are built. That is in the future.

"Mr. NICHOLSON. In your statement or memorandum you also included in the computation these facts, namely, that with the development of the merchant marine mails now carried by foreign vessels would be transferred to domestic vessels, and you made an allowance for that.

"Mr. LASKER. Yes; that is where we get the amount to $5,000,000; and ultimately let us hope that the desideratum is the $6,000,000.

"Mr. DAVIS. Now, Mr. Lasker, you also estimate at different places in this report—and I believe you stated in your testimony yesterday—that the income-tax relief would ultimately amount to $10,000,000 a year?

"Mr. LASKER. $8,000,000 to $10,000,000. * * *

"Mr. DAVIS. Now, the naval reserve, it is also estimated when that gets into operation, within three years, the cost of that will be $3,000,000. Now, it is proposed to loan $125,000,000 at 2 per cent interest.

"Mr. LASKER. The law already provides for that. * * *

"Mr. DAVIS. Now, at 2 per cent the Government would be loaning it for at least 2½ per cent less than the Government is paying.

"Mr. LASKER. Say 3 per cent on short time. * * * Well, say 2½ per cent would be a right figure?

"Mr. DAVIS. All right. That would be $3,125,000 a year that that cost the Government?

"Mr. LASKER. Yes; I would put it that way. * * * The $3,100,000 difference in interest on the loan fund should be included. However, as I stated yesterday, the $3,100,000 loan fund interest should be included; you are right in that, but remember we don't estimate the first year it is going to cost over $15,000,000, and we think it will be five years before it gets to its maximum.

"Mr. DAVIS. The items that we have agreed upon here foot up to $55,125,000.

"Mr. LASKER. Aren't you going to take off the postal receipts?

"Mr. DAVIS. No; I am talking about what it is going to cost the Government."

SHIPPING BOARD MAY DOUBLE AMOUNT OF DIRECT SUBSIDY.

It will be noted that the sum of $32,000,000 or $34,000,000, according to whether tonnage dues yield $2,000,000 or $4,000,000, is to be segregated with which to pay the direct subsidy to the ships entitled to it. But there is a provision in the ship subsidy bill—the last paragraph of section 702, on page 22, of the Jones ship subsidy bill—which reads as follows:

"Whenever the United States Shipping Board shall determine that the compensation prescribed herein is insufficient to induce the operation of vessels documented under the laws of the United States in any line or service which in its judgment is desirable and necessary to promote the welfare of the United States, the board may increase the amount of compensation provided by this act to such an extent as it may deem necessary to secure the establishment and maintenance of such lines or services, not, however, to exceed twice the amount of compensation provided herein. Whenever the board shall determine that the amount of compensation is excessive under the special circumstances of any particular case, it may reduce the amount prescribed herein with respect to such particular case."

—

[From the Evening Star, March 3, 1922.]

SHIPPING BOARD MAKES MONEY FOR FIRST TIME—FEBRUARY FIGURES FOR OPERATIONS SHOW EXCESS OF $100,000 OF INCOME OVER COSTS.

For the first time in the history of the Shipping Board ship operating expenses for February were less than operating revenues, according to Joseph W. Powell, who retired as president of the Emergency Fleet Corporation to-day. Since last July, when Mr. Powell took office, he said, the Shipping Board has disposed of $20,370,000 worth of property.

February figures for ship operation, Mr. Powell said, showed that approximately $6,500,000 was taken in by the managing operators on Shipping Board accounts, and that the expenditures were $6,400,000.

Reviewing the fiscal affairs of the Fleet Corporation since last July, he said that voyage expenses, classified as losses, were: July, $1,896,000; December, $1,249,000; and January, $934,000.

Since July the personnel of the emergency fleet has been reduced 3,302 and the pay roll $5,290,000. In July there were 956 ships laid up as against 1,278 to-day.

Figures for the liquidation of property show that since October $5,000,000 worth of ships, $6,073,000 worth of houses, and $5,000,000 of surplus materials have been sold. In addition $4,300,000 worth of securities and mortgages have been disposed of.

—

[From the Chicago Journal, Monday, June 12, 1922.]

ORGANIZE TO FIGHT THE SUBSIDY.

Word comes from Washington that some Senators and Representatives from the Middle West have declared that this section is favorable to the ship subsidy bill.

By what authority do those misguided solons speak? When were they out of Washington, and back in their States and districts learning public opinion? When did they talk with their constituents on this matter, and with what constituents did they talk? Have they taken the opinions of farmers, of merchants, of wage earners? Or have they confined their investigations to their own luxurious clubs?

One suspects the latter, for that is about the only place, outside of Washington and the coast cities, where one can hear a good word for the ship subsidy. The Middle West, which works for a living—and that comprises about nineteen-twentieths of the population of the central valley—either is too disgusted with the subsidy to talk about it or denounces it for the swindle that it is.

Why, indeed, should the Middle West look upon the subsidy scheme with any other sentiments than hostility and disgust

The subsidy goes to ships engaged in foreign trade. That, on the very face of it, is a bonus which the whole country will have to pay to the coasts. Why should the great middle valley support such a scheme?

The bonus to be paid increases with the speed of the vessel, which means that the lion's share will be absorbed by fast passenger boats, virtually all of which enter and will be owned in New York. Why should the Mississippi Valley clamor for the privilege of paying a subsidy to the marine branch of Wall Street?

A. D. Lasker, chairman of the Shipping Board and champion of the subsidy, says that "not more than two" lines of fast ships can compete under one flag. This amounts to direct notice that American passenger traffic under the subsidy régime will be a virtual monopoly. Why should the West, after a generation of fighting monopolies on land, subsidize one on the sea?

EWIN L. DAVIS, of Tennessee, showed in the House debates that the shipping bill permits the sale of the merchant fleet on partial payments, to be spread over 15 years, and that, taking the present price of ships, the subsidy to these vessels in 15 years would amount to at least $250,000,000 more than their purchase price. That was when the annual cost of the subsidy was estimated at $30,000,000, but now comes Mr. Lasker and says that the bonus payments may well run to $52,000,000 per year, while other authorities put the sum at $60,000,000.

On this showing, therefore, the United States Government is called upon to give away its merchant fleet and pay the new owners $500,000,000 or $600,000,000 for taking it. Why should the West support any such fantastic fraud?

The West doesn't support it. But the West, if not careful, will be represented as supporting the swindle.

It is time for the big central valley to organize and act to defeat this expensive fakery. Every association of farmers should go on record against the subsidy. Every labor union and western organization of merchants should do the same. Notice should be served on every Congressman and Senator that the West stands ready to punish at the polls those who try to vote its money to the Shipping Trust. Demand should be made that those who represent the Middle West in Washington come home and face their constituents before passing on the subsidy measure.

This carefully plotted swindle can be beaten only by hard work, and the work must begin now to be effective. Organize to fight the subsidy.

—

[From Fairplay, December 4, 1919.]

The following statement discloses recent sale price of steel steamers in various parts of the world. The information is largely derived from Fairplay, the leading English marine journal.

DECEMBER, 1920.

Deadweight tons built in 1915	5,575
Deadweight tons built in 1906	6,396
Deadweight tons built in 1909	7,100
Deadweight tons built in 1894	5,100
Deadweight tons built in 1900	5,800
Deadweight tons built in 1915	7,850
Deadweight tons built in 1902	6,225
Deadweight tons built in 1911	7,100
Deadweight tons built in 1905	7,070
Deadweight tons built in 1903	6,270
Deadweight tons built in 1910	6,412
Deadweight tons built in 1913	5,557
Deadweight tons built in 1914	5,557

All owned by the Moor Line, Newcastle-on-Tyne, and sold to the Western Counties Shipping Co. at £22 per ton deadweight, or $72.82 current exchange.

—

[From Fairplay, December 4, 1919.]

Steamer, 9,300 tons deadweight, contracted for June delivery to Norwegians at about £25 per ton, all increase in wages, materials, etc., to be paid by owners. Been sold at large advance over contract price.

—

[From Fairplay, December 4, 1919.]

Japanese steamer, 2,206 gross, 3,309 deadweight, built in 1919, been sold to Norwegians at 375 yen per deadweight ton, or $187.50.

Another, 4,950 tons deadweight, been sold to Danes at about £42, or about $139 at current exchange.

A steamer of 3,077 tons gross, 4,600 tons deadweight, built in 1917, been sold to foreigners for about £175,000, or about £38 per deadweight ton, equivalent at current exchange to about $140.

—

[From Fairplay, December 11, 1919.]

Japanese owners have sold one new ship of 6,300 tons at 330 yen per ton, or $165, and another at 340 yen, or $170 per ton.

Another new ship of about 3,300 dead-weight tons was sold for 375 yen, or about $187, per ton.

A small steamer of about 1,600 dead-weight tons was sold in England for about £43.4 per ton, substantially $144 at current exchange.

—

[From Fairplay, December 18, 1920.]

Three steamers built in 1918, aggregating 895 dead-weight tons, sold for about £50,000, or £56 per dead-weight ton, or about $185 current exchange.

A steamer of 5,300 dead-weight tons built in 1903 sold for £90,000, or about £17 per ton, or about $56 at current exchange.

A steamer of 2,040 dead-weight tons, to be delivered in February, sold for about £99,500, or about £48.7 per ton, or about $161 per ton according to current exchange.

A steamer of about 6,637 dead-weight tons was sold for about £197,500, or £29.7 per ton, or about $98 at current exchange.

—

[From Fairplay, December 25, 1920.]

A ship of 2,000 dead-weight tons built in a Dutch yard, about ready for delivery, sold for about £117,500, or about £58.7 per ton, or about $195 per ton at current exchange.

A steamer of about 3,500 dead-weight tons built in 1900 was sold for about £100,000, or about £30 per ton, substantially $100, according to current exchange.

A steamer of about 5,400 dead-weight tons built in 1900 sold for about £160,000, or about £30 per ton, substantially $100, according to current exchange.

A new steamer of a little over 2,000 tons dead weight, under construction and to be delivered during the month of February, was sold for about £99,500, or substantially £49 per ton, the equivalent of about $162 at current exchange.

—

[From Fairplay, January 15, 1920.]

Steamship *Tynedale*, of about 4,442 dead weight, built in 1889, was sold for £16,500 pounds, or about £3.7 per ton, equal to about $122.50 at current exchange.

Steamer *Ayo*, of about 5,690 dead-weight tons, built in 1918, was sold for £40,000, or about £7 per ton, equal to about $23.17 current exchange.

—

[From Fair Play, January 22, 1920.]

Steamer *Canning*, of about 8,000 dead-weight tons, built in 1895, was sold to Greeks for £100,000, or about £12.4 per ton, substantially $40 current exchange.

Steamer *Menelaus*, of about 6,750 dead-weight tons, built in 1895, sold for £90,000, or about £13.3 per ton, equal to about $44 current exchange.

—

[Report of Shipping Board, January 15, 1920.]

The price of a new, ready, 7,500-ton cargo steamer was £31 per ton; at current exchange $102. Norwegian owners are reported to have contracted with British builders for the construction of a 7,000-ton single-deck cargo steamer for delivery in October, 1920, at £34 per ton, $112 at current exchange.

A recent sale of a steel two-deck steamer, built in 1918, of a dead-weight capacity of about 10,015 tons, has been made for about £35 per ton, or $115 at current exchange.

Scotch shipbuilders are reported to be offering to build 3,000-ton single-deck cargo steamers, for delivery 1921, at £44 per ton, or $145 at current exchange.

A steamer under construction, to be delivered next February, has been sold for almost £49 per ton, or $162 at current exchange.

A steel shelter-deck steamer, built in 1913, of about 9,600 dead-weight tons, has been sold for £29 per ton, or about $96 at current exchange.

A British oil merchant says that he has let contracts for several tankers at about £31, or about $102 at current exchange.

Mr. RANSDELL. Mr. President, I do not agree with the conclusions stated by the Senator from Florida [Mr. FLETCHER], and at some time in the future I shall reply rather fully to them, I hope.

I wish to announce at the present moment that on Thursday, the 20th, as soon as the Senate convenes, if I can get recognition, I shall address the Senate on some very remarkable developments in connection with our merchant marine that have been taking place in the world the last three months. They are of intense interest to all Americans. I promise not to detain the Senate very long, but I hope to entertain them at that time.

B. HARVEY CARROLL.

Mr. SHEPPARD. Mr. President, B. Harvey Carroll, a member of the consular service from Texas, was stricken while at his post in Spain a few months ago, and died a few days later. His record was one of exalted service to his country. A brief summary of that service was prepared by Gino Speranza, formerly an attaché of the American Embassy at Rome, who had personal opportunity to observe Carroll's work, and I think it is of sufficient interest to have a place in the RECORD. I ask that it be inserted.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

B. HARVEY CARROLL.

The death of B. Harvey Carroll, of Houston, Tex., American consul at Cadiz, who died recently in the service, should not be allowed to pass without some public statement of his unusual record.

His appointment to the Consular Service almost coincided with the beginning of the great World War, his official career beginning in the midst of the alarms and fears which preceded that conflict, and in one of the most beautiful settings of that drama—the dream city of Venice. It was just the background and "the perfect occasion" to fire a deeply poetic imagination such as Carroll's and to stir him to a fine sense of the high mission which America was to play in the approaching struggle. Holding a relatively inconspicuous office he became in a short time one of the outstanding figures among the diplomatic, consular, and welfare officials accredited to Italy from our country. Concentrating his efforts at first in helping his countrymen who were rushing into Venice from Austria and north Italian resorts—frightened by the uncertainties of the situation and the sudden paralysis in the banking world—he saw to it that all were provided with passage home, spending even out of his own very slender private purse to help the neediest cases. This accomplished, he next turned his energy and enthusiasm to the suffering people of Venice. I doubt if any American official abroad was so esteemed and loved—in high and lowly places—as Harvey Carroll was esteemed and loved by the people of Venice. Children followed him along the Calles and over the bridges as their particular friend: yes, even as their occasional playmate; men and women of all classes went to him for counsel as to a wise and kindly neighbor, and when the Pearl of the Adriatic trembled and rocked under endless Austrian attacks hundreds of the poor of Venice nightly gathered at the American consulate hoping that somehow the Stars and Stripes and Consul Carroll would save them from the terrible danger hanging over the city. Closer and closer around Venice the enemy drew its lines, more frequent and more unsparing became the attacks from the sky, till the entire consular corps was advised by the Italian military authorities to leave what seemed a doomed city. But the American consul refused to go; duty, as that gallant son of Texas understood it, bound him to the people who now looked upon him almost like a father. I can see him on those terrible nights of full moonlight when the Austrian raiders would come in force and drop explosive and incendiary bombs by the dozen, hastening from place to place where an explosion was reported or a palace set on fire, not only eager to help but anxious for that detailed, accurate, and interesting data which fill his official reports to our Government. For let me say here that those reports of Carroll's were no mere consular summaries of statistics and dry facts but literary essays full of human interest, and often a fine appreciation of art. Indeed one of our great litterateurs, who by reason of his official position was able to read those reports, has said of them that they had much of the flavor and style of Ruskin's Stones of Venice. Perhaps our Government may some day publish them to the delight of artists and lovers of Venice.

Certainly Carroll had greater opportunities of seeing Italy in a state of defense as well as on her actual fighting lines than possibly any other American official in that country. It will be remembered, for instance, that before we entered the World War the Austrians, in an attempt to justify their attacks on Venice, charged that the Italian military authorities used the famous Campanile in St. Mark's Square as an observation post. The Italian Government thereupon requested the United States as a then neutral nation to ascertain the facts and Consul Carroll was directed to make an official inquiry. With characteristic sense of fair play Carroll notified the Italian military authorities that in order to make an absolutely reliable inquiry he would have to have the key to the Campanile so he could enter it at any time without previous notice. The Italian authorities readily consented and for several days the American consul became the keeper of that historic tower, and it was on one of his sudden nocturnal visits that he had the opportunity of watching—all alone, from that great steeple—the most awful raid upon Venice when 26 airplanes bombed that city mercilessly throughout an endless night of horror.

Carroll's happiest day was when we finally entered the war. Thereafter he redoubled his energies, extending his activities to the Italian fighting lines. After Caporetto, when the dikes in the outer lagoons were cut down so as to flood the approaches to the city from the east and north, Carroll felt he should go where the last, supreme stand was being made. The artillery fire was so near and so intense that it shook the Adriatic city, and on the near-by Piave the 18-year-old boys of Italy, rushed from the colleges and universities of the kingdom to the fighting front, were holding the Piave line as the last, desperate effort to stem the inrushing enemy. The Piave line, as Carroll gravely said, was "wholly within" his consular district; and to it he went, forbidden by his official status from handling a gun, but giving aid to those falling near him. It was in recognition of his courage on this occasion that the Italian supreme command conferred upon him the Italian War Cross. But it was not this honor nor the Order of the Crown of Italy which King Victor conferred upon him, nor the flag of St. Mark and an old Venitian painting which the municipality of Venice presented to him that constituted Carroll's greatest satisfaction. These he esteemed and appreciated, but the supreme honor for him lay in the fact that he had made a heroic and long-suffering people trust and love the United States of America—his country. This was his great passion, his abiding love. And when the hour struck, though in a distant land and away from the brave heart that had shared with him so many of the battles of his life, the thought of his unswerving loyalty to his country must have made the last journey a road of light. Well done, well done, thou good and faithful servant of the Republic!

REINTERMENT OF SOLDIER DEAD.

The VICE PRESIDENT laid before the Senate a communication from the Quartermaster General of the Army, which was ordered to lie on the table and to be printed in the RECORD, as follows:

WAR DEPARTMENT,
OFFICE OF THE QUARTERMASTER GENERAL OF THE ARMY,
Washington, July 15, 1922.

The PRESIDENT OF THE SENATE,
Washington, D. C.

MY DEAR SIR: The inclosed copy of list of American soldier dead returned from overseas, consisting of 18 enlisted men and 1 Army field clerk, to be reinterred in the Arlington National Cemetery, Thursday, July 20, 1922, is furnished for consultation by Members of the Senate. It is requested that it be posted or displayed in a suitable place for the purpose desired.

Very truly yours,

H. L. ROGERS,
Quartermaster General.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, before continuing the very interesting discussion of the cotton schedule I ask unanimous consent that when the Senate closes its session on this calendar day it recess until to-morrow at 11 o'clock.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCUMBER. I think the Senator from Utah desires to have the Senate consider paragraph 920 at this time.

Mr. SMOOT. Yes, Mr. President; I want to pass over paragraphs 918 and 919 and consider paragraph 920.

The VICE PRESIDENT. The Secretary will state the amendment of the committee to paragraph 920.

The ASSISTANT SECRETARY. In paragraph 920, page 131, line 20, the committee proposes to strike out "28" and to insert in lieu thereof "40," so as to read:

PAR. 920. All articles made from cotton cloth, whether finished or unfinished, and all manufactures of cotton or of which cotton is the component material of chief value, not specially provided for, 40 per cent ad valorem.

Mr. ROBINSON. May I ask the Senator from Utah why we passed over paragraphs 918 and 919?

Mr. SMOOT. Two Senators who are absent from the city requested by wire that that be done. They will be here to-

morrow, and as soon as they return we will take up those paragraphs.

Mr. ROBINSON. I have no objection, under those circumstances, to the paragraphs being passed over, but I thought there ought to be some explanation as to why they are not to be considered now.

Mr. SMITH. In regard to the paragraph under consideration, I notice that the present rate is 30 per cent. This is a basket clause, and the rate was only 45 per cent under the Payne-Aldrich law. The House provided for 28 per cent, based on the American valuation.

Mr. SMOOT. That is equal to a little over 40 per cent, the way they figure it.

Mr. SMITH. My impression was that the House rate would be about 32 per cent.

Mr. SMOOT. If it were 45 per cent, with one-third off of the rate it would be 30 per cent. That virtually is the Payne-Aldrich rate.

Mr. SMITH. No; they could not have given the Payne-Aldrich rate, because that was 45 per cent.

Mr. SMOOT. Less one-third, as I said. They took that off of the American valuation. One-third off of 45 would be 30, and they gave 28. I said it was virtually that rate.

The Senator will also note that under the bill we have taken those items out of the basket clause, and they were the great bulk of goods which fell under this paragraph—curtains, table covers, and all other articles manufactured of chenille or of which cotton chenille is the component material of chief value.

The rate was 35 per cent under existing law, and under the Payne-Aldrich law the rate was 50 per cent ad valorem, but here we take all articles made from cotton cloth, whether finished or unfinished, and all manufactures of cotton or of which cotton is the component material of chief value, not specially provided for, and propose a rate of 30 per cent ad valorem, or at the same rate plain cloths are provided for in the other paragraphs.

Mr. SMITH. In paragraph 904——

Mr. SMOOT. That is the definition clause.

Mr. SMITH. In paragraphs 903, 904, and 905 we covered cotton cloth, printed, dyed, colored, or woven-figured; then cotton cloths not bleached, printed, or dyed. Even there we did not reach 40 per cent on the plain cotton cloths. We have provided in the other paragraphs for those which, in the opinion of Senators on the other side of the Chamber, needed special duties. But here we come to the basket clause in which all articles made from cotton cloth are included, whether finished or unfinished, and all manufactures of cotton or of which cotton is the component material of chief value, not specially provided for, and give them a rate that is practically equal to the very highest rate given to the specially provided for cloths.

Mr. SMOOT. A paragraph of this kind is generally designated as the junk clause. We do not know what will fall into it.

Mr. SMITH. I know the Senator does not know that.

Mr. SMOOT. The rate of duty does not apply to the general use of goods in the United States.

Mr. SMITH. The point I am making is this——

Mr. SMOOT. It is a higher rate than is given to those which are provided for specially.

Mr. SMITH. We took countable cotton cloths and we took those that were plain and not specially treated and gave them a rate. Then we took those specially treated which came under "dyed and figured" and gave them a special rate. The special rate that was given cloth, which the Senator from Massachusetts [Mr. LODGE] stood here the other day and pleaded for, does not exceed this rate of duty. When we come to the odds and ends, in order that nothing may escape at all, the committee have taken all kinds of goods manufactured, whether finished or unfinished, composed of cotton, and given them a rate that is as high as the specially provided for goods.

Mr. SMOOT. So did the Underwood law do that identical thing. No one ever objected to the rates of the basket clauses. No one can tell what is going to be made hereafter that will fall into the basket clauses. They are catch-all clauses. All the goods that are known are specially provided for.

Mr. SMITH. I do not see why the Senator applies the term basket clause or catch-all clause to this particular paragraph. I think the whole bill is a basket clause and a catch-all clause. If anything has escaped the committee it does not appear in this schedule. However, in order to expedite matters, I am not going to further contest the question.

We have made our fight. We have gone on record, assisted ably by certain Senators on the other side of the Chamber, and it has availed practically nothing. I want to say in the conclusion of my attempt at management of the cotton schedule that there seems to have been, and there was, a reduction in figures, but there was no relief to the American public by such reduction for the reason that, though there was a reduction in figures, it did not reduce the rates to a point where there would result anything like competition from abroad. The American market has been left absolutely at the mercy of the American manufacturer. The difference in the percentage which was brought in and the percentage finally agreed upon did not spell any relief whatsoever, because, to illustrate, if a wall is 10 feet high and those who are imprisoned can only jump over a wall 5 feet high and you knock it down to 8 feet high, you still have 3 feet above any relief to those imprisoned. You may have knocked 2 feet from the high wall, but you still have those behind it far beyond any possibility of ever getting out.

Mr. SMOOT. If they can jump over a 10-foot wall and we leave it there, there is no need of having any duty at all. Therefore, as between the foreign manufacturer and the American manufacturer, I want the wall at least so high that we will have a little energy on the part of the foreign manufacturer in order to get into this country. I also want, when they get into this country, that they shall be required to pay a little money into the United States Treasury for the privilege of doing business in the United States.

Mr. MCCUMBER. Mr. President, I merely wish to add to what the Senator from Utah has said, that under the Payne-Aldrich law the rate was 45 per cent, under the Underwood law it is 35 per cent, and under the pending bill it is 40 per cent. Forty per cent ad valorem to-day, under prices and under the difference in the cost of labor in this country and in the Old World, does not measure as great a protection as 30 per cent ad valorem measured at the time the Underwood law was enacted.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

Mr. SMITH. Inasmuch as this is the last item in the cotton schedule, I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). I have a pair with the Senator from Michigan [Mr. TOWNSEND]. Being unable to obtain a transfer, I withhold my vote.

Mr. ROBINSON (when his name was called). Transferring my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the senior Senator from Missouri [Mr. REED], I vote "nay."

The roll call was concluded.

Mr. JONES of New Mexico. Making the same announcement as to my pair and its transfer as on the previous vote, I vote "nay."

Mr. OVERMAN. Making the same announcement as to the transfer of my pair as on the previous vote, I vote "nay."

Mr. GLASS. Making the same announcement as to my pair and its transfer as heretofore, I vote "nay."

Mr. WALSH of Montana. Making the same announcement as on the previous vote, I vote "nay."

Mr. JONES of Washington (after having voted in the affirmative). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent. I am paired with him for the afternoon. I find, however, that I can transfer that pair to the junior Senator from Oregon [Mr. STANFIELD], and I do so, and allow my vote to stand.

Mr. NEW. Repeating the announcement as to the transfer of my pair, I vote "yea."

Mr. MCKINLEY. I transfer my permanent pair with the junior Senator from Arkansas [Mr. CARAWAY] to the senior Senator from Pennsylvania [Mr. CROW] and vote "yea."

Mr. STANLEY. Has the junior Senator from Kentucky [Mr. ERNST] voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. STANLEY. I have a pair with that Senator. In his absence, I withhold my vote.

Mr. TRAMMELL. In the absence of my pair, the Senator from Rhode Island [Mr. COLT], being unable to obtain a transfer, I withhold my vote. If permitted to vote, I would vote "nay."

Mr. CURTIS. I was requested to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from New York [Mr. CALDER] with the Senator from Georgia [Mr. HARRIS];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Maine [Mr. HALE] with the Senator from Tennessee [Mr. SHIELDS]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The roll call resulted—yeas 29, nays 19, as follows:

YEAS—29.

Broussard	Jones, Wash.	McLean	Phipps
Bursum	Kellogg	McNary	Smoot
Cameron	Kendrick	Moses	Spencer
Capper	Keyes	Nelson	Sterling
Curtis	Lenroot	New	Willis
France	Lodge	Newberry	
Gooding	McCumber	Oddie	
Harreld	McKinley	Pepper	

NAYS—19.

Ashurst	Jones, N. Mex.	Ransdell	Underwood
Borah	King	Robinson	Walsh, Mass.
Glass	Norris	Sheppard	Walsh, Mont.
Heflin	Overman	Simmons	Watson, Ga.
Hitchcock	Pomerene	Smith	

NOT VOTING—48.

Ball	Elkins	McCormick	Shortridge
Brandegee	Ernst	McKellar	Stanfield
Calder	Fernald	Myers	Stanley
Caraway	Fletcher	Nicholson	Sutherland
Colt	Frelinghuysen	Norbeck	Swanson
Crow	Gerry	Owen	Townsend
Culberson	Hale	Page	Trammell
Cummins	Harris	Pittman	Wadsworth
Dial	Harrison	Poindexter	Warren
Dillingham	Johnson	Rawson	Watson, Ind.
du Pont	Ladd	Reed	Weller
Edge	La Follette	Shields	Williams

The VICE PRESIDENT. The yeas are 29 and the nays are 19. The following Senators are present and have not voted: The Senator from Kentucky [Mr. STANLEY], the Senator from South Carolina [Mr. DIAL], and the Senator from Florida [Mr. TRAMMELL]. The amendment of the committee is agreed to. The next committee amendment will be stated.

The next amendment was, under "Schedule 10, flax, hemp, and jute, and manufactures of," in paragraph 1001, on page 132, line 1, after the word "tow," to strike out "three-fourths of 1 cent" and to insert "2 cents," so as to read:

PAR. 1001. Flax straw, $2 per ton; flax, not hackled, 1 cent per pound; flax, hackled, including "dressed line," 2 cents per pound; flax tow and flax noils, three-fourths of 1 cent per pound; hemp and hemp tow, 2 cents per pound.

Mr. MOSES. Mr. President, I desire to prefer a request to the Senator in charge of the bill. I take it that it is improbable that paragraph 1008a will be reached this afternoon, but in the event that it is, may I ask the Senator from Utah to consent that it may go over until to-morrow morning?

Mr. SMOOT. Yes; I shall ask that the paragraph may go over if it shall be reached this afternoon.

Mr. MOSES. I thank the Senator.

Mr. SMOOT. Mr. President, it may be just as well that I make merely a brief statement as to the policy of the committee in imposing the duties which are carried under this schedule and at the same time give to the Senate an idea of the working of this schedule in the past and what is to be hoped for in the future.

The first amendment which the committee proposes is the one that has just been stated by the Secretary, and is found on page 132, line 1, where the Senate committee proposes that the rate of three-fourths of 1 cent per pound on hemp and hemp tow be increased to 2 cents per pound. The second amendment is as to hackled hemp, including "line of hemp," on which the House imposed a duty of 1½ cents a pound, but on which the Senate committee propose to impose a duty of 4 cents per pound.

Mr. KING. That is double the rate which is carried by the Payne-Aldrich law?

Mr. SMOOT. Yes; I will say to the Senator, it is double the Payne-Aldrich law rate. I wish to say to the Senate that those rates were increased at the earnest solicitation of the senior Senator from Wisconsin [Mr. LA FOLLETTE]. He had received many letters—and he read them to the Committee on Finance—from the Agricultural College of Wisconsin, and I think he had received letters from one or two other colleges in the United States. The Senator from Wisconsin became convinced that the only way to establish this industry was to give the protection which is proposed to be accorded by the Senate committee upon hemp and hemp tow and hackled hemp, including "line of hemp."

The Senate will later in the consideration of the bill reach certain paragraphs covering articles of which this product is the raw material, and in those instances it became necessary, in view of the increased duty provided by the committee on the raw product, to increase the rate on the finished product. When those paragraphs are reached I shall probably take occasion to call attention to the increases, and it will be found that they will be in nearly all cases caused through the imposition of an increased duty upon the raw material.

The first clause of paragraph 1008a covers woven fabrics, such as hucks and count napkins and crashes; the second clause of paragraph 1008a covers paddings. Most of those goods have never been made in this country to any great extent; the foreign manufacturers have dominated the American market in this class of goods; but I wish to call the attention of the Senate to the fact that the rate of duty upon these goods in the past has been often less than the rate upon the yarns included in the goods; in other words, to be frank, Mr. President, it has been the policy of our Government in the past not to undertake to encourage the production of this class of goods in the United States. The committee now feel that the time has arrived when this class of goods should be made in the United States. The World War brought about a condition whereby we were compelled to make them here or go without them in a large degree. Therefore great amounts of money were invested in this industry, and it is nothing more than right now that we should give those investors a fair opportunity in order that they may continue the business which they undertook during war times.

Mr. POMERENE. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Ohio?

Mr. SMOOT. I yield.

Mr. POMERENE. The Senator from Utah has just stated that there had been a great amount of money invested in the industry. Can the Senator give us the figures?

Mr. SMOOT. Does the Senator mean in the entire industry?

Mr. POMERENE. I mean in the manufacture of the goods to which the Senator was referring. The Senator stated that there had been a large amount of money invested in this industry.

Mr. SMOOT. Mr. President, I can not state the exact amount; it would be impossible for me to do so, because I have not looked up the figures, nor was there any testimony given on that point, because I doubt whether or not any member of the Committee on Finance asked that question.

Mr. ROBINSON. The Senator from Utah is not now speaking of the industry affected by the amendment which is immediately pending?

Mr. SMOOT. Oh, no. I am speaking of the schedule generally.

Mr. ROBINSON. The Senator is speaking of the schedule, generally and particularly, of section 1008a?

Mr. SMOOT. Yes.

Paragraph 1013 covers towels and napkins counting less than 120 threads to the square inch, as well as those counting more than that.

So far as duties are concerned, I should not go so far in this class of goods as I should in the goods that are embraced in paragraph 1008a, although this class of goods, until the beginning of the war, was nearly all imported. There were a few of those goods made in the United States before, but very few in comparison with their consumption in this country.

When the Senate reaches paragraphs 1011, 1014, 1016, and 1017 of the bill, we shall find that those paragraphs cover the class of goods that are competitive. Those are goods which have been made in this country; they are a coarser class of goods and they are used by the people generally using linens or coarser goods which are made from hemp and hemp tow.

Mr. BORAH. May I ask the Senator from Utah what paragraph of this schedule covers the article out of which are made bags in which wheat and other grains are shipped?

Mr. SMOOT. The bagging to which the Senator refers is included in this schedule, I will say. Does the Senator desire to know in which paragraph it is included?

Mr. BORAH. I do not want to interrupt the Senator, but I desire to be advised as to the paragraph in time to give some attention to it.

Mr. SMOOT. I will say to the Senator that paragraph 1017 deals with the cloth out of which bagging is made.

Mr. BORAH. Do we not have to take care of some of the material that enters into it?

Mr. SMOOT. Yes; and that is when we begin on the bag. The bag itself is in paragraph 1007. Paragraph 1008 deals with the cloth that goes into the bag.

Mr. President, I think there is no need of my taking the time now to take up each one of these paragraphs with woven cloths, because when we reach those paragraphs there no doubt will be a general discussion upon them, and then there will

be questions asked by Senators, and I shall be glad to answer any question that I can. I want to say that I have quite a number of amendments to this schedule, and if the Senator from Arkansas [Mr. ROBINSON] is going to have charge of this schedule on the other side of the Chamber I shall be glad to furnish him with these amendments that I propose to offer as the paragraphs are reached.

Mr. ROBINSON. I presume the Senator means he will furnish me with them now?

Mr. SMOOT. Now; yes.

Mr. ROBINSON. I certainly should like to have them, and I suggest that the Senator have them printed for the use of all Senators.

Mr. POMERENE. That is right.

Mr. ROBINSON. And if the Senator has available extra copies of them now, I should like to have them for my immediate use.

Mr. SMOOT. I will hand them to the Senator from Arkansas in a very few moments.

I now ask that the amendments that I send to the desk may be printed the same as the amendments were printed that I sent to the desk in the case of the cotton schedule, all in one pamphlet.

Mr. POMERENE. Permit me to suggest that they be printed in the RECORD, and then we can see them in the morning.

Mr. SMOOT. Just as the Senator says; but it seems to me that it would be very much better to have them printed as I had some amendments to the cotton schedule printed, and then they will be on the desk of each Senator.

Mr. POMERENE. It would be more convenient, of course, when we get here; but some of us, at least, like to look at the RECORD in the morning.

Mr. ROBINSON. Let them be printed in the RECORD, too, but let them be printed as amendments usually are printed, because they are much more convenient to handle in that way.

Mr. SMOOT. I ask, then, that they be printed in the RECORD and also printed as amendments are usually printed.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendments referred to are as follows:

Amendments intended to be proposed by Mr. SMOOT, on behalf of the Committee on Finance, to the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, viz:

On page 132, line 11, strike out "9" and insert in lieu thereof "7."

On page 133, line 3, strike out all of the matter after the word "pound" and the colon down to and including "valorem," in line 7, and insert in lieu thereof the following: "*Provided*, That the duty on any of the foregoing yarns shall be not less than 30 nor more than 40 per cent ad valorem."

On page 134, line 18, strike out "25" and insert in lieu thereof "15."

On page 135, line 11, strike out "16½ cents per pound and 25" and insert in lieu thereof "60."

On page 135, line 16, strike out "9 cents per pound and 25" and insert in lieu thereof "55."

On page 135, line 21, strike out "50" and insert in lieu thereof "45."

On page 135, after line 21, insert a new paragraph to read as follows:

"PAR. 1009a. Plain-woven fabrics, not including articles finished or unfinished, of flax, hemp, ramie, or other vegetable fiber, except cotton, weighing less than 4½ ounces per square yard, 35 per cent ad valorem."

On page 136, line 11, strike out "50" and insert in lieu thereof "45."

On page 137, line 14, strike out "50" and insert in lieu thereof "35."

On page 137, line 15, strike out "60" and insert in lieu thereof "45."

On page 138, line 20, strike out "50" and insert in lieu thereof "45."

On page 139, line 1, strike out "9" and insert in lieu thereof "7."

On page 139, line 2, strike out "7" and insert in lieu thereof "5."

Mr. WILLIS. Mr. President——

Mr. SMOOT. I yield to the Senator.

Mr. WILLIS. Before the Senator leaves paragraph 1008a I want to ask a question relative thereto. I understand that it is not now under discussion.

Mr. SMOOT. No.

Mr. WILLIS. The paragraph is stated in such technical language that I am not able to determine the character of goods or cloth that is described here. Will the Senator give us a little more information on that point? I desire to study it so far as I can, and I can not tell what the character of goods is.

Mr. SMOOT. I will say to the Senator that that paragraph covers hucks.

Mr. WILLIS. What is that? That does not mean a thing to me.

Mr. SMOOT. It is toweling.

Mr. WILLIS. Of the coarser grades, I assume?

Mr. SMOOT. Yes; some of it very cheap, and some of it quite expensive. That paragraph also covers napkins and crashes, generally with a count of 120. That is, those are the finer grade of goods.

Mr. WILLIS. I want to be sure that I understand another statement the Senator made a bit ago. I have had a good deal of correspondence with my constituents, as no doubt other Members of the Senate have with theirs, many of whom are writing in and complaining about this paragraph and related paragraphs on this basis, saying that we do not produce these goods in this country. I understand that to be the Senator's statement, that we are not now producing them.

Mr. SMOOT. We are producing them now.

Mr. WILLIS. To what extent?

Mr. SMOOT. The only way in which I can answer that question is by saying simply to the extent to which they can compete with foreign manufacturers.

Mr. WILLIS. The Senator has not at the moment any figures to indicate what our production is?

Mr. SMOOT. No; but, of course, these are the very items as to which, before the war, the amount that was made in this country compared with the consumption in this country was trivial.

Mr. WILLIS. During the war did we produce extensively?

Mr. SMOOT. Yes; we increased greatly our production in this country.

Mr. WILLIS. The Senator can not indicate what percentage of our consumption we produced here?

Mr. SMOOT. No.

Mr. WILLIS. I am trying to get some basis to see how far the industry has gone along.

Mr. SIMMONS. Is the Senator speaking about linen goods now?

Mr. WILLIS. I am now speaking about whatever is described in paragraph 1008a. I have been trying to find out what it is, and the Senator throws light on the subject by saying that it is hucks. Of course, that makes it all plain.

Mr. SMOOT. The Senator knows what crashes are?

Mr. WILLIS. Yes.

Mr. SMOOT. And the Senator knows what napkins are?

Mr. WILLIS. Yes. I understand the Senator now, and the Senator understands what I am trying to get at.

Mr. SMOOT. Yes; and the census does not give these goods separately. If this bill passes in the shape that we have it now under paragraph 1008a, all of those goods will be kept separate, and then we can tell exactly what the production is in the United States and what the importations are, as well, of similar goods. In the past they have not been separated, and that is the reason why we take them out and make a new paragraph of them, so that we can tell hereafter what the importations are.

Mr. WILLIS. That is why I have not been able to find any information in the summary here. I can not find anything about it.

Mr. SMOOT. That is the reason.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

Mr. ROBINSON. Mr. President, the paragraph now immediately under consideration is paragraph 1001, relating to flax in the various stages of manufacture, and also to hemp and hemp tow, hackled hemp, "line of hemp," and so forth. The committee has not reported any amendment to the provisions relating to flax, but has reported two material amendments concerning hemp and hemp tow.

The House rates relating to flax are quite high. From a limited study of this paragraph I am very gravely doubtful whether any beneficial result from the standpoint of protection can be accomplished. I have not found any evidence inducing the conclusion that even with the very high rates now proposed, both as to flax and as to hemp, materially increased production in the United States will result. My studies of the subject lead to the conclusion that owing to the peculiar character of the labor involved in producing flax for fiber purposes and hemp for use in the production of the various commodities for which it is used, it can not be expected that an industry of any very material importance will be created in the United States.

I find from an examination of the hearings before the committee that the Senator from North Dakota [Mr. LADD] appeared before the committee, and it was represented that he had made a prolonged study of the subject of flax production in the United States, and his conclusion was that the emergency tariff bill in some way has had the effect of depressing rather than encouraging the industry. I presume it was because flax for fiber purposes was not embraced within the emergency tariff, although he does not state upon what facts or circumstances he bases that conclusion.

The testimony of the Senator from North Dakota [Mr. LADD] is found at pages 3443 and 3444 of the hearings. He said, on page 3444, among other things:

> In 1912 we were growing very much more flax than we are growing to-day, and the emergency tariff unfortunately worked disastrously so far as the flax industry was concerned, and there has been no protection, no real protection, for the fiber industry and no encouragement for it in the West.

As a matter of fact, the emergency tariff bill did not deal with the subject of flax for fiber. If my recollection is correct there is a tax of 30 cents a bushel upon flaxseed, but no tax is imposed upon flax grown for fiber purposes.

Mr. SMOOT. In the emergency tariff bill?

Mr. ROBINSON. Yes.

Mr. SMOOT. That is correct.

Mr. ROBINSON. All of the authorities that I have been able to consult agree that the production of flax in the United States for seed purposes is quite a different question and quite a different industry from that involved in the production of flax for fiber purposes. Nearly all the production that we have heretofore had has been for seed. There never has been very much production for fiber purposes, and that seems to be due to the peculiar character of labor required—hand labor, quite difficult to perform, and requiring great strength. The flax grown for seed purposes is short, and not adapted to the production of fiber. The United States has for many years produced material quantities of flax for the purpose of growing seed, but it has never produced considerable quantities for fiber purposes. The production for fiber purposes has varied very greatly, and unaccountably, in my judgment—that is, there is nothing in the record that accounts for the increase which has occurred in some years and the very rapid falling off which has resulted in following years; but in no year has there been a very material production of flax for fiber purposes.

Under the Payne-Aldrich law the rates were quite material. Flax straw had a rate of $5 per ton. Hackled flax had a rate of 1 cent a pound; "dressed line" flax, which represents a state of the fiber more advanced toward the purposes for which it is finally used in manufacture, had a rate of 3 cents a pound. Flax tow and flax noils had a rate of $20 per ton.

Under the Underwood tariff law all flax was admitted free of duty, doubtless on the theory that it was a necessary raw material for use in the manufacture of essential commodities, and that its production in this country would not readily be promoted by the imposition of revenue rates of duty. As I have already stated, I have not found any evidence except the opinion stated by the Senator from North Dakota [Mr. LADD] that any rate of duty which Congress might impose upon flax would result in the building up of an industry in the United States.

The Senator from North Dakota, however, made this statement on page 3443 of the hearings:

> I simply wanted to say that, in my judgment, if we want to encourage the flax industry in this country we can do so by putting on a reasonable protection, and thus encouraged the farmer will grow it; otherwise he will not. If we continue the policy that has been continued since 1912, there will be no flax industry in this country in five years more.

The growing of flax for seed is already fairly prosperous in this country. The growing of flax for fiber has never been prosperous, was not prosperous under the Payne-Aldrich rates, and from the evidence I have been able to find and consider in all probability the flax-fiber industry will never be materially advanced or firmly established by the imposition of even the rates carried in this bill.

To grow flax for fiber, as already stated, requires an extraordinary amount of strength and tedious and disagreeable labor, both in the actual cultivation of the plant and in its preparation for the market. The amount and character of trained hand labor involved in flax-fiber production is such that the American farmer has found it more profitable to devote his land and capital and efforts to the production of other agricultural crops, which permit of the larger use of machinery. Little flax is grown for fiber in the United States, the largest acreage planted since 1900 being 4,800 acres in 1920.

I do not believe that any material controversy will arise as to the correctness of these facts. Russia, Austria, Hungary, Italy, Belgium, and France are the flax-producing countries of the world. The largest amounts are produced in Russia and the finest quality in Belgium and northern Ireland.

The imports have varied very greatly. In 1913 the previous specific duty, of which the average ad valorem equivalent had been 9 per cent, was entirely removed, but notwithstanding the removal of all duty at that time there has been no substantial increase in imports.

Mr. HITCHCOCK. Mr. President, before the Senator proceeds, can he state why flax is raised in such limited quantity here and is raised in such limited parts of the world? Is it on account of the cheapness of labor?

Mr. ROBINSON. I have already attempted to explain that the raising of flax in any quantity in the United States is limited for two reasons—first, other crops are more profitable; secondly, they are more easily grown, it being quite difficult to secure the labor necessary for the culture and production of flax for fiber purposes. The other crops are more valuable, they yield a greater profit. The labor necessary to produce them is more easily procured, and, to be frank, there is no economic necessity or justification, under present conditions, for attempting to build up a flax industry in the United States, according to the facts I am acquainted with.

Mr. HITCHCOCK. I notice from the reports that Russia seems to be the largest producer of flax, and I have been wondering whether it is on account of the cheap labor there.

Mr. SIMMONS. They produce 85 per cent of the world's supply.

Mr. ROBINSON. The production in Russia has fallen off a great deal since the war began, and it is very much less now than it was in 1913. That is largely due, I take it, to the disturbed conditions, but the evidence also tends to show that the character of the fiber grown in this country, considered in connection with the purposes for which it is produced, does not compare very favorably with the fiber grown in other countries for the same purposes. In other words, we are at an economic disadvantage in the production of flax.

Mr. SMOOT. Mr. President, I suggest to the Senator from Arkansas that America has been trying to do what every other country has done in relation to her flax. Russia was the great flax-producing country of the world, and nearly all the countries depended upon the flax that was raised in Russia. Since the war and since the disorganization of Russia every country has been at its wit's end to get the necessary flax to continue the making of goods of which flax is a component material. It is not only the people of America who have found themselves in the position in which we are, but the people of every other country.

Mr. HITCHCOCK. I was asking a question which perhaps the Senator from Utah can elucidate, as to why Russia was the great producer. Was it on account of the cheap labor there, or something in the climate or the soil?

Mr. SMOOT. The climate and the soil are favorable to the production of flax, but in addition to that they had been used to that work. The hackling of hemp is a very difficult piece of work, and not a very pleasant one by any manner of means.

Mr. ROBINSON. And it must be done by hand.

Mr. SMOOT. It must all be done by hand. I do not know whether it is worth while to put it into the RECORD, but I have a complete report made by Mr. A. H. Wright, of the agricultural experiment station of the University of Wisconsin, which gives in detail every step that has to be taken, and up to date they have never found machinery that could do the work of hackling. They undertake to say now that they have invented a machine which can do it, but it has not yet been demonstrated that it will be a success. I have often wondered why there has not been invented a machine which could do that work, but the Senator from Arkansas is correct in saying that up to the present time that work is done by hand, and it is very unpleasant, laborious work.

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Arkansas yield to the Senator from Kentucky?

Mr. ROBINSON. I yield.

Mr. STANLEY. Professor Taussig, in his history of the tariff, has a very interesting chapter on the production of flax, and the reasons why it never has been and never can be, while present industrial conditions exist, a profitable industry in the United States.

In the first place, we produce hemp here, which is comparable in a way with certain cheaper forms of flax tow, and that hemp is cut. Flax is not cut; flax is pulled. Pulling flax in the days of chattel slavery was regarded as the hardest, meanest character of work to which you could subject the muscles of a man; he has to be stooped over all the time, pulling that heavily rooted plant. It has to be pulled, because the finest fiber, as I understand it, is near the root, at the base of the stalk. The finest flax is grown on the most intensely fertilized soil, the very richest soil that can be found. The highest degree of fertilization is used in raising the flax, to get as long

a stalk as possible, to secure the long, fine fiber. Then that must be pulled. The result is that an acre or two of flax is all that a man can raise and pull. There is no more intensive work known than the culture of flax. It does not require a high order of intelligence. It simply requires physical strength and endurance.

After the flax is pulled, in order to secure the product for linen it must be water-rotted. The reason we do not produce the finest character of hemp in this country is because we do not water-rot it. With the exception of cleaning out vaults and things of that kind, there is nothing more unwholesome, nothing more foul and dirty, than the handling of that water-rotted plant. The stalks are thrown into the water and allowed to rot. Then a man must go in there, waist deep in stench and filth, and get the flax out for subsequent treatment.

The breaking—that is, the separating of the fiber of the flax from the stalk—is the next process. The stalk of the flax and the stalk of the hemp are worthless; they are burned up as chaff.

The fiber is broken and separated from the stalks. Then after the separation from the stalk by the process of breaking the fiber is combed and straightened out by a process of hackling. That is, the fibers of the hemp—and I presume it is the same with the flax—are thrown over a set of teeth, a long rack of steel teeth a foot high; the hemp or the flax is thrown over that and pulled through the teeth until it is combed and looks like hair, long and straight. That is a difficult task.

Professor Taussig estimates the number of men who would be required in producing flax in this country. He said it would take a great number raising flax to produce as much as one man would produce raising corn in southern Illinois. In other words, the average farm hand in this country, where we have machinery and tools and appliances, with our method of cultivation and with our improved agricultural implements can, as the Senator from Nebraska has well remarked, produce as much as half a dozen or a dozen, perhaps, of these poorest-paid laborers in Europe, these hand workers, these men who break the ground with a spade and pull the flax and hackle it by hand, while one man with a riding plow in the United States can produce enough to employ a little army of them. To attempt now to avail ourselves of this cheap, unwholesome, laborious, dirty, insanitary labor is an act of folly. The only result is that you increase the cost of an essential article, linen, to the American consumer by any such foolish, unscientific, ill-considered legislation.

I am persuaded that a thorough investigation of this industry—and I profess to have nothing but a cursory knowledge of it—will convince members of the committee and convince the Members of the Senate that an attempt to hothouse or to artificially propagate flax growing in this country would be just as foolish as to attempt to raise pineapples.

In addition to that the only place they propose to raise the flax is in places where the flax is raised for seed. As I understand it, when they fallow the prairie it subsequently grows up in weeds and things like that, and on the border of newly reclaimed land from the time the prairie is first taken under cultivation the flax grows better than anywhere else.

It is along that stretch of prairie border that practically all the flaxseed and all the flax is raised. They could not raise a stalk of flax for commercial purposes to do any good there. They never have. I will guarantee they never will raise fine flax in that way. It must be raised in a garden. It must be raised on land either naturally fertile, a very deep soil that is not found on the plains, or soil that is made as the hothouses make their soil and the market gardeners make their soil, where it is loam produced by the skill of the chemist and of the gardener. It is impossible to raise the flax at all where they propose to raise it. I believe it is practically impossible to raise it commercially anywhere in the United States.

Mr. SIMMONS. Mr. President——

Mr. ROBINSON. I yield to the Senator from North Carolina.

Mr. SIMMONS. I think, following out the thought of the Senator from Kentucky, that we may as well dismiss the idea that we can, by artificial stimulation, establish the business of growing flax in this country or, indeed, on this continent. I think our experience and the experience of Canada during the war demonstrates that. In Canada as the result of the war, as in this country as the result of the war, being shut off from our source of supply, we began to expand our acreage in flax. In Canada the acreage in flax increased from 4,000 acres in 1915 to 20,262 acres in 1920, and then declined to 7,300 acres in 1921. In this country, for the same reason, we had 2,240 acres of fiber flax in 1911, 1,110 acres in 1914, 4,300 acres in 1918, 6,090 acres in 1920, and only 1,525 acres in 1921, showing that both in Canada and in this country, while we expanded our acreage very much during the war for reasons of necessity, yet as soon as that necessity passed away we began a rapid and very drastic curtailment of our acreage in flax. It is an industry that we can not hope to establish—the flax industry—either in this country or in Canada, in my judgment—I mean except for food purposes, which is a different character of flax—and there is no use of trying to stimulate such an industry as that.

Mr. ROBINSON. Mr. President, I had before me the facts just brought to the attention of the Senate by the Senator from North Carolina and had expected to present them, but he has done so and I thank him. I want to make the statement, however, that I do not quite agree with his proposal that the necessity for increased production in flax has passed. I do agree with him—indeed, it was my original proposition—that this attempt will prove abortive, because the industry is of such a nature that it can not thrive in the United States under conditions which prevail here now, and which are likely to continue for many years, if not generations, to come.

Mr. SMOOT. Unless we have machinery to handle it.

Mr. ROBINSON. There have been some efforts made to produce machinery that will do part of the work which has been so well described in detail by the Senator from Kentucky [Mr. STANLEY]. But those efforts have not yet proven successful. They have so far apparently failed. Those who began the use of the machines during the period referred to by the Senator from North Carolina, in which there was an increased acreage in the United States in flax for fiber, have abandoned them, according to statements made before the Committee on Finance by Mr. Barbour, who appears to be fairly familiar with the conditions affecting the industry. But the nature of the culture of flax is such that it will be very difficult ever to invent machinery that will do the work of hackling, retting, and weeding.

I believe the Senator from Kentucky [Mr. STANLEY], who so admirably described the process of hackling and retting, did not go into a description of the work of cultivating the flax, which under present methods requires the pulling of weeds by hand. I do not say that in the progress of time some machinery may not be found that will be available for weeding, but until that machinery has been invented, and machinery invented that will successfully do the work of hackling, the United States will never have a well-developed flax-producing industry for fiber purposes. It is perfectly useless to waste the time of the Senate and the time of the country in an effort to stimulate the industry into such a degree of prosperity that it will become permanent.

The Senator from North Dakota, as I said in the beginning, complains that the emergency tariff law has depressed the flax industry in the United States. It was not affected by it directly, because there is no provision in the emergency tariff law relating to flax for fiber. I presume what he meant was that the emergency tariff had made more profitable other crops which are in a sense grown in competition with flax for fiber, and that as a result the flax crop had become less profitable, and therefore the acreage has decreased.

But, recurring now to the question of production, it appears from the Tariff Information Survey, which we are all using in the consideration of the bill, that in the pre-war years Russia had an annual production of 600,000 tons, one-half of which was exported. That constituted about 85 per cent of the world's flax. The remainder was produced in Austria-Hungary, France, Italy, Ireland, and Belgium. The Russian production declined as a result of the war to about one-tenth of the normal. The world acreage in flax for fiber in 1920 had fallen from 4,500,000 to 1,155,000 acres, or approximately one-third. Assuming that the normal acreage would be 4,500,000 acres, it is apparent that in 1920 the acreage throughout the world was less than one-third of the amount that it normally required.

It is not clear to me that the necessity for an increase in the production of flax has passed if the industry can be made profitable, but I do not think there is any way in the world, by placing the rate proposed by the Finance Committee or any other rate that the human mind can conceive, that will make the American people perform the labor that is required to be performed before this product can be successfully produced.

In view of the fact that other crops are much more profitable, much more easily produced, it is hopeless from the standpoint of protection to impose those duties in the belief or on the theory that they will result in a great flax industry in the United States. If you put the duty five times what it is proposed here, and therefore prohibit the importation, which you dare not do if you expect to produce in the United States the

commodities which are manufactured from flax, you still would have no flax fiber produced in this country. You would destroy the small domestic linen industry and compel the use of cotton and other substitutes for linen. The inevitable result, if we shut off the foreign supply by prohibitive rates of duty and fail to create and maintain a flax-fiber industry in the United States, would be to destroy the linen industry in the United States absolutely. So the practical thing to do is to recognize the laws of nature and the conditions which the progress of our civilization have imposed upon the industry and its development in the United States.

Mr. SIMMONS. Mr. President——

Mr. ROBINSON. I yield to the Senator from North Carolina.

Mr. SIMMONS. As a matter of fact, we have no linen in this country. We import 98 per cent of the linen that we consume.

Mr. ROBINSON. That is true.

Mr. SIMMONS. In order to establish the flax industry in this country we would not only have to impose, as the Senator said, a prohibitive duty upon the raw flax but we would have to impose a prohibitory duty upon the importation of the product of flax, linen, a product which we do not now make at all.

Mr. ROBINSON. That is, we do not make it to any great extent.

Mr. SIMMONS. That is true. If we impose a prohibitive duty upon both the linens that are made out of the flax and the flaxseed, we might possibly build up a linen industry and a flax industry in this country, but we would have to impose prohibitive duties upon both.

Mr. ROBINSON. There is one thing certain, that we can not build up the linen manufacturing business in the United States, admitting it to be small, as stated by the Senator from North Carolina, if we place a prohibitive duty upon the raw materials out of which linens may be manufactured. Why is the linen manufacturing industry in the United States so small now? It is because, with the domestic production and with the importations of linens that have been had, the supply of raw material has been inadequate and the labor required, both in producing the raw material and manufacturing it, is not attractive to our workers.

Mr. STANLEY. Mr. President, the Senator is covering the ground so thoroughly that I hesitate to interrupt him at all——

Mr. ROBINSON. I am glad to have the Senator from Kentucky do so.

Mr. STANLEY. I feel tempted to supplement his interesting statement with a suggestion that perhaps is not as good as what he is saying, but it strikes me right at that point to inquire, with all our legislation, our 8-hour laws and other legislation that has gone to the limit of our Federal tether to protect the health and personnel of the laboring people of the United States, why the committee should be bent upon establishing an industry that is notoriously the most unwholesome in all the textile world? Flax can not be woven except in the most moist surroundings. Every author on the subject has dwelt on that, and Professor Taussig, particularly, has dwelt at great length on the unwholesomeness of the work, it being necessary to perform it in an atmosphere so damp as almost to be a vapor. There is no industry, not even the silk industry, as I understand, in which the work is more unwholesome than in the flax business, from start to finish. The conditions that apply to the culture of flax go into the mill, into the spinning of flax.

Mr. SMOOT. I will say to the Senator that the Finance Committee made no change whatever in the House rates on flax. The only change which we made was on hemp and hemp tow.

Mr. ROBINSON. I pointed out that fact in the beginning.

Mr. SMOOT. But the Senator from Kentucky was speaking of flax.

Mr. ROBINSON. Yes; and I have been speaking of flax and so has the Senator from Utah been speaking of it.

Mr. STANLEY. If the Senator from Arkansas will pardon me a moment, I desire to say that there is no use, it is worse than useless, as the Senator from Utah will concede—for he is always fair—for us to attempt to raise flax if we are not going to spin it. We shall never raise flax fiber and ship it to Belgium or to Ireland to be spun over there in competition with the cheaper labor of Belgium and Ireland and other flax-spinning countries. We are going to produce linen, certainly, if we produce the raw product of the linen.

There is no reason to anticipate that even if we could raise flax fiber we should want to establish linen mills in this country. The work in cotton is cleaner and more wholesome, and the operatives are better paid. There is no reason why we should not exchange our commodities for the flax fiber and for the linen, which we may do to advantage. As the Senator from Arkansas [Mr. ROBINSON] has conclusively shown, the imposition of this proposed duty would be utterly indefensible if not absurd.

Mr. ROBINSON. Mr. President, I thank the Senator from Kentucky for the statement that he has just made. It reinforces the argument against the proposal which underlies this schedule both as to flax and hemp. As I shall attempt to show in a moment, the same argument applies with almost equal force to hemp. By the imposition of tariff duties the flax and hemp industry can not be made profitable in the United States in competition with other agricultural crops. In the first place, the people who are engaged in agriculture will not perform the labor. The only answer to be made to that is that the time may come when in the progress of science machinery will be invented to take the place of this grinding and insanitary toil, which the American people will not perform and which I do not want to see them perform; but, so far, such machinery has not been invented, and such machinery as has been invented has thus far proved unsuccessful.

I think the better policy is the policy of the Underwood law, to put flax and hemp on the free list. In doing that, we should not sacrifice any promising industry in the United States, because no such industry exists.

I now go back and quote in part the figures given by the Senator from North Carolina [Mr. SIMMONS] awhile ago. The whole American acreage in fiber for flax purposes in 1911 under the Payne-Aldrich law, when the rates were protective, was 2,240; in 1914 it was 1,100. It had fallen off one-half, but the original amount was so small as not to make the decline in acreage of very material importance. In 1918 the acreage had increased to 4,300, in 1920 it was 6,090, and in 1921 it was 1,525.

Through all those years, with the demand constantly increasing, with the commodities manufactured from flax growing more and more useful, the acreage in flax for fiber in the United States in 1921 was approximately what it was in 1911, and scarcely more than it was in 1914.

Now, with respect to hemp, everything that has been said about the production of flax and the effect of high duties on importations of flax applies with almost equal force to hemp. The committee evidently were not greatly impressed with the theory of the Senator from North Dakota [Mr. LADD] that by the imposition of a protective duty on flax for fiber a great industry could be developed in the United States, because they did not change the House rates, but they did make very material changes in the House rates on hemp. I have found, however, very little if any more justification for that action than would have applied to an increase in the rates of flax.

The House rate on hemp is three-fourths of 1 cent per pound. The Committee on Finance of the Senate has recommended that it be increased to 2 cents a pound. Under the Underwood law, as everyone understands, hemp like flax was on the free list. The chief uses of hemp are for cordage material and in coarse fabrics and carpeting.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER (Mr. ODDIE in the chair). Does the Senator from Arkansas yield to the Senator from Nebraska?

Mr. ROBINSON. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. The figures given by the Senator appear to be subsequent to 1911. I should like to ask him whether he has examined the figures during the high protective years of the Payne-Aldrich tariff law?

Mr. ROBINSON. During the year 1911 the Payne-Aldrich law was in operation.

Mr. HITCHCOCK. Yes; that was one year.

Mr. ROBINSON. Yes.

Mr. HITCHCOCK. But there were four or five years of high protection. Was there any development or progress during that period?

Mr. ROBINSON. No. As I stated a few moments ago, one year the acreage would double, and the next year it would fall off; and, while there was some increase under the Payne-Aldrich Act, it was not material from the standpoint of the necessities of the country for flax fiber. Such development as occurred at no time supplied anything like the domestic demand.

We have always, even under the Payne-Aldrich Act, depended upon importations for our principal supply, and under this bill we will do the same thing.

There is some acreage in Wisconsin in flax. The American acreage in fiber flax is confined principally to Michigan, Minnesota, Wisconsin, Oregon, and a small acreage in Maryland; but this area is very small, and nothing has been brought to my knowledge which indicates that it will be greatly increased, no matter what rates of tariff may be imposed on importations.

It is not an American industry; it is not an industry that does or can thrive in competition with other agricultural industries. The American people will not perform the labor that is necessary to be performed in order to produce this crop.

The production of hemp in the United States prior to the war averaged about 6,000 tons per annum, or 1 per cent of the world's production. In 1918 it was 9,375 tons, and in 1921 it had fallen to 3,420 tons, showing that the same economic law applies to the production of hemp in the United States that applies to the production of flax.

The production of hemp on a large scale in this country has been curtailed, not by foreign competition but by inability to compete with our established crops, owing to the relatively large amount of skilled and hand labor involved. Our imports have been supplementary rather than competitive. The bulk of the imports is of better quality than can be efficiently produced in the United States. In the face of the growing world demand for agricultural products for which no substitute can be found and which permit of the liberal use of labor-saving machinery, it seems highly improbable that the American farmer will turn from other agricultural production to the production of hemp.

The average imports of hemp for the period 1910 to 1913 were 6,000 tons, and for 1914 to 1918, in spite of greatly increased war demands, imports averaged only 7,800 tons. Imports in 1920 were about 7,000 tons, and in 1921 slightly less than 6,000 tons. The average annual consumption of hemp in the United States is about 12,000 tons.

In view of these facts, what is the reason for the effort in this bill to take hemp from the free list and place it on the dutiable list? What is the justification for the action of the Finance Committee in more than doubling the rates proposed by the House on hemp? The rates proposed by the committee are more than double the rates under the Payne-Aldrich Tariff Act.

With respect to the second amendment in that paragraph—hackled hemp, including "line of hemp"—the House rate, 1½ cents per pound, is to be superseded by the committee proposal of 4 cents per pound. Under the Payne-Aldrich Act, hackled hemp carried a duty of $45 per ton, the equivalent of about 2 cents per pound.

The importations of hackled hemp have been negligible. In 1910 they amounted to 45 tons; in 1911, 105 tons; in 1912, 162 tons; in 1913, 209 tons; in 1914, 450 tons; in 1915, 466 tons; in 1916, 1,613 tons; in 1917 the importations fell back to 751 tons; in 1918 still further to 335 tons; in 1919, 255 tons; in 1920, 250 tons; and in 1921 the amount was 881 tons.

In view of the small importations and the increased demand for this commodity, I am unable to understand the justification for putting hemp on the dutiable list at all; much less can I find a justification for the very high rate proposed by the Senate Finance Committee.

I inquire of the Senator from Utah—I see that he has left the Chamber, however, so I will ask the Senator from North Dakota—whether the amendments to this schedule, of which a large number were submitted for printing a while ago, embrace modifications of the committee rates in this paragraph?

Mr. McCUMBER. I think so.

Mr. ROBINSON. Can the Senator state what they are?

Mr. McCUMBER. The expert says there are no amendments to the committee amendments in this paragraph.

Mr. ROBINSON. This proceeding illustrates the advisability of publishing the committee amendments in advance of considering the schedules as we reach them. The Senator from Utah is not now present, but I think these amendments, whatever they are, should have been given to the Senate and printed before the schedule itself was reached. The Senator from North Dakota was under the impression that the committee had proposed to reduce or change the amendments which it had first submitted to this paragraph. The expert informs him that the amendments submitted by the Senator from Utah do not embrace any alterations in the pending paragraph.

Mr. McCUMBER. No; they do not change the alterations which the committee made in the pending paragraph.

Mr. ROBINSON. No. It was my understanding of the statement that the Senator last made that the new amendments do not relate to this paragraph. As to this particular paragraph, the committee stands on its action in reporting an amendment raising to 2 cents a pound the three-fourths of 1 cent in line 1 on page 132, and raising to 4 cents a pound the 1½ cents a pound in line 3 on page 132.

Mr. President, if it is perfectly apparent under conditions now existing and likely to continue that it is impossible, even undesirable, to develop in the United States this industry, why should we burden it with heavy rates of duty? What benefit will come to the people of the United States from the imposition of this high tax? The proposal to increase rates on agricultural products has been very popular in the Senate, and I have felt some sympathy with any policy which is calculated to encourage and to develop and stabilize conditions in agriculture; but in so far as the production of flax for fiber and the production of hemp in the United States is concerned, I have said repeatedly that it is neither desirable nor probable that such an industry, under existing conditions, may be developed.

I should prefer that the unfortunate laborers of Russia, who by centuries of experience have been trained to the performance of this difficult, un-American, unremunerative, and insanitary toil, should continue to do it. But whatever may be the purpose of Senators respecting the subject, I have not the slightest idea that any persons now engaged in agriculture in the United States or likely to become engaged in that occupation during the lifetime of the present generation will surrender their aspirations and their lives to the conditions of toil which under the evidence in this case are shown to surround the production of flax for fiber and the production of hemp. It is a waste of time, accomplishing no good, to try to put flax and hemp production in competition with other agricultural crops in the United States, which experience has shown may be more readily, more easily, and more profitably produced. By imposing these rates you are not creating a new industry; you are not stabilizing or making permanent an old one. You are complicating the already difficult conditions which surround the use of the necessary articles which are manufactured from flax and from hemp.

In this view of the facts it is my intention to propose an amendment to the committee amendment, and if under the parliamentary status I were at liberty to do so I would test the sense of the Senate at this time on whether the principle of protection which has been created and developed in the economic history of this country is to be made applicable to the industries of hemp growing and flax growing in the United States; but as that can not be done under the parliamentary situation, I propose, in lieu of the committee amendment, to strike out "2 cents" and insert "one-fourth of 1 cent."

Mr. McCUMBER. Mr. President, the Senator from Arkansas just asked me a question with reference to the amendments offered by the Senator from Utah [Mr. SMOOT]. When he asked me the question, I supposed that he referred to the entire list of amendments, and while the entire list of amendments does not change the amendments in the particular paragraph that the Senator had under discussion it does change the committee amendments in other paragraphs in the schedule.

Mr. ROBINSON. I understood the Senator.

Mr. McCUMBER. When I answered, I supposed he had reference to the entire schedule and not the particular paragraph.

Mr. ROBINSON. I asked about this particular paragraph.

Mr. McCUMBER. It was my misunderstanding.

Mr. President, the Senator from Wisconsin [Mr. LA FOLLETTE] presented this matter to the committee on behalf of the hemp growers in the United States. I have the correspondence, which was sent up by his secretary to me, from the Agricultural College of Wisconsin, which goes very fully into every feature of this matter; but as there are five letters, and they are somewhat lengthy, and I desire to have them read so that Senators will understand the matter, I shall not ask that we take them up this evening; but if the Senator from Wisconsin is not here to-morrow I shall take the liberty of presenting and having read those letters, which are very elucidating upon the entire subject.

I think the Senator from Pennsylvania [Mr. PEPPER] desires to present a matter.

Mr. SIMMONS. Mr. President, before the Senator from Pennsylvania does that, the Senator from Nebraska [Mr. HITCHCOCK] asked the Senator from Arkansas for some information with reference to hemp production before the war—that is, anterior to 1914. At the request of the Senator from Arkansas I have been attempting to look up that information, and I find the production of hemp in 1899 and 1909 only. I find that the acreage of hemp planted in this country in 1899 was 16,042 acres and in 1909, nine years afterward, only 7,647 acres, or a falling off of 52 per cent—that is to say, the acreage in 1899 was, I think, something about the same as it is now.

I read from the Tariff Summary, on page 903, the statement that—

> In 1921 Wisconsin reported about two-thirds and Kentucky about three-tenths of the 11,000 acres devoted to hemp.

So that it would appear that in 1899 there was 16,000 acres devoted to hemp and in 1921 only 11,000 acres devoted to hemp.

Mr. STANLEY. Mr. President, one question right there: Does that include both seed hemp and fiber hemp?

Mr. SIMMONS. No; I think that refers only to fiber hemp.

Mr. ROBINSON. I understood the Senator from Nebraska to ask for the production of flax under the Payne-Aldrich law.

Mr. SIMMONS. I thought he asked for the figures as to both flax and hemp. I have not been able to find any statement as to the production of flax for fiber. I find the production of flax for seed. I suppose that before 1909 the production of flax for fiber was so small that it was not reported.

Mr. ROBINSON. It has never been considerable.

Mr. SIMMONS. It is not reported.

Mr. ROBINSON. I gave the amount for 1911, which was a time when the Payne-Aldrich rate was in effect.

SESQUICENTENNIAL CELEBRATION AT PHILADELPHIA IN 1926.

Mr. PEPPER. Mr. President, I ask unanimous consent for the present consideration of House Joint Resolution 170, to approve the holding of a national and international exhibition in the city of Philadelphia in 1926 upon the Fairmount Park and parkway site selected by the Sesquicentennial Exhibition Association, and lands contiguous thereto that may be acquired for that purpose, as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence. I think the joint resolution will occasion no debate. It has been reported favorably by the Committee on Foreign Relations, and I ask unanimous consent for the immediate consideration and disposition of it.

Mr. OVERMAN. Let it be read.

The PRESIDING OFFICER. The Secretary will read the joint resolution.

The joint resolution was read as follows:

Whereas preliminary steps have been taken by the mayor and council and a citizens' committee of Philadelphia to celebrate in that city in 1926 the one hundred and fiftieth anniversary of the signing of the Declaration of Independence by holding an exhibition in which it is expected that the various States of the Union, the Federal Government, and all the nations of the world will be represented; and

Whereas the Legislature of the Commonwealth of Pennsylvania unanimously passed a resolution April 28, 1921, that the Commonwealth should prepare for and participate in such sesquicentennial celebration by making a suitable exhibit therein on the part of the Commonwealth, and requested that the Federal Government should approve the holding of such an exhibition in Philadelphia in 1926 and that appropriate steps should be taken to invite the participation and cooperation of the States of the Union and the nations of the world; and

Whereas the Governor of the Commonwealth of Pennsylvania, in the name and by the authority of that Commonwealth, has issued letters patent incorporating the Sesquicentennial Exhibition Association, May 9, 1921, for the purpose of educating the public by exhibiting artistic, mechanical, agricultural, and horticultural products and providing public instruction in the arts and sciences, thereby celebrating the one hundred and fiftieth anniversary of the signing of the Declaration of Independence by holding in the city of Philadelphia, in the State of Pennsylvania, an exhibition of the progress of the United States in art, science, and industry, in trade and commerce, and in the development of the products of the air, the soil, the mine, the forest, and the seas, to which exhibition the people of all other nations shall be invited to contribute evidences of their own progress to the end that better international understanding and more intimate commercial relationships may hasten the coming of universal peace: Therefore be it

Resolved, etc., That the holding of a national and international exhibition in the city of Philadelphia in 1926 upon the Fairmount Park and parkway site selected by the Sesquicentennial Exhibition Association and land contiguous thereto which may be acquired for that purpose be approved as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence, and that such steps be taken as the President may deem proper to invite the participation and cooperation of the States of the Union and the nations of the world.

SEC. 2. That a copy of this resolution be forwarded to all the States of the Union requesting cooperation upon their part.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

Mr. KING. May I inquire of the Senator from Pennsylvania whether he expects to ask for and obtain an appropriation from the Federal Government to aid in carrying out the purposes expressed in the joint resolution?

Mr. PEPPER. Mr. President, I have no expectation on the subject. I was asked by this influential and authoritative organization in Philadelphia to present the matter for the consideration of the Senate. My own expectation would be, following the course of such matters in the past, that if and when adequate financial support is provided by State and city, and there is demanded a more extensive participation by other States and by other nations than they can finance, there will be at some stage an application to Congress for a grant; but there is no implication of such a step here, and I am not authorized to state either that there will or will not be any such step taken. I am answering the Senator out of the experience we all have had regarding similar exhibitions.

Mr. KING. Has the organization which has been created by the Governor of the Commonwealth of Pennsylvania, as I read this resolution, considered the probability of appropriations, and has it figured upon the amount to be expended by the Commonwealth, by the Federal Government, and by the States?

Mr. PEPPER. No; there has been no estimate or computation, so far as I know, of any sum which the Federal Government would at any time be expected to appropriate. It is intended that very large sums shall be raised locally by voluntary gift, that large appropriations shall be made by the city of Philadelphia, and liberal appropriations by the State of Pennsylvania. No computation or estimate has been made of any aid to be required from the Congress.

Mr. KING. I shall not object to the passage of the joint resolution, although it seems to me that the situation is rather nebulous, and that we are, in the language of the street, getting the horse before the cart. It would occur to me that the practical and advisable course would have been to determine upon holding the celebration, determine the expenditures to be made, obtain such appropriations from the State and from the city as were deemed necessary and fair, solicit the States for appropriations, and then ask the Federal Government for an appropriation. It looks to me now as if you are getting the Federal Government committed to this enterprise without the slightest knowledge as to what the ultimate cost will be.

Mr. OVERMAN. I do not understand that it commits Congress to any appropriation.

Mr. PEPPER. No; it does not; and if I had ventured to place the horse anywhere except before the cart, I should feel that I had done something unworthy of the consideration of the Senate. We have attempted to follow the usual procedure in this matter, and I hope the motive power will be sufficient to carry it.

Mr. KING. My good friend the Senator from North Carolina says this does not commit us. I respectfully suggest that if the Federal Government invites other nations and invites the States, there is a moral obligation upon the part of the Federal Government to back this enterprise to the end. I would feel ashamed if the President of the United States should invite other nations, and they should respond, and then the Federal Government would withdraw from the enterprise.

Mr. OVERMAN. Mr. President, I have no doubt that the United States Government will be requested to make a display, as it does at all such exhibitions, and that will require a large appropriation. The Government will do it; but, so far as making an appropriation of one million or two million or three million or ten million for the exhibition, I do not think the Senator will expect that. I think the expectation is that each State will contribute to the display, and of course when each State does, the United States will display its resources as it usually does; but no extraordinary appropriation, as I understand it, will be asked or expected by the proponents of the joint resolution.

Mr. ROBINSON. Mr. President, the celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence is a worthy recognition of the circumstances which gave birth to this Nation. It is, of course, appropriate that the celebration should occur in the city of Philadelphia, and, for my part, fully appreciating the fact that the joint resolution implies participation on the part of the United States in the celebration, and that that will require the expenditure of a reasonable sum commensurate with the importance of the occasion and of the incident which it commemorates, I am very glad to commit myself to the measure.

Mr. McCUMBER. And the Senator can be quite certain, Mr. President, that in due and proper time there will be a bill introduced proposing to make an appropriation on behalf of the Government, and all Senators present at that time will vote for it.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DIPLOMATIC REPRESENTATION AT LUXEMBURG (S. DOC. NO. 235).

The PRESIDING OFFICER (Mr. ODDIE in the chair) laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, ordered to be printed and referred to the Committee on Foreign Relations:

The Senate and House of Representatives:

I transmit a report by the Secretary of State in regard to the advisability of transferring United States diplomatic representation at Luxemburg from the minister at The Hague to the ambassador at Brussels, on account of the economical union which has been established between Belgium and Luxemburg by treaty.

I concur in the recommendation of the Secretary of State that legislation be enacted which will enable this to be done, and in view of the reason advanced and the further fact that all the other Governments having diplomatic representation at Luxemburg, except Portugal, have made the transfer, I request of

Congress early action that in place of an "envoy extraordinary and minister plenipotentiary to the Netherlands and Luxemburg" and an "ambassador extraordinary and plenipotentiary to Belgium," as at present, will provide for an "envoy extraordinary and minister plenipotentiary to the Netherlands" and an "ambassador extraordinary and plenipotentiary to Belgium, who shall also be envoy extraordinary and minister plenipotentiary to Luxemburg."

WARREN G. HARDING.

THE WHITE HOUSE,
Washington, July 18, 1922.

EXECUTIVE SESSION.

Mr. McCUMBER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session, the doors were reopened, and (at 6 o'clock and 5 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Wednesday, July 19, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate July 18 (legislative day of April 20), 1922.

COLLECTORS OF CUSTOMS.

John A. Royse, of Indianapolis, Ind., to be collector of customs for customs collection district No. 40, with headquarters at Indianapolis, Ind., in place of James H. Fry, whose term of office expired July 15, 1922.

S. M. Parker, of Charleston, S. C., to be collector of customs for customs collection district No. 16, with headquarters at Charleston, S. C., in place of Frederick G. Peters, whose term of office expired July 15, 1922.

UNITED STATES DISTRICT JUDGE.

Robert M. Gibson, of Pennsylvania, to be United States district judge, western district of Pennsylvania, vice Charles P. Orr, deceased.

UNITED STATES MARSHAL.

Harry S. Hubbard, of Porto Rico, to be United States marshal, district of Porto Rico, vice William R. Bennett, resigned.

MEMBER OF MISSISSIPPI RIVER COMMISSION.

Col. George M. Hoffman, Corps of Engineers, United States Army, for appointment as member of the Mississippi River Commission, vice Col. Harry Burgess, Corps of Engineers, to be relieved.

POSTMASTERS.

ALABAMA.

Levi A. Knapp to be postmaster at Auburn, Ala., in place of W. V. Jones. Incumbent's commission expired August 6, 1921.

ARKANSAS.

Ocie E. Mathis to be postmaster at Hackett, Ark. Office became presidential January 1, 1921.

CALIFORNIA.

Roscoe E. Watts to be postmaster at Rialto, Calif., in place of L. M. Stewart, resigned.

CONNECTICUT.

Carleton W. Tyler to be postmaster at Southbury, Conn. Office became presidential July 1, 1922.

ILLINOIS.

Sherman G. Jackson to be postmaster at Forest City, Ill. Office became presidential April 1, 1922.

Ella L. Widicus to be postmaster at St. Jacob, Ill. Office became presidential April 1, 1922.

Frank C. Krans to be postmaster at Altona, Ill., in place of F. E. Sheahan, deceased.

Byron C. Colborn to be postmaster at Peoria, Ill., in place of C. U. Stone, resigned.

IOWA.

Frank M. Hood to be postmaster at Sergeant Bluff, Iowa. Office became presidential October 1, 1920.

KANSAS.

Clarence W. Sharp to be postmaster at Virgil, Kans. Office became presidential July 1, 1922.

Hiram A. Gilmore to be postmaster at Howard, Kans., in place of B. W. Hamar, resigned.

John H. O'Connor to be postmaster at Winfield, Kans., in place of E. L. Hepler. Incumbent's commission expired February 4, 1922.

KENTUCKY.

Andy M. Smith to be postmaster at McHenry, Ky. Office became presidential July 1, 1921.

Della McKinney to be postmaster at Fleming, Ky., in place of T. L. Riley, resigned.

MARYLAND.

Lewis Keiser to be postmaster at Bethesda, Md. Office became presidential January 1, 1922.

MASSACHUSETTS.

Louise S. Snow to be postmaster at Middleton, Mass. Office became presidential April 1, 1922.

Myra G. Jordan to be postmaster at West Upton, Mass., in place of M. G. Jordan. Incumbent's commission expired June 3, 1922.

MICHIGAN.

Holger F. Peterson to be postmaster at Grayling, Mich., in place of H. F. Peterson. Incumbent's commission expired April 6, 1922.

MINNESOTA.

Thorvald H. Froslee to be postmaster at Vining, Minn. Office became presidential July 1, 1922.

MONTANA.

John J. Pietila to be postmaster at Roberts, Mont., in place of Lydia Elstad, resigned.

NEW JERSEY.

John A. Campbell to be postmaster at Highwood, N. J., in place of J. A. Campbell. Incumbent's commission expired January 24, 1922.

NEW YORK.

Maurice M. Parker to be postmaster at Deferiet, N. Y. Office became presidential July 1, 1922.

John C. Banschbach to be postmaster at Hicksville, N. Y., in place of John Puvogel. Incumbent's commission expired January 24, 1922.

Charles H. Betts to be postmaster at Lyons, N. Y., in place of E. J. Smith. Incumbent's commission expired January 11, 1920.

NORTH CAROLINA.

Robert L. Strowd to be postmaster at Chapel Hill, N. C., in place of R. S. McRae, deceased.

Oscar R. Simpson to be postmaster at Duke, N. C., in place of E. S. Yarbrough, resigned.

Clarence C. Rowe to be postmaster at Spray, N. C., in place of L. M. Sheffield. Incumbent's commission expired July 21, 1921.

NORTH DAKOTA.

William S. Hancock to be postmaster at Edgeley, N. Dak., in place of W. W. Anderson, resigned.

OKLAHOMA.

Joseph C. Eversole to be postmaster at Grandfield, Okla., in place of W. H. Whiddon, removed.

Warden F. Rollins to be postmaster at Noble, Okla., in place of J. H. Brasher, resigned.

OREGON.

Glenn D. Withrow to be postmaster at Talent, Oreg. Office became presidential July 1, 1921.

Flora B. Thompson to be postmaster at Jacksonville, Oreg., in place of Lewis Ulrich, resigned.

Bernhard L. Hagemann to be postmaster at Milwaukie, Oreg., in place of B. L. Hagemann. Incumbent's commission expired January 24, 1922.

PENNSYLVANIA.

Charles F. De Labar to be postmaster at Riegelsville, Pa. Office became presidential January 1, 1921.

Louis O. Mellinger to be postmaster at Slickville, Pa. Office became presidential July 1, 1922.

William E. Reed to be postmaster at Duquesne, Pa., in place of M. G. Conlin, resigned.

Thomas V. Diffendafer to be postmaster at Millerstown, Pa., in place of H. W. Rinehart. Incumbent's commission expired March 14, 1922.

James S. Young to be postmaster at Reedsville, Pa., in place of J. C. Werts. Incumbent's commission expired January 24, 1922.

SOUTH CAROLINA.

Edward H. Jennings to be postmaster at Charleston, S. C., in place of J. M. Poulnot, resigned.

TEXAS.

Wallace C. Wilson to be postmaster at McKinney, Tex., in place of N. A. Burton. Incumbent's commission expired July 21, 1921.

John E. Carson to be postmaster at San Saba, Tex., in place of J. W. Longley, resigned.

VIRGINIA.

Manley W. Carter to be postmaster at Orange, Va., in place of H. G. Shackelford. Incumbent's commission expired January 24, 1922.

Albert L. Taylor to be postmaster at Parksley, Va., in place of J. S. Scott. Incumbent's commission expired January 24, 1922.

WASHINGTON.

Thurston B. Stidham to be postmaster at Doty, Wash. Office became presidential July 1, 1922.

WISCONSIN.

William Kotvis to be postmaster at Hillsboro, Wis., in place of F. A. Ferriter. Incumbent's commission expired January 24, 1922.

Allen W. Wiggin to be postmaster at Plymouth, Wis., in place of G. W. Schiereck. Incumbent's commission expired August 3, 1920.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 18 (legislative day of April 20), 1922.

UNITED STATES DISTRICT JUDGE.

James H. Wilkerson to be United States district judge northern district of Illinois.

REGISTER OF THE LAND OFFICE.

Fred C. Stoddard to be register of the land office, Missoula, Mont.

POSTMASTERS.

GEORGIA.

Paul L. Smith, Athens.

NEBRASKA.

Hugh E. Mallory, Litchfield.
Clyde S. Burkerd, Shelton.

OKLAHOMA.

Bessie A. Porter, Buffalo.
Henry L. Wallace, Calvin.

SENATE.

WEDNESDAY, *July 19, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

THE COAL SITUATION.

Mr. WILLIS. I present a resolution adopted by the Columbus (Ohio) Chamber of Commerce, relative to the coal situation. I ask that it be referred to the Committee on Education and Labor and printed in the RECORD.

There being no objection, the resolution was referred to the Committee on Education and Labor and ordered to be printed in the RECORD, as follows:

Resolution adopted by the Columbus Chamber of Commerce, Columbus, Ohio, July 14, 1922.

Whereas the industrial situation of the country is rapidly approaching a breakdown by reason of the long-continued cessation in the production of coal and the more recent interference with rail transportation between the only remaining important coal-producing area and the great markets of the country; and

Whereas this industrial disturbance will with very little further continuance be translated into direct public suffering with attendant dangers of riots, destruction of property, and loss of life, which may conceivably be brought home to every man, woman, and child in the country; and

Whereas whatever the merits of the wage dispute and other points at issue between striking railroad men and railroads may be, the people, through the Government, have provided both general and specific methods of settling such disputes in a fair and lawful manner, and the public is entitled to have such disputes settled without recourse to ruinous conflicts like the present: Therefore be it

Resolved, (1) That the Government of the United States and of the several States from the President down to the lowest official be urged to fully perform their duty in upholding the majesty of the Constitution and the law and in securing and preserving to each and every citizen the right to live, labor, and pursue happiness under the law, and to enjoy protection in the exercise of this right.

(2) That all persons who are responsible for or implicated in the creation or maintenance of these disturbed and dangerous conditions in defiance of the laws of the land and contrary to the decisions of the duly constituted agencies for settling such disputes be warned that no Government based upon such methods has ever succeeded, and that they will go down with everyone else in general ruin if their contest against lawful methods should succeed.

(3) That all persons who in any position are loyally continuing in their duty fulfilling their obligation to the public by continuing at their work with certain danger of humiliation and annoyance and often at risk of bodily injury or loss of life should receive the fullest moral support and physical backing of all good citizens whose comforts are being maintained by their sacrifice.

(4) That in this country the decision in all crises depends upon the moral force and the intellectual judgment of the people. No class or group can make this people do what they do not wish to do, nor can any official, high or low, refuse his duty when an active public conscience is awakened and insistent. Therefore it is the duty of every citizen in this present emergency to take thought of his own personal share in the maintenance of the rights and liberties which are his heritage from 150 years of American citizenship and be ready by influence or force to protect and defend that heritage.

EDWARD ORTON, Jr., *President.*

A true copy.

J. T. DANIELS, *Secretary.*

PETITIONS AND MEMORIALS.

Mr. ROBINSON presented a resolution of the Fort Smith (Ark.) Chamber of Commerce, favoring peaceful settlement of the present railroad strike and full law enforcement against interference with the rights of all persons involved in the situation, which was referred to the Committee on Interstate Commerce.

Mr. McCUMBER presented resolutions of the Fargo (N. Dak.) Trades and Labor Assembly, protesting against the enactment of legislation that may take from a citizen the right to cease employment at will, which were referred to the Committee on Education and Labor.

He also presented a petition of sundry citizens of North Dakota, constituting the governor's committee on rural problems, located at Grand Forks, N. Dak., favoring the enactment of legislation further stabilizing prices of farm products, which was referred to the Committee on Agriculture and Forestry.

He also presented petitions of sundry citizens of Merricourt, Kulm, Forbes, Norma, and Kenmare, all in the State of North Dakota, praying for the enactment of legislation reviving the United States Grain Corporation, so as to stabilize prices of certain farm products, which were referred to the Committee on Agriculture and Forestry.

Mr. MOSES presented petitions of sundry citizens of Ashland, Plymouth, and Manchester, all in the State of New Hampshire, praying that only a moderate duty be imposed on lightweight gloves in the pending tariff bill, which were referred to the Committee on Finance.

He also presented a memorial of sundry citizens of West Ossipee, Mountainview, Ossipee Valley, Tamworth, South Tamworth, and Dover, all in the State of New Hampshire, remonstrating against the passage of Senate bill 2747, the so-called McNary cooperative reclamation bill, which was referred to the Committee on Irrigation and Reclamation.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McCUMBER:

A bill (S. 3844) to exempt interest on farm-land securities from taxation under the revenue act of 1921;

A bill (S. 3845) to amend an act entitled "An act to establish a Veterans' Bureau and to improve the facilities and service of such bureau, and further to amend and modify the war risk insurance act," approved August 9, 1921 (with an accompanying paper); and

A bill (S. 3846) to amend an act entitled "An act to establish a Veterans' Bureau and to improve the facilities and service of such bureau, and further to amend and modify the war risk insurance act," approved August 9, 1921 (with accompanying papers); to the Committee on Finance.

By Mr. POMERENE:

A bill (S. 3847) to provide for mothers' pensions in the District of Columbia; to the Committee on the District of Columbia.

By Mr. SMITH:

A bill (S. 3848) for the relief of the heirs of Richard Reynolds, deceased;

A bill (S. 3849) for the relief of Robert J. Kirk; and

A bill (S. 3850) for the relief of Sidney C. Snelgrove; to the Committee on Claims.

By Mr. RANSDELL:

A bill (S. 3851) to repeal certain provisions of Public Resolution 50, Sixty-seventh Congress, approved April 21, 1922, appropriating $1,000,000 for the preservation, protection, and repair of levees under the jurisdiction of the Mississippi River Commission; to the Committee on Appropriations.

By Mr. SHORTRIDGE:

A joint resolution (S. J. Res. 226) authorizing the acceptance of title to certain land within the Shasta National Forest, Calif.; to the Committee on Agriculture and Forestry.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. GOODING obtained the floor.

Mr. MCNARY. Mr. President——

Mr. GOODING. I yield to the Senator from Oregon.

Mr. MCNARY. There are but few Senators here this morning. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Gooding	McLean	Sheppard
Borah	Hale	McNary	Shortridge
Brandegee	Heflin	Moses	Simmons
Broussard	Hitchcock	Nelson	Smith
Calder	Johnson	New	Smoot
Capper	Jones, N. Mex.	Newberry	Spencer
Caraway	Jones, Wash.	Nicholson	Stanley
Culberson	Kellogg	Norbeck	Sterling
Cummins	Kendrick	Oddie	Trammell
Curtis	Keyes	Overman	Underwood
Dial	Ladd	Pepper	Walsh, Mass.
du Pont	Lenroot	Phipps	Walsh, Mont.
Elkins	Lodge	Pomerene	Watson, Ind.
Ernst	McCormick	Ransdell	Willis
Fernald	McCumber	Rawson	
Glass	McKinley	Robinson	

Mr. UNDERWOOD. I wish to announce that the Senator from Georgia [Mr. WATSON] is detained on account of illness, and that the Senator from Nevada [Mr. PITTMAN] is detained by reason of illness in his family.

The VICE PRESIDENT. Sixty-two Senators have answered to their names. A quorum is present.

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Kentucky?

Mr. GOODING. I yield to the Senator from Kentucky, if it is a matter which will not take up any time.

Mr. STANLEY. I shall not take more than half a minute. I thank the Senator from Idaho.

Mr. President, as indicative of the unanimity with which the press of the United States, without regard to party, has spewed the pending tariff bill out of its mouth, I send to the desk a letter just received from Mr. C. F. Gladfelter, general manager of the Louisville Herald. This is one of a group of papers known as "the Schaffer group," headed by John C. Schaffer, editor and publisher. The syndicate includes the Louisville Herald, the Chicago Evening Post, the Indianapolis Star, the Rocky Mountain News, the Denver Times, the Terre Haute Star, and the Muncie Star. These papers, which were at one time inclined at least to apologize for this bill, have at last deserted the ship, and now Mr. Gladfelter writes me a letter asking me to vote against the measure—H. R. 7456. I send to the desk the letter, which is very short, together with a copy of my reply, and ask that they may be read.

The VICE PRESIDENT. Without objection, the letters will be read as requested.

The reading clerk read as follows:

THE LOUISVILLE HERALD,
July 17, 1922.

Senator A. O. STANLEY,
Washington, D. C.

DEAR SENATOR: I am advised that H. R. 7456 will come up for final vote in the Senate within the next week or 10 days.

The newspapers of this country are vitally interested in paragraph 1300, schedule 13, and I am sure they would appreciate it very much indeed if you would be present when the vote is cast and register your vote against the measure.

Thanking you for your consideration, I am,

Yours very truly,

C. F. GLADFELTER.

JULY 19, 1922.

Mr. C. F. GLADFELTER,
General Manager the Louisville Herald,
Louisville, Ky.

MY DEAR MR. GLADFELTER: Your favor of recent date to hand in re H. R. 7456, paragraph 1300, schedule 13.

It affords me genuine pleasure to advise you that I heartily concur with the press in their opposition to this measure and the schedules mentioned, and shall be glad to vote against it.

Yours very truly,

A. O. STANLEY.

Mr. NEW. Mr. President, just a moment.

Mr. GOODING. I yield.

Mr. NEW. I have listened to the list of newspapers read by the Senator from Kentucky. It is truly an imposing array, but all, however, are owned by one man and represent his individual opinion.

Mr. STANLEY. Mr. President——

Mr. GOODING. Mr. President, I decline to yield any further for political speeches.

The VICE PRESIDENT. The Senator from Idaho has the floor and will proceed.

Mr. GOODING. Mr. President, nations, like individuals, have their birth, their youth, their manhood, and their old age. Our country is now passing from its youth into its early manhood. There is yet much to be done before it reaches its full greatness as a nation. But we are no longer a new country; the frontier, with its adventures, its fascinations, its hardships, and its privations, has passed away, and we have reached a new milestone in the life of this Nation.

Mr. President, the great work of the American pioneer is over. Nowhere in all the history of civilization can there be found anything to compare with the part that he has played in the building of this mighty empire. He endured the hardships and privations of a pioneer life, and made it possible for those who followed him in later years to enjoy peace, prosperity, and happiness. He cleared away the forests, drained the swamps, built the roads, subdued the desert, and made a thousand blades of grass grow where none grew before.

No trail was too long, too hard, or too dangerous for him to follow. Out into the mighty West he pushed on, undaunted and unafraid, at times a law unto himself, hundreds of miles away from an organized government; but through it all he never forgot those principles of American manhood, respect for womanhood, motherhood, and christianity, without which no government can long endure or civilization exist.

All honor to the American pioneers, for they not only made possible the settlement and development of this mighty empire, but they left behind them a citizenship full of the virile forces of American manhood that has made this country the greatest factor in all the world to-day.

Mr. President, within the lifetime of a Member of this Congress, the Hon. JOSEPH G. CANNON, of Illinois, the city of Chicago was but little more than an Indian trading post, an unincorporated village, with a population of but 3,000. Within the lifetime of "Uncle Joe," as we all love to call him, all the vast empire west of the Mississippi has been settled. Within my lifetime most of the territory west of the Missouri River has been settled by the homesteader, as well as most of the great pine forests of Michigan, Minnesota, and Wisconsin, and all the transcontinental railroads have been built.

Mr. President, the last chapter of the achievements of the American pioneer can now be written, for at no place on American soil is there a frontier, and it can be said, without fear of successful contradiction, that nowhere in the great West is there any land left for the homesteader. I believe it is safe to say that there is not a homestead of 160 acres left anywhere in any of the public-land States where it is safe for a man to take his family and try to make a living.

Hundreds of thousands of homesteads have been taken up in the Western States within the last few years, where, after a hard struggle to produce enough to keep the wolf from the door, the fight had to be given up and the homesteader forced to abandon his claim, broken in spirit, a sad and discouraged citizen. This Government has never given the homesteader any assistance. We have never had any intelligent direction of the settlement of our public domain. So it is not strange that in many cases the homesteader has settled upon lands in the Western States where the rainfall is not sufficient for the growing of agricultural crops.

There is still an opportunity in this country for a few homes on the cut-over lands in the South and in the West, and then there are some swamp lands to reclaim. It is estimated that there is enough water left, above that which is in use to-day, to reclaim, when reservoired, 22,000,000 acres more of our arid lands. But unless this Government makes greater progress in the future than it has in the past it will take 200 years to reclaim these 22,000,000 acres of arid land, for since the reclamation act was passed on June 17, 1920, the Government has only reclaimed 1,600,000 acres of arid land and furnished partial water for 1,000,000 acres more. Approximately, it may be said that the Government in 20 years has reclaimed but 2,000,000 acres of arid land; but, unless the farmers of this country receive better prices than they have for a number of years, the new development which it is possible to bring about will not keep pace with the farm desertion that is taking place in every State in the Union. It is estimated that a million men, women, and children left their farms in the different States of the Union in 1920. Farm desertions will continue in those neighborhoods where the fertility of the soil is exhausted

and where the struggle is too hard to make practicable the earning of a living.

Mr. President, the point that I want to emphasize is that this is no longer a new country; that there is no longer an opportunity to relieve the congested conditions of our great cities by our people finding new homes upon the public domain; that the same condition with which all of Europe has struggled for centuries—that of finding employment for their people—now confronts this Government, and must have the serious consideration of those who are responsible for the direction of its affairs.

Mr. President, Senators must understand that we have reached a new milestone in the life of this country, and we must not forget that the first duty an organized government owes to its citizens is that of giving an opportunity for employment to those who are willing to work for the comforts and necessities of life. Our Constitution guarantees to every citizen life, liberty, and the pursuit of happiness; but there can be no happiness in that home where the husband returns day after day from an effort to secure work and finds his little ones, hanging to their mother's apron strings, crying for bread.

For more than two years we have had an army of unemployed in this country. The high-water mark was nearly 6,000,000 out of employment. There are 3,500,000 idle men today, exclusive of those who are on a strike, and it is midsummer, with the harvest in full swing. There are those who believe that by fall this vast army of unemployed will be able to find work and that the country will have reached normalcy, with the return of prosperity to all of our industries. I am not so sure about that. I believe the protective-tariff measure that is now before the Senate will do much toward starting the wheels of industry, but I do not believe that any tariff bill, regardless of how high the duties may be, will give some of our industries proper protection under a system of foreign valuation.

We hear much about "back to the farm," but when we study the conditions on the farms and realize what a struggle the farmers have had to keep the wolf from the door it is irony to talk about "back to the farm."

Mr. President, the free-trade policy of the Democratic Party is largely responsible for the condition of agriculture, for they placed practically all of the great products of the farm on the free list.

The trouble to-day with agriculture is that we have an unbalanced condition on the farm. This has been brought about by the vicious free-trade policy of the Democratic party toward agriculture, which has practically destroyed some of our industries. Through a lack of proper protection to some of our industries we are growing too much cotton and not enough sugar; too much wheat and not enough wool; and too much corn and not enough flax, hemp, and soy beans; and what is true of these crops is true of other farm products in America.

The free-trade policy of the Democratic Party and Schedule K in the Dingley law and the Payne-Aldrich law are responsible for the destruction of the sheep industry in this country. In 1903 there were in the United States 64,000,000 head of sheep. That was the high-water mark in that industry. To-day there are but 35,000,000 head left, and most of them are old ewes. The conditions surrounding the industry have been so severe in the last few years that the flower of the flock—the young ewes—had to be sent to the slaughterhouses, for if the older ewes had been shipped they would not much more than have paid the freight to market. I personally know of many pure-bred herds that had to be broken up and some of them sent to the shambles, until to-day the industry is but a wreck of what it was a few years ago.

The emergency tariff has worked almost like magic in reviving the industry; but I am not quite sure, Mr. President, that the duty in the pending tariff bill, which, as I read it, constitutes a reduction of fully 35 per cent from that given in the emergency tariff bill, will save the industry. It will, however, give it a fighting chance, unless we are unfortunate enough to have another Democratic administration with another free-trade period for the sheep industry. Just one more year of free trade for that industry and I am sure that every flockmaster in America will give up the fight, and what was once a great industry in this country will pass away and be forgotten.

There will be no movement of "back to the farm" so long as the Democratic Party keeps up its vicious policy of free trade toward agriculture and the live-stock industry; nor will there be any stability in agriculture so long as we have a free-trade policy in this country. A man would have to have a good deal of courage to venture into the live-stock industry to-day, and it would take a great deal of courage, I am sure, to build any more sugar factories. In fact, at the present time, with our overproduction and unsettled policy toward agriculture, it is not an act of kindness to encourage anyone to go back to the farm.

Let us forget about any movement of "back to the farm" for the present at least, for I find upon investigation that the annual crop production in this country to-day is 40,000,000 acres more than our annual consumption of agricultural products. It is estimated, Mr. President, that the increased consumption of farm products in the United States each year is equal to 2,000,000 acres of crop production. At that rate it is going to take 20 years for consumption to catch up with the present agricultural production, but it would not be hard to bring about a balanced condition on the farm if we would give proper protection to agriculture and its affiliated industries.

If we could have maintained the 64,000,000 head of sheep that we had in America in 1903, we would have 5,000,000 acres less of farm products to find a market for in foreign countries, for I figure it would take at least 5,000,000 acres to maintain 29,000,000 head of sheep, that number representing the depletion in the flocks.

If we grew all the sugar we consume in America it would mean 2,000,000 more acres of farm lands in sugar beets and sugar cane and 2,000,000 acres less of other farm products. And if we give proper protection to the flax growers, the soybean growers, the hemp growers, and to all other farm products that we can produce in this country, it is safe to say that from twelve to fifteen million acres of the forty million acres could be displaced with profitable crops to the American farmer, and we would soon become a self-supporting Nation in all agricultural products, a condition which is so essential in peace as well as in war.

With our public lands practically all settled we have reached the peak of production of farm products in America under our present system of farm cultivation. Proper protection and a balanced condition on the farm would do much toward stabilizing farm prices. With better prices for farm products we would have better cultivation of the soil and smaller farm units, so much to be desired. In short, Mr. President, if we give agriculture a square deal we can soon develop a movement of "back to the farm."

Mr. President, of the 3,500,000 men out of employment to-day, it is estimated that a million of these are floaters, and would not work if they were given the opportunity. No doubt that is true; but with 2,500,000 men out of employment that would work if they were given an opportunity, and with a million young men and women reaching maturity each year, many of whom must find employment in the different trades and lines of business, and with our ports still open to immigration, though somewhat restricted, as I see it, our problems of government in the future are going to be very much greater than they have been in the past.

Realizing that there was no longer any opportunity to relieve the congested condition of our cities by our people finding new homes on our public domain, I called upon the Secretary of Labor and the Commissioner of Labor Statistics, with the hope that I might find some encouragement in discussing with them the question of our unemployment and the conditions that surround our great industries.

Mr. Stewart, Commissioner of Labor Statistics, says that not only is agriculture already developed in the United States to a point where the cry of "back to the farm" is filled with irony and sarcasm, but many of our industries are in the same state of overdevelopment. Speaking of the coal industry and other great industries, Mr. Stewart said:

COAL INDUSTRY.

A statement has just been made by Mr. Francis S. Peabody, of Chicago, an acknowledged authority on the bituminous-coal industry, to the effect that the bituminous-coal mines of the United States, with their present equipment and development, could produce 1,000,000,000 tons of coal annually by working full force and full time. Our production of bituminous coal heretofore, both for domestic consumption and for export, has amounted to only half of that amount, or 500,000,000 tons, in good years. With exports shut off, or restricted, as they are at present, 480,000,000 tons will amply meet the requirements of all the industries in the United States, operating as they are to-day at as near full speed and continuous time as their overdeveloped condition will permit. In other words, 25 per cent of the coal mines, employing 60 per cent of the workers on full time, can produce all the coal we can use in the United States.

The significance of this lies in the fact that 3,000 of our 12,000 coal mines could do all the work in supplying the demand for this essential product, and the remaining 9,000 are not only not needed but are a potential source of disturbance to the entire situation. This means that from 240,000 to 300,000 men in the bituminous coal mines are not needed for economic production. Even in the best years there are this number of mine workers in excess of those who could secure full-time employment, and therefore their presence in the industry only operates to reduce the working time of all and prevents any of them from securing full-time work.

IRON AND STEEL.

With our present facilities for the production of iron and steel we can produce in six months, running full force and full time, all the iron and steel we can consume in a year's time; and this computation is on the basis of past consumption, when we were building railroads in this country at a rate not likely to be repeated in the near future, and at the same time we were exporting railroad construction material in vast quantities.

It is safe to say that very few people realize what the enormous increase in productivity, due to the improvement of machinery, means in the question of overdevelopment and the labor situation generally. Take the production of pig iron, for example. In 1850, with 20,298 employees, the blast furnaces of the United States produced 504,245 long tons of pig iron, being an average annual production of 25 tons per man. Forty years later, in 1890, we were making 811 tons per year per man. It is a significant fact that whereas during the period 1850 to 1919 the number of employees in the blast furnaces of the United States increased 88 per cent, the production during that same period increased to the enormous extent of 6,051 per cent. These figures are computed on an average basis for the entire country. It is a matter of record that some of the better blast furnaces are producing over a thousand tons per man per year. In the Bessemer steel industry, if all labor, both skilled and unskilled, is taken into account, the output per man per full year in 1913 was 1,300 tons; in 1917 it was 1,400 tons. In open-hearth steel the average production for full-year worker in 1913 was approximately 1,100 tons and in 1919 it was 1,277 tons.

BOOTS AND SHOES.

There are over 1,400 establishments manufacturing boots and shoes in the United States. It has been estimated that the average number of pairs of shoes used per family in the United States is 12.2 pairs annually. One concern claims to be making 15 per cent of all the shoes purchased by the workmen of the United States to-day.

It is claimed that 10 of these boot and shoe establishments manufacture 40 per cent of the shoes consumed in this country. From this it can readily be seen how the boot and shoe industry becomes a seasonal one, and how, even in the best seasons, the plants are not equipped to their full capacity. It has been pointed out that 25 per cent of the boot and shoe factories of the United States, running full time at full capacity, could produce all the boots and shoes consumed in the United States; and that the boot and shoe factories of the United States, taken as a whole, operating full time could produce five pairs a year for every man, woman, and child in the world who wears shoes. It is understood, of course, that less than half the people of the world wear our type of shoes, and it is not likely that the population of India, China, and Japan will change their centuries-old habits in footwear, or lack of footwear, in order to furnish us a market. It may be noted in this connection that the boot and shoe industry in England, Germany, and France is practically in the same condition as our own.

I also discussed with the Secretary of Labor the overdevelopment of some of our industries. Speaking of the women's dress, waist, and cloak industry, he has this to say;

I am informed by the Commissioner of Labor Statistics that it developed in a study of the women's dress and waist industry, made by the Bureau of Labor Statistics, there were twice as many persons employed in the busiest week as were employed in the dullest week, and that one-half of the year falls in the dull-week period. In other words, practically one-half of the employees and equipment were idle for six months in the year. Similarly, a study of the women's cloak industry show three times as many people employed during the busy season as in the dull season.

SAWMILLS.

The installed capacity of the sawmills of the United States is 117,500,000,000 feet per annum, while the maximum production does not exceed 46,000,000,000 feet. This indicates an overdevelopment of 160 per cent.

WINDOW GLASS.

In the window-glass industry there has been a general understanding among the manufacturers and workers to concentrate the manufacture of window glass by a continuous operation for 26 weeks in each year, leaving the men free to seek other employment for the remaining 26 weeks. This indicates a 100 per cent overdevelopment in the industry, since all the window glass needed to supply the demand is produced by working 50 per cent of the possible time.

MEAT-PACKING INDUSTRY.

During the 10 months ending April 30, 1922, there were slaughtered an average of 5,000,000 animals per month, or 60,000,000 per annum. In the year of 1909 the same industry slaughtered over 72,500,000 animals.

COPPER INDUSTRY.

The production capacity in this industry is 2,000,000,000 pounds as against an annual average production of 1,250,000,000 pounds.

FLOURING MILLS.

There are 10,788 flouring mills in the United States, with about 7,000 of them confining their output to wheat flour. Twenty-five to thirty per cent of the largest of these, operating full time at full capacity, could supply the needs of the entire country for flour.

AUTOMOBILE TIRES.

The people of the United States to-day are buying about 36,000,000 automobile tires per year. The plants which produce automobile tires are equipped to manufacture from 56,000,000 to 60,000,000 tires a year with the present number of employees on their pay rolls. It stands to reason that no man can get more than half-time work in this industry, taking the whole year round.

Mr. President, what is true of the automobile-tire industry is true of the automobile and truck industry and, I might say, of the entire motor-vehicle industry. In the past 20 years the automotive industry has made the most remarkable development in this country that the world has ever seen. There is nothing to compare it with in all the history of civilization. To-day the automobile and allied industries furnish employment for nearly as many men as the entire railroad systems of the country, and it has all been developed within the last 20 years. We can not only manufacture for our own use, but we can supply the demand for the entire world.

In practically every industry production has outstripped the growth of population and the corresponding ability to absorb the products of industry, and this is also true in other countries. In this country, while the population increased 39.7 per cent during the period from 1899 to 1919, our production of textiles increased 90.7 per cent; stone, clay, and glass, 78.8 per cent; iron and steel, 112.7 per cent; chemicals and allied products, 182.2 per cent; metal products other than iron and steel, 196.1 per cent; and vehicles, 1,273.8 per cent.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER (Mr. LADD in the chair). Does the Senator from Idaho yield to the Senator from Connecticut?

Mr. GOODING. I yield.

Mr. McLEAN. Are the increases in value or in quantity?

Mr. GOODING. In quantity; that is, the productiveness of all these institutions has increased to that extent.

Mr. McLEAN. In quantity?

Mr. GOODING. In quantity.

I sometimes wonder if we ourselves realize the wonderful development that has taken place in our own country in the last half century. While the United States has only 6 per cent of the world's population and 7 per cent of the world's land, yet our country produces 20 per cent of the world's gold, 25 per cent of the world's wheat, 40 per cent of the world's iron and steel, 40 per cent of the world's lead, 40 per cent of the world's silver, 50 per cent of the world's zinc, 52 per cent of the world's coal, 60 per cent of the world's aluminum, 60 per cent of the world's copper, 60 per cent of the world's cotton, 66 per cent of the world's oil, 75 per cent of the world's corn, and 85 per cent of the world's automobiles.

At the same time it seems we are a Nation of shopkeepers. It seems to me that this line of business, as well as many of our great industries, is overdeveloped, for we have 946,419 retail shops in the United States, or a retail shop for every 111 citizens. And then we have 97,083 wholesale houses, or a wholesale house for every 35 retail establishments. And God only knows how many middle men and commission men who, with sharp pencils and keen brains, too often take the lion's share in the marketing of the farmers' products.

Mr. WILLIS. Mr. President, I desire to propound an inquiry to the Senator.

Mr. GOODING. I yield.

Mr. WILLIS. The Senator has just referred to the very large and, as he thinks, and as I think, the inordinately large number of retail and wholesale establishments. I wonder if that accounts for this situation: Some time ago I had occasion to make an investigation in an effort to determine the share of the consumer's price which the producer actually received. I made that investigation in connection with certain products we produce very largely in Ohio, and from the figures I obtained from the Agricultural Department and from the Department of Commerce I found that out of every dollar paid for our products by the consumer in the markets of Baltimore, Philadelphia, or New York the producer back in Ohio, who owned or rented the land, put out the crop, ran the risk, and did the work, got 28 cents, and somebody else along the line got the other 72 cents out of the dollar. That was not made up very largely at that time of freight rates, because freight rates then were considerably lower than they are now. In other words, it was middlemen's profits which raised the prices to very much more than what the producer of the farm products got.

Mr. GOODING. The Senator is quite right, Mr. President. There is no doubt but that there are too many middlemen between the producer and consumer. We must have a better distribution system in this country or the farmer will not receive the full benefit of the tariff.

Mr. President, on top of it all we have been making radical reductions in every department of the Government. At this particular time we are scrapping our Navy and making reductions in the officer and enlisted personnel. On July 1, 1921, our total naval strength, officers and enlisted men, was 121,969. On June 30, 1922, this had been reduced to a total strength in the Navy of 95,947, or a net reduction in a year's time of 26,022 men.

Likewise, the reduction in the strength of the Army has been very material. On June 30, 1921, the total strength of the Army was 214,500 officers and enlisted men. By June 30, 1922, this had been reduced to 140,232, or a net reduction in a year's time of 74,177 in the Army.

On July 1, 1921, the Marine Corps had a total strength of 22,992 officers and enlisted men. This number had been reduced by July 1, 1922, to a total strength of 21,259, or a net reduction during the year of 1,733 men, who must find employ-

ment in civil life. This number by itself is not very material but it shows the tendency all along the line.

On January 1, 1920, there were 640,175 employees in the Government service, within the District of Columbia and outside, exclusive of the Army, Navy, and Marine Corps. By January 1, 1921, this number had been reduced to 568,390, or a net reduction of 71,785 employees. At the same time it has been estimated by competent authority that a further reduction of 3,000 has been made since January 1 of this year.

As an important factor in this problem we must consider the number of permanent immigrants coming to our shores who must find employment to sustain themselves and their families or become a burden or possibly a menace to the community. The figures from the office of the Commissioner of Immigration indicate that for the 11 months ending June 1, 1922, there were admitted into the United States 284,780 permanent immigrants.

Mr. President, very properly, rigid economy is the watchword of this administration, as is so fully shown in our appropriations. For the year 1921 the total Government appropriations, as given by the Budget Bureau, were $5,205,236,104.1½. For the fiscal year 1922 this amount had been cut down to $4,066,316,366.74, inclusive of deficiency appropriations, or a net reduction for the year of $1,138,919,737.40. This, of course, means that there was that much less expended by the Government for labor and material and that the people directly involved must look elsewhere for their empolyment.

Assuming that $1,000 is a fair average annual compensation in the Government service, the year's reductions in personnel would account for $176,717,000 of the reductions in the total appropriations. This would leave $873,844,237 to be accounted for by decreased wages paid to labor, purchase of material, equipment, supplies, and so forth, all of which means that much less paid to labor in one form or another, and has a direct bearing on labor conditions throughout the country.

With our public lands all gone and every industry overdeveloped beyond our own requirements, great enough in some instances to supply the whole world, we have reached that period in the history of our country when it might not be out of place to ask, what of the future? There are those, Mr. President, who believe that we have reached that milestone in the life of our Nation when we shall have to meet the test of our form of government.

At this time it might not be out of place to read Lord Macaulay's Prophecy, as quoted in McCleary's work on Protection, Our Proper Permanent Policy (page 14):

In 1857 Thomas B. (afterwards Lord) Macaulay, the great English historian, wrote a letter to H. S. Randall, of Virginia, who had sent him a copy of the Life of Jefferson and the Colonial History of New York, from which letter the following extracts are taken:

"I have long been convinced that institutions purely democratic must, sooner or later, destroy liberty or civilization, or both. You may think that your country enjoys an exemption from these evils. I will frankly own to you that I am of a very different opinion. Your fate I believe to be certain, though it is deferred by a physical cause. As long as you have a boundless extent of fertile and unoccupied land your laboring population will be more at ease than the laboring population of the Old World, and, while that is the case, the Jefferson politics may continue to exist without causing any fatal calamity. But the time will come when New England will be as thickly populated as old England. Wages will be as low, and will fluctuate with you as with us. You will have your Manchesters and Birminghams, and in those Manchesters and Birminghams hundreds of thousands of artisans will assuredly sometimes be out of work. Then your institutions will be fairly brought to the test. * * *

"It is quite plain that your Government will never be able to restrain a distressed and discontented majority; for with you the majority is the Government and has the rich, who are always a minority, always at its mercy. The day will come when in the State of New York a multitude of people, none of whom have more than half a breakfast or expect to have more than half a dinner, will choose a legislature. On one side is a statesman preaching patience, respect for vested right, strict observance of public faith. On the other is a demagogue, ranting about the tyranny of capitalists and usurers, and asking why anybody should be permitted to drink champagne and ride in a carriage while thousands of honest folks are in want of necessaries. Which of the two candidates is likely to be preferred by a workingman who hears his children cry for more bread?

"I seriously apprehend that you will, in some such season of adversity as I have described, do things which will prevent prosperity from returning; that you will act like people who should, in a year of scarcity, devour all of the seed corn, and thus make the next year not of scarcity but of absolute famine. There will be, I fear, spoliation. The spoliation will increase the distress; the distress will produce spoliation. There is nothing to stop you. Your Constitution is all sail and no anchor.

"As I said before, when a society has entered on the downward progress, either civilization or liberty must perish. Either some Cæsar or Napoleon will seize the reins of government with a strong hand or your Republic will be fearfully plundered and laid waste by barbarians in the twentieth century as the Roman Empire was in the fifth, with this difference—that the Huns and Vandals who ravished the Roman Empire came from without, while your Huns and Vandals have been engaged within your own country by your own institutions."

If Lord Macaulay had prophesied the downfall of Russia instead of our Republic, he would be accepted as a great prophet to-day. Time has proved, Mr. President, that a republican form of government, if properly conducted, will meet any test.

Mr. President, I have no fear of the downfall of this Republic, and I am sure that our Constitution will meet the test, but there is always danger to any government when those in control do not legislate wisely in the interest of the people. Abuse, long continued, has strewn the pathway of civilization with sad stories of the fall of nations as far back as authentic history tells of the achievements of mankind.

Mr. President, the world to-day is confronted with the greatest crisis in its history. Some governments have broken down and others are struggling with a depreciated currency and with a social condition which makes uncertain what to-morrow may bring forth. While every other country in the world is increasing its duties and placing embargoes on goods that its people manufacture, we find the Democratic Party fighting against every rate in the bill that is now before the Senate, and at the same time they admit that many of the rates in the present law—the Underwood-Simmons law—are entirely too high and should be revised downward.

This country presents the most remarkable spectacle on the tariff question of any country on earth. The Democratic Party occupies the unique position of being the only free trade or tariff for revenue party, call it what you please, on earth to-day, for they are all one and the same so far as protection is concerned. The Democratic Party is the only political party in the world that believes protection is unconstitutional and immoral, even when it is needed to save the life of the Nation.

This great, august body, as it is so often called and admitted by the Senators upon the floor, is the only legislative body in the world which, considering tariff laws, has refused to take into consideration the unbalanced condition of the world, brought about by the Great War, and the depreciated currency of some of the countries of Europe, which, when measured by our standard of values, the gold standard, is worth less than the paper on which it is printed.

Not only is all of Europe increasing her duties and laying embargoes, but this is being done in all parts of the world.

These embargoes are of three types. France, Italy, Spain, and other countries, where there are Government monopolies of such articles as matches and tobacco, forbid their importation or sale. Others issue long lists of goods which may not be imported under any condition, irrespective of their origin. The third plan is an outgrowth of the war, during which the belligerent Governments exercised very close supervision over all foreign trade. Some of them still issue lists of commodities which may be imported only under special license from the Government. The result is much the same as that attained by the second plan, for such licenses are often impossible to obtain.

Great Britain put into effect on October 21, 1921, an act called the safeguarding industry act. This act levies a protective tariff of 33⅓ per cent on all key industries in Great Britain. In addition to this, Great Britain has a commission to which any industry may appeal, and on the proper showing they are given protection.

In the interest of safeguarding Great Britain's industries, a clause was inserted in the German reparation act which imposes a 26 per cent tax on all goods shipped out of Germany consigned to the United Kingdom. This 26 per cent tax is to be collected at German ports as an export tax, the tax so collected to be turned over to Great Britain and credited by her to the German reparation fund.

So on all German goods that come into competition with what England calls her key industries, Great Britain's industries are protected by a tariff of 59 per cent against all German imports. A duty of 59 per cent is very much higher than the duties levied in this country, and it must be admitted that, at least in a large majority of our industries, the cost of production is higher in this country than in any other country on earth.

Mr. WILLIS. Mr. President, has the Senator before him any data to show what the British Government regards as key industries?

Mr. GOODING. I placed that list in the RECORD on a previous occasion. It covers something like 6,000 different items.

Mr. WILLIS. Can the Senator recall some of them at this time?

Mr. GOODING. I doubt if I can, but it includes practically all of Great Britain's principal industries, which are protected against imports from Germany by a 59 per cent rate. I understand, further, that every day they are placing duties on new commodities and new industries wherever a showing can be made which, in their opinion, justifies it.

Free-trade England has had sense enough to realize that the world is still suffering from conditions brought about by the war. She has considered the tariff question to be an emergency matter, until to-day Great Britain and her colonies are among the highest protective tariff countries in the whole world. While foreign diplomats in this country have been busy attacking our tariffs, their own countries, without exception, have far outstripped our own country in levying duties on foreign imports.

Canada has outdone England in her protective tariff duties. For years she has been a higher protective tariff country than our own, and yet Senators on the other side of the Chamber shed tears over the unfairness to Canada in the bill that is now before the Senate.

The Dominion of Canada has amended its tariff upward since the war by a series of changes. These changes have worked consistently against the United States in favor of British industries. For many years Canadian tariffs have given imports from the mother country preference in rates over imports from the United States and other countries. She began this practice in 1898 and has maintained it in every tariff written since. These preferences in favor of British-made goods have amounted to between 20 and 30 per cent.

In July, 1921, Canada levied a tax upon all advertising matter from the United States. This was a direct blow at United States products which were advertised in American magazines and newspapers having a circulation in Canada.

Canada's latest act, which is a direct blow at United States products, is a change in its tariff rates and also in its sales tax. The change in its tariff does not raise any rates against the United States but does give the British 5 per cent greater preferential rates, thus giving imports from the British Empire a preference of about 20 per cent over our imports from the United States. Her second discrimination is in the modification of her sales tax, by which she imposes a sales tax of 4 per cent on articles made in Canada and the British Empire and a tax of 6 per cent on all articles sold in Canada which are imported from the United States.

While it is estimated that we shall have a free list of from 55 to 63 per cent on all foreign imports under the pending bill, Canada's free list at the present time is from 31 to 35 per cent. So my advice to the Senators on the other side of the aisle is to dry their tears as far as Canada is concerned, for she seems to be amply able to take care of herself when it comes to tariff laws. In fact, Canada will not have any free list, for she has a sales tax of 6 per cent as against our imports, which, in some cases, is higher than the duties we impose in this bill.

Not only Canada, but Australia and New Zealand, in fact every British dominion, has increased its rates of duty on foreign imports since the war once or twice, all cooperating through and by a commission. Canada has also taken into consideration the depreciated currency of foreign countries.

Switzerland, on May 24, 1921, put into effect a tariff law for the purpose of protecting her home markets from invasion by cheaply made foreign goods and protecting her manufacturers from this kind of competition. She did not rely altogether upon high rates, for in a great many instances her tariff law goes so far as to absolutely prohibit the importation of articles the like of which are manufactured in Switzerland.

On March 19, 1920, Czechoslovakia put into effect a tariff which prohibited all imports of products the like of which are manufactured in that country for export. In addition, it established practically a prohibitive tariff rate on a large number of imported articles which are not made in that country. For example, it established a tariff of 90 per cent of the purchase price on all automobiles and parts of automobiles such as motors, engines, and so forth.

On July 10, 1921, Jugoslavia put into effect a protective tariff with rates that make it practically impossible to import articles into that kingdom the like of which are produced there.

On July 16, 1921, Austria put into effect a new tariff with rates 200 times as high as those of the pre-war period. This was done in order to offset the depreciation of currency in Austria and to afford Austrian manufacturers protection for imports from other countries.

On August 3, 1921, Italy established an absolute embargo against the importation of a majority of manufactured articles from the United States. In doing so she practiced flagrant discrimination against this country, as, by the same decree which established the embargo, she permitted the importation of like articles from Belgium, France, Algiers, Switzerland, Portugal, England, and all the British Colonies. Since then she has reduced this embargo somewhat, but she still retains it against a great number of American products, especially American meats, tobacco, and cottonseed oil. She has a high tariff on all articles that she does not permit to be imported.

On November 7, 1921, Belgium put into effect a new tariff which provided for an increase of from 100 to 300 per cent in all specific duties on German goods admitted by weight and an increase of 20 to 40 per cent in all ad valorem duties on German goods. This was done to offset the depreciation in German currency. In the early part of this year Belgium extended this 100 to 300 per cent increase of tariff duties to the imports from all countries whose currencies have depreciated and also added a domestic valuation clause, which provided that all imports should be valued for duty at a valuation not less than the wholesale price of like goods made in Belgium.

On September 25, 1921, the Republic of Ecuador established against a number of articles new rates of tariff which were higher than previous rates and she placed an absolute prohibition against the importation of shoes of any kind in order to protect her home shoe manufacturing industries.

Poland, on August 11, 1921, put into effect a tariff which absolutely prohibits the importation of articles the like of which are manufactured in Poland.

Finland, in December, 1921, established a tariff for the year 1922 which prohibits the importation of all manufactured articles that are not indispensable and increases by about 300 per cent the tariff duties on articles permitted to be imported.

Mexico, on January 1, 1922, put into effect a tariff with rates from 25 to 100 per cent higher than the previous rates.

Peru, on the first of the year, put into effect a tariff of 400 per cent on ladies' fine shoes.

Denmark, on November 25, 1921, put into effect an emergency tariff, with greatly increased duties all along the line.

Hungary, on November 23, 1921, put into effect a new tariff, with rates from forty to one hundred and fifty times the normal pre-war rates.

Spain, on February 16, 1922, put into effect a new tariff, affecting practically every article of import, with rates much higher than previous rates.

Bulgaria, on April 1, 1922, put into effect a new tariff, in which all rates were vastly increased over previous ones.

Sweden, on March 27, 1922, put into effect a new tariff, with rates about five times their pre-war levels.

A number of countries have adopted what is known as the coefficients system. This principle of levying duties was first employed in France and has since been adopted by several other countries. France has an executive committee that is given almost absolute control over imports. The duties are revised by a change in "coefficients" or "multipliers"—that is, the maximum and minimum duties on a given class of products are multiplied by 1½ or 2 or 5, as the case may be, to determine new duties. At first 3 was the highest multiplier, but recently, because of depreciated currency in other countries, and so forth, the multiplier may be as high as 10. In other words, the duties on some goods, as fixed by the executive committee, are ten times higher than under the legislative act of 1910.

The same system is used in Germany. On many articles Germany has placed an embargo and controls her imports through a licensing system.

In an official note to the American commissioner at Berlin in August, 1921, the German foreign office stated that "whether and to what extent such permits are issued depends on the nature of the goods and the monetary economic situation in the branches affected." The foreign office further stated that the Government is unable to furnish a list of goods for which the obtaining of an import permit can be depended upon, but that in general it may be said that "import permits may not be expected for finished goods whose importation may be considered as superfluous by reason of their character as luxuries or on account of a sufficient production at home."

The German import duties are stated in gold, but under normal conditions were paid in paper marks at par. With the depreciation of the paper mark after the war duties were required to be paid in gold or its equivalent, with the exception of a short period in 1919. Practically since the war import duties in Germany have been paid in paper marks, and in the effort to maintain an approximate equivalent between the duties collected in the pre-war gold currency and those collected in the depreciated paper currency the official conversion rate between the gold and paper mark has been advanced repeatedly by the German Government in rough proportion to the course of depreciation of German currency in international exchange. The number of paper marks which have been declared as equivalent to one gold mark in the payment of duties has been successively advanced from 10 to 20, 40, 45, 60, and, effective June 25, 1922, 65 paper marks will be required to be paid for every gold mark of the basic tariff.

Mr. President, even Germany has found it necessary, in order to protect her own industries, to increase her duties as high as sixty-five times, and she had the good sense to place a complete embargo on everything she can manufacture for her own use. We fail to recognize the fact that practically every other country on earth has closed its doors against the importation of goods which they can manufacture for themselves and that our exports to every country are going to be materially reduced in the future. If we do not make an effort to protect our markets and our industries as the rest of the world is doing, we shall be confronted with a serious problem such as we have never witnessed before. Unless we adopt the administrative provision in this bill which permits the President to increase rates by 50 per cent when found necessary, and adopt the system of American valuation, the time spent on this bill will be wasted, for unless we can bring back prosperity to all the great industries in this country there will not be prosperity for any of them.

Mr. President, this Nation can not stand still; it must either go forward or backward. The question arises, Are we going to go forward? If we are, we must adopt protection as our permanent national policy. We can not continue to make a football of our great industries in this country, as we have done for the past hundred years, and at the same time bring about the greatest possible development of all our resources.

Whenever there has been a free-trade period in the history of our country; in fact, whenever our tariffs have been reduced below the line of protection, regardless of whether such reduction has been made by the Republican or the Democratic Party, millions of men have been thrown out of employment and suffering, distress, and starvation have ensued in all of our great cities. If there is to be any stability in business in this country we must have a permanent policy so far as our revenue laws are concerned. It is a mighty dangerous proposition to continue to play football with the business interests of America, for we have reached a milestone in the life of this Nation when the one great question that overshadows all others is that of finding employment for our own people.

Speaking of the importance of employment for our people, the New York Evening Journal of July 11, 1922, in an editorial entitled "Tariffs come high, but better lose $13.15 than your job," has this to say:

Almost every newspaper in the United States has printed the statement by Senator WALSH of Massachusetts, "The new tariff will tax every human being in America $13.15." That's interesting. Undoubtedly every conceivable kind of dishonesty, grafting, special privilege will be packed into the new tariff bill. The public has not learned to make "statesmen" do important things honestly yet.

But there are possibilities infinitely more important than the stealing of $13.15 every year from every American man, woman, and child.

One possibility more dangerous would be lack of work for ten or fifteen millions of Americans, based on European competition that could not possibly be met by workers in this country.

Better tax every human being $25 or $100 rather than let them compete with Chinese labor here or in China.

Better to give the steel companies excessive protection than have the steel industry, the steel workers of this country, wiped out by foreign nations, every one of which specialized in cheap, intensive production of steel during the war.

A surgeon spills some blood when he performs an operation. It is blood well spent when the operation is successful. Better a tariff with graft, dishonesty and loss, and injustice inflicted upon many than no tariff, when a tariff is absolutely necessary as it is now, to the Nation's industrial salvation.

Mr. President, I thank God that there is at least one owner of a great newspaper in this country who seems to know and understand that the tariff question is the workingman's question, and who is big enough, strong enough, and fair enough not to permit the countinghouse to control the editorial policy of his great newspapers. I do not agree with Mr. Hearst that there is graft or dishonesty in the bill that is now before the Senate. I believe it is the best balanced bill and the fairest that has ever been presented to the Senate; and I am sure if Mr. Hearst knew as much about the bill as I do he would agree with me.

Mr. President, I read from a book published by James T. McCleary entitled "Protection Our Proper Permanent Policy," which I believe is the greatest book that has ever been written on protection in this country. If it could be read in every home in America we would soon settle upon protection as our permanent policy. On page 410 Mr. McCleary says:

The real protectionist stands for two thoughts preeminently. He recognizes that the first duty of the Government is to protect and preserve the country's integrity and independence. Industrially, he feels that the first duty of the Nation is to do everything possible to keep its people employed. Compared with these two supreme ideas, all others are unimportant.

Right here, Mr. President, rises the question, How can we keep our own people employed if we hire our work done in other lands? Mr. McCleary answers this question in the succeeding paragraph as follows:

The real protectionist, desirous of developing every faculty of our own people and every resource of our country, believes it unwise to buy abroad what we can economically produce in this country. So long as this old earth remains a sphere, with consequent zones of climate and production ranging from torrid to frigid, there will be abundant opportunity for normal international trade in noncompeting articles.

Beginning on page 497 of the book named, Mr. McCleary makes a consistent, brave, and true application of the propositions that I have quoted, as follows:

PROTECTIVE TARIFF RATES CAN NOT BE TOO HIGH.

When we consider that, as shown in chapter 9, under a protective tariff, the duty is not a tax on our own consumers but a license fee on the foreign producers—and it is vital that every American citizen get this clearly established in his mind—all fear of getting the duties too high will disappear; and it will become the more evident, the more clearly the subject is understood, that the only mistake possible is that of getting the rates too low.

How high should the Galveston breakwater be? The answer is not open to doubt or difference of opinion. There is only one right answer. The people of Galveston are furnishing it. After trial they have soberly reached the conclusion that their breakwater must be big enough and high enough to protect the city and harbor under ordinary conditions, but also high enough and strong enough to protect them under any emergency and from any storm. On this principle they have just made it bigger and stronger than ever before. And time will vindicate their good judgment.

The same principle applies to the protection of our people from industrial storms in the world outside. The protection can not be too strong or too efficient. The rates simply can not be too high or the administrative features too strong for the good of all our people of all sections and all industries. As a result of the Great War a large part of the world outside is in the midst of an unprecedented storm. We can best serve the world and ourselves by preserving from destruction this country and its people, thus keeping ourselves in condition to lead the world back to better things.

Mr. President, I do not agree with the junior Senator from Massachusetts that the tariff is a tax. If it is a tax, it is a tax that the American people can not and must not do without. I am not willing, however, to admit that the tariff is a tax for the selfishness of humanity is so well organized that when an industry is destroyed in this country the importers, over whom we have no control, all exact the last penny on any article which they import and over which they have a complete monopoly.

Then, Mr. President, there is one rule in this country to which there is no exception. That is, when we have given proper protection to any industry that industry has never failed to supply the needs of the American people with a cheaper product than when we had to depend on the foreigner for our supply.

There are plenty of examples in the history of this country of how when our industries have been broken down by a free-trade policy the foreigners have increased the price of those articles beyond the price they sold for when this country was supplying its own needs through its own manufacturing establishments.

Speaking of such a condition, President Fillmore in his third annual message to Congress, in which he recommended protection, had this to say:

Without repeating the arguments contained in my former message in favor of discriminating protective duties, I deem it my duty to call your attention to one or two other considerations affecting this subject. The first is the effect of our large importations of foreign goods upon our currency. Most of the gold of California, as fast as it is coined, finds its way directly to Europe in payment for goods purchased. In the second place, as our manufacturing establishments are broken down by competition with foreigners, the capital invested in them is lost, thousands of honest and industrious citizens are thrown out of employment, and the farmer to that extent is deprived of a home market for the sale of his surplus produce.

In the third place, the destruction of our manufactures leaves the foreigner without competition in our market, and he, consequently, raises the price of the article sent here for sale, as is now seen in the increased cost of iron imported from England. The prosperity and health of every nation must depend upon its productive industry.

Mr. President, it is not necessary to go back into history to show what happens in the increased cost of any commodity when a foreign corporation has a monopoly, for foreign corporations may be owned and controlled by American capital. It is not hard to understand why it has become fashionable for Americans to go abroad and develop foreign industries, for in this way they can increase the price of the raw material in a foreign country and force up the price of the finished product in America without violating any of our laws.

The scheme is a splendid one and works well, as is shown by the sugar industry in Cuba. American capital has invested something more than a billion dollars in developing the sugar industry in Cuba. Much of this work has been done by coolie labor, which is brought to Cuba under five-year contracts to work on the sugar plantations.

Our domestic crop of beets and sugar cane is harvested in the months of October and November. By the first of March of each year it is said that all of our domestic sugar has been disposed of, with the exception of a little that is held in the

West for local consumption. I am advised that our last year's crop of domestic sugar sold for $5 per hundred on an average.

When our sugar is all gone it is then that the Cuban sugar is put on the American market. As soon as these great sugar companies that are interested in Cuba discover that they have a monopoly of our market, the price of Cuban raw sugar advances. With the advance of raw sugar the price of refined sugar is increased in this country. The scheme works well, and there is no danger of prosecution for profiteering or for being in a trust or combination.

It is estimated that the crop of Cuban sugar this year will be 3,900,000 tons. Our domestic consumption for 1921 was 4,107,328 long tons. It is claimed that of this amount 1,866,153 tons came from Cuba. The price of refined Cuban sugar in New York to-day is $6.50 per hundred, or 1½ cents a pound more than the average price paid for our domestic sugar.

There is no scarcity of sugar. There is just a trust and combination in Cuba, over which we have no control, that will force the American people to pay from 1 cent to 2 cents a pound more for Cuban sugar than they pay for their domestic sugar grown on American soil, cared for, harvested, and refined by American labor and American capital and under American institutions, where the people have some chance, at least, to be protected against the selfish tendencies of humanity.

I have here a letter from Mr. F. R. Hathaway, who is secretary-treasurer of the Michigan Sugar Co. I will not read the letter, but I ask that it be incorporated in the RECORD.

The PRESIDING OFFICER. Without objection, the letter will be printed in the RECORD.

The letter is as follows:

MICHIGAN SUGAR CO.,
Detroit, Mich., July 15, 1922.

Hon. FRANK R. GOODING,
United States Senate, Washington, D. C.

DEAR SIR: Replying to your telegram of July 14 and answering your questions in order—

First. The date eastern beet and Louisiana cane sugar is sold out so that it no longer affects market.

The eastern beet-sugar factories begin operations in Ohio about October 1. The other eastern beet-sugar factories begin operations between October 10 and October 20. Sugar reaches destination and has positive effect on market about November 1 and continues to have a great influence on the market throughout this section until April 1, the last sales of the eastern beet usually being made in the month of April. The quantity left for April distribution is not, however, sufficient to affect the market very materially during that month.

You will naturally inquire what will be done in case our output is doubled to prolong the beet-sugar season in this section as long as granulated sugar made in the fall and winter months can not be carried into the hot summer months. We will make granulated sugar in enough of our factories to supply the winter and spring trade, make raw sugar in the other factories, equip one of our factories to refine such raw sugar, and thus have fresh raw sugar to distribute during the summer months. We have not done this so far because the output is not sufficient to justify such a method of manufacture.

Louisiana cane sugar comes on the market and goes off the market, as far as a positive influence is concerned, at the same time that eastern beet enters and finishes. The two kinds of sugar thus cooperate in exercising a positive influence on the market in this section of the country.

Second. What is the price of Cuban raw in Cuba commencing January up to the present time?

I can not give you the price in Cuba. The quotations are with cartage and freight delivered in bond in New York. The present ocean rate of freight from Cuban ports to New York is, however, 15 cents per 100 pounds. Before the war it was about 10 cents from the northern Cuban ports and 12 cents from the southern Cuban ports. The figures I give you are, therefore, the delivered price of Cuban sugar in bond in New York, which prices are net cash. I will also give you in the same table for corresponding dates the price of standard granulated sugar f. o. b. New York and the price of standard granulated sugar f. o. b. San Francisco. These prices of granulated sugar are subject to 2 per cent discount for cash within 10 days. Quotations on granulated are always given that way, while quotations on raws are given net cash. It seems best in answering this question to start with the prices on September 1, 1921, and run them down to the present date. This will show you how the prices dropped when eastern beet and Louisiana cane came on the market, and how it advanced again when these two kinds of domestic sugar had been sold and the Cubans had the market to themselves, without being controlled in any way by our laws governing combinations in restraint of trade.

Date.	Net cash price 96° Cuban sugar delivered in bond at New York.	New York price, granulated sugar.	San Francisco price, granulated sugar.
1921.

Third. What is the price that last year's crop of Louisiana cane and eastern beet sold for?

I can not give you the figures relative to Louisiana sugar. You can undoubtedly get them by inquiring of Mr. John M. Rogers, secretary of the Louisiana Cane Growers' Association, Union Trust Building, Washington, D. C.

The Michigan Sugar Co. received for its last season's crop of sugar $4.94 per 100 pounds net cash. The Toledo Sugar Co., of which I am also secretary and treasurer, received $5.06 per 100 pounds net cash. I think these two companies are fairly representative of the other eastern beet-sugar companies, and I doubt whether any of them received any better returns for their sugar last season than did the two concerning which I know about definitely. Some of the western beet-sugar companies, particularly those in Colorado where they are so situated that on account of the high altitude and dry climate they can carry their sugar for local consumption into the summer months, undoubtedly received a greater net cash return per 100 pounds for their sugar than did any of the eastern beet-sugar companies.

Fourth. What is the amount of Cuban sugar consumed in this country when domestic beet and cane are off market?

I can not give this answer definitely. Willett & Gray give the total consumption of sugar in the United States during the calendar year 1921 to be 4,107,328 long tons of 2,240 pounds each. They claim that of this amount 1,866,153 tons came from Cuba that year. As close as I can estimate it, the amount of this Cuban cane that was used in this country during the seven months when our eastern beet and Louisiana cane were not on the market must have been from 1,250,000 tons to 1,350,000 tons.

Fifth. Give estimate of Cuban production the past season.

Willett & Gray give the Cuban production in long tons of 2,240 pounds for the past 10 years as follows:

	Tons.
1912–13	2,428,537
1913–14	2,597,732
1914–15	2,592,667
1915–16	3,007,945
1916–17	3,023,720
1917–18	3,466,083
1918–19	3,971,776
1919–20	3,730,077
1920–21	3,936,040

The 1921–22 crop is not yet completed. There are 186 centrals in Cuba, of which 172 have finished operations, leaving 14 still grinding, as reported by Willett & Gray on July 13, 1922. The 172 centrals that have finished grinding have made 111,000 tons more sugar than they did two years ago, and within 23,000 tons of the amount they made last year. Based on these figures the closest estimate we can make at present for the output for the season 1921–22 is 3,875,000 tons. The output probably will be between this amount and 3,900,000 tons. You understand that these are long tons and can be changed into approximate short tons by adding 10 per cent.

All statistical figures given herein, with the exception of the net cash prices received by the Michigan Sugar Co. and the Toledo Sugar Co. for their last season's crop of sugar, are taken from Willett & Gray, who are recognized sugar statisticians in this country.

I trust that the above will give you the information you require and that you will find it to your entire satisfaction.

I am holding myself in readiness to come to Washington to assist in the tariff work whenever my services are needed. Do not wish, however, to come any earlier than necessary, as I am very busy here.

With sincere regards, I am,

Yours respectfully,

F. R. HATHAWAY,
Secretary-Treasurer.

Mr. GOODING. The letter is very illuminating. Mr. Hathaway goes on to tell the story of the sugar industry of this country. I will just take time at present to read the market prices of sugar beginning the 2d of March, showing how beautifully the great Sugar Trust of this country manipulates the market, and what a monopoly they have of that great industry, and how splendidly the policy of free trade works. We have never given this great industry proper protection so that we could develop it up to the point of meeting our own requirements. Of course, we understand that had it not been for the war sugar would have been on the free list. I think everyone who knows anything about the great American sugar industry, whether it is beet or cane, knows that if sugar had been put on the free list the American industry would have been destroyed.

On March 2 granulated sugar—that is, granulated sugar refined from Cuban raw—sold for $5.10 a hundred.

On the 9th of March it sold for $5.20 a hundred.

On the 16th of March it sold for $5.30 a hundred.

On the 23d of March it sold for $5.50 a hundred.

On the 30th of March it sold for $5.25 a hundred. The price was forced down 25 cents. I think we are all familiar with the game that this great sugar company plays in putting its sugar on the market. Something has to be done to cover up the monopoly that it has.

On April 6 sugar was still $5.25 a hundred.

On April 13 it was still $5.25 a hundred.

On April 20 it was still $5.25 a hundred.

On April 27 it was still $5.25 a hundred.

On May 4 it was $5.40 a hundred.

Then it dropped back again, on May 11, to $5.30 a hundred.

On May 18 it was $5.30 a hundred.

On May 25 it was up again to $5.50 a hundred.

In June, the time of the year when the greatest amount of sugar is being used—the fruit season—the price of sugar went up. On the 1st day of June it reached $5.60 a hundred; on the 8th of June, $5.80 a hundred; on June 15, $6 a hundred; and on June 22, $6.20; still $6.20 on June 29 and on July 6; but on July 15 it was up to $6.50 a hundred—a cent and a half more than the domestic crop sold for, on the average.

Figuring the increased cost to the American people at a cent and a half per pound during the seven months' period when the domestic sugar is off the market, the increased cost of the Cuban sugar is $45,360,000. This is an average of $215,897.60 per day, or $6,480,000 per month, which the consuming public is compelled to pay for this essential food product on account of the fact that a foreign monopoly, owned and controlled by American capital, dominates the domestic market. It is this condition of affairs which we are trying to remedy in the pending bill by lending all the encouragement within our power to the producer of sugar grown on American soil by American labor.

Mr. President, we have not only reached a new milestone in the affairs of this Nation but we have reached a new milestone in the affairs of the whole world, which must be taken into consideration in dealing with our affairs. Before the World War all Europe was spending vast sums of money in the development of its armies and navies. England was building a great navy and in other ways was spending vast sums in research and developing weapons of destruction. France was not only extending her navy but was organizing a great army, and it can be said that all of Germany was a military camp. Germany was not only building a great navy but she was organizing the greatest army the world has ever known. All of her industries were developed up to a war basis. An army of men was employed in manufacturing munitions of war, and it is safe to say that half of all the German people found employment in Germany's preparation for the greatest struggle that civilization has ever known. And in that great struggle for four long years Germany held the whole world at bay, and for a time had victory within her grasp. During those years that Germany was preparing for war she made one of the most remarkable industrial advancements that civilization has ever known. In 1913 she took second place among the nations of the earth, when her exports reached the enormous amount of $2,592,296,000 as against exports from our own country of $2,465,884,000.

Those great countries of the Old World which were spending so much money preparing for war are now on a peace basis. England is no longer building a navy but is scrapping many of her vessels of destruction that she built before the war. Japan, like the United States and England, has placed her navy on a peace basis, and in this retrenchment millions of men will be thrown out of employment, and the world applauds, very properly, because this is the greatest stride that has been taken toward permanent peace for the world. Germany is without a navy to scrap or maintain. She is without an army, and if she can succeed in holding her people together and in maintaining her Government, which let us hope and pray she may be able to do, she will again become a mighty factor in the markets of the world.

Our Democratic friends on the other side of the Chamber show a great deal of courage. They are not afraid to compete with any country on earth, regardless of the conditions which exist in that country. Senators on the other side are poohpoohing what they call the German bugaboo. Some of them are talking about the inefficiency of Europe and saying that some of Germany's plants are obsolete and that there is no danger of competition from that country.

Mr. President, the world will not soon forget German efficiency before the war and during the war. I do not believe there is a more efficient people on earth than the German people. Before her submarines, her Zeppelins, her flying machines, and her great guns the whole world stood aghast. There was no question about her efficiency in that great war, and she is just as efficient in her industrial work as she was in that great struggle for the control of the world.

Some of the Senators on this side of the Chamber seem to think that because the imports are light in some lines of manufactured articles the duty should be reduced. If I had my way, Mr. President, I would do what every other country is doing—I would make the duty so high that there would be a complete embargo against every manufactured article that can be produced in this country by our own labor and in our own factories. To me the situation in this country is a serious one. I will not say it is a dangerous one, but it may become a dangerous one unless we give the producers an opportunity to start the wheels of industry and the great army of the unemployed an opportunity to earn a living.

Mr. President, I have an exhibit here to which I shall call attention, but first I want to say that Senators on this side of the Chamber and Senators on the other side of the Chamber have referred to the imports at the present time as being very small. I think, when you consider the depreciated currency in many of the old countries of the world, the imports may be small, measured by dollars and cents. But the volume of imports from Germany, and practically all the other countries with depreciated currencies, is not small, and if measured by the gold mark, or the valuation of the mark before the war, it would be very much greater, as far as dollars and cents are concerned.

In 1913 the imports from Germany into this country were $184,211,362. In 1920 they were $88,836,280. With the depreciated currency of to-day the volume of imports from Germany for 1920 is vastly greater than the volume of imports for 1913. I think if the Senators will follow the invoice values of the exhibits I am going to present they will be forced to agree to that conclusion.

First, I want to read what happened in Austria. I read from the Washington Post of June 15, 1922:

RUSH TO SPEND KRONEN CLOSES VIENNA SHOPS—PANIC-STRICKEN POPULACE SEEKS TO TURN NEAR-WORTHLESS MONEY INTO MERCHANDISE.

(Special cable dispatch.)

VIENNA, June 14.—With the dollar quoted at 22,000 kronen, Vienna has reached the verge of collapse. After Monday's panic the stock exchange was closed, and to-day the panic had overtaken the population. Everybody is trying to get rid of kronen. The shops were open for only a few hours to prevent a total clearing of their stocks, as the panic-stricken customers want to convert all their money into goods.

In business circles there are wild rumors about the measures the Government is going to adopt, including a moratorium on all foreign payments and far-reaching restrictions of exchange dealings.

But we are not afraid of kronen. We permit foreign importers—and most of the importers are foreigners—to go to Austria and buy with the depreciated currency there all they please and bring it into this country without any question, and pay a duty amounting to one-fifth or one-tenth of the pre-war value.

We are the only country in the world to-day that has not closed its doors against depreciated currency such as exists in Austria, Germany, and other countries. We are a mighty brave people, but we will pay the price for it, which might be serious.

I hold in my hand a 22-caliber rifle [exhibiting]. I know something about guns, and I will say that this is some gun. There is not any question about that. This is not any toy at all. It is a real 22-caliber rifle. I want to read the history of it.

This is part of a shipment of two thousand nine hundred 22-caliber rifles purchased by the J. L. Galef Co., of New York, from Gustav Genschow & Co., of Berlin, Germany. The entire cost of these rifles in Germany was 685,500 paper marks, less 15 per cent for cash, making the invoice price 582,825 paper marks in Germany. To this there has been added 6,554 marks

for cost of packing. The cost of a single rifle was, therefore, 235 paper marks, which, at the exchange value of the mark on date of entry, viz, $0.00543, makes the foreign cost $1.09 each. The amount paid for this rifle at retail in New York was $10. The percentage of spread between the foreign cost and the American retail price was, therefore, 818 per cent. The landed cost of this rifle was $1.62, insurance and freight charges being $0.15 and the import duty $0.38, the rate being 35 per cent ad valorem. The spread, therefore, between the landed cost and the American retail price was 517 per cent.

Landed cost of 2,900 rifles, New York	$4,698
Retail value	29,000

I may add in this connection that the foreign invoice and the bill of lading accompany the exhibits.

I next have a razor made in Germany [exhibiting]. Value in Germany, 24 cents; charges, including transportation, insurance, freight, and so forth, 2.4 cents; rate of duty, 55 per cent; amount of duty, 13.2 cents; landed cost in the United States, 39.6 cents. The razor retailed in the United States for $5. The percentage of retail price to foreign cost was 1,980 per cent, and the landed cost 1,165 per cent. The razor was purchased from Parker & Battersby, New York. The original invoice is attached.

Here [exhibiting] is a pocketknife made in Germany. The foreign value was 39.4 cents. The transportation, insurance, and freight amounted to 4 cents. The rate of duty was 55 per cent; the amount of duty 21.6 cents; the landed cost 65 cents; the retail price in the United States $5. The percentage of retail price to foreign cost was 1,172 per cent and the percentage of retail price to landed cost was 669 per cent. The bill is attached and the original invoice also accompanies it. This knife was bought and paid for in March at the rate of 142 marks per dozen.

I have here now a lamp chimney [exhibiting] made in Germany. The foreign cost was 3.33 cents; the transportation, insurance, and freight charges were 1.58 cents. The rate of duty was 45 per cent and the amount of duty 1.5 cents. The landed cost in the United States was 6.41 cents and the retail price in the United States 23 cents. The percentage of retail price to foreign cost was 590 per cent and the percentage of retail price to landed cost was 258 per cent. This lamp chimney was bought from R. H. Macy & Co., New York. The original invoice and bill of purchase are attached.

I have here [exhibiting] a dog muzzle also made in Germany. The value in Germany was 4.2 cents. The transportation and other charges were 3 cents. The rate of duty was 30 per cent and the amount of duty 1.3 cents. The landed cost in the United States was 8.5 cents. The retail price in the United States was $1.50. Percentage of retail price to foreign cost 3,471 per cent, and percentage of retail price to landed cost 1,664 per cent. The bill and original invoice are attached. This leather muzzle was purchased from the Long Island Bird Store, in New York.

I have here next [exhibiting] a razor hone. Country of origin, Jugoslavia. Foreign value, 18.7 cents. Transportation and other charges, 2.1 cents. This is free of duty. The landed cost in the United States was 20.8 cents. The retail price in the United States was $1. The percentage of retail price to foreign cost was 435 per cent and the percentage of retail price to landed cost 380 per cent. This shipment consisted of 36,000 razon hones. The value of the shipment in Jugoslavia was $6,750. The value of the shipment landed in New York, $7,506. The retail selling value in the United States was $36,000.

Here [exhibiting] are some aluminum teaspoons, an article used in every home. These came from Germany. The foreign value was 4.6 mills each. The charges, including transportation, and so forth, amounted to 0.4 mill. The rate of duty was 20 per cent and the amount of the duty 0.9 mill. The landed cost in the United States was 0.59 cent. The retail price in the United States was 4 cents. The percentage of retail price to foreign cost was 770 per cent and the percentage of retail price to landed cost was 580 per cent. The bill is attached, together with the original invoice, all bought from R. H. Macy & Co., New York.

I have next the bill and original invoice of a shipment of cod-liver oil. The bottle was broken in transit, so the cod-liver oil can not be exhibited. This was the finest nonfreezing, steam refined, medical cod-liver oil that can be bought in Norway. The value in Norway was 4.35 cents per pint. The transportation and other charges were 2.32 cents. The cod-liver oil came in duty free. The landed cost in the United States was 6.67 cents. The retail price in the United States was $1.25 a pint. The percentage of retail price to foreign cost was 2,773 per cent and the percentage of retail price to landed cost was 1,774 per cent. In other words, the profits were 1,774 per cent. The oil is imported in barrels and bottled in the United States. This shipment consisted of 1,875 imperial gallons, equal to 2,250 United States gallons. The value of the shipment in Norway was $783. The cost of freight, insurance, and so forth, was $417. The value of the shipment landed in New York was $1,200. The retail selling value of the shipment in the United States was $22,500 based on the price paid for this pint of cod-liver oil. This bottle of cod-liver oil was bought from Fraser & Co., in New York, and was accompanied by the original invoice.

I next have a padlock. Country of origin, Germany. Foreign valuation, 2.7 cents. Transportation charges, 4.3 mills. The rate of duty was 20 per cent, and the duty amounted to 0.0054 cent. The landed cost in the United States was 0.0367 cent; retail price in the United States, 25 cents. The percentage of retail price to foreign cost was 826 and to landed cost 581.

The article was purchased from Louis Rice Co., New York. The bill accompanies this statement, together with the original invoice.

Here [exhibiting] is some lace, which is called "burnt-out cotton lace." The country of origin is Germany; foreign value per yard, 22 cents; transportation, insurance, freight, and other charges, 2 cents per yard; the rate of duty, 60 per cent plus 7 cents per pound, amounting to 14 cents; landed cost in the United States, 38 cents; retail price per yard in the United States, $1.95. These articles were purchased from Lord & Taylor, New York. The bill, together with the invoice, accompanies the statement.

Here [exhibiting] are two electric irons. I think all Senators agree that nowadays a home, the occupants of which are fortunate enough to have electricity, can hardly exist without an electric iron. The country of origin of these electric irons is Germany; the foreign value is 59 cents; the charges, transportation, insurance, freight, and so forth, amounted to 5.9 cents. The rate of duty was 20 per cent, amounting to 11.8 cents; landed cost in the United States, 76.7 cents; retail price in the United States, $6.50.

The percentage of retail price to foreign cost was 1,000 and the landed cost 747. So, if Senators please, on this electric iron there was a profit of 747 per cent. One of these irons was purchased at retail on May 26, 1922, for $5.50, while the other was purchased on June 10, 1922, for $6.50; both purchases were made from the same firm, and the bill and the original invoice of the purchase of these electric irons are presented. These two irons were invoiced at the same price, but evidently the retailers concluded that they were selling too cheap at $5.50.

I have here [exhibiting] a card of vegetable-ivory buttons. The country of their origin is Germany. The foreign value per card of 12 buttons was 6 mills; the charges, including transportation, freight, insurance, and so forth, were $0.0006; the rate of duty was 45 per cent, and the amount of the duty $0.0027; landed cost in the United States was $0.0093. The retail price in the United States was 25 cents for this card of 12 buttons. The percentage of retail price to foreign cost was 4,066 and to landed cost 2,588, the latter figures representing the profit of the retailer after all expenses were paid. These articles were purchased from Stern Bros., of New York.

Mr. President, to Senators on the other side of the Chamber or to Senators on this side of the Chamber who are so afraid that we are going to close our doors against foreign importations into this country, who are alarmed lest the rates in this bill are going to be too high, let me say that there is but one possible chance in America to give the men who are out of employment an opportunity to supply their families with the necessities of life, and that is to embody the American-valuation plan in the provisions of the pending bill. I do not think that any committee has ever made a greater mistake than did the Finance Committee when in reporting the pending measure, after the House of Representatives, following months of study and consideration had adopted the American system of valuation, it changed that system to the foreign plan of valuation.

Senators may study the question as they please, but taking into consideration the conditions which exist in America to-day, with 3,500,000 men out of employment, with many of our industries working only on half time and some of them practically closed down, if any Senator can perceive how we can possibly ameliorate the serious situation which now exists in America by any other means than through affording proper protection to American industries he is able to see more clearly into the future than can I.

Mr. LADD obtained the floor.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER (Mr. MCNARY in the chair). Does the Senator from North Dakota yield to the senior Senator from Arkansas?

Mr. LADD. Does the Senator wish to ask a question?

Mr. ROBINSON. No. I desire to discuss the pending paragraph of the bill now under consideration and to make some references to the remarks which have been made by the Senator from Idaho [Mr. GOODING], who has just resumed his seat.

Mr. LADD. I desire to occupy the floor for about one hour in discussing the problem of Mexico and its recognition.

Mr. ROBINSON. Will the Senator from North Dakota be kind enough to yield to me for only five minutes?

Mr. LADD. I will yield to the Senator from Arkansas for five minutes

Mr. ROBINSON. Mr. President, the Senator from North Dakota has been very kind. I have been ready for a vote on the pending amendment since some time yesterday. I am astonished that the Senator from Idaho [Mr. GOODING] should take 2 hours and 24 minutes of the time of the Senate in a general discussion of tariff subjects remotely, if at all, related to the pending question. The Senator from Idaho has been foremost among Senators on the other side of the Chamber who have criticized Democratic Senators for their alleged action in holding up the passage of the tariff bill. With the item relating to hemp under consideration, the Senator from Idaho has taken the floor and consumed 2 hours and 24 minutes in the discussion of subjects entirely irrelevant to the pending question. He has read a speech, and the manner of his reading it shows that he is totally unfamiliar with the subject matter and the substance of the speech. During the course of his remarks there have been no more Senators present than now—two or three Senators on the Republican side of the Chamber and one or two Senators on the Democratic side of the Chamber. Yet the majority Senators are constantly taunting the minority Senators that they have been holding up the consideration and passage of the pending bill.

The Senator from North Dakota [Mr. LADD], who succeeded in obtaining the floor in advance of me, and who was kind enough to yield to me five minutes, has announced his purpose to consume an hour in general debate. I hope that the Senator from North Dakota will confine his remarks to the subject immediately under discussion. It ill becomes me, however, since I occupy the floor by his courtesy, to criticize in advance any remarks that he may submit; but I want to say to Senators on the other side of the Chamber that we are ready for a vote; that we are anxious to vote; we want to consider the provisions of the pending bill and pass upon them and dispose of the measure. The time for general debate on irrelevant subjects and for Senators on the other side of the Chamber to filibuster against the tariff bill has passed. This does not apply, of course, to the Senator from North Dakota, who has been good enough to yield to me five minutes, which I have just about consumed.

RECOGNITION OF MEXICAN GOVERNMENT.

WHY IS MEXICO NOT RECOGNIZED BY THE UNITED STATES?

Mr. LADD. Mr. President, it seems almost unnecessary for me to affirm that I would not willfully do anything which might embarrass the executive branch of our Government in its rightful conduct of foreign affairs or to interfere with negotiations which might be nearing a proper conclusion; but after painstaking investigation, after conferences with and repeated requests by many for information from the executive head of our Government, a sense of duty impels me to lay certain information before Congress and the country and to call attention to certain facts in the hope that an aroused public opinion, which ought to be the highest court of final appeal in any republic, will compel our Government heads to withdraw the apparently unjust demands they are insisting upon as the price of recognition and to reestablish immediately friendly relations and harmonious intercourse with the Republic of Mexico.

For 19 months Alvaro Obregon has been the duly elected President of the Mexican Republic. No suspicion of illegality clouds his tenure of office. For six months prior to his election Adolpho de la Huerta acted as provisional President under authority of the Mexican Congress. For 25 months, therefore, the Republic of Mexico has had a constitutional, pacific, and progressive Government—perhaps the best in the history of the Republic and certainly the most stable since the overthrow of Porfiro Diaz in 1911—and yet our Government withholds official recognition from this neighboring nation, except on terms that, in my judgment, are an insult to the sovereignty of the Mexican people and are a far cry from our traditional and boasted standards of true Americanism.

Our Chief Executive and the Department of State undoubtedly possess the legal right to withhold recognition from any believing that it is founded on violence, military oppression, fraud, or is conducting itself on principles antipathetical to international law and comity or the fundamentals which sustain civilization. In the past our Government has withheld and still withholds recognition from other Governments on these grounds, and there has been no protest by the people or unwarranted interference from Congress.

But it is my contention that the executive branch of the Government has no right to withhold arbitrarily recognition from a friendly Republic when that Republic for more than two years has proved beyond all reasonable question that it was established in accordance with its own constitutional provisions and international law; that it is founded on popular support; that it offers all reasonable safeguards to the life and property rights of its own citizens and foreign nationals; that accepts all valid international obligations; that advocates no confiscatory principles; and whose only offense is to insist upon certain sovereign rights which are expressly safeguarded in a treaty concluded with Mexico by our own Government which never has been revoked.

We have all the less right to withhold recognition when we know such an act trebles the difficulties that confront our neighboring Republic in its problems of reconstruction after 10 years of violent civil war and a succession of revolutions. There seems little doubt that England and France have some sort of an understanding with our Department of State not to recognize Mexico until the United States does.

The withholding of recognition makes it almost impossible for the Mexican Government to borrow funds needed for the reestablishment of transportation, commerce, and agriculture; it offers encouragement to certain sinister interests on this side of the border which have meddled unhappily in Mexico's internal affairs in the past and show an evident desire to do so again; it delays the adjustment of claims which concern the prosperity of many of our own nationals; and last, but by no means least, it postpones the industrial and agricultural development of Mexico, which otherwise would speedily become one of our best customers and restore our languishing foreign commerce by huge purchases which would furnish orders to our idle factories and give employment to our jobless workers.

COMMERCE AGAINST INDIVIDUAL INTERESTS.

Mr. President, I am forced to conclude, as I believe every person is who investigates the whole question with an impartial mind and with disinterested motives, that our refusal to recognize the constitutional, orderly, and friendly Mexican Government except on terms that seem a clear violation of Mexican sovereignty, is injurious to the best commercial interests of the United States as well as of Mexico, even though it may be advantageous to certain corporations and individuals of this and other countries; that it is an important factor in retarding the industrial rehabilitation of the whole world; that it damages our reputation with other Central and South American Republics as well as Mexico; and that it is an unfortunate departure from our former standards of honorable and just dealings with other nations, both great and small.

I do not care to comment at length upon some phases of previous interference by the United States officials in Mexican affairs. That is a closed chapter. I am only concerned with the present and future relations. But any fair consideration of the case calls forth the conclusion that we have interfered with Mexico in the past; that much of the disturbance in that unhappy country was the inevitable result of our meddling; and that certain great financial and industrial interests in the United States seem to have fomented past disorders within the boundaries of Mexico and still are endeavoring to influence public opinion in this country against recognition. For this reason it behooves us to be more than scrupulous in our dealings with Mexico and our respect for her sovereign rights, for it would be unfortunate indeed to afford any justification for the belief that in dealing with Mexico our State Department is acting at the behest of certain great, selfish, private or corporate interests or that the ends of decent and fair dealings with smaller neighboring nations have been subverted to the purposes of what is commonly called "dollar diplomacy."

WHAT ARE THE FACTS?

For this reason I am, after long consideration, laying all the facts in my possession before Congress and before the people. I believe that neither Congress nor the people place the demands of these private oil and land interests above the welfare of the whole Nation or our jealously guarded reputation for square dealing; and when all the facts are known I incline to the opinion that popular protest and popular pressure will bring about the recognition of Mexico, which already has been too

long delayed. In this connection it is necessary to rehearse briefly the facts leading up to the present situation, which, in my opinion, show that nation has done everything within its power that self-respect would permit to obtain recognition and that in longer withholding it we do an injustice to ourselves as well as to Mexico.

Mexico, Mr. President, once was the cradle of the oldest and most highly developed civilization known to the New World. The ancient Aztecs had an organized society which compared favorably with that of Egypt, Assyria, or Babylon, and in the arts, crafts, industry, and agriculture had made considerable progress. This was destroyed in 1519–1521, when the country was conquered by Cortez and his army of military adventurers, and for 300 years the unhappy land of Mexico was subjected to political tyranny, economic exploitation, and religious persecution that has no parallel in modern history.

The ancient civilization of Mexico was overturned; its proud, spirited aristocracy was almost exterminated; many of its cities were reduced to ruins; its people were enslaved in the mines or compelled to labor as serfs on the land; its treasures were taken to Spain; and the soil of Mexico literally was bathed in blood by the insatiable greed of its conquerors, who had no regard whatever for the rights or happiness of the original inhabitants but ruthlessly insisted upon extracting the largest possible tribute of gold.

Occasional revolts occurred from the first, but they were savagely repressed by armed force and the merciless, short-sighted, and barbarous rule of Spain continued until the opening of the last century, when, influenced, no doubt, by the example of the successful revolt of the American Colonies from the rule of England, large elements of both native and Spanish stock of Mexico spontaneously took up arms against the domination of Spain in 1810. The sanguinary struggle that followed is closely comparable to our own Revolutionary War, and no one who has studied the history of Mexico can doubt that they were animated by the same motives, with much more excuse, that led to our own fight for freedom.

In 1813 a revolutionary congress promulgated a formal declaration of independence from Spain, a provisional constitution was adopted, and decrees were issued abolishing slavery, ending the imprisonment for debt and establishing religious liberty. The struggle only started in earnest after the Mexican declaration of independence, just as our own historic document incited the more determined resistance from England, and for eight years more the revolution continued until in 1821 the new Republic was recognized by the United States and England, and Spain withdrew its last garrison.

OUR WAR WITH MEXICO.

The path of the new Republic was not peaceful, however. There followed a series of struggles between the forces of the republicans and monarchists, confused by the grandiose schemes of ambitious military dictators, and there was no settled government in Mexico until 1857. In the meantime, in 1847 and 1848, Mexico had come into collision with the United States over the annexation of Texas, which had seceded from Mexico, and our armies captured Mexico City, and we imposed rigorous terms on the conquered foe. Not only Texas but Arizona, New Mexico and California were added to the territory of the United States.

Mr. President, it is not necessary to go deeply into the causes of this war, but most impartial historians believe that our attitude was unjust; that Mexico's real offense was the opposition to the extension of slavery; that the quarrel was precipitated by the desire of the southern slave owners to offset the growing strength of the northern free States; and it is significant that Lincoln, Webster, Grant, and other American statesmen whose names we revere, denounced the course of our Government in the strongest possible language. Indeed, General Grant, even after he was President, went so far as to say that "No more unjust war ever was waged by a stronger against a weaker nation," and this represented the general attitude of northern statesmen of the time. I mention this merely to show that the righteousness of our cause was at least questionable even on the part of citizens of the United States, for whatever hostile feeling has existed in Mexico toward the United States has been the result of this war, and therefore perhaps not wholly unjustified. It is because of this past injustice that we should be all the more scrupulous in our present dealings with Mexico. We can not afford to have the 16,000,000 people of Mexico look upon us as grasping conquerors or regard us with suspicion.

The war with the United States at least served the purpose of convincing the more intelligent Mexicans that they must unite and establish a stable government to keep their country from disintegration, and in 1857 the reform elements did unite and adopted the constitution of 1857.

The constitution of 1857 was far in advance of the ideas of the early Mexican liberators, patriotic as they were, according to their rights. It was set forth "in the name of God and with the authority of the Mexican people," and recognized that "the rights of man are the basis and object of social institutions." The Mexican people declared that "all laws and all the authorities of the country must represent and maintain the guarantees which the present constitution establishes," and asserted further that "the national sovereignty resides essentially and originally with the people and is instituted for their benefit."

MEXICO'S TROUBLED WATERS.

But once more Mexico was not left free to work out its own destiny, for the great reactionary European powers, which operated under the agreement of the "holy alliance," hated the establishment of liberal principles on the soil of the New World, and, when the United States was torn by the dissensions of the Civil War, saw an opportunity to defy the Monroe doctrine and to reestablish monarchical rule in Mexico. Maximilian, grand duke of Austria, instigated and backed by Napoleon the Third, landed in Mexico with a powerful expedition of French troops and declared himself emperor in 1864. The Civil War that followed was not settled until 1867, and then only upon the threat of interference by the United States. This second war of independence was led by Benito Juarez, one of the outstanding figures of his day. Juarez occupied the presidency until 1872. His immediate successor was Sebastian de Tejada, who was unseated by the revolution of Palo Blanca. Gen. Porfiro Diaz succeeded Tejada in 1877 and was followed by Gen. Manuel Gonzales in 1880. In 1884 General Diaz was elected to a second term and he continued uninterruptedly at the head of the government until his resignation, May 25, 1911.

DIAZ'S IRON RULE.

The 27 years that Porfiro Diaz ruled Mexico was a period of outward stability and internal oppression. Since the repeated upheavals following his overthrow Diaz repeatedly has been extolled as a wise, beneficent ruler, a man who had the good of his country at heart, who was concerned only in its development, and a certain type of foreigners who prospered under his régime have lamented his passing and openly advocated the establishment of a similar régime by some "strong" successor.

The truth is that Diaz maintained himself in power by military might, in flagrant violation of the Mexican constitution, which provided that no President might occupy the office for two successive terms; that he habitually violated constitutional provisions concerning the granting of concessions; that he expropriaterd the native citizens of Mexico of millions of acres of communal lands, which had been theirs from time immemorial; that he reduced hundreds of thousands of native Mexicans to a state of peonage; that he jailed or killed all formidable political opponents and ruthlessly suppressed attempted organization on the part of city workers and agricultural laborers; that he favored foreigners at the expense of native Mexicans, and illegally gave away his country's richest resources in return for bribes paid to himself and his personal followers.

There is no doubt that Diaz "stabilized" the country, for banditry was almost entirely suppressed by his "rurales," a federal mounted police. He also encouraged foreign development and made some progress along educational lines, but his illegal expropriation of the natives' lands kindled the slow-smoldering fire that finally blazed forth in 10 years of revolution, and most of the international difficulties which Mexico faces to-day are the direct results of the illegal concessions granted by this dictator to foreign capitalists.

Louis XIV and Louis XV of France were loudly acclaimed by contemporary historians as the chief "ornaments" of Europe, and no one will claim that France was not "stable" under their rule; but we know now that it was their oppressions of the poor which caused the French Revolution under luckless Louis XVI. The long line of Russian Romanoffs also kept armed peace in the land by their secret police and "black hundreds," but the pent-up fury of the landless peasants finally broke forth and the present revolutionary excesses followed as night follows day. It was the same in Mexico. Under the rule of this "strong man" Diaz, whose "iron rule" is so often lauded by the concessionaires who exploited his favors, the powder train was laid that was terminated in the explosions of recent years.

REVOLUTIONS FORETOLD.

All students of history and economists know that revolutions follow certain definite trends which can be as closely diagnosed and as accurately predicted as the rise and fall of the fever chart of a typhoid patient, which ends in delirium. Certain wrongs were committed on the Mexican people; and from the

very day that those wrongs were perpetrated and perpetuated the upheavals of recent years were foredestined and inevitable. We should remember these facts in dealing with the Mexican people; we should recall their century-old struggle with the savage oppression of their Spanish conquerors and the crushing exploitation they have undergone from scarcely less greedy capitalists of our own and other nations; and it should make us patient with the common people of our neighboring nation, who are slowly but surely struggling upward toward political and economic independence. We should lend them a helping hand and not throw stumblingblocks in their way to make more difficult their struggle.

LAND GRABBING.

Unquestionably the most indefensible act of Diaz, and the one that first started the minds of the people flowing in a revolutionary direction, was his expropriation of the "ejidos" or community lands. These community lands were in possession of the aboriginal owners when the Spanish overran the country, but ruthless as were many of the acts of the invaders this immemorial ownership always was recognized, and when grants were made to Spaniards it always was stipulated that ownership of the Indians of lands occupied and farmed by them should be recognized and protected.

Under the instigation of land grabbers, however, who coveted these rich communal lands, Diaz passed a law requiring the Indians to appear before the authorities by a certain date and make proof of the ownership of these lands under pain of forfeiture. An overwhelming majority of the Indians were illiterate, and most of them were unaware of the passage of this law. Failing to register their ownership as the law required, their title was forfeited, and therefore thousands of Indians whose lands had come down to them for countless generations suddenly found themselves dispossessed and were forced to work as serfs on an unjust share-holding basis the very acres on which they had been born as free farmers.

Millions of acres of these communal lands were granted to foreign owners on condition they would colonize their huge estates. Four foreign firms in Lower California were given approximately 13,000,000 acres for a few pennies an acre, and then failed to meet the colonization agreements they had made. To-day the Mexican Government is investigating many of these grants, and wherever they are found to be clearly fraudulent or the conditions have not been lived up to the lands are being restored to their rightful owners who were illegally deprived of them.

OBREGON'S LAND POLICY.

This is one of the "confiscatory acts" of the Obregon government about which certain foreigners complain loudly. In my opinion these foreigners have no just grievance. The original grants were in conflict with the constitution and clearly tainted with fraud. Moreover, the concessionaires have violated the terms of their contract, which in itself vitiates any claim they ever may have had. In this matter my sympathies are entirely with the unfortunate natives and their descendants, who already have spent one generation in serfdom, and the present Mexican Government is heartily to be commended for its efforts to right this ancient wrong in cutting up these vast estates held by absentee landlords and restoring the land to its real owners. Every country prospers in direct relation to the happiness and prosperity of its people, and it long has been a political maxim that ownership of land makes for governmental stability. Most of the unrest of Mexico has been caused by the landless condition of its peons, and nothing will bring about peace in that country so surely or so speedily as the return of the land to those who actually farm it and have farmed it since the days of the Aztec empire.

It was the landless condition of the peons as well as their oppression by both native and foreign capitalists which led to the revolution of Francisco Madero in 1910. Outwardly all was peaceful in Mexico at that time, but discontent was simmering under the surface, and his slogan of "the land for the people" instantaneously won him popular support.

His revolt spread like wildfire and the corrupt government of Diaz fell apart like a hollow shell. In less than six months the dictator Diaz had fled aboard a ship bound for foreign parts and after a short provisional presidency by De la Barra, Madero was elected by a popular vote and legally installed as President.

There is a great difference of opinion about the character of Francisco Madero; but it seems fairly well established that, while honest and sincere, he lacked decisiveness and was vacillating in his decisions. Like many another, he found it easier to arouse the storm of popular discontent than to remedy the evils he complained of. He seemed singularly devoid of either political judgment or executive ability. He left the execution of many of his decrees to men who had little or no sympathy with his purposes. His rather idealistic conception of human nature failed to meet the stern exigencies of the occasion. His lack of consistency alienated his former supporters and his evident honesty failed to win the adherence of the "cientificos" who had surrounded Diaz. Discontent grew up in all quarters, and on February 9, 1913, a conspiracy, headed by Gens. Victoriana Huerta, Felix Diaz, and Bernardo Reyes culminated in an open attack upon the national palace. After 10 days of anarchy in the capital city, Madero finally surrendered, resigned his office under pressure, and, with his Vice President, was assassinated on the following night under circumstances which created a strong presumption that General Huerta was a prior accessory to the act.

It is not necessary to detail the chapters that followed. Our Government had recognized Madero as the legal successor of Diaz, but the Wilson administration consistently refused to recognize the Huerta government on the theory that he was actively implicated in the murder of Madero.

THE CARRANZA REVOLUTION.

In the meantime, Venustiano Carranza, Governor of the State of Coahuila, refused to recognize Huerta, took up arms, issued the call for a constitutional convention, and began a civil war that did not end until July 15, 1914, when Huerta finally fled aboard a ship at Vera Cruz.

Carranza entered Mexico City August 20, 1914, and shortly afterwards was declared "first chief" of the constitutionalist forces. Then Villa, Zapasta, and other chiefs who had aided in the overthrow of Huerta, took up arms against Carranza. Two years of civil war followed, which was complicated through occupation of Vera Cruz by United States troops following the bombardment of that port by our warships after a dispute with Huerta.

There is no doubt that the attitude of the Wilson administration was a strong factor in the collapse of the Huerta government; and it is equally indisputable that the bombardment of Vera Cruz and its subsequent occupation by our military forces created considerable hostility among all classes of Mexicans and was partially responsible for attacks upon Americans living in Mexico and damages to their property.

By the middle of 1915 Carranza had extended his authority over the greater part of Mexico and his recognition by the United States and other foreign Governments was accorded in October of that year. Sporadic outbreaks of banditry continued in various parts of Mexico for several years and the situation was complicated in the spring of 1916 when the forces of the rebel Villa raided the city of Columbus, N. Mex., and were later followed across the border by a United States army led by General Pershing. This army had one serious collision with Mexican forces, and the whole situation was tense.

At this time the propaganda for intervention flooded the press of this country, and this was increased after May, 1917, when Carranza was legally elected President and the new constitution of 1917 became the fundamental law of Mexico.

Carranza governed Mexico as its legally elected Chief Executive from May, 1917, until May, 1920, when he was killed while attempting to flee to Vera Cruz following an uprising started by Governor de la Huerta, of Sonora, Gen. Pablo Gonzales, and several other military chieftains.

Carranza undoubtedly was a man of high ideals, absolute honesty, and unquestioned sincerity. He played a commendable part in the reconstruction of Mexico and did much to place that country upon a more stable basis. The good that he accomplished is conceded even by his enemies. But he made the mistake—sometimes made by our own Chief Executives—of attempting to use his official power and prestige to influence the choice of his successor, and this aroused bitter resentment in Mexico and led to his downfall.

Gen. Alvaro Obregon, Gen. Pablo Gonzales, and Ignacio Bonillas, ambassador at that time to the United States, were the principal candidates for the Presidency to succeed Carranza. Obregon unquestionably was the more popular throughout Mexico, for he had been a loyal aid to Carranza in the struggle against Huerta and afterwards against Villa, and was a hero among the people on that account. Carranza, however, threw all his support to Bonillas. There was a general belief that Obregon would be an overwhelming victor if the election were honestly conducted, but the fear was expressed on all hands that Carranza might exceed his power and use Federal troops to influence the vote.

This fear became a conviction when Carranza ordered Federal troops into the State of Sonora on the eve of the State elections. The governor of Sonora, Adolpho de la Huerta, protested that the presence of troops was unnecessary and likely to precipitate violence, but Carranza persisted in his course and the invasion of Sonora by Federal troops was resisted by

Governor de la Huerta with the State military forces under his control. The outbreak spread rapidly to other parts of Mexico, and Carranza prepared to move the seat of Government from Mexico City to Vera Cruz. The train was intercepted by revolutionary troops and Carranza with an escort fled to the hills. There he encountered a force of "Palaezistas" under Rodolfo Herrero, irregular troops connected with General Palaez, and was murdered.

There can be no defense of this abominable crime; but it never has been charged by any responsible person familiar with the circumstances that Obregon, de la Huerta, Gonzales, or their followers had any connection with his death. Indeed, Obregon was a political fugitive at the time, for Carranza had issued orders for his arrest, and he had fled from Mexico City in disguise. They had the strongest reasons for not desiring his death, knowing this would be used as an argument against the recognition of his successor, and there is every reason to believe they sincerely regretted the affair. On the other hand, there is evidence which goes to show that General Palaez had close connections with some of the American oil companies which desired intervention.

They paid him regularly thousands of dollars monthly for "protection," as they themselves have testified, and with the consent of the United States Department of State. (See p. 285 of Fall report, Dohey testifies.) Certainly these were the only elements who would have profited by his death. It is noteworthy in this respect that the reasons officially given out by our Department of State for failure to recognize Obregon have never, even by implication, accused him of complicity in the death of Carranza. Before the bar of public opinion, both in Mexico and abroad, he stands universally acquitted of this heinous crime.

Governor de la Huerta, of Sonora, was immediately elected provisional President by the Mexican Congress. He pledged himself not to be a candidate for the presidency and to retire when his successor was legally elected. De la Huerta scrupulously obeyed this pledge. The election was held on September 5, 1920, and Obregon received 1,131,751 votes to 47,442 for Robles Dominguez and 2,357 for scattered candidates. The vote was canvassed by the National Chamber of Deputies on October 26. The national chamber declared that Obregon was the legally elected President and specifically acquitted him of participation in the movement that led to the overthrow and assassination of Carranza. Obregon took the oath of office on November 30, 1920, his term to expire on November 30, 1924.

MEXICO HAS STABLE GOVERNMENT.

Alvaro Obregon now has been President of Mexico for 19 months, and it is generally admitted that he has given Mexico the most stable, peaceful, and strictly constitutional government in all its history. There seldom was less disorder even under the "iron rule" of Diaz. Banditry has been ruthlessly suppressed; there is stringent regulation of saloons and gambling; many of the former bandit bands have been peaceably settled on farms; the army has been greatly reduced; education has been extended; courts have been reestablished; its budget is balanced; railroads are being repaired; citizens of the United States and other foreign nationals are returning to the properties which they abandoned during the revolution; and the growing general tranquillity is reflecting itself in increased exports and imports which, after falling to a very low point in 1913 to 1916, now have increased until they have exceeded the best years before the overthrow of Diaz. Despite the lurid stories concerning Mexico which still appear occasionally in certain sections of our "yellow press," I doubt if there is as much prostration of commerce, destruction of property, or danger of life in Mexico to-day as there was in the American Colonies 10 years after our own Revolutionary War, and, if any Senator thinks this statement extreme, I shall respectfully refer him to the pages of McMaster and other historians who have accurately depicted conditions of that period. Indeed, I might even go further and state that I doubt whether, speaking by and at large, there are as many crimes of violence or more danger to property in Mexico to-day than there is in the United States; and certainly a country which permits the barbarous lynchings that lately have disgraced the United States is in no position to criticize our neighboring Republic.

RECENT BANDIT RAIDS.

This statement stands despite the recent widely heralded "kidnapings" in the Tampico oil district. It is a curious coincidence that these well press-agented "outbreaks of banditry" should only occur where the American oil companies are located and where, as a matter of official record, former bandit chiefs have been in their pay. It also is significant that these affairs should be precipitated just as financial arrangements between the Mexican Government and a group of international bankers were on the eve of consummation in New York City.

Most unprejudiced observers will decide that these "kidnapings" have the appearance of being staged according to a prearranged plan at the very moment best calculated to embarrass the Mexican Government in its negotiations looking toward the funding of its debt, and practically all the metropolitan newspapers of the United States have taken precisely this view of the situation.

Indeed, it is doubtful whether some of these so-called "kidnapings" had any actual existence except in the mind of subsidized press agents; but, admitting that bandits, whether in the pay of American oil companies or otherwise, did commit the outrages charged to them, it can not be denied that President Obregon acted with great diligence in immediately dispatching a large force of Federal troops to the district.

In connection with the alleged wholesale kidnaping of Americans by bandit Gorozabe at the Aguada camp of the Cortez Co., near Tampico, the Mexican Embassy is in receipt of the following self-explanatory telegrams exchanged between President Obregon and General Sanchez, commander of the Federal military zone of the oil region:

Gen. GUADALUPE SANCHEZ,
Chiconcillo, Vera Cruz:

Several American newspapers have given prominence to news from Tampico to the effect that 40 Americans have been kidnaped at the Aguada camps of the Cortez Oil Co. by the bandit Gorozabe. Although I am confident that this news is one of the many deceitful means used by the enemies of Mexico to cause difficulties between the two Governments and to create animosities between the two people, please submit official report so as to inform the press.

A. OBREGON,
President of the Republic, Mexico City.

—

Up to this moment no manager of any petroleum company has complained for the kidnaping of Americans. Yesterday afternoon the superintendent of the Cortez Oil Co. visited the headquarters of Juan Casiano, and in reply to my questions in regard to the situation at La Aguada, La Pluma, and Rosilla camps, he stated that bandits had been seen in the neighborhood of those places. Immediately after I call General Portas and instructed him to proceed to those camps or to any place till the bandits be found. I regret, Mr. President, that persons living at a great distance from here are more able to secure news about this region than I, residing at the place where these occurrences are said to have happened.

Gen. GUADALUPE SANCHEZ.

—

PRESIDENT OF THE REPUBLIC,
Mexico City.

I have the honor to report that Gen. Panuncio Martinez has just arrived in an automobile from Ozuluama. General Martinez made the trip accompanied only by two officers and three privates, having gone through La Aguada, La Pluma, and Rosilla, places where they report nothing has occurred.

Gen. GUADALUPE SANCHEZ.

It is clear from the foregoing that up to the present time the reported kidnapping has not taken place, the story having been obviously framed for public consumption by certain American and Mexican interests whose activities have already been investigated by the Mexican authorities.

In view of the admitted facts that American oil interests have paid stipulated sums to bandits operating in the Tampico region and that Thomas F. Lee, secretary of the National Association for the Protection of American Rights in Mexico, endeavored to foment a revolution in Mexico only a year ago, it is safe to assume that President Obregon was correct when he characterized the recent Tampico "kidnappings" as the inspiration "of influences of work to disturb public opinion in the United States and to create controversies between both peoples for no other reason than the satisfaction of personal egotism."

Two Mexican citizens were murdered in the recent mine massacre at Herron, Ill., and five more were illegally deported from their residences during a mining strike in the State of Utah, yet the Mexican Government has not seen fit to send us belligerent messages or to order battleships dispatched to our ports. Nor would we so treat Mexico if her military establishment were on a par with our own. I am not impugning our national courage, but the United States Government would not dare, in my humble opinion, to negotiate with any power of equal magnitude in the same badgering, bullying manner that habitually characterizes our "diplomatic communications to Mexico."

MEXICAN COURTS.

Mexico is making every honest effort possible to restore stability after 10 years of internal struggle, to educate her people, to promote agriculture, industry, and commerce, and to reestablish legal, orderly, processes of adjudication through the courts.

Her judicial system is patterned after our own and consists of 11 supreme judges, 37 numerary district judges, 7 supernumerary district judges, and 9 circuit judges. In addition

to this there are hundreds of state and municipal judges. Her processes of law are fair and orderly, and it no longer can be said that any resident, whether a native or an alien, can be deprived of his property, his liberty, or life without the same rights accorded to an American citizen in the same situation

Mexico is one of the few nations of the world which has a balanced budget and does not issue large quantities of paper money. Mexico employs only metal currency, and during the last fiscal year the actual receipts exceeded the actual expenditures by some $3,000,000. Moreover, Mexico spends a far less proportion of her national revenue for military purposes than does the United States, or practically any of the great powers of Europe, and this, in the face of the fact that our attitude toward her has been equivocal and threatening. Not only that, but Mexico also spends a larger proportion of her national income for educational purposes than does the United States, and it is the settled policy of President Obregon and his cabinet to reduce their military establishment and to expend increasingly large sums of money for education, agricultural development, public works, and the improvement of communications.

MEXICAN SCHOOLS.

The expenditure of the Government of Mexico upon the schools of that country for 1922 will be $49,826,716, or approximately five times as much as was expended in 1921. This shows an admirable tendency and one which we might profitably pattern after.

These figures are taken from the report just issued by the secretary of public education, and I cite them as being indicative of the purpose of the present Mexican Government to extend its educational system until it will cover the whole Republic so thoroughly and so well that the children of the humblest peons will have the same opportunity for the development of their intellectual capacities as those of the rich.

It will surprise those who depend upon the "yellow press" for their "facts" about Mexico to learn that the schools in Mexico at present in operation and supported by the Mexican Government number 8,388. Of these 3,137 are for boys, 2,315 for girls, and 2,936 are coeducational. In addition to these there are 1,327 sectarian and private schools in the Republic, of which 399 are for boys, 313 for girls, and 615 coeducational. There also are thousands of private schools, for the Mexican constitution wisely provides that wherever more than 300 peons are employed on any ranch or rural factory the owner must set up a school and pay for its maintenance.

Students who attend the regular Federal schools number 711,592. Of this number 369,864 are boys and 341,728 girls. Students in private institutions number 108,183, of which 55,081 are boys and 53,102 girls. The total number attending schools, exclusive of the education supplied on farms and in rural factories, is 819,775, and this remarkable record is the best possible testimonial to the good intentions and zeal to improve the welfare of its people which actuates the Mexican Government.

MEXICO TO PAY HER DEBTS.

President Obregon repeatedly has announced the determination of his Government to pay all just foreign claims, and pursuant to this policy issued a formal decree on July 12, 1921, directing all Mexican diplomatic representatives in the United States and other countries to call to the attention of the various governments where they were stationed that the Republic of Mexico would enter into arrangements with those governments to establish a permanent international claims commission to study and to adjust the claims of any foreigners who suffered any damage by reason of the Mexican revolution.

President Obregon also has given repeated assurances, official and otherwise, that all legal international obligations will be met and absolute protection and every facility will be guaranteed foreign capital seeking investment in Mexico and that the lives of all foreign nationals will be secure.

SECRETARY COLBY GIVES FACTS.

So long ago as October 29, 1920, Mr. Bainbridge Colby, Secretary of State under the Wilson administration, made a public statement concerning his negotiations with Señor Roberto P. Pesqueira, special representative of Mexico to the United States, in which he said:

The discussions which have for some time been in progress with Mr. Pesqueira, representing the Mexican Government, give promise of a speedy and happy outcome. The letter which he has addressed to me and which I am giving out for publication is a very gratifying and reassuring statement of the attitude and purposes of the new Government of Mexico. Mr. Pesqueira came to Washington bearing the fullest powers to speak and act in behalf of his Government, and has exhibited throughout the course of the discussions a complete realization of Mexico's international obligations, just as his letter reflects clearly the firm resolve of his Government to discharge them.

I think I am warranted in saying that the Mexican question will soon cease to be a question at all, inasmuch as it is about to be answered, not only as it concerns the United States but indeed the whole world as well.

The new Government of Mexico has given indication of stability, sincerity, and a creditable sensitiveness to its duties and their just performance. While the full protection of valid American interests, which is clearly enjoined upon us as a duty, has at all times been a matter of primary concern to us, I may say that on the part of this country there has been no attempt to prescribe rigid and definite terms upon which a recognition of the Mexican Government would be definitely conditioned.

This we have deemed wholly unnecessary and the disavowal of the Mexican representative of any policy of repudiation of obligations or confiscation of property or vested rights, either through retroactive legislation or future regulations, has the added value of being spontaneous and unprompted.

There are certain pending matters in controversy between the two Governments and our respective nationals, but these will be determined either by agreement or by the process of arbitration, to which Mexico is prepared to yield complete assent.

The letter of Mr. Pesqueira offers a basis upon which the preliminaries to recognition can confidently proceed, and I am hopeful that within a short time the sympathetic friendship and patient forbearance which President Wilson has manifested toward the Mexican people during the long period of their internal disorders will be fully vindicated. The desire reflected in Mr. Pesqueira's letter for the confidence and amiable regard of the United States is fully reciprocated and I am happy to believe that the last cloud upon the ancient friendship of the two peoples is soon to disappear.

This extremely fair-spirited and optimistic letter by the then Secretary of State gave justifiable grounds for the hope that the Wilson administration intended to recognize the Obregon government, but for some reason it failed to materialize. Twenty months have elapsed since that statement was made. The Wilson administration left office without taking further action, and the Harding administration, although in office now for more than 15 months, has failed to recognize the Government of Mexico.

WHY IS MEXICO NOT RECOGNIZED?

Why has the Obregon government not been recognized by either the Wilson or the Harding administrations? In view of friendly, stable, constitutional rule which Mexico now has had for more than two years under the provisional presidency of De la Huerta and the legal presidency of Obregon, this question assumes a growing pertinency. It is all the more a matter of vital public importance because recognition undoubtedly would swell our already important commerce with Mexico. The Wilson administration has passed out of public life and is now no longer answerable for its failure to follow up the promises of Secretary Colby; but the Harding administration is seeking congressional support in the coming elections on the basis of its record, and the question of the recognition of Mexico can not longer be avoided.

The only statement of policy which we have on this point is contained in a public statement given to the press by Secretary of State Hughes on June 7, 1921. That statement follows:

The fundamental question which confronts the Government of the United States in considering its relations with Mexico is the safeguarding of property rights against confiscation. Mexico is free to adopt any policy which she pleases with respect to her public lands, but she is not free to destroy without compensation valid titles which have been obtained by American citizens under Mexican laws. A confiscatory policy strikes not only at the interests of particular individuals but at the foundations of international intercourse, for it is only on the basis of the security of property validly possessed under the laws existing at the time of its acquisition that commercial transactions between the peoples of two countries and the conduct of activities in helpful cooperation are possible.

This question should not be confused with any matter of personalities or of the recognition of any particular administration. Whenever Mexico is ready to give assurances that she will perform her fundamental obligation in the protection both of persons and the rights of property validly acquired there will be no obstacles to the most advantageous relations between the two peoples.

This question is vital because of the provisions inserted in the Mexican constitution promulgated in 1917. If these provisions are to be put into effect retroactively, the properties of American citizens will be confiscated on a great scale. This would constitute an international wrong of the gravest character, and this Government could not submit to its accomplishment. If it be said that this wrong is not intended and the constitution of Mexico will not be construed to permit or enforced so as to effect confiscation, then it is important that this should be made clear by guaranties in proper form. The provisions of the constitution and the executive decrees which have been formulated with confiscatory purposes make it obviously necessary that the purposes of Mexico should be definitely set forth.

Accordingly, this Government has proposed a treaty of amity and commerce with Mexico, in which Mexico will agree to safeguard the rights of property which attached before the constitution of 1917 was promulgated. The question, it will be observed, is not one of a particular administration, but of the agreement of the nation in proper form, which has become necessary as an international matter because of the provisions of its domestic legislation. If Mexico does not contemplate a confiscatory policy, the Government of the United States can conceive of no possible objection to the treaty.

The proposed treaty also contains the conventional stipulations as to commerce and reciprocal rights in both countries. It also provides for the conclusion of a convention for the settlement of claims for losses of life and property, which, of course, means the prompt establishment of a suitable claims commission, in which both countries would be represented, in order to effect a just settlement. There is also a provision for the just settlement of boundary matters.

The question of recognition is a subordinate one, but there will be no difficulty as to this, for if General Obregon is ready to negotiate a proper treaty it is drawn so as to be negotiated with him, and the making of the treaty in proper form will accomplish the recognition of the Government that makes it. In short, when it appears that there is

a Government in Mexico willing to bind itself to the discharge of primary international obligations, concurrently with that act its recognition will take place. This Government desires immediate and cordial relations of mutual helpfulness, and simply wishes that the basis of international intercourse should be properly maintained.

Accordingly, on the 27th day of May last, Mr. Summerlin, American chargé d'affaires at Mexico City, presented to General Obregon a proposed treaty covering the matters to which reference has been made. The matter is now in the course of negotiations and it is to be hoped that when the nature of the precise question is fully appreciated the obstacles which have stood in the way of a satisfactory settlement will disappear.

This statement by Secretary Hughes, made public more than a year ago, is the only official explanation of our policy toward Mexico that I have been able to obtain.

It must be perfectly plain to anyone who understands the fundamental principles of international law that the procedure outlined by Secretary Hughes is an unwarranted and unprecedented invasion of the sovereign rights of Mexico. Treaties should and usually are, except after a military conquest, consummated between friendly powers on a basis of equality, but here we have the spectacle of a great power presenting a treaty whose provisions are already predetermined to another power and openly threatening to withhold political recognition unless that treaty is accepted. We would not dare to submit such a high-handed proposal to a power of equal strength, and it is grossly unfair and unworthy of our best American traditions to affront Mexico in such a manner.

WOULD AMERICA DO IT?

Moreover, the tentative treaty of "amity and commerce" specifically asks for guaranties against any retroactive application of article 27 of the Mexican constitution. I do not profess to be a specialist on international law, but nevertheless I will venture the assertion that this is the first time in history that one nation ever asked the executive heads of another to bind themselves by treaty to a preconceived interpretation of the fundamental law of their land. Suppose the situation were reversed and some foreign power should demand of the United States that its Department of State negotiate, its President sign, and its Senate ratify a treaty binding the Supreme Court in advance to a definite interpretation of certain legislation. What a public protest would go forth! How we would clamor over this unparalleled insult! Yet this is exactly, as I understand, the proposal we have submitted to Mexico. Is it any wonder that the Chief Executive of that neighboring Republic declines to purchase recognition at a price so galling to any proud-spirited people?

President Obregon has, however, repeatedly stated that he did not believe article 27 of the Mexican constitution of 1917 was intended to apply retroactively. Indeed, he pointed to article 14 of the same constitution, which in brief and pointed terms declared that no law of a retroactive character shall be passed under that constitution. Beyond that he could not go. He is the Chief Executive of that Republic, and has no more power to limit or define the powers of its supreme court than has the President of the United States. Now, however, most fortunately, this particular matter is no longer subject to a controversy.

THE SUPREME COURT DECIDES.

The Mexican Supreme Court has acted and in no less than five separate opinions has decided that the provisions of article 27 of the Mexican constitution are not retroactive. The guaranties which Secretary Hughes insisted upon in regard to this question are supererogatory, for this question has been settled forever, as it is the unwritten but settled practice of the Mexican Supreme Court to establish a precedent which it is impossible to reverse.

It is no longer true, in the language of Mr. Hughes himself, that the provisions of the constitution "make it obviously necessary that the purposes of Mexico should be definitely set forth," for this desired end has already been consummated.

Secretary Hughes also stipulated a convention for the settlement of claims for losses of life and property by means of the establishment of a "suitable claims commission." What possible purpose can be served for longer insistence upon this point in view of the fact that on July 12, 1921, President Obregon formally issued an invitation to the United States and all foreign Governments to adjust such claims through the medium of a permanent international arbitration commission? Does not this offer meet fairly the issue Mr. Hughes has raised? One of the first acts of Carranza, in the early days of the revolution, was to issue a decree providing for an international arbitration commission to settle revolutionary damage claims.

Mr. President, there seems even less justification for the other demand raised by Mr. Hughes, when he stated that in his tentative treaty there was contained "a provision for a just settlement of boundary matters." What is this "just settlement"? Surely, Mr. Hughes knows that there already exists in the treaty of Guadalupe Hidalgo, consummated between the United States and Mexico on February 2, 1848, a clause which provides for the settlement of such disputes by the arbitration of a friendly nation or the appointment of a joint commission. There is in fact, and has been for years, such a commission which has been considering the changes in boundary caused by the change of the course of the Rio Grande at El Paso. Article 21 of the treaty of peace and amity concluded between the United States and Mexico on February 2, 1848, is as follows:

If unhappily any disagreement should hereafter arise between the Governments of the two Republics, whether with respect to the interpretation of any stipulation in this treaty, or with respect to any other particle concerning the political or commercial relations of the two nations, the said Governments, in the name of these nations, do promise to each other that they will endeavor, in the most sincere and earnest manner, to settle the differences so arising and to preserve the state of peace and friendship in which the two countries are now placing themselves, using for this end mutual representations and pacific negotiations. And if by these means they should not be enabled to come to an agreement a resort on this account shall not be had to reprisals, aggression, or hostility of any kind by the one Republic against the other until the Government of that which deems itself aggrieved shall have maturely considered, in the spirit of peace and good neighborship, whether it would not be better that such difference should be settled by the arbitrations of commissioners appointed on each side or by that of a friendly nation. And should such course be proposed by either party, it shall be acceded to by the other, unless deemed by it altogether incompatible with the nature of the difference or circumstances of the case.

Is not the course of our Government, in view of this unrevoked treaty, explicitly pledged? Are we as a Nation, after spending billions of dollars and tens of thousands of lives to uphold the principle that treaties between strong and weak nations are to be regarded as inviolate, to proceed ourselves to make a "scrap of paper" out of this solemn covenant? I do not think the enlightened public opinion of the United States will sanction such a course, and in dignity and honor we can do no less than to abandon these unworthy demands which we have attempted to impose upon our weaker neighbor.

RECOGNITION A SUBORDINATE ONE—WHY?

What good grounds longer exist for withholding recognition to Mexico? Has not every objection that Secretary Hughes raised in his public statement of June 7, 1921, already been met? Can longer delay be explained except on the ground that we are using unfair advantage and taking advantage of circumstances to compel Mexico to sign a distasteful treaty?

Secretary Hughes himself admits as much. He states:

The question of recognition is a subordinate one—

But, he adds, with unmistakable meaning—

that if General Obregon is ready to negotiate a proper treaty, it is drawn so as to be negotiated with him, and the making of the treaty in proper form will accomplish the recognition of the government that makes it.

In other words, although it is impossible to state the case much more clearly than has Mr. Hughes, there will be no recognition unless a "proper treaty," which is already drawn, shall be agreed to by President Obregon. Evidently we are already using recognition as bait with which to fish for commercial advantages in the troubled waters of Latin America.

It now becomes highly pertinent to ask what are the provisions of this "treaty of amity and commerce" which is being "negotiated" in a manner that belies its ostensibly amicable purpose? What specific agreements does it contain? Why does Mr. Hughes withhold all knowledge of this vital matter not only from the people but from Senators and Representatives of the United States, as he says, "in deference to the public interest"?

What legitimate "public interest" can be served by shrouding in secrecy the provisions of this proposed covenant which so closely concerns the relations of two great nations and the welfare of 110,000,000 American citizens on this side of the Rio Grande River and 16,000,000 Mexican citizens lying to the south? Has the United States of America committed itself to the same sort of secret diplomacy that wrecked Europe in 1914? Are the American people no longer to be trusted with matters which affect both their peace and prosperity? If not, then why are not the provisions of this "treaty of amity and commerce" which we seek to force upon a friendly neighboring nation dragged out into the light of day? I ask again, What honest, legitimate "public interest" forbids?

ALSBERG'S CHARGES.

But if Mr. Hughes has been as secretive in this matter as a European diplomat of the old school, others evidently have been more candid, for Mr. Henry G. Alsberg, a reputable newspaper man, declares in a signed article appearing in the New York Nation on May 10, 1922, that he "was informed by persons of the highest authority" in Mexico City that the United States Department of State during Mr. Hughes's incumbency—

has sent a series of notes to the Mexican Government, which, if acceded to, would have deprived Mexico of her standing as an independent nation.

I was told in all earnestness—

Writes Mr. Alsberg—

that our State Department had demanded as its price of recognition that Mexico sign a treaty which would have reduced her to the status of a protectorate. This treaty, said my informant, was almost a replica of that accepted by Guatemala before recognition. (I will have some comment to make upon our relations with Guatemala later.) My informant said that his Government was willing to make almost any concession to the United States except this, to sign a treaty surrendering national sovereignty in exchange for recognition. Some of the demands made by the State Department notes and proposals sent to Obregon since Mr. Harding's inauguration I was told were:

1. Supervision in some form of elections, or at any rate the assurance that so-called radicals, among whom were included some of the most prominent members of the party now in power, should not be candidates for election.

2. A demand that all radical elements, including these same individuals, leave Mexico.

3. An exception in favor of American Protestant churches in Mexico permitting them to hold property and conduct schools. The fundamental laws of the country forbid any church to hold lands or conduct sectarian schools.

4. Recognition of all concessions and land grants given under Diaz, no matter how acquired.

5. Special rights to American capitalists over capitalists of other nationalities.

6. A demand that the old minority stockholders in the Mexican railroads be given control of them, though the Mexican Government holds 51 per cent of the stock.

HUGHES'S REPLY.

It is only fair to state at this point that Mr. Hughes has issued an unqualified denial of these charges in a letter written to the editor of the Nation, following the publication of Mr. Alsberg's article. Mr. Hughes couched his denial in the following language:

I stated to the press correspondents, and reiterate now, that no such demands have been made, and that the statement, on whatever information, that such demands have been made is utterly false. It is true, of course, that as the department acts for American citizens we have asked protection of the valid rights of American citizens which had been acquired in accordance with Mexican laws, but this does not preclude, and rather anticipates, similar protection of citizens of other countries.

THE NATION'S REJOINDER.

In reply to this the Nation declared that it stood upon Mr. Alsberg's demand, and in turn it submitted to Secretary Hughes the following list of questions:

1. Did you or did you not propose as a condition of recognition of Mexico a modification, in favor of Americans, of the Mexican law according to the terms of which all foreigners are forbidden to acquire property in a certain restricted zone along the Mexican coasts and international boundaries?

2. Did you or did you not at any time propose as a condition of recognition that the Mexican law regulating the activities of the clergy of all denominations in Mexico be modified in favor of the American clergy?

3. Did you or did you not ever intimate in any way to the Mexican Government that the United States Government disapproved of the political tendencies of certain personalities in the Mexican Government?

4. Will you publish in full the proposed treaty offered Obregon as a condition of recognition last spring in the form then offered?

5. Will you publish in full all the notes and negotiations, official and unofficial, which led up to the formulation of this promised treaty?

6. Will you also publish in full the "many" notes which the Washington dispatches in to-day's newspapers refer to as having been sent following the presentation of this proposed treaty of commerce and amity and up to date?

7. Will you publish all your negotiations with France and England, if any, in which the question of recognition of Mexico was discussed?

8. Will you publish in full all the negotiations and the agreement, if any, which preceded your recognition of the new Orellana in Guatemala?

9. Did you or did you not ever propose to the Mexican Government as a condition of recognition an agreement similar to that, if any, which was entered into with the Guatemalan Government above referred to?

10. Will you publish the names of your representatives, official, semiofficial, and unofficial, in your negotiations with Mexico, together with the instructions given by you to them and their reports?

It was these questions that Secretary Hughes refused point blank to answer "in deference to public interest," to which he added, "in view of my official responsibility I must be the judge."

It is not my intention to question the veracity of either Mr. Alsberg or Secretary Hughes, but when they diametrically differ on such an important matter, in order to ascertain the truth it becomes necessary to examine any evidence which may shed illumination upon the controversy. Some pertinent evidence exists.

WHAT WAS DEMANDED.

An Associated Press dispatch of May 22, 1921, sent from Washington, D. C., and widely published in hundreds of newspapers all over the United States, gave the following version of the demands which our Government presented to President Obregon of Mexico:

A definite statement outlining the conditions upon which the United States would extend recognition to the Obregon government of Mexico has been prepared for submission to President Obregon. This statement, in the form of a memorandum, it was said to-night, will be delivered to President Obregon by George T. Summerlin, counselor of the American Embassy at Mexico City, who is expected to leave Mexico this week.

Among the conditions set forth are:

"Elimination of those provisions of article 27 of the Mexican constitution relating to the nationalization of the subsoil rights in so far as they affect the tenure of land to which title was obtained prior to the adoption of the constitution in 1917.

"Elimination of the provisions which deprive Americans of the right of diplomatic appeal in cases where property is acquired.

"Modification of the provisions which prevent Americans acquiring and owning property within a certain zone along the Mexican coasts and international boundaries.

"Assurance that article 33 of the constitution providing for the expulsion of 'pernicious foreigners' will not be applied to Americans without the filing of charges and the opportunity of fair trial.

"Modification of the provisions governing religious worship in such manner that American clergy shall have the right to exercise the functions usual in their denominations.

"It is also suggested that the two Governments agree to the creation of a mixed court for the adjudication of claims."

The demands mentioned by the Associated Press report in three important particulars are practically the same as those which Mr. Alsberg maintains were submitted to the Mexican Government, namely, an exception in favor of American Protestant churches holding land; the recognition of all concessions granted by Diaz; and the special rights to American capitalists.

Those familiar with the practice of the Associated Press in sending out dispatches on important matters of state know that it is not in the habit of reporting unverified rumors or mere speculations. The reporter usually interviews some high official of the Government and in most cases the greatest care is exercised to insure entire accuracy. Although the Associated Press report in question was widely published all over the United States, I can not find its accuracy was questioned at the time or that any officials of the Department of State denied the substance of this dispatch. This is curious, to say the least, in view of Mr. Hughes's repudiation of this point one year later.

Moreover, the language of Secretary Hughes's statement to the press, given out on June 7, 1921, in one most vital particular lends itself to only one construction, and that construction corroborates the most offensive demand which our Government is alleged to have presented to Mexico.

Accordingly—

Said Mr. Hughes—

this Government has proposed a treaty of amity and commerce with Mexico, in which Mexico will agree to safeguard the rights of property which attached before the constitution of 1917 was promulgated.

This particular sentence certainly conveys the impression with unmistakable clarity that Mexico was asked to validate all titles held by Americans to property acquired previously to 1917, regardless of whether these were acquired legally or whether the conditions attached thereto were carried out. I can place no other interpretation on this, for nothing is said about "valid rights of property" or "the rights of property legally obtained." If Mr. Hughes did not intend to convey the impression that Mexico was asked to validate all titles obtained prior to 1917, regardless of the questionable manner in which many of these concessions were obtained, he was very unfortunate in his phraseology.

EXPULSION OF FOREIGNERS.

With regard to that provision of the Mexican constitution concerning the summary expulsion of undesirable foreigners it has been sought to persuade the public that this was peculiar to the so-called Carranza fundamental law. But the constitution of 1857 adopted under the Juarez government contains identically the same provision, and it had been repeatedly enforced without protest. The 1857 constitution says:

In all cases the government has the right to expel undesirable foreigners.

The 1917 constitution says:

The executive shall have the exclusive right to expel from the Republic forthwith, and without judicial powers, any foreigner whose presence he may deem inexpedient.

This is the demand, outside of the general invasion of its sovereign rights, which is most offensive to Mexico. The Mexican Government maintains, and with justice, that many of the concessions granted by Diaz were illegal; that some were marked by fraud; and that in many cases the conditions were not complied with. They intend to examine these concessions, particularly the lands granted to colonization companies which did not carry out their agreements, and cancel those which obviously are fraudulent or were vitiated by nonperformance of contract. This also applies to extensive areas of oil lands held by American companies, but the titles to which they have persistently refused to record as required by law, thereby casting suspicion upon the bona fides of their titles.

MEXICO FOLLOWS UNITED STATES POLICY.

The right of the Mexican Government to proceed in this manner can not be questioned. Our own Government in numerous cases has brought proceedings against corporations and individuals which were granted Government lands under conditions which they failed to meet. Our courts have repeatedly sustained these cancellations. Millions of acres of the best land in Mexico are involved in grants of questionable validity, and their whole intelligent back-to-the-land program would fail if they were compelled to recognize all the Diaz grants, regardless of their legality. Not only land but title to oil deposits whose value runs into the hundreds of millions of dollars are involved in this matter.

It is the crux of the whole situation, and we can not rightfully or reasonably expect that Mexico surrender her sovereign powers of domestic regulation by abandoning all hope of recovering natural resources fraudulently granted or claimed. Billions of dollars are at stake in this matter, and I fear that this affords the clue to the secret diplomacy and unprecedented stubbornness that has marked our negotiations with Mexico.

THE FALL REPORT.

There is evidence on this point so convincing that it seems to me it outweighs the denials of any individual. This evidence is contained partly in the language of the Fall report on Mexico, made May 28, 1920, to a subcommittee of the Senate, the fact that Senator Fall later was appointed Secretary of the Interior by President Harding thus giving official sanction to his recommendations.

The recommendations of the Fall report to which I have reference follows:

Article 130 of the constitution of 1917 shall not apply to American missionaries, preachers, ministers, teachers, or American schools, nor to American periodicals, but that American missionaries, ministers, and teachers shall be allowed freely to enter, pass through, and reside in Mexico, there to freely reside, preach, teach, and write, and hold property and conduct schools without interference by the authorities so long as such ministers, teachers, or missionaries do not participate in Mexican politics or revolutions.

That article 3 shall not apply to any American teaching or conducting primary schools.

That none of the provisions of article 27 of said constitution with reference to limitations upon rights of property heretofore acquired by Americans, or which may hereafter be acquired, shall apply to Americans except where the limitation is written in the deed, lease, or other instrument of title, and particularly—

"The provision of said article to the effect that the subsoil products other than of metalliferous minerals shall be the property of the National Government of Mexico, to be disposed of by decree or by law, shall not apply to the property of American citizens purchasing from other individuals or from State, national, or municipal authorities of Mexico unless the limitations or reservations with reference to such subsoil products shall be written in the original deed or other instrument of conveyance transferring the surface of the property to such American purchaser.

"That the prohibition against the ownership of property in lands, waters, or their appurtenances, or against the concessions for the development of mines, waters, or mineral fuels in the Republic to foreigners, shall not apply to American citizens.

"That subsection 2 of said article 27 shall not apply to church properties or episcopal residences, rectories, seminaries, orphan asylums, or collegiate establishments of religious institutions or schools held or owned by Americans.

"That the subdivisions of subsection 7, article 27, described as a, b, c, d, and e, shall not apply to the property of any Americans now owned under whatsoever title or which may hereafter be acquired, except where distinct reservations and limitations covering such provisions are affirmatively set out in the documents or evidence of title or transfer of such property.

"That article 33 of said constitution providing that 'The Executive shall have the exclusive right to expel from the Republic forthwith and without judicial process any foreigner whose presence he may deem inexpedient,' shall not apply to American citizens who shall, when they so demand, have access to their consulate or consular agent or diplomatic representative and have the right to avail themselves of the assistance of such officials and until after our judicial proceedings upon application of such American.

"That such agreement should provide for the immediate appointment of a claims commission to pass on all claims for the damage to Americans in Mexico or upon its boundaries, the commission to be composed of American citizens appointed by the President of the United States and a like number of Mexican citizens to be appointed as that Government may in said agreement provide, and that the decision of this commission shall be binding upon the respective Governments and shall immediately be carried out by the payment of the damages adjudged.

"That a like commission should be in such agreement provided for the settlement of disputes concerning the international boundary and waters of the Rio Grande and the Colorado River and particularly the Chamizal dispute and the Colorado River irrigation complication, with power to such commission to render a decision for the payment of money and transfer of property, if any, necessary in the final settlement of such dispute.

"We have the legal right and it is our duty to refuse to recognize any government in Mexico which will not agree by way of a treaty to the foregoing conditions of recognition."

Can it be denied that the recommendations of the Fall report are virtually the same as those Secretary Hughes is alleged to have presented to Mexico? And does any sane person believe that President Harding was not familiar with and did not thus tacitly indorse the recommendations of Mr. Fall when he selected him for a high Cabinet position? Does this not at least strongly imply that the policy urged by the Fall report thus has become the official policy of our Government?

It is also on record that Mr. Fall made public a letter which he personally prepared, which stated in the following unequivocal language that "So long as I have anything to do with the Mexican question no government in Mexico will be recognized, with my consent, which government does not first enter into a written agreement practically along the lines suggested," namely, the recommendations of the Fall report.

A REMARKABLE LETTER.

If this does not make the attitude of our Government sufficiently clear and give at least a strong clue as to the motives which have actuated our executive officials, another remarkable letter written by Mr. Fall after he became Secretary of the Interior and introduced by Senator LODGE into the CONGRESSIONAL RECORD of April 12, 1921, will furnish additional illumination.

The pertinent portions of Secretary Fall's letter, which was dated March 21, 1921, follow:

Allow me to call your attention here to a most significant matter which has recently occurred, i. e.:

The British Government and the French Government have each repeatedly protested to the Mexican Government from time to time along exactly similar lines to the protests made by this Government concerning the confiscatory decrees of the Mexican Government under the constitution of 1917 proclaimed by Carranza and being followed by Obregon.

These protests yet stand as the official last word of Great Britain and France, as exactly similar protests yet stand as our last word to that country.

The Mexican Eagle Co. ("Aguila") has been a member of the American Association of Oil Companies and has for years cooperated with this association in making protests against confiscatory decrees in Mexico, both from the British Government and the American Government.

Recently, within the last three months, the "Aguila" Co. finally notified the American association that it proposed to pursue its own lines and make its own terms with the Mexican Government, accepting the Mexican Government's demands with reference to oil-drilling permits, etc.

This came as a shock out of the clear sky, and I am informed that after certain protests made by the association and by the American companies the Mexican Eagle ("Aguila") Co. has not, in fact, obtained titles under this confiscatory decree upon properties belonging to others, but yet has not countermanded instructions to its agents in Mexico to obtain such titles from time to time.

Nevertheless the British protest still stands, and Great Britain is ostensibly acting with the United States officially in identical official protests against the constitution of 1917 and decrees under it.

The British "Aguila Oil Co.," owned, as a matter of fact, by Great Britain herself, is, however, yielding to such decrees and obtaining advantage of American companies, who are faithfully abiding by the advice and instructions of the American Government in the matter.

British oil interests are giving every assurance to Obregon and Mexican officials of their support and friendly cooperations, seeking advantage against or over American companies, while the British Government, owning this oil company, is ostensibly standing by the United States Government in its action.

EXPLANATIONS IN ORDER.

This astonishing letter requires little comment. It complains because British-owned oil companies are "accepting the Mexican Government's demands with reference to oil-drilling permits" and thus "obtaining an advantage of American companies who are faithfully abiding by the advice and instructions—presumably not to obey the laws—of the American Government in this matter." It plainly reveals a close understanding between the American oil companies in Mexico and the United States Department of State to disobey the laws of Mexico in order that Mexico may be forced to revoke domestic legislation and be compelled to sign a treaty distasteful to its legally elected officials.

It seems to me that the "public interest," which Secretary Hughes is so deferential to, now clearly demands a full and frank statement of the terms of the proposed treaty with Mexico. The people of the United States and Congress are entitled to this knowledge. We can not afford to have Mexico, all of Latin America, and the world believe that there is an unholy alliance between our Department of State and certain sinister oil interests which not only have exploited Mexico's natural resources but have repeatedly interfered in her governmental affairs.

REVOLUTIONARY PLOTS.

Comparatively recently there was exposed in the press of the United States authentic evidence whereby it appeared Thomas F. Lee, secretary of the National Association for the Protection of American Rights in Mexico, an association financed largely by the oil interests and whose evident purpose is to force American intervention in Mexico, sought to finance Gen. Pablo Gonzales in a revolutionary attempt to overthrow the Obregon government.

Letters and telegrams which have never been denied show that a group of American financiers offered to advance arms and money in this revolutionary effort. The facts were never denied. Men served sentences in Federal penitentiaries during the war for similar offenses against other countries, but our

authorities have never proceeded against Mr. Lee and his associates, although they flagrantly violated our neutrality laws.

Even more recently another revolutionary plot was consummated in this country by Felix Diaz, who, in pursuance of his plan, spent some time in New York and afterwards in the city of Washington, as also in New Orleans; but although his purposes were blazoned forth on the front pages of all the papers in the land, so far as I am able to ascertain, his illegal attempts to set afoot an armed expedition against a friendly government have not been interfered with in the slightest degree by the officers of our Government whose duty it is to preserve neutrality and peace between nations.

Every day we withhold recognition of Mexico increases the difficulties of its Government and encourages renewals of these revolutionary attempts. We owe it to Mexico, we owe it to the world, and most of all we owe it to ourselves to end this unfair and anomalous condition by recognizing a neighboring Government which is doing its utmost to restore peace and prosperity to Mexico.

MEXICO AND GUATEMALA.

In this connection I can not refrain from comparing the prompt recognition of the Guatemalan Government only recently with our dilatory dealings with Mexico. President Herrera, of Guatemala, was deposed on December 5, 1921, by a military coup engineered by General Orellana. The coup was accompanied by wholesale arrests and numerous assassinations. So far as can be determined, on the other hand, the government of Herrera was considered the most peaceful and prosperous ever accorded Guatemala. Orellana held an election on February 15, 1922, and although his candidacy was expressly prohibited by the Guatemalan constitution, soldiers were posted at the polls and more than 500 of the leaders of the opposing political party were placed in jail. He was declared elected, however, and on April 15 he was recognized by the United States, notwithstanding the fact that the gravest suspicions of illegality attach to the entire proceeding.

It is a general report—and I have not seen it denied by the State Department—that as a precedent of his recognition we signed a trade treaty with Guatemala which gives citizens of the United States preferential trade rights. Following the recognition the Wall Street banking firm of Blair & Co. attempted to fasten a $15,000,000 loan upon the Guatemalan Government, the terms of which were so unfair and onerous that, although agreed to by the President and his cabinet, it was almost unanimously rejected by the Guatemalan National Assembly.

It seems strange indeed that the revolutionary government of Orellana in Guatemala should be recognized with such suspicious speed, considering all the circumstances, while Obregon has waited 19 months for recognition.

RECOGNITION GRANTED WHEN?

Our previous refusals to recognize foreign governments usually have been based upon the conditions surrounding their origin. It was the illegality and violence attending the overthrow of Madero by General Huerta that caused President Wilson to withhold recognition in that case. At other times in the past we have declined to sanction the methods employed by certain Latin-American governments in obtaining power. The Executive doubtless has both a moral and legal right to refuse recognition on these grounds.

But we have no right, either legal or moral, to withhold recognition from a Government whose legal claim is unclouded and which has maintained itself for more than two years, admitted all proper international obligations, offered to arbitrate all claims as provided by existing treaties and the precedents of international law, and succeeded in restoring law and order to a country just emerged from the throes of a 10-year revolutionary struggle.

The people of the United States demand such recognition. Many chambers of commerce and commercial organizations in all parts of the United States, and particularly those closest to the Mexican border, have passed resolutions urging recognition. Hundreds of reputable and responsible business men who have been in Mexico and seen conditions with their own eyes advocate this step. Fourteen State legislatures have passed resolutions calling upon the Department of State and the President to recognize Mexico. I venture the assertion that an overwhelming majority of the Members of both Houses of Congress, irrespective of party affiliation, favor this step; the greatest banking houses of the Nation already have shown their complete confidence in the Government of Mexico by completing arrangements for the funding of its national debt, and every legitimate interest in the United States would be benefited by the immediate establishment of friendly relations.

Mexico is one of our best customers. Last year she purchased $267,200,366 worth of products from the United States and in return sold us commodities, mostly in the form of raw materials, valued at $154,993,154. This is but a small percentage of the trade that could be developed if we recognized the Government of Mexico and established friendly relations which would encourage greater development.

MEXICO THE TREASURE HOUSE.

Mexico, despite centuries of systematic exploitation, is still the treasure chest of the world. No other country has equal deposits of mineral, and still the surface of her soil is comparatively unscratched. Her oil deposits seem almost limitless, and her wise policy of having the State conserve title to the petroleum fields and charging an export tax will give the Government a constantly increasing revenue for internal development and educational purposes for years to come.

There is nothing in the Mexican constitution of 1917, in its official decrees, or in the taxes that it has imposed which is in the least degree inimical to the continued operation of the American oil companies now doing business in Mexico. As a matter of fact, the oil companies in Mexico have prospered exceedingly. Their annual dividends are large and their stock often leads the advances on the New York exchange. They have been so prosperous, in fact, that oil producers in the United States have repeatedly petitioned Congress for a tariff on oil that will allow them to compete on equal terms.

Secretary Fall's letter to Senator LODGE, which I referred to previously, makes it clear that British companies which obey the decrees of the Mexican Government "have an advantage of the American companies," which apparently are disobeying the laws at the request of the State Department. This should forever end the cry that the oil laws of Mexico are "confiscatory."

MEXICO'S LAND POLICY.

Mexico's land policy is an enlightened one, which, in view of the ever-increasing farm tenantry in the United States, we might do well to follow. Mexico has a peculiar land problem. An overwhelming majority of her people are of Indian descent. The domination of Diaz by foreign capitalists resulted in their expropriation from the soil and reduced them to a state of peonage. We know in this country from our own experience that exploiters have not always been scrupulous in dealing with Indians. It was the same in Mexico, and there never will be a contented people or a stable government south of the Rio Grande until that old wrong is righted and the mass of her citizens, who are agriculturists by temperament and training, are given back their hereditary possessions.

Mexico has the right as a sovereign nation to regulate her peculiar land problem. I think I may reasonably claim to know something about agricultural problems, and Mexico's policy in this respect meets my hearty approval, as it must meet the approval of every disinterested person who has given the matter serious thought. We have problems enough of our own without meddling with those indigenous to Mexico. If it were not for the complaint of certain corporations who apparently fraudulently obtained grants of communal lands in Mexico we would not think of doing so.

It is to our advantage to immediately establish harmonious relations with Mexico and do everything in our power to aid in her material, moral, and educational development. That nation has finally come through a period of acute distress which follows all revolutionary upheavals. The American Colonies were in much the same condition after our War of the Revolution and the Southern States were almost prostrated after the Civil War.

For more than a century Mexico has been struggling for political freedom. The country under Spanish rule was more completely subjugated than any other country in modern times. The spirit of independence was almost crushed and we must remember that the mass of the Mexican people do not have traditions of Anglo-Saxon liberty behind them. They had to build from the very bottom, and time and time again they have been set back by outside interference.

The Mexican State came into collision with our own slave oligarchy and the result was disastrous. Then Maximilian and his French mercenaries kept the land disturbed for six years, and under Diaz the people were reduced to economic exploitation in some ways comparable to that of Spain. But the struggle continued and always progress upward was distinguishable. Now, after 10 years of severe civil war a government which is approved by the mass of the people has attained stability and is endeavoring to function for the mass of the people.

We should be the first to extend the helping hand. Time was when the United States gladly acclaimed each new nation

that threw off the yoke of Spain and joined the brotherhood of republics in the New World. Time was when Americans were mindful of their own revolutionary origin and as a matter of right and principle were the first to extend the fraternal hand of welcome to republics which deposed tyrants, no matter in what quarter of the globe.

Washington, Jefferson, Webster, Calhoun, and Lincoln voiced the truest traditions of our country when they affirmed these decisions. It was our boast that we feared aggression from no strong nation, and we scorned to impose on one weaker than ourselves. In pursuance of this policy we flung the Monroe doctrine in the face of the world as a warning that democracy, in this Western Hemisphere at least, should not perish from the earth.

Has our historic policy changed? Have we abandoned the traditional policy of Washington, Jefferson, and Monroe that won us universal esteem and gave good cause for the smaller nations of this continent to look upon us as a big brother, to be trusted and to be loved?

When I review our recent domineering attitude toward Haiti, San Domingo, Nicaragua, Guatemala, Panama, and even Cuba, it seems evident that we have. We seem to have entered upon a course of aggression and imperialism. An apparent unholy alliance between certain powerful financial interests and our Department of State, in the minds of many, already has reduced more than one heretofore independent republic to the status of a Wall Street protectorate.

It seems evident that the present administration can not be expected, if we are to judge by its policies thus far outlined, to afford any immediate change toward Mexico. Toward the Latin-American countries to the north of Panama and the West Indies the administration's policy seems to be wholly imperialistic. The relief sought for by them can only come, in my humble opinion, when a really progressive party has been placed in power in this country by the common people, as they certainly will do at an early date if the policies now in vogue are persisted in by those who determine governmental policies. The imperialistc policy on which the United States has launched in recent years is without sanction of law, Congress having never authorized nor have the American people ever been called upon to vote on any such policy, and I do not believe they ever would sanction it. If permitted a chance, they would most overwhelmingly reject any such policy. Neither would our people authorize Executive interference with Latin countries to our south or the land-grabbing policy we have entered upon. I am sure, however, that these same countries that now look with fear upon us would welcome our friendship and good will.

This policy is short-sighted and ruinous, for it is true of nations as well as individuals that "the paths of glory lead but to the grave." And the United States for the last two decades has stepped rapidly along the perilous paths of imperialism. It is time to stop this tendency short and to return to our earlier traditions of honorable and equitable dealing with all nations.

OUR DUTY TO MEXICO.

We should start with Mexico. The first step should be recognition—a recognition that is unequivocal and seeks to impose no terms. Let us deal with Mexico in a way that will give her no just cause for grievance, that will compensate for our past errors of policy, and that will disarm all Latin-American nations of the suspicion they have begun to feel as to our motives. Let us, in short, act not with the bargaining spirit of a marketplace bully but in accordance to the great fundamental truth that the Nazarene voiced when he said:

Do unto others as ye would have others do unto you.

If this is made the actuating motive of our international relations, we can not go far wrong, and though some skeptics may smile it is a policy that will eventually bring us richer returns than the bloody fruit of imperialism.

A few days ago the Nation united to honor the memory of Abraham Lincoln. North, South, East, and West all paid homage to this far-visioned statesman, this tender-souled humanitarian, this rugged, sterling man who typifies all that is best of real Americanism. And I remembered that he had had a "Mexican problem" on his hands, and I recalled that a few months before the assassin's untimely bullet laid him down he had sent a message to President Benito Juarez, "the liberator of Mexico," whose country was just struggling to free itself from the yoke of Maximilian. This is what Lincoln wrote:

For a few years past the condition of Mexico has been so unsettled as to raise the question on both sides of the Atlantic whether the time has not come when some foreign power ought, in the general interest of society, to intervene, to establish a protectorate or some other form of government in that country and guarantee its continuance there * * *.

You will not fail to assure the Government of Mexico that the President neither has nor can ever have any sympathy with such designs, in whatever quarter they may arise or whatever character they may take on * * *.

The President never for a moment doubts that the republican system is to pass safely through all ordeals and prove a permanent success in our own country and so be recommended to adoption by all other nations. But he thinks, also, that the system everywhere has to make its way painfully through difficulties and embarrassments which result from the action of antagonistical elements which are a legacy of former times and very different institutions.

The President is hopeful of the ultimate triumph of this system over all obstacles, as well in regard to Mexico as in regard to every other American State; but he feels that these States are nevertheless justly entitled to a greater forbearance and more generous sympathy from the Government and the people of the United States than they are likely to receive in any other quarter.

The President trusts that your mission, manifesting these sentiments, will reassure the Government of Mexico of his best disposition to favor their commerce and internal improvements.

I find the archives here full of complaints against the Mexican Government for violation of contracts and spoliation and cruelties practiced against American citizens. It is not the President's intention to send forward such claims at the present moment. He willingly defers the performance of a duty which at any time would seem ungracious until the incoming administration in Mexico shall have had time, if possible, to cement its authority.

It was this spirit that made Lincoln the greatest American, and it was the same spirit that once made the United States beloved and respected the world around. Once more I plead for a return to these ancient and honorable standards, and in closing I ask that we deal with Mexico with the same tolerance, the same fairness, and the same warm sympathy that Abraham Lincoln once displayed.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. ROBINSON. Mr. President, rumor has it that you are a very wise man. Your conduct here and elsewhere sometimes justifies the rumor. I wonder if you know what is the day. I wonder if you know what is the pending question.

It is astonishing to state that while the calendars unanimously inform us that this is the 19th of July, 1922, as a matter of fact in the Senate it is the 20th of April, 1922. In order to facilitate one particular subject of legislation the Senate of the United States has disregarded the scientific laws which regulate the expression of time. Like Joshua of old, it has commanded that the sun stand still. While the people of the United States and the world look on with amazement at these proceedings, the clock, which governs them, reflects the hour of 12 noon, April 20, 1922.

This legislative fiction, by which the Senate commands the sun to stand still and lives in days that are accomplished and long past, is designed to prevent the interposition of other questions than those relating to tariff legislation. A unanimous-consent arrangement has been effected by which, instead of adjourning, as ordinary parliamentary processes contemplate the Senate should do, we have recessed from day to day, so as to keep before the Senate one subject matter of legislation to the exclusion of every other.

Under the parliamentary method of procedure now in force by unanimous consent no bill, no resolution, no discussion is in order save that which is directed to the question immediately pending. In the beginning of the debate on the pending bill this morning—that is, by parliamentary fiction about noon or the early afternoon of April 20, 1922—impatience was manifested by the Senator from North Dakota [Mr. MCCUMBER], in charge of the bill, and his able associate, the Senator from Utah [Mr. SMOOT], and from them and from others we heard repeated declarations that Democratic Senators had combined in a policy of filibustering for the purpose of preventing the passage of the pending tariff bill, which Republican Senators said the country demanded.

Irrelevant speeches were delivered from both sides of the aisle. That was following a custom which has prevailed in the Senate for perhaps half a century. In the early days of this debate one side of the Chamber was perhaps as much to blame in that regard as the other, but recently irrelevant discussions have come from the majority side of the Chamber, and to-day they have come exclusively from Senators who are professedly supporters of this legislation.

Yesterday afternoon, when the Senate was about to conclude its session, having charge of the particular schedule pending, I proposed an amendment to the committee amendment and announced that we were ready for a vote. The Senator from North Dakota stated that the Senator from Wisconsin [Mr. LA FOLLETTE] was vitally interested in the pending proposition, but was out of the city, and that he was expected to return this morning. For that reason no vote was taken yesterday.

My amendment to the committee amendment, which has not been mentioned to-day except by myself, is still the pending question. This side of the Chamber has long been ready to vote. I have sat here for four hours waiting for a vote, and the only reason the Senate has not voted is that the Senator from Idaho [Mr. GOODING] and the Senator from North Dakota [Mr. LADD] have consumed the time of the Senate in discussions of matters entirely irrelevant to the question immediately before the Senate.

When the Senator from Idaho concluded his remarks, the junior Senator from North Dakota obtained the floor. He was good enough to yield to me then for a brief statement, to point out the fact that the Senator from Idaho consumed 2 hours and 24 minutes in entirely irrelevant debate, that the matter of the debate was neither calculated nor intended to influence the action of the Senate upon the question pending or upon any other question. The Senator from Idaho has been foremost among the friends of this legislation in charging Democratic Senators with filibustering.

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. ROBINSON. I yield with pleasure.

Mr. HEFLIN. I want to remind the Senator that this is the legislative day of April 20. It will be three months to-morrow——

Mr. ROBINSON. I have already discussed that.

Mr. HEFLIN. Three months to-morrow that we have been carrying on this bill without prayer in the Senate.

Mr. ROBINSON. I discussed that matter at considerable length in the beginning of my remarks and I have passed away from that proposition.

Under the rules of the Senate the Senator from Idaho [Mr. GOODING] can waste the time of this body in a 2-hour and 24-minute discussion if he wants to do so, but he does it in spite of the preference of Democratic Senators and to the utmost displeasure, if not disgust, of many Senators on the other side of the Chamber.

Mr. GOODING. Mr. President——

Mr. ROBINSON. I yield to the Senator from Idaho.

Mr. GOODING. I will say to the Senator from Arkansas that I do not think the RECORD will show that I have charged Senators on the other side of the aisle with filibustering. I have said that they believed that the bill was unconstitutional or that the tariff was unconstitutional, and that they had a right to abuse it and damn it as they have done from the beginning.

Mr. ROBINSON. Now, Mr. President, that is a remarkable contribution to this debate, is it not, coming from the source from which it originates? The Senator from Idaho has in some mysterious, indefinable, and, to all mankind other than himself, inexplicable way arrived at the conclusion that the opposition to the bill is based upon constitutional grounds. If I chose to be diverted from the line of discussion which I was pursuing to answer in detail that suggestion, I would be guilty of the same parliamentary crime that the Senator has been committing throughout this day. If Senators present, if the visitors in the gallery, if the learned occupant of the chair, think that the observation of the Senator from Idaho requires further argumentative reply, they will be disappointed in so far as any remarks of mine are concerned. Everyone but the Senator from Idaho knows that the fundamental distinction between Democrats and Republicans touching the tariff, if that distinction remains, is that the Democrats advocate a tariff for revenue purposes and the other party advocates a tariff for protective purposes.

The Senator from Idaho now disclaims any purpose of a contention that Democratic Senators have been filibustering against the passage of the bill. I wonder whether he is as familiar as some of the rest of us with the attitude and course he has pursued during the debate. I wonder if he knows that his attitude toward the matter is influenced by his own present disposition to filibuster on the measure which he formerly so warmly advocated? What else can we term it than a filibuster when a Senator takes the floor and talks for 2 hours and 24 minutes about something that is not before the Senate? Now, the Senator from Idaho can answer that, and any other Senator can answer it. I wait for a reply.

Mr. GOODING. Mr. President——

Mr. ROBINSON. I yield to the Senator from Idaho.

Mr. GOODING. I quite understand the Democratic viewpoint that I did not discuss the tariff question at all.

Mr. CARAWAY. Nor anything else that anybody understood.

Mr. ROBINSON. I could not hear the statement of the Senator.

Mr. GOODING. I say I understand thoroughly that from the Democratic viewpoint or standpoint I did not discuss the tariff question at all. That is not strange at all.

Mr. ROBINSON. I take time enough to show even the Senator from Idaho that he either did not discuss the question before the Senate and that he knows that he did not, or that his mental constitution is such that he can not understand what is the pending question. Listen: The Senator from Utah [Mr. SMOOT] is in charge of the cotton schedule and the hemp, flax, and jute schedule on the majority side. The pending question is an amendment offered by myself to paragraph 1001, striking out the committee amendment of 2 cents per pound and inserting one-quarter of 1 cent per pound. Now, let my friend the Senator from Idaho do what he apparently had not done when he began to make his speech to the Senate to-day—let him read his speech and then let him make answer to the Senate whether he was discussing that question or any subject intimately or remotely related to it.

Mr. GOODING. Mr. President——

Mr. ROBINSON. I yield to the Senator from Idaho.

Mr. GOODING. I ask the Senator from Arkansas if he is discussing the pending question?

Mr. ROBINSON. Yes; and I am going to try to get a vote on the amendment by suppressing the Senator's filibuster against this tariff bill.

Mr. GOODING. Up to the present time the Senator has not mentioned at all the question before the Senate.

Mr. ROBINSON. Mr. President, I do not know of any better way to get a vote, after sitting here four hours and listening to Republican speeches on irrelevent subjects, than by driving it home to their conviction and to the conviction of other Senators that we ought to confine debate to the subject under consideration.

The junior Senator from North Dakota [Mr. LADD] was kind enough to yield to me to make some observations respecting the delay which the Senator from Idaho [Mr. GOODING] was causing to the bill by his irrelevant and, to some of us, meaningless speech. Then, the junior Senator from North Dakota proceeded for nearly 1 hour and 30 minutes to read a speech on a subject that was not before the Senate—worse than that, on an issue that can not come before the Senate under the Constitution and practice that prevails.

If any who heard him are in doubt, I am here to inform them that his subject was the recognition of the Mexican Government, the Obregon government. The United States Congress has nothing whatever under the Constitution to do with the recognition of other governments. Everyone knows that the recognition of another government is an Executive function. My good friend the junior Senator from North Dakota, if he wants to accomplish the recognition of Obregon, had better either mail a letter to the President of the United States, who has the power of recognition, or present to him the facts which in his opinion justify it. He can not accomplish recognition by talking about it to the Senate.

Why, Mr. President, of course the Senator from Idaho can talk about anything that he pleases. He can do just what I am doing now—talk about nothing when I talk about the speech of my good friend the Senator from Idaho [Mr. GOODING]. Nevertheless, if these irrelevant speeches by Republicans had not been made, we would have been almost through with schedule 10, relating to hemp, flax, and jute. We would have disposed of the remaining paragraphs of the cotton schedule and would have voted upon many of the paragraphs contained in the hemp, flax, and jute schedule. But we could not get a vote, because Republican Senators, Senators committed to the bill, have wasted the time of the Senate and the country in debate upon questions which are not before the Senate.

What is accomplished by the review of Mexican history, by the presentation of the views of those who favor recognition, before the Senate, which has no power to deal with the question? What advance can be made to a decision of the issues involved in the pending bill if Senators pursue to the end the course taken by my good friend the Senator from Idaho [Mr. GOODING] and discuss general topics not intimately related to the immediate question before the Senate?

Mr. President, yesterday it was explained to the Senate that the hemp industry as now organized and as it likely will be conducted in the future is not a successful American industry. American laborers will not perform the insanitary, the difficult labors which are required in producing hemp.

We asked then, and I repeat it now, what is the use of increasing, as the Senate Finance Committee does increase enormously, the tariff rates on the raw products when it is known that such action can not result in the creation and maintenance of an American industry in competition with other agricultural industries?

Now I conclude where I began. For my part I want to get through with the pending bill.

Mr. GOODING. Mr. President——

Mr. ROBINSON. I yield to the Senator from Idaho.

Mr. GOODING. I would like to ask the Senator from Arkansas if it is not a fact that at one time the hemp industry was a great industry in the United States?

Mr. ROBINSON. It never was a great industry. It has been steadily declining in Kentucky, where it was formerly one of the chief industries of the State. It has dwindled almost to nothingness, and, as explained yesterday, it never will become a profitable American industry, well established and maintained, unless machinery may be devised which will do the work that experience now shows must be performed by hand labor. The senior Senator from Kentucky [Mr. STANLEY] yesterday went into a detailed description of the work necessary to be performed in the production of flax and hemp. He showed that the weeding must be done by hand, that the pulling and the combing must be done by hand, and that the work of retting is extremely disagreeable to the extent of being repulsive to American laborers, and that, considering the fact that the production of hemp is less profitable than growing other agricultural crops, there is no likelihood hemp growing ever will become an established industry in the United States unless a revolution occurs and machinery is developed which will do the work that human hands must now perform.

I recall that the former Senator from Kentucky, Mr. Bradley, something like 12 years ago in this body made a speech in which he declared that the hemp industry in Kentucky would soon be placed on a secure basis because of the fact that machinery had been invented which would perform the labor then done by human hands, but his opinion on the subject proved to be incorrect, and students, with the exception of some university professor who is connected with the University of Wisconsin, have almost unanimously agreed that the machinery has not yet been devised by which this labor may be performed. So there is not very much likelihood that the industry can ever be securely established in the United States.

We are not, then, accomplishing anything by putting this high tax upon the raw products, but we are embarrassing unnecessarily other industries which might become profitable but for the very high tax on the raw product.

I again say that, so far as I am concerned, I am ready to vote.

Mr. McCUMBER. Mr. President, I think that most Senators deprecate the fact that we have no rule in the Senate requiring Senators to confine their remarks to the pending subject matter. Yesterday the senior Senator from Florida [Mr. FLETCHER] spent, I think, about three hours or more in the discussion of the ship subsidy bill, a subject, of course, which is very close to his heart. Inasmuch as the Senator from Florida had taken three hours or more in the discussion of a subject which he thought it proper to discuss, this morning my colleague, the junior Senator from North Dakota [Mr. LADD], felt that he might very properly take a third of that time in the discussion of a question that is very close to his heart, and so my colleague discussed our relations with Mexico. Then the Senator from Arkansas [Mr. ROBINSON] took about half as much time as did my colleague in making his whole speech in telling my colleague that he ought not to have talked upon a subject which was not the matter pending before the Senate.

Now, I want to get right down and agree with the Senator that we all ought to confine ourselves to the real question which is before the Senate.

Mr. ROBINSON. Will the Senator from North Dakota yield to me?

Mr. McCUMBER. Certainly.

Mr. ROBINSON. The Senator from North Dakota, I presume, will agree with me that up to the present time, since the beginning of his remarks, he himself has not touched the pending subject.

Mr. McCUMBER. Very well. I will occupy but a few moments in referring to the pending question.

Mr. President, I stated on yesterday afternoon that the senior Senator from Wisconsin [Mr. LA FOLLETTE] had made an argument on the hemp schedule before the Finance Committee and that perhaps he had a more thorough knowledge of the subject than had any other member of the committee, but that he, being absent from the city, his secretary had sent up to me the correspondence which the Senator from Wisconsin had received from, I think, the president and secretary of the Wisconsin Agricultural College. These men are experts upon this subject and they present a very complete statement of the case from the standpoint of the farmer and the protectionist. I could hardly by speaking elucidate the subject as well as the letters themselves elucidate it. Therefore I am going to ask that the Secretary may read the six letters which I shall send to the desk—they are not very long—which have been received from this agricultural college. I ask Senators who are interested in the subject to remain while the letters are being read, for I think it will assist all in arriving at an accurate judgment. I ask that the letters may be read in the order in which I send them to the desk.

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The Assistant Secretary read as follows:

THE UNIVERSITY OF WISCONSIN,
COLLEGE OF AGRICULTURE,
Madison, September 24, 1921.

Senator ROBERT M. LA FOLLETTE,
United States Senate, Washington, D. C.

DEAR SENATOR LA FOLLETTE: Our Professor Wright has been corresponding with you relative to a tariff on hemp fiber, and I wish to support his action and to emphasize the great importance of this matter to the people of Wisconsin.

We started the hemp business in the State some 10 years ago and have actively continued our efforts along that line ever since, until Wisconsin leads all other States in America in hemp-fiber production. The methods of growing and handling hemp during that time, and largely through our efforts, have been practically revolutionized. We have changed the hemp industry from a tedious hand-labor, man-killing job to a machine basis of production and handling throughout. We also developed good markets, from which we obtained satisfactory prices. We were getting established in a very satisfactory manner and were in a position to compete with fiber from other countries so long as normal conditions continued, and if this were not a new industry we could better cope with present severe competition, but the industry is new and no reserves have been built up. Much money has been expended for machinery, equipment, and buildings, and unless we can get reasonable protection from the ridiculously cheap fibers that are being dumped on our markets, our industry is going to be utterly destroyed. I am sending you a bulletin relating to the hemp industry of Wisconsin so you can better determine the rapid strides made in a short period of time.

We should have a tariff of 5 cents a pound on what is termed "line hemp" and 2½ cents a pound on the grade known as "tow." This tariff would make it possible for us to continue in business. The three-fourths of a cent a pound, as proposed in the Fordney bill, will, of course, do no harm, but neither will it be of much help. We wish you could look into this matter carefully and give it your personal attention.

Sincerely yours, RANSOM A. MOORE.

—

THE UNIVERSITY OF WISCONSIN,
COLLEGE OF AGRICULTURE,
Madison, September 26, 1921.

Senator ROBERT M. LA FOLLETTE,
United States Senate, Washington, D. C.

MY DEAR SENATOR LA FOLLETTE: I have inclosed herewith a rather formal letter upon the Wisconsin hemp work, the facts of which I feel may be helpful to you in securing a reasonable tariff upon hemp.

I am not sure that you are fully aware of the great strides that have been made with hemp in Wisconsin. Twelves years ago, when I took up this work, there was not a single acre of hemp grown in the State. Hemp was introduced quite largely because it was thought that we could use the same as a fiber to make binder twine. However, the legislature, after making the appropriation for a binder-twine building at Waupun in connection with the State's prison, the succeeding legislature refused to equip the same, and the delay of several years then took place investigating as to whether or not it would be profitable for the State to go into the manufacturing of binder twine.

I naturally established the hemp center in the Waupun district, thinking the fiber could easily be put into the plant. However, when I saw that the enterprise of making binder twine was delayed an effort was made to secure markets for the hemp outside. We canvassed the manufacturing plants of the East and also of the foreign countries, particularly England. When the legislature finally put in the equipment for making binder twine we had established markets which gave us a price that far exceeded anything that could be paid for the fiber for the manufacturing of binder twine. We ran a test in manufacturing binder twine, and found that the hemp fiber makes an exceedingly fine and strong binder twine, but the price we were then receiving for hemp fiber did not warrant us in putting it into the plant in competition with sisal.

We encouraged capital to put in fiber plants that can be run night and day throughout the year. We have now one large plant 1 or 2 miles away from Waupun, one at Waupun, two at Brandon, two at Fairwater, and another at Markesan. The fiber output amounts to about $1,200,000 per year. A year ago we sold about $250,000 worth of hemp in England, about an equal amount went to the United States Navy, while the remainder went to the various manufacturing plants in the East.

At the present time we are up against this particular proposition: Hemp fiber can be shipped from Italy to New York at practically the same rate that we can ship to New York from Wisconsin. The Italian hemp is grown and fiber taken from the plant with cheap labor. Consequently the foreign hemp can come into our markets at considerably less than we can produce the fiber, and our industry, which has taken the past 12 years to build up, will be practically ruined unless we can have a substantial tariff upon the same.

Our farmers feel quite keenly the situation, as they have purchased machinery which was especially built for harvesting, binding, and breaking of the hemp. Last year Wisconsin grew more hemp fiber than all the other States put together, and we also had more up-to-date hemp machinery than all the other States, and the hemp industry has become a stable one in our State.

I hope something can be done. The proposed three-fourths of a cent tariff would not be sufficient protection to aid in protecting this industry which has now gained such a strong foothold in our State. I really hope that something can be done to give the protection which is so necessary at the present time to maintain this line of effort which has been established.

With kind remembrance to your family from myself and Mrs. Moore, I am,

Sincerely yours, RANSOM.

WISCONSIN HEMP ORDER,
Madison, Wis., March 29, 1922.

Hon. ROBT. M. LA FOLLETTE,
Senate Chamber, Washington, D. C.

DEAR SENATOR LA FOLLETTE: We wish to remind you of the importance to Wisconsin of increasing the tariff on imported hemp. The Fordney bill carries a rate of three-fourths cent a pound, which is of such little consequence that it constitutes no protection whatever.

We earnestly request that you, as a member of the Senate Finance Committee, urge that this rate be increased to 2 cents a pound. Two cents a pound will make it possible for us to continue in business. On the other hand, if we can not get protection we will be obliged to go out of business here in Wisconsin so far as hemp is concerned, or at least to discontinue business until foreign conditions become materially changed.

To assist you in presenting this matter to the Senate we submit the following summary of our reasons:

"(1) An important industry: The United States now actually produces from 50 per cent to 75 per cent of the hemp consumed in this country. Furthermore, the production during recent years proves that the hemp-growing districts of the United States are fully able to produce each year sufficient hemp fiber to satisfy all domestic demands. The States which produce hemp are Wisconsin, Kentucky, California, Illinois, Minnesota, Indiana, Ohio, and Michigan.

"Special emphasis is placed on the foregoing reason because there is a prevalent opinion that but a small percentage of hemp used in the United States is produced here.

"(2) An infant industry: Under the present method of production hemp is an entirely new industry in the United States and has been developed during the last few years. This development is the result of the activity of such public agencies as the United States Department of Agriculture and University of Wisconsin. New machinery has been introduced which has eliminated the laborious hand methods employed during former years and a large amount of capital has been invested in this new equipment.

"This new industry was established during a period when it was difficult to obtain foreign fiber, and since the policy of a protective tariff is to protect infant industries and encourage their development, it is here maintained that no agricultural industry is more deserving of tariff protection than hemp. It is also maintained that if such old and well-established agricultural industries as wheat, potatoes, cotton, wool, and the like are entitled to tariff protection a new industry should receive at least equal consideration. It is further maintained if a tariff be placed on other agricultural products and not on hemp, the result will be a direct discrimination against the production of hemp, and the American public certainly does not wish to discriminate against an infant industry.

"(3) Hemp necessary for the national welfare: The use of hemp fiber is interwoven with nearly every industry in the United States and is necessary for the manufacture of such essential naval equipment as marline, houseline, and ratline. These uses make hemp necessary for the national welfare.

"(4) Competition of foreign hemp: Foreign hemp is now being dumped into this country at prices less than actual cost of domestic production, and unless something is done to prevent this the American hemp industry can not long survive. This critical condition is the result of depreciated foreign exchange and cheap labor. To illustrate: Italian hemp is the chief competitor and Italian exchange is less than one-fourth of normal and the cost of Italian labor is approximately one-tenth that of American labor."

In consideration of the competition of foreign hemp, the cost of domestic production, and the cost of transportation to manufacturing points the American hemp producers request a tariff of 2 cents a pound on all grades of hemp fiber. The hemp producers feel that this rate is necessary to preserve the American hemp industry.

Respectfully submitted.

WISCONSIN HEMP ASSOCIATION,
By A. H. WRIGHT, *Secretary.*

WISCONSIN HEMP ORDER,
Madison, Wis., May 4, 1922.

DEAR SENATOR LA FOLLETTE: In reference to our correspondence relative to a tariff on hemp, I now have a copy of Schedule 10 of the tariff bill as amended by the Senate. I wish to call your attention to the wording of Schedule 10 so far as it affects hemp.

Schedule 10 as amended states "hemp and hemp tow, 2 cents per pound; hackled hemp, including line of hemp, 4 cents per pound." This wording is confusing in that it evidently makes a distinction between hemp and line of hemp. To explain this I offer the following discussion of the several terms used:

(1) Hemp: This term when used alone in trade transactions refers to the long, straight hemp fiber which has been more or less cleaned by removing the woody portion. It is often called rough hemp, raw hemp, or scutched hemp, but in any case refers to a general class of hemp fiber which has been roughly prepared, but which is long and reasonably straight. In other words, it is a term used to distinguish the long, straight fiber from the tangled, more or less matted and short fiber known as tow.

(2) Hemp tow: This is the short, more or less tangled, usually somewhat wadded or matted, and generally contains considerable extraneous material. It is obtained from the hemp proper by scutching, shaking, beating, or otherwise handling the original fiber. In other words, it is the combings from the hemp proper or the residue left in cleaning the hemp proper.

(3) Hackled hemp: This term is applied to hemp proper which has been put through a special process of combing over a hackle. In this country it is often spoken of as dressed hemp. In other words, it is ordinary hemp proper which has been processed by hackling.

(4) Line of hemp: This term, which is used principally in the American trade, is synonymous with hemp proper. In other words, it is the straight, long-hemp fiber as distinguished from the short, tangled tow.

From the above it is evident that by placing a tariff of 2 cents a pound on hemp and hemp tow and the placing of 4 cents a pound on line of hemp and hackled hemp that it is a question as to just what kind of hemp the 4 cents a pound applies. So far as Wisconsin is concerned, all of our hemp is produced in the form of hemp proper and hemp tow. What we should have, therefore, is 2 cents a pound on hemp tow and 4 cents a pound on hackled hemp and hemp proper (sometimes termed line of hemp or hemp line). If this is not made clear in the wording it will very likely be construed to mean that the 4 cents a pound tariff is to be applied to hackled hemp or similarly prepared hemp, and will not include the hemp proper as it is produced in this country.

If I have not made myself clear on this point, I shall be glad to give as much detailed explanation as you desire.

A. H. WRIGHT, *Secretary.*

WISCONSIN HEMP ORDER,
Madison, Wis., May 6, 1922.

DEAR SENATOR LA FOLLETTE: In reference to your letter of May 2, Professor Moore is out of town and he wishes me to give you the information concerning cost of production and the like for hemp in order that you may be aided in sustaining the increased duty as provided by the Senate.

I shall prepare the information which you request immediately and will endeavor to work it up in sufficient detail that it may be altogether dependable. I will send this on to you just as soon as I can get it up in proper shape. In the meantime I submit the following brief statements:

Foreign hemp: The only true foreign hemp which competes with Wisconsin hemp at the present time is the Italian. Grades of this hemp (line hemp) comparable to the grades of line hemp produced in Wisconsin are being sold c. i. f. New York at from less than 10 to around 12 cents a pound. Italian tow, known as strappatura, is offered New York at around 5 cents a pound. The ocean freight from Leghorn to New York on Italian hemp is less than 50 cents a hundred pounds. The labor in Italy is equivalent to about 25 cents a day. The transportation, therefore, from Leghorn to American ports is less than the American land freight from Wisconsin points to eastern manufacturing points—the freight from Wisconsin to New York is approximately $1 a hundred. The labor is ten times or more than that of the Italian labor, as we are paying from 25 to 35 cents an hour, or from $2.50 to $3.50 a day of 10 hours.

Cost of producing Wisconsin hemp: Wisconsin hemp fiber is fundamentally of two kinds, known in the trade as "line hemp" and "hemp tow." The growing and the handling of hemp fiber up until the time it is delivered to the hemp mills where the fiber is separated from the straw costs 4 cents a pound for tow and 7½ cents a pound for line. The separation of the fiber from the retted hemp straw by the hemp mills costs 3 cents a pound for tow and 4 cents a pound for line. Freight from Wisconsin points to manufacturing points averages approximately 1 cent a pound for both line and tow. This may be itemized as follows:

	Tow.	Line.
	Cents.	*Cents.*
Cost of growing and handling the crop.....per pound..	4	7½
Cost of milling the crop.....do....	3	4½
Transportation.....do....	1	1
Total.....do....	8	13

From the above it is shown that Italian hemp is being delivered New York at 3 cents a pound less for both line and tow than we are able to produce Wisconsin hemp and deliver it to New York. These figures allow nothing for profit, but are computed as nearly as possible on the actual costs of growing and milling and allow no profit either to the farmer or to the scutch mill.

I hope the foregoing will be of assistance and that I shall be able to get you more detailed information within the next day or two.

A. H. WRIGHT, *Secretary.*

WISCONSIN HEMP ORDER,
Madison, Wis., May 9, 1922.

DEAR SENATOR LA FOLLETTE: I have endeavored to assemble some detailed information relative to the cost of producing hemp in Wisconsin and also information relative to the cost of producing foreign hemp which competes with our product. The following data are necessarily approximations and are based on conditions prevailing during the seasons of 1920 and 1921. It might be well to mention that hemp is produced on the very best soil and that but a small portion of the average farm in the hemp district is suitable for the crop.

In estimating the cost of producing hemp fiber it is necessary to mention that there are two fairly distinct processes: (1) Growing and handling the crop by the farmer, including preparing the soil, seeding, cutting, and spreading, lifting and binding, hauling and stacking. (2) The milling of the fiber, which includes all of the processes at the hemp scutch mill necessary to separate the fiber from the straw, clean, grade, and bale it.

Cost of growing a crop of hemp and delivering the retted straw to the hemp mill.

	Per acre.
Preparing the soil and seeding the crop	$6.00
Seed	7.50
Harvesting and spreading	6.00
Lifting and binding	6.00
Hauling and stacking	5.00
Rent, taxes, etc	12.50
Total	43.00
Average yield of total fiber in Wisconsin, including line hemp and hemp tow	750
Total cost for line and tow to the farmer for growing the crop and delivering the retted straw to the mill—cents per pound	5.75

"So far as the farmer is concerned no definite distinction can be made between the cost of producing a pound of line hemp and that of producing a pound of hemp tow. Inasmuch, however, as line hemp is a superior fiber and brings a higher price on the market a proportionate cost can correctly be placed on each kind of fiber. In this way we arrive at the following:

	Cents per pound.
Farmer's cost for producing line hemp	7½
Farmer's cost for producing hemp tow	4

COST OF MILLING HEMP, INCLUDING DRYING, BREAKING, SCUTCHING, SHAKING, GRADING, AND BALING.

"The average hemp mill represents an investment of fifty to seventy-five thousand dollars and employs from 18 to 25 men in addition to a manager, field man, office work, and the like. The upkeep on these mills is very heavy, the insurance rate is very high, consequently the overhead is considerable.

COST OF MILL LABOR.

"Eighteen to twenty-five men, at $2.50 to $3.50 a day, averages $75. Average labor cost, including line and tow, based on an average production of 3,000 pounds of total fiber a day is 2.5 cents a pound. Overhead cost, including insurance, taxes, interest, repairs, and the like, 1.25 cents per pound. Total cost of milling (both line and tow), 3.75 cents per pound.

"In milling hemp it is impossible to distinguish between the cost of producing the line and that of producing the tow. However, the line requires more careful treatment and in addition is the more valuable product, consequently a relative cost of each kind can be arrived at according to the relative market value of each kind; consequently we assume the following:

	Cents per pound.
Cost of milling line hemp	7½
Cost of milling hemp tow	3

TRANSPORTATION OF HEMP FIBER.

"Hemp fiber is not manufactured into the finished products in Wisconsin. It is all shipped to other States, principally to the North Atlantic States. New York City represents an average shipping point. The freight from Wisconsin points to New York City averages approximately 1 cent a pound for both line and tow.

COST OF PRODUCING FOREIGN HEMP WHICH COMPETES WITH WISCONSIN HEMP.

"I can add very little to that which I gave you in my letter of May 6. During the last two years our principal competitor has been Italy. In normal times Russia was the most important country exporting to this country. During the last two years, however, very little hemp has come out of Russia for export to the United States. However, Russia can be expected to become a competitor in time. Just what is the cost of producing hemp in Russia is impossible to learn. Ordinarily it is less than that of Italy. We can assume, so far as labor is concerned, that the Russians are able to produce the fiber in a condition for export at at least one-fifth of the American labor costs.

"Italian labor may now be proportionally higher than that stated in my letter of May 6. A recent report by the Office of Foreign Statistics, United States Department of Agriculture, indicates the average wages for Italian laborers to be about 60 cents a day of eight hours. In the production of hemp a great deal of the work is done by women and children, and the wage paid women and children is considerably less than that paid men. Twenty-five cents a day may be too low at present, but we are altogether safe in assuming that the average labor costs for producing hemp in Italy is not over 50 cents a day (10-hour basis). This is at most only one-fifth of the cost of American labor.

"The method of growing and handling in Russia and Italy differs so completely from the methods used in America that no detailed data for comparison can be given."

In addition to the foregoing, it may be well to state that we believe that by utilization of machine methods, of managerial ability, and intelligent labor that we can compete with foreign fiber provided a reasonable differential is provided through a tariff. The hemp business not only in Wisconsin but every other hemp-producing section in the United States is now in a deplorable condition. A tariff of 2 cents a pound on all hemp tow and 4 cents a pound on all other hemp, including hemp proper (hemp line or line of hemp) and hackled hemp, will make it possible for the hemp industry to survive.

We sincerely appreciate the services which you have rendered, and earnestly hope that you will be able to procure in the final tariff bill the tariffs just suggested.

A. H. WRIGHT, *Secretary.*

The PRESIDING OFFICER (Mr. SHORTRIDGE in the chair). The question is on the amendment offered by the Senator from Arkansas [Mr. ROBINSON] to the amendment of the committee, which will be stated.

The ASSISTANT SECRETARY. The committee proposes, on page 132, line 1, to strike out "three-fourths of 1 cent" and to insert "2 cents." The Senator from Arkansas [Mr. ROBINSON] moves to strike out "2 cents" and to insert in lieu thereof "one-fourth of 1 cent," so that, if amended, it will read:

Hemp and hemp tow, one-fourth of 1 cent per pound.

Mr. SMOOT and Mr. ROBINSON called for the yeas and nays, which were ordered.

Mr. WALSH of Montana. Mr. President, the duties on agricultural products having been made the subject of some comment to-day, I send to the desk and ask to have read a letter which came to me this morning from an unusually well-informed and intelligent constituent, who resides in one of the chief if not the chief agricultural counties of my State.

The PRESIDING OFFICER. Without objection, the letter will be read.

The Assistant Secretary read as follows:

JUDITH MILLING CO.,
Hobson, Mont., July 15, 1922.

Hon. T. J. WALSH,
Washington, D. C.

DEAR SENATOR WALSH: I just want to write a short letter to you about the tariff. I am a Republican, but this tariff bill that is now before the Senate, and which the Finance Committee and farm bloc seem to want to railroad through the Senate, is just a little bit more than I can stomach.

I feel that without question it is about the most foolish piece of legislation that could possibly be enacted at the present time, with all the world owing the United States. The thing that we need is less tariff, not more tariff. Let the rest of the world trade with us on more nearly an equal basis, in order to give them a chance to pay some of their debts to us. This idea of building a Chinese wall around this country and taxing everything that comes in is ridiculous. I don't see how it is possibly going to benefit the farmers or anyone else in the long run, and is very liable to be disastrous in its consequences.

The wool and wheat schedules in the Senate bill are altogether too high. They will defeat their purpose and bring about a drastic reaction of no tariff on wheat and wool that will bring disaster on the farmer within a few years. This has been the history of such things in the past, and certainly should be in the future.

I hope that you will do all in your power to defeat the present bill, or at least have it amended so that the schedules do not call for such high tariffs as they do now.

This is not my opinion alone. I do considerable traveling, and I have yet to find anyone, Republican or Democrat, who thoroughly approves of the tariff bill now before the Senate. That may sound like a strong statement, but it is literally true. The people at large are absolutely disgusted with the antics of Congress, and especially their trying to foist on the dear public this awful tariff bill.

Yours very truly,

S. B. FAIRBANK.

Mr. POMERENE. Mr. President, I have before me an editorial on the subject "That impossible tariff." The editorial is from the Ohio State Journal, a Republican paper printed in Columbus, Ohio, and it is taken from the issue of July 17, 1922. The last sentence, referring to the McCumber-Fordney bill, reads:

It ought to be put to sleep.

I ask that the editorial may be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Ohio State Journal, July 17, 1922.]

THAT IMPOSSIBLE TARIFF.

Devotion worthy of a better cause is being shown by a group of higher tariff Senators in trying to force through the impossible McCumber-Fordney tariff bill, with its many enormous increases in tariff rates and duties. There has been no agreement of the majority Members for it at any time. Opposition has been in evidence from the start. New objections have flared into prominence as unwelcome rates and duties were made public. Senator after Senator has solemnly served notice that if particular provisions were held in the bill he could not support it. Opposition has increased almost daily until the votes on offensive amendments on Thursday brought a wide-open split of the majority, many of the stronger Members of the Senate on the Republican side helping kill the amendments.

However much these tariff-boosting Senators may be entitled to credit for the devotion they have shown, they are entitled to an equal measure of criticism for the bad judgment displayed. There has been no nation-wide need shown or demand heard for a tariff revision that puts rates very much higher. On the contrary, there has been stout opposition to the measure and the idea on which it is based, that opposition coming from all sections of the country and from nearly all lines of business. Republicans of national prominence are in the open fighting the measure, appealing to the tariff enthusiasts not to pull down that load on the party. High-tariff legislation is not wanted, but is distasteful and will be a mistake. Men of wide experience and high standing insist there will be a wave of higher prices forced if the bill passes, and the increase in prices at retail would be burdensome. Congress is taking time for the tariff that might be given to more important work. Or it might adjourn and give the country a legislative rest. That would be a welcome experience. High tariff doubtless was helpful when McKinley brought it back in the nineties. The tariff bill then fitted to some extent the need of the Nation. The tariff-raising bill now before Congress does not fit conditions existing to-day. It promises higher prices, an unwelcome offering to a people already burdened. The McCumber-Fordney bill is impossible. It ought to be put to sleep.

Mr. WALSH of Massachusetts. Mr. President, I have a letter from a leading manufacturer of my State protesting against the duties proposed to be levied in the paragraph on which we are about to vote. It is a very short letter, and I ask that it be read.

The PRESIDING OFFICER. The Secretary will read as requested.

The Assistant Secretary read the letter, as follows:

ANDOVER, MASS., *April 14, 1922.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SENATOR WALSH: Referring to Schedule 10 in the Senate tariff bill, we are very much disturbed over the inequitable duties on the raw materials in which we are interested—namely, flax, hemp, and jute.

The duty on raw flax is placed at 1 cent per pound, on raw hemp at 2 cents per pound, and raw jute is on the free list.

There is no justification whatever in putting a higher duty on hemp than flax, as the average value of hemp is considerably below the average value of flax and all previous tariff bills have placed approximately the same duty on these two fibers.

We manufacture quantities of twine from hemp which compete on a yardage basis with twine made from jute. That is, our twines sell at a higher price per pound, but hemp being of a stronger nature than jute we are able to make our twines run more yards to the pound and so offset the difference in the price per pound.

We were not disposed to make any protest against the 1 cent per pound on hemp in the Fordney bill, but with a 2-cent duty we feel that we are being discriminated against and would be unable to hold our own against twines made from the cheaper fiber.

We most earnestly desire that the duty on raw hemp and hackled hemp be no higher than in the Fordney bill.

Hoping that our request may have your consideration, we remain,

Very respectfully yours,

SMITH & DOVE MFG. CO.,
By GEORGE F. SMITH,
President.

Mr. WILLIS. Mr. President, since it seems to be the fashion just now to print editorials, I ask unanimous consent to place in the RECORD, without reading, an article appearing on the editorial page of the Tiffin (Ohio) Tribune in favor of the enactment of the pending tariff bill.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Tiffin (Ohio) Tribune, reprinted from the New York Mail.]

A PROTECTIVE TARIFF.

A tariff for protection is a tariff for the American people and for American prosperity.

It has been tested time and again and has never failed. It is the policy that has held the American home market for the American farmer.

It is the policy that has developed every American industry, maintained every American wage scale above the competing wage scale in other countries, and made the American wage earner the best paid workingman in the world.

The pay envelope of the American wage earner under a protective tariff always carries more contentment, better living conditions, and greater individual possibilities than any other pay envelope anywhere.

Every Democratic free trade law ever enacted has sooner or later forced industrial depression and panic; every protective tariff law has encouraged industrial expansion and created prosperity.

Whenever the Republican Party has been given power in the Nation it has been because its first principle is, through protection, to assure stability and prosperity to our farms and factories; a Republican Congress has always met that expectation as its most immediate duty.

This Congress has delayed too long performing that duty. It should have enacted a tariff law months ago. Farmers know, indeed the country knows, what the emergency tariff, passed a year ago, has done to put our farmers back on the road to prosperity. It provided them with a market. Our industries are entitled to the same helpful legislation. The Republican Congress is a year late in according it to them; it is now time for action.

Free-trade Democrats in the Senate are assailing the pending bill with prophecies that it will add to the cost of living. That is an old, old story with free traders. For nearly a century they have been saying it over and over again until it has worn so deep a groove in the Democratic platform that no Democrat can see over the sides of it.

All they have said in the present debate was uttered in precisely the same terms by their Democratic predecessors of years ago, in denouncing every protective tariff law before enactment.

Never do these same Democrats—nor did their predecessors—justify their argument by taking the figures of a protective tariff period to prove that protection has ever added a penny to the cost of living. They do not do it because results do not show it.

Democrats talk fiercely of what a protective tariff will do; but you never can get a word out of them as to what a protective tariff has done. The difference is the difference between prophecy and results.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas [Mr. ROBINSON] to the committee amendment on which the yeas and nays have been ordered.

The Assistant Secretary proceeded to call the roll.

Mr. ROBINSON (when his name was called). I have a pair with the senior Senator from West Virginia [Mr. SUTHERLAND], which I transfer to the senior Senator from Missouri [Mr. REED], and vote "yea."

Mr. TRAMMELL (when his name was called). I transfer my pair with the Senator from Rhode Island [Mr. COLT] to the Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. WALSH of Montana (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. WATSON of Indiana (when his name was called). I transfer my pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from Michigan [Mr. TOWNSEND] with the Senator from South Carolina [Mr. DIAL].

Mr. HALE. I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the senior Senator from Maryland [Mr. FRANCE], and vote "nay."

Mr. CALDER. I have a pair with the senior Senator from Georgia [Mr. HARRIS] which I transfer to the senior Senator from Colorado [Mr. PHIPPS], and vote "nay."

Mr. GLASS. I transfer my pair with the Senator from Vermont [Mr. DILLINGHAM] to the Senator from Nevada [Mr. PITTMAN], and vote "yea."

Mr. STANLEY. Has the junior Senator from Kentucky voted?

The PRESIDING OFFICER. That Senator has not voted.

Mr. STANLEY. I have a pair with that Senator, and not being able to obtain a transfer I withhold my vote. If permitted to vote, I would vote "yea."

Mr. JONES of New Mexico. Has the senior Senator from Maine [Mr. FERNALD] voted?

The PRESIDING OFFICER. He has not voted.

Mr. JONES of New Mexico. I have a general pair with that Senator, and not being able to obtain a transfer I withhold my vote. If at liberty to vote, I would vote "yea."

Mr. JONES of Washington (after having voted in the negative). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent for the afternoon, and I promised to pair with him. I find that I can transfer my pair to the junior Senator from Oregon [Mr. STANFIELD]. I do so and allow my vote to stand.

The result was announced—yeas 19, nays 38, as follows:

YEAS—19.

Ashurst	Hitchcock	Robinson	Underwood
Borah	King	Sheppard	Walsh, Mass.
Caraway	Myers	Simmons	Walsh, Mont.
Glass	Overman	Smith	Watson, Ga.
Heflin	Pomerene	Trammell	

NAYS—38.

Brandegee	Jones, Wash.	McNary	Shortridge
Broussard	Kellogg	Moses	Smoot
Bursum	Kendrick	Nelson	Spencer
Calder	Keyes	Newberry	Sterling
Cameron	Ladd	Nicholson	Wadsworth
Capper	Lenroot	Norbeck	Warren
Curtis	Lodge	Oddie	Watson, Ind.
Gooding	McCormick	Pepper	Willis
Hale	McCumber	Ransdell	
Johnson	McLean	Rawson	

NOT VOTING—39.

Ball	Ernst	La Follette	Reed
Colt	Fernald	McKellar	Shields
Crow	Fletcher	McKinley	Stanfield
Culberson	France	New	Stanley
Cummins	Frelinghuysen	Norris	Sutherland
Dial	Gerry	Owen	Swanson
Dillingham	Harreld	Page	Townsend
du Pont	Harris	Phipps	Weller
Edge	Harrison	Pittman	Williams
Elkins	Jones, N. Mex.	Poindexter	

So Mr. ROBINSON's amendment to the committee amendment was rejected.

The PRESIDING OFFICER. The question recurs on the committee amendment.

Mr. ROBINSON. On that, I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. GLASS (when his name was called). Making the same announcement as on the preceding vote, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. JONES of New Mexico (when his name was called). Making the same announcement regarding my pair and its transfer as on the previous vote, I withhold my vote.

Mr. JONES of Washington (when his name was called). Making the same statement as before with reference to my pair and transfer, I vote "yea."

Mr. ROBINSON (when his name was called). I transfer my pair with the senior Senator from West Virginia [Mr. SUTHERLAND] to the senior Senator from Missouri [Mr. REED] and vote "nay."

Mr. STANLEY (when his name was called). I am unable to obtain a transfer of my pair with the junior Senator from Kentucky [Mr. ERNST], and therefore withhold my vote. If at liberty to vote, I would vote "nay."

Mr. TRAMMELL (when his name was called). Making the same announcement as to the transfer of my pair as on the last vote, I vote "nay."

Mr. WALSH of Montana (when his name was called). Transferring my pair as on the preceding vote, I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. DIAL. I have a pair with the Senator from Michigan [Mr. TOWNSEND]. Being unable to obtain a transfer, I withhold my vote.

Mr. CARAWAY (after having voted in the negative). I have a pair with the junior Senator from Illinois [Mr. MCKINLEY]. That Senator has not voted. I am, therefore, compelled to withdraw my vote, as I can obtain no transfer. If permitted to vote, I would vote "nay."

Mr. MCCUMBER (after having voted in the affirmative). I desire to inquire if the junior Senator from Utah [Mr. KING] has voted?

The PRESIDING OFFICER. That Senator has not voted.

Mr. MCCUMBER. I transfer my general pair with that Senator to the junior Senator from Vermont [Mr. PAGE] and allow my vote to stand.

Mr. BALL. I transfer my general pair with the senior Senator from Florida [Mr. FLETCHER] to the junior Senator from Washington [Mr. POINDEXTER], and vote "yea."

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR].

The result was announced—yeas 39, nays 17, as follows:

YEAS—39.

Ball	Johnson	McLean	Rawson
Brandegee	Jones, Wash.	McNary	Shortridge
Broussard	Kellogg	Moses	Smoot
Bursum	Kendrick	Nelson	Spencer
Calder	Keyes	Newberry	Sterling
Cameron	Ladd	Nicholson	Wadsworth
Capper	Lenroot	Norbeck	Warren
Curtis	Lodge	Oddie	Watson, Ind.
Gooding	McCormick	Pepper	Willis
Hale	McCumber	Ransdell	

NAYS—17.

Ashurst	Myers	Simmons	Walsh, Mont.
Borah	Overman	Smith	Watson, Ga.
Glass	Pomerene	Trammell	
Heflin	Robinson	Underwood	
Hitchcock	Sheppard	Walsh, Mass.	

NOT VOTING—40.

Caraway	Ernst	King	Poindexter
Colt	Fernald	La Follette	Reed
Crow	Fletcher	McKellar	Shields
Culberson	France	McKinley	Stanfield
Cummins	Frelinghuysen	New	Stanley
Dial	Gerry	Norris	Sutherland
Dillingham	Harreld	Owen	Swanson
du Pont	Harris	Page	Townsend
Edge	Harrison	Phipps	Weller
Elkins	Jones, N. Mex.	Pittman	Williams

So the committee amendment was agreed to.

Mr. SMOOT. Mr. President, I now ask that we return to paragraph 912, page 127, which was passed over yesterday. There was one amendment in that paragraph which went over at the request of the senior Senator from North Carolina [Mr. SIMMONS]. It refers to labels for garments or other articles. I will say that the committee desire to strike out "50 cents per pound and" as the first amendment, and then to strike out "25" and insert "50," so that the clause will read:

Labels for garments or other articles, composed of cotton or other vegetable fiber, 50 per cent ad valorem.

The PRESIDING OFFICER. The first amendment will be stated.

The ASSISTANT SECRETARY. On page 128, line 10, the committee proposes to strike out "50 cents per pound and."

Mr. SMOOT. Mr. President, I desire to stat that under the existing law the rate is 25 per cent and under the Payne-Aldrich law it was 50 cents a pound and 30 per cent ad valorem. The committee, however, desire to strike out the compound rate and to have a straight ad valorem rate of 50 per cent. Even under the prices which prevailed in 1910, the equivalent ad valorem of 50 cents a pound and 30 per cent ad valorem amounted to 48 per cent.

I want to call the attention of the Senate to the fact that the importations of cotton labels for the year 1920 were as follows:

January, $245; February, $1,016; March, $837; April, $2,072; May, $3,127; June, $4,517; July, $6,724; August, $5,512; September, $3,871; October, $3,632; November, $2,350; December, $4,389; or a total importation for the year 1921 of $38,292.

Now, for the first five months of 1922 the importations were $63,402, or nearly twice what they were in the whole year of 1921. From the invoices and manifests which the committee have received there is no question of doubt that the goods are beginning to come into the United States in greatly increased quantities.

These labels are mostly made out of yarns of 120s. The duty imposed upon such yarn is 27 per cent. That only gives 23 per cent to cover the making of the labels of the finest thread and inserting the names or advertisements by weaving them into the cloth. I think under conditions existing to-day it is a little doubtful whether the domestic producers can hold their trade with a 50 per cent duty, considering the 27 per cent duty imposed upon the yarn.

Mr. SIMMONS. Mr. President, what was the amount of importations just given by the Senator?

Mr. SMOOT. For the first five months of 1922 they were $63,402; in other words, twice the amount of importations in 1910, twice the amount of importations in 1914, and nearly twice the amount of importations in 1921.

I have here [exhibiting] samples of the cloth, showing the German make and the American make. It takes a duty of all the way from 78 per cent up to over 228 per cent to equalize the prices of these labels as of last year when the Reynolds report was made. But, taking into consideration changed conditions, the committee felt that the producers could get along with 50 per cent. Of course, they do not think so, but any article of this character made of the fine yarns of which these are made and woven as they are will, I believe, be sufficiently protected with a 50 per cent rate of duty, which is not a high rate.

Mr. SMITH. Mr. President, I wish to call attention to the fact that under the present rate of duty, which is 25 per cent straight, the value of our importations ran as follows: 1914, $23,000; 1915, $15,000; 1916, $2,000; 1917, $8,000; 1918, $8,000; 1919, $5,000; 1920, $35,000; 1921, $38,000.

But we must remember that our domestic production amounted to about $624,000 worth. In addition to that, these labels are just the ordinary single-thread labels. They are made very readily here and they are not very difficult to make. It is only the very fine and difficult figures that are imported. We have not increased the duty on the kind of yarn out of which they are made to anything like the extent of the proposed duty here. This is increasing the duty 100 per cent.

Mr. SMOOT. The duty on the yarn is 27 per cent.

Mr. SMITH. Yes; 27 per cent; but it is proposed to now place a duty of 50 per cent, which is 100 per cent higher than the existing rate, and the importations into this country are a very small fraction of the amount produced here.

In addition to that, those that have the fine figures, such as faces and features of the face, are not produced in this country at all but are largely produced abroad. The United States Government itself imported some of these labels for the Army, because our mills were not equipped to make that particular kind of labels.

Mr. SMOOT. I think the Senator ought also to state that the Government importation was on account of the smallness of the order at that particular time which made it impractical to place the order in this country.

Mr. SMITH. Mr. President, that is the point I am making. The policy of mills and manufacturing plants in the United States is to standardize and to not deal in specialities and novelties; but it is now proposed to increase this duty from 25 per cent to 50 per cent, purely in the interest of those who are manufacturing the articles, for the statistics do not show that the competition is of any very serious import.

The Senator from Utah has called attention to the increase in importations in the first months of this year. Anyone with any degree of common sense knows that with the proposition pending of raising the duty on a certain kind of label to a point where it is going to act as an embargo, the importers are going to import all they can before the duty, under which the article can not get into this market at all, shall apply. That is the explanation of why foreign imports are now being rushed into our market.

I protest against doubling the present duty. If we had such an importation as practically to put our own people out of business, there might be some excuse for the majority party increasing the duty by the enormous difference between 25 per cent and 50 per cent, or 100 per cent over the prevailing rate. I have quoted during the period of the operation of the Underwood law the figures which show that the quantity imported into this country was negligible as compared with the domestic production and consumption.

Mr. SMOOT. But, I will say to the Senator, there were, of course, none coming from Germany at that time.

Mr. SMITH. They were not coming from anywhere.

Mr. SMOOT. Of course, they could not come from Germany; and it is Germany where these goods are principally made.

Let me call the attention of the Senator to the fact that the importation for the first five months of 1920 was 10 per cent of the entire domestic production in 1919, and during every month the importation has increased. For January the importation was $5,297; it increased in February to $13,000; it increased in March to $13,243; in April to $13,999; and in May to $16,935. The importations during those five months, including the low importations in January, were 10 per cent of the American production in 1919, not of the American production of to-day, because the mills have not been working half time. When that is taken into consideration, if the importations for five months amounted to 10 per cent of the domestic production in 1919, for the full year they would amount to a little over 20 per cent, and with a production now but half what it was in 1919 the importations would be 40 per cent of the goods used in the United States.

Mr. SMITH. Mr. President, in 1914 there was an importation of $23,000 worth.

Mr. SMOOT. In 1914 there was an importation of $32,750 worth.

Mr. SMITH. In 1915 the importations dropped to $15,000 worth.

Mr. SMOOT. Yes; Germany could not make any at all then, for she was at war.

Mr. SMITH. Then our importations rapidly declined until 1919; and in 1920 and 1921 we practically got back to the pre-war importations.

With the Government of the United States giving an order for labels for its own use, it is reasonable to suppose that the foreign producers had equipped themselves and had on hand a quantity of labels to dispose of in anticipation of the proposed prohibitory duty.

I maintain that the duties on yarns have been increased in no such ratio. Therefore to increase this duty from 25 per cent to 50 per cent is practically to prohibit any importations whatever, and to mulct the purchasers of these labels in whatever price the American manufacturer sees fit to charge. It is unfair to those who use this article. Even our own Government would have been forced to have paid this 50 per cent had the duty obtained at the time that it placed this foreign order.

Mr. SMOOT. I can show any Senator here a sample that has been taken from a shipment which has very recently arrived at New York. The selling price in Germany was 84 cents; the selling price in England was $1.22; and the cost of production in the United States was $2.42. I have the samples here and I am willing to show them to anyone. It would require the imposition of a duty of 188 per cent in order to equalize the cost of production as against German importations.

Mr. SMITH. Mr. President, in all conscience God knows the majority party have put a duty on everything that goes on the back of the human being just as high as they dare to put it. Even on those commodities which we generally manufacture in large quantities, including every form of cloth, the duties have been raised, and now when we come to the little, insignificant item of labels, which the makers of clothing use to indicate the maker, a duty has been piled upon them, so that the garments that the people wear, from the thread that goes in them to the little label that is sewn in the lining, a burden of taxation has been added. It is intolerable to think that every little device is hunted out for the purpose of imposing a tax upon it. I would not be at all surprised to find an effort being made to tax patches, in order to make the people who can not wear whole clothes, but who have got to patch them, pay a duty on the patches. It appears that the committee are actually hunting out labels, which are used as the distinctive mark of the manufacturer who makes the clothes, and are proposing to levy a very high duty on them. As a mountain is not made of one big rock but is made of sand particles and dirt particles, so the burden on the American people is made up of the taxes and profits on every little article, the aggregate of which spells the ruin and poverty of the American masses. Thank God this side of the Chamber is not a party to any such insidious imposition. Surely Senators on the other side could let the labels go into a suit of clothes which the poor man purchases without this intolerable system of burdening up to the limit everything which he has to buy.

Mr. SMOOT. It makes no difference whether it be little or whether it be great, the same story is told by Senators who oppose this bill about laying a burden upon the back of the individual. The cost of these labels is 84 cents a thousand. That means that the cost of a label upon a suit of clothes is one one hundred and twentieth of a cent; in other words, a man would have to buy 120 suits of clothes before a 1-cent burden would rest upon him.

Mr. SMITH. Mr. President, will the Senator allow me?

Mr. SMOOT. Certainly.

Mr. SMITH. One hundred cents make a dollar, but 99 cents do not. Every single measurement we have in the world is according to the unit standard; and it is the addition of the ones that spell the millions, and it is the addition of the little one-tenths that spell the millions of taxes that break the backs of the American people.

Mr. SMOOT. If the manufacturer who puts his label in a suit of clothes were compelled to pay for them, he would put them on just as quickly as if they were given to him.

Mr. SMITH. Then, the responsibility would be with the man and not with the legislative body of the United States.

Mr. SMOOT. There is a certain advertising value in such labels. That is what they are used for. When you buy a suit of clothes from the Kuppenheimer Co., we will say, you will find on the coat a cotton label which advertises the Kuppenheimer Co., of Chicago, Ill., as the maker. So labels are put in the fancy sealskin coats, for which ladies pay from $1,500 or $1,600, perhaps, the label costing one one-hundred-and-twentieth of 1 cent. Does the Senator think that a sealskin coat is going to sell for $1,600, plus one one-hundred-and-twentieth of a cent?

Mr. SMITH. No; Mr. President, I think the manufacturer will take advantage of that one one-hundred-and-twentieth of a cent and add 10 cents to the price.

Mr. SMOOT. I do not think the Senator would contend that the coat would be sold for $1,600.10.

Mr. President, the only question involved is whether or not we want to make labels in this country. If we want to make them here, we have got to provide the proposed rate of duty, and I doubt very much whether that rate of duty will keep out the goods from Germany. It is ample so far as England is concerned. The English price compared to the German price is 84 cents as against $1.22 on the same article, some samples of which I have here which were collected at the port of entry upon an importation just a short time ago.

Mr. SIMMONS. Mr. President, if this is a matter of such insignificance to the consumer, it must be a matter of like insignificance to the manufacturers.

Mr. SMOOT. It is not if there are three or four manufacturers who have all they have in the world invested in this business. What about the thousand employees? I may add that the production in 1919 was $624,000 worth.

Mr. SIMMONS. Mr. President, I did not yield to the Senator. He did not ask me to yield to him.

Mr. SMOOT. I beg the Senator's pardon.

Mr. SIMMONS. What the Senator has said in substance is that the interests of three or four manufacturers in this country are more important than the interests of 110,000,000 people.

Mr. SMOOT. Oh, well——

Mr. SIMMONS. Mr. President, it is "oh, well." I myself, like the Senator from South Carolina, am utterly amazed at the dragnet which has been thrown out to gather up for the purpose of taxation the most insignificant items. According to the Senator from Utah, this is a very trifling item so far as those who have to buy it is concerned, but it is sufficiently important where it affects the interest of two or three manufacturers to make the Senator exceedingly anxious, in their interest, to secure these very high rates.

But, Mr. President, I did not rise for the purpose of discussing this matter. I know nothing about it; I should not have bothered with it—it is a very small item, it is true—but for the fact that I received a telegram a few days ago which I had read into the RECORD. It was because of that telegram that I asked that this matter go over until I could look a little more carefully into it. That telegram came, as I recall the name, from the firm of Kitts & Kitts, and declared that the duty proposed by the committee upon this particular item was, as I remember, either 146 or 148 per cent. It struck me that 146 per cent or 148 per cent, whichever it might have been—and it was one or the other, I am quite sure—was practically a prohibitory duty to impose upon this product.

Mr. SMOOT. That is the compound duty of the House.

Mr. SIMMONS. That is the duty as you had it written in the bill at that time.

Mr. SMOOT. We changed it to 60 per cent, and now to 50 per cent.

Mr. SIMMONS. The duty which you had written in the bill at that time was 50 cents per pound plus 25 per cent ad valorem, and that is the duty to which I understood the sender of this telegram was referring.

Mr. SMOOT. I do not know what he was referring to, but the committee made it 60 per cent ad valorem.

Mr. SIMMONS. But the Finance Committee raised the House rate. The House rate was 50 cents per pound and 20 per cent ad valorem. The Senate retained the 50 cents a pound and made it 25 per cent ad valorem.

Mr. SMOOT. Originally.

Mr. SIMMONS. Originally. That was the rate at the time this telegram was received. The Senator had not announced any change in the rate at that time.

Mr. SMOOT. It had been published, but this man had not seen it, I presume.

Mr. SIMMONS. I had not seen it and he had not seen it. That is the rate to which he is referring. The Senator's committee proposed a rate upon this little item of practically 146 per cent. The Senator now comes in and says that they are willing to strike out that part of the duty which imposes a

duty upon the pound basis—namely, 50 cents a pound—and yet at the same time they insist upon raising the ad valorem rate from 25 to 50 per cent.

Mr. President, 50 per cent has always been regarded as a very high rate. I am not able to say whether, compared with other rates in this bill, it is too high or not. I think probably it is about on a parity with the other rates in the bill. Almost all of them are too high. This seems to be unwarranted, in view of the fact that heretofore importations have been kept out almost entirely by a 25 per cent rate. Now, the committee are doubling that; they are increasing it 100 per cent; and they say they are doing that because Germany has gotten into the market again. Before the war we were competing with Germany on a 25 per cent rate and keeping out the German product.

There may have been, and I think there was, a short time when Germany was making goods and trying to sell them throughout the world at really less than the cost of production in Germany; but I do not think that condition exists now, and I do not think it can continue to exist. Germany is in no condition to be making and selling goods to the outside world for less than the cost of production. Germany is now in a state of absolute economic and financial collapse, and I do not think we need to be legislating here altogether upon the basis of financial and economic conditions in Germany. In my judgment there is nothing serious for us to fear, especially in the immediate future, from that country. If there is any country in the world to-day that is in a state of absolute collapse it is Germany, and I am very much afraid that that condition is going to continue for a long time to come.

In any event, I feel ashamed of the fact that not a single thing mentioned in this bill that can be produced in Germany is brought here and held up before the Senate as an article as to which we are able to compete with that poor and distracted country. It makes me ashamed of my own country; it causes me to distrust the proud boast that we have indulged in for years as to our efficiency and our ability to compete with the world in production, to be told that we can produce nothing in this country now with safety unless we tie the hands of Germany; that our own commercial and industrial safety in this country depends upon our making it impossible for that crippled and disabled country to ship us any of its products.

That argument is persisted in here from day to day, in the face of the fact that our imports from Germany are shrinking and not growing; that we are shipping to Germany and selling in German markets, below the German price or in competition with the German products, four times as many goods as we are buying from Germany. It is a miserable bogy; it is a sham and a fraud; it is an insult to the American people and a reflection upon the American Government.

Mr. President, I am not going to make any further contest about this matter. I had intended to write to these gentlemen who telegraphed me and request them to send me some additional information about this little matter, because I believe that an injustice can be done about a small thing as well as about a big thing, and, so far as I am concerned, I hate a little mean thing more than I do a big mean thing; but I have not written to them as I intended to, and I have not gotton the information. This matter will come up again in the Senate, however, and meanwhile I will get the information; and if I find that it is of a character that justifies me in calling it to the attention of the Senate when the matter reaches the Senate, I shall do so, as small as it is, because I want to say here now that there is no taxpayer in America that I am not ready to stand up here and defend; there is no item that the American people consume that is so small that I am not ready to stand here and insist that the user of that product shall not with my consent and without my protest be unjustly mulcted, taxed, and robbed.

Mr. SMOOT. Mr. President, in answer to the Senator I want to say only one word. There is no laboring man in the United States that I am not willing to protect; and when wages in Germany are one-tenth of what they are in this country, and the labor itself can run a machine just as well in Germany as it can in this country, and there is just as efficient labor employed in making these particular goods, I would rather protect the 1,000 employees that are employed in making these goods than to give all of that labor and our money as well to any other country; I do not care whether it is Germany or any other.

The PRESIDING OFFICER. The question is on the proposed amendment striking out "50 cents per pound and."

The amendment was agreed to.

The READING CLERK. On the same line it is proposed to strike out "20" and insert "50."

The amendment was agreed to.

Mr. SMOOT. Mr. President, the next amendment passed over is in paragraph 913.

The PRESIDING OFFICER. The amendment of the committee will be stated.

The READING CLERK. In paragraph 913, on page 128, line 16, it is proposed to strike out "35" and insert "60," so as to read:

Knit fabric, in the piece, composed wholly or in chief value of cotton or other vegetable fiber, made on a warp-knitting machine, 60 per cent ad valorem.

Mr. SMITH obtained the floor.

Mr. SMOOT. Mr. President, if the Senator would like to have me do so, I will make a brief statement as to this paragraph; but, if not, I do not want to take the time of the Senate.

Mr. SMITH. I shall be glad to have the Senator make it.

Mr. SMOOT. Mr. President, this is the knit fabric out of which cotton gloves are made. The cloth never was made in America until during the war. Most of the large glove manufacturers in the United States made this cloth during the war. The small ones depended upon its being made in other mills in the United States.

The general public do not buy a yard of this cloth. Whatever tax they pay comes in the tax upon the gloves. It is a highly finished article. It contains very fine threads, and every yard of the cloth is made into cotton gloves. The next paragraph provides for the duty upon cotton gloves.

To-day every concern in the United States making this cloth is at a standstill. That is very natural, because every glove manufacturer in the United States is at a standstill. Even the glove manufacturers themselves have been compelled to import the gloves from Germany in order to try to hold their own customers. I do not think 10 per cent of the glove manufacturers in the United States are operating their factories to-day. I am speaking now of cotton gloves. When we reach the kid-glove schedule I will make another statement in relation to them; but the cotton-glove industry in the United States to-day is absolutely paralyzed. There is little left, and this is the cotton cloth from which those gloves are made. The committee felt that if we were going to maintain a cotton-glove industry in the United States it was absolutely necessary to make in this country the cloth from which the gloves are made, otherwise the manufacturers would be at the mercy of the country that made the cloth.

The 60 per cent ad valorem duty perhaps seems to be a high rate of duty. The manufacturers, under the conditions that existed here in 1921, showed figures to the effect that over 100 per cent duty would be necessary; but things have changed, and the committee recognized that fact. The changes that are made daily here are made not because of the criticism of the bill but because the committee recognize that there have been changes in Europe, and that conditions exist now that did not exist particularly during the early part of 1921.

Mr. SMITH. Mr. President, if the Senator has concluded his statement——

Mr. SMOOT. I want to say to the Senator that if he looks at the statistics as to importations he will find, of course, no importations of this cloth, because no gloves have been made in the United States. As I say, the industry is paralyzed.

Mr. SMITH. The Senator is wrong. This knit cloth is the material out of which the gloves are made, and as soon as the Senator gets through with his statement I will be glad to make one.

Mr. SMOOT. One statement I did make in the beginning was that this cloth is used only for making cotton gloves. It is not used for any other purpose, and there are no importations, because of the fact that there have been no gloves made in this country in recent years. If you go to Gloversville you will see a whole city paralyzed, and at all the other places where they make cotton gloves the mills are at a standstill. The only question for us to decide is whether we want to maintain this industry in the United States or let it perish. The committee thinks that with a 60 per cent duty they can make the cloth. If it were 50 per cent or 60 per cent, it would not make any difference whatever in the duty upon the gloves, which the committee intends to offer an amendment to cover.

Mr. SMITH. Mr. President, I take this from the report of the Department of Commerce, released for immediate use:

Knitted cloth—

Out of which the gloves are made—

showed the largest increase of any group of knit goods in quantity of production, with 253.5 per cent more square yards for 1919 than in 1914.

Mr. SMOOT. Certainly.

Mr. SMITH (reading)—

And for these respective years formed 8.3 per cent of the total value of the knitted goods industry.

Mr. SMOOT. I agree with that.

Mr. SMITH. I want to read still further from the Tariff Information:

Practically all of the glove establishments make their own suèded fabric, so that very little is offered for sale. Hence the census figures for 1919—165,000 square yards, valued at $380,000—represent only a small proportion of the total, which was estimated at over 1,000,000 square yards for that year.

Mr. SMOOT. That is just what I stated as to 1919. I will say to the Senator again that to-day the mills are at a standstill because there are no gloves to speak of made in the United States.

Mr. SMITH. According to the Tariff Commission there has been an extraordinary importation of gloves during the last year; but the Senator does not pretend to say that up to the time of this extraordinary condition which exists now, in view of the vast amount which must necessarily have been produced for obvious reasons during the war, in view of the probability of this tariff bill being passed, whatever surplus they may have would be poured upon the market?

Mr. SMOOT. They did not have a surplus. In fact, I know of institutions which placed their orders for gloves in Germany a year ago and have not gotten them yet. They have no surplus.

Mr. SMITH. To be perfectly frank, there has been a larger importation of gloves into this country in the last year than perhaps in any other year; but the point I am making is this, that there has been no such condition before in the history of the glove business. We had a duty of 30 per cent on this character of goods. There had been no such danger of flooding this country until this last year. In order to meet an extraordinary condition we raised the duty 100 per cent.

Mr. SMOOT. If the Senator will turn to the statistics of importations before the war, under the Payne-Aldrich law, he will find that there was an immense amount imported compared to importations of other items in the cotton schedule.

Mr. CALDER. If the Senator will permit me, in 1914 the importation of these cotton suède gloves amounted to 1,500,000 pairs and in 1915 to 1,513,000 pairs. It dropped to 112,000 pairs in 1917.

Mr. SMOOT. They could not import them then.

Mr. CALDER. They could not get them in. Nearly all the goods come from Saxony; they are made in other parts of Germany also.

Mr. SMOOT. The whole story is told in the conditions existing at the mills. Just ask the employees of any glove-manufacturing concern in this country. They will tell you the condition.

Mr. SMITH. I got the figures from the Tariff Information Survey, and on the cotton gloves in 1914 we had 1,511,000 pairs, and in 1921 we had only 1,164,000 pairs. I have not the figures of the domestic production here. Of the knitted gloves and mittens, except the suèded, we produced in his country in 1919 3,408,000 pairs, and we imported 1,411,000 pairs. It does not state whether those were of the suèded variety or whether they were just the ordinary, common glove.

Mr. SMOOT. They were all kinds of ladies' cotton gloves.

Mr. SMITH. The total value was $2,161,000 against $18,000,000, the value of the domestic production.

Mr. SMOOT. Not of common cotton gloves.

Mr. SMITH. It says knitted gloves and mittens, except suède, 3,408,000, valued at $18,469,000.

Mr. CALDER. In one year?

Mr. SMITH. This is for the years 1919 and 1914. It gives the quantity and value.

Mr. SMOOT. Five dollars a dozen?

Mr. SMITH. That is the figures they have given here.

Mr. SMOOT. Somebody has made a mistake.

Mr. SMITH. It is not my mistake.

Mr. SMOOT. I did not claim it was the Senators' mistake.

Mr. SMITH. This is per dozen pair, $18,469,000, quantity value.

Mr. HITCHCOCK. What is the price?

Mr. SMOOT. Even to-day they are $1.20.

Mr. SMITH. This is per dozen pair.

Mr. SMOOT. I am speaking of the price per dozen. I can show the Senator the price to-day. These gloves [exhibiting] are a dollar a dozen to-day and the better grade cost $1.20. I have the invoices for them.

Mr. SMITH. Of the suède gloves there were 163,000 pairs and the price was $1,062,000, so that the parity seems to be about correct.

Mr. CALDER. What year was that?

Mr. SMITH. In the year 1919, according to the statement of the Department of Commerce. We produced 163,000 dozen, and the value of 163,000 dozen was $1,062,000.

Mr. WADSWORTH. The Senator will admit that the production in the United States of 163,000 dozen is scarcely a drop in the bucket in comparison with the consumption.

Mr. POMERENE. Mr. President, I have just come into the Chamber. May I ask the Senator from South Carolina what class of gloves is being referred to?

Mr. SMITH. Cotton gloves.

Mr. POMERENE. The Summary of Tariff Information, on page 886, shows that—

Production values of various kinds of cotton gloves for 1918 were estimated as follows: Work gloves, $4,000,000 to $5,000,000, the bulk produced in the Middle West; gloves of "circular" cloth, $500,000; lisle gloves, $2,000,000; and suèded cotton gloves, $8,450,000 (1,300,000 dozen pairs).

Mr. WADSWORTH. That is correct.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER (Mr. MOSES in the chair). Does the Senator from South Carolina yield; and if so, to whom?

Mr. SMITH. I yield to the Senator from Arkansas.

Mr. ROBINSON. Will the Senator from Ohio, if he has the information available, or the Senator from New York, if he has it, furnish the Senate a statement of the domestic production of this commodity as compared with the consumption? The Senator from New York has referred to the fact that the production is small as compared with the consumption.

Mr. POMERENE. Mr. President, I have a memorandum prepared by the experts employed by the committee, and it might be interesting, possibly, if I am not interfering with the Senator from South Carolina, to submit it.

Mr. SMITH. I yield for that purpose.

Mr. POMERENE. It relates to paragraph 914, and, under the title "Cotton goods made of fabric," states:

COTTON GLOVES MADE OF FABRIC KNIT ON A WARP KNITTING MACHINE.

House rate: 40 per cent.

Senate rate: If single fold of such fabric and not over 11 inches in length, $2.50 per dozen pairs (changed in committee); and for each additional inch in excess of 11 inches, 10 cents per dozen pairs. If two or more fold of such fabric and not over 11 inches in length, $3 per dozen pairs (changed in committee); and for each additional inch in excess of 11 inches, 10 cents per dozen pairs.

Payne-Aldrich rate: 50 per cent.

Present rate: 35 per cent plus 7 cents per pound for long-staple cotton.

The proposed Senate rate as given above is equivalent to 119 per cent. Cotton gloves may be divided into four classes:

(1) Canvas or flannel work gloves.
(2) Gloves made from tubular (circular) knit fabric.
(3) Lisle gloves.
(4) Suède cotton gloves made of knit (Atlas) cloth.

This Atlas cloth is a fabric knit on a warp knitting machine. The latter class overshadows all other in interest so far as concerns its relation to the tariff. The tariff has never affected the manufacture of work gloves to any extent and the other classes of gloves mentioned are produced and used in the United States in relatively unimportant quantities.

This is the matter in which the Senator is interested:

DOMESTIC PRODUCTION.

Several million dollars worth of work gloves are produced annually in this country, although the total output is difficult to estimate.

Mr. SMOOT. That has nothing to do with this schedule. Men's working gloves fall in another schedule. We can make those almost as cheaply as they can be made in any country in the world.

Mr. POMERENE. We were talking about cotton gloves. That is just one matter I wish to call to the attention of the Senate. I do know that these cotton gloves are produced here in very, very great quantities. A great many of them are produced in my own State.

Mr. WADSWORTH. When I made the observation a moment ago that 163,000 dozen was but a drop in the bucket compared with the consumption, my remark was directed to the suède glove, and that is what this paragraph affects.

Mr. POMERENE. Senators were not explicit about that; but while I am on the floor I will take just a moment further of the time of the Senate. This memorandum continues:

These gloves are very often made of a combination of woven cloth and leather, and the component material of chief value being as often leather as it is cloth. The value of the annual production of work gloves made entirely of woven cotton cloth may be conservatively estimated at $3,000,000 to $4,000,000. The value of the annual output of gloves made of tubular knit fabric is about $400,000. The value of the output of lisle gloves is small. It is estimated that 1,300,000 dozen pairs of suède cotton gloves, valued (price at factory) at $8,450,000, or $6.50 per dozen pairs, were manufactured in 1918.

Mr. SMOOT. The Senator will notice when I offer the amendment to the glove paragraph that men's gloves or women's gloves spoken of are made of woven fabric and are given only 25 per cent ad valorem.

Mr. POMERENE. Will not the Senator place that amendment in the RECORD?

Mr. SMOOT. I will have it all go in the RECORD when we reach the glove paragraph.

Mr. POMERENE. Very well.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the committee.

The amendment was agreed to.

The READING CLERK. The next amendment is, on page 128, in line 17, to strike out "23" and insert "35," so as to read:

Made on other than a warp-knitting machine, 35 per cent ad valorem.

The amendment was agreed to.

Mr. SMOOT. I now send to the desk a substitute paragraph for paragraph 914.

The PRESIDING OFFICER. The substitute paragraph will be read for the information of the Senate.

The READING CLERK. On page 128, strike out all of the matter beginning with line 19, down to and including line 4, on page 129, and insert in lieu thereof the following:

PAR. 914. Gloves, composed wholly or in chief value of cotton or other vegetable fiber, made of fabric knit on a warp-knitting machine, if single fold of such fabric, when unshrunk and not suèded, and having less than 40 rows of loops per inch in width on the face of the glove, 50 per cent ad valorem; when shrunk or suèded or having 40 or more rows of loops per inch in width on the face of the glove, and not over 11 inches in length, $2.50 per dozen pairs, and for each additional inch in excess of 11 inches, 10 cents per dozen pairs; if of two or more folds of fabric, any fold of which is made on a warp-knitting machine, and not over 11 inches in length, $3 per dozen pairs, and for each additional inch in excess of 11 inches, 10 cents per dozen pairs; made of fabric knit on other than a warp-knitting machine, 50 per cent ad valorem; made of woven fabric, 25 per cent ad valorem.

Mr. SIMMONS. Mr. President, I wish to ask the Senator from Utah a question. He has just presented this amendment. It is an exceedingly complicated amendment. No one can understand it from hearing it read at the desk, and if one understands it he has no opportunity to study it. I submit to the Senator that under the circumstances he ought not to ask that the amendment, which is entirely new, be taken up without some opportunity to study it.

Mr. SMOOT. May I explain it, and then if the Senator asks that it go over I shall of course consent?

Mr. SIMMONS. I may say to the Senator from Utah that I am compelled to leave the Chamber in about 10 minutes.

Mr. CALDER. May I suggest to the Senator from North Carolina that it is the same as the amendment which the Senator from Utah offered the other day.

Mr. SMOOT. It is substantially the same with the exception that the rates are lower than there printed.

In the first bracket, where we have 50 per cent ad valorem, the gloves are unshrunk and not suèded. The lower grade costs $1 a dozen and the higher grade $1.20. They are commonly known as funeral gloves.

Mr. CALDER. And used by elevator boys.

Mr. SMOOT. I have here a letter from the largest importer in the United States. Of course he complained of the $2.50 rate on them, and he was right. He suggested that we put in the pending provision, and the Senate committee accepted the suggestion and imposed a rate of 50 per cent on those gloves. Even the importer himself is satisfied.

Mr. POMERENE. Who made the suggestion?

Mr. SMOOT. Theo. Deiddeman & Sons, importers, of New York.

Mr. POMERENE. He made the suggestion to the committee?

Mr. SMOOT. He suggested they would not object to 50 per cent.

Mr. POMERENE. When was this suggestion made?

Mr. SMOOT. On June 21, 1922.

Mr. POMERENE. What reduction does the Senator think that makes?

Mr. SMOOT. On these gloves it would make over 50 per cent reduction.

Mr. CALDER. Yes; 50 per cent reduction.

Mr. POMERENE. The statement furnished me was to the effect that the average duty under this amendment, as it was reported by the Finance Committee, would be about 119 per cent. Is that substantially correct?

Mr. SMOOT. That would be substantially correct if we took the lowest price at which they were imported. In other words, they import gloves at 90 cents a dozen, and at that price the Senator's figures are about correct. The general class of glove imported is $1 a dozen, and, as I said, there is a 50 per cent reduction on that glove.

Mr. HITCHCOCK. Mr. President, will the Senator answer this question? Is there any cheaper glove than that made?

Mr. SMOOT. There is no cheaper glove of this type coming into the United States. These are the unsuèded gloves.

Mr. HITCHCOCK. It is proposed to put a 50 per cent tariff on the cheapest glove that is made—used by elevator boys?

Mr. SMOOT. Oh, there are cheaper gloves made from the woven fabric. We only put 25 per cent on those. These are made from knitted fabric.

Mr. HITCHCOCK. This glove is not sold for 10 cents a pair?

Mr. SMOOT. Oh, no; this glove could not be bought at retail anywhere for less than 25 cents a pair.

Mr. HITCHCOCK. I understood the Senator to say they sold at 10 cents apiece in Germany.

Mr. SMOOT. That is the manufacturer's selling price.

Mr. HITCHCOCK. So that, practically speaking, it is the cheapest glove in common use.

Mr. SMOOT. Oh, no. That is the one made from the woven fabric.

Mr. HITCHCOCK. What is that glove used for?

Mr. SMOOT. It is used by workingmen and by many working girls. The others are not supposed to be working gloves.

Mr. ROBINSON. When the Senator speaks of the price being 25 cents apiece, does he mean per glove or per pair?

Mr. SMOOT. Per pair.

Mr. HITCHCOCK. At $1.20 a dozen in Germany and here they retail for 25 cents a pair?

Mr. SMOOT. Yes.

Mr. HITCHCOCK. Is the material out of which that glove is made grown in the United States?

Mr. SMOOT. Oh, yes. This is made of cotton.

Mr. HITCHCOCK. Yet we have put a 50 per cent tariff upon an article the material of which is grown in the United States?

Mr. SMOOT. Yes.

Mr. HITCHCOCK. In the Senator's opinion, practically the cheapest glove that comes in has to have a protective tariff of 50 per cent, although the material out of which it is made is grown in the United States.

Mr. SMOOT. It is not the cheapest glove.

Mr. HITCHCOCK. The material itself is made by machinery?

Mr. SMOOT. Part of it, of course. The fabric itself is made by machinery.

Mr. HITCHCOCK. Is it an infant industry?

Mr. SMOOT. No; I could not say that it is an infant industry.

Mr. HITCHCOCK. It is an adult?

Mr. SMOOT. It has been in operation in the United States for a good many years.

Mr. HITCHCOCK. How long have we been giving it this protection?

Mr. SMOOT. It was given a greater protection in the Payne-Aldrich law.

Mr. HITCHCOCK. Will the time ever come when it will be possible in the United States to make, largely by machinery, an article out of material raised in the United States under some sort of reasonable revenue tariff?

Mr. SMOOT. Not where the cost of labor is such a large part of the cost of the article. It never can be done with high wages in the United States as compared to wages in foreign countries.

Mr. HITCHCOCK. What percentage is the labor cost in the glove?

Mr. SMOOT. I should think the labor is 80 per cent.

Mr. HITCHCOCK. The Senator has the census report?

Mr. SMOOT. I do not think there is any question about it. The Senator could see the cotton that is in the glove which I now exhibit to him. One dozen pairs of them would not weigh half a pound.

Mr. HITCHCOCK. The material is not made by hand labor?

Mr. SMOOT. No.

Mr. HITCHCOCK. It is made by machinery, is it not?

Mr. SMOOT. But the machinery requires hand labor to run it.

Mr. HITCHCOCK. The German buys his cotton in the United States, takes it to Germany, makes the material over there by machinery, and sends it over here, and we can not compete without a 50 per cent protective tariff.

Mr. SMOOT. It is not all made in that way.

Mr. CALDER. One glove is made of long-staple cotton and the other is not.

Mr. HITCHCOCK. We are talking about the gloves made of cotton grown in the United States.

Mr. SMOOT. Here is one [exhibiting] at $1.20 a dozen and made of long-staple cotton.

Mr. HITCHCOCK. Then, there is no such thing as the industry ever getting out of the infant class.

Mr. SMOOT. There will be no time in the history of America when the wages here are three or four or five times the amount of the wages paid in Germany, when the articles consist of 80

per cent labor, that it can be sold in competition with Germany, no matter whether the raw product is purchased in the United States or anywhere else in the world.

Mr. HITCHCOCK. So it amounts to this, that the elevator boys and the elevator girls, living on the lowest possible wages, have to buy a glove subjected to a tariff duty of 50 per cent.

Mr. SMOOT. I am not going into the question where the profits are found.

Mr. WALSH of Montana. Mr. President, I want to inquire of the Senator from Utah just what part of these gloves is the product of hand labor and what part of machine work?

Mr. SMOOT. A part of the sewing, not all of it, is by hand.

Mr. WALSH of Montana. Does the Senator say the cutting is done by hand?

Mr. SMOOT. A part of it. It is not a question of the glove above the hand portion. That portion is by machine. The difficult part is in the hand and finger part of the glove.

Mr. WALSH of Montana. I had the impression that all gloves were cut by regular stamps.

Mr. SMOOT. They are, outside of the finger part of the glove.

Mr. WALSH of Montana. The fingers are cut by machinery, are they not?

Mr. SMOOT. They are not all cut by machinery, I will say to the Senator.

Mr. WALSH of Montana. It is my impression that they do. However, all the sewing is done by machinery. There is no sewing on them by hand?

Mr. SMOOT. Most of it is done by machinery, I will say to the Senator.

Mr. WALSH of Montana. But is there any hand sewing on the glove at all?

Mr. SMOOT. A part of it is hand sewing.

Mr. WALSH of Montana. There is not a feature of it that is handwork except the putting on of the thumb?

Mr. SMOOT. I was discussing the amount paid to run the machines, and that requires handwork.

Mr. WALSH of Montana. I am asking for information; that is all.

Mr. SMOOT. I am discussing the amount of wages that is paid for making a dozen pairs of gloves. That constitutes 80 per cent of the cost of the gloves.

Mr. WALSH of Montana. I want to understand whether those wages are paid for operating the machine or for doing the handwork?

Mr. SMOOT. Mostly for operating the machine. That makes no difference, because the wages of the operator of the machine here are about ten times the amount paid in Germany.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the committee.

Mr. POMERENE. Just a moment, Mr. President. I thought the Senator from Utah was going on with his explanation of the meaning of these various rates.

Mr. SMOOT. I will only take a very few moments.

The next rate provided for in the amendment is on gloves when shrunk or suèded or having 40 or more rows of loops per inch in width on the face of the glove, and not over 11 inches in length, where the rate of duty is $2.50 per dozen pairs. The Senate committee imposed upon that glove a rate of $3 per dozen pairs when reporting the bill to the Senate.

Mr. POMERENE. Let me ask the Senator a question there. Reduced to an ad valorem duty, what does the $2.50 mean?

Mr. SMOOT. Does the Senator mean the equivalent ad valorem?

Mr. POMERENE. Yes; the equivalent ad valorem.

Mr. SMOOT. That would depend upon the price of the glove.

Mr. POMERENE. I understand that; but it means a good deal in trying to determine the relative merits of the proposed amendment as compared with the original amendment offered by the Finance Committee.

Mr. SMOOT. I will say to the Senator that this is about the way they run. They run all the way from 35 per cent upon the cheapest of that class of goods to about 78 or 79 per cent. That is about the way the rate will apply when reduced to equivalent ad valorem.

Mr. POMERENE. Then why is it that they make the cheaper grade of a certain class pay an ad valorem duty of 50 per cent, which is a reduction of perhaps 100 per cent or more from the rate originally reported by the Finance Committee, and on the other grades they make the rate vary from, I think the Senator said, 35 per cent to 78 or 79 per cent?

Mr. SMOOT. Of course, the Senator will notice in the amendment that for each inch over and above the 11-inch length of glove there is 10 cents per inch added. The first length of glove is usually 11 inches, which is a short glove. The next is 14 inches, then 17 inches, then 20 inches, and then 24 inches, which is the shoulder glove. For every inch added above 11 inches there is 10 cents a dozen added to the duty imposed.

Mr. POMERENE. How much of a reduction is that?

Mr. SMOOT. Under the proposed amendment it would be about 16⅔ per cent.

Mr. POMERENE. That is, if I understand the Senator correctly, comparing the pending amendment with the House bill?

Mr. SMOOT. Comparing it with the amendment as reported by the committee in the first instance.

Then, Mr. President, as I have said, as to gloves made of woven fabrics, the committee reduced the 40 per cent duty to 25 per cent. Those are the common ordinary workmen's gloves, provision relative to which is found in the very bottom line of the proposed amendment.

Mr. POMERENE. I understood the Senator from Utah to say that the 50 per cent ad valorem rate covered workingmen's gloves. Did I misunderstand him?

Mr. SMOOT. No; those are the knit gloves, and the duty on the woven fabric is only 25 per cent.

Mr. POMERENE. But it is a complete change in the rates. The Senator from North Carolina [Mr. SIMMONS] asked that this matter go over, after the Senator from Utah shall have finished his discussion, and I wish to join in that request.

Mr. SMOOT. I did not know that the Senator from North Carolina wished the matter to go over now. Does the Senator from Ohio desire that it go over?

Mr. POMERENE. I should like this matter to go over until I can look a little further into it in the morning. I may have something to say on it in the morning; but if I do I shall be very brief. I think, however, in view of the complete change which is proposed, the matter should go over until we can have an opportunity to learn something more about it.

Mr. SMOOT. Why should not the Senator from Ohio permit the amendment to be agreed to, and then, if he wishes to reconsider the matter to-morrow after examining the amendment, I shall have no objection to that being done?

Mr. POMERENE. I first wish to examine these surveys on the subject which I have received and to confer with some of the experts about the matter, so I would rather have the amendment go over until morning.

Mr. McCUMBER. At this time I ask unanimous consent that when the Senate closes its session on this calendar day it recess until to-morrow at 11 o'clock a. m.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. The pending amendment proposed by the Committee on Finance goes over by unanimous consent.

Mr. SMOOT. Paragraph 919 was passed over by the Senate, and I should like to ask that the amendment in that paragraph be further passed over until we reach paragraph 1430, in which laces are covered. Whatever the committee finally decides upon as to duties on laces in paragraph 1430 will have a bearing upon the rates to be imposed upon the items in paragraph 919. I ask, therefore, that paragraph 919 be passed over.

The PRESIDING OFFICER. Without objection, the paragraph will be passed over. The next committee amendment will be stated.

Mr. SMOOT. The next committee amendment is in paragraph 918.

The ASSISTANT SECRETARY. On page 130, paragraph 918, line 25, before the words "per centum," the Committee on Finance proposes to strike out the numerals "33⅓," and in lieu thereof to insert the numerals "45," so as make the paragraph read:

PAR. 918. Clothing and articles of wearing apparel of every description, manufactured wholly or in part, composed wholly or in chief value of cotton, and not specially provided for, 45 per cent ad valorem.

Mr. SMOOT. On behalf of the committee I move to substitute the numerals "35" for the numerals "45."

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Utah to the committee amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The PRESIDING OFFICER. The next amendment proposed by the Committee on Finance will be stated.

The next amendment proposed by the Committee on Finance was, on page 131, line 2, before the word "cents," to strike out the numeral "25" and in lieu thereof to insert the numeral "35," so as to read:

Shirt collars and cuffs, of cotton, not specially provided for, 35 cents per dozen pieces.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. ROBINSON. I think the Senator from Utah ought to explain this amendment. I had understood that he was just about to submit an explanation of it.

Mr. CALDER rose.

Mr. SMOOT. The Senator from New York is familiar with the amendment. I will ask him to explain it. I will, however, say to the Senator from Arkansas that the Committee on Finance have decided to modify the amendment by striking out "15 per cent ad valorem" and in lieu thereof inserting "10 per cent ad valorem."

Mr. ROBINSON. But the Senate was about to vote on the original committee amendment.

Mr. SMOOT. The first amendment is a proposition to impose a duty of 35 cents per dozen. The ad valorem duty is what counts. The duty will only apply to specialities which are imported here.

Mr. SMITH. Mr. President, I have not particularly studied any of the last few paragraphs of the bill, but it might be well to call the attention of the Senate to the fact that we imported about $49,000 worth of these articles, as against a domestic production of $341,789,000 worth.

Mr. SMOOT. I will say to the Senator from South Carolina that this is purely a revenue duty. The ordinary collars and cuffs are made in the United States and a great many of that style are exported, but there are certain styles of collars and cuffs which are imported into this country. Some people want the foreign article; they do not want to wear the style of collar and cuff that is made here. The imported articles being specialties of the highest type, why not get a little revenue out of their importation?

Mr. CALDER. Mr. President, I should like to add a brief statement. The duty now proposed by the committee is 35 cents per dozen specific and 10 per cent ad valorem; the rate under the Payne-Aldrich law was 45 cents a dozen and 15 per cent ad valorem, and the rate under the Underwood Act was 60 per cent. Under the amendment to be proposed by the committee the equivalent ad valorem will be 27 per cent, which is 3 per cent less than the rate in the present law.

I can only add what the Senator from Utah has stated in connection with importations and production——

Mr. WALSH of Montana. Mr. President, I should like to ask the Senator from New York a question.

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Montana?

Mr. CALDER. I do.

Mr. WALSH of Montana. The Senator from Utah has told us that the importations are only of specialties and that we would derive some revenue from the duty. I wish to inquire if the Senator from New York speaks in favor of the rate from a revenue standpoint, or is he desirous of protecting some producers of this commodity in the United States?

Mr. CALDER. I am for the rate from a revenue standpoint, but I am also desirous of having a moderate and reasonable rate that will not encourage large imports from abroad.

Mr. WALSH of Montana. I merely wanted to satisfy myself as to whether the Senator desired to have a rate which would enable the domestic producer to charge an additional price for his product.

Mr. CALDER. May I add again that this rate is 3 per cent less than the rate carried by the Underwood Act?

Mr. WALSH of Montana. That is not an answer to the question which I addressed to the Senator. I want to know whether it will increase the price which the consumer must pay for the domestic product, and if that is what the Senator from New York is endeavoring to accomplish?

Mr. CALDER. Of course, the rate proposed by the committee will not increase the price to the domestic consumer of the ordinary, everyday collars such as the Senator and I wear.

Mr. WALSH of Montana. Then the Senator's interest in it is purely from a revenue standpoint?

Mr. CALDER. To an extent; but also I am anxious that the rate shall be sufficient to afford proper protection to the domestic industry.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 131, line 2, before the words "per cent," to strike out "12½" and insert "15."

Mr. SMOOT. On behalf of the committee, I move to modify the amendment by inserting "10" in lieu of "15."

The PRESIDING OFFICER. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

Mr. SMOOT. That concludes the cotton schedule, Mr. President, with the exception of those paragraphs which Senators have asked to go over to-night.

The PRESIDING OFFICER. The next amendment will be stated.

The ASSISTANT SECRETARY. In paragraph 1001, on page 132, line 3, it is proposed to strike out "1½" and insert "4," so as to read:

hackled hemp, including "line of hemp," 4 cents per pound.

Mr. ROBINSON. Mr. President, I propose the following amendment to the committee amendment: Strike out "4" and insert "1" in lieu thereof.

Mr. President, yesterday and to-day I have discussed this amendment and asserted that under existing conditions, particularly those relating to labor required in the production of hemp, it is an economic impossibility to develop a hemp-producing industry in the United States for fiber purposes. The Senator from Kentucky [Mr. STANLEY] desires to discuss the amendment which I have just proposed in conjunction with other questions related to the subject matter of that amendment. He is not in the Chamber, and I suggest to the Senator from North Dakota and the Senator from Utah, in view of the lateness of the hour, that very little would be accomplished by proceeding this afternoon if we pursue the usual course and recess at 6 o'clock. So I think we had better take a recess now, unless there is some other matter to be brought before the Senate.

Mr. McCUMBER. I think it is desired to have a short executive session, and, if the Senator from Arkansas thinks we will gain time by so doing, I will ask that the Senate proceed to the consideration of executive business.

RIVER AND HARBOR PROJECTS.

Mr. JONES of Washington. Mr. President, in view of the situation I desire to call attention to the bill (H. R. 10766) authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

I should like to have the attention of Senators to what I am about to say. The bill referred to provides for new river and harbor projects, although it does not make appropriations to carry them on. Under the legislative procedure which has been inaugurated, river and harbor matters are dealt with in two bills. The appropriations are provided in the appropriation bill, but before any appropriation can be provided for a project that project must be adopted by a legislative act, so that an appropriation for it will be in order on the appropriation bill. That requires two acts of Congress, one the real legislative act adopting the project and the other the appropriation bill making an appropriation for the project.

In the Army appropriation bill appropriations for river and harbor work are carried. We made an appropriation in the last Army appropriation bill for projects that had been heretofore adopted. The House has passed what may be termed a legislative river and harbor bill, adopting certain new projects. Many of those projects, if not all of them, are as important, if not more important, than the projects which have heretofore been adopted and for which we made appropriations in the last Army appropriation bill.

I think that it is very desirable that this measure should pass before very long. The bill has been reported from the Commerce Committee with certain amendments. We have recommended the approval of, I think, four or five additional projects, and then we have provided for several surveys. I know that I can not ask the chairman of the Finance Committee to lay aside the tariff bill for any considerable time for the consideration of this measure; but it occurred to me that if at some time, for instance, to-day, when we are quitting a half an hour before the regular time, we could take up the river and harbor bill and adopt matters to which there is no objection, we would know what is objected to. I anticipate that there are probably only about two amendments which the committee has reported to the bill to which there will be objection. The surveys are adopted as a matter of course, and I think the projects which we have recommended will appeal to Senators and that they will be adopted without any objection. If we should do that, and ascertain to what provisions or amendments there are objections, then we could ascertain about how much time it would take to consider them; and if we should find that it would take only half an hour, or such a matter, the Senator from North Dakota might be willing to lay aside the tariff bill at some time.

I wanted to make this statement in order to advise Senators that if an opportune time comes I will ask the Senator from North Dakota to permit me to take up the bill and dispose of unobjected matters in it. Any matters leading to discussion will go over; but, as I say, if we could do that we could ascer-

tain what we would have in controversy, and if an occasion like this comes again, where we do not desire to continue the consideration of the tariff bill for a half hour, then I shall ask to take up the bill. I do not feel like asking it to-night, because I had not given notice that I would do so.

Mr. ROBINSON. Mr. President, in connection with the statement just made by the Senator from Washington, who is the chairman of the Committee on Commerce, I deem it proper to say, as a Senator who is not a member of that committee, that I am in hearty accord with the plan and purpose that he has expressed. This bill ought to be considered, and I think it will take but a very short time to dispose of it. There are some important provisions in it that should be passed upon in the very early future; and I can only say to the Senator from Washington that when he is ready to proceed with the bill he will receive the cooperation of myself and a large number of other Senators.

Mr. JONES of Washington. I thought I would give this notice, so that if even to-morrow a condition like this should arise we could take up the bill.

Mr. ROBINSON. I should be glad to see the Senator take it up now if he found it convenient to do so.

RELIEF OF LIBERTY LOAN SUBSCRIBERS.

Mr. PEPPER. Mr. President, I ask for the immediate consideration by unanimous consent of House bill 5775, being a bill for the relief of those subscribers to Liberty loans who paid in money in accordance with governmental direction to banks which subsequently failed under such circumstances that these people received neither the bonds for which they had subscribed nor the money which they had paid in.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Pennsylvania?

Mr. ROBINSON. Mr. President, I could not hear the statement of the Senator from Pennsylvania, although I tried very hard to do so. What is the Calendar number of the bill?

Mr. PEPPER. It is Order of Business No. 615.

Mr. ROBINSON. Let the bill be read, Mr. President.

The PRESIDING OFFICER. The Secretary will read the bill.

The Assistant Secretary read the bill (H. R. 5775) for the relief of Liberty loan subscribers of the North Penn Bank, of Philadelphia, Pa.; Santa Rosa National Bank, Santa Rosa, Calif.; Mineral City Bank, Mineral City, Ohio; Robbinsdale State Bank, Robbinsdale, Minn.; and Farmers and Merchants State Bank, Kenmare, N. Dak., as proposed to be amended.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. OVERMAN. Mr. President, let me inquire how much this will amount to?

Mr. PEPPER. The number of claimants is approximately 7,500. The average amount in each case is somewhat less than $35, and the grand total is approximately $254,000, the 7,500 losers being scattered through five or six different States.

Mr. ROBINSON. Mr. President, I do not intend to object to the consideration of this bill. It is a measure of some importance and involves the appropriation of a considerable sum of money. It was, however, very carefully considered by the Committee on Claims, of which I am a member, and the committee reported it unanimously. Therefore I shall not object to the consideration of the bill and shall vote for it.

Mr. OVERMAN. Mr. President, I am not going to object, but it seems to me that any bill which requires the payment out of the Treasury of $250,000 under our rules ought to go to the Committee on Appropriations, and the amount of money ought to be appropriated, instead of making an indefinite direction that the Secretary of the Treasury shall pay out of the Treasury so much money that has not been appropriated. It is a very indefinite appropriation. It is a very unusual bill. It ought to state the amount and ought to go to the Committee on Appropriations.

I have no objection to the consideration and passage of the bill; I think it ought to pass; but it is very irregular in form.

Mr. POMERENE. Mr. President, permit me to suggest to the Senator from North Carolina that some questions may arise as to who is entitled to receive this money, and all of those questions are left to the Comptroller General of the United States to determine. I think it is very much better to have it done in the way provided for in this bill than to make a lump-sum appropriation of the amount now. As the Senator from Pennsylvania suggests, the amounts are payable to 7,500 different people. The Comptroller General will be able to care for that. There may be questions of the assignment of certain rights against certain estates, and so forth. All of those things will have to be taken into consideration.

Let me illustrate. I am especially interested on behalf of some of my constituents who were paying into the Mineral City Bank, at Mineral City, Ohio. That was a bank in a little country village of probably 1,200 or 1,500 people. The agents of the Treasury Department were busy soliciting subscriptions for Liberty bonds, and the subscribers were directed to make their payments at this particular bank.

Mr. OVERMAN. Mr. President, if the Senator will allow me to interrupt him, I am not objecting to the merits of the bill.

Mr. POMERENE. Oh, I understand that.

Mr. OVERMAN. But any bill that passes the Senate directing the Secretary of the Treasury to pay out an indefinite sum of money is all wrong and unusual so far as its form is concerned.

Mr. POMERENE. As a general proposition, I think the Senator is correct; but here is the situation: I intended to say further that the cashier of that bank had been guilty of misappropriation of and speculation with the funds of the bank. He has a certain estate, and if the amount is paid to these different subscribers, and so forth, of course the Government will have a claim against that man's estate. I think that is true also in the case of the Philadelphia bank and others; is it not?

Mr. PEPPER. Yes.

Mr. POMERENE. There are all of those questions to be worked out. This matter was pretty fully discussed during the morning hour here some months ago, and I know that the committee gave it very careful attention.

Mr. ROBINSON. Mr. President, with respect to the proposition raised by the Senator from North Carolina [Mr. OVERMAN] that the jurisdiction to report this bill properly lies in the Appropriations Committee and not in the Committee on Claims, I think if the Senator from North Carolina will look a little more closely into the subject matter of the bill and the form of it, he will find that under the practice of the Senate such bills have always gone to the Committee on Claims, and there never has been an instance where they have been referred to the Committee on Appropriations.

It is observable that the first section of the bill provides for the auditing of the claims by the Comptroller General of the United States—a step that is absolutely necessary before any payments can be made. The second section of the bill provides that when he has found the correct amounts due these respective persons the claims may be paid. In view of the character of the claims, the large number of them, and the amounts claimed and unascertained, I think the jurisdiction properly lies in the Committee on Claims, and that the committee has reported a proper measure in connection with these claims.

I shall, therefore, favor the passage of the bill.

Mr. JONES of Washington. Mr. President, I desire to ask either the Senator from Arkansas or the Senator from Ohio a question. I did not pay attention to the reading of the first part of the bill. Does the Senator consider that there is a legal obligation on the part of the United States to pay these claims?

Mr. POMERENE. I am quite certain that that is true, so far as the claimants interested in the Ohio bank are concerned.

Mr. ROBINSON. Mr. President, if the Senator is addressing the question to me, I will say that there is undoubtedly a moral obligation, which is just as binding in good conscience upon the Government of the United States as a legal obligation. Of course, if there were a legal obligation in the strict sense of the words, the legislation would not be necessary; but when the Government of the United States instructs its citizens who purchase bonds of the United States to deal with particular banks in the transaction, and the banks fail, and a loss is suffered, I think in all fairness the United States should bear the loss rather than the citizens who have complied in every particular with the requirements of the Government.

Mr. JONES of Washington. At any rate, the committee came to the conclusion that there was a distinct equitable obligation upon the part of the Government to pay these claims?

Mr. ROBINSON. An unquestionable moral obligation.

Mr. WILLIS. Mr. President——

The PRESIDING OFFICER. Is there objection to the request of the Senator from Pennsylvania? The Chair hears none.

Mr. WILLIS. Mr. President, I do not desire to object. I merely wanted to say, confirmatory of what my colleague [Mr. POMERENE] has said, that I have made some inquiries as to the Ohio case, and I think it is perfectly just. I do not believe there is a legal obligation, but I do think there is an undoubted moral obligation, and that this bill ought to pass.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Claims with amendments.

The amendments were, on page 1, line 3, to strike out "accounting officers of the Treasury Department" and insert "Comptroller General of the United States"; in line 4, to strike out "are" and insert "he is"; on page 2, line 11, to strike out "said accounting officers" and insert "the Comptroller General of the United States"; in line 15, to strike out "accounting officers" and insert "Comptroller General of the United States"; and in line 17, to strike out "they" and insert "he," so as to make the bill read:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized and directed to receive, examine, and determine the claims of Liberty loan subscribers for losses suffered by them by reason of payments on Liberty bond purchases made through the North Penn Bank of Philadelphia, Pa.; Santa Rosa National Bank, Santa Rosa, Calif.; Mineral City Bank, Mineral City, Ohio; Robbinsdale State Bank, Robbinsdale, Minn.; and Farmers and Merchants State Bank, Kenmare, N. Dak., for which bonds were not delivered on account of the failure of said banks, and to determine the amount of losses actually suffered by each claimant, not exceeding the amount paid by them, less all sums paid or to be paid said claimant upon the liquidation of said banks.

SEC. 2. That the amount of the loss actually suffered as so ascertained and determined shall be certified by the Comptroller General of the United States to the Secretary of the Treasury, who shall pay the same to said claimants out of any money in the Treasury not otherwise appropriated. Said Comptroller General of the United States may also, before the final liquidation of said banks, whenever he can determine the approximate amount to be paid to claimants hereunder, certify the same to the Secretary of the Treasury, who shall thereupon have power to pay claimant such sum, upon the claimant assigning to the said Secretary for the benefit of the United States all interest he may have in any additional sum which may become payable to such claimant from said banks or the receiver thereof on account of his payment for such Liberty bonds: *Provided, however*, That no payment hereunder shall be given to any claimant found to be a director or officer of the failed banks at the time he became a subscriber for such bonds.

The Secretary of the Treasury shall have no power to act upon any claim hereunder not presented within six months after the passage of this act.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

INDIAN SCHOOL NEAR TOMAH, WIS.

Mr. SPENCER. From the Committee on Indian Affairs I report back favorably, without amendment, House bill 10957, to rebuild the school building of the Indian school near Tomah, Wis.

This bill is to replace an Indian school at Tomah, Wis., which burned down in February. It is a nonreservation school, and accommodates about 300 pupils. The department is very anxious to commence the rebuilding of the school, so that it may be finished in time for the fall term, and I ask unanimous consent for the present consideration of the bill.

Mr. OVERMAN. Mr. President, did we not consider that in connection with the Indian appropriation bill?

Mr. SPENCER. No; it was another one. I thought we did, and I went down to investigate it. It was another building in the Northwest; it was not this one.

Mr. ROBINSON. What is the amount of the appropriation?

Mr. SPENCER. About $50,000.

Mr. JONES of Washington. Does this bill make an appropriation?

Mr. SPENCER. No; this is a House bill, and, in the language of the bill, it authorizes the appropriation to be made.

Mr. ROBINSON. The fund will actually be appropriated through the Appropriations Committee on this authorization?

Mr. SPENCER. It will.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to cause the school building of the Indian School, recently destroyed by fire, near Tomah, Wis., to be rebuilt upon the ground and site now owned by the Government, and refurnished in such manner as to meet the present needs of the said school as well as such needs as may reasonably arise in the future, at a cost not to exceed $50,000, including heating, ventilating, plumbing, etc., which may be incident to said rebuilding.

SEC. 2. That the sum of $50,000 is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for the purposes aforesaid.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened and (at 5 o'clock and 47 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Thursday, July 20, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate July 19 (legislative day of April 20), 1922.

REGISTERS OF THE LAND OFFICE.

Claude C. Turner, of North Dakota, to be register of the land office at Dickinson, N. Dak.

Robert E. Patterson, of Minnesota, to be register of the land office at Duluth, Minn.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 19 (legislative day of April 20), 1922.

ASSISTANT APPRAISER OF MERCHANDISE.

Laird Curtin to be assistant appraiser of merchandise in customs collection district No. 11, Philadelphia, Pa.

REGISTER OF THE LAND OFFICE.

Edwin E. Winters to be register of land office at Montgomery, Ala.

POSTMASTERS.

NEW YORK.

Pearla S. Kling, Albany.
George M. Edsall, Nanuet.

PENNSYLVANIA.

Malcolm F. Clark, Coudersport.
Elmer G. Cornwell, Mansfield.

REJECTION.

Executive nomination rejected by the Senate July 19 (legislative day of April 20), 1922.

POSTMASTER.

Lawson J. Pritchard to be postmaster at Tennille, Ga.

SENATE.

THURSDAY, *July 20, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. UNDERWOOD obtained the floor.

Mr. NORRIS. Will the Senator from Alabama permit me to submit a report, as I am about to leave the city?

Mr. UNDERWOOD. I yield for that purpose.

THE MUSCLE SHOALS PROJECT.

Mr. NORRIS. Mr. President, I ask unanimous consent to report a joint resolution on the Muscle Shoals proposition from the majority of the Committee on Agriculture and Forestry.

The joint resolution (S. J. Res. 227) rejecting bids for the acquisition of Muscle Shoals was read twice by its title.

Mr. NORRIS. I ask that the accompanying report (No. 831) be printed.

The PRESIDENT pro tempore. The report will be printed under the rule.

Mr. NORRIS. The report also expresses the views of the minority on the bill (S. 3420) to provide for the manufacture of explosives for the use of the Army and Navy, to provide for the manufacture of fertilizer for agricultural purposes, to incorporate the Federal Chemical Corporation, and for other purposes. Later on, I understand, there will be a minority report made by other members of the committee on the Ford offer and an adverse majority report on Senate bill 3420.

Mr. ROBINSON. May I ask the Senator what is the minority report that he is presenting? I understand that he is presenting a majority report relating to Muscle Shoals and the propositions which have been submitted concerning it.

Mr. NORRIS. In the same report there are some views expressed by a minority, naming who they are, with reference to the bill. On that bill there will be a majority report later on; I do not know when; but that is understood in the committee.

Mr. UNDERWOOD. I suggest that the Senator from Nebraska ask unaimous consent that the minority may have an opportunity to present their views.

Mr. NORRIS. I shall be glad to have that included in my request.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is ordered as requested.

Mr. NORRIS. I ask that the joint resolution may go to the calendar.

The PRESIDENT pro tempore. The joint resolution will be placed on the calendar.

Mr. MOSES. Mr. President, there seems to be so very much interest in the matter of all the reports bearing upon the question, I ask unanimous consent that all the reports, when they are presented, may be printed together as a Senate document.

Mr. ROBINSON. I think that is a good suggestion. It will avoid confusion.

The PRESIDENT pro tempore. Without objection, it is so ordered.

CLAIMS AGAINST GERMANY.

Mr. UNDERWOOD. Mr. President, it may be recalled that during the war I introduced an amendment to the trading with the enemy act which allowed the Alien Property Custodian to sell the property taken from the German enemy.

The treaty of Versailles, as well as the separate treaty of peace, contemplated that the German property in our hands should be used as a pledge to secure the settlement of American claims against Germany. It has been nearly three years since President Wilson brought the Versailles treaty back to the United States and more than a year has elapsed since the separate treaty of peace with Germany was declared. So far as I know, no step has been taken by this Government to protect American claimants and to provide for the liquidation of their claims.

We hear a great deal about the just rights of the German claimants to the funds in the hands of the Alien Property Custodian, and various bills have been introduced to return the property to them; and I think it about time that something was done to reimburse the American citizens for their just and proper claims against the German Government. At the rate at which the claims have been allowed against the funds in the hands of the Alien Property Custodian, it is doubtful if there will be enough property left to secure American claims unless prompt action is taken.

I therefore ask unanimous consent at this time to introduce a bill to amend an act entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, as amended, so that the American claimants may have a tribunal in which to present their claims; and I shall insist, so far as I am able to do so, that the bill shall have early consideration.

Mr. ROBINSON. Mr. President, of course I have no objection to the request of the Senator from Alabama. Will the Senator from Alabama state whether any arrangement has so far been made for the adjustment of claims of American citizens growing out of the sinking of the *Lusitania*?

Mr. UNDERWOOD. That is included in the bill which I introduce. Nothing has been done up to this time.

Mr. ROBINSON. Nothing whatever?

Mr. UNDERWOOD. No; but this will give an opportunity to the families and representatives of those who were murdered in the sinking of the *Lusitania* to present their claims.

Mr. ROBINSON. What is the reason, if the Senator knows, why the delay has occurred? Why has no action been taken to adjust those claims?

Mr. UNDERWOOD. I can not give the Senator any reason, because I do not know of any. It was contemplated and expressly stated in the treaty of Versailles that the property in the hands of the Alien Property Custodian should be held in trust by the United States Government to secure the payment of those claims. The provisions of the treaty of Versailles in reference to these claims and this property were made a part of the separate treaty of peace with Germany.

As I stated a moment ago, more than a year has passed since that time and no effort, so far as I know, has been made to give the American claimants an opportunity to state their cases and prove their claims. I did not act in the matter before, because I felt that it was a subject which primarily rested in the hands of the party in power, but as no one has taken any action, I feel that I should not wait longer. Therefore I have presented the bill which I have asked unanimous consent to be allowed to introduce at this time and to have it referred to the Committee on the Judiciary in order that some action may be taken in the matter.

Mr. ROBINSON. I am very glad the Senator has moved in the matter. The delay which has already occurred is incomprehensible to me, and I wish some one would explain why no action has been taken to adjust these claims. The conditions under which the claims arose are of such a nature that the claims can not be disputed, and it becomes a mere matter of adjustment. Why, I inquire of other Senators, has no action been taken?

Mr. POMERENE. Mr. President, I think I can give the Senator a little information on the subject.

Mr. ROBINSON. I shall be very glad to have it.

Mr. POMERENE. I may say that I have felt about it just as both the Senator from Alabama and the Senator from Arkansas have expressed themselves. Some of the claimants live in my own State. I have had a number of conferences with the attorneys representing those claimants as well as other claimants, and I think I may state without any impropriety we have had the matter up with the State Department. I know there was some delay, perhaps due to the fact that the ambassador from this country to Germany had not been earlier appointed. The matter is being considered by the State Department. I think that negotiations are going on now between the Governments looking to some plan with respect to a settlement of the claims.

Mr. ROBINSON. In this connection I will say I have not understood nor do I understand now that adjustment of the claims is dependent upon diplomatic procedure alone or upon the appointment of diplomatic representatives between the two Governments. As stated by the Senator from Alabama, the Versailles treaty contemplated some settlement of these claims.

Mr. UNDERWOOD. If the Senator will allow me, the question has really passed beyond the domain of international consideration, because Germany has made a treaty recognizing the disposition of this property. If Senators will examine the testimony of Mr. Bradley Palmer before the Committee on Foreign Relations of the Senate, when the Versailles treaty was before that committee, they will see that his testimony bears out my statement. Mr. Palmer, by the way, is one of the ablest lawyers in Boston. He represented the Alien Property Custodian at Paris when the Versailles treaty was written. He is largely responsible for the clauses in the Versailles treaty which relate to this question.

Mr. Palmer stated, without contradiction, when that treaty was before the Senate Committee on Foreign Relations, that the Germans had surrendered their right of disposition and determination of these matters to the Congress of the United States, and that it was the duty of the Congress to determine what disposition should be made in reference to them. It is no longer a question, in other words, for diplomatic negotiation. If the State Department seek to invade this question by further diplomatic correspondence, they will be going in the teeth of their own treaty, which has already, under a contract with Germany, relegated this matter to the absolute control of the Congress of the United States. The Congress of the United States, if it allows the matter to proceed in that way, will be avoiding its plain duty to American citizens and passing the right to determine this question to somebody else when it has now, as a matter of treaty right, been put finally in the hands of Congress.

Mr. OVERMAN. Mr. President, may I inquire what effect this will have on the provision of the treaty of Versailles, we not having entered into that treaty? It has been contended here on the floor——

Mr. UNDERWOOD. The Senator evidently did not understand me. I said the treaty of Versailles provided for it, and then when we made a separate treaty of peace with Germany there were certain articles in the treaty of Versailles which were continued and referred to and accepted by Germany.

Mr. ROBINSON. And that relating to claims was one of them.

Mr. UNDERWOOD. It was one of them.

Mr. ROBINSON. It was one of the primary benefits which would accrue to the Government of the United States and its citizens as presented by the advocates of the treaty which we finally agreed to with the German Government.

Mr. UNDERWOOD. It was one of the reasons why I voted for the ratification of the German treaty.

Mr. OVERMAN. That was my understanding also, but the Senator will remember that it has been contended on the floor of the Senate that the property was seized from certain nationals of Germany and that we really had no right to give away the property seized from their nationals, because under a former treaty it should be held in trust for their nationals rather than for the German Government.

Mr. UNDERWOOD. I will state to the Senator, in the first place, that only governments have a right to speak for their nationals, and governments from time immemorial have always spoken for their nationals and committed their nationals. But that is not an open question. The question has been taken to the Supreme Court as to whether the trading with the enemy act and the amendment I proposed to it were in violation of the former treaty with Prussia, and the Supreme Court of the United States held that the Prussian treaty did not apply in this case, that it only related to merchants residing in the United States, that the property of merchants residing in the United States was not touched, and that it did not relate to nationals in the enemy country.

Mr. POMERENE. If the Senator will allow me, I think in a general way he has stated the position accurately, but this question arose: It might be a question between this Government and Germany, to use figures only by way of illustration, as to whether the German Government owed $1,000,000 or $100,000,000. That has to be determined in some way.

Mr. UNDERWOOD. Undoubtedly.

Mr. POMERENE. It will probably be determined by a commission. I intended to say, though perhaps I did not make myself clear, that those are the questions engaging the attention of the State Department.

Mr. UNDERWOOD. Undoubtedly; but under the treaties it is left to the Congress to provide the tribunal in which to determine the question of the amount involved. It is not left to future diplomatic arrangements. Those have already been settled. Therefore I say the Congress is derelict in its duty to the representatives of those American citizens who lost their lives and property by the violent conduct of our late German enemies unless we take some action immediately providing a tribunal in which the cases arising out of those losses may be heard.

I ask that the bill which I have introduced may be referred to the Committee on the Judiciary.

The PRESIDENT pro tempore. Is there objection to the introduction of the bill at this time? The Chair hears none. The bill will be received and referred.

The bill (S. 3852) to amend an act entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, as amended, was read twice by its title and referred to the Committee on the Judiciary.

Mr. UNDERWOOD. Mr. President, I wish to present another request. I have prepared, because of the importance of the bill, a statement for the press analyzing the bill. I ask unanimous consent that I may have printed in the RECORD in 8-point type, in connection with my remarks, the statement to which I refer.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The statement referred to is as follows:

STATEMENT FOR THE PRESS.

"Senator UNDERWOOD, of Alabama, to-day introduced the first bill to provide for the payment of American claims against Germany. It is a comprehensive measure which makes disposition of all the German property in this country taken over by the Alien Property Custodian and the proceeds of the sales of such property. American claims are to be adjudicated by a commission and, unless they are otherwise satisfied, paid out of the German property in accordance with the provisions of the Versailles treaty and the separate treaty of peace between the United States and Germany. Senator UNDERWOOD'S bill provides for a commission to be known as the enemy property claims commission, to be composed of six commissioners to be appointed by the President by and with the advice and consent of the Senate. It will sit in Washington, have practically all the powers of a United States court to settle and determine all claims made by the Government of the United States and by American citizens against Germany, growing out of the destruction of life or property or otherwise before and after we entered the war, which were secured by the treaties mentioned, and all claims of German subjects for the return of property taken over by the Alien Property Custodian. The German property in the hands of the United States is to be classified and American claims paid out of the several classes of property in their order, each class to be exhausted before the funds of another class are touched. Under this plan the property of the German Government itself will be first used to pay American claims and only when that is exhausted will the property of German subjects be used to satisfy American claims. Claims of American citizens against Germany have been filed with the State Department to the amount of nearly $1,000,000,000. Some of these claims may be exaggerated, but it is believed that just and proper claims amount to at least $400,000,000.

"The bill provides for the filing of claims as follows:

"SEC. 29. (a) The following shall be deemed claimants of the first class hereunder:

"(1) Any citizen of the United States who has suffered damage growing out of acts committed by the German Government or by any German authorities since July 31, 1914, and prior to April 6, 1917, or by the Austro-Hungarian Government or by any Austrian or Hungarian authorities since July 28, 1914, and prior to December 7, 1917;

"(2) Any civilian citizen of the United States who suffered damages by injury or who, as surviving dependent, suffered damages by personal injury to or death of civilians, caused by acts of war, including bombardments or other attacks on land, on sea, or from the air, and all direct consequences thereof, and of all operations of war by the two groups of belligerents wherever arising;

"(3) Any civilian citizen of the United States who suffered damage caused by Germany or her allies as a victim of acts of cruelty, violence, or maltreatment (including injuries to life or health as a consequence of imprisonment, deportation, internment, or evacuation, of exposure at sea, or being forced to labor), wherever arising, or who, as surviving dependent of any such civilian victim, suffered damage;

"(4) Any civilian citizen of the United States who suffered damage caused by Germany or her allies in their own territory, or in occupied or invaded territory, as a victim of all acts injurious to health or capacity to work, or to honor, or who, as a surviving dependent of any such civilian victim, suffered damage;

"(5) Any citizen of the United States or any person serving in the military, naval, or air forces thereof who suffered damage caused by any kind of maltreatment by Germany or her allies as prisoners of war; and

"(6) Any civilian citizen of the United States who suffered damage caused by being forced by Germany or her allies to labor without just remuneration:

"(b) The following shall be deemed claimants of the second class:

"(1) Any citizen of the United States who suffered damage or injury inflicted on his property rights or interests, including any company or association in which he may be interested, in German territory as it existed August 1, 1914, or in the territory of the former Austro-Hungarian Empire by the application by such nations of either of the exceptional war measures or measures of transfer mentioned in paragraphs 1 and 3 of the annexes to section 4, entitled 'Property rights and interests,' of the treaties of Versailles, Trianon, and St. Germain-en-Laye, respectively;

"(2) Any citizen of the United States who has suffered damage in respect of all property, wherever situated, belonging to him, with the exception of naval and military works or materials, which has been carried off, seized, injured, or destroyed by the acts of Germany or her allies on land, on sea, or from the air, or damage directly in consequence of hostilities or of any operations of war; and

"(3) Any citizen of the United States who has suffered through the acts of the Imperial German Government or its agents or the Imperial and Royal Austro-Hungarian Government or its agents since July 31, 1914, loss, damage, or injury to his person or property, directly or indirectly, whether through the ownership of shares of stock in German, Austro-Hungarian, American, or other corporations, or in consequence of hostilities, or of any operations of war, or otherwise, not hereinbefore enumerated.

"(c) The following shall be deemed claimants of the third class:

"(1) The Government of the United States, representing the people thereof, for damage caused to the people thereof, for all its pensions or compensation in the nature of pensions to its naval or military victims of war—including members of its air force—whether mutilated, wounded, sick, or invalided, and to the dependents of such victims, the amount due being calculated for each of them as being the capitalized cost of such pensions and compensation on the basis of the scales in force in France as to Germany at the date of November 11, 1921, and as to Austria and Hungary at the date of May 1, 1919;

"(2) The Government of the United States for the cost of assistance by such Government to prisoners of war and to their families and dependents;

"(3) The Government of the United States for allowances by such Government to the families and dependents of mobilized persons or persons serving with its forces, the amount due to them for each calendar year in which hostilities occurred being

calculated for the Government on the basis of the average scale for such payments in force in France during that year;

"(4) The Government of the United States for damage in respect of property wherever situated belonging to it, with the exception of naval and military works or materials which has been carried off, seized, injured, or destroyed by the acts of Germany or her allies on land, on sea, or from the air, or damage directly in consequence of hostilities or of any operations of war; and

"(5) The representatives of any civilian population of the United States which suffered damage in the form of levies, fines, and other similar exactions imposed upon them by Germany or her allies."

Mr. LODGE. Mr. President, unfortunately I was not present when the Senator from Alabama introduced his bill, and I should like to ask him just what the purpose of the bill is. As I understand, it relates to the claims of American citizens against the German Government.

Mr. UNDERWOOD. The bill proposes to authorize the President to appoint a commission, and gives them the usual authority vested in such commissions, following to a large extent the powers which were given to the Spanish Claims Commission, with which the Senator from Massachusetts is familiar. The bill also provides that the commission shall have two years in which to hear these claims and determine the amounts and values thereof, and that the time of two years may be extended for six months at a time if the President finds it desirable to extend the time. A distinct limitation is placed upon the powers of the commission; but it is given the right to make a final adjudication of all these claims unless the commission certifies the question as being a matter of so much importance that it should be decided by the Supreme Court, and then it may be decided by the Supreme Court.

Mr. LODGE. Does the Senator's bill provide for a wholly American commission?

Mr. UNDERWOOD. It would be entirely an American commission, because the claims of which it would have jurisdiction would be American claims.

As the Senator from Massachusetts will recall, Mr. Bradley Palmer stated before the Committee on Foreign Relations that under the terms of the Versailles treaty Germany had consented that this whole matter should be submitted to the determination of the Congress of the United States, and those clauses of the Versailles treaty were ratified in the separate treaty of peace with Germany, for which the Senator from Massachusetts and I both voted.

The matter, therefore, is within the power of Congress. Purely American claims are involved. The German Government, committing its nationals, has consented that Congress shall determine the matter. In introducing the bill of course I recognize that Congress must determine what action it will take. The bill only expresses my view as to the lines on which the question should be determined; but more than a year has passed by since our treaty of peace with Germany was signed, and I think the time has come when Congress should act. As the Senator from Massachusetts remembers, Mr. Palmer, who is one of the ablest lawyers in his State, and represented our Government at Paris in this matter, stated without contradiction before the Committee on Foreign Relations that the determination of this question rested in the Congress of the United States.

Mr. LODGE. I have no question of the power of Congress to deal with any question connected with those claims, but I had supposed that the matter could be settled by an agreement with Germany under the treaty of peace.

Mr. UNDERWOOD. It could not be settled with Germany without our making another treaty, because the present treaty is the law of the land, and that treaty contemplates that this question shall be determined by Congress, although, of course, the President could negotiate another treaty with Germany, wiping out the terms of the existing treaty and establishing new treaty rights.

So far as I am concerned, I have no bitterness against our late German enemies. I have no feeling of that kind, but it would be far from my disposition to see the heirs of the people who were murdered in the sinking of the *Lusitania* go before a mixed tribunal to determine whether or not they had a legal claim against the German Government or its nationals.

Mr. LODGE. I myself should never assent to that. It is only a question, as I understand, of settling amounts; and the Senator's idea is that that can be done by our own commission.

Mr. UNDERWOOD. Unquestionably. I do not rest this contention on my own statement, but, as I stated, Mr. Palmer, a Republican, not a Democrat, an able lawyer in the Senator's own State, whom he knows well——

Mr. LODGE. I know him.

Mr. UNDERWOOD. Who represented our Government in connection with all of this property at Versailles and wrote the article in reference to this matter in the treaty of Versailles——

Mr. LODGE. Yes; I remember his examination before the committee very well.

Mr. UNDERWOOD. Stated, without contradiction before the Senator's committee, that this was now a question for the determination of the Congress and not for the determination of anybody else.

M. LODGE. The Senator's plan is that we should have a commission to determine the claims and present them as Government claims?

Mr. UNDERWOOD. The bill provides for a commission to determine our rights in the matter, to fix the amount of the claims, decide whether they are equitable and lawful, and to certify them. Then it gives the German Government an opportunity to pay them if it will; and if the German Government then refuses to pay them, the bill proposes to make the property which is now in our hands, which has been taken by the Alien Property Custodian, subject to the payment of the claims.

Mr. LODGE. I have no objection to the bill. I merely wished to understand it.

Mr. BORAH. Mr. President, do I understand that the bill introduced by the Senator from Alabama contemplates, in case the German Government does not pay these claims, that we may confiscate the individual property of German nationals which has been seized by us and devote its proceeds to their payment?

Mr. UNDERWOOD. We confiscated that property in March, 1918, when we adopted the amendment which I proposed to the trading with the enemy act by the vote of every Senator who was then present, except one, and by a unanimous vote of the House of Representatives; but the question of confiscation no longer exists, because, under the treaties which have already been made, the German Government, speaking for itself and its nationals, has conceded that this property may be used to pay these claims if the German Government does not pay them.

Mr. BORAH. But what the German Government concedes and what we are in honor bound to do, and as a matter of wise policy should do, are two entirely different propositions.

Mr. UNDERWOOD. Of course, I agree with the Senator in his main statement, but not in his inference, because I think that if Congress is in honor bound to do anything, it is in honor bound to protect the rights of American citizens who had their property and their lives ruthlessly destroyed by an enemy Government. For us to say that we owe anything to the people who at that time, in March, 1918, were dropping bombs on London from airplanes, destroying private property, murdering innocent citizens, and who from a distance of 75 miles were firing cannon upon Paris, not for military purposes but for the purpose of terrorizing innocent citizens in the heart of Paris—to say that the Congress of the United States is in honor bound to protect the rights of the citizens of that Government rather than the rights of American citizens is not at all in accord with my viewpoint on the subject.

Mr. BORAH. Mr. President, I do not disagree with the Senator from Alabama at all that Congress is in honor bound to protect the rights of American citizens; but it is in honor bound to protect them in an honorable way, and, in my judgment, it would not be an honorable way to protect them by confiscating, because of the depredations of the Government of their country, the individual property of those Germans who invested in this country.

Mr. UNDERWOOD. I want to state to the Senator that there is no man on the floor of the Senate for whose opinions and independence of judgment on the great questions that come before the Senate I have more respect than I have for those of the Senator from Idaho, but I differ absolutely with him on this question. The old principle of international law that an invading army should respect the property of the citizens of the country in which the army advanced was right in its day and time, but to-day peoples make war against other peoples. Germany could not have sustained herself for a year if the people of Germany had not been behind the German Government. They depredated the property and destroyed the lives of innocent people, including our own nationals and those of our allies, miles behind the lines, where there was no military operation proceeding. They even went to the extent when Hindenburg made his retreat of destroying the forests of the French peasants. To say, since we took this property, as we did, as an act of war, that we are under any obligation to return it to those people who destroyed our people and our allies'

property, it seems to me goes a long way beyond the ethics of the case.

Mr. BORAH. Mr. President, the doctrine for which I contend is one which we have been advocating ever since we have been a Government. We have been pioneers in presenting and insisting upon that doctrine. We have written it in treaties, we have written it in the decisions of our courts, and we have succeeded in writing it into international law. I do not think that we are in a position to controvert the proposition at this time. We can protect our citizens in their rights without destroying the doctrine for which we have been contending for a hundred years, a doctrine sound in justice and wise as a matter of expediency.

Mr. UNDERWOOD. The Senator is right, of course, that in the early days we did contend for it, and that doctrine was embodied in international law, but when the great World War broke out, when war was made under sea and in the air against citizens and not against armies, that principle of international law was relegated to the rear, and the Congress itself abandoned it when it voted for the amendment which I offered on this floor in March, 1918, to confiscate this enemy property. I do not know whether or not the Senator was present in the Senate when the vote was taken, but if he was he voted for the amendment, because there was but one vote in the Senate cast against it on a roll call, and that was not the vote of the Senator from Idaho.

Mr. BORAH. Mr. President——

Mr. WALSH of Montana. Mr. President, the statement made by the Senator——

The PRESIDENT pro tempore. Does the Senator from Alabama yield; and if so, to whom?

Mr. UNDERWOOD. I was discussing the question with the Senator from Idaho, and I will yield first to him, if the Senator from Montana will pardon me.

Mr. BORAH. I was only going to say that I do not remember the vote on the particular amendment to which the Senator has reference, but I do know the construction which was placed upon that act in the debate in the House and in the Senate and in the report of the Senate committee, and it was not that of confiscation at all, and we so understood it.

Mr. UNDERWOOD. If the Senator will allow me, when the amendment was presented in the Senate I made a short statement on the floor, and I said then that I regarded the act of taking and selling this property as a war act and one of the strongest blows that we could aim against Germany and its nationals to affect their morale behind the lines, and I believe it was. So there is no question about the position which I took.

Mr. BORAH. I am satisfied that there is no doubt as to the position which the Senator occupied or as to his individual views, but I think, if the Senator will recur to the debate and the report of the committee, he will have no trouble in arriving at the conclusion that there were quite a number of Senators who entertained an entirely different view as to the effect and purpose of that act.

Mr. UNDERWOOD. Where the Senator is making the mistake is in his recollection. The trading with the enemy act was passed in 1917, if I recollect aright. That act was reported from the Judiciary Committee and there was considerable debate on it, and under it the Alien Property Custodian was directed to take this property and to hold it in trust for the German owners. That is the debate the Senator is thinking about; but in March, 1918, I proposed an amendment which wiped out that idea entirely. I proposed the amendment as an act of war.

Mr. OVERMAN. Mr. President, was not that amendment put on a deficiency appropriation bill?

Mr. UNDERWOOD. It was put on an appropriation bill, but it came up on the floor of the Senate and was not reported from a committee. The only report that was made was the speech which I made on the subject. There was very little debate on it, but it was clearly stated when I presented it that it was a reprisal against the German Government and its nationals as an act of war.

Mr. BRANDEGEE. Mr. President, was it a confiscatory amendment?

Mr. UNDERWOOD. Yes; it took this property and authorized its sale.

Mr. BRANDEGEE. Instead of the trusteeship provided for in the original act?

Mr. UNDERWOOD. Yes; it wiped out the idea of a trusteeship.

Mr. WALSH of Montana. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Montana?

Mr. UNDERWOOD. I yield.

Mr. WALSH of Montana. I rose because I find myself in entire disagreement with the Senator from Alabama with respect to the purpose and effect of the act to which he refers. I shall regard it as most extraordinary if the Senate or the Congress of the United States shall let it be understood that we have already resolved to confiscate and have confiscated this property. The fact about the matter, as has been indicated, is that the act originally provided that the Alien Property Custodian should possess himself of these German interests and hold them in trust subject to further direction of Congress. He was authorized in the original act to sell and dispose of property that was perishable in character; but the avails of the property thus disposed of became trust funds in his hands in exactly the same manner as the property originally was, subject to the disposition of Congress.

In the spring of 1918 the amendment referred to by the Senator from Alabama was enacted by Congress. That, if I have any just conception whatever of its provisions, was not a confiscatory statute at all. It simply extended the powers of the Alien Property Custodian with reference to the sale and disposition of the property. He originally was restricted in his powers of sale to property that was perishable in character, and only such as was perishable in character. It was conceived that it would be unwise to allow the great industrial plants which had been built up in this country by German capital to go back into German hands after the war was over; and Congress resolved to put that property in such shape as that those particular industrial properties should not go back into German hands, and they authorized the Alien Property Custodian to dispose of those properties, and he now holds the avails of those properties, cash instead of factories and lands and stocks and that sort of thing. The Alien Property Custodian holds that cash, subject to such disposition as the Congress may at any time see fit to make with respect to it; and when the time comes there are some of us, I am sure, who will desire to be heard upon the propriety—indeed, Mr. President, the wisdom—of appropriating this property to the satisfaction of just claims of our citizens, not against the owners of this property but against the German Government.

Mr. BRANDEGEE. Mr. President——

Mr. WALSH of Montana. If the Senator will pardon me, I merely desire to add that it becomes a matter of more significance, of more importance, of more deep-seated importance, to the people of the United States at this time than perhaps at any other time in our history. Capital is going from our country into investments in all the countries of the world in quantities that were never thought of before in our history. Shall we now recede from the position we took, and, in the event of our unfortunately getting entangled in war with some of these countries into which American capital is now going, shall we give them a precedent for the confiscation of that property, or shall we adhere to the time-honored principle that has characterized our foreign relations upon this subject up to the present time?

Mr. BRANDEGEE. Mr. President, will the Senator permit an interruption in that connection?

The PRESIDENT pro tempore. Does the Senator from Alabama yield; and if so, to whom?

Mr. UNDERWOOD. I yield for a question. I desire to answer what the Senator from Montana has said.

Mr. BRANDEGEE. Yes; I do not want to answer him. I just want to ask him a question in connection with what he has just said, and it is this: No matter what the previous Congresses may have had in mind about the taking of this property and as to its ultimate disposition, no matter whether it has been converted into cash or not, no matter whether at one time they may have considered that they were confiscating it and at another time perhaps that they were holding it as trustee, the final act of Congress in relation to it was that it should be held subject to the future disposition of Congress, was it not? So that to-day the whole question is before us to decide what the policy of Congress shall be with relation to this property.

Mr. UNDERWOOD. I will answer the Senator's question from the standpoint of this bill. He is clearly right in his contention that the Congress has the power of disposition and can return this property to its German owners if it desires to do so. I favor the American citizen and not the German citizen, but it is clearly within the power of Congress; and I have had the bill referred to a committee of which the distinguished Senator from Montana and the distinguished Senator from Connecticut are both honored members—the Judiciary Committee—where they will have full and free opportunity to consider it.

I think, however, that the Senator is wrong in his viewpoint as to what the condition is now. If he desires to say that we shall return this property, and he can command the votes of a majority of the Congress in favor of giving it back to the German nationals, I concede that the Congress can do so. It can give away anything, as it gave $20,000,000 to Russia a short time ago; but the Senator, I think, has in mind in making his statement the viewpoint of the trading with the enemy act as originally reported from the Judiciary Committee. If, however, he will refer to what I said when I reported the amendment to authorize the taking of all of this property and selling it, except the patents, he will see that I stated that it contemplated an act of war. That is a very different proposition from holding the property as trustee; but I want to say to the Senator in addition to that, not for the purpose of controverting his viewpoint but to call attention to the fact that when I originally proposed the amendment—which was adopted by the vote of every Senator in this Chamber who voted, except one—authorizing the Alien Property Custodian to take this property and sell it and put the money in the Treasury of the United States and afterwards invest it in Liberty bonds, inadvertently I left out of my amendment the power to sell the patents. It never entered my mind that the patents did not constitute a destructible property. It was not a property that had to be taken care of. There was no occasion for selling the patents, except to take them away from their German owners. Subsequently to the time when I offered my amendment—I do not remember who it came from—some one offered a proposal here, either a bill or amendment, and the Congress passed it, authorizing the President of the United States to take over and confiscate the patents.

As to the question to which the Senator refers about our making investments the world over, that is a question that the great merchants may consider. I look at these questions from a standpoint of lasting peace; and I believe to-day that if the German junkers—I am not referring to the plain people of Germany, but I am talking of the millionaires who sat behind the Emperor and gave him the pecuniary power to pursue the ruthless war that cost us thousands of lives and billions of dollars—if the ruthless junker class of Germany had known when they started into this war that under international law their individual property was subject to confiscation, they would have hesitated on the brink. I believe to-day that the best bond that can be given by the great nations of the world to maintain peace is to abandon the idea that the great wealth of the world shall be protected in time of war, and let the man know who puts up the dollars to fight wars that if he goes to war his own dollars are subject to confiscation as well as the lives of his neighbors' sons.

Mr. WALSH of Montana. Mr. President, there are no doubt two sides to that question, and in due time we will consider both of them; but for the present I have before me the act of March 28, 1918, and I think there can be no doubt whatever, from the reading of the language of the law, what the purpose of the Congress in the matter was.

Mr. UNDERWOOD. The Senator must read the language of the law in connection with the remarks I made when I presented the amendment to the Senate.

Mr. WALSH of Montana. Yes; but unfortunately, as the Senator knows, there is a rule which forbids us from paying very much attention to debates in construing statutes.

Mr. UNDERWOOD. The debates may not be admissible in construing statutes, but when you come down to the legal point we have passed that. That is no longer an issue. The German Government has made a treaty authorizing us to take this property and pay our nationals with it. It is a treaty right existing between the two Governments. If you put it on the strict legal basis, the meaning of the language, whether we confiscated it or not is not of importance, because they have signed the treaty of Berlin, which has been ratified by both Governments, and they have consented that we may take this property to pay our own nationals.

Mr. WALSH of Montana. I am simply concerned in the question as to whether or not we have actually confiscated this property. This was the statute:

The fourth paragraph of section 12 of the "trading with the enemy act," approved October 6, 1917, is amended to read as follows:

"The Alien Property Custodian shall be vested with all of the powers of a common-law trustee in respect of all property, other than money, which has been or shall be, or which has been or shall be required to be, conveyed, transferred, assigned, delivered, or paid over to him in pursuance of the provisions of this act, and, in addition thereto, acting under the supervision and direction of the President, and under such rules and regulations as the President shall prescribe, shall have power to manage such property and do any act or things in respect thereof or make any disposition thereof or of any part thereof, by sale or otherwise, and exercise any rights or powers which may be or become appurtenant thereto or to the ownership thereof in like manner as though he were the absolute owner thereof: *Provided*, That any property sold under this act, except when sold to the United States, shall be sold only to American citizens, at public sale to the highest bidder, after public advertisement of time and place of sale, which shall be where the property or a major portion thereof is situated, unless the President, stating the reasons therefor, in the public interest shall otherwise determine: *Provided further*, That when sold at public sale, the Alien Property Custodian upon the order of the President stating the reasons therefor, shall have the right to reject all bids and resell such property at public sale or otherwise as the President may direct. Any person purchasing property from the Alien Property Custodian for an undisclosed principal, or for resale to a person not a citizen of the United States, or for the benefit of a person not a citizen of the United States, shall be guilty of a misdemeanor, and, upon conviction, shall be subject to a fine of not more than $10,000, or imprisonment for not more than 10 years, or both, and the property shall be forfeited to the United States. It shall be the duty of every corporation incorporated within the United States and every unincorporated association, or company, or trustee, or trustees within the United States issuing shares or certificates representing beneficial interests to transfer such shares or certificates upon its, his, or their books into the name of the Alien Property Custodian upon demand, accompanied by the presentation of the certificates which represent such shares or beneficial interests. The Alien Property Custodian shall forthwith deposit in the Treasury of the United States, as hereinbefore provided, the proceeds of any such property or rights so sold by him."

So he continues the common-law trustee of the avails, just as he was of the original property.

Mr. BRANDEGEE. Has the Senator from Alabama asked to have printed in the RECORD the bill which has just been introduced by him?

Mr. UNDERWOOD. I asked to have a synopsis of the bill printed in the RECORD, and I have no objection to having the bill printed in the RECORD.

Mr. BRANDEGEE. I would like to have it printed in the RECORD, so that everybody interested may know what it is.

Mr. UNDERWOOD. I ask that it may be printed in the RECORD in 8-point type.

There being no objection, the bill was ordered to be printed in the RECORD in 8-point type, as follows:

A bill (S. 3852) to amend an act entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, as amended.

Be it enacted, etc., That an act entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, as amended, be, and hereby is, amended by adding thereto the following sections:

"SEC. 20. (a) A commission is hereby created and established, to be known as the enemy property claims commission, hereinafter referred to as the commission, which shall be composed of six commissioners, all of whom shall be learned in the law, who shall be appointed by the President, by and with the advice and consent of the Senate. No more than three of the commissioners shall be appointed from the same political party. One of said commissioners shall be designated by the terms of his appointment to be the president of the commission.

"(b) The President of the United States, by and with the advice and consent of the Senate, shall fill all vacancies which may occur in said commission.

"(c) Any commissioner may be removed by the President for inefficiency, neglect of duty, or malfeasance in office.

"(d) Each of the members of the commission, the Assistant Attorney General, the attorneys, and the clerk provided herein shall be citizens of the United States, and shall take the oath of office prescribed by law to be taken by officers of the United States.

"(e) The commission shall have a seal with such device as it may order.

"(f) The commission may sit as a whole or in two divisions, each composed of three members of the commission. The commission may divide and assign its business to such divisions of the commission, reserving for the consideration of the entire commission such matters as it may deem advisable. Two of the commissioners constituting such a division of the commission shall constitute a quorum for the transaction of business assigned to such division, and the agreement of two such commissioners shall be necessary to decide any question arising before such division of the commission. Four members of the entire commission shall constitute a quorum for the transaction of business, and the agreement of four such commissioners shall be necessary to decide any question arising before said entire commission.

"SEC. 21. (a) The said commission shall, within 30 days after the appointment of the members thereof, meet, and it shall thereafter hold its sessions in the city of Washington, D. C.

"(b) The said commission shall proceed immediately after its first meeting, with all convenient dispatch, to arrange and docket the several claims admissible hereunder, and to consider the evidence which shall have been or which may be offered by

the respective claimants, and in opposition thereto, allowing such further time for the production of such further evidence as may be required and as it shall think reasonable and just; and shall thereupon proceed to determine and award upon each of the said claims according to the provisions hereof.

"(c) The said commission is hereby authorized to publish notice of its sessions and to make all needful rules and regulations, not contravening the laws of the United States, for regulating the forms and mode of procedure before the said commission, and to carry into full and complete effect the provisions hereof. Such rules and mode of procedure made with regard to claims filed under section 29 herein shall conform, so far as practicable, to the mode of procedure and practice of the district courts of the United States. The said commission is hereby vested with the same powers now possessed by the district courts of the United States to compel the attendance and testimony of parties, claimants, and witnesses, to preserve order, and to punish for contempt, and to compel the production of any books or papers deemed material to the consideration of any claim or matter pending before the said commission.

"(d) The said commission is also vested with all the powers now possessed by the district courts of the United States to take or procure testimony in foreign countries. Such testimony may be taken, pursuant to the provisions of existing laws and the rules of practice of the district courts of the United States, so far as applicable, before the commission or any commissioner or commissioners appointed to take testimony hereunder.

"(e) The marshal of the United States for the District of Columbia, or his deputies, shall serve, within said District, all process issued by said commission, preserve order in the place of sitting, and execute the orders of said commission; and outside the District of Columbia the process of said commission shall be served by the United States marshals, or their deputies, in their respective districts: *Provided, however*, That the said commission or any commissioner appointed by it to take testimony in the United States or foreign countries is hereby authorized to appoint an officer to serve any process issued by said commission or commissioner.

"(f) When testimony is to be taken before the commission or any commissioner appointed to take testimony within any District, Territory, or insular possession, the clerk of any court of the United States for such District or Territory or the clerk of any local judicial tribunal for such insular possession shall, on application of the commission or commissioner appointed to take testimony, or of any party to the proceeding, or his attorney, issue a subpœna for such witness, commanding him to appear and testify before the commission or commissioner at a time and place stated in the subpœna; and if any witness, after being duly served with such subpœna, refuses or neglects to appear, or after appearing refuses to testify, not being privileged from giving testimony, and such refusal or neglect is proved to the satisfaction of any judge of the court whose clerk issues the subpœna, such judge may proceed to enforce obedience to the process or punish the disobedience as any court of the United States or such insular possession may proceed in case of disobedience to process of subpœna to testify issued by such court; and the production before such commission or commissioner of any paper or writing, written instrument, book, or other document may also be required in the manner prescribed in section 869 of the Revised Statutes of the United States.

"(g) Each of the said commissioners and the clerk and each of the commissioners to take testimony shall have authority to administer oaths and affirmations and to take the depositions of claimants, parties, and witnesses in all matters pending before or to be presented before the commission; and if any person shall knowingly and willfully swear or affirm falsely in such examination or deposition to any matter or fact touching which such person is examined, or if any person, whether claimant or witness, shall so swear or affirm falsely to the contents of any memorial, petition, affidavit, deposition, or other paper containing any matter or fact pertaining to any claim or proceeding pending before or to be presented before said commission, or shall, in giving testimony or in swearing or affirming to any deposition, affidavit, or other paper before any officer authorized to administer oaths or to take such testimony, swear or affirm falsely to any matter or fact pertaining to any claim or proceeding pending or to be presented before said commission, every such person so swearing or affirming falsely as aforesaid shall be deemed guilty of perjury just as if such false oath or affirmation had been taken in a judicial proceeding in any of the courts of the United States or in any local judicial tribunal of any insular possession, and shall be liable to indictment and trial in the district court of the United States for the district in which such perjury shall have been committed, or in the proper courts of the United States for the Territory or District of Columbia, or in proper courts of the insular possession in which such perjury shall have been committed, and shall upon conviction suffer such punishment as is provided by the laws of the United States or of the insular possession for that offense. No person shall be excluded as a witness before the commission because such person is a party to or interested in the claim or proceeding; and any claimant or party in interest may be examined as a witness on the part of the Government.

"(h) All claims filed hereunder shall be filed with the clerk of the commission, and the prosecution of the claim shall be deemed to have commenced at the date of such filing.

"SEC. 22. (a) The commission shall appoint and fix the compensation of a clerk, and may also appoint and fix the compensation of one or more messengers, stenographers, typists, interpreters, and such other employees as the business of the commission may require; and may also appoint and fix the compensation or fees of one or more commissioners—who are herein designated as commissioners to take testimony—who shall be citizens of the United States, whose duty it shall be to take testimony in the United States or in foreign countries in such cases as may be brought before the said commission, but no compensation shall be paid in excess of that paid for like or similar service in the departments and executive agencies of the United States.

"(b) Each of the said members of the commission shall be paid monthly at the rate of $7,500 per annum. The Department of State shall provide said commission with all necessary and suitable rooms and offices for holding its sessions and transacting its business. All the expenses, including the salaries and compensation of said commission and of its officers and employees, shall be paid by the Department of State upon vouchers certified by the president of the commission, or by order of the members of the commission in case of his absence or inability to act.

"SEC. 23. It shall be the duty of the commission, and it shall have jurisdiction, to receive, examine, and adjudicate all claims filed as provided herein. It shall adjudicate said claims according to the merits of the several cases, the principles of equity, and of law.

"SEC. 24. (a) The orders, judgments, awards, and decrees of the commission or any division thereof shall be final, unless a new trial or rehearing shall be granted by said commission, and no retrial or rehearing shall be had except upon motion made within 30 days of said order, judgment, award, or decree.

"(b) When the commission is in doubt as to any question of law arising upon the facts in any case before it, it may state the facts and the question of law so arising and certify the same to the Supreme Court of the United States for its decision, and said court shall have jurisdiction to consider and decide the same.

"SEC. 25. (a) The commission, immediately after its award shall have been made and become final, shall transmit a copy thereof, certified by the clerk of the commission and signed by the president of the commission, or by at least two other members of the commission in his absence or inability to act, to the Alien Property Custodian or Treasurer of the United States, or both, as the case may be, which officials, thereafter, as soon as may be, shall dispose of any money or other property in accordance with such award.

"(b) The powers and jurisdiction hereby granted to said commission shall be in force and continue for the period of two years from the date the commission meets for the first time, as provided in section 21 hereof, and for no longer time: *Provided*, That the President may from time to time extend the said period beyond said two years, not exceeding six months in each instance, when in his judgment such extension is necessary to enable the commission to complete its work: *And provided further*, That in case the commission shall have completed its work before the expiration of the said two years or any extension granted by the President, he may dissolve said commission. Immediately after the commission shall have completed its work all the files and records of said commission shall be deposited in the Department of State.

"SEC. 26. (a) The President shall appoint, by and with the advice and consent of the Senate, one additional Assistant Attorney General of the United States, who shall hold his office during the existence of said commission, and the Attorney General of the United States is empowered to employ and fix the compensation of such other attorneys and employees as the duties laid upon his office by the provisions hereof may require. It shall be the duty of said Assistant Attorney General and

attorneys to appear as attorney and counsel for the United States under the direction of the Attorney General and to defend its interests in all claims and proceedings before said commission.

"(b) Service of all notices of claims and petitions filed hereunder shall be made upon the Attorney General at such time and in such manner as may be prescribed by the commission.

"(c) The defense of the United States to any claim shall be made under such rules and regulations as the commission may prescribe: *Provided*, That should the Attorney General fail to so defend any claim the claimant may proceed with the case under such rules as the commission may adopt; but the claimant shall not in such cases have award for his claim, or for any part thereof, unless he shall establish the same by proof satisfactory to the commission.

"SEC. 27. (a) All money or other property or the proceeds of the sale thereof held by the Alien Property Custodian or Treasurer of the United States by virtue of the trading with the enemy act, as amended, the return of which is now authorized by section 9 thereof, shall be, as elsewhere provided herein, returned to the owner thereof or his agent or legal representative.

"(b) Claims made under this section by any person asserting citizenship of the United States by naturalization process shall not be denied on the ground of any presumption of expatriation which may have arisen against him if he has returned to the United States and gives satisfactory evidence of his loyalty to the United States during his absence abroad.

"(c) Claims made under this section and subsections (b) and (c) of section 30 hereof shall be filed with the commission within one year after the date the commission meets for the first time, as provided in section 21 hereof, or shall be forever waived and barred.

"SEC. 28. All money and other property, including the proceeds of the sale thereof, held by the Alien Property Custodian or the Treasurer of the United States by virtue of the trading with the enemy act, as amended, which at the time it was conveyed, assigned, transferred, delivered, or paid over to the Alien Property Custodian, or required so to be, or seized by him, belonged to any person enumerated in this section, shall be returned by the commission to the owner thereof, or to his agent or legal representative, if the payment of claims which may be allowed by the commission to claimants under sections 29 and 30 hereof are otherwise satisfied; otherwise the same shall be first subject to the payment thereof as herein provided. The Alien Property Custodian shall classify all such money and other property in two lists—one covering that belonging to Germany and its nationals, the other covering that belonging to Austria-Hungary and its nationals, as follows:

"Class 1. Money and other property belonging to the Government, or any political or municipal subdivision thereof, or any agent or agency thereof.

"Class 2. (a) All other money and property belonging to any person not enumerated in the foregoing class 1, the return of which is not authorized by section 27 hereof.

"(b) No person enumerated in this section shall file claim for the return of his money or other property until such time as the commission shall announce it will receive such claims: *Provided*, That all such claims shall be filed with the commission within one year after the date of such announcement by the commission or shall be thereafter forever waived and barred.

"SEC. 29. (a) The following shall be deemed claimants of the first class hereunder:

"(1) Any citizen of the United States who has suffered damage growing out of acts committed by the German Government or by any German authorities since July 31, 1914, and prior to April 6, 1917, or by the Austro-Hungarian Government or by any Austrian or Hungarian authorities since July 28, 1914, and prior to December 7, 1917;

"(2) Any civilian citizen of the United States who suffered damages by injury, or who, as surviving dependent, suffered damages by personal injury to or death of civilians, caused by acts of war, including bombardments or other attacks on land, on sea, or from the air, and all direct consequences thereof, and of all operations of war by the two groups of belligerents wherever arising;

"(3) Any civilian citizen of the United States who suffered damage caused by Germany or her allies as a victim of acts of cruelty, violence, or maltreatment (including injuries to life or health as a consequence of imprisonment, deportation, internment, or evacuation, of exposure at sea or being forced to labor), wherever arising, or who, as surviving dependent of any such civilian victim, suffered damage;

"(4) Any civilian citizen of the United States who suffered damage caused by Germany or her allies in their own territory, or in occupied or invaded territory, as a victim of all acts injurious to health or capacity to work, or to honor, or who, as a surviving dependent of any such civilian victim, suffered damage;

"(5) Any citizen of the United States or any person serving in the military, naval, or air forces thereof who suffered damage caused by any kind of maltreatment by Germany or her allies of prisoners of war; and

"(6) Any civilian citizen of the United States who suffered damage caused by being forced by Germany or her allies to labor without just remuneration.

"(b) The following shall be deemed claimants of the second class:

"(1) Any citizen of the United States who suffered damage or injury inflicted on his property rights or interests, including any company or association in which he may be interested in German territory as it existed August 1, 1914, or in the territory of the former Austro-Hungarian Empire by the application by such nations of either of the exceptional war measures or measures of transfer mentioned in paragraphs 1 and 3 of the annexes to section 4, entitled 'Property rights and interests,' of the treaties of Versailles, Trianon, and St. Germain-en-Laye, respectively;

"(2) Any citizen of the United States who has suffered damage in respect of all property, wherever situated, belonging to him, with the exception of naval and military works or materials, which has been carried off, seized, injured, or destroyed by the acts of Germany or her allies on land, on sea, or from the air, or damage directly in consequence of hostilities or of any operations of war; and

"(3) Any citizen of the United States who has suffered through the acts of the Imperial German Government, or its agents, or the Imperial and Royal Austro-Hungarian Government, or its agents, since July 31, 1914, loss, damage, or injury to his person or property, directly or indirectly, whether through the ownership of shares of stock in German, Austro-Hungarian, American, or other corporations, or in consequence of hostilities or of any operations of war, or otherwise, not hereinbefore enumerated.

"(c) The following shall be deemed claimants of the third class:

"(1) The Government of the United States, representing the people thereof, for damage caused to the people thereof for all its pensions or compensation in the nature of pensions to its naval and military victims of war—including members of its air force—whether mutilated, wounded, sick, or invalided, and to the dependents of such victims, the amount due being calculated for each of them as being the capitalized cost of such pensions and compensation on the basis of the scales in force in France as to Germany at the date of November 11, 1921, and as to Austria and Hungary at the date of May 1, 1919;

"(2) The Government of the United States, for the cost of assistance by such Government to prisoners of war and to their families and dependents;

"(3) The Government of the United States, for allowances by such Government to the families and dependents of mobilized persons or persons serving with its forces, the amount due to them for each calendar year in which hostilities occurred being calculated for the Government on the basis of the average scale for such payments in force in France during that year;

"(4) The Government of the United States, for damage in respect of property wherever situated belonging to it, with the exception of naval and military works or materials, which has been carried off, seized, injured, or destroyed by the acts of Germany or her allies on land, on sea, or from the air, or damage directly in consequence of hostilities or of any operations of war; and

"(5) The representatives of any civilian population of the United States which suffered damage in the form of levies, fines, and other similar exactions imposed upon them by Germany or her allies.

"(d) The award to any claimant under this section shall be only for the amount of the actual damage which said claimant shall prove that he has sustained. Remote or prospective damages shall not be awarded. The awards made to claimants under this section shall include interest at the rate of 6 per cent per annum from the date that the loss, damage, or injury was sustained by the claimant until such date as the award is paid.

"(e) All claims under this section shall be filed with the commission within six months after the date the commission holds its first meeting, or shall be thereafter forever waived and barred: *Provided*, That the commission may, in its discretion,

extend the time for filing said claims for an additional period, not exceeding six months.

"(f) Any claim prosecuted under this section shall be presented by petition containing such allegations and in such form as the commission may require. The petition shall be signed and be verified by the affidavit of the claimant, his attorney, or agent.

"(g) All persons whom the commission may require shall be made parties defendant, and service shall be obtained upon all parties defendent in accordance with the practice in the district courts.

"(h) In case any award is rendered by the commission to claimants under this section, the commission shall, upon motion of the attorney or counsel for the claimant, allow in addition to the amount thereby awarded such counsel and attorney fees to the counsel and attorneys employed by the claimant or claimants, respectively, as the commission shall determine to be just and reasonable as compensation for the services rendered the claimant in prosecuting such claims, which allowance shall be entered as a part of the award in such case and shall be made specifically payable to said attorney or counsel as a part of said award, the payment of which shall be in full compensation to the counsel or attorney for prosecuting such claim; and all other liens upon, or assignments, sales, transfers, either absolute or conditional, for services rendered or to be rendered, about any claim or part or parcel thereof, provided for in this amendment heretofore or hereafter made or done before such award is rendered and payment thereof made shall be absolutely void and of no effect.

"(i) The commission shall order the payment of all claims allowed by it to claimants under this section against the nation concerned, in so far as such awards are otherwise unsatisfied, out of the money and other property enumerated in section 28 hereof which shall have been classified as belonging to it and its nationals: *Provided*, That all the money and other property constituting the first class set forth therein shall be exhausted before that constituting the second class shall be subject to such awards, and in event all money and other property classified as belonging to one of the former enemy nations and its nationals shall be more than sufficient to satisfy all awards against it, the balance shall be held subject to the satisfaction of the awards which may be rendered against the other enemy nation concerned, if such other awards are not otherwise satisfied: *Provided further*, That the same shall not be so used until all money and other property belonging to such other nation and its nationals shall have been exhausted.

"Awards allowed to claimants of the first class shall be paid before awards allowed to claimants of the second and third class, and awards allowed to claimants of the second class shall be paid before awards allowed to claimants of the third class, and should such money and other property be insufficient to satisfy in full awards to claimants of any one of said three classes the same and/or the proceeds thereof shall be distributed ratably among the several claimants of that class.

"(j) All money held by the Alien Property Custodian or by the Treasurer of the United States belonging to persons in the class then subject to the payment of awards under this section shall be exhausted in the satisfaction of such awards before the property held by the Alien Property Custodian belonging to the same or other persons in the same class be subject to liquidation for the payment of such awards.

"(k) So far as such awards shall be payable by the Treasurer of the United States, all or any part of same may, at his option, be paid in United States bonds, at par, provided that any amount of the award of which a $50 bond is not a factor shall be paid in currency.

"SEC. 30. (a) Any person enumerated in section 27 or section 28 claiming any right, title, or interest in any money or other property which has been conveyed, transferred, assigned, delivered, or paid over to the Alien Property Custodian, or seized by him and held by him or the Treasurer of the United States by virtue of the trading with the enemy act, as amended, may, as provided in said sections, respectively, file with the commission a notice of his claim containing an application for allowance thereof, under oath and in such form and containing such particulars as the commission shall require; and the commission may order the payment, conveyance, transfer, assignment, or delivery of the money or other property so held by the Alien Property Custodian or Treasurer of the United States, or of the interest to which the commission shall determine said claimant is entitled, to said claimant, his agent, or attorney.

"(b) Any citizen of the United States, or his legal representative, to whom any debt which became due prior to July 14, 1919, may be owing from any person whose money or other property is subject to the payment of claims as provided in section 29 hereof, may file notice of such claim containing an application for the allowance thereof, as provided in the foregoing subsection (a); and the commission may, with the assent of the owner of said money or other property, and of all persons claiming any right, title, or interest therein, order the payment, conveyance, transfer, assignment, or delivery of the money or other property so held by the Alien Property Custodian or by the Treasurer of the United States, or of the interest therein to which the commission shall determine said claimant is entitled, to said claimant, his agent, or attorney.

"(c) Any claimant enumerated in the foregoing subsection (b) who is unable to obtain assent to the payment of the debt as provided therein may make application for the allowance of said debt by filing a petition therefor, as provided for claimants under section 29 hereof, and the commission shall proceed to adjudicate upon said claim under the same rules and regulations as it may provide for claimants under said section 29.

"(d) The Alien Property Custodian and the Treasurer of the United States shall not comply with any award or order of the commission allowed to claimants under the foregoing subsections (b) and (c) until all of the awards of the commission to claimants enumerated in section 29 herein have been paid or otherwise satisfied. Claimants under said subsections (b) and (c) shall be entitled to priority of payment according to the time of the filing of their respective claims.

"(e) All applications for the allowance of claims made to the President in accordance with the provisions of section 9 of the trading with the enemy act, as amended, which have not, at the time the commission meets for the first time as provided in section 21 hereof, been allowed or disallowed, shall be delivered over to the commission, and all applications so pending shall be deemed to have been filed with the commission as of such time. The commission, upon the receipt of said applications, shall proceed to adjudicate upon such claims in accordance with the provisions hereof: *Provided*, That after the commission meets for the first time, as provided in section 21 hereof, no further applications for the allowance of claims shall be received by the President under the said section 9, nor shall the President, on his own motion, dispose of any money or other property under the provisions of said section 9. The commission is hereby authorized to allow any claim for debt which might have been allowed under said section 9, provided that any such claim shall be filed under the same terms and conditions as any other claim hereunder and subject to the same restrictions as provided in said section 9.

"(f) Nothing contained herein shall in anywise prejudice the rights of any claimant who has heretofore instituted, or shall hereafter institute, suit in equity in the district court of the United States or the Supreme Court of the District of Columbia, as provided in said section 9. No claim shall be prosecuted before the commission if such suit in equity has theretofore been instituted in such district court of the United States or the Supreme Court of the District of Columbia asserting the same claim; and no suit shall be instituted in such district court of the United States or the Supreme Court of the District of Columbia if the same has theretofore been filed with the commission: *Provided*, That any person who has heretofore instituted any such suit in a district court of the United States or in the Supreme Court of the District of Columbia, the merits of which suit shall not have been determined by such court at the time of the approval of this act may apply to such court for the dismissal of such suit and upon the dismissal of the same may file his claim before the commission.

"SEC. 31. (a) The sole relief and remedy of any person having any claim to any money or other property or the proceeds of the sale thereof, heretofore conveyed, transferred, assigned, delivered, or paid over to the Alien Property Custodian, or required so to be, or seized by him, shall be that provided by the terms of the trading with the enemy act as amended, and the terms hereof; and in the event that such property has been or shall be sold or otherwise disposed of by the Alien Property Custodian, shall be limited to and enforced against the net proceeds received therefrom and held by the Alien Property Custodian or by the Treasurer of the United States, and no such money or other property, or the proceeds of the sale thereof, liquidation or other dealing therewith, so held, shall be returned, or otherwise disposed of, unless the lawful expenses incurred by the Alien Property Custodian in holding and administering the said money or other property to be returned or otherwise disposed of, are first deducted therefrom or otherwise satisfied.

"(b) The return of any money or other property, or the proceeds of the sale thereof, or payment of any debt, in accordance with the provisions of the trading with the enemy act as amended, or the provisions hereof, shall operate as and be a full acquittance and discharge of the Alien Property Custodian or the Treasurer of the United States, as the case may be, and of the United States, in respect to any and all claims for or interest in said money or other property, or compensation or damage arising from the capture and administration of such property by the President or the Alien Property Custodian.

"SEC. 32. All money or other property held by the Alien Property Custodian or the Treasurer of the United States by virtue of the trading with the enemy act as amended shall be administered as provided in said act as amended until such time as the commission may otherwise order the disposal of the same, or as Congress shall otherwise direct: *Provided, however*, That no property shall hereafter be sold except to insure the prevention of waste and protect such property or to satisfy such taxes as are provided to be paid in an act entitled 'An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1919, and for other purposes,' approved July 1, 1918, or to satisfy claims in accordance with the awards and directions of the commission."

Mr. UNDERWOOD. Mr. President, I am trying to make a complete review of this whole subject, involving all that has been done, not as an argument, but as a statement of facts, and I hope to be able in the next four or five days to have it in such shape that I can read it to the Senate as a review of the whole question involving our taking this property and the American claims.

SHEPPARD-TOWNER MATERNITY BILL.

Mr. FERNALD. Mr. President, there appeared in the Boston Evening Transcript of Monday, July 17, 1922, an article stating that the Governor of Maine rejects the provisions of the maternity bill. He is a very clear-thinking and able business man and an exceedingly brilliant and sound lawyer. I ask that this article be printed in the RECORD in 8-point type without reading.

There being no objection, the article was ordered to be printed in the RECORD in 8-point type, as follows:

REJECTS MATERNITY AID—MAINE OPPOSES SHEPPARD-TOWNER MEASURE—FEDERAL ENCROACHMENT, DECLARES BAXTER—CONSTITUTIONALITY OF IT IS IN DOUBT—STATE CAN TAKE CARE OF ITS OWN.

AUGUSTA, ME., July 17.—Refusal to accept the terms of the Sheppard-Towner maternity and child labor bill pending the meeting of the legislature is expressed to-day in a proclamation by Governor Baxter. Although the final decision as to whether or not the State accepts this bill rests with the State legislature, it is provided that if the legislature is not in session the governor temporarily may accept the bill on behalf of the State until the next legislature convenes.

The governer relates what Maine is now doing in the field embraced by the bill and says:

"At the hearing on June 23 the advocates of the Sheppard-Towner bill admitted that the United States Supreme Court might declare the bill unconstitutional, thus making the $5,000 'gift' to the State an unlawful use of the public funds by Congress. Notwithstanding this, these advocates urged the State to accept the money 'because other States have done so.' The weakness of this argument is apparent, and the State of Maine will take no money unless it has a clear title to it.

"I believe the time has come for the States of the Union to hold to a principle and to carefully scrutinize all offers of 'Federal aid' before accepting them. Having no doubt as to what my duty is in this matter, I decline to accept the Sheppard-Towner bill, and this State for the time being will stand with New York, Massachusetts, and Rhode Island, the three States that have rejected it. The State of Maine will not sell its birthright, and principle, not expediency, has been the determining factor with me in the solution of this problem. The financial aspects of Federal aid is interesting. The proffered $5,000 has been referred to as a 'free gift' to the State of Maine, while in reality the Federal Government is taxing the State to raise this money; and now, in order to help our mothers and children, offers to pay back to the State the trivial sum of less than two-thirds of 1 cent for each inhabitant. At the present time over $18,000,000 is annually taken in taxes by the Federal Government from the people of Maine, and less than $1,250,000 is returned to the State in the form of Federal aid. This $18,000,000 of Maine money is paid into the Federal Treasury at Washington, a large portion being absorbed in heavy administration expenses at the Federal Capitol, and a small fraction being returned to the State.

FEDERAL ENCROACHMENT.

"During the World War the power of the Federal Government over the States of the Union was extended beyond precedent. The time now has arrived, however, when our States should be restored to their former status and should guard against further encroachment. The founders of this Government saw the menace of Federal control, and from Washington's time to the present our greatest statesmen have warned against it.

"The people of Maine are willing and able to care for their own mothers and children, and I have faith to believe that Maine men and women will do this rather than accept so-called gratuities from a Federal bureau. Already we are overburdened with Federal interference and control, and our citizens and industries are hampered by Federal inspectors and other officials from Washington.

"The final acceptance or rejection of the Sheppard-Towner bill must be determined by the members of the incoming legislature, who directly represent the people of this State. It would be unfair to these representatives if the governor in advance should commit the State to the principle involved in the bill, for in that way the door to independent action by the legislature virtually would be closed.

"The Sheppard-Towner bill is to be attacked in the courts by the Commonwealth of Massachusetts, and eminent lawyers are of the opinion that the Federal Government has no power over the States in maternity and child-welfare matters. There also is grave doubt as to whether or not the governor of a State has the power to accept the bill in question, even though Congress attempts to confer that power upon him. The governor of a State does not derive his authority from the Federal Government, and a Federal bill that seeks to confer new powers upon him is of questionable standing.

STATE PROVIDES THE MONEY.

"The existing provisions of the Sheppard-Towner bill are reasonably moderate, but it properly may be assumed that attempts will be made to broaden its scope so as to further restrict the State's control over its own affairs. It is apparent that the present bill is but an entering wedge for more radical legislation, and Maine's delegation in Congress, our Senators and Representatives, should be urged to resist all further encroachments upon the States by the Federal Government. Maine will loyally support the Union in all matters that come under the provisions of the Federal Constitution, but the time has arrived when the people of this State will jealously guard the rights inherent in them as a sovereign people and will accept the responsibilities the possession of such rights imposes.

"The seven members of the executive council unanimously have advised me not to accept the bill in question. These councilors are men of wide experience in public matters, and I value their opinions highly. They, as well as myself, have at heart the welfare of the people of Maine, and, in conjunction with those who favor the bill, we all desire to advance maternity and child-welfare work.

"The councilors and myself believe that the figures given us on the mortality of mothers and infants in Maine show that an emergency exists that authorizes us to draw from the State contingent fund a sum equal to that offered the State by the Federal Government. This $5,000 will be used in extending and improving the maternity and child-welfare work now being done under the supervision of the State department of health. The councilors and myself have already passed the council order appropriating this sum. Doctor Kendall, our health commissioner, now has this $5,000 to spend during the next six months through the regular channels of his department.

"The action of the governor and council has maintained the independent position of the State, the rights of the next legislature have not been interfered with, while at the same time a distinct advantage has been gained for our maternity and child-welfare work. The State's appropriation of $5,000 is to be spent during the next six months' period, whereas the $5,000 offered by the Federal Government was to have been used for a full year's work.

"If the time ever comes when Maine refuses to care for its mothers and children or lags behind other States in humanitarian work, as some Southern States have done in neglecting to enact proper child labor laws, then it may become necessary for the Federal Government to intervene, or at least to offer advice and assistance. We are not confronted with this condition at the present time and should not encourage the centralization of power in Washington.

"In years gone by the State of Maine has not hesitated to stand for great principles and it is well for the 44 States that

have accepted the Sheppard-Towner bill to know that Maine neither asks for, nor for the time being accepts, Federal aid for its mothers and children."

NATIONAL LEPER HOME.

Mr. FERNALD. Mr. President, from the Committee on Public Buildings and Grounds I report, with an amendment, the bill (S. 3721) authorizing the appropriation of additional funds to continue in effect the act providing for the care and treatment of persons afflicted with leprosy and to prevent the spread of leprosy in the United States, and I submit a report (No. 832) thereon.

Mr. RANSDELL. Does the Senator ask for the immediate consideration of that bill?

Mr. FERNALD. I now ask for the immediate consideration of the bill. I will briefly state the purposes of the bill, and if there is any objection to its present consideration I will ask that the committee report be read by the Secretary.

First, let me say that for some years it has been known by the medical fraternity of the country that there are somewhere between eight and twelve hundred lepers scattered all over the United States. The State of Louisiana was the first State to move in this matter. Some eight or ten years ago that State made provision for getting those people in the State together and building a hospital, which was done. In 1917 the Federal Government found that it was necessary to move in the matter. They purchased that hospital at Carville, La., made an appropriation of $250,000, and provided for 200 beds. The hospital was immediately built, and the rooms immediately taken, so that we have the hospital entirely filled and 100 applicants from all over the country asking for provision to take care of them there.

This bill is approved by the Public Health Service and by the Secretary of the Treasury. It is very important that this appropriation be authorized immediately.

Mr. OVERMAN. Mr. President, we had this question before the Appropriations Committee and discussed the amount of money necessary to be given for the purpose. We gave them what we thought was sufficient to last until December, and in December next, when the deficiency appropriation bill comes up, we will make an investigation of the matter and give them whatever is necessary, realizing that those afflicted people ought to be taken care of. The matter having been considered by the Appropriations Committee, and a sufficient amount given to last until December, the Appropriations Committee thought we would wait until that time, inquire further into it, and give them whatever was then found to be necessary.

Mr. RANSDELL. Will the Senator permit me just a word?

Mr. FERNALD. Just one word in answer to what the Senator from North Carolina has said. An investigation was made by the House committee and the provision unanimously approved. A very careful investigation was made by the Senate committee and the provision was unanimously approved. It would seem quite necessary that some action be taken immediately in order that the waiting applicants may be taken in. I can see no objection to the passage of the bill at this time in order to give authority to the Appropriations Committee so that they may act in December.

Mr. RANSDELL. I will state to the Senator from North Carolina that this is not an appropriation. It is simply to give authority to the Committee on Appropriations to make the appropriation if they see fit to do so.

Mr. FERNALD. That is all.

Mr. OVERMAN. I misunderstood the Senator from Maine.

Mr. FERNALD. This is not an appropriation bill. It merely gives authority to expend the money.

Mr. OVERMAN. The whole question was investigated, the testimony taken by the House committee was thoroughly read, digested, and considered in the Committee on Appropriations of the Senate, and we appropriated a sufficient amount to take care of the matter until December, the committee unanimously agreeing that in December, when we had gotten light on some facts we wanted to know about, we would give a sufficient amount to take care of the other lepers.

Mr. RANSDELL. The Senator is absolutely correct. The bill authorizes the Committee on Appropriations to appropriate money to construct certain buildings in order to take care of a lot of other applicants, and it will be long after December before the building can be gotten ready. It simply gives the committee a chance to appropriate if they see fit.

Mr. OVERMAN. I understand this is only an authorization.

Mr. RANSDELL. It is only an authorization to the Committee on Public Buildings and Grounds. It is a very meritorious measure.

Mr. SMOOT. If the bill is going to lead to any further discussion I will object to it.

The PRESIDENT pro tempore. Is there objection to the making of the report? The Chair hears none, and the report is received.

The Chair understands that the Senator from Maine asks for the immediate consideration of the bill.

Mr. FERNALD. That is correct.

Mr. RANSDELL. I ask that the reading of the report be omitted, and that the bill be acted upon.

Mr. CARAWAY. I would like to ask the Senator from Maine just one question. Does the bill contemplate taking care of all the people in this country afflicted with leprosy?

Mr. FERNALD. Yes; that is the idea.

Mr. CARAWAY. I know of one case in my own State, about which I have had some correspondence.

The PRESIDENT pro tempore. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Buildings and Grounds with an amendment to strike out all after the enacting clause and insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause to be erected additional suitable buildings for the National Leper Home at Carville, La., at a limit of cost not to exceed the sum of $650,000, which sum is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill providing for the erection of additional suitable and necessary buildings for the National Leper Home."

PETITIONS AND MEMORIALS.

Mr. WILLIS presented resolutions of Dean Horton Navy Post, No. 108, American Legion, of Toledo, Ohio, protesting against the enactment of legislation providing for the sale of light wines and beers for the purpose of raising funds for the payment of adjusted compensation to ex-service men, which were referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

Whereas there has been introduced in the Congress of the United States a bill known as the Hill amendment to House bill 9691, providing for the manufacture and sale of wine and beer to provide money to pay adjusted compensation to veterans of the World War: Now, therefore, be it

Resolved by the Dean Horton Navy Post of the American Legion, of Toledo, Ohio, in meeting assembled, That we look upon said bill as an insult to the veterans of the World War; that said measure is, in effect, a bald attempt to capitalize the veterans' desire for adjusted compensation and to use said veterans and the American Legion as a cat's paw to bring about selfish ends; that while we believe in and heartily support the measure providing for adjusted compensation to veterans of the World War, we, as veterans of the World War and members of the American Legion, resent and deplore the attempt to provide funds in this manner to pay adjusted compensation: Be it further

Resolved, That we, as veterans of the World War and members of the American Legion, would rather forego any such compensation than to have it come through the tears and misery of women and little children: Be it further

Resolved, That a copy of this resolution be sent to each Member of Congress representing this district.

DEAN HORTON NAVY POST, No. 108,
By HAROLD P. RAMISCH, *Commander.*

Mr. WILLIS presented a resolution unanimously adopted at a meeting attended by about 50 welfare leaders of Youngstown, Ohio, favoring Federal investigation and regulation of the motion-picture industry, which was referred to the Committee on the District of Columbia.

He also presented a memorial of Hanover Grange, No. 1812, Patrons of Husbandry, of Licking County, Ohio, remonstrating against the enactment of legislation imposing a tariff duty on potash, which was referred to the Committee on Finance.

Mr. PHIPPS presented resolutions of the Civic and Commercial Association of Denver and the Chambers of Commerce of Fort Collins, Greeley, Boulder, and Sterling, all in the State of Colorado, favoring enforcement of the United States Supreme Court decree releasing the Central Pacific Railway from control of the Southern Pacific Co., which were referred to the Committee on Interstate Commerce.

Mr. CAPPER presented resolutions adopted by the Beloit Business Men's Club, of Beloit, Kans., favoring enforcement of the United States Supreme Court decree ordering divorcement of the Central Pacific Railway from the Southern Pacific Co., which were referred to the Committee on Interstate Commerce.

Mr. RAWSON presented resolutions adopted by the Council Bluffs (Iowa) Chamber of Commerce, favoring enforcement of the United States Supreme Court decree ordering divorcement

of the Central Pacific Railway from the Southern Pacific Co., which were referred to the Committee on Interstate Commerce.

Mr. SHEPPARD presented resolutions unanimously adopted at a joint meeting of the Farm Labor Union of America of Texas and Arkansas, favoring the enactment of legislation providing that the Railroad Labor Board rescind its decision reducing the wages of approximately 1,500,000 railroad employees, etc., and also abolishing that board, which were referred to the Committee on Interstate Commerce.

Mr. JOHNSON presented a memorial adopted by the World Conference of Seventh Day Adventists, assembled in quadrennial session at San Francisco, Calif., consisting of more than 800 delegates and 6,000 other citizens, remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of sundry citizens of Long Beach, Calif., praying for the enactment of legislation granting pensions to officers and enlisted men of the militia and other organizations of the several States of the Union that cooperated with military or naval forces of the United States during the Civil War and providing pensions for their widows and dependent parents, etc., which was referred to the Committee on Pensions.

He also presented the memorial of Mrs. Lizzie A. McDowell, of Los Angeles, Calif., remonstrating against inclusion of the proposed food, tableware, and women's-wear schedules in the pending tariff bill, which was referred to the Committee on Finance.

REPORTS OF COMMITTEES.

Mr. McLEAN, from the Committee on Banking and Currency, to which was referred the bill (S. 3840) to amend section 5147 of the Revised Statutes, reported it without amendment.

Mr. BURSUM, from the Committee on Public Lands and Surveys, to which was referred the bill (H. R. 10419) validating certain applications for and entries of public lands, reported it with amendments and submitted a report (No. 833) thereon.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES of Washington:

A bill (S. 3853) appropriating money to purchase lands for the Clallam Tribe of Indians in the State of Washington, and for other purposes; to the Committee on Indian Affairs.

By Mr. SHEPPARD:

A bill (S. 3854) for the relief of Liberty loan subscribers of the National Bank of Cleburne, Tex.; to the Committee on Claims.

By Mr. BURSUM:

A bill (S. 3855) to ascertain and settle land claims of persons not Indian within Pueblo Indian land, land grants, and reservations in the State of New Mexico; to the Committee on Public Lands and Surveys.

By Mr. SHEPPARD:

A bill (S. 3856) to amend an act entitled "An act to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes," approved March 4, 1917; to the Committee on Pensions.

By Mr. KING:

A joint resolution (S. J. Res. 228) authorizing the Secretary of the Interior to survey and dispose of certain lands in the Uintah Indian Reservation; to the Committee on Indian Affairs.

AMENDMENT TO INTERSTATE COMMERCE ACT.

Mr. SPENCER submitted an amendment intended to be proposed by him to the bill (S. 1345) to amend an act entitled "Interstate commerce act," approved February 28, 1920, which was ordered to lie on the table and to be printed.

DISTRIBUTION OF SPEECHES BY FEDERAL RESERVE BANKS.

Mr. McLEAN. Mr. President, I am informed that the Federal reserve banks have sent to the Senate their replies to the question embodied in the resolution offered by the Senator from Alabama [Mr. HEFLIN], and I ask that those replies be printed in the RECORD.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. HEFLIN subsequently said: Mr. President, this morning the Senator from Connecticut [Mr. McLEAN] asked unanimous consent to have the reports of the Federal reserve banks printed in the RECORD. I told him on yesterday that I wanted to be present and submit some remarks at the time that was done, and that one of the banks had not complied with the resolution of the Senate. I have to-day sent this telegram to the governor of the Federal Reserve Bank of Kansas City:

Failed to give number Glass speech distributed. Please send by wire at once.

I ask unanimous consent to vacate the order that was made this morning until this report can come in. I have no objection to printing the report at that time.

Mr. CURTIS. Mr. President, I hope the Senator will withhold that request until the Senator from Connecticut returns to the Chamber.

Mr. HEFLIN. The Senator and I had an understanding yesterday that I was to be present this morning when he made his request, and I was not present when he got the order. I am satisfied that he thought I was. This is a matter of right. The bank has not complied with the resolution of the Senate, and I am asking that that be done before the report is printed.

Mr. CURTIS. I withdraw my suggestion.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The Senator from Alabama asks unanimous consent that the unanimous-consent order made this morning may be vacated. Is there objection? The Chair hears none.

CALL OF THE ROLL.

Mr. RANSDELL obtained the floor.

Mr. JONES of Washington. Mr. President, the Senator from Louisiana is about to discuss a very important matter, and as I know he will present some very important and interesting facts I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ball	Gooding	McCumber	Rawson
Borah	Hale	McKinley	Sheppard
Brandegee	Harreld	McLean	Simmons
Broussard	Heflin	McNary	Smoot
Bursum	Hitchcock	Moses	Spencer
Calder	Johnson	Nelson	Trammell
Cameron	Jones, N. Mex.	New	Underwood
Capper	Jones, Wash.	Newberry	Wadsworth
Caraway	Kellogg	Nicholson	Walsh, Mass.
Culberson	Kendrick	Norbeck	Walsh, Mont.
Cummins	Keyes	Oddie	Warren
Curtis	King	Overman	Watson, Ind.
Dial	Ladd	Pepper	Willis
Ernst	Lenroot	Phipps	
Fernald	Lodge	Pomerene	
Glass	McCormick	Ransdell	

Mr. UNDERWOOD. I desire to announce that the junior Senator from Georgia [Mr. WATSON] is detained from the Senate on account of illness, and that the senior Senator from Nevada [Mr. PITTMAN] is detained owing to illness in his family.

Mr. TRAMMELL. I desire to announce the unavoidable absence of my colleague [Mr. FLETCHER] on account of illness.

The PRESIDENT pro tempore. Sixty-one Senators having answered to their names, a quorum is present.

THE MERCHANT MARINE.

SHALL BRITAIN DICTATE OUR SEA POLICY?

Mr. RANSDELL. Mr. President, there has just come to me a communication on a matter of such serious import from a national standpoint that I wish to bring it to your attention. It is a letter from the Mississippi Valley Association, which is composed of many leaders in the great Mississippi Valley, and its contents, with the inclosures attached, which indicate a vigorous effort on the part of Great Britain to dictate our sea policy, are entitled to the best attention of all patrioic Americans. The letter to which I refer is as follows:

"MISSISSIPPI VALLEY ASSOCIATION,
"*St. Louis, July 15, 1922.*

"Hon. JOSEPH E. RANSDELL,
"*United States Senate, Washington, D. C.*

"DEAR SENATOR RANSDELL: Proof is now conclusive that the powerful shipping interests of England are determined, if possible, to prevent the enactment of the ship subsidy bill, which would insure the successful operation of an American merchant marine.

"I attach this proof in the shape of many clippings from recently printed English newspapers and magazines. Please note that a keynote of these editorials is a plea to the 'pro-British' party in the United States to block the passage of our ship subsidy bill."

I hope Senators will pay attention to this. I am talking about the pro-British party in the United States, organized to block the passage of the ship subsidy bill. It was a great surprise to me to learn of that fact, and I assume that most Senators are hearing it now for the first time.

FOREIGN FOES OF AMERICAN SHIPPING.

"The farmers and producers in the Mississippi Valley ought to know whence comes the real opposition to a bill whose purpose is to supply them with American-flag ships in order that their surplus foodstuffs, cotton, and manufactures may reach the world's consuming markets under as favorable conditions as possible and free from control by Great Britain or any other foreign country.

"Our people should also know that those of our own citizens who are attacking the ship subsidy bill in a partisan way are playing squarely into the hands of Great Britain, and to the detriment of American farmers and producers who, during the last half century, have not always been able to serve foreign markets which were needed by Great Britain and the extensive shipping interests of that country.

"The new tariff bill has been framed with a view to protecting American manufacturers at a time when industrial competition is very keen.

"The Federal barge line on the Mississippi and Warrior Rivers was created and is being operated as an aid to American farmers and producers of the interior whose need for efficient and low-cost transportation to ship side has become very great.

"The ship subsidy bill was framed for the purpose of giving American farmers and producers American-controlled steamship service to the consuming markets of the world at a time when every advantage must be made the most of.

A PERMANENT PLACE SOUGHT ON THE SEAS.

"The American Government has invested several billion dollars of taxpayers' money in creating its merchant fleet in order to start the development of a permanent merchant marine.

"Nobody wants the American Government to engage permanently in the business of merchant shipping. The intent all along has been to give American operators a fair chance to fully employ their splendid enterprise in this field and so compete with foreign operators.

"Because the United States is the richest of nations the scale of living in this country is very high. This means comparatively high costs generally.

"On the high seas these high costs must compete with the scale of costs in all other countries, which, as a rule, is lower.

"High cost of Government operation has increased this differential.

"American ship operators, when given a real chance, can do much to bring down these costs, to increase efficiency, and to render desirable service to American farmers and producers.

"But they can not themselves hope to completely offset through efficiency alone all the difference in costs existing between the United States and European countries.

"This difference the Government must pay, in the shape of a ship subsidy, if we are to have an efficient American merchant marine operated by American business enterprise at moderate cost.

SUBSIDY WILL CUT HEAVY LOSSES.

"Once this subsidy be granted, business enterprise will purchase and operate the Shipping Board's ships and then begin to apply to such operations the business skill and enterprise which have made the people of the United States so prosperous.

"The cost of the subsidy will be very small when compared to the heavy losses incurred by the Government in the upkeep, carrying, and direct operation of the American merchant marine.

"In this way the cost to the taxpayers will be greatly reduced, while American business enterprise will go far toward increasing the benefits to American farmers and producers of an efficiently operated American merchant marine.

"Great Britain, which has long drawn huge profits and valuable advantages from the handling of American commerce on the high seas, knows that the new merchant marine bill, with its subsidy feature and its advantages to shippers, will place American ship operators in position to compete with them, and they fear the competition of American business enterprise under such circumstances.

"They know that, under these conditions, American business enterprise will quickly open all worth-while foreign markets to American producers and keep them open.

BRITISH MONOPOLY ENDANGERED.

"It is no wonder then that Great Britain is calling on the "Pro-British" party in the United States to oppose the passage of the ship subsidy bill, which would destroy the British shipping monopoly and take from British merchants all opportunity to close or open at will world markets needed by American farmers and producers.

"We must have low cost transportation to foreign markets, and that transportation must not be controlled by Great Britain or any other foreign country, if our farmers and manufacturers of surplus products are to prosper in competition with the producers of other countries who need markets now as never before.

"The open hostility of the people of Great Britain to this subsidy bill, as reflected in the editorial expressions I am sending you herewith, is so menacing to our institutions, particularly throughout the Mississippi Valley, that our people should know the facts without delay.

"With every respect,

"Very truly,

"THE MISSISSIPPI VALLEY ASSOCIATION,
"JAMES E. SMITH, *President*."

WESTMINSTER WATCHDOGS MUST WAKEN.

Among these clippings, Mr. President, I find in the Liverpool Courier of June 13 a lengthy article headed "Look to Your Shipping! Westminster Watchdogs Must Waken! What America Must Realize!"

According to this article, there is a pro-British party in the United States, and it is declared that British official and unofficial encouragement should be given to this party, and diplomatic suasion brought to bear upon Washington to defeat the bill that has been designed to give America a place upon the seas commensurate with her standing among the nations of the world. The writer is described as "a political and business expert, whose identity is for the present covered by the pseudonym "Bencher."

"If the official American desire is to conciliate Great Britain," says this expert, "why is such a desired end thwarted by the introduction of a bill which must injure her, which has already alarmed her, which can but cause to her the most intense suspicion of America's motives for a generation to come?"

AMERICA ENVIOUS AND JEALOUS, BRITON SAYS.

The writer declares that there is an "*obvious spirit of envy and jealousy behind the bill.*" [Italics mine.] Think of that, Senators, an "obvious spirit of envy and jealousy" behind the great bill introduced in the American Congress for the purpose of placing our own ships on the sea to carry our own commerce to all the world, commerce which is now being carried and for many years has been carried by ships of other countries. That act on our part, said this writer, "indicates an obvious spirit of envy and jealousy toward Great Britain." Then he proceeded to say that the power behind the measure comes from American business, and he adds:

"There are in the States two sections very well defined, the pro and the anti British. The division runs athwart even the strong line of cleavage separating free traders from protectionists. This means that some pro-British protectionists, while wishing nothing but well to Great Britain, are compelled by party attachment to back the present bill. On the other hand, there are conscientious free traders who would be against its passing but for the fact that their anti-British bias is stronger than their adherence to an economic theory."

A PRO-BRITISH PARTY IN THE UNITED STATES.

According to this anonymous British expert, then, Congress is divided into the pro-British and the anti-British parties, but some of the pro-British party will vote for the shipping bill. Let me quote further from this writer, who asks what can be done and answers his own question by saying:

"The general attitude of Great Britain, both officially and in her trading units, must be such that the pro-British party in the States is encouraged and the anti-British party made aware that the subsidy is not the concern of Americans only. There should be no empty threats of retaliation, either from Westminster or from the constituencies. There should be no waving of the Big British Stick [he capitalizes Big British Stick]. There should be instead the actuality."

Those are pretty serious words, Senators!

The anonymous expert then proceeds to tell us of the kindnesses that Great Britain has showered upon us.

"It is, of course," he adds, "perfectly open to any Britisher legitimately to regard the subsidizing bill as *treachery to his country.* [Italics mine.] Great Britain, out of pure sentiment toward America, has agreed to alterations of her naval-power standard; she has consented to the supersession of the Anglo-Japanese alliance by a pact more favorable to the United States; she has allowed the trans-Atlantic consideration to affect her handling of the Irish situation."

SAY UNITED STATES HAS DONE WORSE THAN NOTHING.

"And in return what has America done?" the writer asks, and his answer is, "Worse than nothing." We not only abstain from assisting Great Britain in her efforts to reestablish European social life, he says, but he adds that we actively menace her by proposing a *breach of commercial morality.*

[Italics mine.] There are three things that the British must do, the writer says, and he enumerates them thus:

"1. Diplomatic suasion must be brought to bear upon Washington.

"2. Capital and labor must combine, in the most actual sense, to produce and to transport at the cheapest rate.

"3. America must be left under no misapprehension as to the solidity of the empire as one vast commercial unit, in the face of the sustained aggression which the subsidizing bill foreshadows."

BRITISH TO BRING "PRESSURE" TO BEAR ON WASHINGTON.

This first action, that of bringing pressure to bear upon Washington, is simple, he says, if only the members of Parliament will insist that the British Government does its duty. To bring capital and labor together, he admits, is more difficult, but the matter of imperial solidarity, he says, is in the hands of the British Government, and he adds that "it is again up to the watchdogs at Westminster to give the alarm to Whitehall." And he concludes with the statement:

"In the present state of British industry the subsidies to American shipping from the American Nation will be the last straw which will break the back of British prosperity—unless Great Britain wakens up to her danger and faces it with a united front."

Mr. President, the charges against America in this article and others to which I shall refer are unfounded and unjust. I can not conceive how the natural desire and legitimate effort of the United States to establish a respectable merchant marine as an essential adjunct to its Navy and a carrier of a fair percentage of its vast foreign commerce can be considered "*as treachery to Great Britain*," as "*a menace to international trade*," and "*a breach of commercial morality*," which warrants threats of the "*big British stick*," and indicates on the part of the United States an "*obvious spirit of envy and jealousy behind the* [shipping] *bill*."

BRITISH CHARGES FALSE AND OFFENSIVE.

These charges are so false, so offensive, so utterly opposed to the friendly spirit which should exist between the two countries that I am at a loss to understand them.

It is also asserted that we have in America, in connection with the shipping bill, a pro-British and an anti-British party. This is certainly news to me, and I unhesitatingly deny the charge. If there be such parties, one opposing and the other favoring this measure, I am not aware of it. Personally I have taken a very active interest for many years in trying to secure a strong American merchant marine, but have done so for love of my own country and not because of opposition to Great Britain. I have the kindest feelings toward Britain. All of my ancestors came from England and Wales, and the ties of blood are very strong. It is farcical for anyone to place me or men who feel as I do in an anti-British party, if any such be in existence. We are not anti-British but we are Americans determined to do whatever our judgment dictates is for the best interests of America, provided it is honorable and just, and are not to be deterred by threats or abuse.

BRITISH VIEW OF BRITISH AMBASSADOR.

Incidentally, the Liverpool Courier views the British ambassador to the United States from an angle that is rather surprising to us in this country who have noted the activities, especially the oratorical ones, of Sir Auckland Geddes. The Liverpool Courier of May 29 last has as its leading editorial a statement entitled "J'Accuse!" The accused one seems to be the British ambassador, for after stating that the bill to aid the American merchant marine is still a hanging sword over the heads of British traders and wage earners, and that the United States Government "hopes to filch from the British race the supremacy of the carrying services of the world," the Liverpool paper adds:

"The Courier has candidly confessed that no nation can legitimately prevent another from legislating in any way it pleases for any of its own industries. All that can be done is to counter the effects of such legislation by increased effort. But this assumes that all possible persuasive pressure has been brought to bear to prevent such legislation being, in the first place, introduced.

"The question now arises," adds the Courier, "as to whether all possible pressure was brought to bear in this particular case. Did Sir Auckland Geddes, as Great Britain's ambassador, make to the United States Government any representations as to the view which this country would take of the bill? Did Sir Auckland's superiors in Whitehall enter any diplomatic protest? Did they in any way attempt to bargain away the more menacing clauses of the bill? Were they informed by Sir Auckland of the menace of the bill prior to its introduction?"

I wonder if the Courier approves of the very offensive false statements of "Bencher," mentioned above, which it quotes under big headlines? Does it consider these charges, which are bound to stir to anger every American with red blood in his veins, as proper "persuasive pressure" and the kind of "representations" Ambassador Geddes should have presented against the bill?

"AMERICAN REPENTANCE" THREATENED.

Quoting the views of a "Man on 'Change," the Liverpool Courier in its issue of May 26 says:

"America will repent, believe me. If she does not repent of her own free will and drop this proposal, she will repent under the persuasion of economic exigencies."

And in the same issue George Milligan, secretary of the Merseyside, Liverpool, area of the Transport Workers' Union, is quoted as saying:

"Such a measure ought to be resisted if possible and America given to understand that she is going to be the one to suffer from her attempt to grab a world trade into her greedy arms."

Other and dire threats, Mr. President! I begin to tremble for our welfare.

In the Liverpool Courier of June 1 last I find what is described as "an exclusive article by Mr. David John Marshall, a distinguished ornament of the American younger journalism and a much-traveled observer." Mr. Marshall is quoted as giving the British public the surprising information that "The American merchant marine consists of all vessels flying the American flag and is controlled by a central authority, the United States Shipping Board. In supreme command is Admiral William S. Benson." I need not say that there are 5,000,000 gross tons of privately owned shipping under the American flag over which the Shipping Board has no control, and that Admiral Benson is not in supreme command.

BRITAIN PROTECTED BY SUBSIDIES.

Mr. Marshall points out that British objection to subsidies is inconsistent. "Great Britain had no scruples in taking away American trade by direct attack some 50 years ago," he says. "Up to the period of the Civil War, 1861–1865, more than a third of the world's total tonnage was under the American flag. The British merchant marine was a very poor second to the American. Now, it is a plain fact, acknowledged by every historian, that the slowness on the part of American shipowners to replace their wooden ships with steel resulted in the loss of America's prestige on the high seas. British owners were enabled to make the change quickly by a well-timed subsidy."

The writer concludes with the statement:

"America must have a merchant marine. Our plan is not to injure Britain. It is to make America secure in event of war."

Permit me to thank the Courier for publishing Mr. Marshall's very sensible comment. He is absolutely correct. We have not the slightest intention or desire to hurt Britain. But we do intend, at all costs, to create a merchant marine that will carry not less than 50 per cent of our foreign commerce and give us just as effective naval auxiliary cruisers and other aids as Britain's merchant vessels furnish her navy.

"EMPIRE MUST RETALIATE," IS CRY RAISED.

Dealing with the question of subsidization, under the headlines, "United States aggression to hit your pocket—Empire must retaliate," the Liverpool Courier in its issue of June 9 last says that care must be taken against the "fatalist argument that subsidies always defeat themselves and that no great shipping industry can be built up with their aid."

I call this argument of that great British newspaper to the especial attention of those Senators who doubt the efficacy of subsidies. The Liverpool Courier continues:

"It is quite untrue historically that subsidies necessarily fail.

"The Japanese merchant service, which so lately as 1890 had only 171,000 tons of shipping, has risen to its present figure of 3,354,000 tons largely through State aid and encouragement at British expense.

"The German merchant service was built up from small beginnings by subsidies, preferential railway rates, and pressure on emigrant traffic to 5,500,000 tons before the war."

Following this tribute to the value of the subsidy policy the Liverpool paper urges retaliation, and winds up with the declaration:

"The belief that the British are devoted to laissez faire is so ingrained in the United States that it is in large part responsible for the present shipping bill, and it would be well to remind the American public that circumstances might arise which would compel the British peoples to a radical change of policy."

Go as you please, gentlemen; we shall not attempt to interfere with any plans you have in mind. In our opinion you have a right to regulate your own affairs; kindly concede the same right to us.

BRITISH BOOBS AND YANKEE GRAB.

Under the captions, "British boobs and Yankee grab—Wangling world trade" (whatever this last may mean), I find in the Liverpool Courier for May 25 last an article declaring:

"The business community is distracted by unessentials while its very existence is threatened. Apathy and dissipated energy are allowing the American merchant and the American shipper to filch British markets."

"The time has come," the article continues, "when British traders will have to speak out plainly against the machinations of the United States in trying to create for themselves a monopoly in international trade."

As specimens of humor, these statements should be ranked highly. With our merchant marine carrying less than 4 per cent of Britain's exports and imports, our filching of British markets and international trade monopoly is not apparent to the naked or even the microscopic eye. I shall touch a little further on this later and continue now with the British viewpoint on "Wangling world trade." The Courier adds:

"It is not sufficient that there should be a vigorous protest by British shipowners. Nothing would please the Americans better than to think they were making the British shipowners squeal. * * * The aim of the United States is clearly to drive our ships out of the freight trade and to secure a monopoly for American trade."

IF THERE IS A SEA MONOPOLY, IT IS BRITISH.

In view of the fact that British vessels, according to the British Government's own figures, carry more of the whole world's trade than all the ships of all the other nations combined, these professed fears that we will secure a monopoly of ocean carrying have a very hollow ring to them.

Does Great Britain assume that our sea trade is her concern alone? The tenor of many of the comments that I have read is that any effort to aid the American merchant marine is directed solely at the British merchant marine. Roughly speaking, American sea trade is divided into three parts, of which our vessels carry one part, Great Britain's another, and the ships of other maritime nations combined the third.

The monthly summary of our foreign commerce issued by the Department of Commerce for April shows the value of the imports and domestic exports for the 10 months ending with April last. Belgian vessels carried $24,000,000 worth of these goods; German, $32,000,000; Swedish, $46,000,000; Spanish, $58,000,000; Danish, $63,000,000; Italian, $120,000,000; Dutch, $162,000,000; Norwegian, $200,000,000; French, $212,000,000; and Japanese, $352,000,000. The vessels of the other smaller maritime nations transported $58,000,000 worth, a total for the ships of the countries enumerated of $1,327,000,000. In addition, American vessels transported $1,540,000,000 worth of goods and British ships $1,605,000,000 worth. Britain, therefore, carries more of our exports than we ourselves do and more than all the other nations of the world combined, but there is a volume of more than a billion and a quarter dollars worth of goods carried in foreign vessels other than British. How, then, can Britain say that the development of the American merchant marine is aimed directly at her?

IS THE UNITED STATES A "BACK NUMBER"?

Another Liverpool paper that has devoted much attention to the shipping bill is the Journal of Commerce of that city. In the issue of April 18 last there is an article, one of whose captions is "United States a back number." The writer of this says that he will "venture the opinion that the States will never prove a serious rival to British shipping," adding that "as time goes on the frantic efforts of the United States shipping legislators to bolster up their mercantile marine by quack remedies will end in a gradual declension of the Stars and Stripes as a factor in the world's overseas trade."

In an editorial in the issue of April 20, however, we find the same paper hinting that the efforts of the United States Government to help the merchant marine "inherently contain the seeds of much trouble with foreign nations." And the hope is professed that the joint congressional committee will consider, among other things, the provisions of the shipping bill in relation to what the Liverpool paper calls "the disastrous effect it (the bill) is likely to have upon the relations of the United States and every other maritime nation in the world."

In the issue of the same paper for May 9 it is declared that there is little doubt of the passage of the bill, and it is further declared that, "Subsidies may prove a considerable help to ship operators in enabling them to meet foreign competition"; but it is declared to be more than doubtful if this aid will prove of assistance in building up such a mercantile marine as the people of the United States desire.

GERMAN CHARGE OF "SECRET" BRITISH SUBSIDIES.

Under date of May 11 the Liverpool Journal of Commerce reprints a dispatch to the Deutsche Bergwerks Zeitung from its Hamburg correspondent, in which it is stated: "In secret the British Government certainly is already granting large subsidies to many shipping companies."

Having declared on May 9 that there was little doubt that the shipping bill would be passed, the Liverpool paper on May 16 makes the editorial prediction that it will "not be at all surprising" if the joint congressional committee "expresses the opinion that it would be more expedient for the United States Government to reconsider the whole question of subsidizing United States ships." On May 30, however, an editorial entitled, "Bolstering up United States shipping," in the same publication, professes that the effects of the protective legislation proposed will be to "kill trade rather than invigorate it," and reprisals are threatened against what the paper calls "this insane policy of the States Legislature." Later issues of this publication are not at hand, but I have no doubt that the flip-flops of opinion still continue.

One of the leading British shipping papers—Fairplay, of London—admits the necessity of an American trade fleet from the standpoint of national protection. In its issue of April 20 last Fairplay says:

"The merchant fleet which America is seeking to gather together under her flag is as to her Navy as her Navy is to it, for without the one she would have no training school for the men needed to man the other, and without the other she would never be safe against attack on the high seas."

AMERICA'S DEFENSE DEMANDS A MERCHANT MARINE.

It is only a few weeks ago that I stood in this Hall and voted for the four-power naval treaty, a document acclaimed as the crowning piece of American diplomacy. That treaty places the fighting power of Great Britain on a parity with the fighting power of the United States on the high seas. But when I voted to ratify that treaty it was with the belief that the commercial sea power of the United States would be raised to something near that of Great Britain by the merchant marine bill urged so forcibly by President Harding. I pointed out then—and emphasize again to-day—that the commercial sea power of Great Britain is not on an equality with our own—not 5 to 5, but far more nearly 3 to our 1, or even 4 to our 1.

We are pledged for 10 years not to increase our battle fleet, and it is impossible for us to reach a position even approaching the naval equality of 5 to 5 provided for in the four-power treaty unless we create a strong merchant marine, well supplied with swift combined freight and passenger vessels which can readily be converted into naval auxiliaries similar to the splendid fleet of such ships owned by Great Britain.

Those who seek to delay, or prevent altogether, the upbuilding of the American merchant marine into an adequate peace-time instrument of commerce not only seek to hamper our national prosperity, but endanger the very safety of our Republic. We can not for the present add to our fighting ships, but in sheer self-defense we must create enough fast naval auxiliaries to make the few fighting ships we have left wholly efficient in any part of the globe to which we might have to send them.

JAPAN BUILDING FOR PROTECTION.

Japan, another signatory power to the naval treaty, already is acting on these lines. The money saved from battleship construction is being turned to fast liner building—emergency weapons second to none in any naval war.

Sir Edward Mackay Edgar is a director of the great British shipbuilding firm of Workman & Clark. In a cablegram from London under date of January 25 last, published in the Denver (Colo.) Post, he is quoted as saying of the proposed bill for an American ship subsidy:

"It is an affront to the heart of England and an indirect underhand plot against British shipping. Shipping is England's basic industry. It is her commercial life. Thereby we stand or fall. It is an underhand blow, and it is directed at England's very existence. But we shall not worry. British shipping will always hold its own. Nevertheless no more absurd suggestion could have been made if America wishes to have the warm friendship of England. Nor could there have been any suggestion more hostile to England."

I would say that if England is not worrying, she is concealing the fact remarkably well, and has a strange way of showing her equanimity.

IMPERIAL COMBINE AGAINST UNITED STATES URGED.

The note of a British imperial combination against the American merchant marine is frequently sounded. Mr. Stanley Baldwin, president of the British Board of Trade, which has extraordinary official powers over shipping, at a dinner of the British Institution of Naval Architects, in April, is reported by Fairplay in its issue of April 13 last as having stated that the British merchant marine "has not only got to face a period of intense competition but also a deliberate attempt on the part of other countries to build up a merchant marine at our—Britain's—expense. Shipping is our lifeblood, and therefore this problem of the mercantile marine is not only a problem for this country but for the whole Empire, and the Empire should draw together and present a united front against any attacks which are made, and it should be known to the world that if any part suffers the Empire will stand as one man."

Fairplay, commenting in the same issue on this statement, says that should the indirect subsidy parts of the shipping bill pass without alteration, "there can be no doubt but that, as Mr. Baldwin also says in effect, retaliatory measures will have to be resorted to, with all the ugly consequences that such action necessarily brings with it."

Mr. HARRELD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Louisiana yield to the Senator from Oklahoma?

Mr. RANSDELL. I shall be delighted to yield.

Mr. HARRELD. All the various quotations that the Senator gives from the English press have reference to retaliatory measures. I presume they mean by that that if the United States provides a subsidy for its shipping, they will retaliate by also providing a subsidy. What would be the effect if the nations of the earth should start upon a system of retaliatory subsidies? If we set the pace and other nations began to meet that by retaliatory subsidies, what would be the effect?

I ask the question because I have an open mind on this subject; I am studying it very earnestly, and I am very much interested in the discussion the Senator is giving.

Mr. RANSDELL. I thank the Senator for the question. I have just quoted from one of these great British publications, the Courier, of Liverpool, in which it shows that the merchant marine of Japan was built up by subsidies from 171,000 tons in 1890 to 3,354,000 tons at the present time by State aid, by assistance such as we call "subsidy." They do not give it that name, but they say "State aid." The same paper, in the same number, refers to the wonderful upbuilding of the German merchant marine from little or nothing to 5,500,000 tons when the World War broke out by subsidies, preferential railway rates, pressure on emigrant traffic, and other measures.

Furthermore, let me say to the Senator that before I am through I shall show that Great Britain herself is at the present time giving very substantial aid to her merchant marine in the way of subsidies. She is giving to the Cunard Line, through what she calls admiralty and postal subventions, about $1,000,000 a year. She treats her ships in the most liberal manner in the carrying of the mail. About 75 years ago we had a wonderful merchant marine which carried between 80 and 90 per cent of our commerce. Great impetus was given to our shipbuilding by discriminatory rates passed in the early tariff acts, and for a few years liberal payments were made for carrying the mail. This was several years prior to the Civil War——

Mr. HARRELD. Mr. President——

Mr. RANSDELL. Wait a minute, and then I will give the Senator every chance. I say, at that time, when we had gone forward wonderfully, Great Britain came in with very material subsidies to aid her ships, and the aid which she gave was most important in building up her merchant marine at our expense. In addition to that, she had the wisdom to take up steam vessels quicker than we did; then the Civil War came on, and all those things combined to hurt us very seriously.

I now yield to the Senator.

Mr. HARRELD. Admitting all that, however, the question I asked was, What would be the effect of retaliatory measures on the part of various countries trying to overcome or head off each other in the matter of granting subsidies? That is my question.

Mr. RANSDELL. Mr. President, I can not say just what would be the effect of retaliatory measures by the various maritime countries, though I do not think they would be very serious for us. I will discuss later somewhat in detail the question of retaliation by Great Britain. I should like to say to the Senator that when the late World War broke out we were carrying only 9 per cent of our commerce in American vessels. Ninety-one per cent of it was being carried by foreign ships, and it was practically impossible for us to send our goods abroad in our own bottoms, as they were so scarce. Certainly we should do something, and I think not only we but every maritime country should do something to have a fair percentage of its own goods carried in its own ships.

Mr. HARRELD. I will make myself clear to the Senator. Suppose that we give a subsidy, and suppose that England gives a like subsidy. Will it have any effect at all on the situation?

Mr. RANSDELL. I do not know what effect it would have on England, and I am not interested in England. I am interested in the United States. If we give a subsidy as provided in the pending shipping bill, beyond any question it will result in building up an American merchant marine which will carry at least 50 per cent of our foreign commerce, and that is all that we are seeking to carry. If we give a subsidy, it will enable us to sell a great many of the ships which were built during the war, and which now are a complete glut on the market, so much so they can not be sold at any price. If we give a subsidy, it will help us to establish a naval reserve to train sailors for the Navy. If we give a subsidy, in my judgment, sir, it will enable us to place on the sea a considerable number of fast combined freight and passenger ships, which in time of stress may be added to the Navy as auxiliaries, and without those ships we can not have an effective Navy, in the words of Fairplay itself, this great English publication. We can not get these auxiliaries without aid of some kind. We have not them now.

Let me remind the Senator that when President Roosevelt sent our fleet around the world, in December, 1907, and continued in 1908, they had to be supplied with colliers, provision ships, hospital ships, and supply ships from the vessels of other countries. We had very few of our own. Our Navy was absolutely ineffective. You can not have an effective Navy without a strong merchant marine.

Mr. HARRELD. I agree with the Senator.

Mr. RANSDELL. We can not get that merchant marine without a subsidy, in my judgment. We have fallen down absolutely for years and years. Both political parties have fallen down. Since about the time of the Civi War, sixty-odd years ago, we have carried practically none of our commerce in our own ships. We have ceased to be a seafaring people. The World War forced us to construct a big fleet of ships. Foreign ships could not carry our commerce at that time. They could not carry their own. The U-boat intervened, destroyed a great many ships, and drove a large number from the sea. Our goods rotted on the wharves. I know that down in my country cotton could not be shipped. Wheat from the Senator's own country could not be shipped. The world was demanding our commerce and there were no ships to carry it. The Old World, the world of Europe, begged us for ships, ships, more ships. We were compelled to build the ships for them. We have them now—over 1,400 of them. We ought to do something to secure their operation. I know of no way in which this can be done, unless we give them the material aid provided in this bill; and I will say to the Senator that it is not subsidy alone. The bill provides a number of other very important things besides subsidy. Subsidy is only one of its provisions. All of those matters will be gone into in detail at the proper time.

"BATTLING FOR OUR PURSE," SAYS ENGLISH PAPER.

Returning to the subject in its issue of April 20, Fairplay, under the signature of the Look-Out Man, says:

"Were it ever found that the British mercantile marine were likely to be put out of existence owing to the peculiar competitive methods of its rivals, I would hesitate at nothing, not even at nationalization, to keep it going."

He seems willing for Great Britain to take charge of all the ships and operate them as a national proposition. I am unwilling, as far as I am concerned, to have our country continue to operate its ships if we can find American citizens to operate them. I am not in favor of Government ownership and operation of anything which the citizens can do just as well. I believe in private initiative, in private enterprise. I do not think we ought to have our merchant marine nationalized, as it is now to a great extent. At first, as a matter of course, we could not do otherwise. We had to build these ships as a war measure. They are on our hands. We had to operate them temporarily. We have done the best we could with them; but just as soon as possible, in my judgment, we should get rid of them.

This Englishman seems to threaten us with "nationalization." All right; if Great Britain wants it, she can have it. I certainly do not want it to continue in America any longer than is necessary, and that is one reason why I favor the pending bill.

This man continues:

"Fights with the raw 'uns"—

I suppose he means the bare hands, the knuckles—

"Fights with the raw 'uns are barred in this country for moral reasons; they tended, I believe, to brutalize the onlookers;

or, perhaps, they gave them a shorter run for their money than they seem to enjoy to-day, when a 20-round affair has even been known to last for six rounds, not seconds, though I fancy that the record has been almost reached. When, however, we are battling for existence, or at least for our purse, down the other fellow's yard, the gentler teachings of civilization and lecture-room logic have to go away and hide themselves. And that, I am pretty sure, is what would happen were the two great Anglo-Saxon races to find themselves at commercial death grips on the waters."

Thus, in prize-fighting lingo, we have the situation presented from the British point of view, chip-on-shoulder fashion, like the old prizefighter who sought to win by shaking his fist and making faces at his opponent.

Such talk is unworthy of a great journal like Fairplay. Its only effect is to irritate its British readers and disgust Americans. The people of this country are more than able to take care of themselves if forced, against their will, into "commercial death grips on the waters." Sane men in England should prevent the repetition of such articles. They are loaded with dynamite. As a real well-wisher of Great Britain, I suggest to Fairplay that it try on its American readers some milder and more persuasive arguments than threats of "retaliatory measures" with their "ugly consequences," and to the "Lookout man" that he "hide himself" for the next five years in "the other fellow's yard" and keep silent.

Mr. HARRELD. Or let "Fairplay" change its name.

Mr. RANSDELL. Yes; let it change its name, as the Senator suggests.

FAIR SHARE OF OUR TRADE IS OUR GOAL.

There is no necessity for hysteria on the part of Great Britain over the proposed legislation by the United States in regard to shipping. Surely no country has just cause for offense at our coastwise laws, which restrict all commerce between American ports, including Alaska, Hawaii, and Porto Rico, to American vessels. Nor can anyone reasonably complain because we desire to have fast vessels of commerce, which in time of war can be speedily converted into naval auxiliaries. Our plan to carry at least one-half our foreign commerce, both exports and imports, including our outbound mail and 50 per cent of the immigrants to our shores, under our own flag, is a logical and proper one, entirely within our legal and moral rights, and no country has valid reason to object to it.

Let us see what a fair share of our carrying trade would mean to us. I have here a table compiled from the records of the Department of Commerce, showing the values of American exports and imports transported by vessels during the calendar years 1919, 1920, and 1921, a period in which there has been a large volume of tonnage under the American flag. In these three years $29,173,000,000 worth of goods moved to and from American ports by water in the foreign trade. Of this amount $18,029,000,000 was carried by foreign vessels, and of this $10,161,000,000 represents the share of British shipping. American vessels carried $11,144,000,000 worth of the total.

BILLIONS PAID IN OCEAN FREIGHTS.

Economic experts figure the ocean freights on goods as averaging about 8 per cent of the commodity value. On this basis foreign ships in American trade during the three years recently ended received $1,442,000,000 in freight money, with $891,000,000 for American ships, or a total of $2,333,000,000 in ocean freights in American foreign trade.

If in these three years our vessels had carried half that trade, instead of somewhat more than a third, there would have been retained in this country $275,000,000 that went abroad to help develop the shipping of our foreign rivals. If we had been able to secure as great a share of our trade as the British have of theirs, we should have kept in this country for the development of our own commerce $663,000,000 that went abroad in the last three years. Even the highest subsidy that has been proposed for the American merchant marine would in three years amount to only a fraction of the figures I have cited.

President Harding, in a recent letter on the merchant marine situation referring to foreign propaganda against the bill, spoke of "a well-screened course of opposition to an outstanding and confident American course" and of "discouragement often insidiously disseminated here." What is the foreign reaction to this?

ACTIVITIES OF FOREIGN PROPAGANDA.

In the London Times of June 23 there appears a dispatch from "Our own correspondent" at Washington, in which it is stated:

"In the President's letter are passages discreetly worded which deserve consideration. The words 'insidiously disseminated' may be taken to refer to the activities of shipping companies of foreign ownership who have in their employ Americans ready and able to exert political influence, and American memories go back 12 years to the discovery by Congress that the German shipping companies then maintained a lobby in Washington for the purpose of thwarting any attempt to give legislative aid to American shipping."

And then follows what, in the correspondent's own words, may be called "passages discreetly worded," thus:

"Congress and the country generally are perhaps inclined to be hypersensitive on the subject of foreign propaganda just now, and any interests who might think it desirable to follow the German example will unquestionably be defeating the object they seek to attain."

A word to the wise propagandist is sufficient. If you must propagandize, go ahead; but don't be found out. That is the "discreetly worded" message sent overseas.

NO ALIEN OPPOSITION TO BE TOLERATED.

On the same date that the London Times dispatch appeared—June 23, 1922—the London Daily Telegraph printed a message from "Our own correspondent," dated New York, which conveys the cheering tidings from a British point of view that the shipping bill, "if it passes at all, may be so rewritten as to be unrecognizable," and adding: "The Washington correspondent of the New York World declares to-day that the Shipping Board officials are in deadly earnest in promoting ship subsidy legislation, and that 'no foreign opposition to the bill will be tolerated.' The last phrase seems rather obscure," says the London paper's representative in New York, "but," he adds, "the suggestion is that there are shipping companies, foreign owned, which have in their employ Americans who know how to marshal political influence at Washington. In the days before the war it was not disputed that the German shipping companies had a well organized lobby here, but outwardly at least there has been no proof of the return of any lobby whatever since the war ended."

Note that in these two dispatches, one purporting to have been written in Washington and the other in New York and both appearing in London newspapers the same morning, the thought is identical and the words in part are identical. Shall we attribute this to mental telepathy between the representatives of British interests domiciled here or to an organized interpretation of the resentment against attempted foreign interference in American legislation?

A somewhat different treatment of the case is shown in the London Morning Post's dispatch from "Our own correspondent" at Washington, printed on the same morning—June 23—as the other two messages.

ANY STICK GOOD ENOUGH TO BEAT A DEAD HORSE.

"Recently," he says, "Senator WATSON [speaking of the Senator from Indiana] materialized a new ghost in the machinations of the British and Italian ambassadors, but it was such a poor and feeble spirit that it vanished into thin air the moment the light was turned on. Now it is the British and other Governments who are maintaining a powerful lobby in Washington to defeat the subsidy bill. Nobody has been able to pick up the trail of these lobbyists or find how their unholy work is done, but any stick is good enough to beat a dead horse."

The feeble spirit's vanishment into thin air is interesting to note, for at the same time this disintegration was accomplished the British ambassador, after a conference at the State Department, departed from these shores on a summer vacation.

I want to call attention to another dispatch in the London Post from its Washington correspondent, published in that paper's issue of June 15. In this the representative of the British publication says that he had interviews with President Harding at Marion prior to his election, and that "the President dwelt upon the importance of the United States having a great merchant marine, not, as he pointed out, because of any antagonism to England, but because, in his opinion, it was necessary for the well-being of America." The representative of the British paper adds: "Mr. Harding's views, however, are not entirely agreed in by his party. Many Republicans believe that the proposed legislation is dangerous and will be bound to create friction with England and other maritime nations, and will not be productive of the results Mr. Harding anticipates. That the bill will be harmful to British interests is admitted."

NO FEAR OF BRITAIN IN CONGRESS.

Note the implication here that there is a sentiment in Congress against the shipping bill because of apprehension that the measure will create friction with England. If any fear of Britain exists in Congress, I am not aware of it; nor do I

believe we will be swerved from our purpose to establish the American flag again on the seas for purposes of protecting the Nation and the Nation's commerce by any such consideration. We would deeply regret serious friction with Great Britain or any other maritime country, but must pursue the course deemed essential to our naval and commercial welfare, even if offense be given thereby. We shall try hard, in carrying out this policy, not to step on any nation's toes, but will do so if necessary. Self-defense is the highest law of nations as of individuals. The shipping bill is one of the most important measures of national self-defense ever presented to the American Congress, and it does not require prophetic vision to predict its passage in the near future.

But the English press holds no monopoly in the matter of sounding warnings to the United States of the terrible consequences that would follow the passage of legislation to aid the American merchant marine. British shipping leaders, equipped with an array of titles thrust upon them by a grateful Government, have been showering us with fatherly, or, should I say, stepfatherly, advice and admonition.

LORD INCHCAPE'S WORDS OF ADVICE.

Lord Inchcape, head of the Peninsular & Oriental Line, for instance, according to the London Times of June 23, made a speech at a recent dinner of the Worcester Old Boys' Association, which was "notable for the references to the prospective American shipping legislation." After describing our maritime ambition as a "natural product of our kinship" to the British, the noble lord declared that our chief difficulty was not one of material but of personnel, and he added that "no amount of Government assistance will produce those ripe fruits of enterprise which must come from development by personal and individual initiative." He felt sure, says the London Times, "that any such legislation as that now contemplated by Congress must from its very nature defeat the object it had in view." Lord Inchcape's company has been receiving British subventions since 1837.

Sir Norman Hill is one of the leaders of British shipping. In an article by him, which appears in the London Times of May 18, he declares that the shipping bill can not be regarded as merely shipping legislation, and that it raises issues of the gravest moment to all international trade. The purpose of the indirect aids provided by the bill, he says, is "to confer on American ships a monopoly in the world's carrying trade with the United States."

SHIPPING BILL "PROVOKES" BRITON.

He further says:

"It can not be that the States are seeking to place additional difficulties in the way of their buyers, still less that they are seeking a quarrel, but the merchant marine bill has already provoked the president of the board of trade to urge that 'the mother country and the dominions should take earnest counsel together on the matter before it was too late, so that we might show a united front against any attempt to discriminate against or to damage the position of our shipping.' Such talk is the despair of every believer in the common benefits conferred by international commerce, and the pity is that it should be provoked by *threats to keep all international trade* [italics mine] with the United States for vessels under the American flag."

Sir Norman Hill seems to run to such words as *quarrel*, *provoked*, *damage*, and *threats*. Where has he heard these threats to keep *all our foreign trade* for vessels under the American flag? If we shall be able to secure a fair share of that commerce—not less than one-half—for our own ships, we shall be satisfied. Britain carries two-thirds of her own trade; we carry less than a third of ours. Britain carries more than a third of our trade. We carry less than a twentieth of hers. If there is a monopoly, who has it? We shall be content if the shipping bill gives us what we hope it will, the carriage of at least 50 per cent of our own sea trade. We are not asking for two-thirds of it as Great Britain carries of hers. If to seek that is to utter a threat, then so be it, for America will never be satisfied with less.

CUNARD LINE HEAD GIVES WARNING.

Sir Thomas Royden is the head of the Cunard Line. At the annual meeting of that company on April 26 last he touched on the shipping situation, saying, in part:

"Once equality of opportunity for all vessels employed in international trade is denied by any one nation, the door is opened for every kind of retaliation, the end of which probably no one can foresee."

Observe that this note of protest against subsidies to aid American shipping comes from the head of a British shipping company most heavily subsidized by the British Government, which turned over to it practically as a gift two of the finest trans-Atlantic liners ever built—the *Mauretania* and the *Lusitania*. The total subvention—or, as we would say, subsidy—Admiralty and postal, of the Cunard Line amounts to about $1,000,000 a year. Surely its head should, in all decency, remain silent on the subject of subsidies. This Cunard subsidy is fully explained in Appendix C.

Sir Thomas's words, says the Liverpool Journal of Commerce in an editorial appearing on April 27 last, "will no doubt be carefully weighed by the United States authorities, but they demand the attention also of our own Government."

RETALIATION CRY AGAIN SOUNDED.

Still another titled Briton who sounds the retaliation cry is Sir Owen Phillips, M. P., head of the Royal Mail Steam Packet Co., a continuous beneficiary of Britain's "subvention" system since 1842. At the annual meeting of that company on June 1, Sir Owen made an address, which is reported in the London Daily Express of June 2, under the headlines "Hint to America—Retaliation for shipping discriminations." "A warning intended for America on the risk of discriminating against British shipping was uttered," by Sir Owen, says the London paper, which quotes the speaker as saying:

"Great Britain has stood for centuries for the freedom of the seas and extends to vessels of all nations the same treatment in all respects as to her own. It is to the interests of all that the seven seas should be free, and I hope that all discriminatory measures may be dropped. If, on the contrary, foreign nations impose restrictions and penalties against the British merchant marine, it may be necessary for Great Britain, in self-protection, to reconsider her position. There is an act of Parliament of 1853 which has been on the statute book for 70 years giving the British Government at any moment power to take immediate measures to protect her mercantile marine against unfair discrimination."

What is this terrible rod that Great Britain has in pickle for us? Some light is shed on the subject in the June 21 issue of the Syren and Shipping, of London, which states that Sandeman Allen, head of the Liverpool Chamber of Commerce, has disclosed the fact that the chamber has approached the British foreign office with regard to the injurious effect which the United States merchant marine bill would have upon commerce and upon that of Liverpool in particular. Mr. Allen also referred to the customs consolidation act of 1853, which he said might be utilized. This act, according to the British publication, provides that in case discrimination in duties or charges are made against British vessels, it shall be lawful by order in council to impose like treatment upon the vessels of the country discriminating. In other words, Great Britain can adopt measures similar to those proposed by us for the protection of our merchant marine. And why not? We have no objection.

COASTING TRADE RETALIATION PROPOSED.

As an example of the proposed retaliation, I quote from a report of Donald Macleod & Co., British shipping brokers, appearing in the Shipping Gazette, of London, issue of March 27 last. This statement, after referring to the proposal to extend our coastwise laws to the Philippines, says:

"Great Britain could at once retaliate by including in our coasting trade the trade between England, Canada, South Africa, India, and Australia and bar these trades to American and other foreign tonnage."

I would call attention to the British Government's trade figures for May last, showing the trade between Great Britain and the countries mentioned in terms of net tonnage of the vessels with cargoes in those trades. These show that the only American shipping entering British ports from any British possessions was 7,238 net tons from British North America, and in the same month not a ton of American shipping cleared a British port with cargoes for any unit of the British Empire.

A 99 PER CENT BRITISH PROPOSITION.

Stress is frequently laid by British interests on the fact that the coasting trade of Great Britain is open to the ships of all nations. Let us see how much of an aid this is to non-British shipping. In the same report for May that I just cited figures are given that entrances and clearances of ships with cargoes in the coasting trade during that month aggregated 4,327,889 net tons, of which the total for all foreign ships was 14,268 tons and for British vessels 4,313,261 tons. The British share of this total was 99.6 per cent, and the foreign share, including American vessels, if there were any, was four-tenths of 1 per cent.

If British retaliation should succeed in barring the trades named to vessels under the American flag, the loss could hardly be described as more than infinitesimal.

We have heard a great deal about "equal opportunity for the ships of all nations" as the keystone of British commercial policy. And always the thought is accompanied by the suggestion that British generosity and good will are responsible for this policy. Let us see.

THE BRITISH GOVERNMENT'S SHIPPING POLICY.

Here is an official British Government document published by His Majesty's stationery office, London. I may say in passing that I have the originals of the documents to which I am referring. I shall not take up the time of the Senate to quote directly from them, but I have all of them here on my desk. The one to which I now refer is called "Reports of the departmental committee appointed by the board of trade to consider the position of the shipping and shipbuilding industries after the war," and it is dated 1918. The chairman of the committee was Sir Alfred Booth, of the Cunard Line, and among its members was Sir Joseph Maclay, subsequently appointed British shipping controller.

The question of the advisability of Great Britain's adopting a policy of discrimination in favor of its merchant marine is dealt with on page 196 of this document. The question, as put in the report, is: "Should British shipping be accorded preferential treatment over the shipping of other nations?" And the answer of the committee is as follows:

"It is well to realize that an affirmative decision would involve a reversion to the general principles of the navigation laws. Preference to British shipping might take three forms, each of which could be used in combination with one or both of the other two, viz:

"1. Preference in respect to port facilities;

"2. Preference in respect to shipping and port dues; or

"3. Preference in respect of the imports and exports carried in British vessels.

ENGLAND'S REASONS COMMERCIAL.

"Of these forms of preference the first would be difficult to enforce, and the second would, in our opinion, be ineffective unless the dues in question were made exceedingly onerous. Whatever the merits of preference in this connection, we should deprecate the imposition of port charges or shipping dues on a scale higher than is necessary to defray expenses. We are thus left with the third form of preference, which involves flag discrimination in the purest form. We have only to examine the nature of our carrying trade to see the undesirability of adopting any such policy."

I want to pause just a moment to point out the significance of the wording of that last sentence. Note that nothing is said about *equal opportunity for the ships of all nations*. The question is considered not on the basis of the world's carrying trade but on the basis of the carrying trade of Great Britain. A cold, clear-cut business proposition. And then follows the admission of this British Government committee that the ships of Great Britain carry more of the world's trade—not merely British trade, mark you—than the ships of all the other maritime nations of the world rolled together. And this is the country that charges us with seeking a monopoly of the seas.

OVER HALF WORLD'S TRADE BRITISH CARRIED.

The report says, page 196:

"Before the war we owned nearly one-half the world's shipping and we carried over one-half of the world's trade." And figures are given showing that the entrances of British shipping in 1911 represented 71 per cent of the trade between the British Empire and foreign countries and the interimperial trade. And, in addition, they carried 29 per cent of the trade between foreign countries—trade in which the ships never touched at a British port. Think what that means. As the British committee puts it, "Only the interimperial trade would be immune from retaliatory action by foreign countries. The trades between foreign countries would be exposed to retaliation of both terminals, whilst the trades between the empire and foreign countries would be liable to retaliation at the foreign end."

It is *good business*, is it not, when Britain is carrying the bulk of the world's trade, to seek to safeguard its ships engaged in transporting goods neither the buyer nor the seller of which is British, but it is a *more than equal opportunity* that Great Britain seeks for its merchant marine. As the committee states:

"The adoption of a discriminatory policy would, therefore, hit with great severity that portion of our shipping which trades between foreign countries, and especially the tramp interest, at the very time when it will be necessary to make every effort to recover our former ascendancy in the distant trades and to repair the very grave damage caused during the war to the tramp owners' position."

WHAT "ASCENDANCY" MEANS FOR BRITAIN.

I call attention to the British committee's own figures to show what that so-called "ascendancy in the distant trades" means. In 1911, the year for which records are given, it meant 67,000,000 tons of British shipping, and in that same year 123,000,000 tons of British vessels entered ports in the trade between the empire and foreign countries and 41,000,000 tons in the trades between the units of the British Empire, a grand total of 231,000,000 tons. And last year the total entrances of American ships at all British ports, according to the record of the British Board of Trade, were 2,744,000 tons, and of that total 2,313,000 tons came direct from the United States. And in the same year, still according to the British Government's figures, British ships entering British ports from the United States alone, with cargoes, aggregated 5,551,000 tons.

Having shown that it would be bad business to seek discrimination in favor of British ships, the British committee gives brief consideration to the international aspect of the situation. "One argument against a policy of discrimination remains to be stated," that body says, "and it is one that in our opinion overrides all others. Whatever may be the merits or the practicability of a League of Nations after the war, it seems clear that our object must be to eliminate the causes of international friction which might lead to future wars. International commerce will be more than ever necessary after the war, and it would be deplorable to set out on a course which would hamper the natural flow of trade and lead to endless quarrels among the maritime nations of the world. Freedom of the seas in the sense of equal treatment of all flags in all ports should therefore be a cardinal principle in our postwar policy."

"ENDLESS QUARRELS" AND "FUTURE WARS" HINTED.

Note how the keynote of this argument of 1918 crops up again and again in the threats, veiled and unveiled, of the British editorials, interviews, and statements I have read from British publications. Having decided the case on its merits as a business proposition, Britain now puts as a tail to its kite the beauties of international comity, coupled with hints of "endless quarrels" and "future wars" if the policy that is most advantageous to the maintenance of her maritime monopoly is not complied with.

But the report winds up its conclusions on the subject of the most profitable marine policy by a return to the purely commercial principles.

"Our conclusion then is, and must be," says the British committee, "that the only policy which can meet the position is one which, instead of giving preference at home, will secure the grant of national treatment to British shipping in the fullest sense abroad. Action should be directed toward maintaining this treatment where it is already given and toward securing it where it has hitherto been withheld. So far as maritime policy is concerned, this is the most effective support that His Majesty's Government can give to Britsh shipping during the difficult period of reconstruction."

"MAINTAIN MONOPOLY" IS THE KEYNOTE.

In other words, the fixed policy of Great Britain is to maintain the status quo where that status is favorable to its ocean monopoly and to secure a favorable status where an unfavorable one exists. Is this a policy based on the interests of the world or on the interests of the British pocketbook?

At Paris on July 10, just a few days ago, there was held a meeting of the International Chamber of Commerce's council, at which resolutions were adopted on the subject of shipping measures. Note the reproduction of the British argument in the resolutions adopted, which read as follows:

"That the International Chamber of Commerce desires to call attention to the recent development in the various countries of the practice of flag discrimination and to record the conviction that such action is inimical to the prosperity of international commerce."

International commerce, so far as the carriage of the goods is concerned, be it noted, is more than half British. The resolutions continue:

"That the claim upon which such practices are based, namely, that the trade of any one country belongs to the mercantile marine of that country, is unsound and can not hope for acceptance by the commercial world in general, and that in times of peace the benefit of freedom of the seas can only be secured by equal opportunity in all ports for vessels of all flags."

WE DO NOT SEEK TO CARRY ALL OUR TRADE.

That these resolutions deal with our movement to aid our own shipping is not to be doubted. And here again we have the false claim advanced that we are seeking for our merchant marine the *entire foreign trade of our country*, whereas all

that we ask and all that we hope for is a fair share of that trade. What maritime nation seeks less?

The voice of the resolutions that I have just read may be *international*, but the accent is decidedly *British*. Are we to regard this as a step in a British campaign to arouse the other foreign maritime nations on the false charge that the United States seeks a monopoly of the ocean carriage of its exports and imports?

Moreover, these resolutions enunciate a false economic principle in denying that the trade of any one country belongs to its own merchant marine. Every country has a moral and legal right to carry its own commerce under its own flag if it desires to do so, without let or hindrance from anyone. Any other doctrine would be monstrous and absolutely subversive of the freedom of independent governments. The only question to be determined by a nation in establishing and regulating a merchant marine is one of practical business convenience and advantage.

SHALL WE RELY ON FOREIGNERS TO PROTECT US?

Is it for the best interests of the United States to permit foreign countries to furnish colliers and other supplements to our Navy, as was done during the famous world cruise of our battleships in 1908, or should we have a supply of all such vessels in our own merchant marine? Is it best for foreign ships to continue to carry 91 per cent of our vast overseas commerce, as was done for years prior to the late World War, or should we utilize the immense fleet we were forced by the exigencies of the war to build at enormous cost, when foreign shipping went to pieces, so as to make of it an effective aid to our Navy in time of need, and a carrier of a large percentage of our foreign trade? America makes but one answer to this question. Other nations must decide it for themselves as their respective interests dictate. Their right to do so is undoubted.

I have tried to outline the British case against the American merchant marine, as stated in British expressions of opinion.

There can be no stronger tribute to the efficacy of the measures which it is proposed to take to aid American shipping than the fact that our chief competitors on the high seas are so strongly opposed to having us adopt those measures. Every admonition, every warning, every threat, that comes from foreign sources argues the value of the legislation contemplated, from the American standpoint. If we fail to give the assistance needed to protect our merchant marine from extermination we shall be in the position of having yielded to the threats of our competitors.

FOUR PER CENT OF ENGLAND'S TRADE OUR SHARE.

Shall we be content to continue, as we are now doing, carrying 4 per cent of Great Britain's trade while she carries nine times that much of ours? Shall we be content to go on, as at present, carrying less than one-fifteenth as much of Britain's trade as she herself carries, while at the same time she is transporting a greater proportion of our foreign commerce than even we ourselves do?

In the face of these facts, what credit can be given to the repeated British assertions that we are seeking a monopoly of the carriage of our imports and exports? What we are seeking, and what every maritime nation is justified in seeking, is a fair share of the ocean transportation of the nation's foreign commerce, at least 50 per cent. Would Great Britain be satisfied with a smaller proportion of her trade? Her ships transport two-thirds of the commerce of Great Britain, nine-tenths of the trade of the British possessions, and nearly a third of the trade between all the other countries on the globe, trade in which the British ships engaged do not touch at a British port coming or going. Great Britain carries more than half of the sea trade of the entire world, according to the statement of an accredited committee of the British Government. Our share of this trade is undoubtedly well under 10 per cent. And yet Britain talks of our striving to secure a monopoly of our ocean commerce.

THE BRITISH GOVERNMENT'S OWN FIGURES.

Consider in this connection what is shown in the report for May last of The Trade and Navigation of the United Kingdom, prepared by the British Board of Trade and ordered printed by the House of Commons, the last month's record that I have found available. According to this official document the entrances and clearances at British ports of vessels carrying cargoes and engaged in the direct trade between Great Britain and the United States, including both exports and imports, totaled 1,428,000 net tons, of which 985,000 tons represented British vessels, as compared with 321,000 tons of American vessels and 122,000 tons of foreign ships. In other words, in our direct trade with Great Britain our ships carried only 22 per cent of the commerce as against 70 per cent for British vessels. And in this same month, still according to the British official figures, only 25,000 tons of American vessels arrived at British ports from other than United States ports, and not a single ton of shipping under the American flag left the United Kingdom for any country save the United States. Is that monopoly? Is it a fair share of our trade for ourselves?

No; the boot is on the British leg. The monopoly is hers. More than a fair share is hers, and she is well satisfied to have the present arrangement continue, with American ships laboring under economic handicaps that make it impossible for them to compete with the foreigner in foreign trade.

It is well to consider how the American merchant marine which it is sought to establish permanently came into being. There is evident in some of the British opinions which I have quoted a tendency to profess that we are making an unkind return to Great Britain, for what? Well, we are told, for instance, by the Liverpool Courier that England "out of pure sentiment for America" agreed to a reduction of naval armaments, to an alteration of the Anglo-Japanese alliance, and that consideration for us has affected her handling of the Irish situation. I do not know in what respect, but there it is. And in return for all this we are told we have done "worse than nothing."

OUR FLEET BUILT TO AID ALLIES.

When we had entered the late war the cry of the British was for "ships, ships, more ships!" to repair the ravages wrought by the U-boats. A member of the British cabinet, Mr. Barnes, the labor representative, declared in Parliament early in 1918 that we were failing Great Britain and urged intensification of output. Our answer to these calls for aid is the great body of shipping to which it is now proposed to extend economic assistance that we may have a merchant marine worthy of our standing among the nations of the world. Shall we scrap it because Great Britain now discovers that she does not want the ships she called for to end the war and which played a part in accomplishing that?

The threats which so plentifully besprinkle the majority of the British opinions which I have cited I merely want to allude to in passing. The old bogey of retaliation has done service so long and has so often been shown to be a straw man that it is now nothing more than a badly worn piece of theatrical property. The methods that we have proposed to apply for the aid of the American merchant marine are, of course, open to any other maritime nation to adopt in aid of its own shipping if it sees fit, and we shall not complain. Our 4 per cent of the carrying trade of Great Britain, for instance, can not be whittled down much further without reaching the vanishing point, and under the present unprotected condition of American shipping it seems to be steadily slipping toward zero.

WAR WITH ENGLAND UNTHINKABLE.

Of the threats of war, whether discreetly or undiscreetly worded, I want to say still less. They are unworthy of their authors and very offensive to patriotic Americans. England tried coercion on America without success 146 years ago, when we had only 3,000,000 people, were much divided in opinion and action, and very weak financially. She could hardly expect better results by force at this time, as we now have forty times as many people, closely united in patriotic bonds, and with developed resources of every kind in proportion. War between the two countries is unthinkable, and no real patriot in either should contemplate it for a moment. The Englishman who talks of war, either actual or commercial, with the United States is a dangerous animal and should be muzzled.

No maritime nation can contemplate the possibility of conflict over the right of another maritime nation to handle a fair share of its own commerce, all bluff, bluster, and braggadocio to the contrary notwithstanding. We shall not be swerved from our just purpose by this, nor by propaganda, whether it be disseminated within the shadow of the Capitol or overseas.

OPPOSITION IS ANTI-AMERICAN.

Mr. President, I desire to say here and now, with all the emphasis in my power and with due respect for my colleagues in both Houses who differ in opinion, that a vote against the bill to aid the American merchant marine is a vote to aid Great Britain and to injure the United States, a vote to destroy, perhaps forever, our chances of an adequate place on the high seas.

In conclusion, I would ask just this:

Shall we play the game of our commercial rivals by stifling legislation to establish a merchant marine of our own for our national and industrial protection, when by so doing we would turn over to them the undisputed monopoly of the seas?

In a word, shall we allow Great Britain *to dictate our sea policy* and leave us in commercial bondage for generations to come? Shall we permit her to set up on the high seas a notice

reading: "British property! Americans keep off!" I say no, a thousand times no!

Mr. President, I ask unanimous consent that all quotations and extracts during the course of my remarks may be printed in 8-point type.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Without objection, it is so ordered.

THE MUSCLE SHOALS PROJECT.

Mr. KENDRICK. Mr. President, the chairman of our Committee on Agriculture and Forestry, the Senator from Nebraska [Mr. NORRIS], this morning submitted a report on the efforts of that committee to pass upon the question in connection with Muscle Shoals. I want to employ just a few minutes in explaining my attitude on that question.

As a member of the Committee on Agriculture I have exercised every diligence in an effort to inform myself as fully as possible concerning the Government's interest at Muscle Shoals. In doing this I have, in so far as other duties would permit, been a regular attendant at the committee's hearings and have carefully studied the several different propositions made to the committee for the purchase of Government property and the leasing of the power plant.

It was my privilege to accompany other members of the committee on an investigating trip to Muscle Shoals for the purpose of inspecting the work already done on Dam No. 2, together with the nitrate plant, the steam power plant, and the extensive construction of buildings. Both the amount of money expended and the various forms of construction involved in the Government's investment at Muscle Shoals preclude the possibility of finding an easy solution of the problem. The very nature of the development reduces its efficiency for industrial purposes, and to that extent decreases its commercial value. Here I want to attest to the unusually substantial character of construction involved in that part of the dam already completed, in the enormous steam plant located near by, and the tremendous buildings included in the great nitrate plants, as well as a great many of the hundreds of buildings used in housing employees.

Even a superficial study of the situation would compel the conclusion that the problem involved in the disposition or administration of Muscle Shoals is not a simple one. From my viewpoint the more haste employed in these negotiations the more wasteful will be the cost to the Government, and for this reason it has been my conviction from the start that the proper permanent solution required careful study and just as careful negotiation.

Upon one point there was complete concurrence on the part of every member of the committee, in so far as I know, who visited Muscle Shoals, and that was the unquestioned necessity of proceeding at once upon a plan to complete and equip Dam No. 2. Under the circumstances no other conclusion could have been reached. The investment already made involved about $17,000,000; and while this did not include quite as much as half of the final amount required in the construction of the dam, the work already completed renders the balance of the construction, as stated to us by the engineers, very much less difficult than the original work. As the situation now stands we not only have this enormous investment, which is rendering no service to anyone, but a very extensive outlay in connection with preparation for continued construction in the way of necessary cofferdams and other improvements, all of which deteriorate very rapidly when unused.

This unsatisfactory situation is further complicated by the fact that at the beginning the construction necessarily discontinued or interrupted navigation on the river through the closing of locks which had previously been used; so we have the enormous investment already made in the dam serving no purpose, but actually obstructing the river. Therefore, among those who had an opportunity of personal inspection, so far as I know there was no difference of opinion, but there was a general agreement that Congress should at once appropriate funds for continuing the construction of Dam No. 2, and carry it on to its final completion. We were informed by the engineers in charge that it would require at least three low-water periods to complete this work.

In view of the fact that actual production must be contingent upon the completion of this dam, I have, as one member of the committee, been unable to believe that any useful purpose would be served by undue haste in concluding negotiations under which this great Government property is to be leased and permanently operated.

Among the several propositions submitted to the committee the one made by Henry Ford was, for many reasons, the most satisfactory in its provisions. The primary purpose of the Government in building this great dam was for the production of nitrate to be employed during the emergency of war and for the more general and continued use in the manufacture of fertilizer. Mr. Ford proposes not only to produce annually a minimum amount of fertilizer containing at least 40,000 tons of fixed nitrate but to maintain the nitrate plants in first-class condition and deliver them to the Government in the emergency of war.

While Mr. Ford's offer of $5,000,000 for the Government's investment, amounting, as I recall, to sixty-five or seventy-five millions of dollars, not including the dam, represents a very low junking value, from my viewpoint it was more satisfactory than any other offer received by the committee. I frankly confess that Mr. Ford's genius as an organizer or captain of industry prejudiced me very materially in his favor. As it appears, he not only makes a success of his enterprises but the benefits of that success are shared in by his employees and the entire community in which he is located. On account of such facts—and they seem proven facts—I was strongly prejudiced in favor of his proposition.

My principal objection to Mr. Ford's offer was the length of time stipulated as the shortest lease he was willing to accept, that of a hundred years. As is well known, there is a limitation of 50 years in our water power act; and I agree with the statement of the late Franklin K. Lane when he said, in effect, that we ought not to deny for a longer period of time than 50 years the right of those who come after us to pass upon the disposition of our natural resources; and I am inherently opposed to a lease that would have the force and effect of an actual transfer of control of this great power site to any corporation for a longer period of time than included in our water power act. For this reason I voted against the Ford proposition as it was made.

There are other serious objections to the Ford offer, but the length of the lease is fundamental. The condition under which the Government is required to turn over its interest in the Gorgas steam plant, situated 75 miles from Muscle Shoals, is, from my viewpoint, both inconsistent and unnecessary. This plant is so intimately connected with and even interwoven into the property of the Alabama Power Co. that it would be practically impossible, as I view it, to separate the one from the other. According to my information, it is also true that when the Government arranged for the use of this property during the war, one of the conditions named in the agreement with the Alabama Power Co. was that this company should have a preferential right to buy the Government's interest at the close of the war. If this information is correct it would be practically impossible for the Government to turn over its interest in this plant without a violation of good faith.

Then, again, Mr. Ford's offer provides for the payment to the Government of a fixed rate of interest on the additional or future cost of Dam No. 2, but does not include any income whatsoever upon the cost of construction up to date, amounting, as I understand it, to about $17,000,000. In all probability the amount already expended has been on a higher cost basis than would be necessary under normal conditions; but even in such event the quality of the work is first class, and from my viewpoint there is no reason why anyone deriving the benefits of the great power plant should not pay for the amount already invested, less the excess cost due to war conditions. If, as an illustration, the construction to date has exceeded the normal cost by one-third, then this estimate might be taken on a basis of two-thirds; but, to place the proposition on a business basis, Mr. Ford's offer should include a payment of interest on the construction already completed, estimated at a normal cost.

The two last-named provisions, however, have to do entirely with a rate of income on an investment and involve only a matter of dollars and cents. The length of the lease involves with me a fixed principle, and if Mr. Ford's offer were modified to meet this condition I would be very glad, as one member of the committee, to vote for its approval.

THE MERCHANT MARINE.

Mr. CARAWAY. Mr. President, inasmuch as the whole day so far has been taken up in talking about matters not before the Senate, and yesterday was likewise devoted to the discussion of wholly irrelevant matters, I presume I am justified in believing that there is no further intent to press the pending tariff bill. I am not at all astonished that the proponents of it should have reached that conclusion, because they have even fallen out among themselves about the wisdom of going forward with it, and no two agree. If it is pressed to a conclusion we will reach the unhappy condition that there will be no two members of the majority party on speaking terms, and I do not want to see that happen if it can be avoided. Of course, I think it would be to the interest of the country, but there are some personal reasons why I hate to see them differ among themselves.

The Senator from Louisiana [Mr. RANSDELL] read an essay here nearly three hours in length. When he got the floor, the Senator from Washington [Mr. JONES], who was his advance agent in that particular enterprise, suggested the absence of a quorum, and warned all of us that something of very great importance was to be said by the Senator from Louisiana. There were six Senators present when the Senator from Washington made the point of no quorum. When these found out what the subject matter was, there were three who stayed. One of them was in the chair; one had the floor; and they, together with the "watchdog" on the Republican side, who has to stay regardless of how much it affects him, constituted a very, very appreciative audience. I could tell from the contortions of their faces that they were enjoying it. They were trying, by looking sad, to keep from laughing.

This is what I wanted to say, and when I shall have said it I will be through. The Senator from Louisiana said that there was a pro-British party in this country trying to defeat the ship subsidy bill. Whenever a man gets a cause that is so bad that nobody will espouse it, he then tries to asperse the motives of everybody who disapproves it. Such an assumption as that expressed by the Senator is just as fair as an assumption that the Senator from Louisiana and the Senator from Washington, who are so actively pressing this matter, want to increase the amount of liquor that can be sold, because every ship that flies our flag is a saloon, and every ship that flies our flag will be a saloon as long as the present President is President and the present Attorney General is at the head of the law department. It is just as fair, then, to assume, it is just as near the truth, and everybody will come as near believing it, that the Senator from Washington and the Senator from Louisiana are running a propaganda to increase the number of barrooms in America, as to say there is a pro-British party that is trying to defeat this legislation favorable to a ship subsidy in the Senate, and therefore drive Senators into supporting this infamous measure.

I am weary of Senators bringing in measures which are so repellent, and trying to drive other Senators into supporting them, or at least not openly opposing them, by intimating that some foreign influences are trying to defeat them.

I spent the summer of 1918 in France, and I have heard more talk of German invasion here in the Senate since the tariff bill has been before the Senate than I heard of German invasion all the months I was in France. There are certain Senators who come on the floor only when schedules in which they are interested are to be discussed and voted upon, and say, "Oh, well, if you don't support my schedule you will have a German invasion." Now we have a British invasion of our shipping interests threatened.

It strikes me that when the time comes that nothing can be said for a measure except that some foreign interest is opposing it we have reached the end of argument, and the Republicans might just as well defeat this tariff bill to-day as to defeat it next week. They do not intend to vote for it. They do not want it. They may get it to conference, but the seat of any man who has to go to the people this year, and who votes for that bill, will not be worth a canceled postage stamp. They know it, and they do not want to vote on this matter; and long essays like the one read by the Senator from Idaho yesterday, who got up on a word and teetered like a boy on a sharp paling, and this long one to-day, do not fool anybody except the two Senators who read them. They are killing time and do not want to pass this measure.

It has gotten in the Senate so that Senators feel like a negro did down in my country one day when he was to be hanged. After the sheriff got him on the scaffold, he said, "Rastus, you have 20 minutes to make a statement if you want to make one." The negro said, "I don't know that I have anything to say." A lawyer standing by, who was as fond of talking as the junior Senator from Idaho is of speaking, and about as interesting, got up and said, "Well, if Rastus don't want to speak, I would like to have the time." The sheriff said to the negro, "Do you want to give your time to this lawyer?" The negro replied, "I don't know as I care, but if he is going to make a speech I wish you would hang me first."

So some Senator comes into the Senate with a stack of manuscript as thick as your two hands, rises with a solemn look, and everybody gets his hat and goes. Of course, if that is the way to conduct the Senate, the majority party has the opportunity to manifest to the country just how they think the pending legislation ought to be discussed.

AMENDMENT OF COTTON FUTURES ACT.

Mr. DIAL. Mr. President, it is generally believed that there is something radically wrong, and has always been wrong, in the method of marketing the cotton crop. The question is to find the defect and to apply the remedy; both are apparent. The wrong is the indefiniteness in the contract and the remedy is to correct this.

The interest of the grower or owner of spot cotton and the interest of the buyer of a contract is identical until the time when the buyer of a contract disposes of it—both want the price to advance. The seller of the contract desires the price to decline, and when this takes place the price of spot cotton falls. There are only 10 grades of cotton tenderable under the law. I have no objection to increasing the number. The seller has the right to select whichever of these 10 grades he desires.

The futures market controls the price of spot cotton; therefore it is absolutely essential that such a contract be fair, equal, mutual, equitable, and just. The contracts are bought and sold on the basis of middling, and in case that grade is not delivered and some other grade is tendered the Secretary of Agriculture has the right under the law to fix the price of the other grades at the average price in 10 spot markets.

When maturity day is approaching the purchaser, not knowing within 10 grades of the quality of the cotton that will be tendered him, naturally sells out; hence the market is top-heavy. True, it can be said that there is a purchaser for every contract, but the fallacy of this argument is that he is not a purchaser at value when he does not know the quality or the grade he will receive, and he will only buy at a depreciated price. This might be unobjectionable between the purchaser and the seller, because each acts with his eyes open. My unending complaint is that such a system depresses and depreciates the price of the actual cotton and that the farmer has the brunt to bear. There is no similar custom or law in the world. This reverses the usages, laws, and customs of all business, and is an abrogation of the principles of common sense.

In 1920 there were grown in the United States 13,340,000 bales of cotton, and there were contracts sold on the New York and New Orleans exchanges alone for 128,907,500 bales, and during that time the actual number of bales delivered were 267,700 in New York and 106,600 bales in New Orleans. This is outside of the exchanges at Liverpool, Bremen, Havre, and other places. It is probable that every bale grown in the United States was sold on an average of twenty-five times over before it reached the consumer.

We all admit that overproduction depresses the price of a commodity; this being true, does not overselling have the same effect? Why should cotton fluctuate from $1 to $10 per bale in a single day? Goods sold at wholesale are sold on sample. Would any sensible person give as much for a contract for any commodity which could be delivered in 10 grades or classes, not knowing which of the 10 he would receive, as he would give provided he knew the exact quality he would get? For example: Suppose there were only 10 grades of hats or shoes allowed to be traded in by law and that contracts had to be on basis of the middle grade, with the right to the seller to select all the quantity in qualities he desired, would anyone give value for that kind of a contract? The proposition within itself is an absolute absurdity. The present law is a plan, or a system, or a scheme, or a method which deprives the grower of a tremendous proportion of the value of every pound of cotton he raises. By allowing this law to continue, Congress is unknowingly arrayed on the side of the bear against the producer. The present law is a great improvement over the former custom. Under that custom anyone of 32 grades were tenderable; this law reduced the number to 10. I am not complaining about the 10 grades, but there is too much latitude allowed the seller in filling each particular contract. They should be grouped. It took Congress exactly 30 years to get the law passed, to wit, from 1884 to 1914. I mention this to show the slowness with which Congress acts—and this must be said to its shame.

It is claimed by some that my amendment will injure the exchanges. This is not my purpose. I am endeavoring to pass a fair, just, equal, mutual, equitable, and honest law under which everyone must operate, and if the exchanges can not exist under this kind of a law, they can retire, so far as I am concerned. My complaint is the injurious effect of exchange operations on the price of spot cotton. We should be reminded, however, that there are no exchanges where coal, iron, steel, wool, and so forth, are traded in.

The wrong has been pointed out above and the remedy is suggested below, to wit:

Divide the 10 tenderable grades into three classes—high grades known as class A, medium grades as class B, and coarser grades as class C. This is similar to grain contracts.

My amendment requires the seller to be obligated to deliver one-third of his contract in the basic grade in each class and the remaining two-thirds either in that grade or in the other

grades enumerated in that class. This will make the contract elastic enough to encourage trading and at the same time definite enough to be practical and more valuable. By making the contract more valuable we help the price of spot cotton. No mill making one kind of thread or cloth can use all of the 10 grades of cotton. Furthermore, I am told an exporter receiving an order for one grade of cotton is allowed to fill it in either of the contiguous grades. I am also told that on the Liverpool Exchange the seller is allowed only three grades in which to deliver one contract.

I ask that the amendment to the pending tariff bill, which I submitted two days ago, be printed in the RECORD as a part of my remarks.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

Amendment intended to be proposed by Mr. DIAL to the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, viz: On page 131, after line 20, insert the following:

That the second subdivision of section 5 of the United States cotton futures act, approved August 11, 1916, as amended, is amended to read as follows:

"Second. (a) Specify as the class of the contract one of the following classes:

"Class A, which shall include only middling fair, strict good middling, good middling, and strict middling grades;

"Cass B, which shall include only strict middling, middling, strict low middling, and good middling yellow tinged grades;

"Class C, which shall include only strict low middling, low middling, strict middling yellow tinged, and good middling yellow stained grades.

"(b) Specify the basis grade for the cotton involved in the contract, which shall be one of the grades for which standards are established by the Secretary of Agriculture, and which shall be one of the grades included within a class in paragraph (a) of this subdivision; the price per pound at which the cotton of such basis grade is contracted to be bought or sold; the date when the purchase or sale was made; and the month or months in which the contract is to be fulfilled or settled.

"(c) If no other class is specified in the contract, or in the memorandum evidencing the same, the contract shall be deemed a class B contract.

"(d) If no other basis grade be specified in the contract, or in the memorandum evidencing the same, good middling shall be deemed the basis grade incorporated into a class A contract, middling shall be deemed the basis grade incorporated into a class B contract, and low middling shall be deemed the basis grade incorporated into a class C contract."

SEC. 2. That the third subdivision of section 5 of such act is amended to read as follows:

"Third. Provide that the cotton dealt with therein or delivered thereunder shall be of or within the grades for which standards are established by the Secretary of Agriculture, and of or within the grades included within the class so specified or incorporated as the class of the contract, and that cotton of any other grade or grades shall not be dealt with therein nor delivered thereunder."

SEC. 3. That the fifth subdivision of section 5 of such act, as amended, is amended to read as follows:

"Fifth. Provide that cotton that, because of the presence of extraneous matter of any character, or irregularities or defects, is reduced in value below that of strict middling in the case of a class A contract, strict low middling in the case of a class B contract, or low middling in the case of a class C contract, the grades mentioned being of the official cotton standards of the United States, or cotton that is less than seven-eighths of an inch in length of staple, or cotton of perished staple or an immature staple, or cotton that is 'gin cut' or reginned, or cotton that is 'repacked' or 'false packed' or 'mixed packed' or 'water packed,' shall not be delivered on, under, or in settlement of such contract."

SEC. 4. That the second paragraph of the seventh subdivision of section 5 of such act, as amended, is amended to read as follows:

"The provisions of the third, fourth, fifth, sixth, and seventh subdivisions of this section shall be deemed fully incorporated into any such contract if there be written or printed thereon, or on the memorandum evidencing the same, at or prior to the time the same is signed, the phrase 'subject to United States cotton futures act, section 5, class A,' if the contract is a class A contract, or the phrase 'subject to United States cotton futures act, section 5, class B,' if the contract is a class B contract, or the phrase 'subject to United States cotton futures act, section 5, class C,' if the contract is a class C contract."

SEC. 5. That the provisions of this act shall be effective on and after the thirtieth day after its passage, but such provisions shall not be construed as applicable to nor as affecting any right, power, privilege, or immunity under any contract entered into prior to such day.

CLAIMS AGAINST GERMANY.

Mr. KING. Mr. President, I did not hear the statement made by the able Senator from Alabama [Mr. UNDERWOOD] respecting the bill which he offered a few moments ago dealing with the property seized and held by the Alien Property Custodian, nor have I had opportunity to examine the bill which he offered; but I understand that the Senator from Alabama has just advocated that the property owned by German nationals and seized during the war be applied to the payment of claims of American nationals and the Government of the United States against the German Government. Whatever position the Senator from Alabama takes is bound to command the attention of the American people because of his great ability and his well-known integrity, and further because he is the leader of the minority in the Senate.

If I understand the position of the Senator, I am constrained to dissent therefrom, notwithstanding my great admiration for him and my confidence in his leadership. I have opposed the policy of confiscation of the property of the nationals of Germany or Austria or any other of the countries with which our Nation was at war. I have been unable to support the view of some, that private property of Germans and Austrians, which was found in the United States at the outbreak of the war, should be applied in liquidation of claims which American citizens may have against the German or Austrian Governments. Undoubtedly the United States has the power to confiscate the seized property and to devote it to the purposes indicated in the Versailles treaty and the treaty between the United States and Germany. But in my opinion it would be immoral and violative of accepted principles of international law, and particularly that higher and nobler spirit of justice which should be the basis of modern international relations.

International law is not a fixed science. As the spirit of justice is developed among individuals and among nations, higher and nobler forms of law and international usage and comity are developed and applied. Municipal law should approximate the standard of justice and righteousness by which peoples should be governed. International law should likewise reflect the advancing ideals which should guide the conduct of peoples and nations in their dealings and relations with one another.

I concede that many nations, in former centuries, have confiscated the property of the nationals of powers with whom they were at war. Neither the persons of alien enemies nor their property were respected. The seized property was confiscated as a matter of course, and slavery was the fate of those persons who were taken prisoners. But as civilization advanced these cruel practices were abandoned and more enlightened and liberal policies were adopted. One of our greatest American poets, Amy Lowell, of Massachusetts, has stated that—

> Civilization is the study of man about himself, his powers, limitations, and endurances; it is the slowly acquired knowledge of how he can best exist in company with his fellows on the planet called earth.

A narrow and provincial nationalism is not compatible with the liberal forces that are dominating the world nor the spirit of justice which in the end must control not only individuals but nations. We are developing a proper spirit of internationalism, and individuals with the highest patriotism feel deep concern in the welfare of other nations and in the progress and happiness of races and peoples of entirely different origin.

Trade and commerce are widening the interests of the people, and all who think are discovering the interdependence of individuals and of nations. The United States and its nationals have invested upward of $20,000,000,000 in other countries. We have done it upon the strength of treaties and in reliance upon what we believe to be just and liberal principles of international comity. We have been able to differentiate between an individual and his government. We have perceived that war might be made upon a government and not upon some of the nationals of that government. That was Franklin's view when he negotiated a treaty with Prussia in the closing years of the eighteenth century. By that treaty American nationals found in Prussia, as well as their property, were immune from seizure in the event of war. And Prussians in the United States were likewise immune from seizure and their property was protected against sequestration or confiscation. Indeed, it was provided that the nationals of both countries could return to their respective countries and take with them all of their property.

This Republic in its early days contended for the inviolability of property of enemy nationals. During the Revolutionary War the fierceness of the conflict inflamed the people in the various colonies and local statutes were passed which confiscated the property of Tories. But Washington insisted, when these acts of confiscation were not rescinded and the States would not make compensation to the Tories for the property which had been confiscated, that the Federal Government should make payment therefor. His views found expression in the Jay Treaty, which was exceedingly unpopular when its terms were first made known to the American people. However, Washington triumphed and the treaty was ratified. Hamilton ably supported the position of Washington and contended with great ability in favor of the doctrine that the property of nationals should be inviolable, notwithstanding that war was waged between the respective Governments.

I stated a moment ago that we had distinguished between governments and the people of governments. That was clearly exemplified in the recent war. President Wilson pointed out that the United States was not warring upon the German people

but was waging war against the German Government and the Austrian Government.

Under treaties existing between the United States and Germany and the United States and Austria, Americans invested tens of millions of dollars in those countries, and Germans and Austrians invested large sums in the United States. The nationals of both countries profited by these investments. Millions of dollars were invested in the United States by Germans, as a result of the trade and commerce between the two countries. In other words, instead of taking money from the United States for products sold in American markets, American securities were purchased, or other forms of investments were made, to the mutual advantage of the nationals of both countries. I think it may be safely said that neither Americans who made investments in Europe, nor Europeans who have made investments in the United States, conceived it possible that in the event of war their investments in the belligerent country would be confiscated.

The United States has been the foremost champion of the policy of the inviolability of property. We have not only contended that property upon land should be immune from confiscation, but we have insisted that property upon the high seas, even if carried in the ships of belligerent nations, if it were not contraband of war, should be immune from seizure. We have opposed not only "land piracy," as Chief Justice Marshall denominated the seizure of the property of enemy nationals found upon land, but we have vigorously opposed "sea piracy."

Mr. President, the war is over, and attempts made to perpetuate bitterness and antipathies between the United States and Germany, or Austria, or any former enemy country, should be reprobated. What the world needs to-day is peace. We want international peace. The wounds of war should be healed and every possible effort made to remove the scars, and to bring about international fellowship and good will. I have felt for some time that the property which was seized by the Alien Property Custodian should be restored to the owners of the same. It is true that the Alien Property Custodian has disposed of much of the property seized and converted it into cash. The proceeds derived from the sale should be turned over to the owners of such property.

It is contended that some property sold by the Alien Property Custodian was disposed of at prices far below its actual value. I shall not enter into a discussion of that proposition now, but will only add that in my opinion some of the patents and trade-marks, to which the Senator referred, and which were seized by the Alien Property Custodian were sold at prices which were merely nominal. I have contended that as to the sale to the Chemical Foundation, it was illegal, that the price was inadequate; that the Alien Property Custodian did not measure up to the requirements of a trustee; that the vendees were parties to the conspiracy to sell these patents and therefore acquired no indefeasible title; and that the Government should institute a suit to compel the Chemical Foundation to reassign the patents, copyrights, trade-marks, and so forth, to the Alien Property Custodian.

After the United States seized German property Germany seized some property belonging to Americans and which was found within the boundaries of the German Empire. However, Germany has restored a portion of the property seized and has signified its willingness to restore to Americans their holdings in Germany. I believe, however, that some money that was in German banks at the outbreak of the war, and which was seized, has not been restored to the American owners. Of course, our Government should demand that Germany immediately restore to Americans whatever property the German Government may have sequestered at the outbreak of or during the war. The German Government committed various torts against American nationals, for which it is responsible, and our Government should take immediate steps to compel Germany to pay our nationals whatever amounts may be due them, but we should not confiscate private property owned by Germans in order to settle claims of Americans against the German Government. Undoubtedly the situation calls for an international commission or some tribunal authorized to make full investigation as to the claims of Americans against Germany and to make awards thereon. But, I repeat, Mr. President, our Government can not afford to take any steps that will tarnish its honor or give justification for the contention that it has violated international law or wronged the nationals of any other country with whom it was at war.

A number of bills have been offered and are now pending before the Judiciary Committee dealing with the property of former enemy nationals. I have offered several bills, and these have been referred to the subcommittee of the Committee on the Judiciary. Undoubtedly the bill introduced by the Senator from Alabama will go to the same subcommittee, and I shall be glad to have it considered when the bills which I have offered are taken up for examination by the committee.

THE TARIFF.

Mr. ROBINSON. Mr. President, what has become of the tariff bill?

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDING OFFICER (Mr. ODDIE in the chair). The question is on agreeing to the amendment of the Senator from Arkansas [Mr. ROBINSON] to the committee amendment.

Mr. ROBINSON. Mr. President, I am surprised that the Presiding Officer had that information. I am surprised that anyone who has observed the proceedings to-day should know what the pending question is. We have had discussion of the shipping bill, of the disposition of alien property, of the Muscle Shoals controversy, and of many other subjects, but nothing said has related to the matter pending before the Senate.

Mr. McLEAN. Mr. President, Senators on this side of the Chamber are not responsible for that.

Mr. ROBINSON. My friend, the Senator from Connecticut, suggests that Senators on the other side of the Chamber are not responsible for the diversions which have occurred to-day, and I think he is correct. The other side of the Chamber has not been represented in the proceedings of the Senate to-day and is not represented now. No one seems to be taking any interest in the matter before the Senate.

Now, I realize that all these subjects are important and that in time they will have to be discussed, but a discussion of subjects which are not before the Senate usually does not accomplish any good. In the first place, the speeches are not listened to by Senators. In the next place, if Senators are attending to their duties they are contemplating the proposition that is pending rather than considering irrelevant subjects.

If this great tariff measure is a matter of such importance that it must be kept before the Senate to the exclusion of every other measure, let us confine our debate to the tariff bill, except, of course, for the consideration of emergency matters, and pass or defeat the tariff bill, and then take up something else. There is a growing element on the other side of the Chamber that does not want to vote upon the bill before the fall elections. I am not violating any confidence or revealing any secret when I make that declaration. The bill is going to be disposed of. It is not going to be sidetracked on the theory that the Democrats have filibustered against it to an extent that will prevent the Senate from disposing of it. We ought to vote finally on the tariff bill inside of three weeks.

Mr. SMOOT. I agree with the Senator.

Mr. ROBINSON. As soon as the wool schedule has been disposed of I shall be ready to place a limitation on debate, and I shall be ready to agree to a time to vote finally. Ample opportunity will be afforded to discuss the shipping bill when that bill is before the Senate. Full opportunity will be had to discuss the Muscle Shoals proposition when it is pertinent to do so. Recognition of the Obregon government, a purely executive function, which absorbed the attention of the Senate yesterday, of course can not properly be brought before the Senate. Everything except the pending proposition has been before the Senate this morning.

Mr. MOSES. Mr. President——

Mr. ROBINSON. I yield to my friend from New Hampshire.

Mr. MOSES. I merely wish to point out to the Senator from Arkansas that he is in error in criticizing the Senator from Louisiana [Mr. RANSDELL]. We are considering the hemp schedule, and certainly the Senator from Arkansas knows that ships use cordage made of hemp.

Mr. ROBINSON. The brilliant and astute mind of the Senator from New Hampshire has performed an acrobatic feat and has discovered an intimate relationship between the hemp schedule and the shipping bill.

Mr. McLEAN. A regular Sherlock Holmes feat.

Mr. ROBINSON. Yes; Sherlock, with his Doctor Watson, would immortalize such a performance.

Mr. President, I hope the Senate may now get down to business and dispose of the tariff bill. That is the proposition before the Senate. It is true that from this side of the Chamber has come much of the irrelevant discussion which has occurred to-day, from Senators, however, who in the main have voted with the majority on the tariff bill, giving color to the suspicion that there is a growing purpose on the part of those who ostensibly favor the tariff bill to postpone the day of judgment respecting it. Well, Mr. President, we are going to vote on the

tariff bill, we are going to vote on the bonus bill, and then we are going to the country. God save the country!

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hitchcock	Nelson	Smoot
Broussard	Johnson	New	Spencer
Bursum	Jones, N. Mex.	Newberry	Stanley
Calder	Jones, Wash.	Nicholson	Swanson
Capper	Kellogg	Norbeck	Trammell
Caraway	Kendrick	Oddie	Underwood
Culberson	Keyes	Overman	Wadsworth
Cummins	King	Pepper	Walsh, Mont.
Curtis	Lenroot	Phipps	Warren
Dial	Lodge	Rawson	Watson, Ga.
Elkins	McCumber	Robinson	Watson, Ind.
Fernald	McKinley	Sheppard	Willis
Hale	McLean	Shortridge	
Harreld	McNary	Simmons	
Heflin	Moses	Smith	

The PRESIDING OFFICER. Fifty-seven Senators have answered to their names. A quorum is present. The question is on the amendment of the Senator from Arkansas [Mr. ROBINSON] to the committee amendment.

Mr. WADSWORTH. Mr. President, may we have the amendment to the amendment reported?

Mr. SMOOT. Mr. President, I ask that the glove paragraph be now taken up and disposed of. At the request of the senior Senator from Ohio [Mr. POMERENE] that paragraph was passed over yesterday, to be taken up to-day.

The PRESIDING OFFICER. There is a pending amendment before the Senate.

Mr. SMITH. The senior Senator from Ohio does not seem to be in the Chamber. I suggest that we go on with some other item in the flax and hemp schedule.

Mr. SMOOT. Very well; there is one other amendment relative to hackled hemp. We have not voted upon that yet. I also wish to offer an amendment. So I ask that the glove paragraph be passed over temporarily.

Mr. ROBINSON. That course is satisfactory to me.

The PRESIDING OFFICER. Without objection, the request will be granted.

Mr. SMOOT. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. The Senator from Utah proposes, on page 132, line 2, to strike out "including 'line of hemp.'"

Mr. SMOOT. Mr. President, I desire briefly to explain the amendment. I think no Senator will object to it. The words "line of hemp," we are informed by an expert, mean the same as hemp itself. If we have those words included in the paragraph, there would be a conflict as to what rate "line of hemp" would take. The hemp rate is 2 cents a pound. The rate on "line of hemp," as proposed by the House, would be a higher rate, and as reported by the Senate Finance Committee it would be 4 cents a pound. However, striking out the words "including 'line of hemp,'" will then impose a duty upon "line of hemp" or the hemp itself of 2 cents, as we voted last evening.

Mr. ROBINSON. The Senator's statement is that "line of hemp" means the same as hackled hemp?

Mr. SMOOT. No; not hackled hemp. Hackled hemp is the highest perfected hemp. That is the final process through which the hemp goes before going into the fiber of rope. I have here a letter addressed to the senior Senator from Wisconsin [Mr. LA FOLLETTE], and upon this letter, I will say to the Senator from Arkansas, the rate was fixed at 4 cents. However, that Senator came in later and asked that the rate be made 2 cents on hemp and hemp tow, but in reducing the rate the words "including 'line of hemp'" were not stricken out.

Mr. McCUMBER. I think the Senator should explain, so that all may understand clearly, that "line of hemp" is a lower process in the development of manufacture than the hackled hemp. In other words, the hackled hemp is ready for spinning.

Mr. ROBINSON. "Line of hemp" has gone through some process of manufacture?

Mr. McCUMBER. Oh, yes.

Mr. ROBINSON. What is the extent of that process?

Mr. SMOOT. Very little, I will say to the Senator, outside of simply the first process of getting the hemp itself ready, with the pulp and everything else in it. Until this morning I myself thought that "line of hemp" was the "hackled hemp."

Mr. ROBINSON. If the Senator will pardon me, in the act of 1909 it was so defined by paragraph 337:

Hemp and tow of hemp, $22.50 per ton; hemp, hackled, known as "line of hemp," $45 per ton.

Mr. SMOOT. That is as I have always understood it; but I have here a letter bearing on the subject, a part of which I will read in order that the Senate may understand the matter. This is a letter addressed to the senior Senator from Wisconsin [Mr. LA FOLLETTE] and is signed by A. H. Wright, secretary, Wisconsin Hemp Order:

Schedule 10 as amended states "hemp and hemp tow, 2 cents per pound; hackled hemp, including line of hemp, 4 cents per pound." This wording is confusing in that it evidently makes a distinction between hemp and line of hemp. To explain this I offer the following discussion of the several terms used:

(1) Hemp: This term when used alone in trade transactions refers to the long, straight hemp fiber which has been more or less cleaned by removing the woody portion. It is often called rough hemp, raw hemp, or scutched hemp, but in any case refers to a general class of hemp fiber which has been roughly prepared, but which is long and reasonably straight. In other words, it is a term used to distinguish the long, straight fiber from the tangled, more or less matted and short fiber known as tow.

Then as to "line of hemp" this letter states:

(4) Line of hemp: This term, which is used principally in the American trade, is synonymous with hemp proper. In other words, it is the straight, long hemp fiber as distinguished from the short tangled tow.

The proposed amendment will result in placing the duty on "line of hemp" at 2 cents a pound instead of 4 cents, as provided in the amendment originally reported to the Senate.

Mr. ROBINSON. That is, assuming that the committee amendment prevails?

Mr. SMOOT. Yes; assuming that the committee amendment prevails.

Mr. ROBINSON. The term "line of hemp" was used in the act of 1909 and in the act of 1913 in the same way as it is used in the bill as originally reported. I make no objection to the amendment which has been proposed by the Senator from Utah.

The PRESIDING OFFICER. The Chair will state that there is a prior amendment pending.

Mr. SMOOT. I ask unanimous consent that the amendment which I now suggest may now be acted on, for it precedes the amendment which is pending.

The PRESIDING OFFICER. In order that that may be done the Senator from Arkansas [Mr. ROBINSON] will have to withdraw his amendment temporarily.

Mr. SMOOT. I ask unanimous consent that the amendment which I propose may be acted upon before action is taken upon the amendment which is proposed by the Senator from Arkansas to the committee amendment.

Mr. ROBINSON. I have no objection to that.

The PRESIDING OFFICER. Without objection, it is so ordered. The question is on the amendment proposed by the Senator from Utah [Mr. SMOOT].

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on the amendment proposed by the Senator from Arkansas [Mr. ROBINSON] to the amendment of the Committee on Finance. The amendment of the Senator from Arkansas to the committee amendment will be stated.

The READING CLERK. In paragraph 1001, page 132, line 3, in the committee amendment, before the words "per pound," the Senator from Arkansas proposes to strike out "4 cents" and in lieu thereof to insert "1 cent," so as to read:

Hackled hemp, 1 cent per pound.

Mr. ROBINSON. I understand that the Senator from Kentucky [Mr. STANLEY] desires to discuss the amendment.

Mr. SMOOT. That is also my understanding.

Mr. ROBINSON. The Senator from Utah might now have the cotton schedule disposed of, if he so desires.

Mr. SMOOT. Then, Mr. President, I ask that the Senate now return to the cotton schedule.

The PRESIDING OFFICER. The pending amendment to the committee amendment will be passed over.

Mr. ROBINSON. I make no objection to that.

Mr. LENROOT. Does the Senator from Utah desire to return to the glove paragraph?

Mr. SMOOT. I desire that the Senate shall now return to the glove paragraph.

The PRESIDING OFFICER. The amendment proposed by the Senator from Utah [Mr. SMOOT] to paragraph 914 will be stated.

The ASSISTANT SECRETARY. On page 128, after line 18, the Senator from Utah proposes to strike out paragraph 914 and in lieu thereof to insert a new paragraph, as follows:

PAR. 914. Gloves, composed wholly or in chief value of cotton or other vegetable fiber, made of fabric knit on a warp-knitting machine, if single fold of such fabric, when unshrunk and not suèded, and having less than 40 rows of loops per inch in width on the face of the glove, 50 per cent ad valorem; when shrunk or suèded or having 40 or more rows of loops per inch in width on the face of the glove, and not over 11 inches in length, $2.50 per dozen pairs, and for each additional inch in excess of 11 inches, 10 cents per dozen pairs; if of two

or more folds of fabric, any fold of which is made on a warp-knitting machine, and not over 11 inches in length, $3 per dozen pairs, and for each additional inch in excess of 11 inches, 10 cents per dozen pairs; made of fabric knit on other than a warp-knitting machine, 50 per cent ad valorem; made of woven fabric, 25 per cent ad valorem.

Mr. SMOOT. Mr. President, I merely wish to make a correction of a statement which was made last night under a misapprehension. I have been shown this morning an 11-inch glove that has been shrunk, and I sent for my magnifying glass in order to find out how many loops to the inch there are in that glove. I find that there are more loops than the 40 provided for in the amendment, but even though the number of loops were not 41 or 42, the glove having been shrunk, under the amendment it would fall in the higher bracket and bear the $2.50 per dozen rate of duty, it being an 11-inch glove.

I am informed by the importer of those gloves that the price of the glove was $2.10, foreign valuation. So evidently there are such gloves imported into the United States. That being the case, Mr. President, the rate imposed upon that particular class of gloves, if they came into this country, would be 119 per cent. I desire to make that statement now in order to correct the statement that was made in answer to a question which was asked by the Senator from Ohio [Mr. POMERENE] last evening.

Mr. POMERENE. I did not understand the figures as to the rate of duty which the Senator from Utah gave a moment ago. He said the duty would be what per cent?

Mr. SMOOT. I stated that the duty would be 119 per cent. The invoice price of this glove was $2.10. That is a glove which has been shrunk, and it falls just over the line into the bracket where a duty of $2.50 per dozen is provided under the amendment which I have offered. The price being $2.10, on the foreign valuation, on a $2.50 specific rate the ad valorem duty is 119 per cent. I simply wanted to make that correction. At the time the original statement was made I did not have a sample of such a glove and did not know there was such a glove imported into the United States at that price.

Mr. POMERENE. Under the $3 rate provided here.

Mr. SMOOT. The rate proposed is $2.50.

Mr. POMERENE. I understand that that is the rate now proposed, but I am referring to the provision as originally reported by the Committee on Finance. The rate originally reported would add about 20 per cent to the 119 per cent to which the Senator from Utah refers.

Mr. SMOOT. If that rate had been retained.

Mr. POMERENE. Yes.

Mr. LENROOT. I offer the amendment which I send to the desk to the amendment reported by the committee.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. At the end of the paragraph it is proposed to insert the following proviso:

Provided, That in no case shall the duty or duties imposed upon gloves in this paragraph exceed 75 per cent ad valorem.

Mr. LENROOT. Mr. President, so far as this paragraph is concerned, I think there is no question whatever but that a very substantial increase in the rate is justified when the importations and the present lack of domestic production are considered. The only question that is involved here, in my mind, is, How high a rate should we impose in this bill for the purpose of protecting American production?

I think we will all concede that rates can be made so high that the American people ought not to be taxed to maintain an American production of a given commodity. For instance, we would all agree, I think—I believe every member of the committee would agree—that if a commodity can not be produced in this country normally and steadily for less than 200 per cent in excess of what it can be produced for abroad, we are not justified in trying to maintain the production of that particular article in this country.

My amendment leaves the specific rates as they stand, with the proviso that no rate shall be in excess of 75 per cent.

The present rate is 35 per cent; so that my proposed amendment will provide more than 100 per cent increase over the rate in the Underwood law. The Payne-Aldrich rate was 50 per cent, and therefore my amendment would provide an increase of 50 per cent over the rate in the Payne-Aldrich law.

Mr. HITCHCOCK. Mr. President——

Mr. LENROOT. I yield.

Mr. HITCHCOCK. Will the Senator state at this point what the importations are which are threatening the American industry?

Mr. LENROOT. They are very large.

Mr. HITCHCOCK. I have not heard any authoritative statement as to how large they are.

Mr. LENROOT. I have not the figures here—the Senator from New York could probably give them—because I thought it was conceded that the importations were very large. Perhaps the Senator from Utah can give them.

Mr. SMOOT. I think the Senator from New York has the figures.

Mr. LENROOT. As to the particular gloves which the amendment would cover, I will say to the Senator from Nebraska that it is my understanding that the American production has practically ceased.

Mr. HITCHCOCK. The figures read last night indicated that the production in this country exceeded by about twice the importations over an average period.

Mr. LENROOT. Oh, no.

Mr. WADSWORTH. Mr. President, will the Senator from Wisconsin yield to me?

Mr. LENROOT. I yield.

Mr. SMOOT. The American factories are closed down.

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield; and if so, to whom?

Mr. LENROOT. I yield to the Senator from New York.

Mr. WADSWORTH. In reply to the observation just made by the Senator from Nebraska, the figures which were read last night went as far only as 1919. It is since then that the catastrophe has occurred.

Mr. HITCHCOCK. Then, we have not had the figures, and I think we ought to have the figures.

Mr. McCUMBER. Mr. President, we have the figures here for the nine months of the fiscal year 1922, and for that period the importations were 1,138,490 dozen pairs. That represents the importations merely for nine months of the fiscal year.

Mr. HITCHCOCK. So that the importations are something less than a million and a half pairs.

Mr. LENROOT. A million and a half dozen pairs.

Mr. McCUMBER. Not a million and a half pairs, but a million and a half dozen pairs.

Mr. HITCHCOCK. Now, what proportion of the consumption does that represent?

Mr. McCUMBER. The production is 1,300,000 pairs.

Mr. WADSWORTH. That was in 1918.

Mr. McCUMBER. That was in 1918, which is the last year for which I have the figures.

Mr. HITCHCOCK. So that the production is about the same as the importation.

Mr. SMOOT. No. The consumption is not about the same.

Mr. LENROOT. There is no production at all.

Mr. SMOOT. There is no production at all.

Mr. LENROOT. I have looked this question up very carefully and I have satisfied myself at least——

Mr. POMERENE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Ohio?

Mr. LENROOT. I yield to the Senator from Ohio.

Mr. POMERENE. I am able to give the importations for the first five months of this year. The general importations of cotton knit gloves in 1922, in January, were 104,304 dozen pairs; in February, 110,631 dozen pairs; in March, 173,462 dozen pairs; in April, 144,473 dozen pairs; and in May, 147,047 dozen pairs.

Mr. HITCHCOCK. That does not answer the question fully. Has that importation been going on at that rate for a number of years?

Mr. WADSWORTH. No.

Mr. HITCHCOCK. How does it compare with importations for other years?

Mr. LENROOT. There were practically no importations during the war. There were, I think, two factories producing these gloves during the war, and of course their product carried a very high price at that time; but during the last year I am satisfied that we were not able, with the present tariff rate of 35 per cent, to produce these gloves, and I find from the hearings that we are not in fact producing them at all. The Senator from New York will correct me if I am mistaken.

Mr. WADSWORTH. There is about a one-tenth production.

Mr. SMOOT. And the very glove manufacturers that made them during the war are importing them now to hold their own trade.

Mr. LENROOT. The testimony so discloses.

Mr. President, I am not making any point that the importations do not justify a substantial increase in duty. I do not even make the point that the 75 per cent maximum that I have proposed will be sufficient to put the American industry in production. The point I do make is that we ought not to tax the American people more than 75 per cent of the value of a

product for the purpose of maintaining American production of that particular article, and that is the only point that I do make.

To illustrate how this would operate: An importer, I will frankly say, sent me the samples of gloves that I hold in my hand. I have submitted them to the Senator from New York [Mr. CALDER], together with the tables, and he verifies the figures that I shall present.

Sample No. 1 is a cotton glove imported at $2.10 per dozen pairs. With the present committee amendment rate applied there would be an ad valorem rate of 119 per cent upon that glove, whereas the present rate is 35 per cent. The Payne-Aldrich rate was 50 per cent.

Mr. SMOOT. And that glove retails at 50 cents a pair, or $6 a dozen.

Mr. LENROOT. That is what the importer states. It is contended, however, that it retails for a higher price than that.

Mr. SMOOT. Yes; 75 cents.

Mr. LENROOT. The next sample is the glove that I hold in my hand, which was imported in March last for $2.50 per dozen pairs. The proposed committee rate would be equivalent to an ad valorem rate of 104 per cent upon that glove. The present rate upon this glove is 35 per cent. The Payne-Aldrich rate was 50 per cent.

The next is the highest-priced glove that comes in this category. It was imported in March last for $4 per dozen. With the rate proposed, the equivalent ad valorem would be 92½ per cent, as against a present rate of 35 per cent and a Payne-Aldrich rate of 50 per cent.

Mr. President, if this amendment be adopted, if the American manufacturer can bring down his cost to 75 per cent in excess of the foreign cost, he will be able to compete; but I am frank to say that if he can not do that, he would not be able to compete if my amendment be adopted. I propose the amendment upon the theory that upon an article like this, of general use throughout the country, used in every home in the land, we ought not to tax the American people more than 75 per cent to maintain the production of that particular article in America. So I offer the amendment.

Mr. SMITH. Mr. President, before this vote is taken I think it is very well for us to review what has been done, as it relates to this particular form of cotton manufacture.

All concede that even on the cloth, where we have provided for a duty on those goods made out of a staple of cotton that is not raised in this country, we have put a rate of duty that does not exceed 45 per cent. That applies to cotton goods made out of a type of cotton that is not produced in this country in sufficient quantities to meet the needs of this country. All will concede that certain specialties and novelties made abroad that are not made in this country are made out of that kind of cotton and imported here, and our rate of duty does not exceed 45 per cent. The yarns that are imported into this country, made out of that staple cotton, do not bear as high a rate of duty as that.

Now we have come to the simplest form of weaving known to manufacturers—the knitting process. Every man who is familiar with the conversion of cotton into the finished goods knows that the cheapest form of manufacture is either the cylindrical or the flat-knit weave. The process of making gloves, perhaps, is the cheapest of any process known at all. It is this: You have the cloth; you cut it out automatically by your design machine; you reverse the glove and stitch it up by machinery, and I believe the only handwork that is done on it at all is when you put the button on the wrist.

There you have the cheapest possible form of converting the raw material into the finished product. You can make the cotton goods out of the cheapest form of cotton—that is, in the case of the ordinary cotton glove—because you do not need to have the same twist that you do in producing cloth. It is a looser twist. It is a knitting yarn, not a weaving yarn. Therefore you take the lower grades of cotton and convert them into knitting yarn. You then knit the fabric by the cheapest known process.

There is something radically wrong somewhere when we come here and put a duty of 75 per cent upon the lowest grade of our cotton, to start with, in the bulk of the ordinary cotton glove, the cheapest form of converting the cotton into the yarn and the cheapest form of knitting that yarn into the fabric.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. LENROOT. My amendment does not propose a rate of 75 per cent. The lowest rate in the committee amendment is 25 per cent. My amendment merely proposes that in no case shall a greater rate than 75 per cent be imposed.

Mr. SMITH. It is that to which I am speaking—no greater. Then the classification of the goods will determine whether or not the duty shall reach that maximum. I understand that thoroughly. I claim that you have no rational basis for proposing even 75 per cent as your maximum, when on more difficult processes you have no such duty as that in the cotton schedule, and when this is the most notoriously cheap form in which you can accommodate the people with what in some cases is a necessity.

Mr. LENROOT. Mr. President, will the Senator yield once more?

Mr. SMITH. I yield.

Mr. LENROOT. The Senator will admit, will he not, that the 75 per cent maximum proposed is a 44 per cent reduction from the committee amendment?

Mr. SMITH. I am not taking the committee amendment as the basis of what I am saying. We are not here to base our reasoning upon what the committee has done; but if we have the facts on which to base our legislation for the American people, that is what you are here for, and that is what I am here for. It is not what the committee has brought in; it is what you and I, in sifting what the committee has brought in, find the facts to be. I am trying to give the Senate the facts.

We have a monopoly of the cotton that produces the bulk of these gloves.

Mr. CALDER. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. CALDER. The Senator, of course, knows that there are four different brackets in this paragraph——

Mr. SMITH. Yes.

Mr. CALDER. And that the one with the highest rate—the 119 or 90 per cent, whichever it may be—refers to what we are pleased to call these so-called chamoisette gloves.

Mr. SMITH. Yes; I know. It is a new thing that has been brought in here.

Mr. CALDER. If the Senator will take the trouble to examine the material in the samples that I have here, he will find that it is one of the most beautiful pieces of cloth he has ever seen in his life.

Mr. SMITH. I know. I have been under the disastrous necessity of buying some chamoisette gloves for female members of my family.

Mr. CALDER. And if the Senator will examine the gloves made from this fabric he will find that they are also very beautiful things, gloves that any lady might be glad to wear.

Mr. SMITH. That is the reason why I am pleading now that these women of ours shall be allowed to buy them at a basis which reason would dictate.

Mr. CALDER. The Senator does not believe that the women of America would be agreeable to paying 4 or 5 or 10 cents more a pair to wear American gloves?

Mr. SMITH. It is not a question of paying that much more to wear American gloves. The question is, Are we justified in saying that America can not produce them without this duty? I am trying to show that we can.

Mr. CALDER. All right.

Mr. SMITH. That is what I am trying to do. You have a monopoly of the material out of which the bulk of the gloves are made, which is the finer texture of cotton, the bulk of which, perhaps, is made abroad. Then, when you get into the form of glove that takes on the nature of the lisle thread or imitation silk, you have to have a long, attenuated fiber that may be made from Egyptian cotton. That is the only place, outside of our protected Arizona cotton, where you can get that kind of cotton.

Mr. CALDER. That is correct; and these fine gloves are made of long-staple cotton.

Mr. SMITH. All right. In your cloth schedule, where the bulk of that cotton is used in the finer production of shirts in the form of mercerized cotton, you have not imposed a duty exceeding 45 per cent, and it is a more difficult weave, a more difficult twist, a more difficult process of manufacturing the cloth; and yet, when you come to the cheapest form of manufacture, the knitting process, in an article like this, you raise the duty 75 per cent higher than on goods that consume like fibers.

I am in favor of taking into consideration the fact that we have the material here for the bulk of the gloves, and are on all fours with the rest of the world in getting our material for the finer forms. In the case of all the other manufactures you have not raised the duty higher than 45 per cent; and why should we go out of our way to give special privileges to those who produce this article over the man who produces the shirts and the underwear and the general bulk of cotton clothes that

the American people must consume? Lots of people want gloves, lots of people are entitled to have them, and the finer the better, and in all conscience, according to the cost of production, it is our duty to see that they shall have them as cheaply as possible, and yet these high duties are proposed now without any basis except that in an accident, in an emergency, some manufacturers perhaps have imported enough from abroad to last them a year or two, and now, if they can get this tariff up to 75 per cent, they can mulct the American people and make a fortune out of the gloves they have imported and stored up.

There is nothing in the statistics to show that up until this war emergency, right now, any such importations have come in. The rates of the Payne-Aldrich law and the Underwood law were ample to keep them down; but an accident occurred, and there was a dumping. Now, in place of putting on a real emergency tariff rate, you have put on an emergency tariff rate to last through the life of this bill. You have no justification for doing it.

If we did not have the facilities in America to compete with anyone in the knitting process, if we did not have the facilities and the raw materials it might lie in your mouths on the other side to stand here and protect the struggling American producer of the raw material against the foreigner and protect the struggling American operator in the mills against the foreigner; but you have the machinery and the raw material at your door, and you have already indicated that you do not care to go higher than 45 per cent on the very same kind of material being used in a more costly process of manufacture than this; and then you raise this duty, showing that you are taking care of a special class.

Mr. WADSWORTH. Mr. President, I call the Senator's attention to paragraph 913, in which the ad valorem duty on knit fabric, the very stuff of which these gloves are made, is put at 60 per cent.

Mr. SMITH. I was speaking of this knit fabric business in connection with the manufacturer's article. You have imposed a rate of duty out of all line with the other amendments provided.

Mr. WADSWORTH. The Senator has stated over and over again that no higher rate than 45 per cent is imposed.

Mr. SMITH. I mean outside of knit goods, the knit fabric. I was comparing the process of knitting with the process of weaving, and every man here knows that there is no comparison between the cost and difficulty of the one as compared with the other. Why that difference? We are being jobbed by the manufacturers. That is the difficulty. They have come in with a special plea on the theory that somebody has dumped in a few million pairs of gloves under a war emergency, asking for a special rate, both on the raw material and the finished product, to protect a cheap process of manufacture.

I maintain that the duty on this class of goods ought to be the lowest in the cotton schedule. It costs less to produce it, and less to manufacture it, than any other form you have. Yet you are making it the highest, taking care of a special class of manufacturers.

God knows I have nothing against the American manufacturer. I want to see him prosper. I want to see him prosper to such an extent that he can share his prosperity with the producer of the raw material in the cotton fields of America, and manufacture every pound of American raw cotton into American manufactured goods. But I do not want to see the vast mass of the American people held up in order to pour ungodly profits into the coffers of a very few who can manufacture these articles as cheaply as any foreign competitor, if not cheaper, and you have not a leg to stand on in urging this duty.

Mr. CALDER. Mr. President, the pending paragraph provides for a different rate of duty on four separate and distinct classes of cotton gloves, running from 25 per cent ad valorem on gloves made of woven fabric, 50 per cent ad valorem upon unshrunk and unsueded gloves made on the warp-knitting machines, to $2.50 per dozen pairs on sueded gloves, with an additional duty of 10 cents a dozen pairs for each inch in excess of 11 inches in length.

Let us see just what the production of gloves in the United States has been. Before the war we did not make any of these so-called suede cotton gloves in this country. We knew nothing about it. The fabric from which they were made was a secret process known only to the manufacturers of England, who at that time were the sole producers of the cloth. If Senators will look at this material, they will find it is one of the finest finished fabrics that is made of cotton in this country, and so popular have become these gloves that very many women are wearing them in preference to those made of silk or kid. It is the general belief of many men who have studied this subject that in a very little while these cotton-fabric gloves will take the place of the kid glove, which is now so very expensive.

Let us see what the production was in this country at the beginning of the war. In 1914 we produced 50,000 dozen pairs of these gloves; in 1915, 200,000 dozen pairs; in 1916, about 500,000 dozen pairs; in 1917, a million dozen pairs; and in 1918, 1,300,000 dozen pairs. In 1919 the German producers in Saxony, where these gloves came from originally, began to revive their industry.

Let us see what the imports from Germany have been. In 1919 there was imported from Germany 812 dozen pairs only. Our own manufacturers had the market here. In 1920 there was imported 39,101 dozen pairs. In 1921, 537,000 dozen pairs. During the fiscal year 1921 the imports from Germany were 87 per cent of the total from all countries. Applying this percentage to the total imports of cotton knit gloves for the nine months of the fiscal year 1922, the imports were 990,000 pairs, or an equivalent of about 1,300,000 dozen pairs.

The Senator from South Carolina has talked about using American cotton. Let me say to him that practically all of the cotton from which this fine fabric is made which is used in the manufacture of these German gloves comes from the Egyptian fields. This cloth is manufactured in England and made into gloves in Germany. If we manufacture these gloves here, which we can do if the committee rates in paragraph 914 are approved, they will be produced of cotton raised in this country. I listened very attentively to the remarks made by the Senator from Wisconsin, who agrees that if we are to protect this business then, indeed, a fair and reasonable duty is needed. As I recall it, he said that the duty on the 11-inch glove was something like 119 per cent and upon the 23-inch glove about 90 per cent. I insist, Mr. President, that this duty is necessary if this industry is to be maintained. In the statement made by the Senator from Wisconsin [Mr. LENROOT] he quoted from information furnished him by Julius Kayser & Co., of New York, a most reputable concern of that city, in which he gave the foreign cost, duty, landing charges, and profits on imported gloves, with the equivalent ad valorem rates under the Senate bill. With these figures I agree, except as to the retail prices. Mr. Kayser's memorandum indicated that the 11-inch German-made cotton suède glove, the import price of which he and I agree was 17½ cents a pair without duty, retailed for 50 cents a pair, while the facts are that these very same gloves are being retailed in Woodward & Lothrop's store on F Street, in this city, for $1 a pair.

Here is a pair of gloves [exhibiting], just the same as the glove 11 inches long exhibited by the Senator from Wisconsin, that I purchased in Woodward & Lothrop's store last Saturday morning for $1, and they were sold to Woodward & Lothrop by Mr. Kayser, and by him imported from Germany. Take the $2.10 importer's cost on a dozen pairs of these gloves—and I am taking the figures of the Senator from Wisconsin—adding 35 per cent, on present duty, 15 cents for landed costs, and then 25 per cent profit for the importer, that glove should have been laid down here to the retailer for 31 cents. They cost me $1 a pair. Under no circumstances could this price have been higher to the consumer even with the additional duty, provided the retailer charged a reasonable profit. In fact, even the higher rate should not bring the price to the consumer to more than 75 cents a pair.

Then the Senator referred to a longer glove, 23 inches in length. He did not quote the retail price in Mr. Kayser's memoranda, but he has just called it to my attention, and I note that it is $1 a pair. Here is another pair of gloves that I bought in Woodward & Lothrop's last Saturday, purchased by that concern from the same importer, for which I was required to pay $1.75. Based on the Senator from Wisconsin's own figures, prepared by Mr. Kayser, this glove, with duty paid and 25 per cent profit to the importer, in all probability cost the retailer about 65 cents, and I was required to pay $1.75 for it. Certainly the present low rate is not conducive to very low prices for the ladies living in Washington who wear these gloves.

It seems to me that the gentlemen who come here and furnish figures to those who are opposed to the rates which the committee proposes ought to thoroughly inform themselves.

Mr. HITCHCOCK. Mr. President, will the Senator state whether the glove manufacturers can afford to manufacture a glove and have it sold at retail in this country at the price which the Senator paid?

Mr. CALDER. Oh, yes.

Mr. HITCHCOCK. So that the competition, so far as the retail market is concerned, is close——

Mr. CALDER. But for the fact that the American manufacturer is driven out of the wholesale market because of the

cheap foreign price, he could come in and compete with the retail price I have quoted without difficulty. Let me say to the Senator that if he will examine the figures he will find that this glove, with the duty paid which is provided for in the bill, and 25 per cent profit to the importer, can be purchased by the retailer for 82½ cents a pair. Surely the retailer could afford to sell them for $1.75.

Mr. HITCHCOCK. Does the Senator think Woodward & Lothrop is the only firm that can import those gloves?

Mr. CALDER. Of course not.

Mr. HITCHCOCK. Can not any one of 10,000 people import gloves and sell them?

Mr. CALDER. Yes.

Mr. HITCHCOCK. And will not that competition level the price to the American consumer?

Mr. CALDER. Yes; but the facts are that the American consumer is not getting the benefit of this low rate of duty.

Mr. HITCHCOCK. But the importation of gloves is not limited to Woodward & Lothrop or to 10,000 people. Anyone can import gloves, so that you need not worry, as far as that is concerned, about the consumer.

Mr. McCUMBER. That pair of gloves cost originally 33⅓ cents a pair, and sold for $1.75.

Mr. CALDER. Yes; I bought them myself.

Mr. McCUMBER. Of course, the duty of 35 per cent was added to it.

Mr. LENROOT. Mr. President, if this rate is imposed and this additional cost to the importer and wholesaler is imposed, why does the Senator say that the retailer will not increase the price of those gloves from $1.75 by exactly the amount of the increase in the duty?

Mr. CALDER. Of course, Mr. President, that again depends upon the competition, as the Senator from Nebraska has said. Besides, as the Senator from North Dakota in a remark just made has indicated, the trade will not warrant raising the price of that glove beyond $1.75. It competes at about that price with the silk glove, and it is getting up to the point where it is beginning to compete with the kid glove. That is about the limit of price the retailer can ask. I submit to the Senator from Nebraska that the retailer has gone to the limit in this case.

Mr. HITCHCOCK. Does not the Senator think it is an outrage on the consumers of the United States to double the tariff on 20,000,000 pairs of gloves which the people have to use? They are using 20,000,000 pairs of these gloves.

Mr. CALDER. Of these gloves [exhibiting]?

Mr. HITCHCOCK. Of gloves subject to this provision. As read by the Senator from Ohio, the imports at the present time, not taking into consideration local production, amount to 20,000,000 pairs of gloves a year. I am not talking about that particular style, but the gloves which are subject to the tariff in this provision, as stated by the Senator from Ohio from the figures furnished by the Tariff Commission. We are annually importing 20,000,000 pairs of gloves like that, and the Senator from New York says we are making about one-tenth of the capacity in America.

Mr. CALDER. We are not importing 20,000,000 dozen pairs of gloves a year.

Mr. HITCHCOCK. I did not say dozen; I reduced it to pairs, so that we can understand it. I say that the imports are 20,000,000 pairs of gloves a year.

Mr. CALDER. Yes.

Mr. HITCHCOCK. So that they are in general use. It is a common thing. Shop girls buy them, as well as the well-to-do women of the country. Poor women buy them, and poor men buy them, I suppose, if they are men's gloves. If they are women's gloves only, poor women buy them to the extent of 20,000,000 pairs a year, and does the Senator think he can justify to the American people raising the tariff duty over 100 per cent on an article of that sort, an article of such general consumption that 20,000,000 pairs a year are used? This is no luxury. This is a commodity of common use. People who can not afford kid gloves are wearing them. People who can not afford more expensive gloves are wearing them. They are among the cheapest articles of clothing, and this is a proposition to raise the duty to a point so that objection is made even when the Senator from Wisconsin wants to limit it to 75 per cent. I suppose the Senator from New York would have it put up to 100 per cent?

Mr. CALDER. Yes. And then they would be made in the United States and through competition sold for much less than those I have exhibited here to-day.

Mr. HITCHCOCK. Is there no limit to the taxes you are going to impose on the common American people who have to buy cheap things? Should they not be given some opportunity once in a while to get something that is cheap? Have we always got to levy a tax on the articles the poor people have to buy?

Mr. CALDER. The trouble is we do not get them cheap. As the figures clearly indicate, the American people are not getting them cheap. Let me say to the Senator from Nebraska that these gloves can be manufactured here, a manufacturer's profit added, the retailer's profit added, with a duty as high as proposed in the bill, and sold without difficulty for $1.25 a pair for the 23-inch glove.

Mr. HITCHCOCK. It can not be done if the Senator has his way and trebles the tariff on it.

Mr. CALDER. Oh, yes. Competition will take care of that. Now, with a low tariff of 35 per cent, provided the importer only took 25 per cent profit and considering every charge added to the glove, it was sold to the retailer for about 65 cents, and yet the American lady is compelled to pay $1.75 a pair under this present low-tariff rate.

Mr. POMERENE. Mr. President, the Senator from New York has been contrasting the prices of certain goods which he exhibited and which are supposed to have come from Kayser & Co. The goods he displayed were said to have been sold at $4 a dozen. Then he exhibited a long glove which he said retailed at $1.75 a pair. Now, the Senator has not told us whether these are the same quality of gloves or not. Has he any information on that subject?

Mr. CALDER. None except that I have conferred with the customs experts and they say it is a character of glove that is in common use. Here [exhibiting] are the two pairs. The Senator from Ohio can compare them.

Mr. POMERENE. I perhaps would not know the quality of the cloth in the gloves if I should see them. It is a very easy matter to come here and exhibit one class of gloves and say that the purchase price is so much and the retail price is so much, when we do not know anything about the quality. This, however, is leading up to what I intended to suggest to the Senator.

Since the Senator made his statement I have been advised that the glove which the Senator has exhibited here, instead of selling at $4 to the merchant, sold at $8 a dozen. Does the Senator know whether that is correct or not?

Mr. CALDER. I did not say it sold at $4 to the merchant. I said the imported price was $4.

Mr. POMERENE. The imported prices, then. My information is that the price to the wholesaler was $8 a dozen.

Mr. CALDER. If the Senator will permit me, in my estimate of the matter I figured the wholesale price ought to have been, giving the importer 25 per cent profit, about $7 per dozen pairs.

Mr. POMERENE. We would have to have some expert to point out whether or not the quality of the glove was the same or not.

Mr. CALDER. I may say to the Senator that the figures were prepared for me by Government experts and that my figures are in substantial accord with the figures of the Senator from Wisconsin [Mr. LENROOT], and I have said so. His figures were prepared by an importer.

Mr. POMERENE. But has the Government expert told the Senator that he is dealing with the same quality of gloves all the time?

Mr. CALDER. I have not shown him the pair of gloves which I exhibited.

Mr. POMERENE. No; of course the Senator has not. That is where the slip is, I suspect.

Mr. President, while I am on my feet I wish to speak very briefly on this subject.

Mr. SIMMONS. Mr. President, before the Senator proceeds, will he let me ask the Senator from New York a question?

Mr. POMERENE. Certainly. I yield to the Senator from North Carolina.

Mr. SIMMONS. I would like to ask the Senator from New York whether he bought from Woodward & Lothrop any American gloves of a comparable quality and length?

Mr. CALDER. No; I did not.

Mr. SIMMONS. Does the Senator know or can he give us any information as to the retail selling price of the American glove comparable with the one he has exhibited?

Mr. CALDER. Of course, I can not, except that I can say that the figures furnished the Tariff Commission by the glove manufacturers of the United States indicate that the wholesale selling price per dozen of a glove of this character is $11.75.

Mr. SIMMONS. For the American glove?

Mr. CALDER. Yes.

Mr. SIMMONS. That is the wholesale selling price; but the Senator is not able to give us the retail selling price?

Mr. CALDER. I will say to the Senator that there are very few of these sold.

Mr. SIMMONS. I want to ask the Senator, in purchasing the foreign-made glove for the purpose of exhibiting it here with the intent of showing the high price at which the foreign glove is retailing in the American market, why he did not at the same time try to buy at least a comparable glove of American make so that they might have been exhibited together?

Mr. CALDER. It did not occur to me. I sent my young lady secretary to the different stores in Washington to purchase the gloves.

Mr. SIMMONS. Does not the Senator know that the reason why this alleged cheap foreign article is selling in the American market for $1.75 a pair is that the American-made glove is selling in the American market for that price or above that price?

Mr. CALDER. Of course, the Senator knows the retailer would take all the profit he could get.

Mr. SIMMONS. That is not the point. The point I am making is that the reason why the retailer charges this extortionate profit upon the foreign-made article is because he is able to get the like profit upon the American-made article.

Mr. CALDER. Very well; suppose that is the case?

Mr. SIMMONS. If that is the case, then no one is to be blamed for the high prices of the foreign product except the American manufacturer and the American retailer who sells the American article at those high prices. In other words, the maker in Germany is not to be blamed and the importer is not to be blamed if a high price is asked for the foreign articles by the retailer, if the retailer, selling the American product, charges a higher price.

I think he will find that as a rule the American article is selling at retail in this country at a higher price than the imported article. Now, suppose the American article in this market is selling for $2 a pair. The Senator can not tell us whether it is or not. It might be selling for a little bit more, and because it is selling for this high price the retail merchant who buys the German article at a low price very naturally raises the price of the imported article up to what he can get for the domestic article.

Mr. WADSWORTH. Mr. President, will the Senator let me ask him a question right at that point?

Mr. SIMMONS. Yes.

Mr. WADSWORTH. Why is it, then, that the American factories are closed?

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from New York?

Mr. POMERENE. I have not yielded.

Mr. SIMMONS. If the Senator from New York will wait until I have an opportunity to discuss that question, I may be able to enlighten him to some extent as to why the American factories are closed where they are closed.

The PRESIDENT pro tempore. The Senator from Ohio has the floor and will proceed.

Mr. POMERENE. Mr. President, I wish to speak very briefly, and I desire to say preliminarily that I expect to vote for the amendment offered by the Senator from Wisconsin [Mr. LENROOT] to the amendment offered by the Senator from Utah [Mr. SMOOT].

I wish to assure Senators that I have no desire whatever to embarrass the glove business or any other business by anything that I may say or by any vote that I may cast, either on this item or any other item. I have the thought in my mind that when it comes to legislation of this character we should not entirely lose sight of the consumer when we are trying to benefit the producer.

The Senator from New York [Mr. CALDER] has referred to the profits that the importer would get or wanted. I suspect that is what he is in business for. I do not think that those who come here and ask for these high duties are inspired by a purely altruistic sense of the situation. Now, what is the situation?

Before I enter upon a discussion of the rates I want to say to the Senate that this morning I had a very interesting conference at my office. How they happened to come I do not know, but two manufacturers and a representative of a large concern that does both a manufacturing and an importing business came to my office at one and the same time, and shortly after they came one of the financial experts of the committee came to see me. So that I had the benefit of the combined wisdom of them all.

This is about the situation as I gleaned it in the conference: It is true that the business of manufacturing of suède gloves in this country is a good deal demoralized, but it is due in part to this reason, in my judgment: It is only within the last few years that we have been manufacturing suède gloves. They were manufactured here when there was a substantial embargo upon the German suède gloves due to the war and to conditions succeeding. These gentlemen went into the business, I take it, to make money. They had charged the public an exorbitant price for their goods. That is my inference. At the same time there was a very great demand for the kind of labor that could do this sort of work, and as a result some of these gentlemen were paying the men who operated the machines over $100 per week. Their costs, as they have given them to the Finance Committee and to Members of the Senate, have been based upon that exorbitantly high labor charge. Now it turns out that one of these companies made a reduction during the past year of 10 per cent in the wage paid and the other one about 15 per cent, he thought. At the same time it develops that the wage in Germany has been very much advanced during the last six or eight months. So that the prevailing economic conditions, taking into consideration the declining wage here and the increasing wage in Germany, all redound to the benefit of the American manufacturer.

Now, what is the situation? Under the Payne-Aldrich law there was a duty of 50 per cent ad valorem. Under the Underwood-Simmons law there was a duty of 35 per cent ad valorem. Under the bill as reported by the Finance Committee it was sought to place a duty of $3 per dozen on these gloves. The committee come in now with an amendment to their original proposition reducing the duty to $2.50 a dozen. Two dollars and fifty cents a dozen would amount to about 87½, on the average, per cent ad valorem, so the experts tell me. Many of the duties under this specific rate of $2.50 per dozen will amount to 119 per cent ad valorem. So that, as a matter of fact, with conditions now becoming more favorable for the American manufacturer than they were, they are asking under the modified amendment an increase of the Underwood rate of two and one-half times or, in other words, 250 per cent over the present duty. Now, I submit that this is not quite the right time to make these exorbitant increases.

More than that—and I say this with all due respect to the gentlemen who came to see me, for they were all courteous—the very first thing to which attention was called was the difference in the wage scale prevailing here and in Europe, which must be considered, of course, in fixing the tariff. Again, they discussed the question of the declining value of the mark, which also must be taken into consideration. However, when I tried to find out what the wage cost per unit of production was, neither one of them knew anything about it. In other words, the question was put thus: "Assuming that there is a factory in Germany employing 100 people and a manufacturing plant in the United States employing 100 people, will the product in the American factory be more or less than the product in the German factory?" They knew nothing about it. That simply indicates that when manufacturers come here with a plea for exorbitant rates we must accept their statements of fact with a certain grain of allowance.

Now, let me call attention, if I may, to some figures that were presented to me. I also was presented with three samples of these gloves—sample 1, sample 2, and sample 3. I have an analysis of this situation to which I desire to call attention. The statement was made July 14, 1922. I may say that while these figures were left with me by one of these gentlemen I have since had them checked up by the expert who sits to my left; and while he did not go into all of the details—I did not ask him to do that—he has stated to me that the figures are substantially accurate; and I have no doubt about it as I examine them.

As to sample 1 [exhibiting], the foreign valuation in marks, reduced to American money, per dozen was, in 1914, $1.13; in November, 1921, it was $1.85; in March, 1922, it was $2.10.

The retail price in 1914 was 25 cents per pair. At present it is 50 cents per pair. Under the proposed rate of $2.50 per dozen, the retail price would be 75 cents per pair. In other words, the pre-war price is trebled.

Mr. CALDER rose.

Mr. POMERENE. I will yield to the Senator in just a moment. The pre-war price is trebled in considerable part because of the high rate of duty.

Mr. CALDER. Will the Senator yield right there?

Mr. POMERENE. I shall yield in just one moment. I wish to introduce in the RECORD the memorandum which I hold in my hand as a part of my remarks without reading.

The PRESIDENT pro tempore. Without objection, permission is granted.

The table referred to is as follows:

Comparison of foreign cost, wholesale selling price, and retail selling price—Computed on revised rate reported by Finance Committee of Senate July 12, 1922.

SAMPLE NO. 1—COTTON GLOVE (2414).

Foreign value in 1914—marks 5 less 5 per cent=$1.13.
Foreign value November, 1921 (purchased in American money), $1.85.
Foreign value March, 1922 (purchased in American money), $2.10.
Retail price, 1914, 25 cents per pair.
Retail price at present, 50 cents per pair.
Retail price at proposed rate of $2.50 per dozen, 75 cents per pair.

RATES OF DUTY.

Payne-Aldrich rate, 50 per cent.
Present rate, 35 per cent and 7 cents per pound.
Proposed rate, $2.50 per dozen, equal to 119 per cent.

ILLUSTRATION OF INCREASED RETAIL PRICE.

Foreign value—per dozen	$2.10
Proposed duty—do	2.50
Landing expenses	.10
	4.70
Overhead and profit, 33⅓ per cent	1.57
Wholesale selling price (net)	6.27
Retailer's usual overhead and profit, 50 per cent	3.13
Total (equals 78 cents per pair)	9.40

Mr. POMERENE. I now yield to the Senator from New York.

Mr. CALDER. The Senator from Ohio has referred to the foreign cost of the 11-inch gloves which he has just displayed. I agree with the Senator as to that, and the table which I have from the Treasury experts gives the same information.

Mr. POMERENE. What I have stated as to the retail price is correct.

Mr. CALDER. I paid $1 a pair on Saturday for the same kind and size of gloves.

Mr. POMERENE. Sometimes even a Senator from New York may be flimflammed. [Laughter.]

Mr. CALDER. That is true, and so may a Senator from Ohio be flimflammed as to the statistics furnished him.

Mr. WADSWORTH. May I ask the Senator from Ohio if he purchased the pair of gloves which are now in front of him?

Mr. POMERENE. No, Mr. President; I am afraid I should have been victimized, as was the Senator from New York, if I had gone to the store.

Mr. WADSWORTH. Does the Senator know how much was paid for the pair of gloves that he has in front of him?

Mr. POMERENE. I do not.

Mr. WADSWORTH. Then the Senator from Ohio has no evidence on that point?

Mr. POMERENE. I have none at all; I am accepting the statements that are made here, which correspond, I think, with those that have been made heretofore.

Now, let me take the second sample [exhibiting]. The foreign value in 1914 was $1.38 per dozen; in November, 1921, it was $2.25; March, 1922, it was $2.50. The retail price in 1914 was 35 cents per pair; at present it is 69 cents per pair; and under the proposed rate of $2.50 per dozen, up to the 11-inch length, the price would be 87 cents per pair. I ask to insert this statement also in the RECORD.

The PRESIDENT pro tempore. Without objection, permission is granted.

The statement referred to is as follows:

Comparison of foreign cost, wholesale selling price, and retail selling price, computed on revised rate reported by Finance Committee of Senate July 12, 1922.

SAMPLE NO 2, COTTON GLOVE (2484) 12 INCHES LONG.

Foreign value in 1914, $1.38.
Foreign value November, 1921, $2.25 (purchased in American money).
Foreign value March, 1922, $2.50 (purchased in American money).
Retail price 1914, 35 cents per pair.
Retail price at present, 69 cents per pair.
Retail price at proposed rate of $2.50 per dozen up to 11 inches in length, plus 10 cents per dozen for each inch in excess of 11 inches, 87 cents per pair.

RATES OF DUTY.

Payne-Aldrich rate, 50 per cent.
Present rate, 35 per cent and 7 cents per pound.
Proposed rate, $2.50 per dozen up to 11 inches in length, plus 10 cents per dozen for each inch in excess, $2.60, or 104 per cent.

ILLUSTRATION OF INCREASED RETAIL PRICE.

Foreign value	$2.50
Proposed duty (glove is 1 inch in excess of 11 inches)	2.60
Landing expenses	.10
	5.20
Overhead and profit, 33⅓ per cent	1.73
Wholesale selling price (net)	6.93
Retailer's usual overhead and profit, 50 per cent	3.47
Total (equals 87 cents per pair)	10.40

Mr. POMERENE. I also have sample No. 3. The foreign value in 1914 was $2.03 per dozen. I may say that this is a glove 23 inches in length; November, 1921, the foreign value was $3.75 per dozen; in March, 1922, it was $4 per dozen. The retail price in 1914 was 50 cents per pair; at present the price is $1 per pair, and under the $2.50 per dozen proposed rate the price would be $1.30 per pair. I ask that the table may be incorporated in the RECORD.

The PRESIDENT pro tempore. Without objection, permission is granted.

The table referred to is as follows:

Comparison of foreign cost, wholesale selling price, and retail selling price, computed on revised rate reported by Finance Committee of Senate, July 12, 1922.

SAMPLE NO. 3—COTTON GLOVE (2414/16), 23 INCHES IN LENGTH.

Foreign value 1914, $2.03.
Foreign value November, 1921, $3.75 (purchased in American money).
Foreign value March, 1922, $4 (purchased in American money).
Retail price 1914, $0.50 per pair.
Retail price at present, $1 per pair.
Retail price at proposed rate of $2.50 per dozen up to 11 inches, plus 10 cents per dozen for each inch in excess of 11 inches, $1.30 per pair.

RATES OF DUTY.

Payne-Aldrich rate, 50 per cent.
Present rate, 35 per cent plus 7 cents per pound.
Proposed rate, $2.50 per dozen up to 11 inches in length plus 10 cents per dozen for each inch in excess of 11 inches equals $3.70 equals 92½ per cent.

ILLUSTRATION OF INCREASED RETAIL PRICE.

Foreign value	$4.00
Proposed duty (12 inches in excess of 11 inches)	3.70
Landing expenses	.10
	7.80
Overhead and profit (33⅓ per cent)	2.60
Wholesale selling price (net)	10.40
Retailer's usual overhead and profit (50 per cent)	5.20
Total (equals $1.30 per pair)	15.60

Mr. POMERENE. Mr. President, although I stand ready to vote for an increase in the rate of duty, so far as this particular branch of industry is concerned, over the rate provided by existing law, because I want to be on the safe side, yet I can not conceive why it is necessary to insist on these exorbitant rates. Bear in mind that the glove industry is not a new industry here. When it comes to cotton gloves, we manufacture them in a number of sections of the country and are doing so successfully. I do not think that the manufacturers are seriously afraid of foreign competition. I have a statement before me applying to silk gloves which indicates very clearly that we are selling many silk gloves in foreign markets. The glove manufacturers of the country know the glove industry; they are not very much disturbed about those classes of gloves; but when it comes to the suède gloves, they came here and, in the first place, wanted a duty of $3 a dozen; and notwithstanding the fact that the Finance Committee had been swallowing exorbitant rates on the products of nearly every line of industry, they could not retain that $3 a dozen rate of duty upon their stomachs. Now they come in here and consent to the rate being decreased to $2.50 a dozen. I am thankful for that much of a concession; but it seems to me that even the highest protectionist in the land ought to be satisfied with the 75 per cent limitation which is placed upon the duty on these gloves by the proposed amendment of the Senator from Wisconsin [Mr. LENROOT], which is more than two times the present rate.

Mr. WALSH of Montana. Mr. President——

Mr. POMERENE. I will ask the Senator to pardon me for just a moment. The Senator from South Carolina a moment ago referred to the cost of material and the advantage that we had in this country over the foreign competitors. Everyone has got to admit that to be so. I now yield to the Senator from Montana.

Mr. WALSH of Montana. I understood the Senator to say that the gentlemen, experts in the business, who had conferred with him were unable to give him any information as to the proportion of the total cost that is assignable to labor in the manufacture of the gloves. I should like to know from the Senator if the labor cost can possibly reach as high as 75 per cent?

Mr. POMERENE. Mr. President, I do not think that is possible.

Mr. WALSH of Montana. That is to say, the 75 per cent rate proposed would, in the judgment of the Senator from Ohio, more than equal the total labor cost?

Mr. POMERENE. There can be no question as to that. I have some figures here which I shall give to the Senate in just a moment, bearing upon that question. The Senator from Montana, however, has not quite accurately stated my position. What I intended to say, at least, was that they were

unable to tell me what the wage cost was per unit of production; in other words, they did not know whether our labor was more or less efficient than the German labor.

Mr. WALSH of Montana. Per unit?

Mr. POMERENE. Yes.

Touching somewhat upon the question which the distinguished Senator from Montana has just put to me, I have a table here prepared by the experts going into the question of cost. It is a comparison of American and German manufacturing costs for 1921 of warp-knit or chamoisette cotton gloves. The table itemizes the costs when the glove is made out of the unshrunk yarn and also when the glove is made out of the shrunk yarn. It gives the cost of knitting, dyeing, finishing, the total cloth cost, the cost of other material, clasps, and so forth, total material cost, overhead cost, and labor cost. I wish to give to the Senate a few of these figures.

The total material cost to the American manufacturer is 45.10 per cent, but the total cost of this same material to the German manufacturer is 73.62 per cent. So it appears that from the material standpoint our manufacturers have a very great advantage over the German manufacturers.

Now I come to the labor involved in making the gloves. In the American market this labor is 35.92 per cent of the total cost, while in Germany it is 17.44 per cent.

Mr. President, I ask that this table may be inserted in the RECORD as a part of my remarks, without reading the whole of it.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The table is as follows:

Warp-knit or chamoisette cotton gloves (comparison of American and German manufacturing costs, 1921).

	Costs per dozen pairs.		Per cent of total cost.	
	American.	German.	American.	German.
Unshrunk (average of 3 companies):				
Yarn	$0.91	$0.72	.....	.....
Other cloth expense (knitting, dyeing, finishing)	.73	.43	.....	.....
Total cloth	1.64	1.15	33.47	48.94
Other material (clasps, etc.)	.57	.58	11.63	24.68
Total material	2.21	1.73	45.10	73.62
Overhead	.93	.21	18.98	8.94
Labor, in making glove	1.76	.41	35.92	17.44
Total	4.90	2.35	100.00	100.00
Shrunk (average of 4 companies):				
Yarn	1.16	1.05	.....	.....
Other cloth expense (knitting, dyeing, finishing)	1.02	.69	.....	.....
Total cloth	2.18	1.74	38.58	54.89
Other material (clasps, etc.)	.64	.61	11.33	19.24
Total material	2.82	2.35	49.91	74.13
Overhead	1.00	.29	17.70	9.15
Labor in making and packing glove	1.83	.53	32.39	16.72
Total	5.65	3.17	100.00	100.00

Mr. POMERENE. The figures that I have given are of gloves made of unshrunk yarns. I have substantially the same items of cost when the gloves are made out of shrunk yarns.

The total material cost of these yarns to the American manufacturer is 49.91 per cent, but the total material cost to the German manufacturer is 74.13 per cent. The total labor cost involved in making and packing the gloves is 32.39 per cent to the American manufacturer; to the German manufacturer, 16.72 per cent.

Mr. CALDER. Mr. President——

Mr. WALSH of Montana. Mr. President, it appears, then, that the German manufacturer has an advantage over the American manufacturer in respect to his wage costs.

Mr. POMERENE. Of about 50 per cent.

Mr. WALSH of Montana. It appears that the American manufacturer has an advantage over the German manufacturer in respect to his material costs.

Mr. POMERENE. Of nearly 25 per cent.

Mr. WALSH of Montana. Let me ask the Senator, how do the two balance? What is the total cost to the American manufacturer as against the total cost to the German manufacturer?

Mr. POMERENE. This is made out on a scale of 100, so that I am not able to give that. Just a moment.

Mr. CALDER. I was going to ask the same question.

Mr. POMERENE. Pardon me just one minute. I think I made a misstatement a little while ago when the Senator asked me as to the total cost. I will say that this is the average of four companies. The yarn cost per dozen pairs to the American is $1.16, to the German $1.05. Other cloth expense—knitting, dyeing, and finishing—to the American is $1.02, and to the German 69 cents; making a total cloth cost to the American of $2.18, and to the German manufacturer of $1.74. The cost of other material, clasps, and so forth, to the American is 64 cents, to the German 61 cents. Total material cost to the American manufacturer, $2.82; to the German manufacturer, $2.35. Overhead expense: American, $1; German, 29 cents. Labor in making and packing gloves: American, $1.83; German, 53 cents; making the total cost to the American $5.65, and to the German $3.17. I may say that this was during the year 1921.

Mr. WALSH of Montana. Apparently, then, a 50 per cent duty would more than take care of the difference.

Mr. POMERENE. I should think so.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. POMERENE. I yield.

Mr. LENROOT. A 50 per cent duty?

Mr. WALSH of Montana. Three dollars and seventy-five cents to five dollars and odd.

Mr. LENROOT. Three dollars and seventeen cents.

Mr. POMERENE. Three dollars and seventeen cents to five dollars and sixty-five cents.

Mr. CALDER. May I suggest that on the Senator's own figures the difference in the production cost is $2.48?

Mr. POMERENE. These are not my figures. They are figures that are furnished me by the expert.

Mr. CALDER. I beg the Senator's pardon; the figures the Senator has read.

Mr. POMERENE. Yes.

Mr. President, I also have here a table which shows a comparison of the costs under these several brackets between paragraph 914 of the Senate bill, the act of 1913, and the act of 1909. Without taking the time to read it, I desire to call attention to these facts:

Under the act of 1909 the duty was 50 per cent. Under the act of 1913 it was 35 per cent. Under the Senate bill the specific rate of $2.50 reduced to an ad valorem rate would be about 100 per cent. That, of course, is an average, and it would vary in accordance with the value or quality of the articles imported.

Mr. President, I ask that this table also may be incorporated in my remarks.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The table is as follows:

	Senate bill (par. 914).	Act of 1913 (par. 260).	Act of 1909.			Imports.
			Ladies' gloves (par. 324).	Not over $6 per dozen (par. 328).	Over $6 per dozen (par. 328).	
Warp-knit or chamoisette gloves:						
Single fold, not shrunk or suèded	50 per cent ad valorem	35 per cent	50 per cent	50 cents per dozen and 40 per cent.	50 per cent	Large, mainly ladies' gloves.
Single fold, shrunk or suèded	$2.50 to $3.70 per dozen pairs	do	do	do	do	
Two or more folds	$3 to $4.30 per dozen pairs	do	do	do	do	
Lisle gloves	50 per cent ad valorem	do	do			Very small.
Ordinary knit gloves for policemen, firemen, elevator boys, etc.	do	do		50 cents per dozen and 40 per cent.	50 per cent	Do.
Work gloves, used in husking, etc., made of woven (not knit) cloth.	25 per cent ad valorem	do		do	do	None, usually.

Imports are mainly ladies' chamoisette gloves, suèded, averaging $2 to $3 per dozen pairs. On these the rates compare as follows: Act of 1909, 50 per cent; act of 1913, 35 per cent; Senate bill, 100 per cent (estimated average).

General imports of cotton knit gloves in 1922.

	Dozen pairs.	Value.	Value per dozen.
January	104,304	$188,488	$1.81
February	110,631	236,777	2.14
March	173,462	434,729	2.51
April	144,473	369,651	2.56
May	147,040	366,910	2.50

Mr. POMERENE. Mr. President, I regret exceedingly that the Finance Committee has not seen its way clear to reduce this rate very substantially below the figure of $2.50 per dozen. I think that the amendment offered by the Senator from Wisconsin [Mr. LENROOT] will give ample protection to these people, particularly in view of the favoring conditions which seem to be before us, and I am quite sure that it will substantially lessen the cost of these gloves to the consumer.

Mr. WADSWORTH. Mr. President, there were a very few matters which I took the liberty of bringing to the attention of the Committee on Finance with what might be termed "extreme emphasis." One of them was the condition of the glove industry in the United States. A goodly portion of that industry is, or was, operating in the State of New York, and with some of the communities in which it is situated I am familiar. I think I am not inaccurate when I say that of all the industries as to which I have any information worthy of recounting, the glove industry, with the exception of certain elements of it which need not be adverted to upon this occasion, has been in the most desperate condition. I make the one qualification—all that I know about.

There are three or four communities that I can recollect at present in the State of New York alone in which knit cotton gloves are made or were made. Two years ago the industry was thriving. It had been built up, it is true, during the war. It is not true that they charged exorbitant prices for the goods which they produced during the war, unless we reach that conclusion by a mere comparison of the prices of all articles during the war with the prices of all articles produced before the war and say that every increase was exorbitant. As a matter of fact, the prices of these gloves during the war had not increased by any greater percentage than the prices of other articles used commonly by human beings; but, dating from a year and a half or two years ago, a complete blight has crept over this industry. All last winter in more than one community the artisans who had been employed were standing in bread lines, and charitable organizations—and I speak the literal truth—were supporting scores and scores of families whose wage earners had lost the opportunity to earn a penny.

Reference has been made here somewhat rashly and recklessly by those, of course, who desire to impugn the motives of everybody who asks for a protective tariff, to the "grasping, greedy habits" of the glove manufacturer, and it has been asserted that the duties proposed by the Senate Committee on Finance were for the purpose of filling his pockets and bloating his bank account and making him inordinately rich. Of course, that is a familiar piece of tactics. We hear it very often; but the truth of the matter is that the manufacturers of cotton gloves are broke. Their mills are closed. Their men are walking the streets, and have been for months and months, and the proposal of the Committee on Finance is that something shall be done to preserve the industry from permanent destruction.

A lot of questions have been asked as to the importations of gloves, and some figures have been given. A good many questions have been asked as to the consumption of these particular gloves in this country, and figures have been given upon that. It is very easy to understand what the consumption is. If you will add the domestic production to the importations, you will find the number of gloves that are used in the United States in one way or another. Of course, the truth is that to-day hardly any gloves of that character are made in the United States. One of these manufacturers told me the other day—and he is one of the smaller manufacturers—that about one-tenth of the men that were formerly employed when the industry was running at full blast are now employed at part time, or upon some special kind of work which will keep them together and give them a little to live on.

The Senator from Ohio [Mr. POMERENE] has, I think, almost proved the case. He has quoted the costs of a German-made glove and of an American-made glove; and it is shown by his own figures—which are the official figures, I may say, and I think accurate—that the difference in cost is $2.48 per dozen pairs; that is, for one type of glove.

The original suggestion of the committee was that these gloves should bear a duty of $3 per dozen pairs. The domestic production has been almost entirely destroyed, and the importations are practically supplying the overwhelming portion of the domestic demand. It is asserted that a duty of $3 per dozen pairs is grossly excessive, and that even $2.50 per dozen pairs is grossly excessive. That same old fallacy is indulged in, to the effect that if we place a duty upon the finished manufactured product, the amount of that duty will be instantly added to the retail price of the article in our shops and stores, an assertion which can not be borne out by any study of the history of a tariff, or of the importation and selling of any foreign article through any period or term of years.

The most astonishing instance to disprove that theory came to my attention only the other day, which went to show me what I think it will show anyone who will think twice about it, that when the foreigner has a monopoly of the American market the price stays high; that when the foreigner has been able to destroy an American industry and get complete control of the American market, the American purchaser, or the so-called ultimate consumer, never gains by the process. If by any means the foreigner gets a monopoly of the American market I hold that same assertion is true, and I cite the case of salvarsan, commonly known as "606," a very well-known medicine.

Prior to the war that medicine was being sold to the people of the United States at $4 per dose. It was a German monopoly. No one else could make it. There was no competition from American manufacturers or from anyone else. To-day, as the result of the breaking down of the German competition and the ability of the American to enter the field, with no favors, and compete against the imported article, that medicine is selling, instead of $4 a dose, for 40 cents a dose. That illustrates, I think, conclusively the point I want to make.

Mr. POMERENE. In this connection, is it not true that the German manufacturers were those who fixed the price in this country?

Mr. WADSWORTH. They were; and there was no competition against them. That is just what is going to happen in the case of cotton knit gloves. If the industry is destroyed, the plants dismantled or changed completely so as to be used for some other purpose, the capital diverted, and nothing but the foreign glove left to come in, of course the foreigners will name the price, and they will name a price as high as the market will stand. They are doing practically that to-day, or they are coming so close to it that the signs are ample to show what will happen in the near future if this goes on.

My colleague has set forth the situation concerning the fate of the purchaser who goes into a store to-day to buy such gloves as he has exhibited. It is shown perfectly plainly that the prices which he himself paid are exorbitant, if a reasonable profit is figured for those who handle this article in commerce, including the importer and the retailer, and the jobber, if you please. It can not be stated with any degree of certainty that the mere adding of a duty is going to add to the price of a German-made glove in Woodward & Lothrop's. It will not. The effect will be to give the American-made glove a chance to compete with the German-made glove, and it will bring the price of the German-made glove down, if anything at all. That has happened in the case of many and many an article. I need not recite them now. I have stated one which was rather dramatic in its effect.

Mr. HITCHCOCK. Mr. President, does the Senator take the position that if we increase the duty on an article its selling price in this country is likely to be reduced?

Mr. WADSWORTH. In certain cases; yes. When the foreigner has had a monopoly and commanded our markets, named his own price and had no competition, time and time again it has been shown that the imposition of a duty in protection of the American-made article has resulted not only in a vast increase in the production of the American-made article but a decrease in the prices of all the articles.

Mr. HITCHCOCK. The foreigner is not charging these exorbitant prices.

Mr. WADSWORTH. Indeed he is.

Mr. HITCHCOCK. He is selling his goods at a very low price. It is the American merchant who, according to the Senator, is selling them for exorbitant prices.

Mr. WADSWORTH. And the importer.

Mr. HITCHCOCK. Maybe the importer, and maybe the retailer.

Mr. WADSWORTH. They can ask just as much as people are willing to pay to-day.

Mr. HITCHCOCK. The Senator is now arguing that he will sell them for a lower price if he pays a higher duty. That is the most extraordinary contradiction of this bill. The whole theory of the bill is to protect American industries from dis-

astrous competition by raising the duties, so as to compel the goods to be sold at higher prices. Now the Senator is arguing that as a result of the raising of the duties the goods will be sold at lower prices.

Mr. WADSWORTH. As to manufactured articles, I believe that what I said is generally sound. As to raw materials there is a different situation, because the cost of labor does not enter to nearly the same extent. I refer to tin plate, for example. How the Democratic Party inveighed against the imposition of a duty upon tin plate! We made none here. A duty was finally imposed, and what was the result? We had all the tin plate we wanted at a lesser price, finally, when we got our industries going. We created competition.

Mr. WALSH of Montana. That is, after a lapse of a great many years, tin plate cost less than it did before.

Mr. WADSWORTH. My recollection is that it was not a great many years.

Mr. WALSH of Montana. As a matter of fact, all manner of steel products are manufactured at a very much less cost than they were in past years, are they not?

Mr. WADSWORTH. The Senator and I do not agree upon this matter of a tariff, and we might argue until we were both black in the face.

Mr. WALSH of Montana. We do not agree, either, that because an article costs less now than it did 20 years ago it is because there was a duty on it.

Mr. WADSWORTH. I will make this observation: Had there been no duty in all these years on tin plate, and we had been dependent entirely upon foreign producers of tin plate for our supply, the price of tin plate in the United States would not have gone down in proportion to the decrease in the prices of other products.

Mr. WALSH of Montana. I undertake to say that we would not have been dependent, up to the present time, upon the foreign supply for tin plate any more than in the case of other things the manufacture of which has grown up and developed in this country.

Mr. WADSWORTH. That is an observation which the Senator is entitled to make. I do not agree with him.

Mr. HITCHCOCK. Of course, the Senator will realize that if any such change in the selling prices of these German articles in the United States is to occur as the Senator predicts, the glove manufacturers who are now bombarding Congress to get a higher duty would be asking us to lower the duty instead of raise it.

Mr. WADSWORTH. I can not quite follow the Senator's logic in that statement.

Mr. HITCHCOCK. If the Senator's theory is correct, that a raise of duty is going to lower the price, the American glove manufacturers would not be asking for an increase in the duty on gloves.

Mr. WADSWORTH. It is not a question of price alone that is important in an industry. It is the relation of the selling price and the costs. The manufacturer's interest is in how much it is going to cost him to produce the article, and then the selling price is important. If his costs can be reduced, and he still makes a profit with a reduced selling price, he is satisfied. That has been so as to everything. It is the relation of cost to selling price that counts.

That is the important thing in any commercial or manufacturing business. The price of gloves may come down in the future. I hope it will. But that does not necessarily mean that gloves can not be made at a profit. But to-day this particular kind of glove can not be made at all in this country, and the foreigner has a monopoly of the manufacture. What we are asking is that Americans have a chance to compete. My own idea is that about the first thing that will happen will be that the foreigner will begin reducing his prices as a result of that competition, because even with the $3 a dozen rate proposed in the first Senate committee amendment you have not a tariff which equals the difference in the cost of manufacturing the highest quality of these cotton knit gloves, as I can show from Government figures.

Mr. HITCHCOCK. All the statements made by the Senator from New York and his colleague here to-day have been to the effect that these goods have been produced abroad so cheaply that it was an outrage for the retailers to charge such enormous prices. So you can not expect the foreign price to be reduced. What you have to do is to reduce the selling prices of these retailers, who, according to your theory, are making exorbitant profits.

Mr. WADSWORTH. I think they are.

Mr. HITCHCOCK. You can not do that by increasing the cost of the goods.

Mr. WADSWORTH. I think both the importers and retailers will bring their prices down as soon as they have this competition. As long as they have no competition there is no incentive for them to bring them down, and they will charge whatever American women are willing to pay, and apparently they are willing to pay at a rate which gives the importer and the retailer combined more than 100 per cent profit.

Mr. LENROOT. Are there not a number of importers?

Mr. WADSWORTH. I assume there are a number.

Mr. LENROOT. Are there not great department stores in New York which import direct?

Mr. WADSWORTH. There are.

Mr. LENROOT. And they will continue to do so, will they not; and they will add this duty if they can, will they not?

Mr. WADSWORTH. Yes; if they can. Here is the situation of May 3, 1922, as to costs: Take this style of long glove which my colleague had on his desk a little while ago. The foreign value of that glove is $4 per dozen pairs. The landing charges are 15 cents. Supposing the $3 a dozen duty were left in this bill as originally proposed by the Senate committee, the duty would be $3 per dozen, and with the added length of that glove another duty of $1.30. It is 13 inches, at 10 cents an inch. So the total landed cost would be $8.45 per dozen pairs. That applies to these long-sleeved gloves. Let us give the importer 25 per cent profit on top of that, which would seem to be a reasonable profit. That would bring his price up to $10.56 per dozen pairs.

The comparable American article, which is made now, it is true, in very small quantities, instead of costing $10.56, including the 25 per cent profit for the importer, would cost $11.75, with no profit for an importer or a middleman included in that. So it is easy to see why the American manufacturers are not making any gloves here. It simply can not be done.

The committee originally proposed to give a rate of $3 a dozen pairs. They propose now to give $2.50 a dozen pairs, and so the difference in cost between the foreign-made glove and the American-made glove is widened by another 50 cents. If my recollection of that is correct, the duty under the second amendment, the last amendment of the Committee on Finance, amounted to 84 per cent ad valorem on that type of glove. Yet it does not equalize the cost of production by any means.

Along comes the Senator from Wisconsin and proposes that no duty shall be assessed of more than 75 per cent ad valorem.

Mr. LENROOT. Has the Senator any figures of American cost of production?

Mr. WADSWORTH. Just this figure from the Reynolds report.

Mr. LENROOT. That is the selling price. It is not the cost of production.

Mr. WADSWORTH. Perhaps not; but a statement conclusive of the whole thing is that the factories are closed.

Mr. LENROOT. But it does not follow that because the factories are closed there should be the difference the Senator states between the selling price and the import price in order to open the factories.

Mr. WADSWORTH. It means there is no profit left and they have quit doing business.

Mr. LENROOT. Under the present rates that is true, but it does not follow, I say again, that they need the rate proposed by the committee amendment to open the factories, because if they have a 50 per cent profit in that selling price they can run their factories at a less profit.

Mr. WADSWORTH. I would like to have that substantiated.

Mr. LENROOT. I am taking a hypothetical case. It includes profit, but we do not know how much profit there is in the selling price. That is the only point.

Mr. WADSWORTH. I can not see how there would be any profit in those selling prices, or else they would be running the mills.

Mr. LENROOT. Not under the present rates. What the Senator desires to know is how much of a rate is necessary to enable them to run their mills at a fair profit. We have not any information upon that subject whatever. Mr. Littauer, in the hearings, where he speaks very often about selling price, has not said one word concerning cost of production.

Mr. WADSWORTH. The selling price given is $11.75 per dozen pairs, and on that selling price the factories have closed. Apparently they can not get any more than that or they would get it.

Mr. SIMMONS. That is the wholesale selling price, is it not?

Mr. WADSWORTH. Yes; and in comparing that wholesale selling price of $11.75, under which American workmen are walking the streets and nine-tenths of the factories are closed,

with the price of the foreign article imported under the original proposal of the Senate committee with a duty of $3 per dozen pairs, plus a 25 per cent profit to the importer himself, I find that there is 75 cents advantage to the foreign glove even then.

Mr. SIMMONS. The Senator then is comparing the landing cost of the foreign article, plus the freight and plus the duty, with the wholesale selling price in this country.

Mr. WADSWORTH. Plus 25 per cent profit to the importer.

Mr. SIMMONS. Twenty-five per cent profit to the importer?

Mr. WADSWORTH. Yes; I gave him his profit.

Mr. SIMMONS. Does the Senator think that he is justified in comparing the landing cost of the foreign product, plus the duty, with the wholesale selling price? Does he think that is a proper comparison in fixing a tariff? We are talking about a comparison for tariff purposes. Is not the admitted comparison with the cost of production?

Mr. WADSWORTH. That is an entirely proper one, I will say.

Mr. SIMMONS. The cost of production in this country, as the Senator from Wisconsin said, does not seem to have been ascertained with any degree of accuracy. Mr. Littauer said it was $6.50, I think, and the Senate committee seem to have accepted that as the cost of production in this country, but there seems to be no evidence of it. That is the figure with which the Senator must make his comparison.

Mr. WADSWORTH. Of course, if I were making that kind of a comparison.

Mr. SIMMONS. I am not accepting that figure. I myself think that is far beyond the cost of production. That is what an interested, and a very deeply interested, witness stated was about the cost of production. There is where we make so much complaint of the committee. If they were going to adopt the cost of production theory of imposing a tariff, we complain because they did not make a more thorough investigation with the view of accurately and impartially ascertaining and determining the cost of production in this country, and then making a comparison with the foreign landed cost.

Mr. WADSWORTH. If the comparison were to be made upon the basis suggested by the Senator from North Carolina I should not add the 25 per cent profit which I have allowed to the importer.

Mr. SIMMONS. The Senator ought not to include any profit to the importer if he does not include a profit to the manufacturer. The cost of production does not mean manufacturer's profit and it does not mean wholesaler's profit.

Mr. WADSWORTH. Of course not.

Mr. SIMMONS. It means the actual cost of producing the thing—the labor and the material that go into it and any overhead connected with it. That is the proper basis, as I understand it.

Mr. WADSWORTH. The Senator may not like the point at which I made the comparison, but he can not deny that that point at least is a consistent one and he can not deny the comparison itself. I included the manufacturer's profit when I stated the selling price of the manufacturer, as I have included the importer's profit.

Mr. SIMMONS. The Senator said he allowed 25 per cent profit on the part of the importer. Now, the Senator does not know that the manufacturer's profit and the importer's profit are the same. The importer might have a profit of 25 per cent or might have a profit of 50 per cent or 100 per cent, and so might the manufacturer. If the Senator is going to include the manufacturer's profit——

Mr. WADSWORTH. But the Senator says "might."

Mr. SIMMONS. The point I am making is this: I am simply trying to get at a proper basis of comparison. In arriving at the cost of production we should not allow any profit to the importer or any profit to the manufacturer. It should be just the cost of producing the article.

Mr. WADSWORTH. I think the Senator nor anyone else will deny, when I state that $11.75 is the selling price secured by the American manufacturer for the glove which he makes, that it must include whatever profit there is, and there can not be any profit or he would be running his mills. They are closed.

Mr. SIMMONS. It includes the manufacturer's profit and includes the wholesaler's profit.

Mr. WADSWORTH. No; that is the selling price.

Mr. SIMMONS. Eleven dollars and seventy-five cents is the wholesale selling price?

Mr. WADSWORTH. It is the manufacturer's selling price, and he is making no profit.

Mr. SIMMONS. If the cost of production is $6.50 and he sells for $11.75 he must be making a very good profit.

Mr. WADSWORTH. If that were the fact his factories would be open.

Mr. SIMMONS. I am going to show the Senator that the Tariff Commission has given us data from which we are bound to conclude that the cost of production of the suède gloves is not over $6.50, or was not over $6.50 in 1918. That was during the war, when wages were extremely high, and when cotton was nearly twice as high as it is now. Here is what the commission said under the head of "Production":

Production values of various kinds of cotton gloves for 1918 were estimated as follows:

Then are given the different kinds of gloves, and we come to the item under discussion:

Suèded cotton gloves, $8,450,000 (1,300,000 dozen pairs).

That, according to my calculation, is $6.50 per dozen pairs. That was the cost shown by the Government statistics for the year 1918. Certainly the Senator would not say that it cost as much to make those gloves to-day as it did then. Cotton was higher then. The labor item has gone down somewhat—at least that is the general understanding.

Mr. WADSWORTH. Below the scale of 1918?

Mr. SIMMONS. I do not know about this particular industry, but I do know that cotton has gone down, and I assume the cost of producing this product is not now as much as it was in 1918. But assuming that the cost of producing the material is as much to-day as it was in 1918, during the war, if the manufacturer is selling these gloves at $11.75 per dozen, then his profit is the difference between $6.50 and $11.75. That is a very considerable profit, I believe.

Mr. CALDER. Mr. President, from what survey did the Senator quote?

Mr. SIMMONS. I read from page 886 of the Summary of Tariff Information, 1921, relative to the bill H. R. 7456. The Senator will find what I read under the head of "Production," beginning with the word "suèded" in the fourth line of that paragraph. He ought not to have any trouble in finding it.

Mr. CALDER. The Senator spoke of a production of $8,450,000 worth of gloves.

Mr. SIMMONS. That is what the commission said, that the production in that year was $8,450,000, and that the amount of production was 1,300,000 dozen pairs. If the Senator will make a calculation he will see that I am correct.

Mr. CALDER. If we divide one into the other it would give $6.50.

Mr. SIMMONS. That is what I said.

Mr. CALDER. But it does not give a definite statement concerning the cost of production.

Mr. SIMMONS. It is as definite as any statement given in the Tariff Summary. They are official figures.

Mr. WADSWORTH. Well, Mr. President, we can indulge in a contemplation of prices and costs——

Mr. SIMMONS. If the Senator will pardone me, the committee have accepted these figures, I think, in fixing the rate. If the Senator will pardon me further, I have the foreign value of these gloves given as $3.35. That is what the committee estimated, I understand. They give the landing cost at 15 cents and the duty to equalize $3, making a total of $6.50. The committee seems to have accepted it as the cost of production.

Mr. WADSWORTH. I have not discussed the cost of production in the United States. I have not had figures available. I am not quarreling with the committee for adopting $6 or $6.50 as the figure. I am not quarreling with the Senator from North Carolina if he doubts the accuracy of that figure. All I state is that, whatever the cost of production in the United States to-day, the factories are closed, the people are out of work, the industry is dead, and the foreigner is fast getting a monopoly of the market.

Mr. HITCHCOCK. Mr. President, I suggest to the Senator that there are a good many other industries in the country with which the foreigner has nothing to do and which are in a similar condition and have been for a year or two past.

Mr. WADSWORTH. But the foreigner has something to do with this industry.

Mr. HITCHCOCK. The foreigner has not anything to do with the closing of the copper mines in this country.

Mr. WADSWORTH. Because he does not export copper to the United States; he does export gloves to the United States.

Mr. HITCHCOCK. So the prostration of our industries need not be charged up to the lack of tariff. It is due to the depressed condition of the country.

Mr. WADSWORTH. But the people are still buying gloves.

Mr. HITCHCOCK. The people are still buying copper, too.

Mr. WADSWORTH. They are buying their gloves at higher prices.

Mr. HITCHCOCK. But they are buying cotton, too. The fact is we do not sell one-half of our cotton crop. The people are economizing. The people have been out of work. The people have been enjoying a degree of Republican prosperity for a year and a half or two years in this country. It is not only the factories that are in competition with Europe that are prostrated. It is the enterprises which have no competition with Europe which are in a prostrate condition.

Mr. WADSWORTH. And all under the Underwood-Simmons tariff law, which we are trying to get rid of, and which we will get rid of. The Senator indulges in some rather remarkable observations. He is trying to draw the inference, and to get away with it, that the prostration of the American glove-making industry is not due to anything except industrial depression, generally speaking. If that were so, why has the foreign importation trebled, quadrupled, and quintupled within two years? The people are buying gloves, but they are buying them from the foreigner, who has driven the American producer out of the market. That is the cause of the depression in the glove industry, and the Senator must know it. The figures on their face prove it.

Mr. HITCHCOCK. The glove industry is like other industries of the United States; it can not possibly be prosperous when our international commerce is cut in two each year. For the year just closed our international commerce was but one-half what it was the year before, and for the year before that it was $2,000,000,000 less than what it was the previous year. The administration is not doing one thing to stimulate our foreign commerce upon which our prosperity depends. This country is prostrate and in the midst of a depression because we have not been able to sell our surplus products abroad, and instead of opening up a market in the world for the sale of those products Senators on the other side of the Chamber are trying to build a tariff wall around the country which will not only keep out imports but will prevent our exports from going out.

Mr. WADSWORTH. Well, Mr. President, the Senator from Nebraska is inviting a general political discussion here in which I do not intend to indulge. I am anxious to conclude very quickly.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER (Mr. WILLIS in the chair). Does the Senator from New York yield to the Senator from Massachusetts?

Mr. WADSWORTH. I yield.

Mr. LODGE. I wish merely to make the point that the decline in foreign commerce is less in the case of the United States than in the case of any other country. In all the countries abroad the foreign commerce has declined more and business has revived less than it has in the United States. I have heretofore put the figures into the RECORD in reference to that matter.

Mr. WADSWORTH. Mr. President, I think I have sufficiently discussed the pending question.

Mr. HITCHCOCK. If the Senator from New York will permit me, I desire to say that I do not admit the accuracy of the figures presented by the Senator from Massachusetts.

Mr. LODGE. I did not suppose the Senator would admit that, but they are the figures of the Department of Commerce.

Mr. HITCHCOCK. No; I do not admit their accuracy. The trouble with the Senator from Massachusetts was that he made his comparison of present conditions with those in the last year of the operation of the Payne-Aldrich law. Of course, compared with that year our present trade is better, but the Senator should properly make the comparison with the years of the Underwood law. The Senator has made a comparison with the tariff year in 1913, which was the last year of the Payne-Aldrich law——

Mr. LODGE. And the first year of the Underwood law.

Mr. HITCHCOCK. And, of course, the showing was bad, because the Payne-Aldrich law was a failure.

Mr. LODGE. It was the first year also of the Underwood law, which was likewise a failure.

Mr. HITCHCOCK. The Underwood bill did not pass until the 1st of October of that year; so that there were 10 months of that period under which the Payne-Aldrich law was in operation; and, of course, the showing was bad.

Mr. LODGE. It does not matter particularly which law was in operation. The point is that, taking as a comparison the trade of all countries, our foreign trade, imports and exports combined, exceeds to-day that of any other country; and we have revived from the depression of 1921 more than has any other country. The fact is the trade of the whole world is depressed by causes which go far beyond the tariff of any country.

Mr. WADSWORTH. Mr. President, I think I have discussed this question long enough, and I do not intend to continue it, except merely to say that I believe this is an industry which we should preserve. I do not like to see a successful effort of this kind come to naught. It did fill a need during the war; it is an industry that we ought to maintain in this country. We should not be dependent upon the foreigner for all our supplies, and I believe that the only way to protect the industry—and that is all I ask—is to impose a duty which will equal the difference in the cost of production here and abroad.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Wisconsin [Mr. LENROOT] to the amendment reported by the committee.

Mr. SIMMONS. Mr. President, I do not wish to enter into any extensive discussion of this paragraph. I wish to put in the RECORD, however, some letters which I have. I shall not read them, because I do not wish to take up the time of the Senate for that purpose.

There are two or three fundamental facts connected with this question which I think ought to be clearly set out in the RECORD, and it is for the purpose of doing that, and for that purpose alone, that I rise.

First, it is a fact which I think no one will dispute, that the present German landed price, which it is stated is so extremely low that the American manufacturer can not possibly compete with it, is to-day twice what it was in 1914, the last normal year before the war. I do not wish that that fact shall rest upon my statement alone; I want it to be clearly established, because I think that Senators on the other side of the Chamber will find it very difficult, indeed, to contend that we must have a higher duty than that of the Payne-Aldrich law or that of the present law in order to enable us to compete with the German manufacturer, when the German is now selling his product in this market for twice as much as he sold it for during the life of the Payne-Aldrich law and during the life of the Underwood law up to the time the war began.

I wish to read into the record, as supporting that statement, the data concerning this kind of glove given by the Tariff Commission under the head of imports. Imports of cotton gloves during the fiscal year ended June 30, 1914, were 1,523,784 dozen pairs, valued at $2,184,039. These were mainly women's suède gloves from Germany. That was the price upon which the duties were paid to the Government; so that there can be no doubt about the price at which these goods were invoiced and imported into this country.

I have the calculation here, Mr. President, from which it is apparent that the sale price upon which the duties were paid to the Government during 1914 was $1.42. In 1921 the imports were 813,604 dozen pairs, valued at $2,727,478, or $3.35 a dozen pairs. That is a great deal more than twice as much in 1921. In 1922 the price was still further advanced, and the average was $4 a dozen pairs. So the foreign price has more than doubled; indeed, almost trebled what it was under the Payne-Aldrich bill and under the first nine months of the Underwood law.

Here the facts are entirely different from the facts that have been presented to us with reference to the German price of other commodities on which high duties have been imposed. It has been contended, and in many instances it has been shown, that the German price of the product sought to be protected was below the pre-war price, or, if not below the pre-war price, about the pre-war price; but here is a product the foreign price of which is from two to three times as much as it was before the war; and still it is said that we must have these high rates of duty in order to enable the American manufacturer to compete.

Mr. President, I think I can show what is the situation here. There is no trouble, in my judgment, about competing with Germany in the manufacture of these gloves. The only difficulty is that we have never been able to apply the suède process as the Saxons have been able to apply it. We have not learned their process. It is a process which adds very great value to the glove. If we could learn the art of this process and employ it skillfully, probably the cost of applying the method would be very slight; but we have not been able to do it; and for that reason, Mr. President, our gloves are not quite so attractive to the American trade as are the imported gloves.

I have here a long letter from Mr. Kayser, who says that he manufactured these gloves during the war, and sold them in immense quantities because then we could not import any gloves from abroad; but he says that in nearly every instance his customers said that they much preferred the foreign glove, because our manufacturers could not give them the gloss and the finish which the foreign glove has; and I think that is really the trouble about this manufacture.

I think I will put this letter of Mr. Kayser's in the RECORD, because it is a very thorough discussion of this subject, and he shows why he, as the biggest single manufacturer of these

gloves in the United States during the war, has gone out of the business, but, he says, not at a loss; he has simply transferred his force in that factory to the manufacture of silk gloves. I also desire to insert in the RECORD a letter on the same subject from the firm of Wimelbacher & Rice, of New York City.

There being no objection, the letters referred to were ordered to be printed in the RECORD, as follows:

NEW YORK, *January 10, 1922.*

Hon. FURNIFOLD M. SIMMONS,
Senate Finance Committee,
Washington, D. C.

SIR: We respectfully submit the following statement for your consideration in relation to the rate of duty on cotton fabric gloves, the fabric of which is made on warp machines.

Prior to the war, with the exception of a very small quantity of men's fabric gloves, which were used by policemen and for military purposes, there were practically no fabric gloves made in this country. We were large manufacturers at this time of silk gloves, with a capacity production of approximately 750,000 dozen per year. We were importing cotton gloves from Saxony at the rate of about 500,000 dozen per year.

At various times prior to 1914 at considerable expense and effort we endeavored to manufacture fabric gloves in this country. We found that it was not so much the cost of production as the difficulty in obtaining a satisfactory fabric in finish and quality that prevented our developing the cotton-glove business in this country. Whether this was due to lack of knowledge in dyeing or finishing or general handling of the product, we are not in a position to state, but such experiments which we did develop convinced us that the article was one which could not be made, regardless of price, to give the customer the same amount of satisfaction as the German product.

With the outbreak of the war we again endeavored to manufacture these cotton gloves and manufactured them to a very large extent, investing a large amount in machinery and building for this purpose alone. We manufactured over 3,500 dozen a week, which were sold only because the imported product was unobtainable. The 12,000 accounts to whom we distributed our product were almost unanimous in stating to us during this time that they much preferred the imported article.

These gloves had always been very popular prior to the war because of this peculiar finish and general satisfactory wear which the imported article gave. The individuality which these imported gloves have can be largely attributed to the special skill which the Saxons have acquired, due to the many years of training, heritage, and dyeing facilities peculiar to this industry.

Glove making requires more skill than any other industry in the wearing-apparel field. This condition has been brought about due to the demand which the public has made upon the manufacturer for a perfection in fit which can only be developed by operatives who have a particular special talent for this kind of work. Naturally the number of employees engaged in this industry has been and still is limited, and even under present conditions it does not attract new hands, with the result that during the war period when we tried to develop a cotton-glove business in this country approximating a capacity of 3,500 dozen a week, we were obliged to draw upon our silk-glove operators to a large extent in order to make these gloves, with the result that our silk-glove production of approximately 15,000 dozen a week was called upon to supply the hands to make the cotton gloves.

We mention this fact for the reason that under normal conditions practically all the labor that has been employed in the cotton-glove industry can be absorbed by the silk-glove industry, thereby causing no unemployment.

Just at present, with economic conditions unsettled, no industry is absorbing full production, but we feel that under anything like normal conditions the silk-glove industry of this country, which practically supplies the world with its product, will readily absorb such hands who at present are not employed in the cotton industry.

Having had the experience of manufacturing cotton gloves of all kinds in this country during the past five years, and having been importers prior to the war of practically 35 per cent of all the gloves exported by Germany to this country, we believe that the Payne-Aldrich duty of 50 per cent made it possible for the domestic manufacturer, if he could develop the skill, to compete. We are certain that no duty, however, can develop the skill for reasons above cited, and that in the end the 10,000,000 or 12,000,000 wearers of cotton gloves will be obliged to buy an inferior article at a high price if the duties are placed so high as to make the importation of cotton gloves prohibitive.

We have made a very careful survey of the industry in its branches, and even though we expended a large amount of money in plant and machinery for the development of this industry from 1915 to 1920, we were convinced that regardless of price we could not produce an article of as good quality, fit, and finish in this country as the wearer could secure from the imported article.

We found no difficulty in absorbing in other branches of our business the help that was formerly employed in our cotton-glove departments. The only loss which we have taken has been the expansion in building and certain kinds of machinery which are only adapted for cotton manufacturing. We have done this during the past 18 months under most unfavorable conditions, and must repeat that the importation of German gloves will in no way affect the employment of any large percentage of those engaged in the industry.

Male labor so employed has been relatively small, inasmuch as the warp machines used for cotton manufacture are easily changeable into silk weaving, and have been so absorbed. Such male help as has been employed in cutting of cotton gloves has been transferred to cutting of silk gloves and kindred lines.

The female help has been absorbed in the manufacture of silk gloves and kindred lines. In other words, there has been no lack of employment in our mill due to the recent importation of cotton gloves and the discontinuance of our manufacturing cotton gloves in this country.

These imported gloves have been referred to in the statements made to the Senate Finance Committee as "chamoisette," according to reports in the public press. Their origin, however, should be explained. They are cotton gloves and were developed abroad and extensively worn in this country, as well as practically every other civilized country. The word "chamoisette" was copyrighted by us and registered at every customhouse in the United States. Others import this glove under different names.

Due to the moderate price at which it can be sold, the article has become indispensable for the mass of men and women of this country. To prohibit its importation by an exorbitant rate would be to compel the consumer to buy a glove inferior in appearance and finish and to pay double or more for it merely for the protection of an industry which during the war was in the hands of practically five or six concerns who endeavored to make this article as an addition to their regular lines of leather or silk gloves, but who apparently could not put it on the market at a reasonable price.

A "chamoisette" glove which prior to the war retailed at $0.25 per pair cost in Germany 4½ marks, less 5 per cent discount, equal to $1 per dozen, and in August of this year when exchange was approximately $0.015 they cost 125 marks, or approximately $1.87½ per dozen. For spring, 1922, delivery the foreign price demanded is in dollars, not in marks, and is from $1.85 to $2.

The rate in paragraph 914 of the Fordney bill, i. e., 40 per cent on the American selling price, or, for example, say, the price which the importer would be compelled to sell his merchandise at would be as follows:

Foreign value	$1.875
Freight, insurance, and other expenses, say, at a minimum, 5 per cent	.094
Total	1.969
Duty (40 per cent on selling price, $5.62½)	2.25
Gross profit (25 per cent on selling price, $5.62½)	1.406
Selling price	5.625

So that the rate of 40 per cent on the American selling price is equal on the foreign value to 120 per cent, as follows:

Duty ($2.25) divided by foreign value ($1.875) equals 120 per cent.

And the fact that the gloves cost abroad nearly twice as much as before the war should not be overlooked and is a fact which can be verified by the records of the customhouse.

Much has been said regarding the low price of German gloves which hardly conforms to the facts. The present price of these gloves in Germany, reduced to dollars from the mark value at the date of purchase at the current rate of exchange, is from 75 to 100 per cent higher than the pre-war prices; in fact, a larger percentage of increase in price than the percentage of increase which we are obliged to-day to demand for our silk-glove products made in this country. In other words, we are obliged to-day to sell cotton gloves at an advance from 75 to 100 per cent over the pre-war price, whereas silk gloves of domestic manufacture are being sold at a rate of between 50 and 60 per cent over the pre-war prices.

To attempt to fix an excessive permanent tariff rate to last for years because of shifting conditions as they exist to-day is illogical and unwise, as may be seen from the fact that at the present time purchases of cotton gloves in Germany for future delivery must be made in dollars, by which the uncertainty caused by fluctuations in exchange is eliminated.

Again, we would direct your attention to the dollar price paid abroad, which is about double the pre-war price of this same article.

In conclusion, therefore, let us repeat that in order to protect five or six small industries, which, in our opinion, employed not over 5,000 people at their peak of manufacture during the war, over 12,000,000 men and women will be obliged to pay an excessive price for an inferior article if the pending tariff bill becomes a law. We believe that a normal importation of German gloves will in no way effect any unemployment for the reasons as stated above. The normal leather and silk glove manufacturing before the war and which was intensified very largely during the war has always suffered from a lack of skilled labor, this because of the peculiar difficulties and hardships upon the operator to acquire the skill necessary to produce a glove.

This company has been in business for 40 years, has net assets of approximately $10,000,000, and employs over 8,000 hands in this country in its various branches at Brooklyn, Amsterdam, Sidney, Walton, Bangor, Oneonta, Owego, Cobleskill, Palatine Bridge, Hornell, and Monticello.

Yours very truly,

JULIUS KAYSER & CO.,
W. A. SHAKMAN,
First Vice President and General Manager.

NEW YORK, *June 18, 1922.*

Hon. FURNIFOLD MCL. SIMMONS,
United States Senate, Washington, D. C.

MY DEAR SIR: We have noted in the press that an amendment has been offered on the floor of the United States Senate to change the rates on cotton gloves in the new tariff bill, paragraph 914, H. R. 7456, from the extremely high rate of $3 per dozen to a rate conforming more to the demand of the times.

Let us call your attention to the following facts: This high rate will affect mostly the popular two-clasp cotton gloves, which were sold throughout the United States under the Payne-Aldrich tariff bill at 25 cents per pair. The present retail price for this same article under the Underwood tariff bill is 50 cents per pair. This advance in price is caused by the increased cost of the imported article.

If the proposed Senate rate becomes a law, this same article would have to be sold at a dollar per pair. In other words, the proposed Senate rates are three times that of the Payne-Aldrich tariff. The Payne-Aldrich tariff bill provided a rate of 50 per cent, whereas the Senate Finance Committee schedule proposes about 150 per cent. The wholesale selling price would have to be $7.50 per dozen and the retail selling price would be from 85 cents to $1 per pair.

The people of the United States are demanding a lowering of living costs instead of increasing them, and the quicker this fact is realized and acted upon the better it will be.

Goods of this particular character are worn mostly by the masses, who are now groaning under the burden of high prices, and we think action should be taken toward eliminating high tariff rates on goods which are worn by the masses, who are now forced to economize to overcome the high living costs.

We ask you to support the amendment introduced by Senator LADD to have these rates reduced, and we would be pleased to see you vote for this amendment when the proper time comes.

Very truly yours,

WIMELBACHER & RICE.

Mr. SIMMONS. Mr. President, right there is a remarkable thing. We are the world's greatest manufacturers of silk gloves. We undersell the world on silk gloves. We even invade the German market in the sale of silk gloves. I want to read what Mr. Littauer said about that in his testimony before the committee:

> We have been able to make the best silk glove in the world. Germany can not compete with us at all. * * * We have the silk-glove trade of America wherever good silk gloves are wanted. We have it even in Germany and in England.

Mr. President, as I said, it is a fact that the same kind of labor enters into the manufacture of silk gloves as into the manufacture of cotton gloves, and it is difficult to understand why we can compete with Germany in this market and in foreign markets on silk gloves and yet in this market we require an exorbitant rate of duty in order to foster the manufacture of cotton gloves. There is not anything in the cost of production that interferes with our competition. It is simply because there is one little thing that gives artificial value to the glove made by the highly trained workmen of Saxony, who have been engaged in this business from time immemorial, whose fathers were in it, who have inherited the skill, and who have been trained and who have discovered a new method of finishing it, called suèding, that we can not imitate and have not been able to imitate. Mr. Kayser recognized that, and he said that it had been demonstrated that until we could acquire the knowledge and the skill necessary to apply this finish it would be utterly impossible for us to compete with Germany in this market, it did not make any difference what duty we might give, short of prohibition, because the American preferred the foreign glove to the American glove even at a higher price.

During the war, when we could not get these foreign gloves, when there was an embargo, the manufacturers of silk gloves and other cotton gloves began to make these suède gloves in this country, or attempted to make them. I have seen some of them. They do not compare with the foreign glove in finish and polish and luster and things of that sort. They were enabled, however, to command the American market because of the embargo. The American had gotten accustomed to that glove. He liked it, even though the quality was inferior, and he recognized it. He bought it because he could not buy anything else of a like character. He bought it, and the price at which the manufacturer claimed that it was produced was $6.50 a dozen. That was his manufacturing price, and his selling price probably was about $12 a dozen. That is shown by the statistics that I have read. That was the price at which he was selling this product under embargo conditions—$6.50 as the manufacturer's cost and $12 as the manufacturer's selling price.

Mr. President, what is sought to be accomplished in this bill is, by the imposition of this duty, to reestablish in this country the identical conditions which existed in 1918, when we had this enforced embargo which kept out the German product, kept out all foreign products, and enabled the American manufacturer to produce and sell at his own price. Am I right about that? The cost of production claimed by the manufacturer in this country is $6.50, the very identical fact that was found by the Tariff Commission as having been the price charged in 1918, when they had an embargo and a monopoly of this product in this country. Now the committee select that as the present manufacturer's price, and they proceed to build up the foreign price to the same amount—the manufacturer's price in 1918, when this embargo condition existed. How do they do it? They estimate the foreign value to-day at $3.35. That was correct. That was in 1921. It is not correct now. It is $4 now; but this bill was written on the basis of August, 1921, prices, and they have not changed it, notwithstanding those prices have gone up. They took the August, 1921, price, $3.35; landing cost, 15 cents; duty required to equalize, $3 a pair. Add them up and you get $6.50. So that they are imposing here a duty that will create an artificial tariff embargo just as effective and just as protective as was the war embargo of 1918.

What does that mean, Mr. President? It means that this rate is written with the intent of protecting the American producer of this article against foreign competition upon the basis of war prices and that as long as this bill remains in effect the American people will have to purchase these goods upon the basis of war prices of production, notwithstanding the fact that the war prices of production of articles of this character have necessarily diminished since the war by reason of the decline in the price of the materials out of which the articles are produced and by reason of the decline in the wages paid. If there has not been a decline in wages in this industry, do not doubt that as soon as this industry is put upon its feet by the establishing of this new embargo the manufacturers, without reducing their prices one whit, will begin the process which is going on throughout the country of forcing a reduction in wages.

Mr. President, the rates of the present bill, even when scaled down, will, I imagine, be something over 100 per cent. When I say "scaled down," I mean by the new proposal of the committee. I think they are excessive; and while if the Senate saw fit to adopt some considerable increase as an emergency measure for the purpose of giving these people another opportunity to see if they could successfully produce this product in competition with Germany or other countries it might be justified; to write it into a permanent tariff is, to my mind, absolutely indefensible.

I shall therefore take very great pleasure in supporting the amendment of the Senator from Wisconsin [Mr. LENROOT]; and if I could get it lower I should be glad, if that amendment is defeated, to support the amendment of the Senator from North Dakota [Mr. LADD].

Mr. LENROOT. Mr. President, just one moment. I want to place in the RECORD a statement for the benefit of Senators who were not here when I spoke earlier in the day.

This amendment on the $2.10 glove will reduce the ad valorem rate from 119 per cent to 75 per cent. Upon the $2.50 glove it will reduce it from 104 per cent to 75 per cent. Upon the $4 glove it will reduce it from 92½ per cent to 75 per cent.

I ask for the yeas and nays upon my amendment.

Mr. LADD. Mr. President, I had intended to offer the amendment that I announced in April that it was my intention to offer to lower the rates; but inasmuch as the Senator from Wisconsin [Mr. LENROOT] has offered an amendment, if that prevails I shall withhold my amendment.

I sincerely hope that the amendment offered by the Senator from Wisconsin will prevail, for I have felt since I proposed this amendment in April that the rates were altogether too high. The further I have gone in the study of this proposition the more I have become convinced that the rates are unnecessarily high.

Mr. SMOOT. Mr. President, yesterday considerable time was occupied in discussing the rates in this paragraph. The samples of gloves that I had, together with the foreign costs, justified the rates that were reported to the Senate. The average rate under the samples of gloves that I had which were imported into the country would not have been more than about 84 per cent; but since the committee report was made there has been put into my hands a suèded cotton glove the invoice price of which was $2.10 a dozen. With a rate of $2.50 on that suèded glove, an 11-inch glove, it is true that the rate is 119 per cent, and I made a statement this morning correcting the statement that I made yesterday, because at that time I knew of no suèded gloves that came into the United States which were sold at anywhere near the price of $2.10 per dozen. I think myself that the rate of 119 per cent is too high on that class of glove.

I want to say, therefore, that if the committee had the amendment to consider again it is my opinion that there would be a modification of that rate; to what extent, I can not say at this time; but I do feel that as long as it has been developed that in this year a suèded glove can be imported into the United States at $2.10 a dozen, a rate of $2.50 seems excessively high.

Mr. WADSWORTH. Mr. President, it is apparent that the Senator had not encountered this particular type of glove, and it was unexpected to him, and perhaps to other members of the Committee on Finance. It is apparent that the Senator believes that further amendments should be made to this paragraph. The Senate Committee on Finance undoubtedly gave a great deal of study to this; in fact, I know they did, because I was with them a part of the time. It is certain, in my mind, that the committee did not believe that 84 per cent ad valorem was too high a rate upon any of the gloves which would fall under the $3 or $2.50 per dozen pair category.

Mr. SMOOT. As to that price of glove, I think that is absolutely correct.

Mr. WADSWORTH. I do not know whether my mind is traveling faster than that of the Senator, but the Senator from Wisconsin has offered an amendment which will limit the rate to 75 per cent, which is very seriously below some of the rates which the committee thought were wise——

Mr. SMOOT. On the cheaper glove.

Mr. WADSWORTH. On the cheaper glove; leaving out of consideration the 119 per cent ad valorem glove to which the Senator has referred. Does the Senator think it would now be a reasonable proposal, in view of this situation, that the limitation suggested by the Senator from Wisconsin be made 85 per

cent instead of 75 per cent? And that would be lower than the rate the committee has already adopted.

Mr. SMOOT. Of course, with the small production which has been taking place in the factories in America of late, the overhead expenses must be terrific. It could not be otherwise. That being the case, that cost must amount to, perhaps, 30 or 40 per cent of the labor cost. With the mills in full operation, and the overhead expenses being no more than to-day, if we made 80 or 90 per cent of all the goods consumed in this country, instead of 10 per cent, of course the cost of the manufacture of the glove would accordingly be reduced as the amount of production was increased. I would like to arrive at a rate which would allow our manufacturers in the United States to produce the goods consumed in this country, and at the same time reduce the cost of producing goods in this country through the overhead expenses being reduced. It may be that 75 per cent would take care of this class of goods, if they make the goods to the full amount of the consumption of the American people. I have no doubt as to that. But, if the 75 per cent rate meets that particular class of gloves it will rest entirely with the American manufacturer as to whether he will reduce the cost of the goods.

Mr. POMERENE. Is not this also true, that all of the figures and estimates which have been presented this afternoon are based upon data relative to wage and other conditions which prevailed in 1921, and looking at it from the standpoint of the American manufacturer, are not labor conditions both here and abroad more favorable than they were in 1921? In other words, the wages in Europe reduced to a gold basis are higher now than they were in 1921, and the wages in this country are substantially lower; at least they have been reducing wages here.

Mr. SMOOT. A few of them have made a 10 per cent reduction, and I think before we got to producing gloves in the United States so as to meet the demands of the American people at a price at which the American people will buy them there will be still further reductions in some of the wages paid. I called attention to the fact that they were paying as high as $105 a week in some of the hosiery mills. I claim that under conditions existing in the world to-day that wage can not be justified. That means over $5,000 a year, if they were continuously employed.

Mr. ROBINSON. What class of employees are paid at that figure?

Mr. SMOOT. The knitters, those running the large knitting machines on which they make the knitted hosiery.

Mr. ROBINSON. Would that be uniform, or the average wage paid?

Mr. SMOOT. I suppose that would be the higher wage paid for men who run the larger machines. I do not mean that would be the wage of the sweeper. I mean that that is the wage of the mechanic.

Mr. HITCHCOCK. Do the figures show that there is any higher labor cost now than there was in 1919?

Mr. SMOOT. No; but the prices of the goods of 1919 are quite different from those of to-day.

Mr. HITCHCOCK. I see from the census report that the labor in the glove industry at that time amounted to about $6,000,000 out of a product of $28,000,000.

Mr. SMOOT. That is the percentage of the labor in the goods.

Mr. HITCHCOCK. What is this tariff to protect against? Is it to protect against the difference in the cost of labor?

Mr. SMOOT. Partly. For instance, I think wages here are ten times the wages they are paying in Germany to-day in this industry on the basis of the gold mark.

Mr. HITCHCOCK. The other day I introduced some figures which showed that the increases in the wages of the German laborer have been rapid during the last year and a half, and are still going on, so that the cost of production is increasing there. In the case of gloves such as we have seen exhibited here, what percentage is the labor cost of the total cost of the glove, according to the committee's information?

Mr. SMOOT. I do not think the committee have found the exact labor costs. In fact, I am quite sure I do not know it. I have a report here which pretends to show the difference.

Mr. HITCHCOCK. If we can depend on the census reports at all it amounts to only about 25 per cent. Here is a tariff of over 100 per cent proposed.

Mr. WADSWORTH. The Senator from Ohio put the figures as to labor in the RECORD the other day, both as to Germany and the United States.

Mr. CALDER. I have indicated the labor cost in America, fixing the cost of manufacturing a dozen pairs at $5.65 and the labor cost $1.82.

Mr. POMERENE. The figures I gave were for 1921.

Mr. HITCHCOCK. What is the percentage of labor cost in the manufacture of the gloves?

Mr. SMOOT. It is about 33 per cent.

Mr. CALDER. Thirty-eight per cent, according to the figures submitted by the Senator from Ohio.

Mr. HITCHCOCK. How can they demand 100 per cent protection when the total cost of the labor is only 38 per cent the total cost?

Mr. CALDER. The figures submitted by the Senator from Ohio would indicate that it would cost $2.48 more to manufacture a dozen pairs of gloves in this country than in Germany, without profit to either side.

Mr. HITCHCOCK. It is claimed that this tariff is necessary in order to compensate for the difference in the cost of labor in the two countries, but the total cost of labor is only 38 per cent.

Mr. SMOOT. That is on the American price, not the foreign price. That makes all the difference in the world.

Mr. HITCHCOCK. If the total cost of labor is only 38 per cent, what is the difference between the German cost and the American cost? It can not be 105 per cent.

Mr. SMOOT. It could be more than the 105 per cent, considering the difference in the selling prices of the goods in this country and in Germany. That depends on the cost of making the goods in this country and the cost of making them in Germany. There is no doubt but what wages in the United States in this industry are ten times what they are in Germany, or an increase of a thousand per cent. There is no doubt about that.

Mr. HITCHCOCK. Does the Senator assert that the cost in this country is ten times as much as in Germany?

Mr. SMOOT. I say that the wage cost is ten times in this country what it is in Germany.

Mr. HITCHCOCK. The Senator surely can not seriously consider a statement of that sort. It is impossible.

Mr. SMOOT. I have a report from our Department of Commerce which will substantiate that, and even more than that, if the wages in this country remain what they have been in the past few years.

Mr. HITCHCOCK. I do not see how the Senator could possibly justify such an extravagant statement as that.

Mr. SMOOT. I do not make it upon my own knowledge. I make it upon a statement prepared and submitted by the Department of Commerce of the United States.

Mr. HITCHCOCK. What is the cost of this glove the Senator is speaking of, in which the labor cost is 38 per cent?

Mr. CALDER. According to the figures submitted by the Senator from Ohio, the cost of manufacturing a dozen gloves in this country is $5.65 as against $3.17 in Germany. May I add, for the information of the Senator from Nebraska, that the other day when in New York I discussed the question of wage costs in Germany in this country with Mr. Dodge, president of the Mergenthaler Linotype Co., which has a factory in Brooklyn, and which also has a factory in England, and one in Berlin. He does not ask for any duty—in fact, we do not give any—because he manufactures in Europe all that is demanded in Europe. He told me that to his machinists in Berlin he was paying $4 a week as against $34 a week for the men doing the same kind and amount of work in Brooklyn.

Mr. HITCHCOCK. Mr. Dodge in that case must have had some very extraordinary figures. It is very definitely known that the purchasing power of the mark is twice as much as the value of the mark in the international exchange. Of course I admit that the German laborer heretofore has been working for extraordinary low pay, because of the great subsidies which the German Government has been paying labor; but about a year ago the German Government began to withdraw those subsidies, and the wages of German labor have advanced until at the 1st of July they were twenty-eight times, in German money, what they were before the war, and they are still going up. American wages, as we know, are coming down.

Mr. CALDER. The wage rate I have given is as of the month of June of this year.

Mr. HITCHCOCK. They are impossible figures.

Mr. CALDER. On the gold basis.

Mr. SMOOT. Mr. President, I want to say to the Senator from Nebraska that the wages reported by the Department of Commerce were such that I did not want to use the figures, nor do I want to now, until they are rechecked. I could hardly believe them. But when I do get them rechecked I want the American people to know what they are.

Mr. HITCHCOCK. The Senator perhaps recalls that the other day I introduced a report from the Department of Commerce showing the German wages, how they had been increased there

in three or four months, until they are now up to twenty-eight times, in German money, what they were before the war.

Mr. SMOOT. In German money?

Mr. HITCHCOCK. Yes.

Mr. SMOOT. But I am figuring everything upon a gold basis, and my request of the Department of Commerce was to give me figures on a gold basis. I do not want to use the figures I got from them until they have been rechecked, because they are almost unbelievable.

Mr. HITCHCOCK. I think they are entirely unbelievable.

Mr. SMOOT. I want to say to the Senator from Nebraska that the wages here are more than ten times as great as those paid in Germany.

Mr. HITCHCOCK. Mr. President, I took some pains the other day to show the change going on in Germany with relation to the pay of labor, and the figures I gave were from the Department of Commerce. Most of those figures showed that, beginning a year or more ago, the pay of German labor, in German money, has been rising steadily and rapidly. I admitted it had not risen as fast as the international value of the German mark had fallen, but I showed it had been multiplied twenty-eight times in one year. I also showed that the German mark has a much greater purchasing power in Germany, probably twice that which it has in international exchange, so that German labor for that reason has been kept reasonably quiet. But I showed also that Germany has been paying great subsidies to labor to keep the wages of labor down.

In the first place, it has been compelling the landlords in the cities to refrain from increasing their rents. So that the German laborer heretofore has been paying out for rent only 2 per cent of his income instead of 20 per cent, as he did before the war. But that can not last any longer. Landlords are becoming bankrupt, and that plan has to be abandoned.

The German Government has been paying to the German laborer a subsidy called the bread ration. It has been commandeering 20 per cent of the wheat raised on German farms and putting it into bread and selling it to the laborer at one-half its cost. It has been importing wheat from other countries and putting it into the bread ration and selling it to the German laborer at one-half its cost. But a few months ago Germany had to cut that subsidy in two, and undoubtedly will wipe it out altogether. Germany has been paying a subsidy to labor by prohibiting the public utilities in the various cities, which furnish gas, run street cars, furnish electric light and water, from raising their rates. So that the German laborer has been getting all those services practically as he got them before the war, and therefore has had a reduced cost of living.

In order to compensate the German municipalities for the great subsidy to labor, the German Government has been paying to those communities vast sums of money, 400,000,000 marks to Berlin in one year and 400,000,000 marks to Hamburg in one year, for instance. The result of the German Government paying those great subsidies to labor through the municipalities has been to create a great deficit in the German budget, and Germany now has been compelled to abandon the plan because the other countries in Europe, creditors of Germany, have been demanding that the budget be balanced. I have shown those figures for the purpose of indicating that German labor is bound to have increased wages, and that wages are increasing at the present time, whereas we know in the United States that the wages of all classes of labor are being constantly depressed.

Mr. POMERENE. Mr. President——

Mr. HITCHCOCK. I yield to the Senator from Ohio.

Mr. POMERENE. I have an issue of the Daily News Record of Tuesday, June 27, 1922, containing a very interesting article in it from Chemnitz, where most of these gloves are manufactured. If the Senator will permit me, I should like to read just a paragraph to support what the Senator has been saying.

Mr. HITCHCOCK. I shall be glad to have the Senator do so.

Mr. POMERENE. The paragraph to which I refer reads as follows:

> The fabric and knit glove industry of Chemnitz is already reported to be in a bad way, although there, too, some of the makers still have an appreciable volume of business on hand left over from the early months of this year. However, scarcely any new orders are coming to these factories, and it is declared business is now as bad as it ever was before or threatens to be in the near future. Prices for Chemnitz-made fabric gloves have gone up by 30 per cent within this year, and further increases have been prevented, so the manufacturers say, by the realization that there has to be a limit somewhere even if the workers know none. High wages are declared to be mainly responsible for the dullness, but the underlying reason can readily be assumed to be the fact that both foreign and inland consumers and customers of the Chemnitz factories consider the present prices too high, saying the profits made by the manufacturers are excessive. Such charges are, of course, indignantly repudiated, and the chief blame is thrust upon high cost of raw materials, high wages, and a bevy of similar high expenses, which are still doing their utmost to drive prices skyward.

I quote this as indicating that prices of German-made goods are constantly advancing, and for that very reason there is not the necessity now for the high duties that there was last year.

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. HITCHCOCK. I yield.

Mr. SMOOT. The statement just read by the Senator from Ohio demonstrates conclusively that notwithstanding the raises in price that he speaks of, the prices of to-day have closed all of the plants of the manufacturers in the United States who manufacture this class of gloves. They are making no gloves. Their factories are closed. Even with the advance of prices they are closed. I do not understand the article, I will say to the Senator from Ohio, because I know that German manufacturers have canceled numerous orders which had been taken and refuse to fill them. I refer to orders for gloves and other cotton goods.

Mr. POMERENE. I did not read the entire article, but it gives a possible explanation in that the very high rates of duty are threatened, and they are afraid they can not produce the gloves so as to get them over here before the higher rates go into effect. That is one reason.

Mr. SMOOT. That may be a kind of advertisement. The Senator from Nebraska said, as I understood him, that wages had increased twenty-eight times over and above the wages paid before the war.

Mr. HITCHCOCK. As of the 1st of July.

Mr. SMOOT. Does the Senator know how much the mark has decreased?

Mr. HITCHCOCK. Yes; it is about twice that.

Mr. SMOOT. Twice. If the mark were worth one-fifth of a cent, it would be one hundred and nineteen times. It is worth eighteen-hundredths of a cent. That was the last quotation. But suppose it is twenty one-hundredths of a cent, or one-fifth of a cent, remembering that the mark before the war was worth 23.80 cents, that would be a decrease of one hundred and nineteen times.

Mr. HITCHCOCK. Mr. President, I have admitted frankly that the value of the mark has gone down more rapidly than the wages of the German laborer have risen, but we all know that there is an end to that and they have reached it now. There is great distress in Germany to-day as to how they can stimulate their export trade, because without a great export trade the payment of indemnities is utterly impossible. It is the only way they can secure gold. For that reason the German Government have been making desperate efforts to stimulate their export trade.

The other day the Senator from Massachusetts [Mr. WALSH] placed in the RECORD some figures which showed, as the figures which I put in the RECORD showed, that in spite of the efforts of the German Government, through giving subsidies to manufacturers and subsidies to labor, the German export trade is only one-third of what it was before the war. So the German export trade is not a menace either to the United States or to any other country, notwithstanding the low price of the German mark. The fact is that with the very low price of the mark which Germany has to-day it is almost impossible for the German producer to buy raw materials in foreign countries. Cotton, which the German must buy either from the United States or from Egypt, has to be paid for in this miserably low mark that has gone down almost to the vanishing point, which means a tremendous increase in the cost of the raw material.

The very fact that the German export trade to-day is only one-third what it was before the war, after all this stimulation of two years and after the payment of all the subsidies to the railroads and others, is proof positive that there is no danger from German competition now any more than at any other time. Our imports from Germany to-day are only one-fourth of our exports to Germany. Our imports from Germany to-day are only one-half what they were before. To say that this indicates any danger to the United States is, to my mind, utter nonsense, inexcusable, and can not be backed by any statistics whatever.

I am not saying that there may not be certain industries upon which Germany may now be making some attack in an effort to sell goods in competition in this country, but even in this case the idea of saying to American women, "You need 20,000,000 pairs of gloves a year, gloves that have been selling to American stores at from 50 cents to a dollar a pair, but we are going to raise the tariff from 35 per cent to over 100 per

cent," is to say something which is utterly inexcusable. Even the propagation of a glove industry at Gloversville or anywhere else, employing a few hundred people, does not justify that tax upon the women of the Nation, women who are compelled to buy gloves and who have been buying the cheap gloves. Some of the gloves exhibited here have run up over a dollar a pair, and they are bought by the masses of American people who buy in the stores at 50 cents a pair. To put on those gloves a tariff of over 100 per cent is to my mind utterly inexcusable.

Mr. CALDER. But we do not do that. The rate on cheap gloves——

The PRESIDENT pro tempore. The Chair desires to remind Senators that we have a rule in the Senate which requires a Senator, who desires to interrupt another who is speaking, to address the Chair and be recognized before the interruption takes place.

Mr. McCUMBER. Mr. President, may I also suggest that we have another rule providing that no Senator shall speak on the same subject more than twice in the same day. We have had a general discussion back and forth here about a dozen times between Senators. We ought to allow a Senator to finish his remarks.

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from New York?

Mr. HITCHCOCK. I yield.

Mr. CALDER. I merely desire to interrupt the Senator, if he will pardon me for doing so, to say that the cheap glove selling for 50 cents is not being increased over 100 per cent in the matter of tariff rates.

Mr. HITCHCOCK. But I understand they are being increased. I have just been informed by an expert that the cheap 50-cent glove is subject to a tariff of $2.50 a dozen, and it sells for something less than $2.50 a dozen.

Mr. CALDER. I have submitted gloves purchased in Washington that sell for $1 a pair. That glove will have the high rate. The cheaper gloves will carry a much lower rate.

Mr. HITCHCOCK. I have not the amendment before me, but I am told that the wholesale price of the glove is $4 a dozen, and it sells in the American stores at 50 cents a pair, and is subject to a tariff of $2.50 a dozen.

Mr. SMOOT. The Senator has the wrong glove. He is referring to the $2.10 per dozen glove.

Mr. HITCHCOCK. I will read the figures. The regular 11-inch chamoisette glove, made of 80s yarn, invoiced at $2.10, imported to wholesaler at $4 a dozen, retails in Washington stores at 50 cents a pair. The committee proposes to add to that glove a tariff duty of over 100 per cent. The amendment of the Senator from Wisconsin [Mr. LENROOT] would limit that duty to 75 per cent. Of course, if we can not get anything better, we ought to take that; but I say such a thing will strike the American people as perfectly monstrous, no matter what the effect may be, even if it does give employment to a few hundred people in the country who might otherwise find more profitable employment. To tax an article of that sort, which must be worn by girls earning small wages in our stores and by women of limited means, is, to my mind, a perfectly monstrous outrage, and is not justified by any theory, even of Republican protection.

Mr. LODGE rose.

Mr. HITCHCOCK. Does the Senator desire to interrupt me?

Mr. LODGE. I thought the Senator had concluded.

Mr. HITCHCOCK. I think perhaps I have. I have expressed my indignant feelings on the subject in as strong language as I can. I can not believe that the proposed rate is justified by any tenet even of the high protectionists of the Republican Party.

Mr. LODGE. Mr. President, I dislike very much to differ from the committee on any rate which they propose. I desire very much to do everything I can for every American industry. In this case we know the mills are closed. But, Mr. President, I have listened to the debate with a great deal of care and I have looked over the figures, and I am entirely unable to find the comparative labor cost of the gloves in question. I have heard no proof offered to the effect that it is necessary to increase the rate provided in the Underwood law, under which the mills have been closed, to 119 per cent ad valorem in order that the mills may resume business.

Therefore, Mr. President, it seems to me that it is going very far in the case of an article which has no, or at least a very slight, compensatory duty, to impose a duty of 119 per cent. I should be very reluctant not to vote to sustain any industry of this kind; but it seems to me that in the present condition 75 per cent ought to be sufficient to enable the industry again to get upon its feet, which I particularly desire that it shall do.

Mr. McCUMBER. Mr. President, as each member of the Committee on Finance reserves the right, of course, to cast his individual vote upon this subject irrespective of the vote of the committee, I think it not out of place that I should give my reason for standing by the committee. I am perfectly willing to base my conclusions upon the figures that have been furnished by the Senator from Ohio [Mr. POMERENE], figures which he says he has received from the Tariff Commission upon the classes of gloves bearing a rate of duty of $2.50 per dozen.

We are dealing with the question of the cost of production at home and abroad, and the Senator from Ohio says that the American cost is $5.65 per dozen and that the foreign cost is $3.17 per dozen. So there is a difference of $2.48 per dozen, and the committee had given a rate of duty of $2.50 per dozen; in other words, the committee has given 2 cents a dozen more than appears to be necessary to measure the difference between the cost of production at home and abroad. The junior Senator from Wisconsin [Mr. LENROOT] offers an amendment that the rate of duty shall in no case be greater than 75 per cent ad valorem. Seventy-five per cent of $3.17, the foreign cost of one dozen, amounts to $2.37. Two dollars and thirty-seven cents added to $3.17 makes $5.54, and $5.54 subtracted from $5.65 leaves 11 cents per dozen less than the amount necessary to measure the actual difference in the cost of production at home and abroad.

I will agree with what has been said to the effect that the American cost of production will probably decrease and that the foreign cost of production may possibly be increased. In fixing the tariff rates on most of the items in the bill we have made that allowance, and have recommended rates considerably less than what would measure the present difference in the cost of production, as nearly as we can arrive at it, between the foreign country and this country; but in this particular line there is presented a feature somewhat different from that which is apparent in other cases.

Prior to the World War Germany had the entire American market; we did not have a "look in" in the American market in this class of goods. After the war came we developed the industry and we had the entire market. Now Germany comes to the front and is seeking again to dominate the market.

Mr. President, no matter what the conditions may appear to be upon their face to-day, I can see that there is going to be a most desperate commercial battle on the part of the country that but a few years ago had the entire American market again to gain that market. That being the case, and as the 75 per cent rate under the present basis of prices will lack 11 cents of measuring the difference in the cost of production at home and abroad, and the rate that we give of $2.50 is only 2 cents in addition, I, as an American, facing what I believe will be a battle royal to gain the American market, shall, upon the chances, cast my vote upon the American side and shall vote for the duty which the committee recommends.

SEVERAL SENATORS. Vote!

Mr. HEFLIN. Mr. President, before a vote is taken upon this item, I wish to say a word in response to some suggestions which have been made by the Senator from New York [Mr. WADSWORTH]. I heard him refer to our being unable now to manufacture gloves and to the fact that operatives of glove factories were out of employment. That is no new thing, Mr. President. When no gloves were coming in at all from Germany, the deflation policy of the Federal Reserve Board closed the factories. Senators do not want to think about that and they do not want the people reminded of that. They come with the old story, which they always spring, that a high protective tariff is the cure for all industrial ills.

I can tell the Senator why the glove factories are closed. The people who used to wear gloves, who under a Democratic administration had money with which to buy gloves, patronized the glove factories of the United States; the glove manufacturing business was prosperous; there was nothing the matter with it then, for there were sold all the gloves which were manufactured; but when the purchasing power of the men and women of the country was destroyed the buying of gloves ceased. The merchant in every locality in the land wired to the wholesaler, "Cancel the order for gloves that I have sent you"; and when those orders were canceled the wholesale merchant went to the glove manufacturer and said, "Cancel my orders," and then the manufacturer of gloves said, "The factory must close." So, under a deflation drive in the interest of Wall Street and designed to make it millions and hundreds of millions, operatives in the glove factories were turned into the streets, as were hundreds and thousands of other men and women in America. That is what is the matter with the glove industry in America and many other industries.

Mr. President, the men down in my section who under the Wilson administration had enjoyed prosperity, and the men in

the West who had enjoyed prosperity and who shared that prosperity with the manufacturers of the East, had their property swept away, their property values destroyed by the millions and hundreds of millions of dollars, and their debt paying and purchasing power also destroyed. They could not buy; and the evil effects of this desperate deflation drive in the South and West have been reflected in the manufacturing centers of the East. That is what is the matter.

Not only that, Mr. President, but as the distinguished Senator from New York was pleading for protection for the glove makers of his State I thought of the farmer who had incurred debts in the spring of 1920. At that time he had plenty of material about him in the way of farm products and cattle to discharge those debts or pay them off and start anew with a clean bill of health, but when that deflation policy struck him and ruined his property values it destroyed his debt-paying power. He took what he had and paid one-fifth of what the stuff would originally sell for and left debts hanging over him which will take four years more to discharge. Yet Senators wonder why there is bolshevism in America to-day and such a spirit of unrest as has not stirred this Government in 50 years.

What is the farmer going to do? The Republican majority are not doing anything to restore his purchasing power; they are not doing anything to restore his debt-paying power; but they are undertaking to increase his taxes for the benefit of the glove makers of the East. That is what they are doing. They are going to put profits into the pockets of the glove makers by the exercise of the taxing power. They will permit the deadly deflation power that wrought that ruin in the South and West to sit here in this Capitol and flourish under their very eyes, and none of them will dare to open their mouths against it. Then Senators on the other side wonder why it is that the masses of the people are repudiating them and their party every time they get an opportunity. If they are intelligent human beings they will repudiate the conduct of the Republican majority. Do you think, Mr. President, they will submit to being held up and robbed and then rise up and smile and continue to vote to keep you in power?

It makes me sad to see the taxing power of my Government invoked to wring money out of the slender purses of people unable to pay it in order to put profits in the pockets of the manufacturers of the East. I plead for a fair deal for the rank and file of the men and women of America, and, Senators, we are going to have it as soon as the people have the opportunity to be heard again at the polls.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Wisconsin [Mr. LENROOT] to the amendment offered by the Senator from Utah [Mr. SMOOT] on behalf of the committee, the amendment of the Senator from Wisconsin being to limit to 75 per cent the rates of duty provided in paragraph 914. The yeas and nays have been ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. CALDER (when his name was called). I have a pair with the senior Senator from Georgia [Mr. HARRIS]. I transfer that pair to the junior Senator from Oregon [Mr. STANFIELD] and vote "nay."

Mr. DIAL (when his name was called). I have a pair with the Senator from Michigan [Mr. TOWNSEND], which I transfer to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. LODGE (when his name was called). I have a general pair with the Senator from Alabama [Mr. UNDERWOOD]. As on this question he would vote as I intend to vote, I consider myself released from my pair and will vote. I vote "yea."

Mr. ROBINSON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Missouri [Mr. REED] and will vote. I vote "yea."

Mr. WALSH of Montana (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to my colleague [Mr. MYERS] and will vote. I vote "yea."

The roll call was concluded.

Mr. HALE. I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Washington [Mr. POINDEXTER] and will vote. I vote "yea."

Mr. NEW. I transfer my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from Vermont [Mr. PAGE] and will vote. I vote "yea."

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN] and will vote. I vote "yea."

Mr. JONES of Washington (after having voted in the affirmative). I understand that the senior Senator from Virginia [Mr. SWANSON] has not voted. He is necessarily absent. I am paired with him for the afternoon. I understand that if present he would vote as I have voted, and therefore I will allow my vote to stand.

Mr. SMITH. I inquire if the Senator from South Dakota [Mr. STERLING] has voted?

The PRESIDENT pro tempore. He has not.

Mr. SMITH. I transfer my general pair with that Senator to the Senator from Alabama [Mr. UNDERWOOD] and will vote. I vote "yea."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 38, nays 17, as follows:

YEAS—38.

Ashurst	Jones, N. Mex.	Moses	Sheppard
Borah	Jones, Wash.	Nelson	Simmons
Capper	Kellogg	New	Smith
Caraway	Kendrick	Newberry	Stanley
Cummins	Keyes	Overman	Walsh, Mass.
Dial	King	Phipps	Walsh, Mont.
Hale	Ladd	Pomerene	Warren
Harreld	Lenroot	Ransdell	Willis
Heflin	Lodge	Rawson	
Hitchcock	McCormick	Robinson	

NAYS—17.

Brandegee	Curtis	McLean	Spencer
Broussard	Ernst	McNary	Wadsworth
Bursum	Gooding	Oddie	
Calder	Johnson	Pepper	
Cameron	McCumber	Smoot	

NOT VOTING—41.

Ball	Frelinghuysen	Norris	Swanson
Colt	Gerry	Owen	Townsend
Crow	Glass	Page	Trammell
Culberson	Harris	Pittman	Underwood
Dillingham	Harrison	Poindexter	Watson, Ga.
du Pont	La Follette	Reed	Watson, Ind.
Edge	McKellar	Shields	Weller
Elkins	McKinley	Shortridge	Williams
Fernald	Myers	Stanfield	
Fletcher	Nicholson	Sterling	
France	Norbeck	Sutherland	

So Mr. LENROOT's amendment to the amendment of the committee was agreed to.

The PRESIDENT pro tempore. The question now is upon agreeing to the committee amendment as amended.

The amendment, as amended, was agreed to.

Mr. SMOOT. Mr. President, I should like to return now to the hemp schedule, and get at least one vote upon it to-night. The pending amendment is on page 132, line 3.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 132, line 3, the Senator from Arkansas [Mr. ROBINSON] proposes to strike out "4 cents" and to insert in lieu thereof "1 cent."

Mr. ROBINSON. Mr. President, I do not desire to detain the Senate for a prolonged further discussion of this amendment. On yesterday and the day before it was pretty fully discussed. It has been shown during the course of the debate that attempts to create and maintain a hemp-producing industry in the United States have heretofore proved futile, and probably will now prove futile.

The subject of hemp growing is discussed by James Lane Allen in one of his romances, The Reign of Law. It is an interesting, a fascinating discussion of the subject which was entered into somewhat in detail by the Senator from Kentucky [Mr. STANLEY]. Mr. Allen in that book portrays the origin of the industry in Kentucky and the difficult labor required in all of the stages of the growth of hemp. He concludes with a statement that I think is quite significant, and I am going to read it, and then submit the case to the judgment of the Senate. He says:

With the Civil War began the long decline, lasting still.

He had already discussed the character of the labor, and shown that it was performed in large part by black men.

Continuing:

The record stands that throughout the one hundred and twenty-five odd years elapsing from the entrance of the Anglo-Saxon farmers into the wilderness down to the present time, a few counties of Kentucky have furnished the Army and Navy, the entire country, with all but a small part of the native hemp consumed. Little, comparatively, is cultivated in Kentucky now. The traveler may still see it here and there, crowning those ever-renewing, self-renewing, inexhaustible fields. But the time can not be far distant when the industry there will have become extinct. Its place in the Nation's markets will be still further taken by metals, by other fibers, by finer varieties of the same fiber, by the same variety cultivated in soils less valuable. The history of it in Kentucky will be ended, and, being ended, lost.

That prophecy respecting the hemp industry already has been almost completely fulfilled. The reports available for the Senate show that Kentucky now produces less than one-third of the hemp grown in the United States, the State of Wisconsin producing almost two-thirds. It is a useless effort to impose a high tariff upon this product, when the history of the industry shows that it is not an American industry, that it is one that can not be successfully maintained under labor conditions prevailing in the United States.

I ask for the yeas and nays on the amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as on the former ballot as to my pair and its transfer, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as on the previous vote as to the transfer of my pair, I vote "yea."

Mr. JONES of Washington (when his name was called). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent. I am paired with him for the afternoon, and therefore withhold my vote.

Mr. LODGE (when his name was called). Transferring my pair with the Senator from Alabama [Mr. UNDERWOOD] to the Senator from Maryland [Mr. WELLER], I vote "nay."

Mr. NEW (when his name was called). Again transferring my pair as on the preceding ballot, I vote "nay."

Mr. ROBINSON (when his name was called). Announcing the same pair and transfer as on the previous vote, I vote "yea."

Mr. SMITH (when his name was called). I have a general pair with the Senator from South Dakota [Mr. STERLING], which I transfer to the Senator from Texas [Mr. CULBERSON], and vote "yea."

Mr. WALSH of Montana (when his name was called). Transferring my pair as announced on the last roll call, I vote "yea."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

Mr. CALDER. Making the same announcement as before, I vote "nay."

Mr. ERNST (after having voted in the negative). I have a general pair with the senior Senator from Kentucky [Mr. STANLEY], which I transfer to the senior Senator from Maryland [Mr. FRANCE], and allow my vote to stand.

Mr. CARAWAY (after having voted in the affirmative). I transfer my general pair with the junior Senator from Illinois [Mr. MCKINLEY] to the junior Senator from Georgia [Mr. WATSON] and allow my vote to stand.

The result was announced—yeas 18, nays 32, as follows:

YEAS—18.

Ashurst	Heflin	Pomerene	Smith
Borah	Hitchcock	Rawson	Walsh, Mass.
Caraway	Jones, N. Mex.	Robinson	Walsh, Mont.
Cummins	King	Sheppard	
Dial	Overman	Simmons	

NAYS—32.

Brandegee	Capper	Harreld	Ladd
Broussard	Curtis	Johnson	Lenroot
Bursum	Ernst	Kellogg	Lodge
Calder	Gooding	Kendrick	McCumber
Cameron	Hale	Keyes	McNary
Moses	Newberry	Phipps	Wadsworth
Nelson	Oddie	Smoot	Warren
New	Pepper	Spencer	Willis

NOT VOTING—46.

Ball	Gerry	Norbeck	Sterling
Colt	Glass	Norris	Sutherland
Crow	Harris	Owen	Swanson
Culberson	Harrison	Page	Townsend
Dillingham	Jones, Wash.	Pittman	Trammell
du Pont	La Follette	Poindexter	Underwood
Edge	McCormick	Ransdell	Watson, Ga.
Elkins	McKellar	Reed	Watson, Ind.
Fernald	McKinley	Shields	Weller
Fletcher	McLean	Shortridge	Williams
France	Myers	Stanfield	
Frelinghuysen	Nicholson	Stanley	

So Mr. ROBINSON's amendment to the amendment of the committee was rejected.

Mr. MCCUMBER. Mr. President, I ask unanimous consent that when the Senate closes its session on this calendar day it recess until to-morrow at 11 o'clock.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered. The question is on agreeing to the amendment proposed by the committee.

The amendment was agreed to.

Mr. SMOOT. The next amendment is in paragraph 1002. I do not think it will lead to very much discussion.

Mr. ROBINSON. No; I think we ought to dispose of that paragraph this afternoon.

The next amendment was, in paragraph 1002, page 132, line 5, to strike out "13" and insert "25," so as to make the paragraph read:

PAR. 1002. Sliver and roving, of flax, hemp, ramie, or other vegetable fiber, not specially provided for, 25 per cent ad valorem.

Mr. ROBINSON. I propose an amendment to the committee amendment as follows, to strike out "25" and insert in lieu thereof "15."

This paragraph is not of great importance, but there is nothing in the information which has been available for my study of the subject to justify the increase which the committee proposes. The rate under the Payne-Aldrich law was 35 per cent. The present rate under the Underwood law is 15 per cent, the rate which I propose.

It is a singular fact that on the average importations under the Underwood law were less than the importations under the Payne-Aldrich law. The importations under this paragraph are very slight, but there is no circumstance within my knowledge which justifies making importations more difficult.

The United States does not produce this product in any considerable quantity, although it can be grown on some of our soil. For the same reason that the hemp and flax-fiber industry has been diminishing, the ramie-producing industry in the United States has never been prosecuted to any considerable extent. It is a very valuable and useful commodity, and I think importations and the use of it should not be prohibited, as would probably be the effect of the committee amendment.

Mr. SMITH. This is not a stalk out of which binding twine is made?

Mr. SMOOT. Oh, no; that is sisal. This is ramie and hempen flax.

Mr. ROBINSON. This product is susceptible of a very high polish, and is used in the manufacture of linens and materials closely related.

Mr. STANLEY. Hemp makes an ideal binding twine, on account of its withstanding water; but the reason that the binding twine is made of these other substances is because they are cheaper.

Mr. ROBINSON. The ramie is too rare and valuable a product, and too difficult to manufacture, to justify its use for that purpose, although, as stated by the Senator from Kentucky, both hemp and ramie could be used for making binding twine if they were not so expensive and difficult to obtain.

Mr. STANLEY. Senator Bradley some years ago made a very elaborate argument on the floor of the Senate urging a duty on jute butts, claiming that the jute butts were used extensively for binding. Is that still the case?

Mr. SMOOT. I do not think it is.

Mr. STANLEY. I do not find it so stated in the tariff reports.

Mr. ROBINSON. Mr. President, this product will never be grown to any great extent in the United States. It is useful and it is necessary, and I think the importation of it should not be prohibited, as may be the effect of this increased duty, although, as I have already stated, the production is constantly diminishing, notwithstanding the very low rate of duty now imposed. I think, as a matter of fact, putting it upon the free list would be justified. Inasmuch as the present rate is

15 per cent, I propose that rate in lieu of the committee amendment.

I will insert in the RECORD Table No. 9, on page 43 of the Tariff Information Survey, relating to yarns, threads, and cordage of vegetable fibers other than cotton.

I will also ask to have inserted in the RECORD a statement in the same report, on pages 36 and 37. I have marked the portion of the report which I desire to incorporate.

With this statement I am willing to submit the matter to a vote.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

TABLE 9.—*Ramie sliver or roving.*

Fiscal year.	Rate of duty.	Quantity.	Value.	Duty collected.	Value per unit of quantity.	Actual and computed ad valorem rate.
		Pounds.				*Per cent.*
1910[1]	35 per cent		$4,449	$1,557.15		35.00
1911	do		38,335	13,417.25		35.00
1912	do		60,263	21,092.05		35.00
1913	do		15,764	5,517.40		35.00
1914[2]	do		2,039	724.15		35.00
1914[3]	15 per cent		4,638	695.70		15.00
1915	do		8,194	1,229.10		15.00
1916	do		7,397	1,109.55		15.00
1917	do		4,641	696.15		15.00
1918	do		273	40.95		15.00
1919	do	1,000	367	55.05	$0.367	15.00
1920	do	5,205	5,438	815.70	1.045	15.00

[1] Aug. 6 to June 30, 1910. [2] July 1 to Oct. 3, 1913. [3] Oct. 4, 1913, to June 30, 1914.

* * * * * * *

Recapitulation: The following facts, therefore, should be kept in mind in connection with imports of all classes of flax, hemp, and ramie yarns: (1) The total quantity imported is normally not over 2,500,000 pounds, or perhaps 15 per cent of our total consumption; (2) this is composed chiefly of coarse and medium counts, the bulk of it not finer than 40 lea; (3) counts finer than 40 lea are not produced in considerable amounts in the United States and imports of it are, in the main, noncompetitive; (4) reduction of the average duty on all classes from approximately 40 per cent ad valorem to about 19 per cent by the act of 1913 had little effect either upon total imports or upon any particular class, although the changed classification creates a deceptive fluctuation as regards coarse and medium leas.

It would seem, therefore, that imports were largely supplementary to domestic production. Manufacturers, because of difficult conditions, have not found it profitable to extend production too close to the total amount of domestic consumption where risks of loss from varying demand are most felt.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the Senator from Arkansas to the committee amendment.

The amendment to the amendment was rejected.

The amendment was agreed to.

Mr. HITCHCOCK. I understand the Senator from North Dakota does not propose to go any further with the bill tonight.

Mr. McCUMBER. No; a brief executive session is desired.

SOUTHERN PACIFIC—CENTRAL PACIFIC.

Mr. HITCHCOCK. I present resolutions adopted by the chambers of commerce of Omaha, Lincoln, Kearney, Sidney, North Platte, Scottsbluff, and Beatrice, and the Livestock Exchange of Omaha, all in the State of Nebraska. I ask that the resolutions of the Omaha Chamber of Commerce and the Lincoln Chamber of Commerce be printed in the RECORD and that all the resolutions be referred to the Committee on Interstate Commerce. I will state that these resolutions relate to the decision of the Supreme Court divorcing the Southern Pacific Railroad from the Central Pacific and protesting against any action of Congress calculated to nullify that decision.

There being no objection, the resolutions were referred to the Committee on Interstate Commerce, and those indicated were ordered to be printed in the RECORD, as follows:

OMAHA CHAMBER OF COMMERCE.

On June 27, 1922, the Omaha Chamber of Commerce unanimously adopted the following resolution:

"Whereas our city and the business interests of our entire State are vitally affected by any movement or influence which would adversely affect the income of Nebraska railroads on through or transcontinental freight shipments, and which would tend to increase or justify higher rates on shipments originating in Nebraska; and

"Whereas the control of the Central Pacific Railroad by the Southern Pacific Railroad has heretofore and for a number of years resulted in the diversion of oriental and Pacific coast tonnage destined for eastern markets, from the shorter and direct route through the Ogden gateway to the longer haul over the Southern Pacific through New Orleans and to the Atlantic coast over that company's lines, thus depriving the Nebraska railroads of the natural and proper income which they should receive on east and west bound transcontinental freights; and

"Whereas in a recent decision the United States Supreme Court has decided and held that the ownership and control of the Central Pacific Railroad by the Southern Pacific Co. is against the public interest and contrary to the laws forbidding monopolization and stifling of competition in interstate traffic; and

"Whereas it has come to the notice and attention of this body that a movement is now being organized and promoted to induce and influence the Congress of the United States to pass laws which would nullify the recent decision of our highest court, and to influence the Interstate Commerce Commission to take such action as would have the effect to also nullify the said court decision: Now, therefore, be it

"*Resolved*, That it is the sense and desire of the Omaha Chamber of Commerce that the just and proper effect of the decision of the Supreme Court of the United States forbidding unlawful and harmful combinations in interstate commerce be sustained, upheld, and given effect; and be it further

"*Resolved*, That our Senators and Members of Congress be requested to oppose the enactment of any laws which may nullify the force and effect of the said decision of the Supreme Court of the United States; and be it further

"*Resolved*, That the Interstate Commerce Commission be also requested to refuse its sanction or approval of any order or act which would nullify the effect of the said decision."

—

LINCOLN CHAMBER OF COMMERCE.

Resolutions adopted by the Lincoln Chamber of Commerce, July 7, 1922.

Whereas it has been brought to the attention of this body that there is being promoted a determined effort to influence the Interstate Commerce Commission to nullify the effect of the recent decision of the United States Supreme Court declaring that the control and ownership by the Southern Pacific Railroad Co. of the Central Pacific Railroad Co. is held to be against public interest and constitutes a combination in restraint of trade and tends to monopolization: Therefore be it

Resolved, That it is the sense of the Lincoln Chamber of Commerce that the decision is just and equitable, based upon a recognized principle of economic transportation, and should be upheld and enforced by the Interstate Commerce Commission; and be it further

Resolved, That our Senators and Members of Congress be requested to oppose the enactment of any law which may tend to weaken the force of said decision of the Supreme Court; and be it further

Resolved, That the Interstate Commerce Commission be also requested to refuse its approval of any order or act that would weaken the effect of said decision.

Mr. WARREN. On the same subject as the resolutions presented to the Senate by the Senator from Nebraska, I present resolutions adopted by the Chamber of Commerce of Cheyenne, Wyo. I ask that the resolutions may be printed in the RECORD—they are brief—and that they be referred to the Committee on Interstate Commerce.

There being no objection, the resolutions were referred to the Committee on Interstate Commerce and ordered to be printed in the RECORD, as follows:

CHEYENNE CHAMBER OF COMMERCE,
Cheyenne, Wyo.

Resolutions unanimously adopted by the Cheyenne Chamber of Commerce, July 11, 1922.

"Whereas the Supreme Court of the United States has found that 'the Central Pacific with its eastern connection at Ogden forms one great system of transportation between the East and the West, and the Southern Pacific with its roads and connections forms another great transcontinental system of transportation from coast to coast,' and has also found that the holding of the Central Pacific by the Southern Pacific constitutes an unlawful monopoly; and

"Whereas the officers of the Southern Pacific Co. have announced that they will endeavor to set aside the decision of the Supreme Court by congressional action; and

"Whereas the full development of interstate traffic through Wyoming requires that the Central Pacific shall be actively competitive with the Southern Pacific line from San Francisco via El Paso and New Orleans to New York; and

"Whereas it is impossible for Wyoming railroads to reach their full development or maximum efficiency without having full and hearty cooperation with connecting lines in securing, expediting, and caring for transcontinental traffic; and

"Whereas Wyoming is entitled to the advantages and to the many benefits which would result from free competition between the Southern Pacific southern route and the Central Pacific Ogden gateway route, and to the increase in size of railroad communities and railroad traffic which would result therefrom: Now, therefore, be it

"*Resolved*, That the Cheyenne Chamber of Commerce recognizes the wisdom and justice of the decision of the Supreme Court freeing the Central Pacific Railroad from the control of the Southern Pacific Co., and that the control heretofore exercised diverted many shipments of freight from its natural gateway over the short, direct route, to the detriment of the shippers and to the detriment of the State of Wyoming; and be it further

"*Resolved*, That the Wyoming Representatives in Congress be urged to take such action as may be necessary to prevent the passage of any legislation which would legalize the Southern Pacific-Central Pacific monopoly."

The above is a true copy of the resolutions which were unanimously adopted by the Cheyenne Chamber of Commerce on July 11, 1922.

J. L. HAVICE,
President Cheyenne Chamber of Commerce.

Attest:
[SEAL.]
J. J. SHOWALTER, *Secretary.*

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After 5 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 5 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Friday, July 21, 1922, at 11 o'clock a. m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 20 (legislative day of April 20), 1922.

POSTMASTERS.

HAWAII.

Arcenio H. Silva, jr., Kahului.
Antone F. Costa, Wailuku.

KANSAS.

Hiram A. Gilmore, Howard.
Clarence W. Sharp, Virgil.
John H. O'Connor, Winfield.

MICHIGAN.

Holger F. Peterson, Grayling.

NEW YORK.

Ruth M. Marleau, Big Moose.
Jay E. Davis, Deansboro.
Charles H. Betts, Lyons.

OHIO.

John W. Switzer, Ohio City.

WEST VIRGINIA.

Katherine E. Ruttencutter, Parkersburg.
Flavius E. Strickling, West Union.

SENATE.

FRIDAY, *July 21, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

THE EIGHTEENTH AMENDMENT—RESPECT FOR LAW.

Mr. JONES of Washington. Mr. President, the thirty-seventh annual session of the National Editorial Association was held in Missoula, Mont., on Wednesday, July 19, 1922. Mr. J. C. Brimblecom, editor of the Newton Graphic, of Newton, Mass., is the acting president of the association. In his address to the association he uttered a sentiment that should meet with a hearty response in the heart of every man who loves his country. He urged a course of action that should be followed not only by every editor in the country but by every patriotic American. He uttered a sentiment which could well be the motto to be read by every American at the beginning of each day's work. I ask that the paragraph which I have marked may be read by the Secretary.

The PRESIDENT pro tempore. Without objection, the Secretary will read as requested.

The reading clerk read as follows:

LAWS MUST BE SUPPORTED.

The newspapers of this country, particularly the newspapers which go into the homes of our people, have a great opportunity at the present time to give substantial aid to the cause of law and order by refusing to publish any of the so-called jokes and sneers on the eighteenth amendment to the Constitution of the United States. No matter what you or I may say or think as individuals of the merits or demerits of prohibition, we must never forget that it is the fundamental law of the land and is entitled to as much respect as the laws against murder, theft, or treason.

For if you and I claim the privilege of violating with impunity the law regarding intoxicating liquors, we must admit the rights of others to violate any or all other laws regarding which they may have similar opinions. Such a condition spells anarchy, nothing less. There must be no discrimination in the enforcement of law, and every published joke or sneer regarding prohibition adds just so much to the general unrest w'ch is altogether too prevalent in this country.

The po.ice strike in Boston in 1919, the terrible outrages which took place last month in Herrin, Ill., and other exhibitions of the mob spirit in other parts of the country show how woefully thin is the shell of our civilization and clearly indicate the path of duty of every editor to his constituency as well as to his country. Massachusetts coined the phrase "No taxation without representation," and thereby pointed the way to national independence, and Massachusetts 150 years later gave to the country the slogan of "Law and order," on the support of which depends our national existence. Let us see to it that we editors do our full duty in upholding that slogan in our respective communities.

REIMBURSEMENT TO SACRAMENTO, CALIF.

Mr. JOHNSON. Mr. President, I ask unanimous consent for the present consideration of the bill (H. R. 9048) to authorize the California Débris Commission to reimburse the city of Sacramento, Calif., for money expended by said city in the construction of the Sacramento Weir. There is no opposition to the bill. Its passage is recommended by the Committee on Claims. The bill reimburses the city of Sacramento, out of moneys appropriated for flood control in the Sacramento River project, for moneys expended by the city under that flood-control project at the suggestion and request of the United States engineers.

Mr. ROBINSON. I think the measure should be taken up and disposed of. So far as I am concerned, there is no objection to its present consideration.

There being no objection, the bill was considered as in Committee of the Whole, and it was read as follows:

Be it enacted, etc., That from funds appropriated and contributed for the control of floods on the Sacramento River in pursuance of the flood control act, approved March 1, 1917, the California Débris Commission is hereby authorized to pay to the city of Sacramento, Calif., the sum of $161,557.08, as equitable reimbursement of money expended by the said city in the construction of the weir at the head of the Sacramento by-pass leading into the Yolo by-pass, such structure being an essential part of the project adopted by the aforesaid act as set forth in House Document No. 81, Sixty-second Congress, first session, as modified by the report of said commission submitted February 8, 1913, approved by the Chief of Engineers of the United States Army and the Board of Engineers for Rivers and Harbors, and printed in Rivers and Harbors Committee Document No. 5, Sixty-third Congress, first session, in so far as said plan provides for the rectification and enlargement of river channels and the construction of weirs.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ARCTIC FLIGHT ROUTES.

Mr. ROBINSON. Mr. President, I ask leave to have printed in the RECORD a statement by Mr. Edwin Fairfax Naulty concerning the strategical importance to the United States of Arctic flight routes. The statement is of great historical value and, I believe, it is reliable. I ask that it may be printed in the regular RECORD type.

There being no objection, the statement was ordered to be printed in the RECORD in 8-point type, as follows:

STRATEGICAL IMPORTANCE OF ARCTIC FLIGHT ROUTES TO THE UNITED STATES.

WASHINGTON, D. C., *July 17, 1922.*

Hon. JOSEPH TAYLOR ROBINSON,
United States Senate, Washington, D. C.:

A press dispatch from Ottawa, Canada, dated July 13, 1922, and printed in the New York Times and other newspapers on July 14, reads:

CANADA TO OCCUPY ISLANDS—EXPEDITION WILL ESTABLISH TITLE TO TERRITORY OPPOSITE GREENLAND.

"OTTAWA, July 13.—A Government expedition will sail soon on the steamer *Arctic* for northern waters, to occupy islands north of Labrador and facing Greenland, across Davis Straits, thereby to set at rest all doubt concerning Canada's title to them.

"The expedition, to be commanded by J. D. Craig, International Boundary Commission engineer of the interior department [of Canada], will remain away until fall."

To understand the strategical importance of this action on the part of the Canadian authorities, another press dispatch, which I incorporated in my letter to you of July 4, 1922, which was printed in the CONGRESSIONAL RECORD of July 6, 1922, should be recalled. This dispatch, also from Ottawa, under date of May 13, 1922, read:

CLAIMS WRANGELL ISLAND—PLANS TO OCCUPY LAND DESPITE AMERICAN PRIORITY.

"OTTAWA, ONTARIO, May 13, 1922.—The Canadian Government maintains that Wrangell Island is part of Canadian territory; the Canadian flag now flies over Wrangell Island, and an expedition is being prepared to go up there. This is the declaration of the Prime Minister, W. Mackenzie King, when the House of Commons last night voted $15,000 for patrol of the northern waters of Canada.

"C. P. Graham, Minister of Defense, said the amount was necessary to publish the report of the Stefansson expedition. Hugh Guthrie, former Minister of Militia, said there was no doubt that the United States would make claims to Wrangell Island on the ground of previous discovery."

The Stefansson expedition referred to is the party of three Americans and one Canadian who were sent in by Stefansson on the American vessel *Silver Wave* from Nome in September, 1921, a full account of which, at your request, was printed in the CONGRESSIONAL RECORD of March 22, 1922. And this is the same Stefansson whose views of the dignity of the United States Senate are set forth in a paragraph, printed under the heading "They're Human," by William Atherton Dupuy, in the Washington Times of March 11, 1922, which read:

"Vihjalmur Stefansson, the Arctic explorer, was down in Washington not long ago, and got talking with former Senator Joseph Bailey, of Texas.

"'Are you considering any further trips to the north?' Mr. Bailey asked.

"'Yes,' said the explorer. 'I am laying plans for a five-year drift into the Arctic.'

"'What I can't understand,' said Bailey, 'is the mental viewpoint that would cause a man to give five years of his life to that sort of thing; that would cause him to be satisfied out there in the solitudes of the unchanging snow wastes, with never a contact more thrilling than an occasional meeting with a dumb and ignorant Esquimo.'

"'Well,' replied the explorer, 'one goes to the United States Senate for six years.'"

This from the man who boasted that he had deceived the Americans in his *Silver Wave* party as to the objects of the Wrangell Island expedition, which Stefansson said was under the auspices of a limited liability corporation organized by him under the laws of British Columbia and called the Stefansson Exploration & Development Co., with offices in the Foncier Building, Vancouver.

STEFANSSON'S USE OF AMERICANS.

Referring to the Americans in the *Silver Wave* party, Stefansson is reported in the New York Times of March 20, 1922, to have said, "I took into my confidence (on the objects of the expedition) only one man. His name is A. J. Taylor, a mining engineer of Vancouver. The best men I had to go north were American citizens, but I, being a British subject and desiring to have this a British enterprise, I had to take some Britisher into my confidence. I decided on Taylor, and the latter, acting for me, incorporated under the laws of British Columbia a limited liability corporation called the Stefansson Exploration & Development Co. This company employed the following four men: Allan Crawford, son of Professor Crawford, of Toronto University, who was to be in nominal command, and then along with him two of my very best men, Lorne Knight, of McMinnville, Oreg., with me four years in the north, and Fred Maurer, of New Philadelphia, Ohio, who had been with me in the north and was a member of the party that occupied Wrangel Island in 1914. I also sent a boy, Milton Galle, of New Braunsfels, Tex., who had been with me on a lecture tour.

"These men, without knowing what they were up to, except that I had confided to a certain extent in Crawford, went by steamer from Seattle to Nome, where I had chartered for them the auxiliary sloop *Silver Wave*. The sloop was under the command of Capt. John Hammer."

BARTLETT MADE NO CLAIM TO WRANGEL.

Later, asked where he had got the money for this enterprise, Stefansson said that he had furnished it from the proceeds of his lecture tours and sale of his books. At this time Stefansson was lecturing in the United States, and he used the American ports of Seattle and Nome for his venture.

Stefansson speaks of the "occupancy of Wrangell Island in 1914," but Capt. Robert Bartlett, who commanded the *Roosevelt* for Admiral Peary in his north polar voyages and who was also in command of the *Karluk*, the ship used by Stefansson in 1913–14, in his book, "The Last Voyage of the *Karluk*," tells a different story. In Chapter XVIII, dealing with the arrival of the *Karluk* party on Wrangell Island, after the *Karluk* sank, north of it, Bartlett, straightforward seaman that he is, writes: "The geographical names on Wrangell Island are derived from the names of the officers of the U. S. S. *Rodgers*, who explored the island in 1881." Bartlett makes no mention of any attempt to take Wrangell Island for Great Britain or Canada, but in this same chapter indicates just what was in his mind merely to make his way across Wrangell Island and reach Siberia, in these words: "For the plan I had been evolving to make my way across Long Strait (which separates Wrangell Island from Siberia) to the coast of Siberia and seeking an opportunity of getting help for the party here on the island (his distressed shipwrecked party) was now about to be put to the test."

BARTLETT'S VIEWS OF "KARLUK" VOYAGE.

Describing the purposes of the *Karluk* expedition, Bartlett writes in the first chapter: "It differed, too, in another aspect from previous Arctic expeditions in that its main objects were essentially practical—in fact, one might say, commercial. It was in two divisions. The northern party, under Stefansson himself, was primarily to investigate the theory so ably advanced by Dr. R. A. Harris, of the United States Coast and Geodetic Survey, that new land—perhaps a new continent—was to be found north of Beaufort Sea, which is that part of the Arctic Ocean immediately to the north of Alaska. (In this statement Bartlett is not quite right, as Beaufort Sea is the bight of the Arctic Ocean running from Demarcation Point southerly and easterly to Banks Strait, which divides Baring, or Banks Land, from the Barry Islands, the waters north of Alaska being the true Arctic Ocean as far as the one hundred and forty-first meridian dividing Alaska and Canada, and so shown, named, and located in the United States Hydrographic Chart of Arctic Explorations issued under Capt. Charles D. Sigsbee in 1896, in the Leslie Fairfax Naulty polar chart of 1917, the National Geographic Magazine map of the north polar regions of 1907, the Hydrographic Office Arctic chart of 1913, the United States Geological Survey map of North America of 1912, the Danish Arctic ice charts since publication, the polar map in the Encyclopædia Britannica. British charts issued by the London Times and by Stanford, of London, place the name of Beaufort Sea higher and level with Banks Land, but east of the one hundred and forty-first meridian.)

Bartlett continues: "The main work of the party aboard the *Karluk*—to quote Stefansson—was to be the exploration of the region lying west of the Parry Islands and especially that portion lying west and northwest from Prince Patrick Island (50° of longitude east of Wrangell Island). The *Karluk* was to sail approximately along the one hundred and forty-first meridian until her progress was interfered with by ice or by the discovery of land. If land were discovered (note that the *Karluk* was to sail along the Canadian-Alaska boundary meridian and to work to the eastward or Canadian side of this meridian) a base was to be established on it, but if the obstruction turned out to be ice an effort was to be made to follow the edge eastward with a view for making a base for the first year's work near the southwest corner of Prince Patrick Island, or, failing that, on the west coast of Banks Land."

The farthest east the *Karluk* got was 225 miles east of Point Barrow, where she was beset in the ice, off Lion Reef, and carried westward with the drift and exactly opposite from her planned voyage until, on January 11, 1914, she sank north of Wrangell and Herald Islands. The landing of the *Karluk* party on Wrangell Island was the desperate resort of shipwrecked men.

STEFANSSON NOT WITH "KARLUK."

Stefansson was not in the *Karluk* party that made Wrangell Island. Stefansson left the *Karluk* on September 20, 1913; two days later a storm drove the *Karluk* to sea, and Stefansson, with his land party, mushed to Point Barrow, where they stayed until November 8, when they mushed east and met Leffingwell, the American, at Flaxman Island. Stefansson left Leffingwell on December 14 and reached the Anderson southern party, where he spent the winter. On March 22 Stefansson started north from Collinson Point and did not return until after the *Karluk* party had been rescued by the United States Coast Guard cutter *Bear* and landed finally at Esquimault, Vancouver, on October 24, 1914.

BARTLETT NEVER "TOOK POSSESSION."

Neither Bartlett nor any of his party took possession of Wrangell Island. Bartlett was a seaman accustomed to obeying orders. His orders did not cover exploration west of the one hundred and forty-first meridian. All his references to Wrangell Island in his book give data of previous American exploration. Although he records leaving a copper tank with a record on the ice at Shipwreck Camp, where the *Karluk* sank, tells of leaving the British ensign flying when his party abandoned Shipwreck Camp, and even made two photographs of the camp with the British ensign flying, photographs that since have been shown as being taken on Wrangell Island, describes in detail all he and his party did on Wrangell Island, and reported to Naval Service, Ottawa, Canada, on his arrival at St. Michaels May 29, 1914, what he had done, Bartlett never mentions "taking possession of Wrangell Island." The men he left on Wrangell Island were taken off by the *King and Winge*, to whose captain Bartlett appealed for help when he was in Nome waiting for the *Bear* to sail north, were transferred to the *Bear* in the Arctic, and told their story, but never a word about "taking possession."

Three of the men had died. The only reference to a flag flying on Wrangell Island is made by Bartlett in these words: "The tent (at Rodgers Harbor) was left standing as it was, but the British flag that had flown so long at half-mast was taken (away) with the rescued men." The flying of the British flag does not mean that it was flown as an act of possession. It is customary for explorers to carry their national flag. Amundsen flew the Norwegian flag over the winter quarters at Gjoahavn, on King William Land, and over his tent "close" to the magnetic pole. Godfred Hansen flew the Norwegian flag at his farthest north, Cape Fridtjof Nansen, and named the coast of Victoria Land, from Collinsons Peninsula to Cape Nansen, after the King of Norway; but Canada would not accept a claim of Norwegian sovereignty because of this, particularly as Victoria Land, except on the west of McClintock Channel, had been previously explored and named by British explorers 60 years before Amundsen or Hansen.

STEFANSSON NOT SURE OF HIS "GIFT."

On March 20, 1922, following Stefansson's assertion in New York that he had taken possession of Wrangell Island for Great Britain, but indicating that he was not sure of his position by telling the reporter that, "pending instruction from the Government authorities, he did not know whether his country would accept from his hands the gift of Wrangell Island, because of possible international complications," a remarkable statement, viewed from any angle, and particularly when Stefansson was not with the *Karluk* party in 1914 and did not go with the *Silver Wave* party in 1921, and, so far as I can learn, has never set foot on Wrangell Island—an explorer by proxy, as it were. There was sent out of Ottawa and generally printed in the United States the following dispatch:

"CANADA CLAIMS WRANGELL—EXPECTS TO GET LAND ON WHICH STEFANSSON PLANTED FLAG.

"OTTAWA, March 20, 1922.—Wrangell Island, it is believed here, will be added to the Dominion of Canada as a result of the planting of the British flag on that far northern land last September by the Arctic expedition organized by Vilhjalmur Stefansson.

"The announcement made in New York by the explorer to-day gave rise to the assumption here that the island was formally claimed in the name of Great Britain to avoid international complications, with a view of its being eventually transferred to Canada as a part of the Dominion.

"While the probability of any difference arising between Canada and Great Britain over the island is discounted, Government officials believe Canada can claim right of ownership by an eight months' occupation by the survivors of the Canadian Arctic expedition of 1913 after their ship, the *Karluk*, had been lost."

AN ACT OF SEA CHARITY.

Stefansson, as I have written, was not with the *Karluk;* Bartlett was in command of the *Karluk* until she sank and in command of the survivors, who were rescued by the *Bear* after being taken off Wrangell by the *King and Winge*, not as a part of an exploring plan but as an act of sea charity to distressed mariners. No claim was then made of "possession."

On July 12, 1922, the Canadian prime minister, W. L. MacKenzie King, and the minister of defense, George Perry Graham, arrived in Washington from Ottawa. The object of their visit to the Capital of the United States was announced to be to hold conferences with the President and the Secretary of State in regard to a new arrangement concerning boundaries between the United States and Canada, the fisheries, the armed patrol of the Great Lakes, and other matters. This would seem to be a good time to take up other matters in relation to territorial rights.

ALASKA AND ALASKANS ARE KEENLY INTERESTED IN WRANGELL ISLAND.

Let me append an article that appeared in the New York Times under date of March 26, 1922. The Mr. Goshaw referred to tried to get into communication with me while he was in Washington in regard to my polar flight plans, but I was away and missed him. The article reads:

OLD GLORY PLANTED IN WRANGELL ISLAND—AMERICAN BANNER UNFURLED WITH BRITISH BY MEMBERS OF STEFANSSON'S PARTY—ARCTIC SKIPPER SEES FLAG—JOHN B. BURNHAM DEFENDS RIGHT OF UNITED STATES TO STRATEGIC TERRITORY.

[New York Times, March 26, 1922.]

"Information showing that the Stars and Stripes were hoisted simultaneously with the British flag upon Wrangell Island by the little expedition that Vilhjalmur Stefansson sent into the far north last September to annex the island for the British has just been received by John B. Burnham, president of the American Game Protective Association, 233 Broadway. Mr. Burnham recently furnished to the State Department much information bearing on the significance of the Stefansson expedition.

"For his association, whose advisory committee includes Maj. Gen. Leonard Wood, Henry Ford, Henry L. Stimson, Dr. Henry van Dyke, and Secretary of War John W. Weeks, Mr. Burnham led an expedition into Siberia last year in quest of a rare specimen of wild sheep. He traveled nearly 25,000 miles before he accomplished his mission. In the course of his journey Mr. Burnham was observant of the importance attached to Siberia as a land for development by the various countries whose subjects gradually were moving in that direction.

"Mr. Burnham places great credence in the report that now comes from Wrangell Island indicating that the three American members of the Stefansson party, not to be outdone by their Canadian leader, unfurled Old Glory when they discovered the plans of the Canadian, and thus raised the question as to who established the right of possession.

"The story was told to Mr. Burnham by George Goshaw, an Alaskan trader, who stayed here at the Hotel McAlpin for several days last week before returning to his headquarters in Seattle. The reliability of Mr. Goshaw's information is attested, according to Mr. Burnham, because Mr. Goshaw got his facts direct from Capt. John Hamner, in command of the auxiliary sloop—the *Silver Wave*—that landed the Stefansson party on Wrangell Island.

CAPTAIN HAMNER'S REPORT.

"Captain Hamner, according to the story told by Mr. Goshaw to Mr. Burnham, did not tarry at Wrangell Island when he landed the expendition, because winter soon would have barred his return to home port. Indeed, Captain Hamner set sail almost immediately after the party went ashore. As his ship put to sea the skipper trained his field glasses upon Wrangell Island for a last glimpse.

"It was then that he picked out a bit of color on the horizon. It was the British flag. Another speck of color a short distance away then caught the eye of the Alaskan skipper. It was the flag of the United States.

"Captain Hamner, according to Mr. Goshaw, apparently attached no special significance to the planting of the two flags upon Wrangell Island, for he was not informed of the political nature of the expedition organized and financed by Stefansson. The real meaning of the rival flags was not divined until the story was told to Mr. Burnham, who admits that he is a great admirer and friend of Stefansson, but asserts that he is distinctly out of sympathy with Stefansson's fifth and latest expedition into the Arctic.

"Mr. Burnham resents the claim of British possession advanced by Stefansson, because, he says, the strategic position of Wrangell Island would be used by the British against the United States. He said that if the Japanese had tried to seize the island their act would have furnished a casus belli.

"He further charges that Stefansson has tried to take the island for the Hudson Bay Co., with which the explorer is connected, and that if the British claim to the island is accepted as valid it will cost the United States millions of dollars in trade, because American traders will be shut out, and this in direct contravention of the 'open-door' policy.

OPPOSES BRITISH POSSESSION.

"Discussing the occupation of Wrangell Island, Mr. Burnham, among other things, said:

"'I have read with interest Stefansson's statement in the Times with regard to his seizure of Wrangell Island last summer for Great Britain. I agree with him "that strategically it dominates northeastern Siberia," but this strategy is exercised against the United States and not against Japan, as Stefansson states.

"'I spent last summer in northeastern Siberia, and on my return learned that the first action of the Stafansson party which landed on Wrangell Island had been to take possession of the island for Great Britain.

"'Later on I learned that the *Lady Kindersley*, the vessel which tends the Hudson Bay post on the Arctic coast of Canada, and which had gone north long before the Stefansson expedition sailed, had on board knockdown houses, intended to be set up on Wrangell Island as a trading post for the Hudson Bay Co.

"'Capt. T. P. O'Kelly, the assistant fur commissioner of the Hudson Bay Co., who was on the *Lady Kindersley*, knew that Stefansson was to take possession of the island, and was prepared months in advance to utilize the opportunity to the advantage of a British corporation. Stefansson was disgusted that fear of the ice conditions had caused Captain O'Kelly to abandon the attempt.

"'While in Siberia I saw that the Hudson Bay Co. was proceeding energetically to put into effect a far-reaching scheme to control the very valuable trade of northeastern Siberia, including furs, reindeer meat, and other valuable assets. I talked with representatives of the company and learned that they had not only established a number of trading posts but that they also had an understanding with Japan and with the pseudo eastern Siberian government that the Hudson Bay Co. would have the trading privileges of the country, while the Japanese monopolized the mining and fisheries.

STEFANSSON'S VIEWS ON ALASKA.

"'Canada has no nearer foothold than Prince Rupert at the terminus of the Grand Trunk Pacific, with the possible exception of the mouth of the Mackenzie River. When I called this

fact to Stefansson's attention he pointed to the panhandle of Alaska as cutting off access to the ocean and the consequent development of northern British Columbia.

"'I told him that there was no parallel between the two cases, and that I would consider it a distinctly unfriendly action if Great Britain or Canada persisted in backing up its claim to an American island. This brought up the question of the title of the United States to the island, and Stefansson made a statement similar to that which has been printed in the Times.

"'He overlooked the fact that Captain Gellett, of the Royal Navy, never reached Wrangell Island and made no attempt to take possession of the land. Sovereignty was first asserted by the United States when Captain Hooper, of the United States Revenue Cutter *Corwin*, landed on the island in 1881. The details are given in Captain Hooper's report on the 1881 cruise of the *Corwin* in a Government publication printed the following year. A little later, in the same summer, the U. S. S. *Rodgers* charted the island.

"'Stefansson states that in order to retain possession of lands acquired by the right of discovery they must either be occupied permanently or else that sovereignty must be reasserted at intervals of five years. I do not believe that this principle applies to lands difficult of access, and international courtesy has always been influenced by the proximity of such lands to the territorial domain of the claimant.

"'There are many large islands north of Canada to which Canada claims title which would fall under neither of the rules given and which are exactly in the same status as Wrangell Island.'"

ARCTIC LANDS ON EAST COAST.

It is interesting to note that Mr. Burnham refers to the status of many large islands north of Canada, which, under Stefansson's idea of continuous occupancy, would now not belong to Canada. Stefansson's "five-year abandonment" idea must have been evolved out of his own consciousness. There is absolutely no warrant for it in diplomatic or political practice or in international law. Denmark had no occupancy nor settlements north of Upernavik prior to 1874, yet her sovereignty over Greenland as far north as Melville Bay was never questioned, to the undiscovered region north of Smith Sound she then laid no claim, nor did she claim rights over Kane Land, Hall Land, Hazen Land, Peary Land, or Melville Land until after the Lansing treaty of 1917, and it is doubtful if that portion of the treaty, being the personal declaration of the Secretary of State and so incorporated in the treaty, is valid.

It is possible that the recent action of Canada in sending an expedition to the islands north of Labrador may have had its genesis in the last paragraph of Mr. Burnham's interview. Whatever its original impetus was it is certain that Canada is now taking action. As the United States has definite claims to part of that northern region, claims never abandoned nor canceled, it may be of interest to see how they came into being.

ORIGINAL DISCOVERIES IN ARCTIC REGIONS.

First it is well to recall what lands lie "north of Labrador and facing Greenland across Davis Strait," as the Ottawa dispatch reads. Strictly read this can only refer to the region running 60° north to 70° north, as the waters north of Disco Island are called Baffin Bay. John Davis, an Englishman, following Martin Frobisher, who in 1576 discovered land north of the present Labrador, and who brought the famous "fool's gold" from Meta Incognita in 1585 in the *Sunshine*, of 60 tons, and the *Moonshine*, of 35 tons, sailed up an open waterway lying between the known south Greenland coast and the unknown American coast. Davis made a northing to the Arctic Circle and discovered the strait that bears his name. On a third voyage Davis reached 72° 12′ north in 1588, roughly the latitude of Upernavik.

The only lands on the west of Davis Strait facing Greenland are Resolution Island, other small islands, and the lower part of Baffin Land. But as short press dispatches often omit important matter, it is possible that Baffin Land is not meant at all, as there has never been any contest of the title of Great Britain and Canada to Baffin Land. The territory in doubt in the minds of the Canadians is much farther north. Above Davis Strait runs Baffin Bay, ending as a bay at Smith Sound. This was supposed to be merely a bight in Baffin Bay until Elisha Kent Kane, that prince of American explorers, drove the *Advance* through the waters of Smith Sound into Kane Basin and opened up the gateway of the American passage to the Polar Ocean. Following Kane came Hayes, Hall, Greely, Lockwood, Brainard, and Peary, and step by step, from 1853 to 1909, they carried the American flag northward and formally took possession of the Polar regions for the United States until Peary planted the American flag on the North Pole and took possession of both coasts for the United States.

AMERICAN PLAN NAMES IN ARCTIC.

From Cape Chudleigh, or Chidley, the point south of Hudson Strait to Lincoln Sea, the waters dividing Labrador, the Magnetic Archipelago, Ellsmere, Grinnell and Grant Land, on the west from Greenland, Washington Land, Kane Land, Hall Land, and Hazen Land, on the east, are named; toward the north, Davis Strait, Baffin Bay, Smith Sound, Kane Basin, Kennedy Channel, Hall Basin, Robeson Channel, and Lincoln Sea. The first three are names given by English explorers, the last and most northerly five were given by American explorers on discovery. In their order running north the lands north of Labrador are named Frobisher Land, Cumberland, Baffin Land, Eylot Island, Devon Island, Ellsmere Land, Grinnell Land, and Grant Land. Grant Land is the most northerly part of the North American continental mass, with Cape Columbia at 83° north as its apex. South of Smith Sound Canada's title, through Great Britain, is clear, the conflict comes over the lands north of Smith Sound, originally discovered by Americans, and by them, from Kane to Peary, taken possession of for the United States, and to this day bearing distinctively American names.

NARES'S TRIBUTE TO HALL.

It is true that the British Nares expedition four years after the American, Hall, had opened up the American passage from Kane Basin to Lincoln Sea, or the true Arctic Ocean, of which Lincoln Sea is a bight, as Beaufort Sea is a bight farther west, pushed the British ship *Alert* up to Floeberg Beach, 14 miles farther north than Hall shoved the *Polaris*, but Nares's own views on the subject are set forth on the bronze tablet that he took out from London to place on Hall's Arctic grave on Polaris Promontory, on which Nares had engraved:

"Sacred to the memory of Capt. C. F. Hall, of the U. S. S. *Polaris*, who sacrificed his life in the advancement of science November 8, 1871. This tablet has been erected by the British Polar expedition of 1875, who, following in his footsteps, have profited by his experience."

On her maps and charts Canada claims as Canadian territory all the lands lying west of Davis Strait, Baffin Bay, and the American passage to the sixtieth meridian east, thence up it to the North Pole, thence south along the one hundred and forty-first meridian to Demarkation Point, which separates her Yukon Territory from Alaska. Lately she divided these lands up into territories, to which she gave new names. Canada has a dispute on with the colony of Newfoundland over Labrador. Newfoundland extends her claim of territory to Labrador and to Baffin Land, and it may be that this is the raison d'être for the expedition to Davis Strait to be sent out by Canada.

FLIGHT ROUTES IN ARCTIC CANADA.

But there is another "reason for being," and that is flight routes across the Arctic. From the head of Cumberland Sound, at the mouth of Davis Strait, to Collinson Gulf, at the southwest of Beaufort Sea, is 1,500 miles, and with any 1922 model seaplane it can be flown in 15 hours, with some in 10 hours. On Cumberland Sound, across Nettiling Lake, Fox Channel, through Frozen Strait—not as bad as its name indicates—or Fury and Hecla Strait, to Committee Bay; thence to Boothia Isthmus and across to Rae Strait and on through Simpson Strait to Franklin Bay, through Dease Strait, Coronation Gulf, Dolphin, and Union Strait to Collinson Gulf and Beaufort Sea in 10 hours, over water or smooth ice all the way, with ample supply stations easily established en route and oil and coal on the route. Or, substitute Hudson Strait to Fox Channel for Cumberland Bay and Nettiling Lake and an easier approach flight route from the Atlantic via Cape Chudleigh is established.

There can be no challenge whatever to Canada's rights to flight route by any nation. It is undoubtedly British all the way. If one says that no thought has been given to that region as a flight route besides myself when I filed my Arctic flight route charts in September, 1921, I recommend the reading of these two dispatches:

"Ice-running plane wrecked. St. Johns, Newfoundland, December 10, 1921. An airplane equipped with ice runners, inaugurating postal service between Newfoundland and Nova Scotia, which left Botwood, Newfoundland, to-day, crashed at Deer Lake, at the headwaters of the Humber River on the west coast, according to a report received here. Major Cotton and Captain Bennett, in charge of the machine, were said to have escaped unhurt."

FLIGHT AROUND LABRADOR.

A little thing like an airplane crash will not stop the men who stood at Ypres against the might of Germany, so later the following appeared:

"PLANE MAKES ROUND TRIP ST. JOHNS TO LABRADOR—MAJ. SIDNEY COTTON TAKES FIRST FLIGHT OVER NEW ROUTE WITHOUT ACCIDENT.

"ST. JOHNS, NEWFOUNDLAND, March 12, 1922.—Maj. Sidney Cotton completed to-day the first airplane round trip between this city and the Labrador coast. The return trip of 500 miles, from Cartwright, a Hudson Bay Co. trading post in Sandwich Bay, midway up the Labrador coast, was started this morning, and was made in eight hours. This included half-hour stops at St. Anthony and Botwood, Newfoundland.

"Major Cotton last week flew to Botwood up the east coast of Newfoundland, and the next day carried mails from there to St. Anthony, in the northern peninsula. Thence he flew to Battle Harbor, on the southern coast of Labrador, and on the third day of his flight went to Cartwright."

Five hundred miles' flight in seven hours, deducting stops. In the summer? Not at all. In March, the worst month in the year; around the rim of Labrador. And he tried it first in December. This ought to be answer enough to the doubting Thomases on Arctic flights

LANDINGS ON ARCTIC ICE.

From Cumberland Sound to the North Pole is about the same in an air line as from Cumberland Sound to Beaufort Sea. To those who pick at trifles I may say I know very well that the coast of Baffin Land is icebound, but the ice is only on the surface, or a bit above it. We fly over it, not mush through it. Surface ice will not stop an airplane. Smooth ice is excellent for take-off or landing. The floe that ties up a surface ship for a year in its icy grip only makes a perfect landing for an airplane, and the greater the pressure ridge—that bane of the surface explorer—the wider the floes that crush together to form it at their edges. Inland hard-packed and iced-up snow, frozen lakes and ponds, and frozen rivers make exceptionally good landing places, even with wheels on the landing gear, and perfect with runners or skis.

COMMERCIAL VALUE OF FLIGHT ROUTES.

I will not enlarge on the various flight routes across the Arctic above the Arctic Circle further than to again write that there are over 50 routes charted by my son and myself.

Using the delta of the Mackenzie River as a base and being permitted to claim and occupy the American territory of Wrangell Island, Canada, far-sighted and progressive as she has shown herself to be, would have control of all the Siberian trading. I am not a commercial man, but I know that there is more fossil ivory on one island in the Arctic than there is of other ivory in all the world. Airplanes are now built capable of carrying a load of 2 tons. Two tons of ivory would be a valuable cargo. Two tons of Siberian furs, brought from the Siberian coast by airplane via Wrangell Island, could be landed in St. Johns, Montreal, or Quebec easily within four days from the time they were loaded aboard in Siberia.

One has only to look at a chart of the Arctic to see how important Wrangell Island is as a halfway point between the Mackenzie in Canada and Kolyuchin Bay, and the rivers lying between it and Chaun Bay, Chaun Bay itself, the Kolyma Delta, which gives access to the Omalon River, which drains a great plain to the Primorskaya Mountains, and to the Kolyma River, which reaches south to the Tomuskhaya and Alazeiskya Mountains, the Indigirka, Yana, and Lena Rivers, and the New Siberian Islands. If these names seem odd and of little moment, one may reflect that there is nothing funny about the magnificent sables and other Siberian furs the region produces, nor the vast quantities of fossil ivory to be had for the taking therein.

WRANGELL ISLAND AS AIR BASE.

If Canada be permitted to occupy Wrangell Island without protest from the United States or the assertion of American rights to Wrangell Island dating back to its first verified landing by Long in 1867, followed by Captain Hooper and Lieutenant Reynolds from the U. S. S. *Corwin*, and Commander Berry and party from the U. S. S. *Rodgers*, both in 1881; the visits of American whalers between Long and the *Karluk* party landing, omitting Rodgers's cruise in the U. S. S. *Vincennes* in 1855, as he did not land but cruised in the waters near by, and Canada then follows the method she has in regard to other Arctic possessions, the Canadian Arctic boundary will be extended from the one hundred and forty-first meridian across the north of Alaska to the one hundred and eightieth meridian, thence north to the pole, and down the sixtieth meridian to Grant Land. This would insure the British Empire a series of flight routes from the Atlantic to the Pacific, routes which are now blocked to the British Empire and Canada by west and north Alaska and the Alaskan panhandle and by east Siberia.

Neither I nor any other American can object to Canada or the British Empire developing the flight routes in the Arctic that lie within their own territory, and it would matter very little to either the British Empire or Canada if we did. But Wrangell Island is not the only land at issue. Grant Land, Grinnell Land, Arthur coast, and the western hinterland of the American passage on the east coast are also at issue. In 1909 the Canadian Government sent Capt. J. E. Bernier, in the steamer *Arctic*, on a voyage to the Parry Islands, which are the most northwesterly of the Arctic Archipelago group, for the "purpose of annexing territory of British possessions as far west as longitude 141°," as Bernier writes in his introduction. Bernier cruised up Davis Strait, Baffin Bay, Melville Bay, Lancaster Sound, Barrow Strait, Melville Sound to McClure Strait, formally annexed Melville Island, Banks Island, Victoria Island, and placed a cross on Northeast Hill, Winter Harbor, Melville Land, to "commemorate the annexing of the Arctic Archipelago to Canada."

KELLETT AND WRANGELL ISLAND.

Great Britain had a short time before released to Canada all her claims to the Arctic Archipelago, and this and previous acts of physical annexation were to claim the lands for Canada, not Great Britain. At that time Canada had no plan about Wrangell Island; Bernier was to work only to the one hundred and forty-first meridian, and it is interesting to note that in writing of Capt. Henry Kellett, who, it is claimed now, saw but did not land on Wrangell Island in 1849, Bernier merely writes, "Capt. Henry Kellett had made a voyage to Bering Strait previous to his joining the expedition of Commander Belcher—searching for Franklin—and had met McClure in the Arctic Ocean on his way sailing northeast. Kellett reached Herald Island in Bering Strait (sic) and returned with his ship to the Pacific Ocean and around Cape Horn, successfully reaching England." Kellett reached England in 1850.

BRITISH ARCTIC CHART OF 1852.

In Bernier's book is reproduced the chart printed two years after Kellett's return to England. It is entitled "Correspondence—Arctic Expeditions, No. 82. Ordered by the House of Commons to be printed, December, 1852." The chart was prepared by Day & Son, lithographers to the Queen, and printed by Henry Hansard. This chart is most important in the discussion of the original discovery and claiming of Wrangell Island. It covers the region from 63° north to 74° north and from 152° west to 174° west; shows the Siberian shore from Emma Harbor around East Cape, past Cape Serdzekamen, to the east shore of Kolyuchin Bay; shows the Alaskan coast—Alaska was then Russian territory—from the mouth of the Yukon around Norton Sound, with St. Lawrence Island to the west, Cape Prince of Wales, Bering Strait, the Diomedes, and Fairway Rock, Kotzebue Sound north to Hope Point, around Cape Lisbourne, thence northwest to Icy Cape, Blossom Shoals, Seahorse Island to Point Barrow, and around Barrow to Smith Bay. Soundings are given offshore and the course of the *Herald*, Captain Kellett's ship, is shown by her soundings as far as Herald Shoal, where 8 fathoms are recorded at 171° west longitude and 70° 30′ north latitude.

WRANGELL ISLAND NOT SHOWN.

Wrangell Island is not shown on this English chart of December, 1852, two years after Kellett's return. The sounding farthest west that is shown is 29 fathoms at 60° 28′ N. and 175° W. The easterly point of Wrangell Island, looking toward Alaska, is 177° W. Taking the facts as shown by this chart the farthest west made in that latitude by Kellett, or any of the expeditions of that time, was, as degrees run in that northing, 94.40 statute miles from the most easterly point of Wrangell Island. The famous Capt. James Cook, the great English explorer, made North Cape, Siberia, in 1778, but did not see Wrangell Island, although Cook's distance was about the same as Kellett's from Wrangell Island. Kellett could not have seen Wrangell Island, even from his masthead, with his ship at his last-shown sounding. He could have seen a mirage of Wrangell Island, and this is perhaps what he did see; but he did not land on Wrangell Island nor did he claim it for England. Had the British Admiralty been satisfied that Wrangell Island, or even Herald Island, had been seen by Kellett, they would have incorporated such lands in the chart of December 20, 1852, when Arctic interest was at its height over the search for Franklin. This chart is very complete. such details as the "Vein of coal" near Cape Beaufort, Alaska, Deviation Peak, northeast of Hotham Inlet, and complete shore soundings are shown, yet Wrangell Island is not shown. Lieutenant De Haven and Surgeon Kane, of the United

States Navy, saw the first Grinnell land at the head of Wellington Channel and named it after the patron of the voyage. But they did not land. A year later Captain Omanney, of Belcher's squadron, landed on Grinnell land and claimed it for England. There was much discussion over this act at the time, but the United States officially ignored De Haven's "sight" and accepted Omanney's "landing"—or at least the matter has never been brought to issue officially.

AMERICAN RIGHTS IN ARCTIC REGION.

As the question of territorial rights to Arctic air bases is one that will be much discussed in the next few years, and as other Arctic islands besides Wrangell are involved, permit me to digress here to cite the following:

(From Admiral Robert E. Peary's "The North Pole," page 297.)

90 N. LATITUDE, NORTH POLE, *April 6, 1909.*

I have to-day hoisted the national ensign of the United States of America at this place, which my observations indicate to be the North Pole axis of the earth, and have taken possession of the entire region and adjacent for and in the name of the President of the United States of America.

I leave this record and the United States flag in possession.

ROBERT E. PEARY,
United States Navy.

Writing of this flag, on pages 294–295 of "The North Pole," Peary sets forth:

"We planted five flags at the top of the world. The first one was a silk American flag which Mrs. Peary gave me 15 years ago. That flag has done more traveling in high latitudes than any other ever made. I carried it wrapped about my body on every one of my expeditions northward after it came into my possession, and I left a fragment of it at each of my successive 'farthest norths'—Cape Morris K. Jesup, the northernmost point of land in the known world; Cape Thomas Hubbard, the northernmost known point of Jesup Land, west of Grant Land; Cape Columbia, the northernmost point of North American lands; and my farthest north in 1906, latitude 87° 6′, in the ice of the Polar Sea. A broad diagonal section of this ensign would now mark the farthest goal of earth."

This was in addition to the United States flag planted by Peary as the symbol of possession.

Chart No. 2142, issued by the United States Navy Hydrographic Office, bears a cut made from a photograph taken on the spot, Peary displaying the American flag on a cairn at Cape Morris K. Jesup, Peary Land, north of Greenland, at latitude 83° 39′ north.

CANCELLATION OF A PEARY CHART.

Strong political influence was brought to bear on the Hydrographic Office to withdraw this chart, and it did. This is the chart that shows that Peary Channel divides Peary Land and Hazen Land from Greenland, and I am sure this was the reason for the pressure brought to bear to cause its cancellation. It is easy to see why Denmark would prefer that Peary Channel had no existence, as it makes new land and separate land of the region north of Greenland, making this region distinct from Greenland—as Robeson Channel separates Hall Land from Grant Land.

On May 13, 1882, Lieutenant Lockwood and Sergeant (now Brigadier General) Brainard reached Lockwood Island, off Hazen Land, from which they saw and named Cape Washington, at 83° 24′ north, 42° 45′ west, where they planted the American flag and took official possession of the region in the name of the United States. In the committee room of the House Committee on Appropriations in the Capitol at Washington hangs a large painting done by Albert Operti, in 1886, which shows Lockwood and Brainard making an observation. The American flag is flying from their tent.

Nares Land, south of Nordenskiold Inlet, was not so named by the English party but by the Americans, Lockwood and Brainard, out of compliment to Nares. Lieutenant Beaumont, who headed the northeast party from Nares's *Alert*, did not get farther north than near Cape May, which had been previously explored by the American party under Hall in 1871.

WORK OF HALL AND KANE.

In 1870–71, on the east coast of Robeson Channel and Hall Basin, Hall, the American, and the members of his party took possession of Hall Land from Cape Bryant, 82° 20′ north and 55° west, to Cape Constitution, on Kennedy Channel, at 80° 35′ north, 67° west, for the United States.

Kane, in 1853–1855, from his base in the *Advance*, in Van Rensselaer Harbor, in Kane Basin, which he was the first to penetrate, discovered, explored, and took possession for the United States of the region lying on both sides of Kane Basin and Kennedy Channel. William Morton, of the Kane party, made Cape Constitution and saw Mount Ross, across Kennedy Channel, sledding along the east coast, while Hayes, on the Grinnell Land side, worked as far north as Cape Frazier at 79° 43′ north, and sighted land beyond that, planted the American flag there, and took possession of the land 21 years before Nares.

Thus, by the work of American explorers, from Kane to Peary, the entire region abutting on the American Passage was originally discovered and taken possession of for the United States from 78° 30′ north and 71° west to Cape Henry Parish at 82° 40′ north and 23° west, roughly 900 miles of coast on the east, and to Cape Columbia on the north, roughly 700 miles of coast.

Hayes followed up his work with Kane by an expedition in the *United States*, during which he explored Grinnell Land farther. Greely followed Hayes, and his men, Lockwood and Brainard, worked west on Grinnell and Grant Land to Greely Fiord, reaching 80° 48′ north and 78° 26′ west. Their journey, with Greely's trip to Mount Chester A. Arthur in 1882, opened up 6,000 square miles of unknown land, all of which was officially taken possession of for the United States. Later Schley Land, west of Hayes Sound, was added to this territory.

PEARY'S ARCTIC EXPEDITIONS.

In 1886 Peary began his work in the Arctic with a rush inland over the Greenland ice north of Disco. In 1892 Peary, crossing the inland ice, made Independence Bay and climbed Navy Cliff, 4,000 feet high, at 81° 37′ N., 34° W. Further explorations were made by him in 1893, 1894, and 1895. On May 8, 1900, Peary rounded Capes Washington, Jesup, and Bridgemen, and reached Cape Henry Parish. As he opened up each new stretch of territory Peary took possession of it for the United States. He did the same on his trips around Grinnell and Grant Land, reaching Cape Thomas Hubbard, the most northerly point on what he had previously named Jesup Land, now known as Axel Heiberg Land.

Not one of these explorers was timid about his right to take possession of the lands discovered. Their announcements are forthright and direct, and their acts were definite and for a definite purpose.

To Denmark's territorial rights south of Melville Bay there can not be question, though prior to 1874 Denmark had no settlements north of Upernavik. But to the territory extending along the west coast of the American Passage and around to Independence Bay the United States to-day has a valid claim, and this despite the declaration of Secretary Lansing in the treaty of cession of the Danish West India Islands of 1917.

CANADA'S RIGHTS IN ARCTIC.

To the territory running north from Cape Chidley, Ungava, north of Labrador to Cape Isabella, Ellsmere Land, Great Britain's rights, transferred by her to Canada, are absolute. Nor can there be any question about the islands running west from Ellsmere Land to Prince Patrick Island and thence south to Banks Island and Victoria Island. Too many brave Englishmen perished in the work of exploration of that region for anyone or any nation to challenge England's rights or Canada's rights through England. Axel Heiberg Land, Elluf Ringes Land, and Amund Ringes Land, by right of discovery, might be disputed by Norway. Amundsen's "Northwest Passage" in the Gjoa yielded no new territory. He sailed through well-charted passages, every square mile of which had been traversed by English explorers and by the Americans Hall and Schwatka, except the short stretch of the east coast of Victoria Island from Cape Collinson to Cape Nansen, covered by Godfred Hansen, but even this had been previously seen by English explorers from McClintock Channel. The Americans De Haven and Kane were on an errand of relief to find Franklin when they saw the First Grinnell Land, and I can find no record of definite possession being taken of it for the United States.

ARCTIC RIGHTS OF UNITED STATES.

But to the territory on both sides of the American Passage the United States has a valid claim, a claim admitted by Nares indirectly when he caused the words "In whose footsteps we followed" to be placed on Hall's arctic grave.

The very names of the region, coastal and inland, are American. These northerly lands are of great importance as an easterly outlet from the Arctic. The possession of them by the United States does not interfere with Canada's air exit to the east and the Atlantic. She can make flights via Beaufort Sea, McClure Strait, Melville Sound, Barrow Strait, Lancaster Sound, Baffin Bay, and Davis Strait to the Atlantic. She can fly from Cape Bathurst, at the head of Collinson Gulf, over water or ice, with short land flights, not overmuch for a seaplane, via Dolphin and Union Strait, Coronation Gulf, Dease

Strait, Franklin Gulf, Victoria Strait, James Ross Strait, Gulf of Boothia, Committee Bay across land to Repulse Bay, Roes Welcome, and Hudson Bay, or from Boothia Bay through Fury and Hecla Strait to Fox Channel and Hudson Strait, or from Fox Channel, Netteling Lake, to Cumberland Sound, and thence to the Atlantic.

The only American air exit from Alaska to the North Atlantic on the American side of the Arctic would be from North Alaska to Grant Land, thence to Hazen Land and Peary Land, and to the Greenland Sea.

But on the Asian side, over now known lands, the United States has a flight route via Wrangell Island, Jeannette, Henrietta, and Bennett Islands, Graham Bell Land, and thence to north Europe or the North Atlantic.

AMERICAN TITLE TO ARCTIC ISLANDS.

That it may be part of the record let me quote from the works of the discoverers the American title to the De Long Islands.

It may be forgotten that the De Long expedition, in the *Jeannette*, passed to the north of Wrangell Island, which De Long hoped was a point of continental land, and so coasted that side of Wrangell a year before the *Corwin* or *Rodgers* reached Wrangell. The last sight of Wrangell Island by the De Long party was on March 24, 1880.

On May 16, 1881, De Long writes in the log of the *Jeannette:* "Land! * * * I * * * ran up to the foreyard and there, sure enough, I saw a small island one-half point forward of our starboard beam * * * May 20 * * *. Toward midnight a strong appearance of land was seen bearing west by north * * * which I locate in latitude north 76° 47′ 28″, longitude 159° 20′ 45″. * * *

"Instructed to name the first island seen Jeannette and the second Henrietta, a party was sent ashore under Melville. De Long writes: 'The party landed on the island on Thursday, June 2, 1881, hoisted our silk flag, took possession of it in the name of the Great Jehovah and the United States of America, and, agreeably to my instructions, named it Henrietta Island * * *.'" On June 28 (correct date June 29), 1881, De Long writes describing his landing on Bennett Island: "I have to announce to you that this island * * * is newly discovered land. I therefore take possession of it in the name of the President of the United States and name it Bennett Island."

These three islands, now known as the De Long Islands, lie northeast of the New Siberian Islands. Bituminous coal was found on Bennett Island and burned aboard the *Jeannette*. The islands are Jeannette, 450 miles west of Wrangell Island; Bennett, 600 miles west of Wrangell Island.

Wellman, Baldwin, and Fiala are still alive, and their testimony as to the actual physical act of taking possession for the United States of Graham Bell Land and other lands in the Franz Joseph Archipelago is available from them. There is no doubt that they did.

AMERICAN ARCTIC FLIGHT ROUTE.

Excluding consideration of possible land north of Alaska, between it and Peary's "entire region and adjacent" to the pole, a trans-Arctic flight route from Alaska to north Europe is provided for the United States via Wrangell Island, De Long Islands, and Graham Bell Land, with four main stops en route and access to the Siberian coast, Taimir Peninsula, and Nova Zembla on the way. This route is not as short from Bering Sea to Greenland Sea, or from the North Pacific to the North Atlantic, as the transpolar route, but it is over known territory, and has strategical value to the United States. Not being a commercial man, I hesitate to point out its commercial value, but there are plenty of men in Alaska who realize it, and they are not the only ones.

Nor is it within my province to suggest just what action the United States shall take to protect its rights. The State Department exists for that purpose, and is quite capable of functioning when it so wills.

NAULTY PLANS USED BY AMUNDSEN.

The importance of the Arctic flight routes is understood by other nationals, as the deliberate appropriation of my polar flight plans and even of my announced route by Amundsen, the Norwegian, indicates. Emboldened by the lack of criticism of his action in this country, due to good-natured indifference and a lack of realization of what is afoot, Amundsen is now attempting to make Point Barrow by surface ship and start a flight across the Arctic from there. An agent of his recently denied that Amundsen intends to take possession of land if he finds it north of Alaska, but a previous statement differs with that.

In an account of Amundsen's plans sent out by International News Service from Seattle on March 11, 1922, and headed "Plans to drift across North Pole, and journey may take five years—New lands to be claimed for the King of Norway," the statement is made, as printed in the Washington Times of that date: "The voyage of exploration will be made under the flag of the King of Norway. Lands first discovered on the journey will be claimed for Haakon VII, King of Norway, who is helping finance the expedition." This was given out by the same agent who afterwards denied that Amundsen intended to take newfound lands in the American region for Norway.

Amundsen himself was then in Norway, but previous to his departure Amundsen had accepted responsibility for the statements of his agent. The whole idea of appropriating the Fairfax Naulty plans had not been put up to Amundsen then by interests operating in the United States for a German plane and a Bavarian air motor and the plane he now purposes using with its British pilot had not been "given" to Amundsen. That this is so is shown by this part of the article of March 11, which reads: "Should the ice pack carry the *Maud* within flying distance of the North Pole the two airplanes (short-range English airplanes previously referred to) will make a little side trip to the pole."

PLANE TO BE USED FOR ESCAPE.

On March 17, 1922, Amundsen sailed from Christiania, Norway, for New York. The dispatch from Christiania said Amundsen planned to leave Seattle on his long expedition into the ice-bound Arctic regions. Another article from Seattle on March 25, inspired by the same agent, announced the purchase by Amundsen of a large metal plane, said that Amundsen might attempt to fly from New York to Seattle (a part of the Fairfax Naulty plans), and concluded by the statement that "The larger plane is to be provided for a dash to the nearest settlement in case of a mishap to the *Maud*."

GERMAN PLANE GIVEN AMUNDSEN.

Still there was no announcement of a plan by Amundsen to fly from Point Barrow to the pole and on to North Cape. On March 29, 1922, Amundsen reached New York, and, as announceed in an article carried by the Associated Press, the story reads in part:

"Hardly had he landed than he hastened to a conference with John M. Larsen, a governor of the Aeronautical Chamber of Commerce of America. After luncheon came the announcement that the larger of the two planes selected by the explorer would be the all-metal Larsen monoplane. The plane, Captain Amundsen explained, was being supplied by Mr. Larsen at his own expense, and the contribution which the airplane manufacturer would make to the expedition would represent about $40,000. Amundsen is confident that the monoplane—the eyes of the *Maud*—will be able to do its work well, permitting great sallies to either side of the vessel and sending warnings of ice fields and dangerous currents that should be avoided. Besides the monoplane Amundsen will take an Avro scout plane, a smaller British ship, which will be used only in the vicinity of the *Maud*."

RESULTS TO ACCRUE TO NORWAY.

The article continues: "Amundsen plans to leave for Washington in about a week for conferences there with Government officials"—thus attempting to create the thought that the United States Government, as a Government, was interested in his venture. Further on Amundsen is quoted as saying that he "would take 10 men with him when he sets out from Nome to drift to Spitzbergen."

In an article published March 31 in a Washington newspaper Amundsen, who had arrived in Washington, is quoted as saying that "the trip to the polar regions will be made under the Norwegian flag and the direct discovery results will accrue to Norway, it is understood, which is financing the trip in so far as the ship *Maud*, in which the voyage is to be made, is concerned." * * * "The objective will not be the North Pole, although it is possible that this point will be passed by the exploring party."

In the Washington Herald of March 31, 1922, Amundsen is directly quoted as saying, "First of all, we are not making this trip to find the pole but for the purpose of making scientific observations. * * * The first stop will be Nome, Alaska, where we will take on supplies. From there to East Cape, Siberia, where we will be outfitted with fur suits. * * * We will push through the ice as far as we can go, then freeze up and start our long drift to the north. * * * If we succeed in pushing through the ice to latitude 75—Point Barrow is latitude 71–16, or 284 geographical miles south of latitude 75—we should come out in three years. However, if we freeze up and have to start drifting from 72 or 73, say, we will probably be gone five years." Under the subhead "To drift over pole," Amundsen is directly quoted as saying, "We hope to

drift about 2,000 miles across the Polar Sea and to come back to civilization through Spitzbergen and Greenland, thence to Norway and home." The article then reads: "One of the principal objects of the trip, according to Amundsen, is to seek the theoretical continent that the late Doctor Harris believed to exist just eastward (sic) of the pole."

Amundsen attempted a flight across the continent but the plane cracked up in a forced landing at Miola, Pa., and Amundsen took a train to Seattle.

ARCTIC DRIFT PLANS OF AMUNDSEN.

Amundsen left Seattle for Nome, not in the *Maud* but in the passenger steamer *Victoria*, and the Associated Press sent out a story from there on June 3, 1922, in which the ice drift on the surface was emphasized. I quote: "The expedition is a resumption of the effort begun by Captain Amundsen in 1918, under auspices of the Norwegian Government, to drift past the North Pole with the ice floes. Captain Amundsen expects to drift past the pole from a point off northeast Siberia to Spitzbergen within five or six years. H. H. Hammer, Seattle, representative of Captain Amundsen, was recently knighted by the King of Norway for his services in connection with the expedition."

BRITISH AIR PILOT APPEARS.

At Nome a new man entered the case. In a dispatch from Nome, of June 30, 1922, detailing the send off the good-natured folk of Nome gave Amundsen, Elmer G. Fullerton appears instead of Omdal, the Norwegian flyer, who was previously announced as the polar pilot. The story reads in part: "With the Norwegian explorer (on the *Maud* from Nome) sailed Elmer G. Fullerton, Canadian member of the British Royal Air Force, who will pilot the 185-horsepower Junker monoplane in its flight." This is the first time that the real name of the so-called Larsen plane has appeared in print. The article continues: "Fullerton said, 'Captain Amundsen and I hope to make a nonstop flight across the world to Spitzbergen, taking about 24 hours for the journey. Our monoplane will carry 350 gallons of gas and is equipped with special skis for landing on ice.'"

VARIOUS STATEMENTS OF PLANS.

The knighted press agent at Seattle on June 27 got mixed up, as he issued a statement that a cablegram from Captain Amundsen five days before—that is, June 22—stated that Amundsen was leaving Nome for Point Barrow, where he intended to start his air trip over the pole. This article states later, "Captain Amundsen plans to attempt a flight from Point Barrow across the North Pole. His latest plan, according to Mr. Hammer, is to land at Cape Columbia, Grant Land."

Out of Christiania, Norway, on June 26, came this dispatch: "Roald Amundsen, the Norwegian explorer, has changed his plans for his attempt to fly to the North Pole, it was reported here to-day. He now intends to land at Spitzbergen instead of Cape Columbia, as had been planned. A Norwegian air officer is going to Spitzbergen to mark out a suitable landing place."

On June 9 Amundsen had intended to attempt a flight despite his talk about a surface drift, as he sent under his own name a communication to the London Times in which he wrote:

"Should conditions allow me, Omdal and myself will start this summer from Point Barrow, the north point of Alaska, flying across the unknown regions of the Polar basin and cross the North Pole, thence making for Cape Columbia (northern Greenland, sic). A depot for our use has been established there by Capt. Godfred Hansen, who has worked hard and shown great capacity."

I have referred to the Hansen "depot" in my letter of July 4, 1922.

From the first tentative announcement of a plan to use airplanes as "the eyes of his ship," made on October 12, 1921, 12 weeks after the Fairfax Naulty (American) polar flight plans were made fully public, Amundsen and his agent have varied continually in their statements as to the purposes of the expedition. Now they have been joined by interests exploiting a foreign airplane and a pilot said to be now in the British Royal Air Force. This last I doubt. Fullerton may have been during the war in the R. F. C. or the R. A. F. He did pilot a Junker plane from Peace River to Fort Norman last summer, through Canadian territory, carrying the geologist of the Imperial Oil Co. to the oil region at Fort Norman. I would not be surprised to find that he had flown to Wrangell Island to clinch Stefansson's "taking possession" of it.

FATE OF AMUNDSEN'S MEN.

That Amundsen had no intention of making a transpolar flight from the *Maud* or from any land point when he started his Arctic voyage in 1918 is certain. He worked his ship with a full crew to Cape Chelyuskin, where he sent two men of the crew—Knudsen and Tessen—ashore to work back to Norway with his records. The fate of these men is set forth in an Associated Press dispatch from Christiania, Norway, under date of December 30, 1921. The dispatch, as printed in the United States, read:

"ARCTIC MESSAGE TELLS OF TRAGEDY—BEARS DESTROYED DEPOT; ONLY 20 DAYS' FOOD," SAYS LETTER FOUND BY SEARCHERS.

"CHRISTIANIA, NORWAY, December 30, 1921 (by the Associated Press).—'Bears destroyed our depots; we now have 20 days' provisions,' so reads part of a letter dated November 10, 1919, said by the official Rosta agency to have been found at Cape Wild by the Russian expedition under Begitcheff, which has been making a search in the Arctic regions to learn just what happened to Knudsen and Tessen, two members of the Amundsen North Polar expedition, who were lost during the winter of 1919.

"Near Cape Premetny the expedition reports that it discovered the remains of a fire on a beach and of what appeared to be a burnt human body. Footprints of only one man were discovered. One rifle and cartridges of the Norwegian 1914 pattern also were found.

"The Begitcheff expedition was at Cape Wild on July 28 last (1921).

"Several weeks ago a radio dispatch from Moscow told of the finding of the bodies of Knudsen and Tessen. The place where the bodies were found was vaguely described as 'near the mouth of the Jenesey,' which was taken possibly to refer to the Yenisei River, which rises in northwestern Mongolia and flows northward through Siberia, where it empties into the Arctic Ocean.

"An expedition to search for the missing explorers was also sent out some time ago by the State council of Norway, but this party returned last summer without finding trace of Knudsen and Tessen at Cape Wild, where they were supposed to have been."

HISTORY OF "MAUD'S" VOYAGE.

For an easterly surface drift across the Arctic ice Amundsen left Norway in the schooner *Maud* in July, 1918. As the London Times of June 9, 1922, wrote, he "carried no airplanes." As Amundsen himself said in 1920 on his arrival at Nome, Alaska, he "regretted that he had no wireless on board." Aircraft were at the height of their war development in July, 1918, and communication by radio was then well established. Yet Amundsen had neither radio equipment nor airplanes on the *Maud*. Amundsen arrived at Nome, Alaska, on July 26, 1920, with the *Maud* and started back again to attempt the surface drift across the Arctic back to Norway. He did not then provide radio nor airplanes, though there were ample supplies of war surplus to be had—and cheap. Nor did he say one word during his stay in Nome in 1920 about a contemplated flight across the Arctic and to the North Pole.

Word was received at Nome from a trading vessel that Amundsen in the *Maud* was caught in the ice again on September 15, 1920, 20 miles off Cape Serdze, Siberia, and 225 miles northeast of Nome. On November 11, 1920, Amundsen sent a dispatch from East Cape, Siberia, to a Copenhagen newspaper which read: "We sailed from Nome City August 8 (1920). The following day we were held up by pack ice in Bering Strait. All aboard well."

NO AIRPLANES NOR RADIO ABOARD.

No airplanes aboard, no radio equipment. No announcement of any plans to fly in the Arctic. Amundsen's sole idea, then, was a surface drift back to Norway through the Polar ice.

Nothing was heard from Amundsen until June, 1921. On the 18th of June the following press dispatch was sent out and it was generally printed by newspapers throughout the United States:

ROALD AMUNDSEN RESCUED IN THE ARCTIC.

"SAN FRANCISCO, June 18, 1921.—The famous explorer, Capt. Roald Amundsen, lost for months in the Polar ice fields, has been rescued by the fur-trading schooner *Herman*, according to a cable from Nome. The message announced the safe arrival of the schooner (*Herman*, not *Maud*) at Nome with Amundsen on board. Amundsen was forced to desert his ship, the *Maud*, in which he went north from Seattle last summer, and was picked up by the *Herman* after a long overland trip filled with hardship. Amundsen hopes to have the *Maud* towed to Seattle, when ice conditions permit, to be fitted out for another start."

SECOND ARRIVAL IN NOME.

Amundsen left Nome for Seattle on the *Victoria*. He was extensively interviewed, both at Nome and at Seattle, when he got there on July 5, 1921. All his talk was then about his surface ice drift, never a word about polar flight. In its account

of his arrival at Nome on June 18 the New York Times, under date of June 19, 1921, printed the following:

AMUNDSEN BACK AT NOME—HIS SHIP DAMAGED—SAYS HE WILL TRY AGAIN TO DRIFT TO THE POLE.

"NOME, ALASKA, June 18, 1921.—Roald Amundsen, the explorer, whose ship, the *Maud*, wintered at Cape Serdze, Siberia, arrived in Nome yesterday and will leave for Seattle on the first steamer, he announced. The *Maud* lost a propeller in the ice during the winter and will be towed to Nome this summer for repairs. The explorer, noted for his discovery of the South Pole and his many Arctic and Antarctic voyages, said he would continue his efforts to reach the North Pole, drifting with the Arctic ice floes, as soon as repairs to his vessel were completed. He spent the winter (of 1920–21) on board the *Maud* with one native and three white companions, and said the party experienced few hardships. He reached Nome on the trading schooner *Herman*, which had picked him up at East Cape, Siberia. With the explorer were the daughter of Charles Carpenter, a Siberian trader, and a Chuchuk (Chuckchi) Esquimo girl, who he will send to school in Norway."

ACCOUNTS IN ALASKAN NEWSPAPERS.

The Alaskan Daily Empire, of Juneau, on June 21, 1921, printed the following:

AMUNDSEN HAS HARD TRIP IN ARCTIC REGIONS—BOTH PROPELLERS OF "MAUD" BREAK—IS RESCUED AND TRANSPORTED TO NOME.

"NOME, June 21 [1921].—Roald Amundsen, the Arctic explorer, who arrived from the Arctic last week, in an interview to-day, said both propellers of his schooner *Maud* were broken. One propeller broke in the Northwest [sic, Northeast Passage meant] Passage in 1919, and the second broke last fall between East Cape and Cape Serdze. Amundsen said the ice is the worst in years, and vessels were locked in for the winter. Amundsen, in May, made his way to East Cape, where he was the guest of Charles Carpendale. Natives on Diomede Island informed Captain Pedersen, of the schooner *Herman*, of Amundsen's plight, and the latter rescued him and brought him to Nome. Amundsen says he will continue his ice drift as soon as the *Maud* has been repaired, which will be when the craft is towed to Seattle during the summer."

The Alaskan Daily Empire had announced the arrival of Amundsen at Nome for half a stick, and this was what is known as a second-day story. Here was a direct interview with Amundsen, and then was his chance to announce his flight plans if he had them in mind; but his mind was fixed on the drift across the ice and flight was far from his thoughts. Newspapers generally on June 19, 1921, carried a cable dispatch from Christiania, under date of June 18, which set forth that the Storthing had received a telegram from Capt. Roald Amundsen, the Norwegian explorer, requesting that 300,000 kroner be furnished for refitting the explorer's ship, the *Maud*, in order that he might continue his Arctic expedition; that is, his surface drift. Here again was a chance for Amundsen to announce flight plans to the Storthing if he had them, but there is not a word about polar flight from Norway.

AMUNDSEN AT SEATTLE.

On July 5, 1921, Amundsen arrived at Seattle. The Seattle Daily Times, of July 5, 1921, after describing Amundsen's arrival from Nome on the steamer *Victoria*, concludes with an interview with Amundsen, who said, "I am more confident than ever that I will reach the North Pole by drifting with the ice. The *Maud* broke her propeller in the ice last fall [1920] and we were thrown back a year in our venture, but I am not discouraged." Here was another chance for Amundsen, on his arrival, to announce polar-flight plans if he had them, while he had the attention of the world for a moment. A laudatory editorial on Amundsen and his drift work was printed in the Seattle Times, but no mention was made of flight plans. At that time airways across the continent were much in the public mind, and the Seattle Times carried an editorial on airways but never a word about Amundsen's "airway" across the Arctic.

Amundsen dropped out of print until July 17, 1921, when he was featured in a special Sunday story with the Siberian and Eskimo girls at the Seattle Zoo. He was photographed on the bridge of the vessel which was to tow the *Maud* down to Seattle, on July 21, 1921. On August 1, 1921, Amundsen sent out the following story from Seattle. It was carried by the Associated Press and as printed in the Evening Star, of Washington, read:

AMUNDSEN HOPES TO RADIO NEWS OF ARRIVAL AT POLE—EXPECTS TO INSTALL WIRELESS ON THE "MAUD" AND WILL TRY AGAIN TO REACH TOP OF EARTH BY FLOATING WITH ICE FLOES.

[By the Associated Press.]

"SEATTLE, WASH., August 1 [1921].—From the remotest, most inaccessible spot on earth—the North Pole—a wireless message will be flashed to the civilized world, if the plans of Capt. Roald Amundsen, discoverer of the South Pole and famous Arctic explorer, are carried out. Captain Amundsen's schooner *Maud*, on which he hoped to drift past the pole with the ice floes, was disabled by a broken propeller off Cape Serdze, Siberia, after he had spent two years in pushing around the eastward Arctic passage from Norway. The explorer left his vessel and her crew to await a break in the ice and proceeded to Nome, later coming to Seattle on a recent ship.

FIRST MENTION OF RADIO.

"The *Maud* has no wireless apparatus, but Captain Amundsen expects to install one when the *Maud* is brought here some time this summer to be repaired and refitted. Captain Amundsen explained that his party had been cut off from communication with other human beings for two years, with but one break—his trip out to Nome last year—two years of ice-bound horizons, of bitter cold, and of almost endless night.

"'The war was raging in its most critical period when we left the world, most of you know,' he recalled, 'and for months we speculated in vain on the course of events. It was in December, 1919, more than a year after the signing of the armistice, that we finally met a Russian trader, who told us what had happened. Then I determined that we would carry wireless.'"

The article continues:

"The explorer affirmed that his voyage had tended only to confirm his previous theories about magnetic properties of the Polar Basin. He expressed faith that an ocean current running northeasterly from Cape Serdze would carry him past the pole and eventually into the Atlantic Ocean.

"'When we reached Nome a year ago and started back,' he said, 'the trouble was that an unprecedented jam of ice prevented us from pushing far enough north. We drifted too much to the east, and the currents from Siberia are extraordinary; it is a sort of whirlpool, where one wanders around in circles instead of following any course.'

"'It will take three years, perhaps longer,' he predicted.

"Captain Amundsen said that an important part of his equipment consisted of books, hundreds of them.

"'I read mostly fiction,' he said. 'Under such circumstances a man's mind needs diversion. I want something light, but not too light; it must be plausible.'

"The *Maud's* crew includes Dr. H. V. Sverdrup, a scientist; Oscar Wisting, G. Olonkin, and seven natives. They left Norway in 1918 and remained buried in the ice 19 months."

AMUNDSEN DID NOT ANNOUNCE FLIGHT PLANS.

That was the time for Amundsen to announce his polar flight plans, if he had made them. He had the ear of the Associated Press reporter in Seattle. He could have had his story of his plans spread over the world, but no such plans were in his mind. He specifically states his belief in a current that would carry him in the ice and across the pole, and his whole mind is centered still on his original plan of an ice drift. There is no mention of small airplanes for by-flights or exploration; no mention of a large plane to make the Arctic flight; no mention whatever of any flight plans up to October 10, 1921. The same day the above appeared in the Star, Fairfax Naulty gave to the Associated Press Bureau in Washington a prepared statement of his polar flight plans, and it was generally printed throughout the country on August 2, 1921. The New York Times carried the story in full and all the New York papers printed it. It was printed in all the Washington papers on August 2, 1921.

ACTIVITY IN AVIATION IN 1921.

Had there been no public interest in aviation after the war Amundsen might claim that this was not a good time to try to interest the public in an Arctic flight. But he must have been told when he came out of the ice on the *Maud* in 1920 that the Navy *N–C* had flown across the Atlantic via the Azores; that Harry Hawker had almost made a nonstop flight from Newfoundland to Ireland; and that Alcock and Brown had made it; on June 4, 1920, Lieutenants Bernard and Bossoutrol flew continuously for 24 hours and 19 minutes at Etampes, France; long-distance flights were common in Europe, and Col. R. B. Hartz had made his famous "round the rim" flight in an Army Martin bomber. The Nome Nugget newspaper printed all this, and if flight across the Arctic had been in his mind at all Amundsen had plenty of time to formulate flight plans in his off-watch hours on the *Maud* from July 26, 1920, when he left Nome, until June 18, 1921, when he arrived back again.

When Amundsen reached Seattle on July 5, 1921, and up to October, the newspapers were full of the bombing tests off the Virginia capes and the long flights made by land planes over the sea during these tests, especially Brig. Gen. William Mitchell's seven-hour oversea flight in his land plane. The Army Air Service was conducting a great publicity drive for transcontinental airways. On July 30 Durafour, a French aviator, landed on the ice on the summit of Mount Blanc. On

July 15, Lieutenant Kirsch, another French airman, established a record for altitude of 34,768 feet and a record of temperature during flight of 69° below zero. On July 16 MacMillan started off on his Baffin Bay expedition from Wiscassett, Me., and much was printed about his radio equipment. On July 27 Elmer Fullerton, Bill Hill, and Geologist T. A. Link flew from Peace River to Fort Norman, north of the Arctic; and on September 29 Kirsch's record for height was broken by Lieut. John A. MacReady, from McCook Field, with a record for altitude of 40,800 feet and for temperature of 60° below zero. Lieutenant Kirsch made a speed of 179 miles an hour in a French monoplane in October. On August 18 seaplane flights were announced from Seattle to Juneau. On August 17 a Loening seaplane made an altitude record of 19,500 feet with four persons aboard.

NO WORD ABOUT POLAR FLIGHT UNTIL OCTOBER 12.

Full accounts of these events were carried in all the newspapers. If Amundsen had thought of a polar flight, even in the most nebulous way, these events ought to have brought his thoughts to a focus, especially when in September it was announced from England that Shackleton was taking a small plane with him to the Antarctic. But never a word came from Amundsen about a polar flight until October 12, and then his word might be said to be a whisper.

At the request of W. W. Jermane, Washington correspondent of the Seattle Times, Fairfax Naulty prepared an article describing his polar-flight plans and giving the route of the flight. This article was printed in the Seattle Times on October 10, 1921, and was a recapitulation of the data that appeared in the August 2 article in the Seattle Times, which was reprinted in full in the CONGRESSIONAL RECORD of July 6, 1922. Two days afterwards, by accident, Fairfax Naulty saw in the Philadelphia Inquirer an article which read:

"AMUNDSEN MAY TRAVEL BY AIRPLANE TO POLE—EXPLORER WILL FLY IF DRIFTING IN SHIP IS IMPOSSIBLE.

"SEATTLE, WASH., October 12, 1921.—Capt. Roald Amundsen, discoverer of the South Pole and conqueror of the Northeast Passage, will use airplanes in an effort to reach the North Pole if present plans for drifting past the top of the world prove impracticable, H. H. Hammer, his representative, announced here to-day.

"Captain Amundsen has already obtained the services of two Norwegian aviators, who will sail with his ship, the *Maud*, when it leaves Seattle next May to resume its interrupted far northern trip, according to the announcement.

"The explorer's original plans for the expedition called for a five years' drift with the Arctic ice pack."

This is the first public statement made by Amundsen, or in his behalf, of any intention to use airplanes in the Arctic in connection with the *Maud* ice drift, from his start from Norway in July, 1918, to October 12, 1921, 10 weeks after the full plans of Fairfax Naulty had been given the widest publicity. The full plans were published in the Seattle newspapers on August 2, 1921, and the Seattle Times printed a special article on its front page on October 12, 1921. To say that Amundsen knew nothing of the Fairfax Naulty plans is buncombe. Even if Amundsen does not read American papers, some one would have told him about the matter, as I was constantly kept informed of his movements without effort on my part.

AMUNDSEN DOUBTED HIS OWN PLANS.

The statement is worth a second reading: "May travel by airplane if present plans for drifting past the top of the world prove impracticable; the explorer's original plans called for a five-year drift with the ice pack." Amundsen was not then sure that he would use airplanes—"May travel by airplane" is not the same as "will fly to the pole." "Amundsen was even in doubt about his ability to drift across the ice with the *Maud*," the article reads, "if present plans for drifting past the top of the world prove impracticable."

"Present plans" means that it was Amundsen's plan, even as late as October 12, 1921, to drift with the ice in the *Maud;* his mind was still on his surface expedition. There was no announcement of the route to be flown, purposes of flight, nor any such clear exposition of purpose, boiled down to verbs and nouns, as characterized the Fairfax Naulty announcement of August 2, 1921. Even as late as March, 1922, Amundsen was still talking about the "drift across the pole in the ice."

On September 15, 1921, I prepared a statement regarding the situation in regard to my Arctic flight as it then existed. This statement was given to the Associated Press and several New York and Washington newspapers. It was not used in full, but was cut to fit space requirements. As it covers matter under discussion, I include it here.

FAIRFAX NAULTY'S PLANS OF SEPTEMBER, 1921.

Fairfax Naulty, organizer of the all-American North Pole trans-Arctic flight, the first air expedition planned to attempt the Northeast Passage by air across the Arctic from Point Barrow, Alaska, to North Cape, Norway, back in Washington perfecting arrangements after a series of satisfactory experiments in analeptic radio tests in Pittsburgh, said last night at the Hotel Driscoll:

"The sudden change in continental weather, extending from Trinidad, where a West Indian hurricane started, to Lethbridge, Alberta, Canada, where 5 inches of snow fell yesterday, will not affect our plans for the polar flight this autumn further than to advance the probable date of departure from the end of September to about the 15th of October.

"In Pittsburgh on Saturday, through Delegate DAN SUTHERLAND, of Alaska, I got a relayed radio from the United States Coast Guard cutter *Bear*, giving the weather conditions east of Point Barrow in the Arctic Ocean and in Beaufort Sea. The *Bear* has just made port in Nome, Alaska, from a cruise in the Arctic as far east as Demarkation Point, at the edge of Beaufort Sea, the farthest east and north that even that intrepid vessel ever made in her 36 years of service. This report shows that most of the heavy Arctic ice is off shore, that there is not much of it, that the weather in the region covered has been unusually hot, and that there was neither rain nor fog, that terror of the airman, in the Arctic in the month of August.

"Other reports from Nome and Wrangel Island, and I am in constant touch with the Nome region by radio, show that the east-northeast winds which have prevailed off Demarkation Point changed to southeast winds with rain at Nome and to southwest winds with fair skies at Wrangel Island. This means that we ought to have clear weather and northwest winds along the one hundred and sixtieth west meridian after we clear Keenan Island, probably as far north as the eighty-fifth parallel, in October. Farther north we will either find a polar calm or strong vortical winds, blowing steadily from the 'northwest,' and either will help us. Like the persistent Icelandic 'high' the weather in the region we purpose flying over is not subject to much fluctuation. If we have a following wind all the way across its speed will add to the speed of our plane, and we may be able to set a record for flight time in the first polar air expedition that later air cruises will have hard work to excel.

ORIGINAL PLAN WAS FOR 1922.

"Originally my air expedition was planned for June, 1922, but certain strategic considerations, in addition to unusually favorable weather this summer, indicating a continuance during the autumn, forced me to set ahead the date of the entire flight and to use a different type of airplane from the new all-steel one we planned to build this winter for the flight next year. We shall use a well-tested plane now built, and it is capable of carrying four persons, 50 hours' flight fuel, all needed instruments, and a four months' supply of dehydrated food. If our plane meets with accident, we can use her ribs and spars to make light sledges and mush back to Parry Islands, Garfield Coast, Greenland, or even into Spitzbergen, depending on where we lose the plane, if we do. We do not expect to crash, and so far as possible have provided against accident, but we are also prepared for a land or ice mush if called on to make it.

"If the expected conditions of weather come in October, we shall be able to make the polar flight from Point Barrow across the North Pole to North Cape, Norway, in a week from the time we take the air at Barrow and have ample time for observations of ice, land, water, and air, and for observations to assure us and the world that we have reached the North Pole.

TO RADIO ARRIVAL AT POLE.

"At the North Pole we shall radio our observations and ask for any corrections from the Naval Observatory and Harvard and Columbia Universities by relay, and if we are in error that error can be corrected while we are at the pole. Our method will relieve our reports of any doubt as to accuracy. There will be four men at the North Pole, and each one of them will make observations under my direction, so there will be a mutual check up on personal equation as well as possible instrumental error. If there are any criticisms of our observations, that will be the time to make them, while we are still at the North Pole.

"The hot summer of 1921 in the Arctic, having melted much of the ice that is assumed to remain during the summer, will enable us to tell, even in flight, with ordinary visibility, whether it is land, ice, or water below us, and the mirage conditions that are so deceptive to explorers in viewing distant

objects from the surface ought to me minimized by lessened surface ice and our altitude in flight. Further, we shall get better photographs of surface flown over due to contrast of water, land, and ice. As the sun will be below our horizon for part of the time of the flight, it may be a surprise to learn that we expect to take still pictures of the Arctic surface and clouds, but it must be remembered that the moon will be high and full on the 16th, that we shall have the actinic glow of the Milky Way, the crest of the Zodiacal Light, the Gegenschien, a strong twilight glow all around that horizon, possible aurora, and with clear weather the light of the stars in that dustless air will be no mean actinic factor. Even if natural conditions do not help we shall get flash-light or 'flare' photographs by dropping the new flares that give intense illumination for five or more minutes over an area several miles in diameter. These flares will also be of great use in determining drift of the plane and speed and in showing us our way.

"The polar flight is purely a civilian, scientific, and technical enterprise, but I have been aided unofficially by the best genuine experts in all lines in the United States, and all of them have given of their best to make this American expedition a success. I have had long conferences with Capt. St. Claire Street, Air Service, Army, who was in command of the Army Alaska flight of 1920, and with Lieutenant Crumrine, one of the pilots who flew to Nome. Neither sees any great difficulties for resolute men in the way of the polar flight even as late as October. Nor does Brig. Gen. William Mitchell, in command of the First Aerial Brigade and chief of the flight section of the Air Service, who spent several years in Alaska and who knows the country well. My conclusions as to probable weather conditions have been approved by R. L. Lerch, of the Hydrographic Office. The best data available has been at my disposal from the Coast and Geodetic Survey and all the published reports of the *Bear* have been freely consulted.

CREDIT TO OTHERS FOR WORK.

"Here let me emphatically and gratefully say that were it not for the work of all the men who have given their best to aviation and Arctic exploration the polar flight would not be the practical effort that it is. Were it not for the work of Mitchell, in proving that a land plane could remain aloft for seven hours' flight over water and fly 700 miles with a single supply of fuel; of Street, in making the pioneer flight to Alaska; of Hartz, in flying a Martin bomber around the United States with a crew of five; of General Squier and Colonel Culver, in radiophone experimentation; of Glenn Martin, in aircraft design; of Hartney and Crumrine, in wide flying experience; of my son, Leslie Fairfax Naulty, in collating for years all available Arctic data and charting it and turning out most valuable maps, and of the work of every Arctic explorer from Parry, in 1819, through Franklin, McClure, Nordenskiold, De Long, Greeley, Nansen, Baldwin, Fiala, Nansen, Sverdrup, Peary, Abruzzi, Orleans, Kane, Hall, Nares, and the seldom accredited men who financed some of these explorers, and all the gallant men of all nations who risked all and gave all in surface exploration, and on whose material I have heavily drawn on what to do and what not to do, not even forgetting Vincent and Coffin, the designers of the Liberty air motor, which we all use, my polar air expedition would not be possible.

"Whatever credit may come to me, succeed or fail, and I do not expect to fail, will be due to me only because of what I have done in realizing the possibilities of the polar flight and as the last organizer and user of what all those who have gone before me have done. It is not a one-man job. A thousand men, in over a century of Arctic exploration, each have added their contribution to this supreme effort. Had they not gone before and partly blazed the way we should not now be able to attempt to open the last closed door of the earth—the northeast passage across the North Pole by air.

"I have been conducting experiments with analeptic, or step-up, radio transmission in Pittsburgh and feel that we can now be sure of a sending range of 2,600 miles by radio under fair conditions. With a dual set we shall be in hourly radio relay communication with the world during the flight and stops. If we get into trouble, our last radioed position will tell the relief party that will be dispatched at once just where we are, as we shall give our position every hour. 'If we don't hear from you for six hours, we will come roaring up after you with a squadron, if need be,' said General Mitchell to me. We can easily reach Nome radio station and may even be able to make the Maine stations in night sending.

EXPECTED TO FIND POLAR LAND.

"I certainly do expect to find land between Point Barrow and the North Pole in the region north of Grant Land, Garfield Coast, Cape Isachsen, Polynia Island, and Landsend, Parry Islands. In January, when Shackleton was in New York, he told me that my son's chart of 1917, copies of which he had access to, had convinced him that land or shallow water existed north of Beaufort Sea. As shown in that chart, the separation of the Bering current, Polar current, and Northwest Asian current, at about 72° north and 165° west, indicates land between the separation point of these currents and the North Pole. This is confirmed by the deeps sounded by Nansen in the *Fram* from 80° north and 130° east to 84° north and 70° east on the Asian side of the Arctic Ocean. "Trough deeps" like these always occur on the sea side of mountain ranges, as on our Pacific coast and off Japan and the Kuriles.

"If we do find such land, I shall name it President Harding Land. The melting of the ice, due to the past hot summer, will enable us to determine with certainty whether what we see is ice resting on shallows or actual land, and our photographs taken there with the best aerial photo apparatus will enable us to study wide ranges of country at our leisure after our return. All the recorded soundings, the set of the Arctic currents, the probable 'tailing out' of the North American and Greenland mountain ranges, and the effect of the rotation of the earth in 'ridging up' near the pole indicate land, and I am willing to go on record now that it exists.

CIRCUMAVIATION OF NORTHERN HEMISPHERE.

"If all goes well, we shall completely circumaviate the Northern Hemisphere when the flight is finished. We hope to start the polar flight from Washington, using a land chassis as far as Seattle. There we shall change the undergear to a special underbody which I have devised for the Arctic, by means of which we can make a 'landing' on ice or water. Anyone who knows what a Great South Bay 'scooter' is will know the form of my device. From Seattle we plan to fly up the Alaskan coast to Anchorage, and from there will cut across to Nome and on to Point Barrow. From Barrow the actual polar flight will begin. We shall fly due north, using the stellar constellations for direction, and will cut and observe all the unknown arcs of magnetic variation, inclination, and intensity between the North Pole and the magnetic pole. After full observations at the North Pole we shall fly to Spitzbergen; from there to North Cape, with a possible landing at Bear Island.

"From North Cape to Hammerfest, thence to the head of the Gulf of Bothnia, avoiding the dangerous winds of the Norway fiords by using the Swedish soft coast. We shall complete the trans-Arctic flight at Bothnia, as the Arctic Circle cuts just north of the head of the gulf, and we will have first cut the circle west just north of Nome. We shall fly down the Bothnia Gulf to the Baltic and to Stockholm, thence to Christiania, Copenhagen, Amsterdam, Hamburg, Brussels, Paris, and London. We hope to reach London by November 15.

"At that time the North Atlantic winds will probably be strong northwesterlies, and the same winds that have helped us so far will be against us for a return flight. We shall stow the *Inspiration*, which is the name of our plane, at London, return to Pittsburgh, and build our all-steel plane, and next year we shall try to complete the circumaviation of the Northern Hemisphere with the *Inspiration*, providing she is still airworthy, by flying from London to Drogheda Head, Ireland; to Liverpool; to John O' Groats, Scotland; to the Orkneys; to the Faroe Isles; to Iceland; to Greenland; down the Greenland coast to Cape Farewell; across Davis Strait to Labrador; thence to the mouth of the St. Lawrence; up the St. Lawrence to Lake Champlain; down Champlain to the Hudson; to New York, my native city; and finish at Washington, on the Potomac, as a seaplane.

PLANS FOR 1922 AND POST OFFICE AT POLE.

"If for any reason or combination of preventive conditions we are unable to make the polar flight this year, I shall build an all-steel plane at Pittsburgh this winter, equip it with two Liberty motors, and get away as early as possible next year. I want to make the polar flight this autumn, as the conditions are now most favorable, and we will do all possible to take off. Deo volente, we can make Point Barrow in a week from Washington, and we can shave the time of start, if the weather holds, from the States up to the middle of October.

"I shall take letters from leading men of the United States to leading men of Europe, and hope to postmark them 'North Pole.' We will send radios to friends from the North Pole, but the first one of these will be to little Alexandra, the daughter of a friend, who was the first to be promised such a message when the plans of the polar flight were first made known.

"Mascots? None whatever. We shall rely wholly on the providence of God, earnest and thorough human preparation, a first-class equipment, and the benignity of Mother Nature in

the north. No rabbit's foot, dogs, cats, or goats for us. Superstition and science are not compatible."

In the discussion of Arctic flight routes, it must not be forgotten that Japan by air is not so far from the Arctic, and that she has a strong and well-developed air service at the present time. Arctic air bases would be of use to her. We are going to try for the trans-Arctic flight crossing this year. It takes more than a plane on board a ship steaming to the north waters to make a transpolar or trans-Arctic flight.

PRESIDENT HARDING ON AVIATION.

That transit and traffic by air is not merely the pet hobby of a few enthusiasts is indicated by the following letter written by President Harding a few days ago to an aeronautical organization in New York, with which I close. President Harding's letter reads:

"It is a real distinction to America to be known as the birthplace of the airplane; it should be our concern that this art shall not languish but that in its practical application we should lead the world. An amazing development will take place in the near future in the utilization of the air as a medium of transport and communication. As a Government we are aiming to provide this art with the necessary guaranties of law, and with such facilities as may be possible through the encouragement of airways and terminals."

Yours truly,

EDWIN FAIRFAX NAULTY.

LAWLESSNESS IN AMERICA.

Mr. MYERS. Mr. President, on the 27th of last month there appeared in the Kansas City Times an editorial on the subject of lawlessness and crime in the United States to-day and general disregard of constituted authority. The editorial is very pertinent and is entitled "What of America?" It is one of the best editorials inspired by the horrible Herrin, Ill., massacre that I have read.

So far as I can see, there is no indication of any intention on the part of the officials of the State of Illinois to mete out any punishment to the perpetrators of that terrible crime. No apparent step in that direction has yet been taken and the strange neglect of the Illinois authorities is already bearing fruit. It has borne fruit this week in a lawless attack on peaceful workingmen in West Virginia, in which there was loss of life on each side. So long as the terrible crime committed at Herrin against life and constitutional guaranties is allowed to go unpunished, in my opinion it will bear much more fruit of the same kind.

This editorial is short and contains so much food for serious thought that I ask leave to have it printed in the RECORD, as a part of my remarks, in 8-point type.

There being no objection, the editorial was ordered to be printed in the RECORD, in 8-point type, as follows:

WHAT OF AMERICA?

They have buried their dead in Illinois, and American civilization is composing its face to that bland expression that has come to be its main reliance against all questioning, all charges, and all doubts.

But questioning and doubt are not buried. They can neither be shot to death nor assured by the smooth countenance of society through whose hasty make-up show the scars and ulcers of a raging disease.

Americans must answer the question, What of America?

It is being asked to-day all over this broad continent; asked by Americans; asked in shame, humiliation, and fear. Their country, their democracy, their laws, institutions, and civilization are under indictment and the indictment goes unanswered.

Only the other day we sent the flower of our young manhood across the seas to fight for liberty. Did we send them to the right place? Was our liberty secured on those European battle fields, or is it here at home that it faces an enemy in arms?

Obedience to law is liberty. So stands it written over the door of our courthouses. Can Americans read that solemn injunction and fail to acknowledge to themselves that tested by it there is no liberty in America?

There is no liberty where there is no law. There is no liberty where there is no protection for life or property. There is no liberty where there is no respect for human rights, where justice can not be invoked both for the security of society and the punishment of its enemies.

What of America?

While that murder was being done in Illinois a court and jury were delivering the judgment that no crime was committed when the public funds of that State were diverted from the public treasury.

Last year in London, a city of 7,000,000 people, there were nine murders. In Chicago there were 105. In every American city known criminals walk the streets unmolested. In every American city crime goes unpunished, criminals walk unscathed from the dock and amid public plaudits while bold graft and flaunting vice enthroned in every political place bow graceful and pleased acknowledgment.

What of America?

Rich, luxury-loving, money-grubbing, politically corrupt, lawless America. Land of liberty, land of sacrifice, land of soldier dead, of patriot devotion, of patriot ideals sealed on so many heroic fields, watched over now by no spirit of America, but only by the cold, inanimate monuments that are America's last remaining sentinels.

The most lawless country in the world. A country of universal cynicism, skepticism, and inhuman materialism. A country that raises a stately memorial to Abraham Lincoln and forgets or openly jeers at his teaching. A country where class hates class and class arms against class, shooting and lynching and burning and dynamiting while the law looks on and the public is so indifferent that it even looks away. A country that throws open its gates to alien criminal and alien lunatic, to anarchist, bomber, and hired assassin, and where few Americans are born, few vote, and few lead.

Land of shotgun, dagger, and bomb—America! Land of lawless might, of cruelty, injustice, and ribald laughter; of sneers at morality, winks at patriotism, and open admiration at triumphant wrong.

What of America?

What of its liberty and laws, its beliefs, faiths, sobriety and gravity of thought and action that were the America of old? If this Republic could not endure half slave and half free, can it endure half law-abiding and half lawless? Is there no leadership left to this land, on which so much of the last hope of humanity is fixed, to point out the course it is traveling and to call upon it with the voice of a Washington or a Lincoln or a Roosevelt to stay?

What of America?

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HARRELD:

A bill (S. 3857) authorizing the erection of an addition to the Federal court and post-office building, Oklahoma City, Okla., and for other purposes; to the Committee on Public Buildings and Grounds.

By Mr. STERLING:

A bill (S. 3858) to define butter and to provide a standard therefor (with an accompanying paper); to the Committee on Agriculture and Forestry.

By Mr. CALDER:

A bill (S. 3859) for the relief of James R. Hawkins; to the Committee on Claims.

By Mr. FRELINGHUYSEN:

A bill (S. 3860) for the relief of Hyman Wechsler; to the Committee on Claims.

By Mr. NEWBERRY:

A joint resolution (S. J. Res. 229) authorizing the Federal Reserve Bank of Chicago to enter into contracts for the erection of a building for its branch office in Detroit, Mich.; to the Committee on Banking and Currency.

STABILIZATION OF SILVER.

Mr. KING. Mr. President, if I may be pardoned for injecting an irrelevant matter, recently a meeting was held by the mining interests of the West. A great congress convened at Denver, Colo., on June 22 and remained in session until June 28. At that congress the following resolution was adopted, and it is of such national, if not international, importance that I feel that it should be brought to the attention of the Congress and referred to the appropriate committee, and in that manner brought to the attention of the country. The resolution reads:

Whereas this conference believes the rehabilitation of business and finance in Europe, with consequent benefit to the entire world, will be expedited by the increased use of silver for monetary purposes; and

Whereas under existing conditions international transactions in silver are subject to private manipulation, thus frequently setting aside the law of supply and demand, and thereby adversely affecting alike the producers of silver and those who otherwise could and would use it in greatly increased quantity, to their own advantage and to the advantage of all business and industry here and abroad: Therefore, be it

Resolved, That Congress be, and hereby is, respectfully urged to consider the subject of international stabilization of silver at an early date.

Mr. President, I ask that the resolution which has been forwarded to me be referred to the Committee on Banking and Currency.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KING. Mr. President, I have no desire to precipitate any discussion at this time in regard to bimetallism, although the chaotic condition of the world's currency has led many economists and writers upon fiscal policies to reexamine the question of bimetallism or at least the question as to the function of silver in the monetary system of the world. The awakening of the Orient, the certain increase of trade and commerce between India, and China, and Japan, and the nations of Europe and America, emphasize the importance of what may be denominated the silver question. Silver has been and will continue to be employed in the Orient for monetary uses; indeed, it is practically the only money in circulation in most regions of the Orient.

The prosperity of the Orient and the development of trade and commerce among the peoples of Asia largely depend upon silver. If the use of silver should be restricted or its value measured by domestic products greatly changed, undoubtedly the reaction would be very great and the results could not be fully anticipated. The United States as a producer of silver is interested in the price which it will bring. It is interested in the place which silver shall occupy in the monetary system, not only of the United States but of the world. It seems manifest that with the expiration of the Pittman Act the price of silver produced in the United States will fall much below the dollar mark, which now is the price of an ounce of silver. A great depreciation in the price of silver would be injurious to the West. Indeed, it is difficult to determine the effects that would flow therefrom, not only to the West but to the entire country.

The resolution which has been read is temperate in language, admirably phrased, and contains a sound recommendation. I sincerely hope that the Committee on Banking and Currency will fully investigate this important matter and make some recommendation tending to secure the result suggested in the concluding paragraph of the resolution.

FUR-SEAL FISHERIES.

Mr. HITCHCOCK. Mr. President, some time ago I introduced and the Senate passed a resolution calling upon the Secretary of Commerce for certain information concerning the sale of sealskins from the seal herds of the Pribilof Islands. A report was made something over a month ago and referred to the Committee on Commerce, of which the Senator from Washington [Mr. JONES] is chairman, together with the draft of a bill which proposes to annul the contract under which the Department of Commerce is acting at this time. I understand the Senator from Washington has not been able, on account of other duties, to take up the matter for investigation, but I want to call attention at this time to the very serious nature of the delay.

The three-cornered treaty by which the killing of seals at sea was stopped was followed by legislation, and under that legislation the United States Government now kills all the seals which are to be killed on the Pribilof Islands. The old commercial contracts were done away with. It was intended that the United States should have the profits from the seal killing. Unfortunately, however, some three or four years ago a contract was made by the United States with a firm in St. Louis for the dressing of the sealskins, and since that time that company, rather than the Government of the United States, appears to have been making the profits out of the sealskins.

I have before me a tabulated statement with reference to the matter. The statement shows that the United States Government killed 23,555 seals on the island in the year 1921. The gross receipts from the skins amounted to $722,000, in round numbers. The cost of dressing, brokerage commissions, cost of the plant on the island, and so forth, amounted to $480,000. So the net receipts were only $241,000 from the 23,000 valuable sealskins, or a net result of only $10.28 each. From that $10.28 the United States Government had to pay 15 per cent to Canada and 15 per cent to Japan, under our treaty, amounting altogether to the sum of $90,000. In 1920 the result was about the same. We received $715,000 gross sales. The expenses were $442,000, largely to the company in St. Louis. The net receipts were only $273,000.

The trouble is, as I find the report shows, that the Government of the United States is paying something like $20 per skin to the St. Louis company for dressing the skins, and after that performance is gone through with the skins do not sell for more than they formerly sold for without any dressing at all.

That is not all. It appears that several thousand skins every year—and the figures I believe show that last year there were something like 3,000 of them—after being dressed at a cost of something like $20 per skin, sold at less than the dressing cost. In some cases they sold for only 50 cents or a dollar each. So that the Government of the United States lost on each skin in those cases almost the entire cost of the dressing. It received from the skins in 1919 $2,500,000.

I think it is high time we had some explanation of why 23,000 skins realized a gross amount of $2,500,000 in 1919, while in 1921 23,000 skins only realized a gross amount of $722,000. The net amount which the Government received in 1919 for 23,000 skins was over $2,000,000, while the net amount we received from 23,000 skins in 1921 was only $241,000. I think we should find out whether comparatively worthless skins are being brought down from Alaska, and, after the Government pays $20 each for the dressing of those skins, they are sold for only a few dollars per skin, at a very large loss to the Government. It is very evident that the company in St. Louis is receiving between $400,000 and $500,000 a year for dressing the skins and that the net amount which the Government receives after that is very much less.

Mr. SPENCER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Missouri?

Mr. HITCHCOCK. I yield.

Mr. SPENCER. I think the Senator from Nebraska is mistaken about some of the facts. In 1919, when the $2,000,000 result was reached from the sale of the skins, the skins were dyed by the St. Louis company and they were sold by the St. Louis company. The reason for the small amount derived from the 1921 sale, as my information is, was that the 1921 sale was of inferior skins which had accumulated for some years, some of them worthless, all of them not up to first class, and it was not by any means a normal sale. The cost of dressing and dyeing has not been greatly changed. The cost of the dyeing and dressing has continued approximately the same.

The profit to the Government since the St. Louis concern took over the dressing and dyeing has been out of all proportion greater than it ever was before, and in addition the dyeing and dressing is being conducted in the United States, whereas before it was conducted in England.

I may say, merely by way of information, that the firm under whose auspices this was done has practically gone bankrupt. The Gibbons & Lohn Dressing & Dyeing Co., who did the business, were owned by the International Fur Exchange, which failed a year or two ago for several million dollars. For years the dyeing concern operated at a constant loss, but my information is that now there is some profit in the dyeing of the skins, the details of which I do not have at hand. I do know that the price paid for dressing and dyeing is only a fair price, and that the United States Government is receiving a return from its sealskins many times greater than when the Government sold only the raw skins which were by the purchasers sent to London for dressing and dyeing.

Mr. JONES of Washington. Mr. President, I agree with the Senator from Nebraska that the matter ought to be investigated. I have been trying to bring about a meeting of the committee and to have a hearing upon the subject. I think matters are in shape so that we can have a hearing some time next week, and I have planned to call the committee together some time next week to give those interested in the matter an opportunity to appear before the committee.

Mr. HITCHCOCK. I am very glad to hear that. I feel personally a deep interest in the subject. I was the author of the amendment which was ingrafted upon the legislation, carrying out the treaty with Great Britain, Japan, and Russia regarding the killing of seals by pelagic hunting. I introduced the amendment, and fought it through the Senate, providing that for 10 years this herd of seals should be allowed to increase and that no killing should occur there. We finally compromised with the House of Representatives on a closed season of five years, and the result is that the herd, which had diminished to something like 100,000 seals, has now gone up to nearly 1,000,000. It is a valuable asset to the United States. At the present time sealskins sell in the market at more than they sold for a few years ago; yet the Government is not realizing one-tenth of what it realized in 1919 for the same number of sealskins.

Mr. SPENCER. Mr. President, will the Senator from Nebraska allow me to interrupt him?

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Missouri?

Mr. HITCHCOCK. I yield.

Mr. SPENCER. The Senator from Nebraska does not mean to intimate that the Government in the last 5 or 10 years, during which the St. Louis concern has been dyeing and dressing those sealskins, has not received many times more than it ever received under the old arrangement?

Mr. HITCHCOCK. Yes.

Mr. SPENCER. The Senator, as I understand, is confining himself to the difference in proceeds between the years 1919 and 1921, and that difference is occasioned as I have indicated.

Mr. HITCHCOCK. The Senator from Missouri is not entirely correct. The Government of the United States had two contracts with commercial companies for the killing of seals, but they were canceled by legislation which was put into effect in 1912, I think. Prior to that time, however, the Government of the United States realized out of those skins between $9 and $10 per skin, and this year the Government only realized $10.28.

Mr. SPENCER. What the Senator states is true as to that exceptional year.

Mr. HITCHCOCK. There have been two exceptional years. I am calling attention to the fact that in 1921 23,000 skins only brought to the three Governments $221,000, or $10 per skin, whereas in 1919 they brought $84 per skin. Even during the World War, in 1918, $36 per skin was realized.

There is a cause for this decline, and the cause is that the company in St. Louis is making inordinate profits out of those skins. That company is allowed under its contract with the Commerce Department to send its agents to Alaska and to select the skins which are to be sent to St. Louis for dressing. During the last year thousands of those skins, when dressed at a cost of $20, sold for merely nominal figures, sometimes as low as 50 cents per skin. That company is responsible for sending those skins down to St. Louis, because the Government depends upon it to select the skins. The company made $20 per skin in dressing them, but the Government in some cases did not get 50 cents a skin out of them.

Mr. SPENCER. Will the Senator from Nebraska yield to me?

Mr. HITCHCOCK. Yes.

Mr. SPENCER. That is entirely true in that exceptional year when they were getting rid of a job lot that had accumulated for years; but I may say to the Senator that the returns to the Government of which he has spoken so approvingly, of the large amount of $80 a skin and $40 a skin, were obtained when the St. Louis company was dyeing and sealing at precisely the same rates at which it is now dyeing and sealing. The decline was not due to any exorbitant rate secured by the St. Louis concern; it was not due to the contract which they made with the Government some years ago, which has been modified only in some negligible manner, but it was due to the difference in the market price of sealskins. In 1921 no sealskin sold for a high price, and the refuse naturally sold for a very low price.

Mr. HITCHCOCK. I am not going into an extended discussion now, but I am told by competent authorities that those skins will sell at as large a price without any dressing, simply in salt, as they will sell after the dressing by this company in St. Louis.

I am not holding the present administration responsible for the contract, which was made under a previous administration, but I say the contract ought to be abrogated. I believe it is an illegal contract. It is costing the Government of the United States at the present time hundreds of thousands of dollars a year.

Of course, the company in St. Louis for which the Senator speaks is making that money out of these skins. Its agents are authorized to select the skins in Alaska. Some of them are not worth dressing at all, but they have sent them to St. Louis and dressed them at an expense of $20 per skin to the Government, while, as I have said, they are then being sold for a nominal amount after that has been done. That practice ought to be put a stop to; and it ought to be put a stop to before the seals are killed and their skins sent down here in August and September. Therefore, I suggest to the chairman of the committee that the matter is urgent.

Mr. NELSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Minnesota?

Mr. HITCHCOCK. I yield.

Mr. NELSON. I can only say that I am heartily in accord with the views of the Senator from Nebraska. The old system of killing seals had reduced the seal herds in Alaska until there were only about 200,000 left. We had to adopt a closed season, and after great effort and much opposition we finally succeeded in securing the passage of a law providing that that season should be for five years. Under that law there has been a great increase in the seal herd in Alaska, and if the matter continues under the control of the Government, as it has been since the passage of the law to which I refer, the seal herd will continue to increase.

I discovered, however, at the time we were seeking to have that legislation enacted there was a great deal of opposition from certain persons in St. Louis, and particularly from a member of the President's Cabinet, who is still living at St. Louis. He threw all the obstacles possible in the way of securing the legislation and also in the way of the execution of the law after it was enacted. He did that to my personal knowledge. I had correspondence with him.

Under the present law, instead of sealskins being sent direct, as they were in old times, to London, where we got a good price for them, the skins are now sent to St. Louis, and a firm there, under the pretense of dyeing and dressing the skins, gets the lion's share of the profits. I entirely agree with the Senator from Nebraska that that scheme ought at once to be broken up.

Mr. HITCHCOCK. I ask unanimous consent to insert in the RECORD a tabulated statement showing the number of sealskins sold in 1913, 1916, 1917, 1918, 1919, 1920, and 1921; the gross receipts from the sale of those skins; the cost of dressing and other costs involved; the net receipts, the average net price per skin, and amounts paid to the Governments of Canada and Japan.

The PRESIDENT pro tempore. Without objection, the tabulated statement referred to by the Senator from Nebraska will be placed in the RECORD in connection with his address.

The statement is as follows:

Fiscal year.	Number of skins sold.	Gross receipts.	Cost of dressing, brokers' commission, freight, island plant, etc.	Net receipts.	Average price, net, per skin.	Canada and Japan's share under treaty, act 1912.
1913	5,691	$195,868.58	$116,000.00	$94,868.00	$16.65	[1] $26,476.00
1916	5,400	235,748.50	181,500.00	54,248.00	10.01	[2] 18,082.00
1917	9,339	379,392.00	250,750.00	128,642.00	13.72	[2] 42,880.00
1918	12,102	777,931.00	334,832.00	443,089.00	36.64	[2] 147,696.00
1919	23,907	2,533,547.00	518,350.00	2,015,296.63	84.20	[2] 649,362.21
1920	20,180	715,404.00	442,622.00	273,176.00	13.51	[2] 90,927.00
1921	23,555	722,060.00	480,146.50	241,913.50	10.28	[2] 90,521.00
	101,174					

[1] Undressed salt skins. [2] Machined, dressed, and dyed skins.

Mr. HITCHCOCK. I wish to say, Mr. President, in closing, that I was induced to bring this matter up at this time by reading from a misleading statement purporting to be an interview with the Assistant Secretary of Commerce, Mr. Huston. He states in the interview that—

> The net profit to the United States Government averages a million dollars a year.

As a matter of fact, as shown by the figures I have presented, the net profit to the Government of the United States does not aggregate at the present time $200,000 a year. If the Assistant Secretary of Commerce believed when he made that statement that the net profit to the Government was a million dollars a year it shows that he has no realization of what is being paid out for the cost of dressing under this very unfortunate contract. I am glad to hear the Senator state that an investigation will be begun next week.

DISTRIBUTION BY FEDERAL RESERVE BANKS OF A SPEECH MADE IN THE SENATE.

Mr. HEFLIN. Mr. President, on yesterday the Senator from Connecticut [Mr. MCLEAN] asked that the reports of the various Federal reserve banks in response to a resolution adopted by the Senate inquiring about the printing and distribution of a speech made by the Senator from Virginia [Mr. GLASS] be printed in the RECORD. Those reports are all in, Mr. President, and before giving consent for their publication I desire to submit a few remarks to the Senate.

I have repeatedly stated in the Senate that the speech of the Senator from Virginia was circulated at the instance of the governor of the Federal Reserve Board, whose official conduct was involved in the controversy. No information as to who ordered the speech printed and circulated came from the governor of the Federal Reserve Board. The governor of the Federal Reserve Board knew that the question was being asked here repeatedly: At whose instance was the speech of Senator GLASS being sent out by Federal reserve banks? I finally secured the adoption of a resolution by the Senate calling upon the Federal Reserve Bank of Atlanta to state to the Senate at whose instance it had circulated the speech. It

answered that it had circulated it upon its own motion and responsibility, but that Governor Harding, of the Federal Reserve Board, had merely advised that copies of the speech were available. That statement is not in keeping with the facts as reported by the other Federal reserve banks.

Finally, Mr. President, I succeeded in getting another resolution through this body calling upon the other Federal reserve banks to state at whose instance the speech of the Senator from Virginia had been circulated and who had paid for its printing and distribution. In response to that resolution most of the Federal reserve banks replied that Governor Harding had sent them a telegram advising that the speech be circulated.

I wish to read to the Senate a copy of the telegram sent by Governor Harding to each and every one of the Federal reserve banks. The telegram was sent out before any official of the Federal reserve banks had seen a copy of the speech delivered in this Chamber. The telegram was sent by Governor Harding two days before the speech was printed in the CONGRESSIONAL RECORD. The telegram is dated January 18, 1922, and reads:

> Think Senator GLASS's great speech defending Federal reserve system should be widely and promptly circulated. Government Printing Office will print special copies of it Friday, 20th, and additional orders should be given to-morrow. Printing Office estimates cost of copies at from 5 to 7 cents each. Please wire promptly how many copies your bank wishes.
>
> (Signed) HARDING.

Mr. President, here is a telegram practically ordering the Government officials of the Federal reserve banks to have printed and distributed a speech defending the Federal Reserve Board's deflation policy, and that order was sent by the governor of the Federal Reserve Board whose conduct was involved in the debate had in the Senate.

Mr. President, the governors of the Federal reserve banks were appointed to the positions they hold by Governor Harding and the Federal Reserve Board. Here is the head of the greatest banking system in the world sitting in the Capital of the Nation sending a telegram to each one of the governors of the 12 Federal reserve banks, not asking them, "Do you deem it advisable to circulate this speech?" not asking them if they think its circulation would be in keeping with the proprieties involved, but we find the governor of the Federal Reserve Board calling upon these banks to circulate this speech, not asking them whether they are willing to spend the money of the banks and of the Government in its printing and distribution, but telling them to send it out, and asking them, "How many copies do you want?" Oh, Mr. President, would that Old Hickory Jackson could come back now and see how our great Federal reserve banking system is being used as a bureau for political propaganda. Imagine him, if you please, permitting the governor of the Federal Reserve Board to order the officials of the Federal reserve banks to have printed and distributed, at the expense of these Government banks, a speech made in the Senate and which contained criticisms of the speech and position of another Senator in which he criticized and condemned the deflation policy conducted by the Federal Reserve Board.

Mr. OVERMAN. What would "Old Hickory" do?

Mr. HEFLIN. Why, he would remove Governor Harding, and by so doing greatly gratify nearly a hundred million of people. He would take the Federal Reserve Board and the Federal reserve banks out of partisan controversies and political activities.

I want the Senators on both sides who do me the honor to hear what I have to say to put themselves in my place for a moment, and see just how they would feel under these circumstances. If you, as a Member of this body, were trying to do your duty and make the truth known about a policy that had been employed by the Federal Reserve Board and that had wrought ruin in your section, and if you had spent months and months reading from the bulletins of the Federal Reserve Board itself, reading from the reports of the Comptroller of the Currency, who was himself a member of the Federal Reserve Board, giving the facts and the records that are indisputable, how would you feel to have Government banking officials with unlimited money print and circulate without cost to your opponent in the controversy, who attacked and criticized your position, a hundred and forty-odd thousand speeches, and send them throughout the United States?

Mr. President, most of these banks—in fact, practically all of them—say that this expense money was provided as all other expense money is provided, out of the earnings of the bank. I charge to-day that after dividends are paid and administrative expenses are met 90 per cent of that which is left of the earnings of these banks goes into the Federal Treasury. I take the position that these banks had no right to expend the money they did expend in circulating this speech, and that the chances are that 90 per cent of that amount was Government money which would have gone into the United States Treasury.

Let me read to the Senate what these Government bank officials did toward printing and distributing a speech made by one Senator criticizing and attacking the position of another Senator. This was done at the expense of Government banks and at the expense of the Government itself.

The Federal Reserve Bank of Philadelphia had printed 11,000 copies of this speech at a cost of $423.11.

The Federal Reserve Bank of Richmond, 10,000 copies at a cost of $286.99.

The Federal Reserve Bank of St. Louis, 15,000 copies at a cost of $585.39.

The Federal Reserve Bank of Cleveland, 7,200 copies at a cost of $203.32.

The Federal Reserve Bank of Chicago, 15,000 copies at a cost of $475.

The Federal Reserve Bank of Kansas City, 4,500 copies at a cost of $195.

The Federal Reserve Bank of Minneapolis, 9,500 copies at a cost of $277.85.

The Federal Reserve Bank of Dallas, 2,500 copies at a cost of $179.12.

The Federal Reserve Bank of Boston, 17,960 copies at a cost of $546.74.

The Federal Reserve Bank of New York, 23,275 copies at a cost of $728.42.

The Federal Reserve Bank of San Francisco, 20,000 copies at a cost of $681.21.

The Federal Reserve Bank of Atlanta, 6,500 copies at a cost of $108.69.

Total, 142,435 copies at a total cost of $4,690.84.

Mr. President, one of these banks computed the time of the employees of the bank in addressing, mailing, folding, and sending out these speeches. The banks generally replied that expenses incurred in distributing the speech were charged to the current expenses of the bank.

In giving costs of distribution, the amount paid for the printed speeches is given, the amount paid out for envelopes, and for postage.

In no instance is there any accounting for the time and labor taken by the employees of the banks in listing and typing names, in addressing envelopes, inclosing the speech and sealing the envelope, and in handling such a document in all its various stages from its receipt to its deposit in the mails. Some one had to do this work, and some one had to pay for it. Bank clerks do not work overtime without compensation, and they do not perform regular duties and extraordinary duties without some additional expense to their employers.

One deputy governor, reporting from the San Francisco district, recognizes the element of expense involved in the work described. He reports that 20,000 copies of the speech were ordered, that 12,200 were sent out through the mails, that 7,200 copies were sent out by parcel post or distributed locally, and that he has 600 copies on hand. Then he gives an estimate of the value of the time involved, "if an outside agency had been employed," as follows:

292 hours listing and typing names to distribute another Senator's speech free of cost	$146.00
83 hours addressing envelopes by typewriter to distribute another Senator's speech, made in a controversy with another Senator in the Senate of the United States	41.50
14 hours stamping envelopes, 2 hours addressograph, 27 hours inclosing	16.12
Total	203.62

The reports show that 142,435 of the speeches were sent out. If the modest expense ratio given in the estimate of the San Francisco deputy governor is a correct one upon which to figure, then the cost of the time of the bank clerks in handling the lists, directing the envelopes, attaching the stamps, sealing, and mailing would amount to $2,300. This, of course, should be added to the total expense shown to have been incurred by the banks in securing copies of the speech, envelopes in which to mail them, and postage. That expense—

Total	$4,690.84
Add time expense	2,300.00
Grand total	6,990.84

Or, in round numbers, $7,000, almost the salary of a United States Senator for one year, expended because of the Federal Reserve Board governor's order to circulate a speech defending the deflation policy of the Federal Reserve Board.

Mr. President, do Senators indorse that conduct? Was not the governor of the Federal Reserve Board violating the proprieties involving the duties of his office as intended by the law-

makers when he ordered the officials of the Federal reserve banks appointed by him to have printed and distributed the speech of one Senator assailing and criticizing the position of another Senator?

I want Senators to think seriously upon that question; and while it involves me personally—I am the man criticized and attacked in the speech that these people have circulated, at a cost to the Government and the banks of nearly $7,000—I want Senators to think how they would feel if they should make a speech on this floor attacking any policy, and somebody made a speech in reply to it and arraigned them caustically for the position that they took, and then these banks published and circulated nearly 150,000 copies of that speech in the United States. How would they think and feel upon that subject?

I hold that the governor of the Federal Reserve Board and the officials of the Federal reserve banks have no right to have printed and circulated at the expense of Government banks a speech made in the Senate against a Senator who has criticized the policies of the Federal Reserve Board. Can you imagine anything more dangerous and harmful?

Mr. President, the speech that was printed and sent out under the order of Governor Harding undertakes to reply to arguments that I made in a speech in the Senate. I ask your close attention, Senators, to what I am now going to read from the speech of Senator GLASS, which was printed and distributed by the tens of thousands under the order of the deflation governor of the Federal Reserve Board. Senator GLASS said:

> I pointedly deny that there was deflation of either regional reserve bank credits or any diminution of Federal reserve currency for the period of the appalling drop in prices of agricultural products. Instead of deflating credits and currency, the Federal reserve banks during the period of falling prices enormously expanded bank credits and increased the volume of circulating notes.

Here is what the Government's figures and records of the board itself show in refutation of what Senator GLASS said:

Loans, discounts, and bought paper held by all of the 12 Federal reserve banks May 28, 1920 (p. 748, Federal Reserve Board Bulletin of 1920), $2,938,031,000.

August 31, 1921 (p. 1240, Federal Reserve Bulletin of 1921), $1,527,255,000.

January 25, 1922, $932,882,000.

Contraction of credits by 12 Federal reserve banks, May 28, 1920, to August 31, 1921, $1,410,776,000.

May 28, 1920, to January 25, 1922, $2,005,149,000.

Listen, Senators: Contraction of Federal reserve notes in circulation May 28, 1920, to August 31, 1921, $625,555,000.

May 28, 1920, to January 25, 1922, $923,020,000.

There is the Government's record and the bulletin itself issued by the Federal Reserve Board, showing that the speech circulated by the order of Governor Harding is at variance with the facts in the case. Yet the speech they have circulated denies my position upon that, though the figures I gave were taken from their very records by John Skelton Williams, who was himself at that time a member of the Federal Reserve Board and Comptroller of the Currency of the United States. They have circulated that speech, denying these facts and figures, spreading misinformation at a cost of nearly $7,000, through the distribution of one hundred and forty thousand and odd copies of the speech in question.

Let me read another proposition in my speech which can not be refuted. There are many instances, but I will mention here just two, which clearly show how Governor Harding's deflation policy bestowed big favors on New York City, while it discriminated against and withheld financial aid from the people of the agricultural sections of the South and West. In the autumn of 1920 national banks in New York City were borrowing, in proportion to their total loans and discounts, three times as much from the Federal reserve system as all the 7,600 country national banks in the entire United States were borrowing at that time. In February, 1921, the Federal reserve system was lending to one bank in New York City three times as much money as 8 of the 12 Federal reserve banks were at that time lending on agricultural and live-stock paper to all their member banks in 28 States and parts of 5 other States, covering about two-thirds of the whole United States.

Senators, I am giving you the facts from the record. Yet the Federal Reserve Board is circulating a speech which bitterly criticizes me and defends its policy of deflation. It would not make any difference whether it was my speech or your speech, Senators; I take the position that this Federal Reserve Board has no right to circulate anybody's speech made in debate in this Chamber which involves charges of the board's bad faith or incompetency. What right have they to use the power of their positions to distribute the speech of the Senator defending their conduct when that speech contains criticisms of a Senator who has condemned their conduct? They have no right to expend the bank's money, they have no right to expend the Government's money, they have no right to expend anybody's money to circulate such a speech or to have anything at all to do with the distribution of a Senator's speech which attacks and assails another Senator's position. I do not care whether I made the speech or some other Senator made it.

I am going to fight this thing out to a finish. The Senate must go on record upon this question. I take the position that the Federal reserve banking system must remain free from partisan controversies and political activities. It has no right to send a telegram out to the banks through the Federal Reserve Board suggesting that my speech or any other Senator's speech containing criticisms of another Senator should be printed and widely distributed. This is the position I take, Mr. President, and I am everlastingly right in that position. There is going to be a record made upon this subject to look many a Senator in the face before 1924 is ended, if not in the campaign of 1922. If I can help it, I do not intend that this banking system shall be permitted openly, boldly, and brazenly to plunge into politics and go into the business of becoming a propaganda bureau to distribute the speeches of one Senator assailing and attacking the position of another Senator.

In its reply one of the banks said they had no thought of trying to injure me when it circulated the speech attacking me. They did not say that when they sent the speech out. They commended it and gave it wide circulation. Senators who heard the speeches of Senator GLASS and myself know that the situation grew right warm and the debate very caustic at times, and the Senator from Virginia used pretty severe language in his indictments of my position in trying to controvert what I had asserted, and I in return did likewise.

That was a matter for the Senator and myself to settle upon this floor. But when a great banking system, supposed to be free from political activities and partisan controversies, comes in and picks up and distributes the speech of one Senator assailing and criticizing the position of another Senator, it is wrong, Senators, and it ought not to be tolerated.

This governor of the Federal Reserve Board assumes responsibility for sending out that speech, and I want an expression of the Senate upon his conduct in this matter. Here is what Governor Harding says over his signature:

> The Federal Reserve Board assumes responsibility for commending this speech to the Federal reserve banks for circulation.

Mr. President, I hold that he violated the proprieties of his office, that he overstepped the bounds of the duties involved in his office, and that he transgressed all the rules of propriety which even touch remotely the duties of his high office. He had no business sending that speech out, or any other Senator's speech, involving a controversy between two or more Senators where he himself was on trial.

I had charged, and he can not disprove it, that he conducted a deflation policy that made millions of people poor and a few thousand people exceedingly rich. I have had letters even from the State of my good friend from Connecticut [Mr. MCLEAN] that agree absolutely with my position. I have received letters from people in every State in the Union who agree with my position.

I have a letter here which I received just yesterday from Idaho, in which the writer said he had read my speech very carefully, and agreed with me absolutely. He referred to the deflation policy of the Federal Reserve Board as an infamous policy, and I submit that where a matter had been up for consideration in this body and had been discussed for months, and two Senators, one on one side and one on the other, both enthusiastically contend that they are right in the controversy, the Federal Reserve Board did wrong when it took the speech of one Senator to that controversy and circulated it over the United States.

Here is the letter to which I referred. It is from Rexburg, Idaho, addressed to me, and reads:

> I have just finished a very careful reading of your speech on the Federal Reserve Board's deflation policy, which you so kindly sent to me—

He wrote me and asked me for it, and I sent it to him—

> recently, and it has cleared up a dozen difficult problems which have vexed my mind since the board adopted that policy. Your speech is a wonderful exposition of the infamy of that policy, and your arguments can not be answered.

I have scores—I have hundreds—of letters like that from citizens in the United States, and I read that much this morning and call this to the attention of the Senate for the purpose of showing that people are divided in opinion as to who is right, the Senator from Virginia or myself; and Senators in this Chamber are divided in opinion as to who is right. In the face of that fact, I hold that the Federal Reserve Board and

the Federal reserve banks have no right to take up the speech of one Senator and have it published and widely distributed at the expense of the banks or at the expense of the Government; and the Government would get part of this money, as I said, after expenses and dividends are paid.

I say to the Senate that 90 per cent of that money belonged to the Government, and out of $4,690.84 these banks expended $4,221.75 which belonged to the Government of the United States. Have we not come to a pitiful pass when a banking system has grown so big that the head of it can sit in the Capital and defy the Senate, pick out the speech of one of its Members defending the position of the Federal reserve banks and assailing the position of another Senator, and circulate 140,000 copies of the speech?

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Connecticut?

Mr. HEFLIN. I yield.

Mr. McLEAN. The Senator from Alabama admits, I assume, that his speech, or his speeches, delivered frequently, were attacks upon the Federal Reserve Board?

Mr. HEFLIN. Criticizing the policy of the board, arraigning the policy and the members of the board.

Mr. McLEAN. That being so, I would like to have the Senator's opinion as to what rights the Federal Reserve Board would have if they desired to controvert or dispute those attacks?

Mr. HEFLIN. What rights?

Mr. McLEAN. Yes; what rights would the Federal Reserve Board have to answer the Senator from Alabama? For instance, would they have the right themselves to prepare a reply and circulate it?

Mr. HEFLIN. They did that. The governor of the board frequently gave out statements trying to refute things I had said, and I never objected to it.

Mr. McLEAN. The Senator concedes that they had that right?

Mr. HEFLIN. To give out statements to the newspapers, of course.

Mr. McLEAN. Does the Senator concede they would have the right to employ counsel to advise them with regard to the matter if the attack were a serious one, or secure the assistance of anyone outside of the membership of the Federal Reserve Board? Does the Senator think they would have that right?

Mr. HEFLIN. They might, if the charges were serious enough—if they were on trial, if they were indicted, if impeachment proceedings were pending against them; and such proceedings ought to be pending against the governor of the Federal Reserve Board now.

Mr. McLEAN. I think the Senator from Alabama has repeatedly stated that he thought the governor of the Federal Reserve Board should be removed. That is a pretty serious declaration to be made by a Member of this body. I would like to ask the Senator if he thinks the governor would have the right to send out a reply which he himself prepared or in the preparation of which counsel might have assisted, or a reply including a speech delivered on the floor of this Chamber by another Senator of the United States?

Mr. HEFLIN. Surely the Senator does not mean to insinuate that the Federal Reserve Board helped to prepare the speech which was delivered here in the Senate by the Senator from Virginia, does he?

Mr. McLEAN. No; not at all. I am asking the Senator what difference it makes whether the Federal Reserve Board itself prepared the reply or whether it invoked assistance from outside including the speech delivered by a Member of this body? What difference does it make?

Mr. HEFLIN. The Senator from Connecticut does not seem to get the distinction which I am trying to make. I am taking the position here that the board had no right to take a speech made in this body, where one Senator criticized and assailed the position of another Senator, and circulate that speech which contained attacks upon another Senator.

Mr. McLEAN. It does not cost any more to send out a reply delivered by a Senator of the United States than it does to send out a reply which they themselves might prepare. I assume one of the main objections which the Senator from Alabama is urging against the course is that the circulation of the speech cost a certain amount of money. The Senator will admit that it would not cost any more to send out the speech of the Senator from Virginia [Mr. GLASS] than it would to send out the board's own reply?

Mr. HEFLIN. Mr. President, the Senator does not get the point. I hope that other Senators have not failed to understand me as the Senator from Connecticut seems to have done. He does not seem to get the point that in this Chamber where debates occur is the place to settle these questions. When one Senator assails another, the other Senator has an opportunity to answer him on this floor. But when the Federal Reserve Board takes the speech of one Senator, assailing and criticizing the position of the other Senator, and circulates thousands upon tens of thousands of copies of it, and then refuses to give to the other Senator the list of those to whom it was sent, in order that he may send them his speech so that the recipients may read both sides of the matter, the Senator can readily understand the position I take. The American people are going to understand it and they are going to condemn this act, and I am going to call upon the Senate of the United States to condemn it.

Mr. McLEAN. It seems to me the Senator from Alabama in the position which he takes practically denies freedom of speech to the members of the Federal Reserve Board——

Mr. HEFLIN. Not at all, Mr. President.

Mr. McLEAN. Because if they are entitled to make any reply at all they are entitled to embody in that reply quotations from any source which they desire. I can not see any difference or distinction between their right to quote the opinion of a private individual and their right to quote the opinion of a Senator of the United States.

Mr. HEFLIN. Mr. President, I am not responsible for that. The Almighty alone is responsible for that condition in the intellectual arrangement of the Senator from Connecticut.

Mr. McLEAN. The Senator would not expect that they would include the speech of the Senator from Alabama. I take it that the Senator from Alabama, when he circulates his reply, will not include the speech of the Senator from Virginia.

Mr. HEFLIN. No. When people have asked for both speeches I have referred them to the office of the Senator from Virginia that they might have both speeches, but of course I am not able to send my speech out and pay thousands of dollars to send it to those who have read his speech, which was circulated at an expense which amounts to the equivalent of the salary of a Senator for one year. Here we are with this Federal reserve system, with this dreadful power, which is being turned into an agency of destruction and political propaganda, spending the Government's money, spending the banks' money to circulate the speech of one Senator attacking and criticizing the speech of another Senator who incurred the displeasure of the Federal Reserve Board, and a Government institution is being used to injure a Senator who has dared to criticize their conduct.

The Senator who is attacked in that speech is denied even the names of those to whom that speech was sent, and the Senator from Connecticut is more responsible for the denial than any other Senator in this Chamber.

Mr. McLEAN. The Senator from Connecticut is perfectly willing to take the responsibility for his position in the matter.

Mr. HEFLIN. I am satisfied of that.

Mr. McLEAN. The Senator has now returned to the question of expense. I thought the Senator from Alabama had admitted that the Federal Reserve Board would have the right to use their funds for the purpose of replying to an attack which involved moral turpitude or malfeasance in office of a serious nature, resulting in a demand on the part of a Senator of the United States that the governor of the board be removed from office. I understood the Senator to say the board would have the right to send out a statement in reply to such an attack.

Mr. HEFLIN. The board has a publicity propaganda going on all the time. They have a paper of their own, the Federal Reserve Bulletin. They print every utterance or every speech that the governor of the Federal Reserve Board makes if he wants it printed. That bulletin goes out to the business men of the country in every State of the Union. Why, they have the means of sending statements all over the country. The advisory council issued a pamphlet here months ago trying to answer my position, without mentioning my name and others, and mailed that broadcast. That is another way.

Here is a pamphlet [exhibiting] which I have just received entitled "Better banking under the Federal reserve system. A short story without figures. National Metropolitan Bank of Washington, D. C. Only national bank in the District of Columbia a member of the Federal reserve system."

The author has reference in this pamphlet to the year 1920 and is trying to answer in certain places some of the arguments I have made with reference to the deflation policy of the Federal Reserve Board. Ways to answer? There are thousands of ways. Who paid for the editorials which have

been written in the newspapers from time to time attacking my position wherever the Federal reserve bank has its influence?

Mr. McLEAN. Does the Senator want Congress to enact a law prohibiting the Federal Reserve Board or its members from replying to the attacks made upon their official acts?

Mr. HEFLIN. Not at all. I have said that they have a right to do it, but I am trying to get it into the head of my good friend from Connecticut that there is a difference in their having the National Metropolitan Bank of Washington to issue a pamphlet, or having another pamphlet issued by some other bank, or putting their statements in the Federal Reserve Bulletin, and, on the other hand, taking up a speech made in the Senate assailing the position of a Senator and sending that out over the country. I say they have no right to do it. When they do that they are transcending the bounds of their duties as Government officials and using their power to discourage and injure those who dare to criticize their conduct. The statement gotten out by the Metropolitan Bank of Washington said:

Moreover—

Talking about the Federal reserve system—

it provides the entire country with a great reservoir of credit from which farm and range, forest and mine, factory and store, may receive assistance in producing and marketing all the innumerable goods and wares which go to make up American commerce, industry, and agriculture.

That is the purpose for which we created the system. That is what it failed utterly to do in 1920 and in 1921. I have been attacking it for months and shall continue to strive to give the truth to the country with reference to that policy.

Mr. President, I am not objecting to the Federal Reserve Board officials giving out statements over its name about their policy answering my position. I expect them to do it if they can. But let them answer through the Federal Reserve Bulletin and newspapers and letters and speeches, as they have been doing. They have the opportunity through a man who is on the Federal reserve pay roll, now editor of a big daily, who closed his columns to and stopped printing material sent him by the president of the American Cotton Association, whose name I shall mention in this Chamber very soon. Talk about free speech and means of publicity! They have an expense fund and a pay roll there through which they can take care of all that.

I introduced and had passed a resolution calling on Governor Harding to know if they had a publicity fund, and he said "no." How did they get these things published? They do it by putting men on the pay roll. They call it doing work for the system, but really having them do newspaper work, and the banks and the Government pay for it. They have some fellow doing what they call economic research work, and he gets big publicity for the board.

Mr. McLEAN. Mr. President——

Mr. HEFLIN. I yield to the Senator from Connecticut.

Mr. McLEAN. The Senator just stated he had no objection to the Federal Reserve Board sending out a statement in reply to his attack, if done over its own signature. I want to get at just where the Senator would draw the line. Would the Senator object to the inclusion in that statement of quotations from speeches of Senators?

Mr. HEFLIN. That would depend on what it was they quoted. I should not favor permitting these Government officials to circulate at all the attack of one Senator upon another Senator.

Mr. McLEAN. Will the Senator please answer my question? Would the Senator object to the inclusion in that statement of quotations from other sources?

Mr. HEFLIN. Not if they personally paid for the postage and the matter circulated did not carry the criticisms of one Senator against another Senator.

Mr. McLEAN. I am talking about the principle; not the expense.

Mr. HEFLIN. The Senator does not seem ever to get the point I am making.

Mr. McLEAN. I get the point; but I would like to know just where the Senator would draw the line.

Mr. HEFLIN. I want the Senator to draw the line right here. When one Senator in this Chamber in debate arraigns the position of another Senator and criticizes the other Senator, and then the Federal Reserve Board takes that speech and circulates it, it is violating the proprieties that surround the duties of its office. Now, if the Federal Reserve Board itself wants to say in an article in the Federal Reserve Bulletin, in public speech, in newspapers, as it has done repeatedly, that "Senator HEFLIN is wrong in this contention and he is wrong in that," I have no objection on earth to it. If the Federal Reserve Board wants to write a letter and mail it out to anybody and everybody saying, "Senator HEFLIN's position is wrong in this respect and that," I would have no objection. But when the Federal Reserve Board singles out the speech of one Senator defending its destructive deflation policy and criticizing and assailing the position of another Senator and mails that broadcast and spends thousands of dollars to do it, part of which I believe is Government money, I protest against it, and I ask the judgment of this body upon it.

I ask every man who sustains that action to confront his constituents and acknowledge that he voted to permit the Federal Reserve Board and banks to go into politics and to use the power of their offices to circulate the speech of a Senator pleasing in their sight when that speech contained criticisms against a Senator that they desired to punish and injure——

Mr. McLEAN. Mr. President——

Mr. HEFLIN. I yield to the Senator from Connecticut.

Mr. McLEAN. The Senator says he wants the judgment of the Senate on something. I am trying to get at just what he wants. Now, he admits he is willing that the reply issued by the Federal Reserve Board should contain a denial of the accuracy of the statement which was made by the Senator from Alabama. Is the Senator willing that that same statement should contain a statement of any other Senator replying to the Senator from Alabama?

Mr. HEFLIN. I will say this to the Senator from Connecticut: I used some pretty caustic language toward the Senator from Virginia in my reply here, and I do not think it would be right for the Federal Reserve Board or any other Government institution to circulate that speech. I do not think it would be fair to the Senator from Virginia for them to do it. If I want to circulate my speech, or if the Senator from Virginia wants to circulate his speech, that is my business and his business; but it is not for Government officials who are appointed for the specific purpose of running a great banking system and staying out of political controversies, to take my speech or the speech of the Senator from Virginia and circulate it. I would submit that proposition to the judgment of the Senator's own fair-minded constituents and be willing to abide by their decision on this point.

Mr. McLEAN. As I understand the Senator, he is willing that this reply should contain the opinion of anyone outside the Senate of the United States, but his contention is that the Federal Reserve Board would have no right in their reply to a vicious attack made by one Senator to include a statement made by another Senator on the floor of this Chamber? Is that right?

Mr. HEFLIN. Replying to that Senator's speech?

Mr. McLEAN. That is the position which the Senator takes?

Mr. HEFLIN. I have tried to state my position five or six times.

Mr. McLEAN. If that is the Senator's position, then, I have nothing further to say.

Mr. HEFLIN. I want to get my contention, if it is possible, clearly in the Senator's head. I am having great difficulty in doing it, however. It is a pretty hot day, but I am going to make another attempt.

Mr. McLEAN. It seems to be rather difficult for the Senator from Alabama to understand a very simple question.

Mr. HEFLIN. I think I understand the Senator and his position perfectly.

Mr. McLEAN. I am asking a question which I think is susceptible of a categorical answer, but up to date the Senator has avoided a reply.

Mr. HEFLIN. In order that there may be no mistake about my position, I am going to state it again. If the Federal Reserve Board should prepare an address of its own and mail out that address to the same people to whom the speech of the Senator from Virginia was sent, I should have no objection; if the Federal Reserve Board should write letters to the same people who received that speech disagreeing with the position taken by me in my speech, I should have no objection to that course; but I draw a distinction, and I believe that every Senator in the Chamber, save my friend from Connecticut, draws with me the distinction between that course and the Federal Reserve Board taking the speech of any Senator in this body in controversy with me or with the Senator from Connecticut and assailing the position of the Senator from Connecticut or my position and sending that speech out to the same people to whom the board had written letters or mailed its own statement. I hope the Senator can draw with me that distinction. In one instance the board would send out its own statement, and in the other it would send out the speech of a Senator in the United States Senate suggesting his views, giving the doctrine as he understands it, and replying to the position assailing the attitude of another Senator.

Such action on the part of the Federal Reserve Board is wrong; it is unfair; it is unjust.

Senators, some of you do not seem to understand it, but there is an awful spirit of unrest not only amongst the masses but also amongst the rank and file of the honest bankers in this country. I told the Senate the other day about a bankers' convention which was held out in the West, where a friend of Governor Harding secured the indorsement of Governor Harding through a resolution adopted by the convention, but when the bankers got home many of them wrote to a Republican Senator of this body and protested against Governor Harding's reappointment. The power of the banking system, which was intended to meet the business needs of the country and to prevent hard times and panic, was recently used to kill business in the South and West, and is now by intimidation seeking to have the governor of the Federal Reserve Board indorsed by the men whom he through deflation has pillaged and plundered.

I want to read, Senators, some excerpts from a letter from a national banker to the governor of one of our Federal reserve banks. I shall not give the name of the bank, though it is a national bank. The letter reads:

> The * * * National Bank hereby acknowledges receipt of your letter of the 6th instant, stating—"It has always been my sincere belief that in any organization the sane and sure way to achieve the welfare of the whole is to cultivate—

Listen, Senators—

> among the component members a spirit of cooperation and mutual understanding," and requesting calls from any of its officers who may have occasion to visit—

I will not name the place—

> In reply thereto permit me to say that this fine sentiment and manifestation of business friendship comes too late.
> The * * * National Bank—

Naming it—

> through its more than 50 years of existence, coming in contact and having relations with great numbers of people and institutions, can not recall an instance where it received as bad treatment as it has received from your institution, and that notwithstanding the fact that it is one of your largest stockholders. It is not necessary to review the facts; they are well known to you.
>
> Yes; the law compels us to do business with you. It places us in a state of virtual servitude to you, and you took advantage of the fact.
>
> If we had any choice in the matter, we would, without hesitation, sever our connection with you entirely, but as we can not, we can only bide our time, hoping that there is still some justice left in this world, and that in the fullness of time would be meted out.
>
> In the meantime, it would be pure hypocrisy for any official of ours to be paying you friendly visits.

Think of a great national bank which is a big stockholder in a Federal reserve bank writing a letter like that to the governor of the Federal reserve bank, its spirit crushed out, complaining of its ill treatment, and stating that if it could it would cease its relationship with the particular Federal reserve bank. Mr. President, the trail of that deadly deflation serpent is still visible, not only in the business of agriculture but throughout the banking area of the South and West.

Oh, Mr. President, there never was such a propaganda as is being now carried on to have this man W. P. G. Harding reappointed governor of the Federal Reserve Board; but he is not going to be reappointed. I have good reasons for saying that, and, as I have stated before, Senators will hear about it at the proper time.

Mr. President, the history of this matter is going to be interesting. It will not be many months until it is known. Senators can not waive this question aside. It is too big and serious. The little banker and the big banker in the system have been intimidated. They are sore and weary of the dictatorial power exercised by the governor of the Federal Reserve Board and those in Wall Street who control him. They are going to resent it, and ought to resent it.

I have shown Senators from the West how they loaned more money to one national bank in New York in February, 1921, than they were loaning in 28 States on agricultural and livestock paper. Do Senators know what they sought to do? They sought to whitewash this man, Governor Harding, to put rings on his fingers and bells on his toes and lull the people to sleep while they got him reappointed. They were going to laud him to the skies, and the subsidized press, or that portion of the press which they own bodily, are lauding him now. They have attacked and assailed me. Let them proceed. So long as God gives me strength to battle in this body the CONGRESSIONAL RECORD at least shall have the truth as to this issue. What do I care about their attacks. Thugs have been employed by crooks in high places to attack and murder men who dared to expose their criminal conduct, and I am not surprised to see the crowd that I am fighting hire spineless and conscienceless men to assail me and others who are pleading for fair treatment of sixty-odd millions of people who are in distress at this hour because of the murderous deflation policy of the governor of the Federal Reserve Board.

The president of some bank in Philadelphia comes out and says that Governor Harding ought to be reappointed. If I were in that man's place, I suppose, perhaps I would indorse him, too. If Governor Harding had not permitted the progressive interest rate to operate in my section and kill business, rob farmers, and produce hard times, as it did, I might be singing his praises now, but it will be long after I have degenerated and gone down in the scale of being below the station which I now occupy under the grace of God before I will permit my own personal comfort or any other personal consideration to deter me in the work that I feel it my duty to do.

Mr. President, Wall Street is backing Governor Harding; Wall Street wants him reappointed governor of the Federal Reserve Board; Wall Street is singing his praises. A Wall Street editorial said if he were not reappointed it would be taken as a triumph for Senator HEFLIN in the fight which he has made. God knows there is not any personal triumph sought by me. This man is from my State; he was appointed as a Democrat. Senators know what sort of a Democrat I am, and when a Democrat is criticized by me you all know that his offense must be very grave. Senators on the other side know that; they know that I would excuse a great deal that was not serious in the conduct of a Democrat. I am a partisan Democrat; I try to be honest in my position, and, although Governor Harding hails from my State, I stand here as one of the Senators from Alabama, in my place, speaking in part for the whole people of that State, and say that this deadly deflation policy which he carried out cost Alabama between $700,000,000 and $1,000,000,000. Senators, that is a severe loss. I do not care whether the responsibility rests on a Democrat or Republican; if he has done wrong and been guilty of criminal conduct he ought to be condemned.

I wish to say to Senators on the other side that they will hear 10 years from now, 20 years from now, 50 years from now, and maybe longer, of the crime of deflation carried on in 1920 and 1921 by the Federal Reserve Board. We can not get away from the burning truth announced by Lincoln. God bless his memory.

I have referred heretofore in the Senate to a farmer in my State with 10 bales of cotton, worth 40 cents a pound, or $200 a bale, who owed $2,000, and who could sell his 10 bales and pay off the $2,000 debt and go home with a clear receipt and clean bill of health. When, however, cotton was being marketed intelligently and gradually the deflation drive struck him, and when in conference at Birmingham Governor Harding flatly refused to back the farmer in holding his cotton to secure a price that would cover even the cost of production and yield a profit, down and down the price of cotton went. The farmer said, "It looks like the bottom is falling out; we can not get financial aid to hold it for a reasonable price." The spinner said, "I do not want to buy while it is going down so rapidly; it looks as though it will go much lower. I do not know what the other fellow may get his cotton for, and I am in competition with him in making cloth. If I knew that he would pay 30, 25, or 20 cents for his, I would pay that for mine, but if I should pay that for mine he may get his for 15. So I will stay out of the market." I saw the farmers' cotton business die under the deadly drive of deflation. Then what? It went down to 10 cents a pound, and then the banks with the $2,000 indebtedness against the farmer were forced under the Federal reserve bank's deflation to pay it. "There is my 10 bales of cotton," said the farmer, "but for deflation I could pay you and clear the debt with my 10 bales of cotton; but now it will sell for only one-fourth of it"—10 cents a pound, $50 a bale, $500 for 10 bales, $1,500 indebtedness hanging over him, and hanging over him now.

It will take four crops to pay it, when during the time of inflation, caused by the Federal Reserve Board, one crop would have paid it. My position is that under the circumstances he ought to have been permitted to discharge that debt with the circulating medium we had and the volume of money that was then moving around. This is what Mr. Lincoln said about it:

> Any movement to artificially deflate before the debt can be paid, to change the medium of circulation upon which the debt was contracted, would be a crime.

I want those words from the immortal Lincoln to burn into the memory of the Senator from Connecticut.

He said further:

> I warn the American people not to permit a repetition of the crimes of history. Following great periods of inflation, if drastic artificial deflation is attempted, disastrous results must follow. I warn them not to permit the money powers—

Do you get that, Senators—

to take advantage of the condition of the people. I warn them not to permit high, usurious interest rates, contraction of the currency, or any change in the circulating medium that will affect the debt contracted until it has been discharged.

That is what Lincoln said. Democrat that I am, I employ his language and I indorse that doctrine. What will this Republican Senate do to-day? Usurious interest rates? Senators, they raised the interest rate from 3 and 4 to 7 per cent, and then did what Lincoln said should not be done, and raised it to 8½ per cent to a bank of my State, and choked it to death when it was trying to live through that trying period. I assail the position of this Federal Reserve Board, and another speech assailing my position is distributed by the order of the governor of the Federal Reserve Board.

Mr. President, to the end that the Senator from Connecticut may know what I am driving at, I ask unanimous consent for the consideration of the resolution which I send to the desk and ask to have read in my time.

The PRESIDENT pro tempore. The Senator from Alabama asks unanimous consent for the present consideration of the resolution referred to by him.

Mr. SMOOT. Let it be read first.

Mr. HEFLIN. I will ask the Secretary to read it very slowly.

The PRESIDENT pro tempore. The resolution will be read.

The Assistant Secretary read the resolution (S. Res. 321), as follows:

Whereas the Federal Reserve Board is a Government institution, created by law for the purpose of exercising supervisory powers over the administration of the financial policies of the Federal reserve banking system; and

Whereas it was the purpose of those who created the Federal Reserve Board and the Federal reserve banks to keep them entirely free from political activities of every kind; and

Whereas from information obtained from the officials of the Federal reserve banks it appears that Governor Harding, of the Federal Reserve Board, was the prime mover in having printed and distributed many thousands of copies of a speech of Senator GLASS made in the Senate upon a controverted subject, involving charges against the conduct of Governor Harding and the Federal Reserve Board; and

Whereas other Senators have challenged the correctness of many of the arguments presented in said speech by Senator GLASS in defense of the Federal Reserve Board; and

Whereas the Senate itself is divided in opinion upon the subject, some Senators agreeing and others strongly disagreeing with the position taken by Senator GLASS in said speech; and

Whereas the said speech of Senator GLASS also contains some harsh and caustic criticisms of the position of another Member of the United States Senate who had criticized the conduct of the Federal Reserve Board; and

Whereas the Senate feels that the circulation by officials of the Federal Reserve Board or of the Federal reserve banks of the said speech of Senator GLASS is a wrongful exercise of the proper functions of said officials; and

Whereas the Senate feels duty bound to do everything in its power to keep the Federal Reserve Board and the Federal reserve banks true to the purposes of their creation; and

Whereas the Senate realizes the impropriety and grave danger of permitting members of the Federal Reserve Board and officials of the Federal reserve banks to participate in political and partisan activities; and

Whereas the Senate feels that in view of the part shown to be taken and admitted to be taken by the said Governor Harding, of the Federal Reserve Board, in having the said speech in question circulated, that he subjected himself to just criticism; and

Whereas the Senate feels that since the facts regarding the circulation by said Government officials of a speech made in the Senate which assails and criticizes the speech of another Senator and which involves a controversy regarding the conduct of said officials have been brought to its attention, that it owes a duty to itself, to the Federal Reserve Board, and to the people of the United States to express its opinion upon the conduct of Governor Harding in calling upon the officials of the Federal reserve banks to have printed and circulated the said speech of Senator GLASS; Therefore be it

Resolved, That the conduct of Governor Harding in this matter is a breach of the proprieties involving the duties of his office, and is therefore deeply regretted and disapproved by the Senate.

The PRESIDENT pro tempore. The Senator from Alabama asks unanimous consent to offer the resolution just read. Is there objection?

Mr. McLEAN. There is. I object.

The PRESIDENT pro tempore. Objection is made. The resolution will be returned to the Senator from Alabama.

Mr. HEFLIN. Mr. President, I had the resolution read in my time, and it will at least appear in the RECORD in my speech.

Mr. McLEAN. Oh, I have no objection to that.

The PRESIDENT pro tempore. That is the necessary result. It requires no order of the Senate.

Mr. HEFLIN. I knew that it did not require an order, Mr. President. I must confess, however, that I did not know whether the Senator from Connecticut would object to that or not.

The PRESIDENT pro tempore. The Chair has not asked the Senator from Connecticut whether he would object or not.

Mr. HEFLIN. If he does object——

Mr. McLEAN. Mr. President, a parliamentary inquiry. My objection is to the immediate consideration of the resolution.

The PRESIDENT pro tempore. The objection of the Senator from Connecticut was to the offering of the resolution.

Mr. McLEAN. Oh, I do not object to that, but I object to its immediate consideration. I want it to lie on the table.

Mr. HEFLIN. Then, Mr. President, my resolution is offered or introduced and may be printed as other resolutions are printed.

The PRESIDENT pro tempore. If the Senator from Connecticut withdraws his objection——

Mr. McLEAN. I do.

The PRESIDENT pro tempore. And if there be no other, the resolution is received.

Mr. HEFLIN. Now, Mr. President, I ask unanimous consent for the immediate consideration of the resolution.

The PRESIDENT pro tempore. Is there objection?

Mr. McLEAN. I object to that, Mr. President.

The PRESIDENT pro tempore. Objection is made, and the resolution will go over under the rule.

Mr. HEFLIN. I ask that the resolution as offered remain on the President's table, because I want to make an effort again to get it up in some way at some future time.

The PRESIDENT pro tempore. It will lie on the table under the rule.

Mr. HEFLIN. Now, Mr. President, just a word more. I tried to be very fair in writing that resolution. I consulted two other Senators. It simply recites the facts, and gives the Senate an opportunity to go upon record as to whether or not it wants to do that which will keep these banks and the Federal Reserve Board out of partisan controversies and political activities. I can not do anything with it at this time except by unanimous consent, and the Senator from Connecticut objects. I am powerless to proceed with it now. I do not see how he could object, Mr. President. If he were in my place, and somebody had made a speech assailing his position, severely criticizing the stand that he had taken, and he were to offer the resolution that I have offered, I would stand here and champion his cause and ask that the resolution be adopted. The resolution simply states that the governor of the Federal Reserve Board is reproved for calling upon the Federal reserve banks to circulate the speech of one Senator assailing the position of another Senator where his own official conduct is the matter in controversy; that the Senate declares what a large number of Senators in this body believe and will say on the record finally, that he breached the proprieties of his office, and that the Senate disapproves his conduct.

The Senator should approve or disapprove. I am fighting this battle, not for any personal triumph—God knows it is easier to sit down and be quiet in hot weather like this—but I am fighting from a sense of duty that the truth may be known. If the Senate dares to defeat that resolution, let it do it, and let the country know the Senate's attitude upon it. If there are any Democrats in this body who will vote against that resolution, let their names go in the RECORD. If there are Senators on the other side who will oppose it, let their names appear in the CONGRESSIONAL RECORD, so that next year, 5 years from now, 10, 20 years and more or whenever—this year or 2 years from now—the statesmen shall come, when the people will again take hold of the instrumentalities of their Government and not be held up and mulcted by the power of Wall Street as we are held up and mulcted to-day, they may know that there were those here at this time who fought this dangerous and deadly policy of dragging the Federal Reserve Board and banking system into politics. I repeat, I can not understand the strange conduct of the Senator from Connecticut.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Connecticut?

Mr. HEFLIN. I yield to the Senator.

Mr. McLEAN. If my memory serves me correctly, I took an oath and every Member of this body took an oath to support and defend the Constitution of the United States. My impression is that that Constitution guarantees freedom of speech; and I think neither the Federal Reserve Board nor any official of that board should be deprived of that privilege at the request of a United States Senator. I think it would be beyond the power of Congress to do it if they wanted to. That is my position, and that is all that this controversy involves. The question is, Shall the governor of the Federal Reserve Board or any public official be denied freedom of speech when he is attacked by a United States Senator? The position of the Senator from Alabama is absurd.

Mr. HEFLIN. Mr. President, I refute the argument of the Senator from Connecticut and repudiate the position that he states as being my position. I demand free speech for every-

body—the Federal Reserve Board governor and the other members of the board. They have thousands of dollars to carry out their propaganda, as they do carry it out. The agents that are going around the country now, attending business men's conventions and bankers' conventions, getting up indorsements to have Governor Harding reappointed, are paid out of the earnings of the Federal reserve banks.

Their agents and the members of the Federal Reserve Board are going all over the country just now without expense to themselves trying to secure indorsements of Governor Harding.

Is that free speech, using a Government bank's money to carry on propaganda, paying the expenses of agents to further the interests of the governor of the board whose policy for the last two years has robbed millions of people? The Federal Reserve Board Bulletin is his own official document. They fill it full of stuff, and it goes out to various parts of the country. They have various periodicals. They have magazine articles written. They now have a man in New York employed in writing a history of legislation relating to the Federal reserve system. All that is being paid for out of the earnings of the Federal reserve system, part of which would go to the Government if not squandered for illegitimate purposes. They are building a bank in New York City costing twenty-odd million dollars, by the sanction of the Federal Reserve Board, in the distressing times in which we are now living. They are erecting bank palaces in New York alone costing more money than this Capitol and the House Office Building, made of marble, and the Senate Office Building, made of marble, and more than the State, War, and Navy Building all cost.

The Federal reserve banking palaces in New York are to cost more money than the Capitol, the Senate and House Office Buildings, and the State, War and Navy Building all cost, and this governor at the head of the Federal Reserve Board sanctions that, when men in my section and in the West can not get money with which to do business in order to live. That is what is going on.

Then they undertake to hide all this behind the suggestion of free speech for the Federal Reserve Board. They have free speech. They can write letters to everybody in the United States and pay for them, and nobody questions it. Governor Harding goes to every convention where they invite him and makes a speech. I am not trying to suppress free speech. I am interested in free speech. I am for it. I am opposed to allowing a Government official to take the speech of any Senator made in this body, criticizing and assailing the position of another Senator, where that Government official's conduct is the subject in controversy, and distribute it at the expense of Government institutions. That is my position, and I believe that every Senator in this body, with the sole and single exception of the Senator from Connecticut, understands my position.

Mr. President, he occupies a very unenviable attitude. He has been the means of denying to me the right to have the list of names to which the speech in question was sent without a nickel of expense to the man who made it. I asked for that list in order that I might have the opportunity, with some friends to help me, a few who still believe in right principles, and who are still courageous enough to speak out, to send my speech to them. He denied me that right by his objection, and would not permit the Senate to grant me the right to have these banks give me that list so that I could have my speech printed and sent out to them in the months to come.

The Senator from Connecticut is the handy instrument or guardian angel of the Federal Reserve Board's deflation policy. He never loses an opportunity to defend it. He was a bitter opponent of the Federal reserve banking system. It now operates entirely to his satisfaction, and he is for it as it is now manipulated and controlled by Wall Street. He is the author of the progressive interest rate amendment. He fathered that oppressive and deadly provision, and got it through this body, and it has wrought ruin to more people in the South and West and in the whole United States than any similar piece of legislation in all the history of the Government.

When that progressive interest rate was secured, Governor Harding appeared on the scene. Senator SMITH, of South Carolina, and other Senators told him it was a dangerous power. His lips trembled, Senator SMITH said, and turned white around the underlip, and he said, "We have to have it. New York is draining money out of the agricultural sections." Senator SMITH said, "If you apply it to the agricultural sections, you will ruin the South and the West. We will not have money sufficient to serve our needs at the crop-moving time to properly handle our products." He said, "That is exactly what I want it for. I want to apply it to these big cities that are draining money out of the farming sections, so that the South and West will have money at the crop-moving time."

That amendment was passed, and its passage obtained under the circumstances, from some Members of the Senate at least, through deliberate deception and misrepresentation. It is now in the law books of the land, it is the law of the land, and it has destroyed the substance, the happiness, and the business of millions of American people.

That whole thing was inaugurated by Wall Street and conducted by Governor Harding, who was here begging and lobbying to get this progressive interest rate, through an amendment fathered by the Senator from Connecticut [Mr. McLEAN]. He is standing by this man, who is responsible for the poverty of millions, and to-day, when I showed to the Senate that they sent out a hundred and forty-odd thousand copies of a speech assailing my position in getting the facts of that record, the fact of how that amendment was gotten through, and how it is wrong for Government bank officials to do such things, the Senator from Connecticut [Mr. McLEAN] reaches the climax in his friendship and service to the Federal Reserve Board governor and his staff when he refuses to permit me to pass a resolution intended to keep the Federal Reserve Board and officials of the Federal reserve banks out of politics. I leave the Senator to the fair judgment of his own constituents and I submit the justice of my cause to the judgment of the upstanding, fearless, and incorruptible people of the United States.

Mr. McLEAN. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state his inquiry.

Mr. McLEAN. I would like to ask the Senator from Alabama if the order for the printing in the RECORD of the replies of the Federal reserve banks has been entered?

Mr. HEFLIN. No; it has not. The Senator had better ask now that that be done.

Mr. McLEAN. I ask unanimous consent that the replies which have been received by the Senate to the questions embodied in the resolution of the Senator from Alabama be printed in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

A communication from the Governor of the Federal Reserve Board transmitting, pursuant to Senate Resolution 308, letters from the governors of the Federal reserve banks of Philadelphia, Richmond, and St. Louis, relative to the circulation of copies of the speech of Senator GLASS:

FEDERAL RESERVE BOARD,
Washington, July 8, 1922.

SIR: The Federal Reserve Board transmits herewith letters from the Federal reserve banks of Philadelphia, Richmond, and St. Louis, in reply to Senate Resolution 308. Replies from the other banks will be forwarded as soon as received.

In transmitting this correspondence the board trusts that it may without impropriety avail itself of the opportunity to invite the attention of the Senate to certain matters which have a direct bearing upon the subject of the inquiry.

The corporate powers of the Federal reserve banks are defined in section 4 of the Federal reserve act, which provides, inter alia, that "every Federal reserve bank shall be conducted under the supervision and control of a board of directors," and that such directors "shall perform the duties usually appertaining to the office of directors of banking associations and all such duties as are prescribed by law."

The banking business is one which rests peculiarly upon the foundation of confidence. While true in the case of any bank, this is particularly true with respect to a Federal reserve bank, which is the sole custodian of the legal reserves of its member banks and the instrumentality through which is issued the country's fiduciary currency. Anything which tends to undermine public confidence in a bank, and in a reserve bank particularly, impairs its ability to perform its functions, and unless counteracted may defeat entirely the purposes of its organization. Therefore, those charged with the administration of a bank have the right and are impressed with the duty of using all legitimate means, when necessary, to protect its good name and to prevent any impairment of public confidence.

Criticisms of policy can not be objected to and have always been welcomed by the Federal Reserve Board, which has never imputed to itself infallibility of judgment. The board has been charged with the administration of a new and untried law, and has from the beginning been confronted with a series of difficult and unprecedented situations. When criticism is based upon the solid foundation of fact and understanding of the Federal reserve act and of banking principles it is useful; it is helpful to those charged with the duties of administration. To the Federal Reserve Board it has appeared, however, that for the past two years much that has been said under the guise of criticism of policy has not been intended to help, but to discredit the management of the Federal reserve system through attacks upon the integrity and purpose of members of the Federal Reserve Board and of officers and directors of Federal reserve banks.

These attacks have been so repeatedly made and have had such publicity as to justify the suspicion that they are part of a concerted movement against the Federal reserve system. The patience and forbearance with which members of the Federal Reserve Board and officers and directors of Federal reserve banks have borne these repeated attacks, many of them personally abusive, have been cited as an admission of the truth of charges made and have tended to raise in the minds of some who indorse the principles of the Federal reserve act, but who had no means of informing themselves as to facts, a ques-

tion as to whether there may not have been some foundation for the charge that members of the Federal Reserve Board and officers and directors of Federal reserve banks have been incapable and corrupt.

Beginning last summer insinuations and charges which had been made on the outside were repeated and amplified on the floor of the Senate of the United States, not merely once or twice but at frequent intervals up to the present time. This circumstance has caused a great amount of correspondence with persons asking for information, and board members, as well as officers and directors of Federal reserve banks, have had occasion frequently to consider whether there were any means which might appropriately be employed to inform the public as to the operation of the Federal reserve banks and the character of their management.

Respecting the constitutional prerogatives of the Members of the Senate, care has been taken to make no criticism of any Member thereof in any reply to letters of inquiry. This circumstance also has been construed as an admission of the truth of charges so frequently made on the floor of the Senate, some of which would have been resented as libelous but for the constitutional immunity above referred to.

Many quotations could be made from statements which have been printed in the CONGRESSIONAL RECORD during the past 12 months which are misleading and untrue, but their insertion would unduly extend this communication. The board has seen nothing to indicate that those who made these statements have ever corrected them.

Last January the junior Senator from Virginia, who was chairman of the Banking and Currency Committee of the House of Representatives which reported the bill creating the Federal reserve system, and who was afterwards Secretary of the Treasury and ex officio chairman of the Federal Reserve Board, made a speech on the floor of the Senate, in which he discussed at length the operation of the Federal reserve banks and the attitude of the Federal Reserve Board during the recent period of economic reaction and financial stress. The speech was delivered during parts of two days. A brief report of it appeared in the daily papers and requests followed for complete copies of the speech. Officers of Federal reserve banks, who for several months had felt themselves obliged to maintain silence while their motives and integrity were being assailed, deemed it not improper to avail themselves of the opportunity then presented to give to their correspondents and to others in their respective communities who had evinced an interest, or who were supposed to be interested in the economic questions dealt with, information which would enable them to draw their own conclusions.

The speech was a public document. Having been delivered on the floor of the Senate and having been published in the CONGRESSIONAL RECORD, the Federal Reserve Board felt that there could be no impropriety in the distribution of copies by the Federal reserve banks. The speech dealt so comprehensively with charges and statements which had been made in the same place and printed in the same publication that the board believed it should be given wide publicity. Having been informed that copies might be obtained from the Public Printer if ordered promptly, it was decided that the governor should send to each Federal reserve bank the following telegram:

"JANUARY 18, 1922.

"Think Senator GLASS'S great speech defending Federal reserve system should be widely and promptly circulated. Government Printing Office will print special copies of it Friday, 20th, and additional orders should be given to-morrow. Printing Office estimates cost of copies at from 5 to 7 cents each. Please wire promptly how many copies your bank wishes.

"HARDING."

[NOTE.—This estimate of cost was too high. In view of the great demand for the speech and the large number of copies printed, the cost per copy to each Federal reserve bank was approximately 1¾ cents.]

The Federal Reserve Board assumes responsibility for commending this speech to the Federal reserve banks for circulation. Neither the board nor the Federal reserve banks regarded the speech as being an attack upon any Senator and were not interested in it from that point of view. This speech was and is regarded by the board as a fair presentation of facts. It was commended to the banks for circulation because it was an answer made in the Senate Chamber to charges which had been made on the floor of the Senate. It is a clear exposition of the policies, functions, and operations of the Federal reserve system during a critical period and is an important contribution to current economic discussion.

Respectfully, W. P. G. HARDING, *Governor*.

The PRESIDENT OF THE SENATE.

FEDERAL RESERVE BANK OF PHILADELPHIA,
July 6, 1922.

To the PRESIDENT OF THE SENATE.

SIR: In compliance with the request of the Federal Reserve Board we have the honor to submit herewith the following replies to the four questions asked in Senate Resolution 308.

1. The newspaper reports of Senator GLASS'S speech convinced the officers of this bank that the speech contained information which would be of interest and value to the bankers and business men of this district and that copies of the speech should be mailed to the (say) 11,000 names on the regular mailing list of this bank. The secretary of the Federal Reserve Board was therefore requested to order from the Public Printer and forward to us 11,000 copies of the speech.

2. The cost of procuring these additional copies from the Public Printer and of mailing the same was borne by this bank.

3. The total cost was $423.11, which was charged as one of the current expenses of this bank, just as the monthly review of business conditions and other information circulated by the bank in pamphlets or circular letters is charged.

4. The Governor of the Federal Reserve Board wired to the chairman of the board of this bank the opinion that the speech might wisely be circulated, and advised him that the Government Printing Office would furnish copies of the same at from 5 cents to 7 cents each. This telegram was regarded by the officers of this bank as affording a prompt and economic means of putting into effect the determination which had already been reached to circulate the speech, as stated in answer to question No. 1.

I am,
Respectfully yours, GEO. W. NORRIS, *Governor*.

FEDERAL RESERVE BANK OF RICHMOND,
July 7, 1922.

The PRESIDENT OF THE SENATE OF THE UNITED STATES,
Washington, D. C.

SIR: In obedience to Senate Resolution No. 308, transmitted to us through the Federal Reserve Board, I respectfully submit all the information in our possession called for in the following questions contained in the aforesaid resolution:

(1) At whose instance was the speech in question of Senator GLASS sent out?

Answer. At the instance and at the volition of the executive officers of the bank. (See answer to question (4).)

(2) At whose expense was said speech printed and distributed?

Answer. At the expense of the bank.

(3) How was the fund provided, and how many copies of said speech were sent out, and how much money was expended in printing and distribution of the said speech?

Answer. The expenses incurred in distributing the speech were charged to the current expenses of the bank, just as we charge the expense of distributing other matter of a similar nature intended for the knowledge, instruction, or benefit of the banking institutions and others interested and concerned in this district, and for the purpose of disseminating a knowledge and understanding of the operations of the Federal reserve bank and the system and promoting the growth of the Federal reserve system.

Ten thousand one hundred copies of said speech were obtained, and all have been distributed with the exception of a few copies—less than 100.

The total expense in connection therewith, including the printing of the speech, postage, cost of envelopes, etc., was $286.99, as nearly as may be determined.

(4) Did any member of the Federal Reserve Board suggest the printing and distribution of the said speech?

Answer. The following telegram, "Trans 169," was received from the Federal Reserve Board by the chairman of this bank: "Think Senator GLASS'S great speech defending Federal reserve system should be widely and promptly circulated. Government Printing Office will print special copies of it Friday, 20th, and additional orders should be given to-morrow. Printing Office estimates cost of copies at from 5 to 7 cents each. Please wire board promptly how many copies your bank wishes." (This telegram was signed in the name of the governor of the board, as usual.) To which the chairman of this bank replied as follows: "Governor Seay was in the act of wiring Senator GLASS for 4,000 copies when your message came. Please send us that number." (Six thousand one hundred copies were subsequently ordered.)

Prior to the receipt of the foregoing telegram, as will be evident in the reply thereto, the governor of the bank (as specified in question (1)), had determined to obtain copies of the speech and distribute them in the district, believing, from the account of the speech given in the newspapers, that it was the best exposition given to the public of the credit operations of the Federal reserve bank during the period which it covers and that it was well designed to inform the public of reserve banks' operations and to correct many of the statements which had come under our observation which were both misleading and harmful to the best interests of the system. In this opinion all the officers of the bank concurred.

Respectfully submitted. GEO. J. SEAY, *Governor*.

FEDERAL RESERVE BANK OF ST. LOUIS,
July 5, 1922.

SIR: The Federal Reserve Bank of St. Louis has received through the Federal Reserve Board a copy of the resolution of the Senate (S. Res. 308) passed June 30, 1922, reading as follows:

"Whereas it has been charged upon the floor of the Senate that each and every one of the regional Federal reserve banks of the United States has had printed and distributed at its own expense a speech delivered in the Senate by Senator GLASS, of Virginia, in which the position of Senator HEFLIN on the deflation policy of the Federal Reserve Board was assailed and criticized: Therefore be it

"*Resolved*, That the Federal Reserve Board is hereby requested to call on all of said Federal reserve banks, except the Federal Reserve Bank of Atlanta, which has already reported to the Senate, to furnish to the Senate in writing all information in their possession, respectively, called for in the following questions:

"(1) At whose instance was the speech in question of Senator GLASS sent out? (2) At whose expense was said speech printed and distributed? (3) How was the fund provided, and how many copies of said speech were sent out, and how much money was expended in printing and distributing said speech? (4) Did any member of the Federal Reserve Board suggest the printing or distribution of the said speech?"

The replies of the Federal Reserve Bank of St. Louis to the questions in the resolution in their order as asked are as follows:

(1) The speech in question of Senator GLASS was sent out at the instance of the board of directors of the Federal Reserve Bank of St. Louis.

(2) The speech was printed and distributed at the expense of the Federal Reserve Bank of St. Louis.

(3) The fund was provided as all funds are provided that are necessary for the expenses of the operation of this bank.

Fifteen thousand copies of the speech were sent out. Money expended in printing amounted to $250.79. The cost of distributing said speech was $334.60. Total cost, $585.39.

(4) For quite a while previous to this speech of Senator GLASS this bank had been calling to the attention of the Federal Reserve Board the desirability of having the public know the facts about the Federal reserve system, its organization, administration, and method of operation, so that the criticisms that had been made of the system from time to time could be explained to the public, and it could arrive at the true situation. Unless this could be done there was a possibility of dangerous unrest being stimulated, with the consequent disaster to the stockholding banks and business in general. When we saw the published report of the speech of Senator GLASS we decided that if the speech itself was the general statement of facts and explanation of the system it seemed to be, it was the thing that should be distributed. Later we received a telegram from the governor of the Federal Reserve Board suggesting that this speech might be what we were looking for and giving us the cost of printing. In the meantime many of our stockholding banks, having read the press reports of the speech, sent to us for copies, and after reading suggested

that it would be helpful to the general situation if it were broadly distributed.

This letter was read at the meeting of our board of directors held to-day and is sent with its full approval.

Respectfully,

D. C. BIGGS, *Governor.*

The PRESIDENT OF THE SENATE.

A communication from the governor of the Federal Reserve Board transmitting, pursuant to Senate Resolution 308, letters from the Federal Reserve Banks of Cleveland, Chicago, and Kansas City:

FEDERAL RESERVE BOARD,
Washington, July 10, 1922.

The PRESIDENT OF THE SENATE.

SIR: The Federal Reserve Board transmits herewith letters from the Federal Reserve Banks of Cleveland, Chicago, and Kansas City, in reply to Senate Resolution 308.

Respectfully,

W. P. G. HARDING, *Governor.*

FEDERAL RESERVE BANK OF CLEVELAND,
July 7, 1922.

The honorable the PRESIDENT OF THE SENATE
OF THE UNITED STATES,
Washington, D. C.

MY DEAR SIR: There has been forwarded to this bank by the Federal Reserve Board copy of Senate Resolution 308 requesting certain information set forth in questions contained therein. Our answers to these questions are as follows:

1. The copies of Senator GLASS's speech that were distributed by the Federal Reserve Bank of Cleveland were sent out at the instance of the management of the bank.

2. The expense, which consisted of printing and postage, was paid by the bank, the total cost being $203.32.

3. This expense was not taken from any special fund, but of this amount $120.38, the cost of printing, and $24.53, the cost of the envelopes, were charged to "printing and stationery," and $58.41 to "postage." Seven thousand two hundred copies of the speech were ordered, 5,841 copies were mailed, 1,209 copies were given out to those who asked for them, and 150 copies are on hand.

4. Learning from news dispatches of the character of Senator GLASS's speech, and believing its general distribution would be desirable in this district to offset erroneous statements concerning the Federal reserve system, this bank, on its own initiative prior to the receipt of any communication from the Federal Reserve Board on the subject, inquired of the Federal Reserve Board by telegram as to when a complete copy could be obtained in order that a supply might be printed. In response to that telegram the Federal Reserve Board, through its governor, wired this bank commenting on the speech, the desirability of its circulation, and stated that the Government Printing Office was prepared to print additional copies.

Respectfully,

E. R. FAUCKER, *Governor.*

FEDERAL RESERVE BANK OF CHICAGO,
July 5, 1922.

Re Senate Resolution 308.

The honorable the PRESIDENT OF THE SENATE
OF THE UNITED STATES,
Washington, D. C.

SIR: I am pleased to answer as follows the four questions contained in Senate Resolution 308, in so far as the Federal Reserve Bank of Chicago is concerned:

(1) Q. At whose instance was the speech in question of Senator GLASS sent out?

A. At the instance of the chairman of the board of directors and the governor of the Federal Reserve Bank of Chicago.

(2) Q. At whose expense was the said speech printed and distributed?

A. At the expense of the Federal Reserve Bank of Chicago.

(3) Q. How was the fund provided and how many copies of said speech were sent out, and how much money was expended in printing and distributing said speech?

A. (a) The cost of printing and distribution was charged to expense; (b) approximately 15,000 copies were sent out; (c) there was expended for printing $250.79, for postage about $150, and for envelopes about $75, making a total expenditure of approximately $475.

(4) Q. Did any member of the Federal Reserve Board suggest the printing or distribution of the said speech?

A. Yes; but the question of determining the action taken was left entirely to the discretion of the management of this bank.

If there is desired any further information that this bank can properly furnish, it will be cheerfully given.

Respectfully,

J. B. MCDOUGAL, *Governor.*

FEDERAL RESERVE BANK OF KANSAS CITY,
July 7, 1922.

To the PRESIDENT OF THE SENATE,
Washington, D. C.

DEAR SIR: Complying with the request as set forth in Senate Resolution 308, I have the honor to submit the following:

Question No. 1. At the instance of the officers and directors of the Federal Reserve Bank of Kansas City.

Question No. 2. The Federal Reserve Bank of Kansas City.

Question No. 3. Charged to general expense. The total cost of printing and distribution, including postage, was $195.86.

Question No. 4. The suggestion came from Governor Harding, of the Federal Reserve Board, that on account of its educational features in elucidating the working of the system he thought general circulation of the speech advisable. This met the hearty approval of the directors and officers of this bank. Any part of the speech referring to Senator HEFLIN was no part of the purpose of this bank in giving Senator GLASS's speech publicity.

Respectfully,

W. J. BAILEY, *Governor.*

A communication from the governor of the Federal Reserve Board transmitting, pursuant to Senate Resolution 308, letters received from the Federal Reserve Banks of Minneapolis and Dallas:

FEDERAL RESERVE BOARD,
Washington, July 11, 1922.

The PRESIDENT OF THE SENATE.

SIR: The Federal Reserve Board transmits herewith letters received from the Federal Reserve Banks of Minneapolis and Dallas, in reply to Senate Resolution 308.

Respectfully,

W. P. G. HARDING, *Governor.*

FEDERAL RESERVE BANK OF MINNEAPOLIS,
July 8, 1922.

Hon. W. P. G. HARDING,
Governor Federal Reserve Board, Washington, D. C.

MY DEAR GOVERNOR HARDING: I will be obliged if you will transmit to the President of the Senate all of the replies in behalf of this bank to Senate Resolution No. 308.

1. The speech of Senator GLASS was distributed at the instance of the chairman of the board of directors and governor of the Federal Reserve Bank of Minneapolis.

2. The expense was charged to the Federal Reserve Bank of Minneapolis.

3. No fund is provided for such purposes, and the cost of distribution was charged to the expense of this bank in the same manner as the expense of any informative matter to members and other banks would be charged. There were sent to the banks of the ninth Federal reserve district 3,829 copies, and to them upon their order and request 5,033 additional copies, for miscellaneous circulation 451 copies, and on hand 187 copies, making a total of 9,500 copies, the printing cost of which was $158.85, the cost of postage approximately $90, and the cost of envelopes $29, or a total cost of approximately $277.85.

4. Yes. The attention of the chairman of our board was called to the speech, but the action, however, of this bank was taken because of the authoritative character, informative value, and comprehensive summary of Federal reserve operations which the address contained, and independent of suggestions from any source. Any additional information that this bank can properly furnish will be cheerfully supplied.

Yours respectfully,

B. A. YOUNG, *Governor.*

FEDERAL RESERVE BANK OF DALLAS,
OFFICE OF THE GOVERNOR,
July 7, 1922.

The PRESIDENT OF THE SENATE,
Washington, D. C.

SIR: In response to Senate Resolution No. 308, in which all of the Federal reserve banks of the United States, except the Atlanta bank, were requested to furnish the Senate in writing all information in their possession, respectively, regarding the printing and distribution of a speech delivered in the Senate by Senator GLASS, of Virginia, you are respectfully advised:

(1) The speech of Senator GLASS in question was sent out under the direction and at the instance of the executive committee of this bank, in keeping with the policy which we have of occasionally supplying member banks and other banks and the commercial and civic bodies of the district with information covering the operations, functions, and facilities of the Federal reserve system and of this bank.

(2) The speech in question was printed and distributed at the expense of this bank.

(3) As indicated in my reply to the second question, the fund was provided by charging the same to our expense account and, therefore, came out of our earnings. A copy of the speech was sent to each of approximately 2,100 member and nonmember banks, trust companies, and private banks of the district. In addition to this number, about 400 copies were sent to commercial associations, clubs, civic bodies, and individuals of the district. We expended the sum of $66.86 in paying for the printing of these speeches. The letter transmitting these copies of the speech (a copy of which letter is hereto attached) was printed in our own print shop, and the envelopes in which they were inclosed were also furnished by that department. We can only approximate the cost of printing these letters and the cost of the envelopes. This cost we estimate to be $14.38. In addition to this we expended $97.88 for postage, thus making an aggregate amount of expense of $179.12, a portion of which is estimated.

(4) Before sending out the speech our committee had received from Governor Harding, of the Federal Reserve Board, an expression of opinion to the effect that it was desirable that Senator GLASS's speech be widely circulated.

Respectfully,

B. A. MCKINNEY, *Governor.*

FEDERAL RESERVE BANK OF DALLAS,
February 9, 1922.

To all banks, bankers, and trust companies in the eleventh Federal reserve district, chambers of commerce, and Rotary clubs:

GENTLEMEN: Believing that it will be found of interest, I am pleased to inclose copy of a speech, "Truth About the Federal Reserve System," delivered by Hon. CARTER GLASS, Senator from Virginia, in the United States Senate on January 16 and 17.

Mr. GLASS's long service in the Congress as a member of the Committee on Banking and Currency and his administration of the Treasury Department as Secretary of the Treasury peculiarly fit him to discuss Federal reserve banking; in fact, I know of no one who has been a closer student of banking and currency in all its phases.

Yours very truly,

W. F. BANES, Jr., *Chairman.*

A communication from the governor of the Federal Reserve Board transmitting, pursuant to Senate Resolution 308, a letter from the Federal Reserve Bank of Boston:

FEDERAL RESERVE BOARD,
Washington, July 15, 1922.

SIR: The Federal Reserve Board transmits herewith letter from the Federal Reserve Bank of Boston, in reply to Senate Resolution 308.

Respectfully,

W. P. G. HARDING, *Governor.*

The PRESIDENT OF THE SENATE.

FEDERAL RESERVE BANK OF BOSTON,
July 13, 1922.

DEAR SIR: In response to a resolution passed by the Senate of the United States (S. Res. 308), a copy of which was transmitted to the Federal Reserve Bank of Boston by the Federal Reserve Board, the Federal Reserve Bank of Boston hereby submits the following answers to the questions contained in that resolution:

1. At whose instance was the speech in question of Senator GLASS sent out?

Answer. On January 18, 1922, the following telegram was received at the Federal Reserve Bank of Boston:

WASHINGTON, D. C., *January 18, 1922—4.15 p. m.*

CURTISS.

Trans. 169. Think Senator GLASS's great speech defending Federal reserve system should be widely and promptly circulated. Government Printing Office will print special copies of it Friday, 20th, and additional orders should be given to-morrow. Printing Office estimates cost of copies at from 5 to 7 cents each. Please wire board promptly how many copies your bank wishes.

HARDING, *4.35 p. m.*

2. At whose expense was said speech printed and distributed?

Answer. The expense of printing and distribution of this speech in this district was borne by the Federal Reserve Bank of Boston.

3. How was the fund provided, and how many copies of said speech were sent out, and how much money was expended in printing and distributing said speech?

Answer. The cost of the copies of this speech and of the distribution was charged to the expense account of the Federal Reserve Bank of Boston. There were 17,960 copies distributed, at a total cost of $546.74.

4. Did any member of the Federal Reserve Board suggest the printing or distribution of the said speech?

Answer. No member of the Federal Reserve Board suggested the printing and distribution of this speech.

Very truly yours,

CHARLES A. MORSS, *Governor.*

To the PRESIDENT OF THE SENATE,
Washington, D. C.

A communication from the governor of the Federal Reserve Board transmitting, pursuant to Senate Resolution No. 308, a letter from the Federal Reserve Bank of New York:

FEDERAL RESERVE BOARD,
Washington, July 14, 1922.

The PRESIDENT OF THE SENATE.

SIR: The Federal Reserve Board transmits herewith letter from the Federal Reserve Bank of New York in reply to Senate Resolution No. 308.

Respectfully,

W. P. G. HARDING, *Governor.*

FEDERAL RESERVE BANK OF NEW YORK,
July 12, 1922.

The PRESIDENT OF THE SENATE,
Washington, D. C.

SIR: The Federal Reserve Board has transmitted to the Federal Reserve Bank of New York a copy of Senate Resolution 308, and has requested this bank to furnish to the Senate in writing all information in its possession called for in the questions contained in that resolution. The following answers are submitted in response to the questions:

1. At whose instance was the speech in question of Senator GLASS sent out?

The decision to send out the speech of Senator GLASS was made by the officers of the Federal Reserve Bank of New York, and their action was later approved by its board of directors.

2. At whose expense was said speech printed and distributed?

At the expense of the directors of the bank.

Inasmuch as the speech dealt in part with charges which had been made against the integrity and good faith of the directors and officers of the Federal Reserve Bank of New York in the management of the bank's affairs, the directors preferred to have the distribution of the speech made at their personal expense, rather than at the expense of the bank.

3. How was the fund provided, and how many copies of said speech were sent out, and how much money was expended in printing and distributing said speech?

Approximately 23,275 copies were sent out to banks in this district, to persons on the mailing list of this bank's Monthly Review of Business and Credit Conditions, and to those who had requested copies of the speech. The printing expense, amounting to $417.98, and the distribution expense for postage and envelopes, amounting to $310.44, were divided equally among the directors of the bank and paid by them.

4. Did any member of the Federal Reserve Board suggest the printing or distribution of the said speech?

The following is a copy of a telegram, dated January 18, 1922, from the Federal Reserve Board which prompted the officers of this bank to consider taking the action referred to in the answer to question 1:

"Trans. 169: Think Senator GLASS's great speech defending Federal reserve system should be widely and promptly circulated. Government Printing Office will print special copies of it Friday 20 and additional orders should be given to-morrow. Printing Office estimates cost of copies from 5 to 7 cents each. Please wire board promptly how many copies your bank wishes.

"HARDING."

Respectfully,

BENJ. STRONG, *Governor.*

A communication from the governor of the Federal Reserve Board transmitting, pursuant to Senate Resolution 308, a letter from the Federal Reserve Bank of San Francisco:

FEDERAL RESERVE BOARD,
Washington, July 18, 1922.

The PRESIDENT OF THE SENATE.

SIR: The Federal Reserve Board transmits herewith letter from the Federal Reserve Bank of San Francisco in reply to Senate Resolution 308. With this all of the information requested in the resolution of the Senate has been transmitted to the Senate.

Respectfully,

W. P. G. HARDING, *Governor.*

FEDERAL RESERVE BANK OF SAN FRANCISCO,
July 12, 1922.

To the PRESIDENT OF THE SENATE,
Washington, D. C.

SIR: In response to resolution of the Senate of the United States (S. Res. 308), we furnish below information covering the four questions asked in that resolution:

1. At whose instance was the speech in question of Senator GLASS sent out?

Information was received by telegraph from the Federal Reserve Board on Wednesday, January 18, 1922, that Senator GLASS had on January 16 and 17 delivered a speech in the Senate on the Federal reserve system. Since the organization of the Federal Reserve Bank of San Francisco on November 16, 1914, it has occasionally circulated at its own expense copies of speeches delivered by members of the Federal Reserve Board elucidating the provisions of the Federal reserve act, and explaining the functions and purposes of the Federal reserve system. In conformity with this established practice, and believing that a clearer understanding of the Federal reserve system would be promoted by an analysis of the provisions and intent of the Federal reserve act by the person who was chairman of the House Committee on Banking and Currency at the time of the passage of the act, and who was later the chairman of the Federal Reserve Board, the chairman and governor of this bank, in consultation, agreed that it would be desirable to circulate this speech, and on January 18, 1922—the same day the telegram was received from the Federal Reserve Board—telegraphed an order for 20,000 copies.

2. At whose expense was said speech printed and distributed?

At the expense of the Federal Reserve Bank of San Francisco.

3. How was the fund provided, and how many copies of said speech were sent out, and how much money was expended in printing and distributing said speech?

(a) Charged to operating expense of this bank.

(b) Twenty thousand copies of this speech were ordered: 12,200 copies were mailed; 7,200 sent by parcel post and local delivery; about 600 copies now remain on hand.

(c) The printing and distributing costs were as follows:

1. Printing (charges of Government Printing Office)		$334.38
2. Distribution:		
Stamps—		
Postage on 12,200 copies, at 2 cents	$244.00	
Parcel post and local delivery	20.00	
		264.00
Envelopes, 12,200, at $6.79 per 1,000		82.83
Actual monetary outlay on part of this bank		681.21

The labor involved in the distribution was done in spare time as "fill-in" work, and therefore involved no employment of additional clerks and no additional compensation.

An estimate of the value of the time involved, if an outside agency had been employed, is as follows:

292 hours listing and typing names	$146.00
83 hours addressing envelopes by typewriter	41.50
14 hours stamping envelopes, 2 hours addressograph, 27 hours inclosing	16.12
Total	203.62

4. Did any member of the Federal Reserve Board suggest the printing or distribution of the said speech?

The telegram mentioned in the answer to question (1) above was signed by Governor Harding, as is usual in messages from the Federal Reserve Board. A copy of it, of our reply thereto on the same day, and of a subsequent telegram dated January 24 from the assistant secretary of the Federal Reserve Board, which constitute the entire correspondence between the board and this bank on the subject, are attached hereto.

Respectfully yours,

WM. A. DAY, *Deputy Governor.*

FEDERAL RESERVE BANK OF SAN FRANCISCO,
January 18, 1922.

(Translation of telegram received from Governor Harding, Reserve Board, Washington, to Mr. Perrin, Federal Reserve Bank of San Francisco.)

Kindly acknowledge receipt of this telegram No. 165.

Think Senator GLASS's great speech defending Federal reserve system should be widely and promptly circulated. Government Printing Office will print special copies of it Friday, 20th, and additional orders should be given to-morrow. Printing Office estimates cost of copies at from 5 to 7 cents each.

Please wire board promptly how many copies your bank wishes.

HARDING.

(Telegram sent over leased wire from Federal Reserve Bank of San Francisco to Harding, Reserve Board.)

January 18, 1922.

Desire 20,000 copies of Senator GLASS's speech. Please wire dimensions of page so we may prepare and address envelopes here for prompt distribution. How soon may we expect shipment?

PERRIN.

(Translation of telegram received from Mr. Eddy, Reserve Board, Washington, to Mr. Perrin, Federal Reserve Bank of San Francisco.)

FEDERAL RESERVE BANK OF SAN FRANCISCO,
January 24, 1922.

In order that the proper department of your bank may begin addressing envelopes in connection with distributing copies of speech of Senator GLASS referred to in Governor Harding's transaction 165, January 18, 1922, you are advised envelope of sufficient size to inclose pamphlets 6 by 9¼ inches, containing 48 pages, should be used.

EDDY.

THE TARIFF.

Mr. SMOOT. Mr. President, we have had an hour and fifty-five minutes excursion into Wall Street, and I hope that the balance of the day may be put in upon the tariff bill.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to

regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. SMOOT. I send to the desk an amendment to paragraph 1003.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. In paragraph 1003, jute yarns or roving, on page 132, line 11, the Senator from Utah proposes to strike out "9 cents per pound" and insert in lieu thereof "7 cents per pound, but not more than 40 per cent ad valorem."

Mr. MOSES. I move to amend the amendment of the committee by striking out "40" and inserting "35," so that it will read, "7 cents per pound, and not more than 35 per cent ad valorem."

Mr. ROBINSON. Mr. President, I would like to test the sense of the Senate by proposing an amendment to strike out "40" and insert "20." Under the parliamentary practice I will ask the Senator from New Hampshire to withhold his amendment until my amendment can be disposed of, if he will kindly do that.

Mr. MOSES. I will withhold it, Mr. President.

Mr. ROBINSON. I offer the following amendment to the committee amendment just proposed by the Senator from Utah [Mr. SMOOT], to strike out "40" and insert in lieu thereof "20," and upon that I desire to be heard.

The PRESIDENT pro tempore. The Chair understands that the Senator from New Hampshire has withdrawn the amendment proposed by him to the committee amendment. The Secretary will state the amendment just proposed by the Senator from Arkansas to the committee amendment.

The ASSISTANT SECRETARY. The Senator from Arkansas proposes to amend the amendment of the committee by striking out "40" and inserting "20," so that as amended it will strike from the bill on line 11 the words "9 cents per pound," and insert "7 cents per pound, but not more than 20 per cent ad valorem."

Mr. ROBINSON. Mr. President, I hope the Senate may proceed now to the consideration and disposition of the items in this paragraph as rapidly as may be consistent with their proper determination.

The Senator from Utah [Mr. SMOOT], on July 18, 1922, which was and still is the legislative day of April 20, proposed a large number of amendments to this schedule, and they were printed. No opportunity to consider those amendments had been afforded the Senate prior to that time. This morning, after the Senate convened, my attention was called to the amendment recently submitted by the Senator from Utah, which seeks to place a maximum duty on certain classes of jute yarns at 40 per cent ad valorem. I have been looking into the amendment now proposed by the Senator from Utah on behalf of the committee with the assistance of a very able expert upon the subject, and I want the Senate to understand just what the effect of this amendment will be if it is agreed to.

Under the Underwood Act the rates on jute yarn are 15 per cent and 20 per cent, respectively, applied to the coarser and finer grades. Under the act of 1909 the rates are equivalent, approximately, to 32 and 35 per cent ad valorem. Under the proposal now submitted by the Finance Committee the maximum rate will become the actual rate, or approximately, say, 40 per cent as to the class to which the amendment applies.

There is no maximum limitation proposed by the committee as to the second class of yarns embraced in the paragraph, and I am informed that the ad valorem equivalent for the rate proposed therein is approximately 50 per cent. Under the present rates, which I have already stated to be 15 and 20 per cent, respectively, applied to the finer and coarser jute yarns, there have been only limited amounts imported. Upon examination of the tariff survey I find the following statement at page 19 of the report relating to yarns, threads, and cordage of vegetable fibers other than cotton:

> At no time during the last 30 years has domestic production of jute yarn been subject to foreign competition of a formidable character. The average annual importation during the last 30 years has been 1,757,223 pounds, whereas the annual consumption of jute in the United States, which is a fair approximation of our output of yarn, has usually ranged between 200,000,000 and 250,000,000 pounds. Thus, less than 1 per cent of our consumption of yarn is imported. This situation has existed even though Dundee, the source of practically all of our imports, has possessed at least two important advantages over the domestic industry—(1) lower labor costs, and (2) lower first costs, i. e., of mill and equipment.

The report then proceeds to discuss in some detail the conditions of the industry and the advantages which the American industry has over the foreign industry. It is said:

> That the tariff has been a factor in offsetting these disadvantages to the American industry is, of course, obvious, but there has been other counterbalancing advantages:
>
> 1. The specialization of Calcutta and Dundee wholly or largely on jute cloths has undoubtedly been a factor in stimulating our domestic production of jute yarn for other purposes, such as carpet, twine, and cordage. A special opportunity has existed for development along these lines. Because of their lower labor costs, Calcutta and Dundee have preferred to specialize in the production of jute goods requiring a maximum of labor of such skill as is available to them. Calcutta labor, being comparatively unskilled, has been utilized to the maximum degree by weaving the yarn into coarse burlaps and sacking. Such goods, while requiring more labor than does the production of yarn, have not required skill beyond that attainable by native labor under proper supervision, and because of the immense demand, have offered the greatest opportunity for mass production. Dundee labor, possessing much greater skill, has been utilized so far as possible in production of finer jute cloths and specialties, though her exports of yarn have also been considerable.
>
> 2. Jute yarns for carpet, twine, and cordage are, for the most part, coarser than those used in burlap. Since the labor cost increases with the increasing fineness of the yarn, it is apparent that carpet and cordage yarns can be produced here at a smaller disadvantage of labor cost than can yarns for burlap.
>
> 3. Much of our jute twine and cordage, and some of our carpet yarn, is produced by large cordage concerns which make both hard-fiber and soft-fiber cordage, with many of the resultant economies of large-scale organization. The domestic cordage industry is an old and well-established industry.
>
> 4. The existence of a large domestic carpet industry has afforded a large outlet, close at hand, for carpet yarn.
>
> 5. On coarse yarns for cotton bagging our labor disadvantage has been at a minimum, and the domestic production in the past of practically all of our bagging requirements has naturally required a large production of such yarn.

As already stated, the rates under the Underwood law on jute yarns are 15 and 20 per cent ad valorem, respectively. The specific duties proposed in the Senate committee bill will average about 50 per cent equivalent ad valorem. The Senate committee amendment giving a maximum duty of 40 per cent means practically a straight 40 per cent ad valorem duty. It is, therefore, proposed in the amendment of the Finance Committee last submitted to more than double the duties on jute yarns, although we produce more than 99 per cent of our requirements. This increased duty must result in an added burden to the users of jute yarn, particularly the carpet manufacturers, who are the chief users.

The duty on the cotton yarn runs from 5 to 27 per cent ad valorem. I inquire why jute yarn, then, should bear an equivalent of a straight ad valorem rate of 40 per cent? Under the present rate, less than one-half that proposed by the committee, importations are very small, less than 1 per cent of the consumption. Under no theory, then, with which I am familiar, taking the theory of protection as ordinarily applied, can the rates now proposed by the Finance Committee be justified. Their only effect will be to prohibit importations entirely, to operate as an embargo, or to place an additional burden—an unjust additional burden, in view of the facts which I have stated—upon the users of this very essential, if not indispensable, commodity.

The Senator from New Hampshire [Mr. MOSES] has indicated his purpose to propose an amendment to the committee amendment, if the occasion arises, reducing the ad valorem maximum as to the first class of jute yarn from 40 per cent, as proposed by the Finance Committee, to 35 per cent. While, of course, that would be better from my standpoint than the proposition of the committee, in my opinion and from my study of the subject I believe the reduction which his amendment proposes is not adequate to meet the necessities of the trade.

Mr. MOSES. Mr. President——

The PRESIDING OFFICER (Mr. WADSWORTH in the chair). Does the Senator from Arkansas yield to the Senator from New Hampshire?

Mr. ROBINSON. I yield.

Mr. MOSES. I do not wish the Senator from Arkansas to misunderstand the purpose of my amendment. The purpose of the amendment is not to strike down protection on jute yarns, because I believe in it. The purpose of my amendment is to make the entire series of schedules in the bill symmetrical and to secure the same differential on the manufactures of jute that we have upon the other fabrics.

Mr. ROBINSON. I agree with the Senator that his position as stated is entirely consistent with the theory of protection. I know the Senator does favor protection, and I had not intended to say anything that would reflect upon the integrity of his position as a protectionist. I have already stated that there ought to be a consistency between the rate on jute yarns and the rate on other yarns with which jute yarns may come in competition. I have already pointed out the fact that under the rates already adopted in the cotton schedule the range is from 5 to 27 per cent ad valorem on cotton yarns and, therefore, to accomplish the very purpose which my friend the Senator from New Hampshire has in his mind, I have suggested an amendment considerably lower than the amendment which he has stated he has in mind, but which I think will much better

effectuate the purpose it espouses than the amendment which he proposes.

Mr. MOSES. The result of the amendment of the Senator from Arkansas will be to make a much greater differential upon the finished cloth, but it will entirely destroy the purpose which I have in mind; which is to have a symmetrical arrangement of the duties on yarns with the duties on the fabrics. All I am asking is to secure an adequate and symmetrical arrangement of the differentials.

Mr. ROBINSON. I go further than the Senator from New Hampshire. I maintain that the rates in this paragraph are excessive, and that they ought to be reduced and that the rates on manufactures should also be reduced. At the time when the parliamentary situation permits it, in all probability amendments will be offered for that purpose. But since the question is before the Senate now I want to know what can be the justification for the imposition of a 40 per cent ad valorem duty on jute yarns of this class when under the existing law the rates are only 15 and 20 per cent, and when there are no importations under that lower rate. I have given considerable thought to the question and read such information as is available in the report of the Tariff Commission. Already there has been pointed out the inconsistency in levying a high ad valorem rate on jute yarns out of proportion to the rates levied on cotton yarns.

Mr. SMOOT. Mr. President, if the amendment of the Senator from Arkansas were adopted without any other changes in the rates provided for under the different sizes of thread, the finest yarns would carry a rate on to-day's prices of 2.8 cents a pound. We have provided on "20 pound up to but not including 10 pound" a rate of 4 cents per pound.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from Utah yield to the Senator from Arkansas?

Mr. SMOOT. I yield.

Mr. ROBINSON. The rate I proposed is the rate under the Underwood law.

Mr. SMOOT. I am aware of that, and I take it for granted that if the 20 per cent proposition should carry, then every one of the specific rates would have to be changed accordingly. The Senator will notice that the 40 per cent only applies to fine yarns.

Mr. ROBINSON. Certainly; but the Senator will also notice that under the parliamentary status I am not permitted at this time to offer the other amendments which would be made necessary if this amendment were agreed to. I will offer the necessary amendments to make other provisions in the paragraph conform to this amendment when the committee amendments have been disposed of. The same thing has happened as to almost every other amendment we have considered. There is a relationship between these provisions, and when one of them is changed it frequently becomes necessary to change the others. My position is that they ought to be changed; that they are all too high; that there is not a fact which can be stated, there is not a statement in the report of the Tariff Commission, there is not a statement in the testimony of any witness which justifies the imposition of these very high rates on jute yarn.

Mr. SMOOT. I do not want the Senator to think that I was criticizing what he said or criticizing his position. I recognize the Senator could not offer the amendments at this time, and I only made the statement in order that the Senate might understand the situation.

Mr. President, conditions affecting the jute business have changed of late. American manufacturers are leaving America and going to Calcutta, India, and establishing industries there. I wish to call attention to the fact that in 1910, under the Payne-Aldrich Act, our importations amounted to 5,919,086 pounds of jute yarn. In 1921 they had increased to 9,032,441 pounds. The consumption in 1914 of long jute yarns and also jute butts amounted to 242,701,000 pounds. The committee did not decide to report the latter part of this amendment which reads "but not more than 40 per cent" until the other day. The finer yarns have dropped in price until they may be purchased to-day for 14 cents a pound. A duty of 7 cents a pound on a price of 14 cents is equivalent to 50 per cent ad valorem. Under to-day's prices, because those yarns have decreased in value very rapidly of late, the committee did not desire to place any rate of duty upon those yarns to exceed 40 per cent. Therefore that limitation has been made.

The object that the Senator from New Hampshire [Mr. MOSES] has in mind is to give a differential between the duty upon yarn and the duty upon the cloth made from the yarn which is found in paragraph 1008a, which is the provision designed to take care of linings. The committee decided to cut that rate. The Senator from New Hampshire desires still to have a 15 per cent differential; in other words, if a rate of 40 per cent is imposed on the yarns, the Senator from New Hampshire thinks there ought to be a duty of 55 per cent on the cloth made from them, or a differential of 15 per cent. The committee, however, has recommended a rate of 40 per cent on the yarns and 50 per cent on the cloth, or a differential of only 10 per cent.

The Senator states that he does not know of any conditions existing that would justify the rates which are proposed to be imposed in this bill. The specific rates of duty on single yarns herein provided represent the difference between the mill selling price of foreign yarns and competing domestic yarns. The rates are dependent upon the pound number. The pound number is based on the yardage from spindles of 14,400 yards. The system of numbering is explained in detail in paragraph 1, page 907 of the Summary of the Tariff Information for 1921. I shall not take the time of the Senate to call attention to that system in detail. Competition at present is principally from Dundee, but competition is likewise feared from Calcutta, India. In support of this contention reference is made to detailed lists of manifests of vessels cleared at the Calcutta customhouse for foreign ports from April 17 to May 13, 1922, wherein the manifests of vessels clearing for Boston show shipments of jute yarn to the extent of 16,124 pounds. I have those manifests here, showing the number of pounds shipped and also the prices at which they are invoiced. These shipments represent the initial importations of an American firm which has recently erected yarn and weaving mills in Calcutta, India. In passing I wish to say, Mr. President, that the firm referred to is the Ludlow Co. If their undertaking is successful—and I have not any doubt but that it will be—they intend to transfer the making of all jute yarns as well as cloth from America to Calcutta, India.

Mr. MOSES. Mr. President, may I interrupt the Senator at that point?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from New Hampshire?

Mr. SMOOT. I do.

Mr. MOSES. I wish to point out to the Senator that by granting to the manufacturer the additional differential for which I am asking the purpose to transfer the American industry to Calcutta will be thwarted.

Mr. SMOOT. To the extent of 5 per cent more than the committee has provided.

This competition, as the Indian spinner becomes more proficient in the spinning of jute yarn of a quality required by the American users, will seriously affect the American producer of jute yarn. The attention of the Senate is directed to the tremendous difference in the cost of spinning such yarns in India as compared to the cost in the United States. Indian wages are as follows, as shown on page 77 of the Tariff Commission's report on jute cloths, the rupee being equivalent to 32.4 cents: Carders receive $0.892 per week: rovers $1.75 per week; and spinners $1.40 per week. The wages prevailing in this country are approximately twice the wages in years preceding the war, and it is therefore fair to assume that the wages herein stated will materially decrease as more normal conditions obtain.

As against the wages paid in India, one of the largest American mills in January, 1921, paid carders $14.65 a week, and paid rovers $18.60 per week. The wages paid to American operators were on the basis of a 48 to 55 hour week. By the terms of the Indian factory act, passed in 1912, 12 hours constitute a day's work; in other words, the wages paid in the United States in the jute-spinning industry are approximately ten times as great as the wages paid in Indian spinning mills. In India the cards make just as many revolutions per minute, the mules go in and out just as many times, the handling of the product is done by machinery, with the exception of the hand labor which is necessary in case of any breakdown in the threads in the mule or in the roving of the yarn.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Arkansas?

Mr. SMOOT. I yield.

Mr. ROBINSON. I myself pointed out during the course of the brief remarks I made on this subject that there was a wide difference between the cost of labor in India and the cost of labor in the United States applicable to the jute-spinning industry; but the Senator from Utah, notwithstanding that fact, must admit that India is not competing with the American spinners of jute. It never has done so, and there is no prospect that it will do so in the near future.

Mr. SMOOT. The importations for 1921 were twice the importations of 1910, and, not only that, but the manifests we have here, if they are correct and if the prices which are invoiced are correct, show that there is no question but that jute yarn is going to be imported in large volume in the future.

Mr. ROBINSON. Of course, the Indian industry is engaged principally in the manufacture of burlap and other materials of that nature, and it has not sought to come in competition with the American industry.

Mr. SMOOT. That is, in the past.

Mr. ROBINSON. Yes; and it is not seeking to do it now. The Senator has referred to the fact that in 1921 there was an excess of importations of jute yarn compared with 1910, but I do not take it that the Senator means to imply by that statement that there is evidence of a fixed purpose upon the part of those engaged in the Indian industry to invade the American market to a great extent in connection with jute yarn.

Mr. SMOOT. Mr. President, if the Ludlow Co. is successful—and I have no doubt that they will be because they are shipping now in large quantities—there will certainly be large importations of jute yarn. I have here before me a letter of July 15, 1922, in which the statement is made:

> We have just received advice from our Calcutta office that on manifest dated June 15, steamship *Orteric*, for Boston, there is a shipment consigned to Ludlow Manufacturing Association, 55 bales Hessian yarn, 31,200 pounds, valuation rupees 3,900. Extending this at 30 cents to the rupee will make an average valuation per pound of yarn 3.7 cents.

That is what the American manufacturer is up against and that is what the Ludlow Co. is doing to-day.

Mr. ROBINSON. Mr. President, will the Senator yield to me for a moment?

Mr. SMOOT. Yes.

Mr. ROBINSON. By examination of the record respecting the imports for the year 1921 I find that the total jute yarns of three classes imported from Europe only amounted to about 9,000,000 pounds, whereas the consumption was approximately 200,000,000 pounds.

Mr. SMOOT. The importations were 9,032,441 pounds.

Mr. ROBINSON. Yes. I have no information as to the exact amount imported from India. Can the Senator state that?

Mr. SMOOT. No; I have not the figures here in detail.

Mr. ROBINSON. So the Senator will see the point I attempted to make in the beginning is applicable even to the business for 1921. We consumed more than 200,000,000 pounds and imported from all the world, including India, something over 9,000,000 pounds. The Senator can easily see the relationship 9,000,000 pounds bears to the total consumption of 200,000,000 pounds. We have not the definite figures as to the importations from India, although somewhere during the course of my studies I have read the statement that approximately one-third of it may have come from Dundee. Taking that as correct, the importations from India in the year 1921 were probably something in excess of 5,000,000 or in the neighborhood of 6,000,000 pounds. When 6,000,000 pounds are compared with the total consumption in the United States of 200,000,000 pounds it must be seen that there is no occasion for fright among the spinners of jute yarns as to the invasion of the American industry by the India producers.

Mr. SMOOT. Mr. President, I want to call attention to the fact that in 1914 the importations were only one-half of 1 per cent of the consumption, as stated by the Senator, but now they are nearly 5 per cent, and according to the manifests which we have here and the prices quoted, if they are correct, it is not difficult to see what is going to happen to this industry in the United States. The domestic manufacturers will either have to bring down their costs at least one-quarter or else their business is going to be taken away from them.

Mr. KING. Mr. President, will my colleague yield?

Mr. SMOOT. Yes; I yield.

Mr. KING. Does the Senator conceive that if there is an importation of 5 per cent of this product, the consumption being more than 200,000,000 pounds, that is an evil or a danger to be apprehended?

Mr. SMOOT. No.

Mr. ROBINSON. Mr. President, right in that connection, let me point out to both Senators from Utah what seems to have escaped the attention of the senior Senator from Utah [Mr. SMOOT]—that the total annual consumption in the United States ranges from 200,000,000 to 250,000,000 pounds. I have just shown, in the best way that the information available will permit, that the importation from India was perhaps something in excess of 5,000,000 pounds last year. What I should like to know is how the Senator from Utah figures that 5,000,000 pounds is 5 per cent or nearly 5 per cent of the total consumption of 200,000,000 or 250,000,000 pounds?

Mr. SMOOT. The Senator stated that that was on all the importations of jute yarn, wherever they come from.

Mr. ROBINSON. I said that the total consumption in the United States was from 200,000,000 to 250,000,000 pounds, and that there was a total importation from all sources of something in excess of 9,000,000 pounds last year, and that of that 9,000,000 pounds India probably exported to the United States between 5,000,000 and 6,000,000 pounds, although the exact amount can not be stated. What I inquire of the Senator from Utah is how he arrives at the conclusion, if those facts are approximately correct, that India exports to the United States approximately 5 per cent of the jute yarn used? It would be less than 2½ per cent.

Mr. SMOOT. I will answer my colleague first, and then I will answer the Senator from Arkansas. If the importations have doubled from 1910, and if the importations from 1914 have increased by nearly nine times, and those importations have been increasing just of late, particularly since an American manufacturer has gone to India to make goods, you can see what is going to happen.

Mr. ROBINSON. Will the Senator permit an interruption right in that connection? There is an implication from the Senator's last remark that he wants to attract the manufacture of jute fabrics from India to the United States. How can he expect to do that if he raises to 40 per cent ad valorem the duties on jute yarns imported into the United States? How can he expect jute manufacturers in this country to compete with jute manufacturers in India?

Mr. SMOOT. If the yarn comes in, the cloth will be made here. If the cloth comes in, of course neither the yarn nor the cloth will be made here. In further answer to my colleague, I wish to say if it were 5 per cent I would not think for a moment that that was out of the way. I would not object to that if that were all there were to it; but if these manifests are right, and they can buy this yarn in America the same as these manifests and the invoice to the Ludlow Manufacturing Association claims that it is sold, I want to say to you that the rates that are provided here by the committee are not going to keep them out; but the committee feel that they will not stand for a higher rate than a maximum of 40 per cent.

Mr. ROBINSON. Now, will the Senator be good enough to yield?

Mr. SMOOT. Yes; certainly.

Mr. ROBINSON. The Senator stated awhile ago, as a justification for this very high rate of 40 per cent ad valorem on jute yarns, that the importations from India had more than doubled from the year 1910 to the year 1921.

Mr. SMOOT. No; I said the importations into the United States from all sources.

Mr. ROBINSON. In that statement, if that was the statement, the Senator was in error. If the Senator will pardon me for bringing it to his attention, he will find by an examination of the survey relating to this subject, on page 22, that for the year 1910 the total importations of jute yarn were 6,267,105 pounds.

Mr. SMOOT. Five million nine hundred and nineteen thousand and eighty-six pounds.

Mr. ROBINSON. I shall be glad to show the Senator my figures, which, it seems, do not conform to the figures that he has; but there is the survey of the Tariff Commission.

Mr. SMOOT. One figure is for the calendar year and the other is for the fiscal year. I always give these figures for fiscal years, because that is the way we report everything else. In the next year, then, it would be that much more or that much less.

Mr. ROBINSON. But even with the figures which the Senator now quotes, five million and something, that would be more than one-half the amount imported during the year 1921.

Mr. SMOOT. Approximately one-half, I said. It is a little less. We had, in 1921, importations of 9,032,441 pounds.

Mr. ROBINSON. For the calendar year 1910, according to the report of the Tariff Commission, there were importations of 6,267,105 pounds. The year prior to that—illustrating the fact that you can not take any one year as fully illustrative of the business as a whole throughout a long period—the importations amounted to only 1,687,409 pounds; and even in the year 1911, immediately following the year which the Senator from Utah took, the importations were only 2,070,879 pounds; so that the calendar year 1910—and to some extent, of course, the fiscal year conforms to it in that particular—was an exceptional year as to the importation of jute yarns into the United States. There was about four times as much imported in 1910 as there was in 1909, and there was more than twice as much imported in 1910 as there was in 1911.

Mr. SMOOT. That makes it about four times worse than I reported it. I did not want any figure quoted here as to which anybody could say to me: "That is not right."

Mr. ROBINSON. It makes it perfectly clear——

Mr. SMOOT. No; it makes this quite clear, and I am perfectly willing to take the Senator's figures now as he has used them, because I would not have done it. I wanted to be perfectly fair to the Senate.

Mr. ROBINSON. Mr. President, the Senator does not mean to say that it is unfair to call the attention of the Senate to the actual figures for a number of years?

Mr. SMOOT. No.

Mr. ROBINSON. Certainly the Senator can not contend that I am unfair in refusing to be confined to any particular year as to the imports of jute yarns.

Mr. SMOOT. I am perfectly willing, then, to take the years that the Senator mentioned, and instead of the quantity being twice as much he will find out that it is about seven times as much; but I took the very highest quantity that was imported to compare with.

Mr. ROBINSON. No; the Senator does not mean that.

Mr. SMOOT. Let us take the year 1911, that the Senator read, then.

Mr. ROBINSON. The imports in 1911 were more than 2,000,000 pounds, and, of course, the Senator could not say that they were seven times those of 1921.

Mr. SMOOT. No; but there was one year that the Senator read when the imports were one million and some odd pounds.

Mr. ROBINSON. Yes; it would be about five times that amount. That was the year 1909.

Mr. SMOOT. And the other year.

Mr. ROBINSON. That was the year I read—1909.

Mr. SMOOT. There were two years that the Senator read.

Mr. ROBINSON. But the Senator ought to be a little more accurate.

Mr. SMOOT. I want to be perfectly accurate. I want to say to the Senator that if I had taken the year 1910 to compare with 1921, and had taken the small year before or the small year after, I would not have considered that I was doing the right thing; but I took the highest year under the Payne-Aldrich bill and compared the imports of that year with those of the year 1921. I did, however, call attention to the fact that in 1914 there were only 1,133,778 pounds imported, and that the importation in 1921 was over eight times the importation of 1914.

Mr. LODGE. Mr. President——

Mr. SMOOT. I yield to the Senator from Massachusetts.

Mr. LODGE. The total amount of imports does not seem to me very serious. I do not think it does to the Senator.

Mr. SMOOT. No; 5 per cent is not very serious.

Mr. LODGE. But what strikes me about the matter is what has not been emphasized by either the Senator from Utah or the Senator from Arkansas, that the Senator has shown that what I believe to be the greatest jute-manufacturing concerns in the United States, very old, long estabished—they are in my State—have begun to have their jute yarns made in Calcutta, and that means transferring that portion of the work to Calcutta, and the reason is because they have been unable to compete with India here. I am not defending their doing it. They have a perfect right to do it. I did not know anything about it until it was recited to me.

Mr. ROBINSON. Let me ask the Senator from Massachusetts this question for information: Will not the imposition of high rates of duty on jute yarns imported into the United States tend to drive other manufacturers from the United States to India in the manufacture of their jute yarns?

Mr. LODGE. No; I think not.

Mr. SMOOT. Just the reverse; it will keep them here.

Mr. LODGE. I think it will have exactly the reverse effect. It is the transference of an industry of importance, and the labor employed in that industry is extinguished here and the labor in Calcutta is substituted for it. That is what is significant about it. It is not the amount. Of course, if you are going to drive your great industries into other countries, where they can get cheaper labor, and bring the product in here at a profit, they will make the things abroad, just as the Singer sewing machines are practically all made abroad.

Mr. SMOOT. Mr. President, I was going to say that I was told also that the next largest concern in the United States is now contemplating moving to Calcutta. The very fact that one of the largest American jute spinners has transferred his production of this class of merchandise to India is a positive indication that there is a decided advantage in cost production in India as compared to the cost prevailing in this country; and that is demonstrated by the manifests that we have here, and the invoices, and the prices named in those invoices.

Inasmuch as the present competition comes largely from Dundee, and more complete price data were available for comparison with American prices, the committee has fixed these rates on the basis of Dundee, but has allowed some increase over the rates which these prices would indicate as necessary in order in some degree to take care of the future competition which this industry undoubtedly faces from Calcutta. In order to determine what the rate would have to be if based upon Dundee competition solely, the committee sent representatives to the largest carpet mills in the country to ascertain what they were paying for comparable grades of domestic and Dundee yarn.

On third-grade 14-pound yarn, for the last quarter of 1921, one of the largest mills was paying 8½ cents, foreign factory price, which, with landing charges, exclusive of duty, brought the price at the mill to 9.48 cents per pound. The same carpet mill was paying at that time 12½ cents a pound for domestic yarn. Owing to the fact that this 12½ cents was a forced price, because of foreign competition, however, the committee has considered it fair to make an allowance in establishing the difference in competitive conditions.

In the case of second-grade 14-pound yarn, Dundee yarn can be delivered at American carpet mills to-day for 12.6 cents a pound, as against 15.87 cents a pound for comparable domestic yarn.

Attention has been directed to the fact that the rates in the other brackets of this paragraph are all adjusted in relation to the basic rate which the committee has established upon the bracket which contains the 14-pound yarn. This adjustment is made on the basis of the ratio of conversion cost in relation to 14-pound yarn.

In evidence of the increased foreign competition resulting from the rate of the act of 1913, reference is made to the imports, which show the following:

Those imports I have already stated and will not take the time to restate them. I think perhaps it would be better as each of these paragraphs is reached to make a brief statement as to the changes the committee has made and the reasons for the changes. The pending amendment is to make the rate 20 per cent on the fine yarns, which, figured on to-day's prices, since they are being sold freely at 14 cents, would be 2.8 cents a pound. If that 20 per cent rate is agreed to, of course every one of the preceding rates will have to be agreed to, necessarily, because we do not want an unbalanced schedule. If the 20 per cent rate is made the basis, then, of course, all of the other duties imposed upon each step taken in the manufacture of jute will have to be accordingly changed.

Mr. KING. Mr. President, as I understand my colleague, he does not regard the imposition of 5 per cent, or perhaps a little more, as disadvantageous to the consuming public in the United States?

Mr. SMOOT. I would not think so.

Mr. KING. Does not the Senator think that the imposition of 5, 10, or 15 per cent, even if a person is a protectionist per se, is a good thing for the consuming public, and indeed for the industry itself, because it tends to prevent too great a monopolistic control, and thus obviates the resentments which would arise in the consuming trade against the producer of the article?

Mr. SMOOT. I admit it has a tendency to regulate the prices.

Mr. KING. May I inquire of my colleague, who has answered me very frankly, if this duty which the committee recommends, or the duty which is recommended by the able Senator from New Hampshire, were to obtain, would not the effect be to increase the price of the jute yarn, or whatever form it takes, to the consumer in the United States and to that extent raise the prices of cordage and the other various products of jute and jute yarn to the American consumer?

Mr. SMOOT. That is necessarily so.

Mr. ROBINSON. It could have no other justification.

Mr. SMOOT. Mr. President, I want to make a brief statement as to the theory of this schedule. Perhaps I could express it in only one way, that there is a line of competitive goods falling under this paragraph and a line of noncompetitive goods. The theory of this bill is to protect those competitive goods, and the rates are lower upon the noncompetitive goods. As the different paragraphs in this schedule are reached, I want to call attention to that fact, because a person reading this provision, if the bill shall become law, not knowing the object the committee had in view, and noting the difference between the rates imposed in the different paragraphs, would say immediately, "They did not know what they were doing. Why do

these high-priced articles, these fine linens—goods, however, not made in the United States—carry a lower rate than the goods which are competitive?"

I want to say frankly to the Senate right now that the American people, on account of climatic conditions and other reasons that there is no need for me to mention at this time, can not make the very finest linens. I suppose that is understood all over the world. That class of goods can not be made in other countries. Germany can not make them as they can be made in Ireland, and so far no one else in the world has reached such perfection in the making of fine linen goods as have the people in one particular section in Ireland.

France has tried it, with all her ingenuity, and with all the latest machinery that was known in the world, and with as skillful operators as there are anywhere in the world, and there is yet one grade of cloth she can not touch. She can not make it in a perfected piece of cloth as they make it there.

It may be that we will be criticized for the difference in the rates. It may be stated by some, "Here is a crash towel," or "Here is a huck towel, and it has a higher rate of duty on it than a linen tablecloth, one piece costing $50, $60, $75, $100." We can not make a tablecloth of that quality in the United States.

Mr. KING. It ought to bear a luxury tax.

Mr. SMOOT. I was going to say to the Senate, as my colleague just intimated should be the case, that on that class of goods we do impose a duty, against which the importers are protesting. If the people who buy that kind of goods are compelled to pay part of their money into the Treasury of the United States, all well and good.

That is about the theory of this duty, and whatever action is taken upon this amendment will have a bearing upon all of the other paragraphs in this schedule.

Mr. ROBINSON. Of course, I understand that; and that is exactly what I designed it should do. I would like to see all of these rates reduced correspondingly. It may be that the present rate on jute yarn is not high enough, but I think the facts, even as stated by the Senator from Utah, bear out the contention that they are ample. To increase the rate on yarn will constitute a basis for further increasing the rates on the articles manufactured from the yarns.

Taking even the figures of my friend the Senator from Utah, they show that the importations amount now to something more than 2½ per cent of the amount of this commodity consumed in the United States. If it were 5 per cent, or even something more than that, I would not think that the American industry of jute spinning was in serious danger of being invaded by the Indian industry.

India unquestionably can manufacture jute yarns cheaper than the manufacturers in the United States can produce them. I have never made any question of that fact. But India finds it more profitable to make other products, and she has never competed with the American industry in this particular branch. She is not doing it now. The present rates have proved adequate for every legitimate purpose, and I respectfully suggest that until conditions change there is no justification for this very high rate. I am ready for a vote.

Mr. KING. Mr. President, I understand the consumption of jute yarns amounts to more than 200,000,000 pounds per annum?

Mr. ROBINSON. Yes.

Mr. KING. It is obvious that the products made from that yarn are important to the American people. They consist of cordage and other articles which are in common use. I would like to ask the Senator whether or not, in the long run, it would be more advantageous to the American people to increase the consumption—and increase in consumption results from a cheapening of the product—than to manufacture from the raw material into the finished product a considerable portion of that which we use in the United States?

Mr. ROBINSON. I can not answer the question of the Senator from Utah with accuracy. Unquestionably, there are manufacturing industries in which the United States can not compete with other countries. The Senator from Utah has referred to some which, in his opinion, bear that relation to our industries. Jute spinning might become one of them. It would be much better for jute yarns to be manufactured abroad than for the American consumer to be charged an exorbitant and unreasonable price and for the businesses which are dependent upon that industry to be forever hampered by having to pay an excessive price for this very essential commodity. I am ready for a vote on the amendment.

Mr. KING. Mr. President, in the discussion of these tariff rates, I have sometimes been impressed with the thought that we have lent too much attention to the demands of small enterprises in the United States that were seeking to convert raw material produced abroad, not produced in the United States, and which perhaps never will be produced in the United States. They purchase the raw material and then establish an inconsiderable industry in the United States for the purpose of converting raw material into the finished product, and the spread between the raw material and the finished product resulting from the fostering of the domestic industry is too great, and we are penalizing the American consumer too much in order to aid some unimportant industry.

We have many evidences of that fact in the discussion of this bill. As I understand the situation here the raw product, to wit, jute, is not grown in the United States. We import it. It is transformed into the finished product very cheaply in other countries. It is important that we have for the American people jute yarns, and the finished product, or the quasi finished product of the raw material, as cheaply as possible, because that stimulates other industries.

If we can get cheap jute yarns in the United States it will develop cordage plants and other industries which transform the yarns into valuable and important finished products that are consumed to the extent of millions of dollars and tens of millions of dollars in the United States.

But in order to help a few mills that transform the raw material into the yarn the proposition now is to add to the finished product an enormous duty, an enormous tax, the result of which would be that the finished product—that is, the yarn—would become more costly, and its production therefore less, and by reason of this restriction the industries that might be established to manufacture the yarn and cordage and other products would be greatly interfered with.

This is an instance, it seems to me, where we are injuring American industry, not perhaps one particular industry, but other industries which in the aggregate would be far more important and advantageous to the American people than one limited or restricted industry. It seems to me that in the interest of home industries and the building up of home industries we ought to get the yarn to the people as cheaply as possible, and with cheap yarns a multitude of other industries could be developed which would inure to the advantage of the American people.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas [Mr. ROBINSON] to the committee amendment.

The amendment to the amendment was rejected.

Mr. MOSES. Mr. President, I now renew the amendment which I withdrew at the request of the Senator from Arkansas that the "40" be reduced to "35," so as to make it read "7 cents per pound, but not more than 35 per cent ad valorem."

I wish to say that I offer this amendment in order to make the entire schedule symmetrical and in order that the differentials in paragraph 1008a may be uniform. I voted against the amendment offered by the Senator from Arkansas because to my mind it did not offer sufficient protection to the line affected by this particular item. I happen to be a thorough-going protectionist, Mr. President, and believe in protection all along the line to all of the elements and factors entering into any finished product, and, therefore, I could not bring myself to vote for the low rate which the Senator from Arkansas proposed. I am offering the amendment now simply that the bill may have symmetry in order that, as the Senator from Utah [Mr. SMOOT] pointed out, the differentiation between the various yarns may still be maintained, and in order that the main basis in the finished product, the labor differential, may be made effective and to conform to the other labor differential in the rest of the items dealing with each material and running through paragraph 1008a.

I have no desire to detain the Senate upon the amendment except to say that the fabrics particularly affected by this line of duties are fabrics which had not been made in this country prior to the war. The industry has a firm foothold here. Ten per cent of the total consumption is already made here. With adequate protection every square inch of fabric used in the country will be made here because it is a mere process of textile manufacture. Anyone with enterprise and with sufficient encouragement can go into it. I simply ask for a sufficient tariff rate to cover the labor differential.

Mr. FRELINGHUYSEN. Mr. President——

Mr. MOSES. I yield to the Senator from New Jersey.

Mr. FRELINGHUYSEN. Will the Senator kindly tell us how firmly the industry is established here and the amount of capital employed?

Mr. MOSES. I just stated that 10 per cent of the total consumption is already made in this country.

Mr. FRELINGHUYSEN. How many mills are there?

Mr. MOSES. Only one, because only one man has had sufficient enterprise to go into the business.

Mr. FRELINGHUYSEN. What is the capital invested?

Mr. MOSES. I do not know.

Mr. KING. Mr. President, may I inquire of the committee whether it is their purpose to accept the amendment offered by the Senator from New Hampshire?

Mr. SMOOT. No; the committee have proposed a rate of 40 per cent to give a 10 per cent differential in paragraph 1008a. Paragraph 1008a relates to cloth made from this particular yarn. The Senator from New Hampshire desires to have a differential of 15 per cent, while the committee gave 10 per cent; in other words, gave the cloth 50 per cent and the yarn 40 per cent.

Mr. KING. Then, as I understand the position of the Senator from New Hampshire, it is not an effort to reduce the rate recommended by the committee?

Mr. SMOOT. Yes; it is an effort to reduce the rate on the 5-pound and finer yarns. The committee recommend a limit of 40 per cent and the Senator from New Hampshire now desires that it be made 35 per cent. That, of course, would mean, if we had 50 per cent on the cloth, that the differential between the yarn and the cloth would be 15 per cent, whereas the committee have reported it at 10 per cent.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New Hampshire to the amendment of the committee.

Mr. MOSES. I ask for a division on agreeing to my amendment.

Mr. SMOOT. Let us have the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). I am paired with the Senator from Michigan [Mr. TOWNSEND]. I transfer that pair to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. ROBINSON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the senior Senator from Missouri [Mr. REED] and vote "yea."

The roll call was concluded.

Mr. ELKINS. I transfer my pair with the Senator from Mississippi [Mr. HARRISON] to the Senator from Maryland [Mr. FRANCE] and vote "nay."

Mr. OVERMAN. I have a general pair with the senior Senator from Wyoming [Mr. WARREN]. I transfer that pair to the Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. GLASS. I transfer my pair with the senior Senator from Vermont [Mr. DILLINGHAM] to the Senator from Nevada [Mr. PITTMAN] and vote "yea."

Mr. JONES of New Mexico. I wish to inquire if the Senator from Maine [Mr. FERNALD] has voted?

The PRESIDING OFFICER. The Senator has not voted.

Mr. JONES of New Mexico. I have a general pair with that Senator and am not able to obtain a transfer. I therefore withhold my vote. If I were at liberty to vote, I should vote "yea."

Mr. NEW. Transferring my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from Vermont [Mr. PAGE], I vote "nay."

Mr. CALDER. I transfer my pair with the senior Senator from Georgia [Mr. HARRIS] to the junior Senator from Oregon [Mr. STANFIELD] and vote "nay."

Mr. HALE. I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. TRAMMELL. I have a pair with the senior Senator from Rhode Island [Mr. COLT]. In his absence, being unable to obtain a transfer, I withhold my vote. If permitted to vote, I should vote "yea."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 26, nays 31, as follows:

YEAS—26.

Ashurst	Kellogg	Overman	Stanley
Capper	Kendrick	Pomerene	Swanson
Caraway	Keyes	Ransdell	Underwood
Dial	King	Robinson	Walsh, Mass.
Fletcher	Moses	Sheppard	Walsh, Mont.
Glass	Myers	Simmons	
Heflin	Nelson	Smith	

NAYS—31.

Ball	Frelinghuysen	McCormick	Phipps
Borah	Gooding	McCumber	Rawson
Broussard	Hale	McNary	Smoot
Bursum	Johnson	New	Spencer
Calder	Jones, Wash.	Newberry	Sterling
Curtis	Ladd	Nicholson	Wadsworth
Elkins	Lenroot	Oddie	Willis
Ernst	Lodge	Pepper	

NOT VOTING—39.

Brandegee	France	McLean	Stanfield
Cameron	Gerry	Norbeck	Sutherland
Colt	Harreld	Norris	Townsend
Crow	Harris	Owen	Trammell
Culberson	Harrison	Page	Warren
Cummins	Hitchcock	Pittman	Watson, Ga.
Dillingham	Jones, N. Mex.	Poindexter	Watson, Ind.
du Pont	La Follette	Reed	Weller
Edge	McKellar	Shields	Williams
Fernald	McKinley	Shortridge	

So Mr. MOSES's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The secretary will report the next amendment.

The READING CLERK. In paragraph 1004, page 132, in lines 20 and 21, the committee propose to strike out "eight lea, 8," and insert "twelve lea, 10," so as to read:

Single yarns, in the gray, made of flax, hemp, or ramie, or a mixture of any of them, not finer than 12 lea, 10 cents per pound.

Mr. ROBINSON. Mr. President, I ask the Senator from Utah [Mr. SMOOT] what is the ad valorem equivalent, approximately, of the rate proposed in the amendment?

Mr. SMOOT. I have it on 14 lea. I have not worked it down to 8 lea. I can tell the Senator the equivalent ad valorem to-day on the 14 lea yarn.

Mr. ROBINSON. I am referring now to the committee amendment. The committee proposes to strike out 8 lea and insert 12 lea. That has the effect of increasing the rate.

Mr. SMOOT. Yes; and I will say to the Senator that it is done because of the increase in the rate on hemp and tow. It equalizes the increase that was made on the hemp and tow rate in paragraph 1001.

Mr. ROBINSON. I ask the Senator from Utah if it does not double the present rate?

Mr. SMOOT. I will say to the Senator that, of course, this is all controlled by the maximum rate which we are going to provide in the amendment, of which I think I gave the Senator a copy.

Mr. ROBINSON. The Senator did not give me copies of any amendments to-day except the one that I asked him for, which related to the first paragraph. In this connection I wish to say, Mr. President, that the committee ought to report its amendments and have them printed in advance of the consideration of these schedules.

Mr. SMOOT. This amendment is printed.

Mr. ROBINSON. This morning the whole debate centered about an amendment which was not reported until after the paragraph had been read. The Senator from Utah in connection with this amendment states that he proposes to offer the amendment submitted on the 18th of this month. I do not believe there is any justification for this amendment. I believe that the House rate is adequate. I do not desire to take a great deal of time in discussing the subject. The whole matter has been gone into; at least, it is intimately related to matters which have heretofore been discussed in connection with the former paragraphs. I am ready to vote on the amendment if the Senator from Utah is.

Mr. SMOOT. I wish to say to the Senator that the reason the committee changed the number of leas from 8 to 12 is that the duty on hemp and hemp tow and hackled hemp was increased in paragraph 1001, and the increase as to the leas equalizes the increases that were so made. If in conference there should be any change made in the rates on hemp and hemp tow and hackled hemp, of course corresponding changes would necessarily follow as to the leas.

Mr. ROBINSON. Now, I wish to ask the Senator from Utah why the amendment provides for 12 lea in line 21, on page 132——

Mr. MCCUMBER rose.

Mr. ROBINSON. Let me finish my question.

Mr. MCCUMBER. Yes.

Mr. ROBINSON. And for 11 lea in line 10, on page 133?

Mr. MCCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield; and if so, to whom?

Mr. SMOOT. I will say to the Senator from Arkansas that the change in the number of lea to which he refers is made in order to bring about the proper equivalent ad valorem rate. That is why it is done.

Mr. ROBINSON. What is the ad valorem equivalent?

Mr. McCUMBER. I was about to give the Senator that, if he will allow me, for I have just had the computation made. The equivalent ad valorem on the latest prices is about 30 per cent on the first bracket.

Mr. ROBINSON. What I do not understand is—and the question which I have just asked the Senator from Utah [Mr. SMOOT] relates to that—why the committee provide 12 lea in line 21, on page 132, and 11 lea in line 10, on page 133. It seems to me that the two ought to be the same.

Mr. SMOOT. If the articles were the same, I will say to the Senator his contention would be correct; but in one case there is a single yarn and in the other threads, twines, and cord. The difference of one lea will make it exactly the same as fixed by the House.

Mr. ROBINSON. The House has eight lea in both places.

Mr. SMOOT. Yes, I know it did; but there was in the House bill a duty of only three-fourths of a cent a pound on hemp tow, and that was not enough to necessitate a change in the number of lea, but when we change the rate to 2 cents, then, of course, the difference is felt; in other words, there is a difference of one lea.

Mr. ROBINSON. Mr. President, I have no doubt that my friend the Senator from Utah has made a very lucid explanation of this matter, but I confess my inability to comprehend it.

Mr. SMOOT. I will say to the Senator that he must understand that we have put the duty on hackled hemp at 4 cents, instead of 1½ cents, and, as we have provided a maximum rate and a minimum rate, in order to make the rates conform when the maximum rate may apply or the minimum rate may apply, we had to change the number of the lea because of the increase in the price per pound upon yarns of a certain size.

Mr. ROBINSON. I understand that the reason the committee proposes to change the number of lea is so as to increase the rate.

Mr. SMOOT. Yes.

Mr. ROBINSON. That is a general statement of the matter; but why did the committee increase the number of lea to 12 in line 21, on page 132, and only to 11 in line 10, on page 133?

Mr. SMOOT. Because when the maximum rate or the minimum rate is applied in any case the difference would be represented in the difference that we have made in the number of lea.

Mr. ROBINSON. Mr. President, the Senator from Utah has referred to the maximum and the minimum rates. I notice his amendment proposes a minimum rate of 30 per cent in lieu of that formerly reported by the Finance Committee of 35 per cent, and that his present amendment proposes a maximum rate of not more than 40 per cent ad valorem. I inquire of the Senator from Utah why he proposes to impose a maximum rate in this case and does not impose a maximum rate in line 19? The amendment which he has submitted does not affect that provision which establishes a minimum rate.

Mr. SMOOT. The Senator does not mean in the proviso which reads:

Provided, That the duty on the foregoing threads, twine, and cords shall be not less than 40 per cent ad valorem.

Mr. ROBINSON. Yes; that is exactly what I mean. It would seem that if the minimum and maximum provision which the Senator now proposes, which reads—

Provided, That the duty on any of the foregoing yarns shall not be less than 30 per cent nor more than 40 per cent ad valorem—

should prevail, there should also be a modification in line 19, which, as now submitted by the committee, only provides for a minimum of 40 per cent ad valorem, but does not embrace any maximum whatever.

Mr. SMOOT. I will say to the Senator that the 40 per cent rate in this case will be the rate that will apply.

Mr. ROBINSON. But why does not the Senator then provide that the rate shall be 40 per cent ad valorem, instead of "not less than 40 per cent ad valorem"?

Mr. SMOOT. Because if the price declines, then, of course, the rate may be more.

Mr. ROBINSON. But that does not explain my first question.

Mr. SMOOT. No. The Senator wished to understand why we do not provide for a maximum rate.

Mr. ROBINSON. If the committee insists upon a maximum as to yarns, why should they be content as to a minimum on threads, twines, and cords?

Mr. SMOOT. Because the minimum will apply in every case, I will say to the Senator.

The prices have increased so rapidly that the minimum of 40 per cent will apply in all cases under the prices of to-day or any prices which may prevail.

Mr. ROBINSON. What is the use, then, of a specific rate?

Mr. SMOOT. Specific rates are provided because the prices may fluctuate greatly in the future, and we did not want any of these rates to be less than 40 per cent.

Mr. ROBINSON. But the price may also change the other way.

Mr. SMOOT. Yes; it may.

Mr. ROBINSON. Then I inquire why should there not be a maximum as to the twine, cords, and threads if there is a maximum imposed on the yarns? I am really seeking for information.

Mr. SMOOT. Because the maximum in the other paragraph is no more than the minimum that is applied here. The same provision has been made in the cotton schedule and other schedules without a maximum.

Mr. ROBINSON. Mr. President, I am ready for a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

Mr. ROBINSON. On this amendment I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement of my pair and transfer as on the former ballot, I vote "nay."

Mr. GLASS (when his name was called). Making the same announcement as on the preceding ballot, I vote "nay."

Mr. NEW (when his name was called). Repeating the announcement made on the last vote as to the transfer of my pair, I vote "yea."

Mr. ROBINSON (when his name was called). Announcing the same pair and transfer as on the previous vote, I vote "nay."

Mr. TRAMMELL. I transfer my pair with the senior Senator from Rhode Island [Mr. COLT] to the Senator from Nebraska [Mr. HITCHCOCK], and vote "nay."

The roll call was concluded.

Mr. BALL. Making the same announcement as to the transfer of my pair as heretofore, I vote "yea."

Mr. CALDER. Making the same transfer of my pair as on the last vote, I vote "yea."

Mr. OVERMAN. Making the same announcement as to my pair and its transfer as previously, I vote "nay."

Mr. JONES of New Mexico. Making the same announcement as on the previous vote regarding my pair, I will withhold my vote. If permitted to vote, I should vote "nay."

Mr. WATSON of Indiana. I transfer my general pair with the Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from Pennsylvania [Mr. CROW], and vote "yea."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from Maine [Mr. HALE] with the Senator from Tennessee [Mr. SHIELDS].

The result was announced—yeas 38, nays 21, as follows:

YEAS—38.

Ball	Gooding	McLean	Phipps
Borah	Jones, Wash.	McNary	Rawson
Broussard	Kellogg	Moses	Smoot
Bursum	Kendrick	Nelson	Spencer
Calder	Keyes	New	Sterling
Capper	Lenroot	Newberry	Wadsworth
Cummins	Lodge	Nicholson	Watson, Ind.
Curtis	McCormick	Norbeck	Willis
Ernst	McCumber	Oddie	
Frelinghuysen	McKinley	Pepper	

NAYS—21.

Ashurst	King	Sheppard	Underwood
Caraway	Myers	Simmons	Walsh, Mass.
Dial	Overman	Smith	Walsh, Mont.
Fletcher	Pomerene	Stanley	
Glass	Ransdell	Swanson	
Heflin	Robinson	Trammell	

NOT VOTING—37.

Brandegee	France	La Follette	Stanfield
Cameron	Gerry	McKellar	Sutherland
Colt	Hale	Norris	Townsend
Crow	Harreld	Owen	Warren
Culberson	Harris	Page	Watson, Ga.
Dillingham	Harrison	Pittman	Weller
du Pont	Hitchcock	Poindexter	Williams
Edge	Johnson	Reed	
Elkins	Jones, N. Mex.	Shields	
Fernald	Ladd	Shortridge	

So the amendment of the committee was agreed to.

MISSOURI SENATORIAL PRIMARY.

Mr. SPENCER. Mr. President, the senatorial primary in Missouri will be held within two weeks. The Democratic candidate for Senator and the Republican candidate for Senator will both be selected a week from next Tuesday, August 1. The only reason I have for occupying the time of the Senate for a moment on this matter is to correct what may be a false impression in the minds of some of my colleagues with regard to my own relationship to the Democratic primary.

It is perfectly fair to say that national interest in the Missouri Democratic primary is far greater than in the Republican primary. This is largely due to the fact that my distinguished colleague, the senior Senator from Missouri [Mr. REED], who has such a well-deserved and national reputation not only as a great political fighter but as an orator and debater unequaled in power and vigor, is himself a contestant in that primary. The interest in Missouri is all the keener because of the intense character of the campaign.

The senior Senator from Missouri is declaring to very large audiences every day that his opponent, Mr. Long, is so dry in the country as to resemble a camel, and that when he, Mr. Long, campaigns in the city of St. Louis, which is by the Mississippi, or in the city of Kansas, which borders on the Kaw, he is so wet as to resemble a fish. Senator REED is also saying in Missouri that Mr. Long, according to his own description of himself, has reduced himself to the position of a human phonograph, so that in case he ever entered the Senate he would do nothing more than record and repeat the thoughts and the words of a possible Democratic President; that he is a mere automaton; so that when a possible Democratic President, as in a Punch and Judy show, pulls the strings he will act in response to that presidential pull. Then the Senator, in the graphic way of which he is a master, points out the fact that he himself might be the President of the United States, and he portrays to the great audiences if he, the senior Senator from Missouri, were the President of the United States, how tragic would be the situation for Mr. Long in the Senate of the United States, and have to record only the thoughts and words of the then President in the White House.

All this, Mr. President, from one side is answered by the other; for Mr. Long says constantly to audiences not as large as those of the senior Senator from Missouri that as for himself—and he is speaking largely to Democrats who were born and bred in the Democratic Party, and who love it and believe in it—he (Mr. Long) is not "an occasional Democrat"; he (Mr. Long) never stabbed the Democratic Party in the back or ambushed it from the side; he (Mr. Long) never went to the State of Wisconsin and made speeches for a Republican candidate; and so the battle goes on along these lines of great issues.

Mr. President, everyone is keenly interested. Every morning the people look to see what the latest utterance of either candidate is. I share in that curiosity. I want to get all the reliable information I can about this contest. I am intensely interested in it, and I have sought for all the reliable information I can get, and I will continue to seek and welcome such information. May I say to the senior Senator from Kentucky [Mr. STANLEY], whose language the other day I resent, that nothing he ever has said will change that purpose with me, nor will anything he may say, if again, under the influence of heat or excitement or other impulses, he sees fit to rise in the Senate and in tearful, lachrymose tones cry out as he did the other day, that his heart is troubled, that his grief is sore, that he in tenderness, not in anger or resentment, as he was quick to add, feels called upon to chide the press and the Senate and the people of the United States for some fancied charge which in his then condition of mind he imagined they had made against me on account of some fancied interference on my part in a Democratic primary; a moment's sober, calm thought would have convinced the Senator there was no charge ever made—nor was there any such interference on my part; and I may say quickly that I am not concerned if the senior Senator from Kentucky [Mr. STANLEY], in the same condition of mind, should again seek, as he did the other day, to assume the artistic pose of the Statue of Liberty and cry out in vociferous tones against what he was pleased to call "damnable, pernicious interference" in a Democratic primary. All the reliable information I can get on the primary in my State I shall continue to welcome.

But I do want to say to my colleagues—and this is the purpose for which I speak—that interested as I am in the contest I have not, directly or indirectly, in any way or manner, even attempted to interfere in this Democratic primary. The Democrats of Missouri are people of intelligence and courage and independence, and they will settle their own primary contests precisely as in their conscience and their judgment they see best to do. I do not presume that I could interfere in a Democratic primary, and I certainly would not so interfere if I could. I have no hesitation in saying to the Senate, as I have said many times in private conversation, that personally I should be glad if my distinguished colleague were renominated by his party. No one can be any quicker than I to recognize nor more sincere to admire the great gifts and powers with which my colleague is so abundantly endowed, and I do not propose to be put in a false position in regard to that matter, and certainly not by the senior Senator from Kentucky, who, sir, when my colleague had his political life in the balance in the Democratic convention in San Francisco, when his prestige as a man and his right as a delegate and his standing in his party at home were all at stake—the senior Senator from Kentucky [Mr. STANLEY], who was a delegate at large at that convention, so far as I can find out from the record of that convention, was absolutely silent in behalf of my colleague and intentionally impotent in his behalf. God save us from alleged friends who, when a word or act will help, remain silent and then become vociferously vehement only when nothing that they can say will be of any possible benefit!

I do not agree with my colleague in many of the positions he takes nor often in the way he defends or advocates them, but this is not inconsistent with a real friendship for him as a man or sincere admiration for his outstanding ability.

Mr. President, I may say that when this primary is over, settled by the Republicans with regard to their candidate and by the Democrats with regard to their candidate, I shall in every way in my power seek to secure the defeat of the Democratic candidate and to insure the election of the Republican candidate. May I say, sir, not as a matter of mere boastful prophecy but as the result of a real conviction, that I have perfect confidence that Missouri in 1922, as she did in 1920, and in 1918, and in 1910, and in 1908, and in 1904, as she has in every presidential campaign in the last 18 years, with the exception of once when the Republican Party was divided and once when the slogan "He kept us out of war" misled many thousands of Missourians, will again record her adherence to the principles of the Republican Party.

Mr. STANLEY. Mr. President, "methinks the lady doth protest too much." This sudden devotion on the part of the junior Senator from Missouri for the senior Senator from Missouri is too much. This display of interest in his colleague and love for him is "too sudden."

JIM REED had enough to carry and enough to bear without this doubtful show of affection. I have never seen anything like it in my life, the junior Senator from Missouri throwing his loving arms around the senior Senator from Missouri. There is only one other such instance in truth or fiction. Under the shadows of Gethsemane there was a loving kiss, as sincere, and let us hope more deadly, than the kiss of the junior Senator from Missouri upon the cheek of the senior Senator from Missouri.

The junior Senator from Missouri charges that in the more or less personal conflict between the President of the United States and the senior Senator from Missouri I did not align myself with the senior Senator from Missouri. As long as American history is written men will recall the meeting of those intellectual Titans. During a great part of this controversy the President had said that "politics was adjourned." Two able and patriotic men took different views of the best way to preserve the honor of the flag and the security of the Nation. In that fight I was upon the side of Woodrow Wilson. I was with Woodrow Wilson for the League of Nations, and REED was against the League of Nations. I never failed to support the President. I have followed him as a Representative in Congress, as Governor of Kentucky, as a Senator "without variableness or shadow of turning," and as the friend and champion of Woodrow Wilson—yea, more, as the follower of Thomas Jefferson and of Andrew Jackson; as a Democrat first and as a friend of the President or any other living man second.

I did resent and do resent the sly and cunning tactics of the junior Senator from Missouri, which deceive nobody save himself. Is there a Senator upon the other side so dense as not to know that when he gets busy in his State in polling the vote of the other side and announces which candidate will win there is going to be "something doing"? Is there a Senator upon the other side so weak and inefficient, so lacking in influence or in power, that he can make a poll of his State without more or less deadly effect? If I should poll the Republican Party in Kentucky, I would look for results somewhere along the line. When JIM WATSON begins to poll the Democrats in Indiana I am going to put on my war paint in Ken-

tucky and come across and give succor to my suffering brethren, because I know the devil will be to pay when he gets busy over there in our family. I would bitterly resent it if the Senator from Indiana, in a fight between Tom Taggart and somebody else, would get up here and tell us just who is going to win, "for I have made a poll of Indiana." Could I pay the gallant, astute, gifted, and fearless leader of the old guard a higher compliment than to say it would mean big trouble? Could I cover him with greater contempt than to say it was idle curiosity and that JIM WATSON was either impotent or stupid; that he lacked either in personal prestige or intellectual force; that he could do a thing of that kind and not do damage?

I may have wronged the junior Senator from Missouri, possibly did wrong him, in my assumption that it was not at most a pernicious and objectionable interference. He assures us now that he can do that sort of thing and not hurt anybody. I would not say so unkind a thing of the junior Senator from Missouri. I assume, what may be a foolish assumption, that he has or he ought to have some influence, that he exercises or ought to exercise some power in his State, and when he runs his gentle and delicate nose into a Democratic primary he is going to hear from me, whether it be a Wilson or an anti-Wilson Democrat that he attempts to reach either by cunning, by treachery, or by an effusive utterance of questionable affection.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDENT pro tempore. The Secretary will state the next amendment.

The READING CLERK. The next amendment is on page 132, line 21, to strike out "8" and insert in lieu thereof "12," so as to read:

Finer than 12 lea and not finer than 60 lea.

Mr. ROBINSON. Mr. President, I claim the attention of the Senate for a few minutes to discuss a number of amendments intimately related in this schedule. It is observed that the pending amendment, and other amendments in paragraph 1004, greatly increase—in fact, they double—the present rates on yarns made of flax, hemp, or ramie. If these rates on yarns are adopted, they will become the basis or the justification for the exceedingly high rates elsewhere in the schedule on woven fabrics, and goods manufactured from flax, hemp, or ramie.

To illustrate: The committee proposes, as a logical sequence of these raises in the rates on the yarns and threads, to increase very materially the rates on the fabrics woven from articles included in paragraphs 1008a, 1009, 1011, 1012, 1013, 1015, and 1016, flax, hemp, or ramie particularly.

By way of illustration, I refer to the first-mentioned paragraph, relating to woven fabrics. It is proposed in paragraph 1008a to levy a duty on—

Woven fabrics, not including articles finished or unfinished, of flax, hemp, or ramie, or of which these substances or any of them is the component material of chief value (except such as are commonly used as paddings or interlinings in clothing), exceeding 30 and not exceeding 100 threads to the square inch, counting the warp and filling, weighing not less than 4½ and not more than 12 ounces per square yard, and exceeding 12 inches but not exceeding 24 inches in width, 60 per cent ad valorem.

In the same paragraph, as it is numbered, there is a rate the equivalent of 60 per cent ad valorem on certain classes of thread, and another rate of 55 per cent ad valorem.

Paragraph 1009 provides:

Woven fabrics, not including articles finished or unfinished, of flax, hemp, ramie, or other vegetable fiber except cotton, or of which these substances or any of them is the component material of chief value, not specially provided for, 45 per cent ad valorem.

The rate originally proposed was 50 per cent, but, as I understand it, the committee now proposes to make it 45 per cent ad valorem. Paragraph 1011 provides:

Pile fabrics, composed wholly or in chief value of vegetable fiber other than cotton, cut or uncut, whether or not the pile covers the whole surface, and manufactures in any form, made or cut from any of the foregoing, 50 per cent ad valorem.

In paragraph 1013 there is a duty of 60 per cent proposed on certain classes of towels and napkins, and 50 per cent on certain other classes, and on sheets and pillow cases a duty of 50 per cent ad valorem.

These, in the main, are articles of common and necessary use. There is no linen industry of substantial importance in the United States, and the rates which are proposed, and which, according to the contention of the committee, are the logical consequence of the adoption of the pending rates on yarn of hemp, flax, or ramie, are exceedingly high.

I have a letter from Mr. Carleton Schaller, manufacturers' agent, 350 Broadway, which pertains to the matter and which I wish to read, as follows:

NEW YORK, *July 19, 1922.*

Senator JOSEPH T. ROBINSON,
United States Senate, Washington, D. C.

SIR: * * * From press accounts it is understood that the duty as proposed by the Finance Committee of the Senate on paddings made of linen will be 60 per cent ad valorem. As you know, the present rate in the Underwood bill is 30 per cent ad valorem. These goods are produced in Belgium and Ireland and have never been manufactured in this country, either under a Republican or a Democratic tariff. The reasons are mostly due to climatic conditions and also because the preparation of flax yarn is a very laborious one, and the American farmers have never been willing to undertake it.

Inasmuch as there is no domestic industry to protect, it would seem that the increase in duty of 30 to 60 per cent ad valorem will impose a very unjust burden upon the ultimate consumer. The clothing trade ever since 1920 has been striving to reduce costs, as the public has simply refused to pay high prices for clothing in the retail shops.

From your investigations you doubtless will know that Ireland imported approximately 90 per cent of its flax in pre-war days from Russia. Inasmuch as that country has not been a producer for the past three years there is a very acute scarcity of flax, and attempts to raise this in other countries have so far been unsuccessful. With the high prices that are to be expected for years to come and with a duty of 60 per cent ad valorem the result will be that the use of this canvas will be greatly curtailed, with a subsequent loss of revenue to the Government.

It is sincerely hoped that some of these arguments will meet with consideration on the Senate floor. * * *

Respectfully,

CARLETON SCHALLER.

Mr. President, the facts relating to the subject are summarized in the Tariff Information Survey relating to yarns, thread, and cordage of vegetable fibers other than cotton. At page 36 the following statement is found:

Ramie sliver or roving was not specifically mentioned prior to the act of 1909. Imports of sliver are relatively insignificant, amounting to only $60,263 in 1912, with a duty of 35 per cent, and to only $6,707 in 1914, with the duty reduced to 15 per cent. In 1920 they amounted to $5,438.

The facts in this connection require no argument. They are very convincing that high rates of duty on this product are not justified.

The following facts, therefore, should be kept in mind in connection with imports of all classes of flax, hemp, and ramie yarns: (1) The total quantity imported is normally not over 2,500,000 pounds, or perhaps 15 per cent of our total consumption; (2) this is composed chiefly of coarse and medium counts, the bulk of it not finer than 40 lea; (3) counts finer than 40 lea are not produced in considerable amounts in the United States and imports of it are, in the main, noncompetitive; (4) reduction of the average duty on all classes from approximately 40 per cent ad valorem to about 19 per cent by the act of 1913 had little effect either upon total imports or upon any particular class, although the changed classification creates a deceptive fluctuation as regards coarse and medium leas.

It would seem, therefore, that imports were largely supplementary to domestic production. Manufacturers, because of difficult conditions, have not found it profitable to extend production too close to the total amount of domestic consumption where risks of loss from varying demand are most felt.

From this statement of fact it must be apparent that the only purpose of levying the high rates proposed by the Finance Committee on the yarns embraced in paragraph 1004, hemp, flax, or ramie, is to justify the imposition of very greatly increased rates on the manufactured products. In any event the amendments reported by the committee disclose that it is the purpose of the committee to raise to the enormous figure of from 50 to 60 per cent ad valorem the rates to be imposed upon the manufactured articles, many of which are not, and some of which can not be, successfully produced in the United States.

In that view of the matter I feel justified in urging the Senate to reject the pending amendment and thus force a revision of the committee's proposed rates on hemp, flax, and ramie yarns, for if we approve of the proposed rates on yarns, that approval will be urged by the representatives of the committee as a convincing justification for the existing high rates imposed in succeeding paragraphs on the fabrics and other products manufactured from hemp, flax, and ramie.

It so happens that in the way the committee are presenting their amendments, the sense of the Senate on the subject can be tested by a single vote on the amendment fixing minimum and maximum duties proposed by the Senator from Utah at not less than 30 nor more than 40 per cent ad valorem.

That amendment has not yet been reached, but it is my purpose when the Senate considers it to submit amendments reducing the rates respectively to 20 per cent minimum and 30 per cent maximum. By a record vote on that amendment the sense of the Senate can be accurately tested on the yarns which enter into the fabrics embraced in other paragraphs, yarns made from hemp, flax, and ramie, concerning which there are a number of committee amendments in paragraph 1004.

Mr. President, with this statement I shall content myself for the present.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The ASSISTANT SECRETARY. The next amendment is, on page 132, in line 12, before the word "cents," to strike out "8" and insert "10," so as to read:

Finer than 12 lea and not finer than 60 lea, 10 cents per pound and one-half of 1 cent per pound additional for each lea or part of a lea, etc.

Mr. ROBINSON. Mr. President, the statements which have already been made respecting other amendments apply with equal force to the pending amendment. I am content to take a vote on the amendment without further discussion.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The PRESIDENT pro tempore. The next amendment will be stated.

The ASSISTANT SECRETARY. On page 132, in line 24, the committee proposes to strike out "8" and insert "12," so as to read: "one-half of 1 cent per pound additional for each lea or part of a lea in excess of 12."

The amendment was agreed to.

The ASSISTANT SECRETARY. The next amendment is, on page 133, in line 1, after the word "boiled," where the committee proposes to insert "2 cents per pound; when," so as to read:

And in addition thereto, on any of the foregoing yarns when boiled, 2 cents per pound; when bleached, dyed, or otherwise treated, 5 cents per pound.

Mr. ROBINSON. I ask the Senator from Utah if he can inform the Senate what will be the approximate corresponding ad valorem equivalent for that duty?

Mr. SMOOT. It would be difficult to state, because it covers every count of yarn and is a specific duty. I could not say offhand. If it were yarns that cost $1 a pound, it would be 2 per cent. I call the Senator's attention to the fact that it is a reduction from the House rate on boiled yarns. I did not see how it was possible to account for more than 2 cents a pound in the boiling of the yarn. The loss is more when bleached or dyed or otherwise treated. The loss there is 5 cents, but the House provided 5 cents even for the boiling. I could not see how it would be possible to have more than 2 cents loss in boiling. That is the reason why the amendment was made by the committee.

Mr. ROBINSON. I myself think the amendment to which I have referred is an improvement over the House provision in that the committee reduces the protective rate for boiled yarn from 5 cents to 2 cents.

Mr. SMOOT. It is only a compensatory rate, I will say to the Senator, because when the yarn is boiled there is a loss that would equal 3 or 4 per cent, and, as was claimed by the manufacturers, 6 per cent in some cases is involved in the waste.

Mr. ROBINSON. I had assumed that the process of boiling, which is protected by 2 cents a pound, was approximately the same for all yarns.

Mr. SMOOT. No; there is a still further loss, I will say to the Senator, in the dyeing and bleaching and the treatment they may have other than the simple boiling.

Mr. ROBINSON. Of course, the ad valorem equivalent would depend upon the price of the yarns, and the yarns would vary, but what I was trying to do was to secure for the Senate information as to what amount of protection it is proposed to extend to the process of boiling through the 2 cents per pound rate.

Mr. SMOOT. If it were 50 cents a pound, of course 2 cents would be 4 per cent. If it runs down into the real fine yarns, where the price would run up to $1 a pound, the rate would be 2 per cent.

Mr. KING. Mr. President, I understand the matter before the Senate now is the rate fixed upon what might be denominated the intermediate products—that is, intermediate between the raw product and the finished article which enters into household consumption.

Mr. SMOOT. These are the single yarns.

Mr. KING. As I understand the schedule, we provide very high duties upon the importations of yarns.

Mr. SMOOT. Between 30 and 40 per cent.

Mr. KING. That is done notwithstanding the fact that yarns which are employed in the manufacture of certain products and which are comprised under the schedule are all imported; that is to say, we do not produce them in the United States.

Mr. SMOOT. We produce a considerable quantity of the yarns in the United States.

Mr. KING. I will ask my colleague if the percentage is very great, measured by the entire consumption?

Mr. SMOOT. Hemp yarn for sale in 1919 was 1,455,000 pounds, valued at $829,000. Flax yarn for sale was 2,622,000 pounds, valued at $872,000.

Mr. KING. Were those domestic products?

Mr. SMOOT. Those were the domestic products manufactured for sale. I will say that it is difficult to ascertain the consumption. All we can do is to estimate. There are no statistics that we can find, but it is estimated all the way from 18,000,000 to 25,000,000 pounds. That is as near as we can get to it.

Mr. KING. This schedule emphasizes, to my mind, some of the vices which may be developed through an improper protective policy. There is justification, from the protective standpoint, in imposing tariff duties upon imported articles where there is some production in the United States, where the industry may grow to large proportions, and may measurably satisfy the demands of the people; but this schedule deals with flax and jute and hemp, the raw products, the intermediate products, and the finished product. The overwhelming portion of the finished product, the raw products, and all of the grades of intermediates are imported. Now it is proposed to place a heavy rate of duty upon intermediates which are not produced here. That, of course, will raise the price of the intermediates to the purchaser in the United States, and when he manufactures those intermediates into towels or cordage or the various forms of the finished product covered by this schedule, and that high tariff is carried on, of course, to the finished product. Then, in order to take care of those who are engaged in the production of the towels and the cordage and the various forms of the finished product, another very high tariff is imposed. So we have at least two and possibly three rates of tariff imposed upon the very products that finally reach the consumer. Manifestly by the time the consumer buys those products the prices must be inordinately high.

It is obvious that that creates an unhealthful condition; it perpetuates an injustice. Those who support this policy are trying to stimulate industries which are based upon importations, and the importations will always exist or will continue for an indefinite period. A tariff is placed upon the raw products; a tariff is put upon all forms of intermediates; and then a tariff is put upon all forms of the finished product. Thereby the tariffs are pyramided so that the ultimate consumer, the buyer of the finished articles, is compelled to pay enormous prices for them.

Now, is it worth the effort to pursue a policy of that kind? Even protectionists, it seems to me, ought to pause before they consent to adopt a policy that must eventuate in exactly the situation that is disclosed in the consideration of this particular schedule.

Mr. President, if we are producing in the United States raw materials substantially sufficient to care for the wants of the people and desire to encourage the manufacture of those raw materials into the finished product, and therefore favor a reasonable protection to bring that about, that is one thing; but where we import the greater part of the raw material and put a tariff upon that and then put a tariff upon the intermediates that are produced in other countries from similar raw material, and then put a tariff upon the multiform finished products, we are placing burdens upon the American people which, it seems to me, may not be justified.

I think this entire schedule is wrong, that it is inequitable, and that it ought to be revised. It is not scientific from a protectionist standpoint; it does not measure up to the philosophy and the standard of conduct which are supposed to guide the honest protectionist in his advocacy of the protection policy.

Mr. McCUMBER. Mr. President, the Senator from Arkansas [Mr. ROBINSON] has correctly stated that the decision at which we arrived in fixing the rate in the schedules which he was then discussing must necessarily reach forward into the subsequent paragraphs; the Senator is absolutely correct as to that; but the Senator has already crossed the bridge—at least, the Senate has crossed it for him, for we really started on this scale when we voted for duties of 2 and 4 cents on the raw material. As we have increased those duties, the Senator admits that we must necessarily make a differential in the yarn and another differential in the cloth produced from the yarn.

The only question that is before the Senate, it having decided in the first place to place a duty of 2 cents a pound upon the tow and 4 cents a pound upon the "line of hemp," is whether the additional amount that we are placing upon the yarn and the still further additional amount we are placing upon the fabric are proper and just differentials. I have heard no argument to indicate that the committee have given one penny more than was necessary to make the proper differential, having once adopted the 2-cent and 4-cent rates. So that, Mr. President, this is the only question we have got before us. As the junior Senator from Utah [Mr. KING] has stated, having de-

cided that we will place a duty upon the raw material, it will be carried into the yarn, and from the yarn it will be carried into the fabric, and the junior Senator from Utah thinks that that is a bad policy.

Mr. President, we have a very important silk industry in the United States. We do not produce raw silk here—and yet, should we destroy that industry? Silk is produced abroad and is imported here in its raw state and converted into threads and all kinds of fabrics. A mighty silk industry has been created in the United States. If the theory of the junior Senator from Utah were correct, then we should withdraw all duties and bring every fabric of silk from foreign looms. I think we are justified, Mr. President, in the protection of jute, of ramie, and of flax straw, in order that we may create a linen industry in the United States, just as we have created the silk industry here.

Mr. ROBINSON. Mr. President, just a word in reply to some of the observations which have been made by the Senator from North Dakota. The Senate has not increased the proposed duty on the raw material of flax. It is true that it has increased the duty on hemp, but the Senator will recall that it did that over my persistent and very earnest protest. We have not yet crossed the bridge; we have walked out on it a little distance, but there is ample time for the committee to do in the case of these amendments just what it has done as to hundreds of other amendments in this bill since it first reported it—namely, to correct them to conform to what the facts and the necessities of industry justify.

I have already said that the whole question of the policy which the Senate is to express in this bill respecting duties on flax yarns will be decided in connection with the amendment next to be considered and the amendment which will be proposed to that committee amendment.

With this statement I am ready for a vote.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The PRESIDENT pro tempore. The next amendment will be stated.

The ASSISTANT SECRETARY. In paragraph 1004, page 133, line 4, after the word "yarns," the committee proposes to strike out "not finer than 8 lea shall be not less than 20 per cent ad valorem; on any of the foregoing yarns finer than 8 lea, not less than 23 per cent ad valorem," and to insert "shall not be less than 30 nor more than 40 per cent ad valorem," so as to read:

Provided, That the duty on any of the foregoing yarns shall not be less than 30 nor more than 40 per cent ad valorem.

Mr. ROBINSON. Mr. President, this is an important amendment and I think there ought to be more Senators here. I am going to ask for a record vote on this amendment, and so I intend to suggest the absence of a quorum. I am going to present an amendment to the committee amendment and explain it briefly, and then take a record vote on it, because it will have a great influence on the action which the Senate will take subsequently on the paragraphs relating to fabrics of hemp, flax, and ramie.

The PRESIDENT pro tempore. The Chair understands the Senator from Arkansas to suggest the absence of a quorum, and the Secretary will call the roll.

Mr. ROBINSON. Mr. President, before the roll is called I desire to propose the following amendment to the amendment of the committee, namely, to strike out "30" and insert in lieu thereof "20," and to strike out "40" and to insert in lieu thereof "30."

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. It is proposed to change the rate in the amendment of the committee by striking out "30," in the first instance, and inserting in lieu thereof "20," and by striking out "40," in the second instance, and inserting in lieu thereof "30."

Mr. ROBINSON. I now suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Broussard	Glass	Ladd	New
Bursum	Gooding	Lenroot	Newberry
Calder	Hale	Lodge	Norbeck
Capper	Heflin	McCormick	Oddie
Caraway	Jones, N. Mex.	McCumber	Overman
Cummins	Jones, Wash.	McKinley	Pepper
Curtis	Kellogg	McLean	Phipps
Dial	Kendrick	McNary	Pomerene
Ernst	Keyes	Moses	Ransdell
Frelinghuysen	King	Nelson	Rawson
Robinson	Smoot	Swanson	Warren
Sheppard	Spencer	Trammell	Willis
Smith	Sterling	Wadsworth	

The PRESIDENT pro tempore. Fifty-one Senators have answered to their names. There is a quorum present. The question is upon the amendment proposed by the Senator from Arkansas to the amendment of the committee.

Mr. ROBINSON. Mr. President, the purpose of this amendment has already been discussed, but only a few Senators were present when that discussion occurred. It is not my intention to go over the matter in detail again, but I feel justified in making a brief statement.

This amendment is so framed and involves such issues that it will determine in large part the policy which the Senate will pursue not only touching yarns of flax, hemp, and ramie, but also fabrics woven from them and materials manufactured out of them. The proposal of the committee is to place a minimum of 30 and a maximum of 40 per cent ad valorem on these yarns. My amendment will reduce the minimum to 20 per cent and the maximum to 30 per cent, and if it prevails it will justify amendments subsequently to be offered to the committee amendments relating to the fabrics and materials manufactured from these yarns, materially reducing them.

As already stated, the object of these high duties on the yarns is to justify very material increases upon the products representing higher stages of manufacture. I think those rates are too high, that the maximum and minimum rates proposed by the committee on the yarns are excessive, and in order to test the sense of the Senate on the subject I have proposed the amendment.

Mr. SMOOT. Mr. President, just a brief statement for the record, and for the record only, so far as that is concerned.

The difference in competitive prices of foreign and domestic flax yarn, as far as the committee were able to ascertain such prices, has determined the rates of duty named. The spinning industry is the key industry of flax weaving in the United States. Consequently the rates of duty provided should be sufficient to maintain this industry in the United States and provide an incentive to its further expansion and the consequent lower cost. At present, it is the practice of many weavers of flax fabrics to import yarn because of cheaper prices. This has reacted against the expansion of the spinning industry in the United States. The spinning industry in the United States should at least have an equal opportunity with the foreign spinner in its own market. This it has not had with the present rates of duty.

The imports of 1921 are less in quantity than the imports of 1914 but greater than the imports of 1910. This is explained by the tremendously decreased use in the world of flax products due to curtailment of flax production in Russia. Relatively, compared with the total production of flax in the world, the imports were greater in 1921 than in 1914. The advantage which the foreign spinner had over domestic spinners can be illustrated by the following price comparisons on dry-spun weft yarns:

The foreign price of 12-lea tow yarns is 22 cents per pound. These are the prices of to-day. Adding the duty of 8.8 cents—40 per cent of 22 in the Senate bill—gives 30.8 cents. The price of the same domestic yarn is 50 cents, the difference representing landing charges and profit. The foreign price of 18-lea tow yarn is 31 cents. Adding the duty of 12.4 cents per pound—40 per cent of 31—gives 43.4 cents. The price of the domestic yarn of the same count and type is 55 cents a pound. The difference, again, represents landing charges and profit.

Mr. President, what the Senator from Arkansas has said is absolutely true. Whatever action we take now upon this amendment will have an effect upon every fabric paragraph in this schedule; and if we adopt a rate now upon the yarns included in this paragraph, it must be carried through all of the paragraphs of the bill. If the amendment of the Senator from Arkansas is agreed to, I want to say frankly to the Senate that the following rates in the fabric schedules ought to be decreased; but under the prices existing to-day there is not any question but that the rates offered by the committee, reduced as they have been, ought to be adopted.

Mr. ROBINSON. Mr. President, with some of the statements contained in the paper just read by the Senator from Utah I find no fault. I want to inform the Senate before the vote is taken that the rates proposed by the committee are substantially double the rates under existing law, and that the rates in the fabric paragraphs are very great increases indeed over those now in force. This will represent a very heavy burden upon the American consumer. The importations are less now than in 1914; production of the raw material has been

curtailed throughout the world; and I do not believe there is any justification for what I term the excessive rates proposed by the committee.

The PRESIDENT pro tempore. The question is on the amendment offered by the Senator from Arkansas to the amendment of the committee.

Mr. ROBINSON. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. CALDER (when his name was called). Making the same announcement regarding my pair and its transfer as on the last vote, I vote "nay."

Mr. DIAL (when his name was called). Making the same announcement as to my pair and its transfer as on the former ballot, I vote "yea."

Mr. GLASS (when his name was called). Making the same announcement as on the last vote, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. NEW (when his name was called). Repeating the announcement of the transfer of my pair, I vote "nay."

Mr. ROBINSON (when his name was called). Announcing the same transfer of my pair as on the previous vote, I vote "yea."

Mr. TRAMMELL (when his name was called). I transfer my pair with the senior Senator from Rhode Island [Mr. COLT] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

The result was announced—yeas 20, nays 37, as follows:

YEAS—20.

Borah	Jones, N. Mex.	Robinson	Swanson
Caraway	King	Sheppard	Trammell
Dial	Myers	Simmons	Underwood
Glass	Overman	Smith	Walsh, Mass.
Heflin	Pomerene	Stanley	Walsh, Mont.

NAYS—37.

Broussard	Jones, Wash.	McLean	Ransdell
Bursum	Kellogg	McNary	Rawson
Calder	Kendrick	Moses	Smoot
Capper	Keyes	Nelson	Spencer
Cummins	Ladd	New	Sterling
Curtis	Lenroot	Newberry	Warren
Ernst	Lodge	Nicholson	Willis
Frelinghuysen	McCormick	Oddie	
Gooding	McCumber	Pepper	
Hale	McKinley	Phipps	

NOT VOTING—39.

Ashurst	Elkins	La Follette	Shortridge
Ball	Fernald	McKellar	Stanfield
Brandegee	Fletcher	Norbeck	Sutherland
Cameron	France	Norris	Townsend
Colt	Gerry	Owen	Wadsworth
Crow	Harreld	Page	Watson, Ga.
Culberson	Harris	Pittman	Watson, Ind.
Dillingham	Harrison	Poindexter	Weller
du Pont	Hitchcock	Reed	Williams
Edge	Johnson	Shields	

So Mr. ROBINSON'S amendment to the committee amendment was rejected.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the committee was, in paragraph 1004, page 133, line 10, to strike out "8 lea, 16" and insert "11 lea, 18¼," so as to read:

Threads, twines, and cords, composed of two or more yarns of flax, hemp, or ramie, or a mixture of any of them, twisted together, the size of the single yarn of which is not finer than 11 lea, 18¼ cents per pound.

Mr. ROBINSON. Mr. President, this amendment is a very material increase, but I am of the opinion that it is consistent with the amendments which the Senate has already agreed to in this paragraph. As I stated a few moments ago, my purpose in offering the last amendment which was rejected by the Senate was to test out the sense of the Senate on the policy of imposing high rates of duty on these yarns for the purpose of justifying the exceedingly high rates on the fabrics and materials manufactured from them. I shall oppose the adoption of the amendment, but I am ready for a vote.

The amendment was agreed to.

The next amendment was, on page 133, line 11, to strike out "8" and insert "11"; on the same line, to strike out "16" and insert "18¼"; and on line 13, to strike out "8" and insert "11," so as to read:

finer than 11 lea and not finer than 60 lea, 18¼ cents per pound and three-fourths of 1 cent per pound additional for each lea or part of a lea in excess of 11; finer than 60 lea, 56 cents per pound.

The amendment was agreed to.

The next amendment was, on line 14, after the words "per pound," to insert a semicolon and the following words:

and in addition thereto, on any of the foregoing threads, twines, and cords when boiled, 2 cents per pound; when bleached, dyed, or otherwise treated, 6 cents per pound.

Mr. ROBINSON. Mr. President, I do not believe this amendment is either necessary or justified. Nearly all the yarns to which it applies and to which the rates preceding this amendment apply are bleached or dyed, and it is but another way of adding increased duties upon these yarns. I shall vote against the amendment.

Mr. KING. Mr. President, may I inquire of the able Senator from Arkansas if he is able to advise us approximately the cost of all of the products embraced in this schedule? I appreciate that I am asking a question which may not be answered without a vast amount of research.

Mr. ROBINSON. I do not think it would be physically or mentally possible to answer the question as the Senator has asked it. This is an important schedule, and the imposition of these very high rates, in pursuance of the policy of the Finance Committee, will unquestionably impose a very heavy burden on the consumers of these products; but it would not be possible to state the value of the articles which would be affected by the rates of duty from any information which I have. I do not know whether the senior Senator from Utah can give that information or not. I will say to the senior Senator from Utah that his colleague has asked the value of the products to which this amendment applies, or the probable value of them, so as to reach a conclusion as to the amount of additional cost which would be imposed on the consumers of these commodities by reason of the duty. I take it that is the purpose of the Senator's question?

Mr. KING. It is.

Mr. SMOOT. This provision was inserted for the reason that when linen is boiled it loses from 10 to 20 per cent in weight, according to the time it is boiled. That has been demonstrated not only by practice, but the Tariff Commission itself states that that is the loss in weight. If the rate were 2 cents a pound on 50-cent threads and yarns, it would be 4 per cent, but if a dollar, it would be only 2 per cent, and I can not tell what the price of these would be.

Mr. KING. If my colleague will pardon me, I do not think he quite understood the point I was getting at. This schedule, as my colleague, as the able Senator from North Dakota, and as the Senator from Arkansas have stated, is one of very great importance. It embraces hundreds of articles and commodities which enter into the lives of the people. What I was trying to get at was this: Approximately, what is the wholesale value of all the commodities and products embraced within this schedule?

Mr. SMOOT. No one can tell.

Mr. KING. I appreciated that.

Mr. SMOOT. They run from 12 cents a yard up to $20 a yard.

Mr. KING. We have statistics as to the value of the articles covered by some of the schedules. For instance, the best figures we have as to the value of all of the products of the chemical industry in 1921 show that they were worth about three billion and between five and six hundred million dollars.

Now, when we know the entire wholesale value of all the commodities and products comprised within the schedule, then we may form some estimate as to the additional cost by reason of the tariff rates. It seems to me that if we are able to ascertain the value of all the chemical products of the United States and all the woolen products of the United States and all the cotton products of the United States—I concede the value, perhaps, may not be accurate—we ought to be able to determine, because the commodities are less in number in this schedule than in the schedules to which I have referred, the aggregate value of all the products found under schedule 10 of the bill.

I am asking the question with a view to showing, if I may in just a moment, the tremendous additional cost to the Ameri-

can people by reason of the very high rates commencing with the raw materials, carried on to the intermediates, and carried still further and transferred to the various finished products embraced within the schedule. For instance, may I invite attention of the Senate briefly to what is embraced within the schedule?

Mr. SMOOT. Does the Senator want me to give him the production in the United States of all items included within the schedule, including linoleum and everything else?

Mr. KING. Yes; the products of jute, hemp, and flax, which are what may be denominated the primary elements or contents in the schedule.

Mr. SMOOT. I shall give in a very few moments the total as reported on the entire schedule.

Mr. KING. While my colleague is doing that I should like to put in the RECORD some of the important items which are embraced within the schedule to show how it affects the great mass of the American people. We are dealing with jute, flax, and hemp, and the intermediate products, yarns of all kinds, all of which bear high rates of duty, and then we come to some of the products, to wit:

Cordage, including cables, tarred or untarred; gill nettings, nets, webs, and seines, and other nets for fishing; hose, suitable for conducting liquids or gases; fabrics, composed wholly of jute, plain woven, twilled, and all others not specially provided for, not bleached, printed, stenciled, painted, dyed, colored, nor rendered noninflammable; woven fabrics of flax, hemp, or ramie, or of which these substances or any of them is a component material of chief value; woven fabrics, such as are commonly used for paddings or interlinings in clothing, composed wholly or in chief value of flax or hemp, or of which these substances are, or either of them is, the component material of chief value; pile fabrics, composed wholly or in chief value of vegetable fiber other than cotton, cut or uncut; table damask composed wholly or in chief value of vegetable fiber other than cotton; towels and napkins, finished or unfinished, composed wholly or in chief value of flax or hemp, or of which these substances are, or either of them is, the component material of chief value; sheets and pillow cases, composed wholly or in chief value of flax or hemp, or of which these substances are, or either of them is, the component material of chief value; fabrics with fast edges not exceeding 12 inches in width and articles made therefrom; tubings, garters, suspenders, braces, cords, tassels, composed wholly or in chief value of vegetable fiber other than cotton; tapes, composed wholly or in part of flax, woven with or without metal threads, on reels, spools, or otherwise; handkerchiefs, composed wholly or in chief value of vegetable fiber other than cotton, finished or unfinished; clothing and articles of wearing apparel of every description, composed wholly or in chief value of vegetable fiber other than cotton, and whether manufactured wholly or in part, not specially provided for; bags and sacks made from plain woven fabrics of single jute yarns or from twilled or other fabrics composed wholly of jute; bagging for cotton, gunny cloth, and similar fabrics, suitable for covering cotton, linoleum, including corticine and cork carpet, floor oilcloth, or rugs made of linoleum or floor oilcloth; common China, Japan, and India straw matting and floor coverings made therefrom; all other floor coverings not specially provided for; matting made of cocoa fiber or rattan; mats made of cocoa fiber or rattan.

So it will be seen that there are hundreds and, indeed, thousands of articles and duties provided for in the schedule.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Utah yield to his colleague?

Mr. KING. I yield.

Mr. SMOOT. The production in the United States of all items falling within this schedule is approximately $190,000,000 per year.

Mr. KING. That is the wholesale value?

Mr. SMOOT. Yes; the wholesale value.

Mr. KING. Did my colleague, in getting those figures, ascertain the importations?

Mr. SMOOT. No. I can give them to the Senator in a little while, but it will take a longer time than it did to get the production.

Mr. KING. I shall not detain the Senate for that purpose. I have taken the time of the Senate, for which I apologize, to read into the RECORD some of the items of the schedule to show how important it is. Many of us have been passing it along as if it were not important, but it will be observed that substantially all the items or commodities are those which are used to a large extent by the great mass of the people. Of course with these high rates upon the raw material, upon all grades of intermediates, and upon the various forms of the finished product, all of which rates are pyramided and finally are transferred to the ultimate consumer, it is obvious that the cost to the American public by reason of these enormous tariff rates will be greatly increased.

Mr. McCUMBER. Mr. President, I wish to express very briefly and concisely the reason for giving a 2 cent per pound duty for the boiled. We are giving in the bill 10 cents a pound on these yarns. If a pound is boiled—depending, of course, upon its character, but on the average and the average length of boiling—there will be but eight-tenths of a pound left. Therefore there will be a loss of two-tenths of a pound, or two-tenths of 10 cents, or 2 cents. Hence we add 2 cents per pound for the boiling. If we failed to give the 2 cents per pound, then all would be imported in a boiled condition to lessen the duty. The 2 cents is simply about what would be the average of loss in the boiling.

Mr. SMITH. Mr. President, I want to call attention to some of the fundamental facts underlying this question. According to my information, I understand that of the element out of which these cords and twine and the ultimate woven fabric are made in one particular—that is, the hemp—we produce perhaps about 40 per cent of the hemp that is used, but we do not produce a pound of the other elements included in the schedule.

The American people, the great mass of manufacturers of certain articles, all the farmers of the country, the truck growers, the grain growers, the cotton growers, are dependent upon the manufactured form of the jute, the ramie, and the sisal, and the different forms of coarse cordage or coarse fiber to make the gunny sacks or bagging for the cotton, the bags in which the wheat is shipped, and so forth. All these articles are absolutely essential to enable the farmers of the country to get their products to market.

Everyone knows that we should bend every effort here to try to lessen the cost of the articles upon which the American people are dependent for their daily living; and yet here, as to an article of which we do not produce a pound, we put a duty on the raw material. At a glance that would seem to be all right, even from the Democratic standpoint that it would be a revenue producer; but the moment that duty is paid at the customhouse and the raw material moves to the factory door the manufacturer takes advantage of it, and immediately calls for a compensatory duty on an article which he manufactures for the benefit of those who are to produce the material in this country.

A little later on we will come to the question of cotton bagging. I want to point out to the Senate where there is a peculiarly unjust imposition upon the cotton producers of the country. Every man knows that the American producer of raw cotton sells his cotton under what is known as the c. i. f. and 6 contract—cost, insurance, freight, and 6 per cent deducted for tare, which means the bagging and the ties. Before ever the domestic or foreign buyer purchases a bale of American cotton he knocks off 30 pounds for a 500-pound commercial bale. So the producer of cotton has to buy in a protected market his protected bagging and his highly protected steel ties, and then give them away when he sells his cotton under the deduction of 6 per cent for tare. He takes his free cotton and puts it into protected bagging and protected ties and sells it, and then he loses the bagging and the ties for which he has to pay a high protective price.

I am calling attention to this fact because agricultural operations in this country have become so unprofitable that, according to the last census, the majority of our population are in the cities, the proportion being 52 per cent in the cities as against 48 per cent in the country. Yet we are solemnly proposing to pile up duties on articles which are produced in foreign countries and which their producers are seeking to get in here free to be sold in our market; we stop the raw materials at the customhouse and pile up the duties, which are, of course, passed on to the man who is producing the bread and meat for the 110,000,000 of American people to eat.

Later on I am going to take occasion to elaborate my discussion of this question; but my attention has been called to the fact that in the very first paragraph of the pending bill there has been placed a duty of 2 cents a pound on white arsenic. Up to the present time that article has come in free. How is white arsenic produced? The bulk of it in this country is produced as a by-product from the smelting of copper ores. It is a forced production; those who produce it have to get rid of it, just as it is necessary to get rid of the hulls of the cotton seed in order to get at the meat and the oil in the seed itself.

White arsenic has been upon the free list because not only was it a by-product but it was an essential ingredient of a

material used to keep down the startling ravages of insect pests on the farm. Paris green is used for the potato crop which is grown in Maine and in the West and South; calcium arsenate for the spraying of trees, in order to extirpate the San Jose scale and the brown-tailed moth and other predatory insects that are actually threatening the very existence of our gardens and of our fields. Last has come that pest which is destroying the great cotton crop of the South, the boll weevil. Although the Agricultural Department has spent something like $12,000,000 in the effort to find some method of controlling the boll weevil, they have not even checked it, until within the last two years, when there has been something of hope held out by the use of calcium arsenate.

Now, just as we have discovered that it would require thousands of pounds of this substance to treat the 35,000,000 acres of cotton which is grown in the South, immediately, for the first time in the history of tariff legislation, a duty of 2 cents a pound is placed upon this essential ingredient of an article which is necessary to protect the fields and the orchards of America.

Who owns the industry producing this commodity? Upon investigation it will be found that those who control the smelting of copper in this country are the ones who have come here and insisted that this duty shall now be placed upon this ingredient the use of which spells the life of agriculture and of our orchards.

Mr. President, I am merely calling attention to this matter to-day. I am going to take occasion to show, or attempt to show, that the imposition of this duty, which unquestionably is an example of shameless favoritism toward one combination and one set of men, will inflict upon the cotton growers of the South alone a burden of $18,000,000 in the purchase of this poison for use in the effort to eradicate an insect which is threatening the destruction of a billion dollars' worth of property and may wrest from us the cotton supremacy of the world. Yet upon a miserable by-product—and, as I understand, the great Guggenheim interests produce the major part of this ingredient—we propose to levy a duty of 2 cents a pound upon that which we must import; and it is necessary to import it, because from all the sources of supply in America we should not get more than half enough for our necessities, without the promise of ever having an adequate supply. The amendment imposing the duty upon this ingredient having already been agreed to by the Senate, I shall take occasion when the bill comes into the Senate to inform the Senate specifically and minutely as to just what this proposed duty means, from whom comes the request for it, whom it will benefit, and upon whom the burden of the proposed tax will rest.

The same thing is true as to the very schedule the duties in which the Senator from Arkansas [Mr. ROBINSON] has been so faithfully trying to get reduced. The potato crop of this country, the wheat crop, the corn crop, the rye crop—indeed, the entire grain crop—and the cotton crop are dependent in their preparation for market upon this ingredient; and yet the unprotected farmer, who is struggling for existence, must pay a duty and a profit to the domestic producer of this article, for fear that he might suffer competition at the hands of the foreigner who has the raw material and who has the facilities for giving the agricultural industry some little deduction in the price of a material which is essential in preparing crops for market.

Mr. SMOOT. Mr. President, did I understand the Senator from South Carolina to say that the duty of 2 cents a pound on arsenic would cost the cotton growers $18,000,000?

Mr. SMITH. Yes, sir. When the Senator from Utah makes the computation he will find that the duty will cost the farmers the sum indicated. At the proper time I shall submit a table showing that to be the fact; and I am going to let the statement which I have made stand for this reason: There are 35,000,000 acres in cotton; it takes from 4 to 5 pounds to dust an acre of cotton with this poison, and it should be dusted five or six times a year. When the amount is added up which it would take to control the weevil it will be found that it will cost the planter 50 cents an acre. I am speaking of the cotton grower alone, of course.

Mr. SMOOT. At 2 cents a pound, the cotton growers of the South would have to use 900,000,000 pounds of arsenic to make the cost to them $18,000,000. I do not think the Senator will say that that amount of white arsenic is used in the South.

Mr. SMITH. I do not intend to go into the particulars now, but later I shall do so; but I say that the duty will cost the planter 50 cents an acre, assuming that half of the crop will be dusted, and if half of the crop is dusted, it will cost the farmers an additional $18,000,000.

Mr. SMOOT. Of course, I know that in connection with the cotton crop of the South there can not be used more than is produced in all the world. Therefore, I merely rose to call the Senator's attention to the figures, because I thought perhaps the Senator had unconsciously misstated them.

Mr. SIMMONS. Mr. President, I should like to ask the Senator from South Carolina a question.

Mr. SMITH. I was proceeding upon the assumption that we did have an adequate domestic supply, but the fact is that there is not an adequate domestic supply, and that there is an unprecedented demand, because it has recently been discovered that by the use of arsenic the boll weevil at least partially may be controlled. Immediately that is discovered, and knowing that the distress of the cotton growers of the South will create an unprecedented demand, a duty of 2 cents a pound is put on for the benefit of those who want to sell arsenic, which is merely a by-product of the copper mines of the country.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from North Carolina?

Mr. SMITH. I yield.

Mr. SIMMONS. I take it that the Senator means there is not at this time an adequate supply of the material in this country?

Mr. SMITH. There is not.

Mr. SIMMONS. And it is questionable whether, if it were used to the extent that it should be used in order properly to protect the cotton crop against this pest, there is now an adequate supply in the world? If that be so, then the effect of the duty will be to prevent the farmers from securing an adequate supply unless they are willing to pay this additional price, and not only for the imported article but for the article produced in this country.

Mr. SMITH. I will explain clearly, because anyone who is a mere tyro in mathematics can understand exactly the proposition. We had not in this country anything like 50 per cent of the supply necessary to meet the ordinary demand even before the cotton crop came into the equation at all. If we had an adequate supply of this material to meet the demand of the cotton growers to dust their cotton acreage as it should be dusted, and this duty of 2 cents a pound were to be added, it would cost them in addition $18,000,000.

Mr. SMOOT. Mr. President, I thought, in view of my statement, the Senator perhaps would want to modify his figures as to the proposed duty involving an increase of $18,000,000 in the cost of arsenic. The greatest quantity of arsenic that was ever produced in the United States was 12,646,000 pounds. Last year we imported about 2,705,000, and the largest importation that ever came into the United States in any year was 7,479,000 pounds. So the greatest amount which it has been possible to have in this country in any one year was 20,000,000 pounds. In order to make a charge of 2 cents a pound equal $18,000,000, there would be required 900,000,000 pounds, whereas 20,000,000 pounds is the most we have ever had in any one year, taking the domestic production and also the greatest importation.

I simply wanted to say that because I thought the Senator had unconsciously made a misstatement when he said that the duty charge of 2 cents a pound would result in an additional cost of $18,000,000.

Mr. SMITH. Mr. President, I shall go into the details some time later, but I did not desire at this time to do so, because I did not want to take up the time of the Senate. I simply wanted to call the attention of the public and of the Senate to the fact that the producers of arsenic, instead of being willing at least to contribute a by-product which has been on the free list and which is essential in order to destroy the predatory pest which is threatening to ruin the food and the textile crop of this country, immediately when arsenic begins to show signs of having a tremendous application, demand and are accorded a duty of 2 cents a pound on this product. It is for the benefit of those who are already making their profits out of the main production, namely, out of the smelting of copper, and who are forced by law to capture this arsenate of lead because of its destructive effect on vegetation surrounding the smelters. Now they ask Congress to place a duty of 2 cents a pound on a by-product which is found to be essential in the protection of the crops of this country. In the name of God, where are we going to stop with this protective craze? The smelters do not start out to get the arsenic; they start out to get the lead and copper, but they find they have a by-product which is essential in producing the food which those engaged in the smelting business must eat and the clothes which they must wear. They are not even willing to contribute the by-

product to the general welfare of the country, but hasten to Congress to get a duty on a by-product in order that they may make still further profits out of the things which they produce.

Mr. SMOOT. Mr. President, all I want to say is this: If the 2 cents did apply to every pound of arsenic that has ever been produced in the United States in one year, and did apply to every pound of arsenic that was imported in the highest year of importation, it would amount to about $400,000, and not $18,000,000. That is all I want to say.

Mr. SMITH. All right, Mr. President. Let us take the Senator's own figures. An additional 2 cents a pound means, on the 25 pounds that he will use during the season, 50 cents additional per acre. That is what it means.

Mr. SMOOT. They do not use it on the acreage that the Senator says; that is all.

Mr. SMITH. Very well; I am taking you at your own word. You have raised it 50 cents an acre. On every farm of 100 acres you have charged that farmer $50; on every million acres you have charged $500,000; on 35,000,000 acres you would charge about $18,000,000. Those are my figures.

Mr. ROBINSON. Mr. President, I hope we may proceed now with the schedule immediately under consideration. The statement submitted by the Senator from South Carolina is of very great importance, and I am in cordial sympathy with him touching the position that he has taken respecting the duty on white arsenic and also touching the subject of cotton bagging. The latter will be reached in the present schedule in the course of this afternoon, I hope.

Realizing the very great importance of the subjects that have been discussed during the last half hour, inasmuch as the Senator from North Carolina has expressed a desire to conclude this schedule this evening before the Senate adjourns, and that we may make that progress, I hope Senators will find it convenient to confine themselves to a discussion of the questions that are presented in this schedule. I am not minimizing in any degree the importance of the discussion of the Senator from South Carolina. I cordially concur in everything that he has so ably said.

Mr. SMITH. Mr. President, I am only going to take just a second. These were such correlated things that I thought perhaps if the Senate could see that each one of these articles affecting the farmer bore a duty they might be persuaded to slow up at the beginning, so that we would have a clear understanding that the accumulated reductions on these articles might spell some little benefit; but if we allow these to pass without calling attention to those on which we have already put impositions and those that are in the future, it might have an effect upon the immediate schedule.

Mr. KING. Mr. President, I inquired of my colleague a few moments ago as to the total production under this schedule and he very courteously had the figures produced. I have hastily gone over those figures, and later I shall verify them and give to the Senate the result of my computations; but I venture the assertion now—and I feel sure that the computations will justify the statement—that the rates in this schedule will impose upon the American people an unnecessary tax of between twenty-five and forty million dollars.

The PRESIDING OFFICER. The question is on the amendment of the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. On line 18, it is proposed to strike out "twines" and to insert the same word "twines" with a comma immediately thereafter.

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 19 it is proposed to strike out "23" and to insert "40," so as to read:

Provided, That the duty on the foregoing threads, twines, and cords shall be not less than 40 per cent ad valorem.

Mr. ROBINSON. Mr. President, I move to strike out "40" and insert "30" in lieu thereof.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment.

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 24 it is proposed to strike out the word "hemp" and the comma, so as to read:

Wholly or in chief value of sunn, or other bast fibers.

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 134, line 1, it is proposed to strike out the word "pound" and to insert the same word "pound" with a semicolon and the following words: "Wholly or in chief value of hemp, 3 cents per pound," so as to make the paragraph read:

PAR. 1005. Cordage, including cables, tarred or untarred, wholly or in chief value of manila, sisal, or other hard fibers, three-fourths of 1 cent per pound; cordage, including cables, tarred or untarred, wholly or in chief value of sunn, or other bast fibers, but not including cordage made of jute, 2 cents per pound; wholly or in chief value of hemp, 3 cents per pound.

Mr. ROBINSON. Mr. President, I presume the committee justifies this amendment on the ground that we have placed a duty of 2 cents a pound on the raw material of hemp. I simply point out the fact that the duty is 3 cents a pound upon a commodity a part of which is hackled, the raw material of which bears a rate of 4 cents a pound, emphasizing most forcefully that the rate of 4 cents a pound on hackled hemp is unreasonable.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The ASSISTANT SECRETARY. In paragraph 1006, gill nettings, nets, webs, and seines——

Mr. SMOOT. In line 6, I move to strike out the word "highest."

The ASSISTANT SECRETARY. It is proposed to strike out the word "highest" in line 6 just before the word "rate."

Mr. SMOOT. That simply means that if there were a few threads of a high count the rate would be that of the very highest count, and I do not think that is necessary.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The ASSISTANT SECRETARY. In line 20 it is proposed to strike out "10" and insert "20," so as to make the paragraph read:

PAR. 1006. Gill nettings, nets, webs, and seines, and other nets for fishing, composed wholly or in chief value of flax, hemp, or ramie, shall pay the same duty per pound as the rate imposed in this act upon any of the thread, twine, or cord of which the mesh is made, and, in addition thereto, 20 per cent ad valorem.

Mr. SMOOT. The committee desires to have that amendment rejected.

Mr. ROBINSON. Mr. President, under the rates that have already been agreed upon respecting the raw material, I do not think this is an excessive rate that the Senate committee now proposes. It reduces the rate that the committee originally reported.

Mr. SMOOT. That is right.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The ASSISTANT SECRETARY. In paragraph 1007, page 134, line 10, it is proposed to strike out "26" and insert "17 cents per pound and 20," so as to make the paragraph read:

PAR. 1007. Hose, suitable for conducting liquids or gases, composed wholly or in chief value of vegetable fiber, 17 cents per pound and 20 per cent ad valorem.

Mr. SMOOT. The committee asks that that 20 per cent be changed to 10 per cent.

The ASSISTANT SECRETARY. It is proposed to modify the committee amendment by striking out "20" and inserting "10."

Mr. ROBINSON. Mr. President, that reduces by one-half the ad valorem rate which accompanies the specific rate. The ad valorem rate originally proposed was 20 per cent, and the committee now proposes to make it 10 per cent.

The PRESIDING OFFICER. The question is on the committee amendment, as modified.

Mr. LODGE. Mr. President, I regret that the committee has thought it necessary to report this reduction. I know that since the committee has agreed upon it there is no probability of its being changed; but I simply wish to have printed in the RECORD a statement from Charles Niedner's Sons Co., who are large manufacturers of this hose.

There being no objection, the letter referred to was ordered to be printed in the RECORD, as follows:

MALDEN, MASS., *April 28, 1922.*

Hon. HENRY CABOT LODGE,
United States Senate, Washington, D. C.

MY DEAR SENATOR LODGE: May we take the liberty of troubling you again about our difficulties with regard to the new tariff bill as reported out of your Finance Committee?

We are referring to the duty on manufactured linen fire hose, paragraph 1007, and on yarns of which they are made, paragraph 1004.

There are only a few manufacturers of linen fire hose in this country, and we speak for them all.

We requested both before the House and Senate committees that the tariff on finished hose be placed at 50 per cent ad valorem. The Senate bill at present prices amounts to practically 50 per cent. This request was made on the assumption that the tariff on yarns would be no more

than the amount asked for by the yarn manufacturers and as reported in the Fordney bill.

The practical application of the tariff as reported out of the Senate committee increases the duty on yarns and also the duty on hose, but the duty on hose is not increased sufficiently to take care of the increase in the duty on yarns, and it is our opinion that paragraph 1007 should be amended so as to more nearly take up the differential between the two proposed rates. Should the tariff on yarns be passed as reported by the Senate Finance Committee the duty on finished hose is not high enough.

This is so because the English manufacturer can sell his hose for $1 a pound. His duty under paragraph 1007 would amount to 37 cents, the freight and insurance would bring his cost f. o. b. America's ports, say, $1.40 per pound, largely on account of the difference between American and English labor.

We are obliged to charge for our hose under the present low tariff on yarns prices ranging from $1.65 to $1.78, and necessarily under the increased yarn duties the price would be higher, and in the face of this condition we are wondering what is going to happen to our industry? Frankly, we do not see how we can exist with the tariff on yarns left where it is in paragraph 1004, unless a provision like this is added to paragraph 1007, which will, we think, take care of the situation under the return of normal conditions:

"*Provided*, That the duty on the foregoing shall not be less than 60 per cent ad valorem."

If this is done the foreign manufacturer will be able to land his hose here on present schedules at around $1.60 a pound, and we will be able to compete with that within our price ranges. The factor of 60 per cent ad valorem will take care of the declining market abroad in raw material and labor.

The paragraph as we suggest in amendment will be as follows:

"PAR. 1007. Hose, suitable for conducting liquids or gases, composed wholly or in chief value of vegetable fiber, 17 cents per pound and 20 per cent ad valorem: *Provided*, That the duty on the foregoing shall not be less than 60 per cent ad valorem."

We are not asking for protection to give us a chance to charge exorbitant prices but merely to have a fair run with foreign competitors, and we do not see how we are going to under these conditions.

Yours truly,

CHAS. NIEDNER'S SONS CO.,
WM. NIEDNER, *Treasurer*.

Mr. LODGE. I ask that the paragraphs I have marked in the letter—they are very short—be read from the desk.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Assistant Secretary read as follows:

We requested both before the House and Senate committees that the tariff on finished hose be placed at 50 per cent ad valorem. The Senate bill at present prices amounts to practically 50 per cent. This request was made on the assumption that the tariff on yarns would be no more than the amount asked for by the yarn manufacturers and as reported in the Fordney bill.

The practical application of the tariff as reported out of the Senate committee increases the duty on yarns and also the duty on hose, but the duty on hose is not increased sufficiently to take care of the increase in the duty on yarns, and it is our opinion that paragraph 1007 should be amended so as to more nearly take up the differential between the two proposed rates. Should the tariff on yarns be passed as reported by the Senate Finance Committee the duty on finished hose is not high enough.

This is so because the English manufacturer can sell his hose for $1 a pound. His duty under paragraph 1007 would amount to 37 cents, the freight and insurance would bring his cost f. o. b. America's ports, say, $1.40 per pound, largely on account of the difference between American and English labor.

We are obliged to charge for our hose under the present low tariff on yarns prices ranging from $1.65 to $1.78, and necessarily under the increased yarn duties the price would be higher; and in the face of this condition we are wondering what is going to happen to our industry. Frankly, we do not see how we can exist with the tariff on yarns left where it is in paragraph 1004, unless a provision like this is added to paragraph 1007, which will, we think, take care of the situation under the return to normal conditions.

Mr. LODGE. Mr. President, I simply wanted to call the attention of the Senator from Utah to the point that is made there, that having raised the duties on yarns, the committee have made no corresponding differential for the benefit of this manufacturer of hose.

Mr. SMOOT. I will say to the Senator that we gave the rate on the basis of 20-lea yarn, and that is 17 cents a pound, just as we provide here. We give him the compensatory duty of 17 cents, and then 10 per cent ad valorem on that; and I will say to the Senator that from the importations and the production in the United States under a 4¾ per cent equivalent ad valorem to-day the importations do not amount to one-half of 1 per cent. Under those circumstances the committee felt that they could not justify a rate higher than 10 per cent.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

The amendment as modified was agreed to.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. On page 134, line 17, it is proposed to strike out the word "pound" and the comma and the words "and in addition thereto, 13," and to insert "pound and 25." It is proposed to modify that by striking out "25" and inserting "15," so that, if amended, the paragraph will read:

PAR. 1008. Fabrics, composed wholly of jute, plain-woven, twilled, and all other, not specially provided for, not bleached, printed, stenciled, painted, dyed, colored, nor rendered noninflammable, 1 cent per pound; bleached, printed, stenciled, painted, dyed, colored, or rendered noninflammable, 1 cent per pound and 15 per cent ad valorem.

Mr. SMOOT. I desire to have that modified to 10 per cent ad valorem.

The ASSISTANT SECRETARY. It is proposed to strike out "25" and in lieu thereof to insert "10."

The PRESIDING OFFICER. The question is on the committee amendment as modified.

Mr. ROBINSON. Mr. President, the ad valorem rate originally reported in the committee amendment was 25 per cent. The committee now proposes to reduce it to 10 per cent. I shall only say that I am in favor of the amendment as now offered.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment, as modified.

The amendment, as modified, was agreed to.

The ASSISTANT SECRETARY. The committee proposes to insert a new paragraph, as follows:

PAR. 1008a. Woven fabrics, not including articles finished or unfinished, of flax, hemp, or ramie, or of which these substances or any of them is the component material of chief value (except such as are commonly used as paddings or interlinings in clothing), exceeding 30 and not exceeding 100 threads to the square inch, counting the warp and filling, weighing not less than 4½ and not more than 12 ounces per square yard, and exceeding 12 inches but not exceeding 24 inches in width, 60 per cent ad valorem.

Woven fabrics, such as are commonly used for paddings or interlinings in clothing, composed wholly or in chief value of flax, or hemp, or of which these substances or either of them is the component material of chief value, exceeding 30 and not exceeding 110 threads to the square inch, counting the warp and filling, and weighing not less than 4½ and not more than 12 ounces per square yard, 16½ cents per pound—

At this point the committee proposes to modify the amendment by striking out "16½ cents per pound and 25" and inserting "60," so that it will continue—

60 per cent ad valorem; composed wholly or in chief value of jute, exceeding 30 threads to the square inch, counting the warp and filling, and weighing not less than 4½ ounces and not more than 12 ounces per square yard, 9 cents per pound—

At this point the committee proposes to modify the amendment by striking out "9 cents per pound and 25" and inserting "55," so that the remainder will read—

55 per cent ad valorem.

Mr. SMOOT. The committee desires to modify this amendment on page 135, line 3, by inserting "55"; in line 11, in place of "60," to insert "55"; and in line 16, in place of "55," to insert "50."

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as thus modified.

Mr. ROBINSON. Mr. President, I am glad that the Senator from Utah has seen fit to reduce the rates which the committee proposes in this connection, but I think that even considering the rates on yarns a further reduction is justified. The very highest grade cotton cloths bear a rate of 45 per cent, and considering the fact that the Senate has agreed to a minimum rate on the yarns which enter into the fabric involved in this amendment of 30 per cent ad valorem, I think the Senate would be justified in fixing the rate at 40 per cent. I therefore move to amend the committee amendment by striking out "55" and making it "45" in line 3, and by striking out "50" at the end of the paragraph and inserting "40."

As all Senators appreciate, this is a very important provision in this bill. Under it will be imported linen cloth, and the manufacture of that commodity is limited to a very small quantity in the United States, so that this is literally a tax on consumption. I do not believe the rate now proposed by the committee is justified, although, as I have stated, it is an improvement over the rate originally reported, and also over the rate proposed by the Senator from Utah in his amendments printed on July 18.

It is noticeable that the action of the committee respecting this matter has undergone three important phases; first, there was the rate reported in the bill, which was, as I understand it, the equivalent of 60 per cent ad valorem in both paragraphs; next, the amendment proposed by the committee on July 18, after the paragraph had been taken up, which contemplated making the rates 55 per cent ad valorem. Now the committee proposes to reduce the rate in the first section of the amendment, line 3, from 60 per cent to 55 per cent, and the last rate, on line 16, from 55 per cent to 50 per cent. My amendment proposes still further reductions, to 45 per cent and 40 per cent, respectively. I do not desire to consume further time in the discussion of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas to the committee amendment.

Mr. SIMMONS. Mr. President, I would like to ask the Senator from Utah one question. This particular paragraph embraces linen fabrics?

Mr. SMOOT. I will say, in brief, that this paragraph covers the competitive articles in the United States. The following paragraphs, I may say, do not cover competitive articles.

Mr. SIMMONS. When the Senator uses the word "competitive," does he mean such articles as are imported into the United States?

Mr. SMOOT. Yes; a great many of them are imported, and a great many of them are made here.

Mr. SIMMONS. By the word "competitive" the Senator has reference to foreign competition?

Mr. SMOOT. Yes; in other words, crashes, hucks, napkins of counts less than 60, and that class of goods.

Mr. SIMMONS. How does the Senator differentiate between the competitive fabrics dealt with and those which the Senator calls noncompetitive fabrics?

Mr. SMOOT. By the rate and the yarn itself. The others would not fall in this paragraph, because they are not made of yarn of the size covered by this paragraph.

Mr. SIMMONS. I understand the Senator, then, as saying that the experts in the department agree with him that this particular paragraph we are dealing with now would embrace those linen fabrics a part of which, consumed in this country, are imported from abroad?

Mr. SMOOT. I can tell the Senator just what the importations were. There is competition in these articles.

Mr. SIMMONS. I want to know if they would include any of those linen fabrics which are not produced in this country at all?

Mr. SMOOT. No; those come in a later paragraph.

Mr. SIMMONS. That is the point I had in mind. This does not include any of the linen fabrics consumed in this country but which are produced abroad?

Mr. SMOOT. For instance, in paragraph 1009, the very next paragraph, it is provided that—

> Woven fabrics, not including articles finished or unfinished, of flax, hemp, ramie, or other vegetable fiber except cotton, or of which these substances or any of them is the component material of chief value, not specially provided for.

Then we propose that there shall be only 40 per cent ad valorem. Those are the articles which come in, and which are not provided for in paragraph 1008.

Mr. SIMMONS. Then, this is intended as a protective tariff?

Mr. SMOOT. It is intended as a protective tariff.

Mr. SIMMONS. And these articles are largely imported; but when you get to the paragraph which deals with articles of linen which are not produced in this country at all, and of which we buy practically our entire supply from abroad, the duty is intended as a revenue duty?

Mr. SMOOT. Forty per cent, intended as a revenue duty.

Mr. POMERENE. What is that paragraph?

Mr. SMOOT. Paragraph 1009.

Mr. ROBINSON. And paragraph 1009a.

Mr. SIMMONS. Mr. President, there has been a great deal of trouble about this linen schedule. There have been a great many protests and a great many complaints about these rates. I do not want to take much time in the consideration of this subject, but I think the quickest way to get rid of it is by asking questions, instead of indulging in argument.

Mr. SMOOT. The protests apply more to paragraph 1009 than to any other, with the exception of the provision in regard to paddings, which fall in paragraph 1008a. It is true that paddings do fall in that paragraph, but there is very little protest, when it is understood that we have fixed a rate of only 40 per cent on fabrics in paragraph 1009.

Mr. SIMMONS. Will the Senator advise me where these fabrics are produced which are covered in paragraph 1008a, about which we are now talking? Where are they produced abroad?

Mr. SMOOT. I think paddings are produced more in England and Scotland.

Mr. SIMMONS. The other articles are produced likewise in England and Scotland, in the main, are they not?

Mr. SMOOT. It is true that Belgium produces quite a large amount of these paddings, too.

Mr. SIMMONS. In view of the fact that the competitive article is produced in England and Scotland and Belgium, largely—I should say more particularly in Scotland, because that is where this industry seems to be strongest—does not the Senator think that the 55 per cent rate is rather high to cover the difference between the cost of production in those countries as compared with the cost of production in this country? Are not the conditions of labor there more nearly comparable with conditions in this country? Are not the conditions of labor there certainly very much more nearly comparable with conditions here than the conditions of labor here with those in Germany, whose low wages the Senator has been saying justify the imposition of the very high rates the committee has imposed upon certain products in this bill?

Mr. SMOOT. We start out here with a duty upon the raw material. For instance, the yarn in the paddings about which we have just been talking is taxed 40 per cent. The Senator from New Hampshire feels that there ought to be a rate of duty of at least 15 per cent above the rate on the yarn upon the finished product, and I want to say to the Senator from New Hampshire that there is reason in that contention. But the committee thought that that being a cheap product, used by the people from one end of the country to the other, a great quantity being used here, they would only give that differential of 10 per cent. The Senator from New Hampshire offered an amendment to limit the maximum rate to 35 per cent, thus giving the 15 per cent on these paddings, but the committee decided that 10 per cent was enough, and that is all there is to this differential.

Mr. SIMMONS. I am not complaining about the differential.

Mr. SMOOT. Of course, if in conference the rates imposed upon the hemp, hemp tow, and hackled hemp are disagreed to, all of these rates will be lowered. The Senator from North Carolina will be one of the conferees, and we can make it just as it is now—built up from the hemp into the finished cloth in a regular, straight line.

Mr. POMERENE. Mr. President, so that I may be able to follow this discussion, I understood the Senator from Utah to say that the rate was 40 per cent, and the Senator from North Carolina said it was 60 per cent.

Mr. SIMMONS. The Senator from Utah was speaking about the yarn.

Mr. POMERENE. The pending amendment provides for a rate of 60 per cent.

Mr. SMOOT. No; the pending amendment is to strike out 60 per cent and insert 55 per cent.

Mr. ROBINSON. That is not quite correct. I have offered an amendment, which is the pending amendment, to reduce the first ad valorem rate, in line 3, from 55 per cent, as proposed by the committee, to 45 per cent, and in the second instance, the latter part of the paragraph, to reduce the rate from 50 per cent, as now proposed by the committee, to 40 per cent. That would still leave a differential of 10 per cent in each instance.

Mr. SIMMONS. Mr. President, I was discussing this from the standpoint of the amendment of the committee. The committee amendment reduces the 60 per cent to 55 per cent. I understand the Senator now to say that that represents the duty on yarns, which is 45 per cent, plus 10 per cent for the compensatory rate.

Mr. SMOOT. That is on all the paddings—50 per cent on all the paddings.

Mr. ROBINSON. Let me make my statement a little clearer. The maximum rate on the yarn is 40 per cent. That will not be the rate in every instance. In all probability, even if my amendment is agreed to, the differential would average something like 15 per cent.

Mr. SMOOT. I have the figures showing the equivalent ad valorems, and I was really surprised to find how near, based on the prices of to-day, the rates imposed would approximate the 40 per cent. Sometimes the rate is 39.7; sometimes it is 40.5.

Mr. ROBINSON. I reached the same conclusion, figuring on the present prices, because I stated during the course of my remarks that it amounted to a straight ad valorem rate of 40 per cent.

Mr. SMOOT. And I agreed with the Senator.

Mr. SIMMONS. Mr. President, I think we understand each other. In this amendment the Senator is imposing a duty upon cloths enough in excess of that upon yarn to compensate, as he claims.

Mr. SMOOT. Fifteen per cent on the first two brackets, which are the finer goods, and 10 per cent on the subsequent brackets.

Mr. SIMMONS. I am not going to discuss with the Senator whether his compensatory rate measures the increase in the cost or not. It has been very difficult for me to work out the exact amount of duty that should be given to the manufacturer by way of compensation upon his raw material. That is a question for the experts. Assuming that no more has been added for that purpose than is necessary, my point is that the duties upon the yarn are excessive, in my judgment. They ought to be reduced. If they are reduced, then we can, after giving compensation to the manufacturer on the finished article,

reduce that article, in my judgment, very much further. The Senator now says that while he does not propose to do that now, the matter can be adjusted in conference.

Mr. SMOOT. Of course, it will be adjusted if the rates upon the raw products are disagreed to in conference; but as long as the Senate has acted upon them and the rates are imposed, these rates must in all fairness, I think, be adopted.

Mr. ROBINSON. To carry the argument a little further, if the Senator wants to reduce the tariff on the yarn and get a way to make probable that result, he should reduce the rate on the manufactured article.

Mr. SMOOT. We want to be consistent, however.

Mr. ROBINSON. I would like to be certain to get this controversy well into conference, so that no question can arise as to the power of the conference to deal with it. I believe that with the adoption of the amendment which I have proposed, the yarn rates will be materially reduced, and that unquestionably ought to be done.

Mr. SIMMONS. Mr. President, we can not at this stage reduce the House rate. We can, however, when the bill gets in the Senate, then offer amendments to reduce the House rates upon yarn, and I want to give notice now that when the bill gets into the Senate I shall seek to reduce the House rates upon yarn. I shall do that for the purpose, first, of getting at these rates upon a fair basis; and, secondly, for the purpose of further reducing the rates proposed upon the finished products. I think both are excessive, but I recognize that the rate upon the finished product is excessive largely because of excessive rates upon the raw material. We have to go to the bottom of the thing before we can properly correct it. We are in such a situation that we can not at this stage, in my judgment, fully correct the vice that is in the arrangement.

Mr. POMERENE. Mr. President, these rates, both upon the raw material and upon the finished product, have been changed from the time of the original presentation of the bill and the pending amendment. I, like other Senators, have had a good many protests against the rates in this schedule. I have here a letter from the manager of one of the leading hotels in Cincinnati. This hotel is obliged to keep in stock about $30,000 worth of table and bed linen. They say that they consume about that amount each year. They are very greatly disturbed about this rate because, they say, it is going to increase enormously the prices that they must pay for these linens. I want to read a paragraph from the letter, and I would like the attention particularly of the senior Senator from Utah. After speaking of the advance in the rate—and I have not been able to compare his statement as to these rates with the pending amendment—the writer of the letter said:

> By way of explanation, napkins such as we use here, 22 inches by 22 inches, which now sell to us at $14 per dozen, would sell for $28 to $35 per dozen. This is only one item. We use here 3,000 dozen napkins a year. We use 500 dozen various sized table tops and cloths, ranging in price from $4 to $10 each. We carry a reserve stock of $30,000 worth of linen, and we have in service an equal amount—

Which, he says, is worn out every year.

Mr. SMOOT. I want to say to the Senator that every item mentioned in the letter will have more than 120 threads to the square inch and will not fall under this paragraph. It will fall in the next paragraph. I have already given notice that that will be reduced to 40 per cent, which is only 5 per cent above the present rate.

Mr. POMERENE. Does the Senator mean paragraph 1009?

Mr. SMOOT. Yes. Not only that, but I will say to the Senator at this time that I expect to offer a new paragraph, following paragraph 1009, to read as follows:

> PAR. 1009a. Plain woven fabrics, not including articles finished or unfinished, of flax, hemp, ramie, or other vegetable fiber, except cotton, weighing less than 4½ ounces to the square yard, 35 per cent ad valorem.

Mr. POMERENE. What does that mean?

Mr. SMOOT. It means that on all linen goods coming into this country, weighing less than 4½ ounces to the square yard, there will be a rate of only 35 per cent ad valorem. It means such articles as handkerchiefs, dress goods, and so forth. But every article mentioned in the letter which the Senator read will carry more than 120 threads to the square inch and, therefore, will fall under paragraph 1009, woven fabrics, and the rate will be only 40 per cent. The existing rate is 35 per cent. What the hotel people have written about is based, I have no doubt, upon a newspaper report stating that all linens would be advanced to 60 per cent ad valorem. They have not noticed, for of course they have had no chance to do so, just what the provision actually provided.

Mr. POMERENE. I know the manager very well. He is a very high-class and very able man and usually knows what he is talking about.

Mr. SMOOT. It is very natural for him to write the letter on statements which have been made in the public press about the rates upon linen. Of course, he would take that for granted. But I say to the Senator now that the very articles which he uses, such as napkins, tablecloths, and things of that kind, will have more than 120 threads to the square inch and, therefore, will not fall under paragraph 1009.

Mr. POMERENE. I am not advised as to the source of his information. I have other letters—I am not going to take the time of the Senate to read them—which speak of the tremendous increase in the prices of these articles under this paragraph. I am glad the Senator is modifying the amendment in the way he has stated.

Mr. SMOOT. The committee reported paragraph 1009 at 50 per cent, which was 15 per cent more than the existing law. That caused a protest, not only from hotel keepers, but everybody else interested.

Mr. POMERENE. All the dry-goods people in Ohio are protesting against it.

Mr. SMOOT. I said it was not only the hotel keepers, but people who use linen sheets and linen goods generally. Instead of having the 50 per cent rate, the committee reduced it to 40 per cent, which, as I said, is only 5 per cent above the existing law. That does not mean protection. That is a revenue measure pure and simple.

Mr. POMERENE. When we speak of encouraging the growth of flax, and hemp, and so on, I thought it was intended as a protection measure.

Mr. LODGE. Mr. President, may I ask the Senator from Utah a question?

Mr. SMOOT. Certainly.

Mr. LODGE. The paragraph about which the Senator has been speaking applies also to table damask?

Mr. SMOOT. Yes.

Mr. LODGE. Table damask and the different linens are not made here at all and never have been.

Mr. SMOOT. That is correct, and that is the reason why the committee now offers the rate on the plain woven fabrics, weighing less than 4½ ounces per square yard. They are not made in this country, to speak of, and it was thought they should take the rate of 35 per cent ad valorem, just the rate provided in the existing law.

Mr. POMERENE. I realize, of course, that we must have revenue. I realize that this is very largely a revenue item. At the same time the writer of the letter to which I have referred presents his protest along this line. The hotel he represents has been trying to reduce its rates for the general traveling public, and there is that feeling generally among hotels. There certainly is such a feeling among the general traveling public. To increase the rates as they were under the bill as originally offered would very much advance the cost of the articles about which we have been talking. It is simply another reason why the rates of entertainment at hotels can not be decreased; at least it would be used as an excuse.

Mr. LODGE. Mr. President, the fabrics covered by the paragraph which we have been discussing and the fine linens referred to on the next page, table damasks and damask napkins, and so forth, are not made in this country and never have been. I do not pretend to know the precise reason why, but, apparently, we can not make these fine linen products here. Therefore this is purely a revenue duty. It is not protection, because there is no industry to protect.

I am very glad that the committee have reduced the rate. I should have been glad to have the rates left at the existing revenue rates, but the increase is very slight. I am not surprised that the gentleman to whom the Senator from Ohio referred has been misled. I should think he would be. He has been misled by the advertisements which fill the newspapers, and which are intended, of course, to prepare the public for very great advances in all prices, which do not correspond always with the rates proposed in the bill. That the gentleman should have been misled, as thousands of others have been misled, is most natural. It is a good illustration of the way in which tariff rates, whether proposed or adopted or modified or whatever may be done with them, are fixed arbitrarily in many of the advertisements and then the confiding public notified of a great advance as a result.

Mr. SIMMONS. Mr. President, I would like to ask the Senator from Massachusetts a question. The Senator said just now that we could not produce any of these linens in this country except certain specified articles which he mentioned.

Mr. LODGE. I said they never have produced them, and apparently could not produce them.

Mr. SIMMONS. That is, towels and things of that sort?

Mr. LODGE. I was referring particularly to the two paragraphs on page 136, table damask, towels, sheets, and pillowcases, which I take to be very fine linen.

Mr. SIMMONS. We do not produce those?

Mr. LODGE. No; nor do we produce any fine damasks, so far as I am aware.

Mr. SIMMONS. But we do produce a small quantity of linen goods in this country. I think they are used chiefly, though, for towels and napkins.

Mr. LODGE. Yes; we produce some linen for towels and crash and some of the coarser linens that have, as I understand, protective rates.

Mr. SMOOT. But we hardly ever produce a linen of over 60 threads to the square inch. We have gone as high as 100 threads, but this duty applies to 120 threads.

Mr. SIMMONS. I want to ask the Senator from Utah if we import the yarns out of which linen napkins and towels are made in this country?

Mr. SMOOT. No, I will say to the Senator, we can not finish them in this country any better than other countries can finish them. In addition to the peculiar process employed there must be certain conditions as to water, climate, and so forth. It is very difficult to finish a very fine piece of linen. The Senator from North Carolina, of course, knows that.

Mr. SIMMONS. I understand perfectly well that we can not compete and we do not attempt to compete with Scotland, England, and Belgium in the production of fine linen, but we do compete with them as to certain other coarse linens, such as towels, and we make a considerable quantity of those.

Mr. LODGE. We make some of the coarser linens.

Mr. SIMMONS. The domestic production amounts to about 2 per cent of our consumption, and we import the remaining 98 per cent.

Mr. LODGE. The Tariff Summary says our production of the fine linens is negligible.

Mr. SMOOT. They fall in paragraph 1013.

Mr. SIMMONS. It is as to the proportion which we produce in this country that I am trying to direct the attention of the Senator from Utah. I desired to find out from the Senator, if I could—he has probably investigated this matter a little more thoroughly than I have for the framer of a bill always investigates the bill, or should investigate it, more thoroughly than do those who are to pass upon it; that is, as to the details and the minutiae—whether the yarns out of which we make this 2 per cent of linen cloths which are consumed in this country are spun in this country or whether they are yarns which we import?

Mr. SMOOT. I think the Senator from North Carolina has reference to paragraph 1013, which provides:

PAR. 1013. Towels and napkins, finished or unfinished, composed wholly or in chief value of flax or hemp, or of which these substances are, or either of them is, the component material of chief value, not exceeding 120 threads to the square inch.

We do not make any of these articles above 120 threads; in fact, we do not make any above 100 threads. We do make the threads out of which are produced towels and napkins, which are provided for in paragraph 1013; but, I repeat, we do not make any threads above 120——

Mr. SIMMONS. But do we make in this country all of the yarns that are needed in the production of the towels which we manufacture?

Mr. SMOOT. The regular manufacturer who goes into the particular line to make a business of it, without depending upon any country in the world, makes his own yarn. If he did not do that and if there were no yarns made in this country, if all the yarns had to be imported, the foreign manufacturers could control this market.

Mr. SIMMONS. But can the Senator tell me what proportion of yarns that are actually used in the manufacture of linens produced in this country are imported and what proportion of them we produce in this country? We do not import any yarns at all except for the purpose of manufacturing low-grade linen goods that are made in this country; the remainder of the linen goods are produced elsewhere; and therefore we do not have to import yarns for them.

Mr. SMOOT. The towels and napkins that are made here are of threads less than 120, and while I could not say just what the proportion is, we manufacture the great bulk of those yarns. However, it is a commercial impossibility to spin thread here over 120, or I might say, indeed, over 100, and very seldom over 60.

Mr. SIMMONS. The yarns which are used in the manufacture of linens here are yarns of less than 120 threads.

Mr. SMOOT. The yarns that are made in this country are yarns of less than 120 threads.

Mr. SIMMONS. The point I am trying to get the Senator's mind directed to is, first, do we in this country spin all the yarns that are needed in the manufacture of the 2 per cent of the linen goods which we produce? Of course, those yarns would be of a grade less than 120. I am asking these questions because I have a letter here in which the complaint is made that the manufacture of linen in this country might be extended so as to include other things besides towels and that class of goods but for the fact that the duty upon the yarns is fixed so high as to be practically prohibitory.

Mr. SMOOT. I do not think that is true on the counts of yarns that would go into that class of goods. The real truth of the matter is that there are very few linen goods made in the United States containing more than 60 picks to the square inch.

Mr. SIMMONS. Why could not the Committee on Finance meet the situation by imposing a very much less rate of duty upon yarns below 120?

Mr. SMOOT. If we did that we should destroy the yarn industry that goes into the very goods that we make in this country, and that, of course, we must not do.

Mr. SIMMONS. Of course, we do not want to destroy it.

Mr. SMOOT. But that would do it.

Mr. SIMMONS. But, for the purpose of extending the industry, we might impose duties which put it upon a competitive basis and enable the industry to expand.

Mr. SMOOT. On these low counts we have placed competitive duties.

Mr. SIMMONS. This letter I have says they are not; it says they are practically prohibitory.

Mr. SMOOT. I will say to the Senator that a great many manufacturers now import those yarns into this country.

Mr. SIMMONS. I have no doubt they have to import some.

Mr. SMOOT. The man who only manufactures napkins or towels and whose plant is not equipped except to weave them and finish them, who has no spinning capacity and no carding capacity or dyeing capacity, of course, would like to get the yarn in here just as cheaply as possible.

Mr. SIMMONS. I had this idea in mind, and it came to me from reading the letter: I realize the fact that we are not in a position, and probably are not going to be in a position, to compete with other countries in the production of very fine linen; but we have demonstrated the fact that we can compete in the production of certain coarse linens. We are now producing only 2 per cent of the linens that we consume in this country, and they are of the coarser grades. There is no reason why this industry should not be expanded and why the domestic manufacture of coarse linens should not be enlarged and increased. There is no reason why it should be confined to the use of the small amount of raw material that is produced here. If we can compete in the manufacture of the coarse goods to a limited extent we could compete to a large extent, and probably might become exporters. The letter which I have suggests, as I understand, that this industry—that is, the manufacture of coarse linen such as we are now manufacturing—could be greatly increased and enlarged, provided the duty upon the coarse yarns below 120 were reduced so as to permit of expansion. Now, the manufacturers are very largely confined in their production to the use of the yarns which we produce in this country, which is a very small quantity, because we produce but a very limited quantity of hemp and flax.

The PRESIDING OFFICER. The question is upon agreeing to the amendment offered by the Senator from Arkansas to the committee amendment as modified.

Mr. GOODING. I send to the desk a resolution and ask that it may be read.

Mr. ROBINSON. What is the request of the Senator?

Mr. GOODING. I ask that a resolution may be read.

Mr. ROBINSON. Mr. President, will not the Senator withhold his resolution for the present?

Mr. GOODING. How long does the Senator ask to have it withheld?

Mr. ROBINSON. I object to the presentation of the resolution at this time.

The PRESIDING OFFICER. Objection is made. The question is on the amendment offered by the Senator from Arkansas to the committee amendment as modified.

The amendment to the amendment as modified was rejected.

The PRESIDING OFFICER. The question now recurs on the committee amendment as modified.

The amendment as modified was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The READING CLERK. In paragraph 1009, page 135, line 17, after the word "including" it is proposed to strike out "article," and insert "articles."

The amendment was agreed to.

The next amendment of the Committee on Finance was on the same page and paragraph, in line 21, after the word "four" to strike out "28" and insert "50"; so as to read:

PAR. 1009. Woven fabrics, not including articles finished or unfinished, of flax, hemp, ramie, or other vegetable fiber except cotton, or of which these substances or any of them is the component material of chief value, not specially provided for, 50 per cent ad valorem.

Mr. SMOOT. I desire to modify that amendment by inserting "40" instead of "50."

Mr. ROBINSON. Mr. President, I move to strike out "40," in the committee amendment as now offered, and to insert "35" in lieu thereof. This paragraph has undergone a very material evolution. The committee first reported a rate of 50 per cent; subsequently the committee proposed an amendment reducing the rate to 45 per cent; and now it proposes to reduce the rate to 40 per cent. I am, of course, in favor of the committee amendment if the amendment which I have offered can not be agreed to, but it has been stated repeatedly during the debate, both by the Senator from Utah and the Senator from Massachusetts, that the rate in this paragraph is purely a revenue rate, there being no competition in the articles which are embraced in it. The present rate is 30 per cent, and I believe that the public interest would be conserved by retaining that rate. It was fixed as a revenue rate, and I have, therefore, moved to modify the amendment as now offered by the Senator from Utah by striking out "40" and inserting "35" in lieu of it. I ask for a vote on my amendment to the committee amendment.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Arkansas to the amendment of the committee as modified.

The amendment to the amendment as modified was rejected.

The PRESIDING OFFICER. The question now is upon the committee amendment as modified.

The amendment as modified was agreed to.

Mr. SMOOT. I send to the desk an amendment which I offered to the bill.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 135, after line 21, it is proposed to insert a new paragraph, as follows:

PAR. 1009a. Plain-woven fabrics, not including articles finished or unfinished, of flax, hemp, ramie, or other vegetable fiber, except cotton, weighing less than 4½ ounces per square yard, 35 per cent ad valorem.

Mr. ROBINSON. Mr. President, I propose an amendment to the committee amendment, as follows: Strike out "35 per cent ad valorem" and insert "30 per cent ad valorem."

This paragraph relates to noncompetitive articles, and, as stated by the Senator from Utah and the Senator from Massachusetts, is purely for revenue purposes. To reduce the rate to 30 per cent would be beneficial and wholesome; it would be a very reasonable revenue rate. I do not think that a rate of 35 per cent could very well be justified as a revenue rate.

I therefore ask for a vote on my amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is upon the amendment offered by the committee.

The amendment was agreed to.

The READING CLERK. On page 135, the committee proposes to strike out lines 22 to 25, and on page 136, lines 1 to 3, both inclusive, in the following words:

PAR. 1010. Woven fabrics, composed wholly or in chief value of flax, hemp, or jute, exceeding 30 and not exceeding 100 threads to the square inch, counting the warp and filling, and weighing not less than 4½ and not more than 12 ounces per square yard, such as are commonly used as paddings or interlinings in clothing, 33⅓ per cent ad valorem.

Mr. ROBINSON. Mr. President, that has been inserted in paragraph 1008a, which has already been disposed of by the Senate; and therefore there can be no objection to agreeing to the amendment, except such objection as I have offered to the other amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The READING CLERK. On page 136, line 8, it is proposed to strike out "33⅓" and insert "50," so as to make the paragraph read:

PAR. 1011. Pile fabrics, composed wholly or in chief value of vegetable fiber other than cotton, cut or uncut, whether or not the pile covers the whole surface, and manufactures in any form, made or cut from any of the foregoing, 50 per cent ad valorem.

Mr. SMOOT. Mr. President, I want that modified to 45 per cent, so that all of the pile fabrics shall conform to the pile fabrics in the cotton schedule. We have them there at 45 per cent, and we desire to put them here at the same rate.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

The READING CLERK. On page 136, line 11, it is proposed to strike out "28" and insert "50," so as to make the paragraph read:

PAR. 1012. Table damask composed wholly or in chief value of vegetable fiber other than cotton, and manufactures composed wholly or in chief value of such damask, 50 per cent ad valorem.

Mr. SMOOT. I ask to make that 40 per cent, Mr. President.

The READING CLERK. The amendment is modified by inserting "40" instead of "50."

Mr. ROBINSON. Mr. President, this amendment has undergone the same process of evolution that other amendments in the paragraphs recently reconsidered have undergone. I propose to modify the committee amendment by striking out "40" and inserting "35."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Arkansas to the amendment of the committee as modified.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment as modified.

The amendment was agreed to.

The READING CLERK. On page 136 the committee proposes to strike out paragraph 1013, being lines 13 and 14, and to insert in lieu thereof the following:

PAR. 1013. Towels and napkins, finished or unfinished, composed wholly or in chief value of flax, or hemp, or of which these substances are, or either of them is, the component material of chief value, not exceeding 120 threads to the square inch, counting the warp and filling, 55 per cent ad valorem; exceeding 120 threads to the square inch, counting the warp and filling, 40 per cent ad valorem; sheets and pillowcases, composed wholly or in chief value of flax, or hemp, or of which these substances are, or either of them is, the component material of chief value, 40 per cent ad valorem.

Mr. SMOOT. Mr. President, I want to say that the first part of the paragraph covers the competitive articles, and we have already voted upon them at 55 per cent. The other two parts of the paragraph cover the noncompetitive articles, and we have already voted for 40 per cent upon them.

Mr. ROBINSON. Yes, Mr. President, but we will vote on the matter again.

Mr. SMOOT. That is all right.

Mr. ROBINSON. This paragraph relates to articles of common use, absolute necessaries, and I believe that a lower rate is justified in all fairness and good reason. I therefore propose to modify the committee amendment as follows:

In line 19, strike out "55" and insert "45."
In line 21, strike out "40" and insert "30."
In line 24, strike out "40" and insert "30."

The PRESIDING OFFICER. The question is on the amendments offered by the Senator from Arkansas to the amendment of the committee.

The amendments to the amendment were rejected.

The PRESIDING OFFICER. The question now is on the committee amendment as modified.

The amendment, as modified, was agreed to.

The READING CLERK. On page 137, in paragraph 1014, line 2, it is proposed to strike out the word "therefrom" with a comma and to insert the same word "therefrom" with a semicolon.

The amendment was agreed to.

The READING CLERK. On line 4, after the word "tassels," it is proposed to insert a comma and the word "and," so as to read: "tassels, and cords and tassels."

The amendment was agreed to.

The READING CLERK. In line 4, after the word "wholly," it is proposed to insert the words "or in chief value," so as to read:

All the foregoing composed wholly or in chief value of vegetable fiber other than cotton.

The amendment was agreed to.

The READING CLERK. On line 5 it is proposed to strike out the word "wholly."

The amendment was agreed to.

The READING CLERK. In line 6 it is proposed to strike out "and not specially provided for, 28," and to insert "50," so as to read:

PAR. 1014. Fabrics with fast edges not exceeding 12 inches in width, and articles made therefrom; tubings, garters, suspenders, braces, cords, tassels, and cords and tassels; all the foregoing composed wholly or in chief value of vegetable fiber other than cotton, or of vegetable fiber other than cotton and india rubber, 50 per cent ad valorem—

And so forth.

Mr. SMOOT. Mr. President, I want to strike out "50" and insert "35." The rate under the existing law is 30 per cent.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

Mr. ROBINSON. I move to modify the committee amendment by striking out "35" and inserting "30."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment as modified.

The amendment as modified was agreed to.

The READING CLERK. On line 10 it is proposed to strike out "23" and insert "40," so as to read:

Tapes composed wholly or in part of flax, woven with or without metal threads, on reels, spools, or otherwise, and designed expressly for use in the manufacture of measuring tapes, 40 per cent ad valorem.

Mr. SMOOT. I ask to strike out "40" and insert "30."

Mr. ROBINSON. Mr. President, the present rate is 20 per cent, and I suggest to the Senator from Utah that he make that 25 per cent.

Mr. SMOOT. I will say to the Senator that if he will look up the importations here, he will find, I think, that they will justify the 30 per cent in this case, if 35 per cent is placed on the others.

Mr. SIMMONS. You had a difference of 10 per cent in the original amendment. Why not retain that same difference?

Mr. SMOOT. No.

Mr. SIMMONS. Yes; you had 50 and 40.

Mr. SMOOT. That is the way we had it; but really I think that the differential between the two items as first reported was hardly sufficient, and we have cut it to 35 and 30.

Mr. ROBINSON. Mr. President, under a rate of 20 per cent the importations for 1920 were less than $4,000. I respectfully suggest that that fact discloses that there is no great necessity or justification for so large an increase in this rate.

I move to modify the committee amendment by striking out "30" and inserting "25."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas to the amendment of the committee.

The amendment to the amendent was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment as modified.

The amendment as modified was agreed to.

The READING CLERK. On page 137, line 14, the committee proposes to strike out "33⅓" and insert "50," so as to read:

PAR. 1015. Handkerchiefs composed wholly or in chief value of vegetable fiber other than cotton, finished or unfinished, not hemmed, 50 per cent ad valorem—

And so forth.

Mr. SMOOT. I ask that that be made 35 per cent. That is exactly the same rate as in the existing law.

Mr. ROBINSON. That is my understanding.

The PRESIDING OFFICER. The question is on the committee amendment as modified.

The amendment as modified was agreed to.

The READING CLERK. On page 137, line 15, it is proposed to strike out "36" and insert "or unfinished, having drawn threads, 60," so as to read:

Hemmed or hemstitched, or unfinished, having drawn threads, 60 per cent ad valorem.

Mr. SMOOT. I ask to strike out "60" and insert "45."

Mr. ROBINSON. Mr. President, the present rate is 40 per cent. With respect to this paragraph, the committee amendments make very material reductions from the proposals originally submitted by the committee. The first amendment contemplated a rate of 50 per cent and the second 60 per cent. By a vote of the Senate the first amendment has already been reduced to 35 per cent, which is the present rate, and now it is proposed to impose a duty of 45 per cent, or 5 per cent in excess of the present rate, as to the remaining classification.

Mr. SMOOT. I will say to the Senator that that is the 10 per cent additional for hemstitching, and that 10 per cent has been carried through the bill.

Mr. ROBINSON. I move to strike out "45" and insert "40."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is upon the committee amendment as modified.

The amendment, as modified, was agreed to.

The READING CLERK. On page 137, line 20, it is proposed to strike out "33⅓" and to insert "35," so as to read:

PAR. 1016. Clothing, and articles of wearing apparel of every description, composed wholly or in chief value of vegetable fiber other than cotton, and whether manufactured wholly or in part, not specially provided for, 35 per cent ad valorem.

And so forth.

Mr. SMOOT. Mr. President, that is a reduction of 5 per cent from the existing law.

Mr. ROBINSON. Under the conditions that prevail, does not the Senator think that further reductions are necessary and justified? The fact that the committee, from its investigations and studies of the subject, has seen fit to reduce the rate 5 per cent——

Mr. SMOOT. I will say to the Senator that the committee did not feel like reducing it lower than the low rate proposed here. The rate on the cloth alone is this much, and we have not given any protection whatever for the making of those articles over and above the cloth itself. I recognize and the committee recognized that we can make those goods in this country as cheaply as they can be made anywhere in the world, and therefore we gave them not a penny of protection over and above what was granted to the cloth.

Mr. ROBINSON. I appreciate the action of the committee in reducing the rate. I wish that it had seen fit to reduce it still lower. As everyone knows, these are articles of general and common use; but under the circumstances I shall not oppose the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The READING CLERK. On the same page, line 22, it is proposed to strike out "28 cents per dozen and, in addition thereto, 17," and to insert "40 cents per dozen and 20," so as to read:

Shirt collars and cuffs, composed wholly or in part of flax, 40 cents per dozen and 20 per cent ad valorem.

Mr. SMOOT. Mr. President, in that amendment on line 23 I desire to strike out "20" and insert "10," so that it will read:

Forty cents per dozen and 10 per cent ad valorem.

Mr. ROBINSON. Mr. President, that is a material reduction in the rate which the committee at first reported. It cuts in two the ad valorem rate coupled with the specific rate.

Mr. SMOOT. I will say to the Senator that the equivalent ad valorem is 25 per cent, and the existing law is 30 per cent. This is 5 per cent less than the existing law.

Mr. ROBINSON. I think the rate is very reasonable.

Mr. SIMMONS. Mr. President, I just want to say that if the committee in the beginning had been as liberal in its rates and had come as near to the rates of the present law as it has in the last two or three paragraphs that we have considered, we probably would have had less discussion in the consideration of this measure.

Mr. ROBINSON. As a matter of fact, the rates reported by the committee this afternoon as to nearly all the paragraphs that have been considered have been very material and important reductions. There is no question about that, and I am glad to see that the committee has taken that course. The fundamental mistake that has been made by the committee and by the Senate in connection with this schedule is in the imposition of high rates of duty on the raw materials, hemp and jute, and on the yarns which are produced from those raw materials. I express the hope that in its rapid and very manifest reform the committee will see the error of its way and find a process by which the rates on raw materials, which I think now are generally regarded in the Senate as too high—on hemp, particularly—may be reconsidered.

I do not care to take further time of the Senate to discuss that subject. It is an important one, and I believe that careful study of it from the standpoint of those who present this bill will lead to the inevitable conclusion that the rates which the Senate has heretofore voted on the raw materials and the yarns involved in this schedule, at the instance of the Finance Committee, are unnecessary and unjustified even from the standpoint of protection, and that, therefore, they ought to be modified very materially.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

The amendment as modified was agreed to.

Mr. SMOOT. I ask that paragraphs 1017 and 1017a may go over.

Mr. ROBINSON. In that connection I ask that paragraph 1017 and 1018 may go over until next week.

Mr. SMOOT. In paragraph 1018 we have proposed to change the 25 per cent on floorcloth to 20 per cent. If the Senator wants the paragraph to go over, I am willing.

Mr. ROBINSON. Paragraph 1017a unquestionably should go over, because that will involve quite a prolonged discussion. I ask that it may go over until next week.

Mr. SMOOT. That is satisfactory.

Mr. ROBINSON. As to paragraph 1017a, I ask that it may go over until Monday or some other day next week. As to paragraph 1018——

Mr. LODGE. We might dispose of that.

The PRESIDING OFFICER. Without objection, paragraph 1017 will go over until Monday.

Mr. SMOOT. I want to say to the Senator that the rate of 35 per cent, which is proposed here, is the rate in the existing law.

Mr. SMITH. That is the paragraph which refers to linoleum?

Mr. SMOOT. Yes. On floorcloth, I am going to ask that the committee disagree to the 25 per cent and make it 20 per cent. That is on the foreign valuation instead of the American valuation. Not only that, but I want to call the Senator's attention to the fact that under the existing law the rate is 35 per cent, and linseed oil was almost free, but now it is carrying a duty of 3½ per cent. Not only that, but the rate on the burlap which goes into the linoleum has been increased on account of the increase in the rates on hemp, hemp tow, and hackled hemp. Everything that goes into the linoleum is increased, and yet we give it the same rate as that under the existing law.

Mr. ROBINSON. The rate on plain linoleum is now 30 per cent.

Mr. SMOOT. That is the plain linoleum; but, of course, we include all.

Mr. ROBINSON. The Senator from Utah states that the rate now proposed is the same as that prevailing under the existing law?

Mr. SMOOT. Yes; on all figured linoleum, except only the plain, and the Senator knows there is hardly any plain linoleum used now to speak of.

Mr. ROBINSON. I have no objection to disposing of paragraph 1018 now, unless some other Senator has.

The next amendment was, on page 138, at the beginning of line 13, before the words "per centum," where they occur the first time, to strike out the figures "28" and to insert "35," so as to read:

PAR. 1018. Linoleum, including corticine and cork carpet, 35 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 138, line 13, to strike out "20" and insert "25."

Mr. SMOOT. I ask that that be disagreed to.

Mr. ROBINSON. In that request I concur, of course.

The amendment was rejected.

Mr. SIMMONS. That is practically the same rate as provided in the present law.

The next amendment was, on page 138, line 20, after the word "for," to strike out the figures "28" and to insert "40," so as to make the paragraph read:

PAR. 1019. All woven articles, finished or unfinished, and all manufactures of vegetable fiber other than cotton, or of which such fibers or any of them is the component material of chief value, not specially provided for, 40 per cent ad valorem.

Mr. ROBINSON. That is the same rate as on the cotton?

Mr. SMOOT. It is just the same.

Mr. SIMMONS. Mr. President, I think the present rate is 35 per cent. I understand the Senator from Utah asks for 40 per cent.

Mr. SMOOT. That is correct.

Mr. SIMMONS. Because you have slightly increased some of the other rates above the rates in the present law?

Mr. SMOOT. Yes.

Mr. SIMMONS. The rate under the present law in this catch-all clause is 35 per cent. Now you are raising it to 40 per cent, because you have raised the rate on some of the yarns above the rates in the present law.

Mr. SMOOT. Yes; we could not do otherwise.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

Mr. SMITH. May I call the attention of the Senator from Arkansas to paragraph 1017a, covering bagging. There is a specific duty provided for there.

Mr. SMOOT. That has been passed over.

Mr. SMITH. I know; but if this other paragraph is voted upon, covering woven articles, it will be affected, because it is a woven article.

Mr. SMOOT. Where it is not specifically provided for.

Mr. ROBINSON. Cotton bagging is specifically provided for.

Mr. SMITH. I did not notice that language.

Mr. ROBINSON. That paragraph has been passed over until Monday.

Mr. SMOOT. This is the catch-all paragraph.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

The amendment as modified was agreed to.

Mr. SMOOT. On line 24, after the word "yard," I move to insert "carpets and carpeting, mats and matting, and rugs made wholly of cotton, flax, hemp, or jute, or mixtures thereof, 35 per cent ad valorem."

I will say to the Senator that the reason for offering this amendment is this: Most cotton rugs are made of cotton strips, and we do not want to impose a higher duty on those rugs than is paid upon the yarns and upon the cloth itself. The language "floor covering" would take in everything—cotton and hemp and everything else. That rate is too high. Therefore we offer this amendment, that it shall be only 35 per cent where carpets and carpeting, mats and matting, and rugs are made wholly of cotton, flax, hemp, or jute, or mixtures thereof.

Mr. ROBINSON. If that is agreed to, does the Senator expect to let the "not specifically provided for" articles remain with a rate of 60 per cent?

Mr. SMOOT. Then I will ask that the balance of the paragraph may go over.

Mr. ROBINSON. I have no objection to that.

Mr. SMOOT. The balance of the paragraph may go over, and also the next paragraph, covering mats of cocoa fiber or rattan.

Mr. ROBINSON. I have no objection to that paragraph going over.

Mr. SMOOT. I offer the amendment.

Mr. SIMMONS. In the present law there is a segregation. In this amendment you combine mats made of all sorts of material, including cotton. Does the Senator think that is quite scientific? For instance, the present law provides:

Carpets, carpeting, mats, and rugs made of flax, hemp, jute, or other vegetable fiber, except cotton, 30 per cent ad valorem.

* * * Chenille carpets, figured or plain, and all carpets or carpeting of like character or description, 35 per cent ad valorem.

Carpets and carpeting of * * * cotton, or composed in part of either of them—wool or cotton—not specifically provided for in this section, and on mats, matting, and rugs of cotton, 20 per cent ad valorem.

You have three rates there—20 per cent, 35 per cent, and 30 per cent. The Senator combines them all and puts them all at 35 per cent. I am asking my questions for information. Does the Senator think that is quite scientific?

Mr. SMOOT. I think so.

Mr. SIMMONS. Why does the Senator think that rugs made of cotton should be under as high a duty as mats made of hemp, jute, or flax?

Mr. SMOOT. There could be a cotton rug, and more than likely would be, made from long-staple cotton.

Mr. SIMMONS. Does the Senator think those rugs or carpets are made of long-staple cotton?

Mr. SMOOT. They have not been in the past, and I do not know whether they will be in the future.

Mr. ROBINSON. There are practically none imported now under the present rate of 20 per cent.

Mr. SMOOT. I do not think there will be any imported. In fact, I do not think there is any necessity of importing them.

Mr. SIMMONS. Why should you put as high rate on cotton mats and rugs as you do on these rugs, which have to be imported, because we do not make the jute here and do not make the hemp and the flax here?

Mr. SMOOT. If any come in, they can pay the 35 per cent. Any that come in will be some special kind.

Mr. SIMMONS. Then it is not scientific.

Mr. SMOOT. Yes; it is. We might just as well have the 35 per cent if any of these come in.

Mr. ROBINSON. If the Senator will furnish me with a copy of his amendment, which I have been unable to obtain, I think we can effectuate the thought of the Senator from North Carolina by proposing an amendment.

I propose to amend the amendment of the Senator from Utah by inserting after the word "cotton" the words "20 per cent," so as to distinguish between the rate on rugs made of cotton

and those made of other materials embraced in the paragraph—flax, hemp, jute, and mixtures thereof.

Mr. SMOOT. There is just as much reason for putting the duty on jute as for putting it on cotton. They come from Japan, and if a cotton rug of any kind is brought in from Japan, it will be because there is some kind of a figure on it, or something like that. They do not come in in any quantity. The imports do not amount to anything. Why not leave the rate on them all at 35 per cent?

Mr. ROBINSON. To that I reply, why make the rate on all 35 per cent, if there are no importations now?

Mr. SMOOT. If there are no importations, it will not make any difference. If there should be, it would only be where some person was traveling in Japan and saw a cotton rug of some kind which he thought would suit his bathroom better than the one he had, and he would bring it over here.

Mr. ROBINSON. If he would pay the rate of 20 per cent, does not the Senator think he ought to be permitted to bring them in?

Mr. SMOOT. No; I do not think it would hurt him at all to pay the higher rate.

Mr. SIMMONS. Mr. President, here is the situation: We are manufacturing some cotton rugs in this country to-day.

Mr. SMOOT. Lots of rag rugs.

Mr. SIMMONS. The people of the country are getting them at a certain price. If we put on a duty of 30 per cent instead of 20 per cent I am very much afraid that the men who are manufacturing cotton mats and carpets in the country would merely increase their prices to that extent. They would say, "Under the 20 per cent rate we have immunity against Japanese competition. That rate keeps out the Japanese mats, Increase it to 30 per cent and we can increase the price of our cotton mats 10 per cent more and still keep out the Japanese cotton mats and carpets." I am afraid that this would mean a great deal to the American people. The Senator said it would mean nothing because nothing comes in. I am afraid it would mean a great deal. I am afraid that none will come in afterwards, but those produced here will go up to the extent of 33⅓ per cent.

The PRESIDING OFFICER. Does the Senator from Utah ask that the paragraph go over?

Mr. SMOOT. After the amendment is agreed to.

Mr. ROBINSON. We are not sure that it is going to be agreed to.

Mr. SMOOT. I do not know, of course, that it will be agreed to.

Mr. ROBINSON. Mr. President, in addition to the suggestion made by the Senator from North Carolina we ought not to pursue a course that may place a heavy burden upon this class of commodities. They include the cheapest carpeting made, and it ought to be kept available for those who find it necessary to buy carpets at low prices. The only possible effect of increasing the duty will be to enable the home manufacturer to raise the price of his product. I entreat my friend from Utah to tell the Senate why he insists upon doing what he admits to be an unscientific and unnecessary thing.

Mr. SMOOT. If the rate to-day were prohibitive, there is no reason why the 35 per cent rate should be prohibitive. If such novelties come in, let them pay the rate.

Mr. ROBINSON. Mr. President, I shall ask for the yeas and nays on the amendment reducing the committee rate on cotton from 35 to 30 per cent.

Mr. SMOOT. I will ask the Senator to withdraw the request and we will let the amendment go over.

Mr. ROBINSON. Very well.

The PRESIDING OFFICER. The amendment will be passed over as requested.

Mr. McCUMBER. Mr. President, I ask unanimous consent that when the Senate closes its session on this calendar day it recess until to-morrow at 11 o'clock a. m.

The PRESIDING OFFICER. Without objection, it is so ordered.

MERGER OF STEEL COMPANIES (S. DOC. NO. 236).

The PRESIDING OFFICER (Mr. STERLING in the chair) laid before the Senate a communication from the Attorney General of the United States, transmitting in response to Senate Resolution 286, agreed to May 12, 1922, information relative to the proposed merger of certain steel companies, which was ordered to lie on the table and to be printed.

THE COAL SITUATION.

Mr. KING. Mr. President, I introduce a joint resolution relating to the present coal strike, which I ask to have printed in the RECORD and lie upon the table until to-morrow.

The joint resolution (S. J. Res. 230) authorizing the President to appoint a commission to investigate the existing controversy between the coal miners and operators, and for other purposes, was read twice by its title and ordered to be printed in the RECORD, as follows:

Resolved, etc., That the President, by and with the advice and consent of the Senate, is hereby authorized to appoint a commission consisting of five persons, who, upon their appointment and qualification, shall proceed to investigate the existing controversy between miners and mine operators in the coal-mining industry as to proper wages to be paid for the work of mining coal and any other cognate questions which are involved in said controversy.

The commission shall summon to appear before it accredited representatives of both the coal miners and the mine operators, and shall receive their statements as to the matters and points in controversy, and shall then proceed to examine the merits of the contentions made by the respective parties, and shall investigate and determine any questions of fact which are material or necessary to a determination of said controversy; and said commission shall thereupon make findings as to the material and controlling facts in controversy, and upon said findings shall make recommendations as to the wages it considers proper and equitable to be paid for the work of mining coal in the different fields or regions of coal production in the United States, and for the settlement of any other cognate question in controversy, and shall report such findings and recommendations to the President who, if he approve the same, shall issue his proclamation accordingly and make official publication of such findings and recommendations.

Said commission shall have power to administer oaths, to subpœna witnesses, and send for records, documents, and papers, to submit interrogatories to any person or corporation, and require such interrogatories to be answered in writing and under oath, to employ professional and clerical assistance, and to purchase such supplies as are necessary for the conduct of such investigation.

There is hereby appropriated out of any moneys in the Treasury not otherwise appropriated the sum of $100,000, or so much thereof as may be necessary, to defray the expenses of said commission.

The PRESIDING OFFICER. The joint resolution will lie on the table.

RATES OF DUTY ON RAW WOOL.

Mr. GOODING. I ask unanimous consent to submit a resolution and ask that it be read. I am not asking for the consideration of the resolution at this time, of course. I merely ask that it be read.

The resolution (S. Res. 322) was read, as follows:

Whereas it has been charged that the proposed rates of duty on raw wool will necessarily result in a great enhancement in the prices paid by the consumers, and that the 33-cent duty on raw wool will increase the retail price of a suit of clothes about $4 and of an overcoat about $7: Therefore be it

Resolved, That a committee composed of five Senators appointed by the President of the Senate, three from the majority and two from the minority, is hereby authorized and directed to investigate the probable effects of the proposed rates of duty upon wool and the manufactures of wool in Schedule 11 of the pending tariff bill (H. R. 7456), and to hold public hearings, as soon as possible and at such times and places as it deems advisable, in order to determine the accuracy of such charges, and report to the Senate their findings. Such committee is authorized to send for persons and papers, to administer oaths, and to employ stenographers to report such hearings, at a cost not exceeding $1.25 per printed page, the expense of such investigation to be paid from the contingent fund of the Senate.

The PRESIDING OFFICER. The resolution will be referred to the Committee to Audit and Control the Contingent Fund of the Senate.

DESECRATION OF PAINTINGS IN CAPITOL.

Mr. KING. Mr. President, some time ago I communicated with the Senator from Kansas [Mr. CURTIS] with regard to what I considered to be a desecration of some of the paintings in the Capitol. Some resolutions have been adopted by the Massachusetts State Society of Master House Painters and Decorators relating to what they denominate vandalism in the Capitol. I ask that the resolutions be printed in the RECORD, together with an article by William E. Brigham, which is descriptive of the beautiful paintings in the corridors below and which condemns the vandalism which has characterized the treatment of some of the beautiful panels in the lower corridors of the Capitol.

There being no objection, the matter, resolutions, and the article were ordered to be printed in the RECORD, as follows:

SOCIETY OF MASTER HOUSE PAINTERS AND DECORATORS OF MASSACHUSETTS,
OFFICE OF SECRETARY,
Boston, Mass.

Resolutions adopted May 23, 1922, by the Massachusetts State Society Executive Board in regular meeting assembled:

"Whereas it having come to our knowledge, through the public press, that the decorations of the Senate corridor of the National Capitol are being seriously damaged by the cutting of doors and windows through the panels, and that this action unchecked will lead to their ultimate destruction; and

"Whereas these and other decorations of the Capitol constitute the largest and finest example in the United States of the decorative art of the period in which they were executed, and are important to the art education and historical interest of the public and most especially to the student and worker in the art of mural and ornamental decoration.

"*Resolved*, That the Society of Master House Painters and Decorators of Massachusetts hereby expresses the desire that the future policy be established at the Capitol that no further damage be allowed, but that the decorations shall always be preserved with care for the public benefit and for the study of future craftsmen in decoration; be it further

"*Resolved*, That a copy of these resolutions be sent to the Congressmen and Senators of our State and to the Commissioners of the District of Columbia and to our members of other State societies, and that it be brought to the attention of the trade magazines."

[From the Boston Transcript, April 22, 1922.]

DESECRATING THE CAPITOL—SENATORS SPOILING BRUMIDI DECORATIONS—MUCH DAMAGE DONE THAT IS UNAVOIDABLE, BUT SOME ALSO THAT SHOULD BE PREVENTED—WATER LEAKS THROUGH AND IGNORANT CLEANERS SCRUB WITH SOAP AND SAND, BUT IT REMAINS FOR MEMBERS OF CONGRESS TO CUT OUT WHOLE PANELS TO MAKE DOORS FOR THEIR CONVENIENCE—A STORY OF THE ROMANTIC BRACELET OF CARLOTA TO WHICH A THEATRICAL PRESS AGENT IS WELCOME.

(By William E. Brigham, regular correspondence of the Transcript.)

WASHINGTON, April 28.—Does the Capitol of the United States, with all its beauties, belong to the people or to the Members of Congress who happen temporarily to occupy it? May it be desecrated at will by the politicians whom it houses or should they be taught to respect it as a temple of the arts? These questions are prompted by an instance of authorized vandalism which, while unfortunately not without precedent, nevertheless represents one of the most flagrant abuses of brief authority that has recently been forced upon public attention. One of the glories of the Capitol, which distinguishes it from every other public building in the country, is the decorative scheme of the corridors on the ground floor of the Senate wing. This was executed under the superintendence of Constantine Brumidi, the great Italian artist, some of whose best work is seen in the Vatican at Rome and whose paintings in the Capitol represent the first frescoes done in America. Every inch of the walls and ceilings of the Senate corridors on the ground floor is occupied with exquisite paintings, including almost every form of expression from the quiet landscape to myriad forms of animal, fruit, flower, and medallion. Brumidi was assisted by a corps of artists, each especially selected for his task. Brumidi painted all the figures, heads, and groups; another did scroll work only; still another devoted himself to animals; another to birds, and so on. Some bits in oil, notably all the birds and insects, are attributed to Leslie, an American painter. Nothing was done, however, without the approval of Brumidi, and all the designs, in drawing as well as color, were of his making. The whole presents a series of pictures which are in themselves an education and are studied by artists, for inspiration, from all over the world.

DESECRATING BRUMIDI.

These exquisite works naturally have suffered from one cause or another in the course of time. Water has leaked through and damaged them in some places, they have been scrubbed with soap and sand by ignorant cleaners, and they bear the marks of many a senatorial match. For several years Charles Ayer Whipple, the artist of New York and Boston, has been engaged in a painstaking effort to restore the beauties of the paintings and to bring out again the wondrous lines and colorings of the originals, and he is succeeding admirably, although the process is extremely slow. But this beneficent work might well be abandoned if the Senate is to show no more respect for the art treasures of Brumidi than has distinguished it in the recent past. In the particular spot most recently desecrated the first offender was a Democratic Senator from Maryland, who occupied as an office the two rooms on the north of the main corridor running to the elevator on the west side, used chiefly by Senators and the press. He desired a little more convenience, so a door was cut through from one of the rooms, completely obliterating a Brumidi panel and seriously marring the wall effect.

SENATOR CUTS THROUGH BRUMIDI PANEL.

It would seem as if such a violation of the building would have brought protests that would warn statesmen of the future against further destruction. Not so. * * * Appeal was made to the Committee on Rules, and to the amazement of all the habitués of that end of the Capitol workmen this week cut a hole through the 30-inch brick wall opening from one of the Senator's rooms into the side of the corridor which terminates at the north window. This act of vandalism, of course, destroyed another panel. The Brumidi scheme contemplates, wherever possible, that every important panel shall be balanced by its counterpart on the other side of the corridor. In the present case the surviving panel contains a fine head of Charles Carroll of Carrollton; the centerpiece of the panel which the door will replace was an exquisite fruit group, but the designs of the two panels, except for the center, were identical.

ALSO CUTS OFF LIGHT AND HEAT.

To the naked eye it would appear useless to cut a door into a corridor from a room which already had an exit around the corner. The door, however, serves only half the purpose of the Senator, which is to provide himself with an additional office, and this he intends to do by running a partition some 10 feet high across the end of the corridor, thus almost completely shutting out the light from the north window. The only serious criticism ever directed against the Brumidi scheme of decoration upon this floor has been that the light has been insufficient to display to advantage the beautiful creations of the artists.

The southern of the two corridors receives no light at all from outside, nor does the more northerly one, also running east and west, receive any, except indirect light. The little corridor which the Senator is converting into a private office is the best lighted of all. Moreover, this little end corridor presents a unified scheme of decoration of the ceiling, which the partition will rudely interrupt. Twelve months of the year, six on each side, are depicted with the 12 signs of the zodiac; a little above these on either side is a charming landscape, while the scheme is carried to the apex with a design in colors which are peculiarly rich. This ceiling, unfortunately, because of leakage from above, is badly in need of retouching, but in time it would have been done over by the artist now employed on the work and would present a scheme of beauty not duplicated elsewhere. Incidentally, the Senator's partition comes south of the register, and will cut off the heat from that section of the corridors.

PAINTINGS SHOULD BE PROTECTED.

The two acts of vandalism here alluded to represent only a fraction of the desecration to which the Capitol has been subjected. In the same corridors and elsewhere doors have been cut through, without the slightest regard to the art works that might suffer or the architectural scheme of the walls. It has been found difficult, if not impossible, to protect the Brumidi paintings against the natural ravages of time and wear, but it should not be impossible to protect them against the careless indifference to their beauty of United States Senators.

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 6 o'clock and 10 minutes p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Saturday, July 22, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate July 21 (legislative day of April 20), 1922.

COLLECTOR OF CUSTOMS.

Samuel H. Thompson, of Wilkinsburg, Pa., to be collector of customs for customs collection district No. 12, with headquarters at Pittsburgh, Pa., in place of George H. Rowley, whose term of office expired May 26, 1922.

RECEIVER OF PUBLIC MONEYS.

Charles Henry Lutz, of New Mexico, to be receiver of public moneys at Roswell, N. Mex., vice William G. Cowan, resigned.

PROMOTION IN THE REGULAR ARMY.

CHAPLAIN.

Chaplain Robb White, jr., to be chaplain with the rank of captain from July 15, 1922.

PROMOTIONS IN THE NAVY.

Lieut. Commander Matthias E. Manly to be a commander in the Navy from the 31st day of December, 1921.

Lieut. Harry H. Forgus to be a lieutenant commander in the Navy from the 1st day of January, 1921.

Lieut. Jay K. Esler to be a lieutenant commander in the Navy from the 1st day of February, 1922.

Lieut. Glenn B. Strickland to be a lieutenant commander in the Navy from the 28th day of March, 1922.

Lieut. Donald C. Godwin to be a lieutenant commander in the Navy from the 3d day of June, 1922.

The following-named lieutenants (junior grade) to be lieutenants in the Navy from the 1st day of July, 1920:

Julius C. Delpino.
Edward Sparrow.
John N. Walton.

Ensign Edward Sparrow to be a lieutenant (junior grade) in the Navy from the 30th day of March, 1920.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 1st day of July, 1920:

Matthias B. Gardner.
Richard B. Tuggle.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 7th day of June, 1922:

Van Fitch Rathbun.
Charles B. McVay, 3d.
Herbert C. Rust.
Richard H. Cruzen.
Rene F. A. Bucholz.

Passed Asst. Surg. John Buckley to be a surgeon in the Navy with the rank of lieutenant commander from the 3d day of June, 1921.

The following-named assistant dental surgeons to be passed assistant dental surgeons in the Navy with the rank of lieutenant from the 1st day of July, 1920:

Eric G. Hoylman.
Joseph A. Kelly.

The following-named passed assistant paymasters to be paymasters in the Navy with the rank of lieutenant commander from the 21st day of October, 1921:

Ernest H. Barber.
Herman G. Bowerfind.
Richard S. Robertson.
Oscar W. Leidel.
John J. Gaffney.

Boatswain Edwin W. Hill to be a chief boatswain in the Navy, to rank with but after ensign, from the 19th day of February, 1918.

Boatswain William A. James to be a chief boatswain in the Navy, to rank with but after ensign, from the 11th day of January, 1919.

The following-named boatswains to be chief boatswains in the Navy, to rank with but after ensign from the 16th day of January, 1920:

John A. Pierce.
William R. McFarlane.
James Roberts.

Boatswain Eugene J. Frieh to be a chief boatswain in the Navy, to rank with but after ensign from the 6th day of February, 1921.

The following-named boatswains to be chief boatswains in the Navy, to rank with but after ensign from the 16th day of December, 1921:

Junius G. Sanders.
Charles A. Dannenmann.
Andrew N. Anderson.

The following-named boatswains to be chief boatswains in the Navy, to rank with but after ensign from the 27th day of March, 1922:

Thomas M. Buck.
William Martin.

Gunner Charles A. Kohls to be a chief gunner in the Navy, to rank with but after ensign from the 3d day of December, 1921.

The following-named gunners to be chief gunners in the Navy, to rank with but after ensign from the 16th day of December, 1921:

Daniel McCallum.
Robert Semple.

Gunner Jesse J. Alexander to be a chief gunner in the Navy, to rank with but after ensign from the 7th day of March, 1922.

Machinist Cyrus S. Hansel to be a chief machinist in the Navy, to rank with but after ensign from the 17th day of January, 1918.

Machinist Ernest J. Leonard to be a chief machinist in the Navy, to rank with but after ensign from the 28th day of December, 1920.

The following-named machinists to be chief machinists in the Navy, to rank with but after ensign from the 30th day of November, 1921:

Alfred E. Raue.
Albert H. Mellien.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 21 (legislative day of April 20), 1922.

COLLECTOR OF CUSTOMS.

John A. Royse to be collector of customs, district No. 40, Indianapolis, Ind.

REGISTERS OF THE LAND OFFICE.

Robert E. Patterson to be register of land office, Duluth, Minn.
Claude C. Turner to be register of land office, Dickinson, N. Dak.

POSTMASTERS.

CONNECTICUT.

Carleton W. Tyler, Southbury.

NEW JERSEY.

John A. Campbell, Highwood.

NEW YORK.

John C. Banschbach, Hicksville.

NORTH CAROLINA.

Robert L. Strowd, Chapel Hill.
Oscar R. Simpson, Duke.
Clarence C. Rowe, Spray.

PENNSYLVANIA.

Benard Peters, Brackenridge.
William E. Reed, Duquesne.
Edward R. Dissinger, Mount Gretna.
Frederick C. Patten, Narberth.
William S. Tomlinson, Newtown.

TEXAS.

Wallace C. Wilson, McKinney.
Sallie P. Lunday, Naples.
Robert E. Johnson, Pecos.
Lotta E. Turney, Smithville.
Mary Lovely, Weslaco.

SENATE.

SATURDAY, *July 22, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, I think before we open up the discussion of the woolen schedule we had better have a quorum. I therefore suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Harreld	McLean	Smoot
Borah	Heflin	McNary	Spencer
Brandegee	Jones, N. Mex.	Moses	Stanfield
Broussard	Jones, Wash.	Nelson	Trammell
Cameron	Kellogg	New	Underwood
Capper	Kendrick	Nicholson	Wadsworth
Cummins	Keyes	Norbeck	Walsh, Mass.
Curtis	Ladd	Overman	Walsh, Mont.
Dial	Lenroot	Phipps	Warren
Fernald	Lodge	Rawson	Watson, Ind.
Frelinghuysen	McCumber	Sheppard	Willis
Gooding	McKinley	Smith	

The VICE PRESIDENT. Forty-seven Senators have answered to their names. A quorum is not present.

Mr. McCUMBER. I move that the Sergeant at Arms be directed to procure the attendance of absent Senators.

The motion was agreed to.

The VICE PRESIDENT. The Sergeant at Arms will execute the order of the Senate.

Mr. POMERENE, Mr. STERLING, and Mr. SWANSON entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty Senators have answered to their names. A quorum is present.

Mr. McCUMBER. I ask unanimous consent that when the Senate closes its session on this calendar day it take a recess until Monday next at 11 o'clock a. m.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCUMBER. I now ask that the Senate proceed to the consideration of the wool schedule, and I desire the attention of Senators for just a few minutes.

Mr. SMITH. I had intended to ask that I might be permitted to read a short editorial which appears in one of the newspapers of South Carolina pertaining to the cotton industry, which is so closely allied to the wool industry, but if I can obtain the floor after the Senator from North Dakota shall have concluded his introductory remarks on the wool schedule I shall then read the editorial in question.

Mr. McCUMBER. Mr. President, in the act of 1909 we imposed a duty of 11 cents per pound on imported wool in the grease. The purpose of that law was to give to the producer of wool in the United States a protection of 11 cents per pound. It was assumed in giving that protection that there would be a loss of about 66⅔ per cent between the wool in the grease and the scoured content, including other losses. Therefore we gave to the manufacturer of woolen products a differential equivalent to 33 cents per pound upon the scoured content, or three times the amount accorded to the producer of wool in the grease.

The actual working out of that law was this: The importers did not import wool that lost 66⅔ per cent in scouring, but, on the contrary, as they imported the article the wool off the belly, the legs, the neck, and so forth, of the sheep had been skirted away, so that the allowance for scouring loss was entirely disproportionate. So, while we gave the manufacturer a compensatory duty equivalent to 33 cents per pound of the scoured wool, he actually in the importing had to pay only about 18 cents, and had the advantage of the difference between 18 cents and 33 cents. The farmer and the producer of wool, instead of getting an advantage or a protection of 11 cents, according to the Tariff Commission report, secured an advantage, I think, of 7.6 cents per pound.

In remodeling the tariff law, in the pending bill we have taken extra precaution to guarantee that the producer of wool shall have the equivalent of 33 cents upon the scoured content. Therefore we have provided for a duty equivalent to 33 cents upon the scoured content as it enters the ports. However, instead of using the exact term of 33 cents it was thought best by a majority of the committee to make a large number of brackets, which would allow for a difference of opinion between the importer and the appraiser. Therefore we divided the schedule into brackets which would practically be in each instance the equivalent of 33 cents. As one of the committee, I am impressed, however, that it would have been better to have simply declared for a 33 cents per pound duty upon the scoured content; but the majority of the committee decided otherwise. I think there is very little difference in the matter, at any rate, and it is only a question of administration.

Mr. President, we have allowed in the compensatory duty to the manufacturer the full equivalent of 33 cents per pound upon the scoured content, and have also made allowance for losses, so that the manufacturer will secure the same differential protection that he secured in the law of 1909; but he will not be allowed to take advantage of a difference which he obtained in importing goods with a very low loss. Therefore the farmer will secure the benefit of the full rate.

Mr. President, there is one exception to this rule, and that is in the skirted wools that are used for carpet purposes. Under the old law we ascertained that, while the carpet wools

were upon the free list, some of those carpet wools were actually used in the manufacture of clothing. Therefore in order to guard against the use in clothing of the wool on which no duty is paid we provide that the carpet wool, which is a low grade of wool scarcely fit for the manufacture of clothing, may be imported in bond, and upon a showing that none of it has gone into the manufacture of clothing the duty may be rebated or refunded.

Notwithstanding the fact, Mr. President, that the spread of the wages between the foreign producer and the American producer has very materially widened compared with the spread in 1909 and 1910, we have given a duty for protection as distinguished from a duty for compensation which will average on the ad valorem basis considerably less than the law of 1909.

Mr. President, the details of this schedule will be discussed as we consider each item. I simply desire to make this general statement in order that the Senate may have an understanding of about what the committee has purposed to do in formulating the wool schedule.

Mr. JONES of New Mexico obtained the floor.

Mr. LENROOT. Mr. President, will the Senator from New Mexico yield to me? I should like to ask the Senator from North Dakota a question.

Mr. JONES of New Mexico. I was just going to ask the Senator from North Dakota a question.

The PRESIDING OFFICER (Mr. SPENCER in the chair). Does the Senator from North Dakota yield the floor?

Mr. McCUMBER. I have yielded the floor, but I will respond to a question if I can answer it.

Mr. JONES of New Mexico. I merely wish to ask a question. I observe, Mr. President, the difference between the so-called compensatory rates under this bill and the compensatory rates under the act of 1909. Under the act of 1909 on the finer grades of cloth there was allowed for wastage—presumptively that was the purpose of the allowance at that time—11 cents a pound; in other words, the compensatory duty on the finer grades of cloth was 44 cents a pound. That was intended to cover the 33 cents a pound on the clean content and allow another 11 cents a pound for the loss in wastage in the manufacture. I observe that under the proposal which now comes to us the allowance for wastage is increased to 16 cents per pound on the higher grades and on the lower grades in like proportion. I wonder whether the Senator from North Dakota or the Senator from Utah desires to make an explanation of that at this time.

Mr. SMOOT. I am perfectly willing to explain it at this time or at any other time. If the Senator desires, I will make the explanation now.

Mr. McCUMBER. I think the Senator from Utah has more of an expert knowledge and can better explain the intricate details of the schedule than can I, and I will ask him to reply to the Senator.

Mr. SMOOT. Mr. President, it is true that in the Payne-Aldrich law the rate upon wool in the grease was 11 cents; upon washed wool 22 cents; upon scoured wool 33 cents, and the compensatory duty on the cloth was 44 cents. In other words, upon the cloth the duty was four times the amount imposed upon the wool in the grease. The manufacturer did not pay a duty of 11 cents on wool in the grease——

Mr. JONES of New Mexico. Mr. President——

Mr. SMOOT. If the Senator will allow me, I should like to complete the explanation and then I will be glad to answer any question, because I think it is better to take the question up and carry it through consecutively, from wool in the grease to the cloth.

The real duty, Mr. President, upon wool in the grease that the manufacturer was compelled to pay because of the lighter shrinkage of wools that were imported from Australia and other foreign countries on account of the skirting and other processes referred to by the Senator from North Dakota—and I shall not go into them—and the protection the woolgrower received instead of being 11 cents a pound was on the average about 6 cents, and in some cases only 5 cents a pound, and on fine clothing 7.8 cents a pound instead of 11 cents. Therefore the manufacturer could well afford to have a compensatory duty of only 44 cents a pound because of the fact that four times 7.8 cents is only 31 cents, and he received 44 cents. No matter what the shrinkage may be, the duty on scoured wool is 33 cents a pound in the pending bill.

Mr. President, this bill makes provision to cover the actual loss in the scoured wool in each process beginning with the tops and ending with the cloth, and so that you need not take my word as a manufacturer of woolens I will read what the Tariff Commission says.

The Tariff Commission, on page 3528——

Mr. JONES of New Mexico. Mr. President, I think the question I asked can be answered without going into that. I realize that what the Senator from Utah says is absolutely correct, but nevertheless it is a fact that the Payne-Aldrich law, the act of 1909, was framed upon the scientific theory that the amount of the duty on the cleaned content was 33 cents a pound, and the manufacturers at that time thought that an addition of one-third was quite sufficient to make up the wastage in manufacture.

Mr. SMOOT. Why, certainly they did, because 3 times 7 is 21, and instead of 33 they had 21, or a difference there of 12 cents, and the 12 cents added to the 11 cents made 23 cents.

Mr. JONES of New Mexico. Does not the Senator know that the producers of this country were told at that time that the tariff upon raw wool amounted to 33 cents a pound on the cleaned content, and that the compensatory duty allowed to the manufacturer was only 11 cents a pound upon the finest class of woolen goods to compensate for the loss in manufacture, or 44 cents a pound; and was it not stated to the country at that time that this was a protection to the woolgrowers of the country of 11 cents a pound on the wool in the grease, and was it not figured out on the basis of 33 cents a pound on the cleaned content?

Mr. SMOOT. I have said it so many times in all parts of the country that I do not think it is necessary for me to repeat it now; and I want to say to the Senator now that the 11 cents a pound differential between the scoured content of wool and the manufacture of fine clothing is not sufficient. Take 100 pounds of fine cloth made from scoured wool and it will require 150 pounds of cleaned wool to make it.

Mr. JONES of New Mexico. In the preparation of the Payne-Aldrich bill, was it not conceded by the manufacturer and was not that bill framed upon the theory that 11 cents a pound, or 33 per cent additional, was sufficient to measure the wastage in the manufacture?

Mr. SMOOT. Yes; taking it as a whole and step by step from the grease wool, that was what was claimed.

Mr. JONES of New Mexico. It is proposed now, where we have an actual duty of 33 cents a pound upon the scoured content, to increase that differential to 16 cents a pound?

Mr. SMOOT. That is true in some cases, and it is absolutely necessary.

Mr. JONES of New Mexico. The Senator now says that it is absolutely necessary. It is upon that point that I want to hear from the Senator at length, because at the time the Payne-Aldrich bill was framed it was considered that a differential for wastage of one-third was ample; and the distinguished Senator from Idaho [Mr. GOODING], in a speech during this session of Congress, I believe, contended most earnestly that 11 cents a pound was too much. Now the Finance Committee brings in here a bill increasing that differential from 11 cents to 16 cents, when the Payne-Aldrich bill was prepared upon the theory and accepted by the manufacturers of this country upon the theory that that increase of one-third was sufficient. The distinguished Senator from Idaho, who at one time was president of the Woolgrowers' Association of this country, made a year's study of this question, and came on the floor of the Senate and deliberately told us that that theoretical difference of 33 cents upon the scoured content under the Payne-Aldrich bill was too much, and the Finance Committee now increases that by a very material percentage—from 11 cents a pound to 16 cents a pound.

Mr. SMOOT. The Senator did not let me finish my statement, or I would have called attention to the fact that the 49 cents is only on goods where the thread is all of fine wool, entering into fine kinds of cloth.

The Senator will find rates where a compensatory duty of that amount is not given. It all depends upon the value of the goods and the size of the thread whether or not the compensatory duty of 16 cents is given; and I want to say to the Senator now that is exactly what the Tariff Commission says is necessary, and it is necessary. I know it as a manufacturer.

Mr. JONES of New Mexico. Mr. President, the other rates upon different kinds of cloth, however, provide for a compensatory duty relative to this increase, do they not?

Mr. SMOOT. Relative as to the size of the thread or the cost of the yarn, certainly; but in some cases there is only a duty of 40 cents, and that is 7 cents difference, while in the Payne-Aldrich bill they all had a duty of 44 cents or a difference of 11 cents. It did not make any difference whether the fabric was half cotton, it did not make any difference whether they were virtually all cotton with but one thread of wool. If there was one thread of wool in it, the duty was 44 cents. This bill does not have any such provision. This bill provides that the duty shall apply wherever the yarn is in chief value of wool. That is one thing that made the Payne-Aldrich bill so open to

criticism and caused the criticism in the United States against it. In other words, a dozen blankets were brought into the United States under the Payne-Aldrich rates. Those blankets were all cotton with the exception of the wool border; and because those cotton blankets had a wool border they carried the full rate of 44 cents a pound, bringing the duty on the blankets up to 485 per cent.

Mr. POMERENE. Mr. President, will the Senator advise us what was the phraseology of the bill at that time, if he has it before him, which would authorize that?

Mr. SMOOT. "Any part of which was wool"; not "of chief value." All they had to do was to put one thread of wool in it, and there was wool in it, and it carried that rate. There is no such provision in this bill. It is cut out; and now I want to say to the Senator that this is what our Tariff Commission said:

> Applying this, the correct arithmetical method of finding the proper ratios for the compensatory duties, the rates should be: For tops, 1.111 times the duty on scoured wool; for yarns, 1.207 times the duty on scoured wool; for fabrics, 1.500 times the duty on scoured wool.

Mr. GOODING. Mr. President——

Mr. POMERENE. Mr. President——

Mr. SMOOT. Just a moment, and then I will yield. Taking 33 cents in the case of all-wool fabrics, one-half of 33 cents is 16½ cents; 33 and 16½ is 49½ cents, and the committee in all cases have made it 49 cents. I will say now that there is no woolen manufacturer in all the world who can take less than 150 pounds of wool and start it through the picker and bring it out into fine cloth without that loss, and if it is a fine wool thread made into the goods——

Mr. POMERENE. Mr. President, the Senator was reading from page 3528?

Mr. SMOOT. Page 3528.

Mr. POMERENE. I understood the Senator to say that that was the finding of the Tariff Commission. It seems to be the testimony of Mr. John P. Wood.

Mr. SMOOT. Mr. President, it is the testimony of John P. Wood, but he is only quoting the Tariff Commission's figures.

Mr. POMERENE. I wanted to be advised. The Senator wants to be right about it.

Mr. SMOOT. Yes; I do, certainly; but John P. Wood quotes the Tariff Commission's figures.

Mr. POMERENE. This statement is made under the heading:

> Statement of John P. Wood, Boston, Mass., representing the National Association of Wool Manufacturers.

Mr. SMOOT. Certainly.

Mr. POMERENE. What I have read is from page 3525.

Mr. SMOOT. That is right; and I will show the Senator the report just as soon as the experts find it. The Senator can figure the rates out himself, or it will take me a few moments to do it.

Mr. POMERENE. I do not ask the Senator to disturb the thread of his thought.

Mr. SMOOT. The report of the Tariff Commission on Schedule K, page 626, figures them out on the rate of 25 cents on the scoured content that was provided for in the House bill, and the Senator will find that the percentages are approximately the same.

Mr. JONES of New Mexico. Mr. President, the Senator has criticized in very severe terms the provisions of the Payne-Aldrich bill. I will ask him if he did not vote for that bill?

Mr. SMOOT. I did; and I will say to the Senator that I named the cause that brought forth the criticism; but if the Senator will investigate he will find out that there were never any blankets brought into the country except the 12 pairs that were brought here as samples. I said upon the floor of the Senate that such a thing never happened with regular commercial goods, and it never has happened; but it gave everybody in this country a chance to point to one importation of 12 blankets, with the rate of 485 per cent, and nobody could deny it. It was true.

Mr. JONES of New Mexico. The Senator understood what the effect of that bill was at the time he voted for it, did he not?

Mr. SMOOT. Why, certainly; and I called the Senate's attention to the very fact of the 12 blankets that I speak of when the story went from one end of this country to the other and rang in this Chamber from the other side that the poor man's blankets carried a duty of 485 per cent. I had the blanket in this very Chamber. I showed the blanket to the Senate, and there was not a thread of wool in it, with the exception of what was in the selvage.

Mr. JONES of New Mexico. The manufacturers of the country generally favored that bill, did they not, and really helped to frame it?

Mr. SMOOT. Certainly they favored it. Why should they not favor it when they not only got the protective duty that was given there but they got more than the necessary compensatory duty on the wool?

Mr. JONES of New Mexico. The Senator was quite willing, as one of those manufacturers and as a member of the Senate, to put such a provision into the bill that would permit that sort of thing to be done.

Mr. SMOOT. That provision went into the bill with the understanding that the clothing wools of the country shrink 66⅔ per cent. I ask the Senator, who knows, as he comes from a woolgrowing State, what percentage the clothing wools of New Mexico shrink?

Mr. JONES of New Mexico. They vary, of course.

Mr. SMOOT. What is the average shrinkage in the fine clothing wools raised in New Mexico?

Mr. JONES of New Mexico. They will shrink somewhere from 60 to 65 per cent.

Mr. SMOOT. They will shrink on an average more than that.

Mr. BURSUM rose.

Mr. JONES of New Mexico. I dare say my colleague can give that information.

Mr. SMOOT. The fine clothing wools will shrink 70 per cent and the average will be 2 or 3 per cent less.

Mr. JONES of New Mexico. I think there are some wools in New Mexico which shrink 70 per cent.

Mr. SMOOT. There are some wools in New Mexico that will shrink 78 per cent. I have bought wools many and many a time, carloads of them, which would shrink 80 per cent.

Mr. BURSUM. I think I can enlighten the Senator about the shrinkage of wools in New Mexico. It depends on the location; but wools shrink from 58 to 74 per cent.

Mr. SMOOT. There is no doubt of it.

Mr. BURSUM. If the sheep have been ranged on sandy soil, the wools will have a heavy shrinkage, but in the case of fine wools, the general average is around 67 per cent.

Mr. SMOOT. Absolutely; and that is the case in Utah.

Mr. POMERENE. Will the Senator from New Mexico give the maximum and minimum of shrinkage in wool?

Mr. BURSUM. The minimum shrinkage is around 58 per cent, but as a rule that shrinkage does not apply to a very fine wool. Fine wools hardly ever shrink less than 64 per cent, and they will go as high as 72 per cent; but 67 per cent is a fair average for fine wools.

Mr. SMOOT. The wools in Montana do not shrink as much as the wools in Utah of the same identical grade, because of the fact that the sheep have a rather superior grazing ground.

Mr. JONES of New Mexico. I understand that.

Mr. SMOOT. But the fact of the matter is that in 1909 the average shrinkage of the clothing wools in the United States was 66⅔ per cent, and a shrinkage of 66⅔ per cent in wool at 11 cents a pound means 33 cents on the scoured content.

Mr. BURSUM. I want to suggest, though, that it is unfair and unscientific to fix a duty based upon wools in the grease and on an average shrinkage. The dirt and the grease which acompany the wool should not be taken into consideration. It is the clean content that should be considered, the amount of the wool. It is ridiculous to talk about fixing a duty based upon a mixture of wool and dirt and grease, and to average the duty on that basis. It should be on the clean wool.

Mr. SMOOT. This is what the Tariff Commission says about the shrinkage of wool in New Mexico:

> In normal seasons their clip runs largely to French combing or longer. It also is more uniform in grade and character than in most other areas in the State. In the western part of this section the shrinkage usually ranges from 62 to 66 per cent; eastword it generally runs from 66 to 72 per cent; while in most other areas the same per cent (sometimes a higher) shrinkage is the rule. The State average has been about 67 per cent during the past six years.

Mr. JONES of New Mexico. I understand that. So the Payne-Aldrich bill was framed upon the theory that the wool would shrink 66⅔ per cent?

Mr. SMOOT. Yes; and if we used all American wools, then 33 cents would have been the proper rate, and the manufacturer would not have secured anything whatever in the scouring. But what did they do? They imported Australian wools, skirted, with all the tags, and all the necks, and all of the belly wool taken off, simply the body of the wool, and then in the handling of it as much of the dirt was shaken out of it as possible, and they got those wools in shrinking 40 per cent instead of 66⅔ per cent.

Mr. BURSUM. Sometimes as low as 30 per cent.

Mr. SMOOT. I am speaking of the average.

Mr. JONES of New Mexico. The skirting of wool for importation was permitted by the Payne-Aldrich law, was it not?

Mr. SMOOT. It is not permitted by this bill.

Mr. JONES of New Mexico. I understand that the duty in this bill is on the clean content, and the question of skirting has nothing to do with it; but under the emergency tariff law, which we passed, we did eliminate the right to skirt those wools before bringing them in here.

Mr. SMOOT. Yes; that is correct.

Mr. JONES of New Mexico. The point I want to emphasize is that in that law there was a provision for this skirting, which did bring down the shrinkage of the foreign wools; that that was one of the jokers in the bill; and that it was indorsed at that time by the manufacturers of this country.

They contended for a compensatory duty of 33⅓ per cent, 11 cents upon the manufactured article, when they knew that the shrinkage of the wool would not bring the duty up to 33 cents a pound on the scoured content. They knew that. They fixed those prices. They gave it out to the country that that was all the compensatory duty they were getting, but it now appears that they knew that they were deceiving the people of the country, and they are the persons who come here now and undertake to tell the Senate what compensatory rates they need.

I submit that we should have other and further proof. They gave it out to the country then that that was all they required; that there was a duty of 33 cents a pound upon the scoured content, and that all they needed was 11 cents a pound additional to provide for the wastage, and now, upon no other proof than of those men who deliberately deceived the people of the country and the woolgrowers of the country, we are asked to increase the compensatory duty much beyond the rate which they asked for when the Payne-Aldrich bill was being framed. They also deceived the Members of Congress. I can not conceive that the Senator from Utah at the time he voted for that bill comprehended the enormities which it contained and the deception which it contained.

Mr. SMOOT. Mr. President, the Senator says that we have no more information than that furnished by these manufacturers as to whether there is any other amount than 11 cents compensatory over and above 33 cents per pound on the scoured content. The Tariff Commission spent $250,000 checking up every item, from one end of the country to the other, and all over the world. They have gone into all the factories of America, and not only America, but in foreign lands, and they say that it requires 1½ pounds of scoured fine wool to make a pound of wool cloth. The committee paid no attention to what the manufacturers said. We took the findings of the Tariff Commission, and it cost us $250,000 to get that information.

Mr. JONES of New Mexico. What allowance is made for the waste? That waste, I suppose, did not go up into thin air. What became of that?

Mr. SMOOT. Of course, the Senator knows very well that in the clipping of wools there are little short clippings off the sheep, called the second clippings, and most of that goes into the wool when sacked. Just as soon as it reaches the wool washer half of it goes out, and when it reaches the cards the other half flies all over the card room. It is good for nothing. But I say that where the ends break in weaving, or where we tie up a thread, there is a little piece of thread lost.

Not only there, but at every step in the manufacture, from the time the wool is first handled to the finished cloth, there are losses. In the scouring of it there are losses; in the picker there are losses; in the carding there are losses; in the spinning of it there are losses; in the beaming of it there are losses; in the weaving of it there are losses; in the finishing of it there are losses. Not only that, but there are losses on account of every imperfection in the wool. The Tariff Commission says those losses amount to one-half a pound upon every pound and a half of wool that is used.

I say now, Mr. President, if I were going to lay out the wool to make the suit of clothes I am wearing, and I wanted a hundred pounds of this finished cloth, I could not start with less than 150 pounds of wool at the picker. If I got less than 100 pounds after starting with 150 pounds at the picker, I would want to know where the extra waste was.

Mr. POMERENE. Has not the Senator made a mistake in his mathematics? He said one-half a pound for every pound. Does he not mean one-third a pound loss in every pound?

Mr. SMOOT. I was speaking the other way, from the 1 pound. It is one-half on and one-third off.

Mr. POMERENE. I thought the Senator's language was susceptible of misconstruction.

Mr. SMOOT. I thank the Senator. One-half on is one-third off. I want the Senate to understand that under the bill as it was reported to the Senate no one is going to get any advantage. The woolman gets the protection given him, and no one can take it away from him. The manufacturer does not get one penny of protection beyond what the bill gives, and he can not take it out of the wool grower, as has been done in the past.

The whole question is, How much protection shall we give the woolgrower? The committee decided that it should be 33 cents a pound on the clean content of the wool, and I want to say that if that is agreed to by the Senate I can defend every rate named in this bill by way of protection, and every compensatory rate that is provided for in every paragraph of this schedule. It is not guesswork, but actual facts, actual results, and what every millman will have to meet.

Mr. WADSWORTH. Will the Senator submit to one or two questions which I would like to ask for information?

Mr. SMOOT. Certainly.

Mr. WADSWORTH. Will the Senator state, for example, in what grades of wool, roughly speaking, most of the American product falls?

Mr. SMOOT. Most of the American wool used in clothing shrinks 60 per cent or above.

Mr. WADSWORTH. I am not asking that the grade be described by percentage, but that the grade be described in terms of the wool buyer.

Mr. SMOOT. In terms of the wool buyer, it would be "medium" and "fine medium."

Mr. WADSWORTH. What grade is considered the top grade?

Mr. SMOOT. The fine wool.

Mr. GOODING. And we have fine medium.

Mr SMOOT. That is a little coarser than the fine wool. Fine wool comes from the French merino, the full blood. Then from that there is the fine medium and the medium; then there is the coarse in the different grades of wool. The finer the grade of wool the greater the shrinkage, because all fine wools carry more grease than coarse wools, and the more grease in the wool the more dirt it gathers in the grazing.

Mr. BURSUM. The grazing has everything to do with the character of the grease.

Mr. SMOOT. Not the character by the quantity.

Mr. BURSUM. If they graze on sandy soil, the wool will shrink more than where they graze on soil where there is no sand.

Mr. WADSWORTH. Will the Senator be good enough to identify, for my own information, the descriptive terms "half blood," "three-eighths," and "quarter blood"?

Mr. SMOOT. Half blood is a cross between very coarse and fine sheep.

Mr. WADSWORTH. I know that as a breeder myself, but to what grade of wool recited by the Senator does that conform?

Mr. SMOOT. Coarse wool can only be used in the making of certain thread—not the finest of threads, of course. The finer the wool the finer we can spin the thread. I would say our wools in America are made into threads running perhaps from 20s up to 70s.

Mr. WADSWORTH. What I was asking the Senator is this: I happen to know what a half blood is and a three-quarter blood and a quarter blood; but expressed in the terms of the wool buyer, what sort of wool and what grade of wool does the half blood sheep produce? The Senator has used the expression "mediums," for example.

Mr. SMOOT. A good medium would be a half blood. From the half blood we could make threads between 50s and 60s. I do not think we would want to use any finer wool than that to make a coarser thread than 50s, when we can make as coarse thread as we want to from the medium wools. It would not pay to do it. But the half-blood wool is generally bought when a manufacturer wants to make a thread between 50s and 60s.

Mr. WADSWORTH. What is the half-blood wool?

Mr. SMOOT. A medium would be half blood. The half blood and the medium are about the same.

Mr. WADSWORTH. Then the three-eighths blood is still lower?

Mr. SMOOT. A little coarser, where you would have, for instance, a fine buck with a half-breed ewe.

Mr. WADSWORTH. The quarter blood is coarser still?

Mr. SMOOT. Yes.

Mr. WADSWORTH. The information I have is based upon terms used in the breeding of sheep and not in terms of grading the wool. I wanted to get the two lined up in my own mind.

Mr. LENROOT. Mr. President, may I ask the Senator from Utah a question?

Mr. SMOOT. Certainly.

Mr. LENROOT. Is our production, then, generally three-eighths and better?

Mr. SMOOT. Yes; three-eighths and better.

Mr. GOODING. I think I can give the Senator the correct amount of the different grades which this country produces. These figures are from the Department of Agriculture. It gives the production of fine wool in this country, which, of course, is the merino. The foundation is taken from two breeds of sheep—the merino and the English blood, and as the English blood is infused, then come the terms half blood, three-eighths blood, quarter blood, and so on down to low quarter. In fine wool we are producing 29.3 per cent of our production, half blood 21.8 per cent, three-eighths blood 21.5 per cent, and in quarter blood 18.9 per cent.

Mr. SMOOT. That is, quarter blood and lower.

Mr. GOODING. Then comes low, 1.7 per cent, and we get down to what they call braid wool, the lowest of all, which is .68 per cent. That is the percentage of wool produced in this country.

Mr. SMOOT. To further answer the Senator from New York, so that when we reach the yarns in the cloth schedule he will know, if he desires to refer to what wools are used in this paragraph, I want to put in the RECORD now just what they mean to the manufacturer. In other words, if a manufacturer were making, we will say, 44s and below, he would then look out for quarter-blood wool. From the three-eighths he makes 50s to 56s. From the half blood he makes from 58s up to 60s. If that is what he wants, if he wants to make 58s to 60s, he wants half-blood wool, and he does not want to buy any other wool because that is the best grade of wool to make those sizes of yarns. Then comes the fine wool. If he has a yarn to make over 64s and finer than that, he knows that he has to get fine wool in order to make it.

Mr. OVERMAN. Mr. President, am I to understand that the quality of wool is governed by the blood of the animal?

Mr. SMOOT. Oh, yes, indeed.

Mr. OVERMAN. The different grades are according to the blood?

Mr. SMOOT. Yes, certainly. In other words the merino is the finest wool sheep known in the world. Then when you come to the Cotswold wool, that is among the coarsest. All the other wools are between the low wool and the fine wool, and that comes by crossing the different breeds.

Mr. WADSWORTH. Mr. President, will the Senator permit a further question concerning the shrinkage percentages in the different grades of wool?

Mr. SMOOT. Oh, they are very great. The coarser the wool the lower the shrinkage, because of the fact that in the coarse wool there is not the amount of grease. The wool has not so much grease in it and will not hold the dirt. The fleece of coarse wool can be shaken and most of the dirt will come out of it, but you can not do that with the fine wool. It is matted close together with the grease.

Mr. BURSUM. Most of the grade sheep, whether it be coarse wool or fine wool, will yield relatively nearly the same number of pounds of scoured wool. For instance, some sheep will shear 6 pounds.

Mr. SMOOT. And some 4 pounds.

Mr. BURSUM. Or it may be 3 pounds of scoured wool. Others may yield 8 pounds and others may not yield over 2½ pounds of scoured wool.

Mr. WADSWORTH. I realize the conditions which give rise to the variation in shrinkage. I wanted to have the matter of record in the debate. Then is it not a fact that a specific duty imposed on the cleaned content results in a very much higher ad valorem duty upon the lower grades of wool?

Mr. SMOOT. The equivalent ad valorem duty. There is no doubt about it.

Mr. BURSUM. That is true; but it costs just as much money to raise a pound of scoured wool of the coarse wool as it does a pound of the fine wool——

Mr. SMOOT. That is, the cleaned content.

Mr. BURSUM. Yes; that is what I am speaking of. If the cost of production is to be the basis, if the grower of this country is to be permitted to live and make ends meet and be permitted to enjoy a reasonable degree of prosperity, so he can get along, he must have a duty which will be equivalent to the cost of production as compared with the imported cost of wool from other countries.

Mr. WADSWORTH. When the Senator makes that observation, I can not help recollecting that the Senator from Idaho [Mr. GOODING] stated that the production of coarse wools in this country is much less than of the better wools.

Mr. BURSUM. That is true.

Mr. SMOOT. The half blood is not a coarse wool.

Mr. WADSWORTH. What I want to figure out is this——

Mr. SMOOT. The most popular wool is the half-blood wool which goes into most of the clothing.

Mr. WADSWORTH. I want to get my own recollection straightened out, because I used to know something about it, but never all about it. For example, I find the 33-cent specific duty imposed upon the cleaned content of any kind of wool——

Mr. BURSUM. Not the carpet wool.

Mr. WADSWORTH. Well, I know that. I mean any kind of wool except carpet wool. It will result upon the low-grade wool in an equivalent ad valorem of 137 per cent, and on the next higher grade an equivalent ad valorem of 77 per cent. That is, on the quarter blood. Those are tremendous rates.

Mr. BURSUM. It is not a question of rates.

Mr. WADSWORTH. The man who wants to use that wool in manufactured form at some time or other puts a good deal of importance upon a 137 per cent ad valorem duty.

Mr. SMOOT. I do not think there is any such rate on the prices of to-day. I do not know what prices the Senator has used. I have here, if the Senator desires, a table showing the duty on 100 pounds of wool, on the basis of a 33-cent duty per scoured pound, beginning with 90-pound shrinkage and at 33 cents, showing just what it will cost for the 100 pounds. There is very little wool known in the world that shrinks as much as 90 pounds to the 100. Therefore, beginning with 90 pounds, it runs all the way from $3.30 on 100 pounds of 90-pound wool down to where the dirt is only 10 per cent, where the price runs up to $29.70. That latter figure is hardly known in any wools in the world. It would have to be washed wool and skirted. I have a table showing the whole thing from the extremes.

But when we come down to the facts in the case, when we get down to about 56 per cent, or between 50 per cent and 60 per cent, there we find the bulk of all the wools in the world outside of carpet wool, and carpet wool, of course, is understood, even in this bill, to come in free, through a drawback provision.

Mr. LENROOT. Mr. President, I would like to ask the Senator a question. As to the wools which we do not produce, why should those wools take a 100 per cent rate?

Mr. SMOOT. I will say to the Senator that little would come in of the kind of wool of which he speaks, and there would not be even that much under prices existing to-day. Those are abnormal prices which he has quoted. They go into the braids and goods that are carrying a duty here, and are not generally used for clothing.

Mr. POMERENE. Mr. President, we are not able to hear the whispering on the other side of the aisle.

Mr. SMOOT. I do not think I am whispering.

Mr. POMERENE. The Senator from Utah has his back turned this way, and, while we believe he is talking, we are not able to hear anything more than a rumbling noise, owing to the confusion in the Chamber.

Mr. SMOOT. I will say to the Senator from Wisconsin that the wool of which the Senator speaks, the average importations for the four years, taking the four years preceding, was less than 4.5 per cent of the total wools consumed in the United States.

Mr. LENROOT. Of the world?

Mr. SMOOT. Of the United States.

Mr. LENROOT. Oh, yes; I know that.

Mr. SMOOT. I mean used in the United States. I do not mean raised in the United States; I mean used in the United States. Of that 4.5 per cent there is a little over 80 per cent imported.

Mr. LENROOT. Then the Senator would say that upon the lower coarse wools the duty is not necessary for the protection of the American industry.

Mr. SMOOT. I will say to the Senator that it cost just as much per scoured pound to raise that wool in this country.

Mr. LENROOT. But we are not raising it here.

Mr. SMOOT. Oh yes; of this wool we raise about 1 per cent of the amount of wool consumed in the United States.

Mr. GOODING. I might say that is essential in building up a flock of sheep. It is the English blood that makes the low-grade wools to-day, although at one time the English wools were higher in price than the merino wools on a grease basis. I grew them all years ago. While my coarser wools sold readily my merino wools were a drug on the market. To-day the condition is the reverse. That has been brought about by the fact that during the war there was no demand for those coarser wools—what are called the low-quarter wools. The Government did not use any of that kind of wool in making up blankets and uniforms. The result was that there was a surplus on the world's market of these wools, and they are to-day cheaper than they have been for many years. That is the reason the price appears low at the present time. However, that variety of wool was essential in making up a dual-purpose sheep for the farm and for the range. So far as the wool indus-

try is concerned, the question is, Do we want that industry to exist in America? That is the only question involved.

Mr. BURSUM. Mr. President——

Mr. SMOOT. Just a moment. I want to say to the Senator from Wisconsin that whenever cheviots are the fashion in men's clothing—and they do become the fashion, perhaps, in cycles of seven or eight years—then coarse wools are in demand. It is then almost impossible to get them. I know, Mr. President, that a very small quantity of those coarse wools was produced in Utah, and about the only wools that I have ever bought outside of the State of Utah in order to run the mill have been coarse wools. Whenever there has been a cheviot season, or a demand for overcoats with coarse wool thread made from coarse wools, the manufacturers of woolen goods have got to scour the country for that class of wools.

During the World War, as the Senator from Idaho [Mr. GOODING] has suggested, much of this character of wool was used by the Government; and yet the Government had to commandeer or purchase nearly all of the wool in the United States. The Government used all of the fine wool, but when the war ceased the Government had coarse wools on hand, great quantities of them. What was the Government to do? There was not a demand for it. Therefore the Government had to accept the loss upon that wool. On those prices, of course, brought about by that condition, the rate of duty of 33 cents per pound on scoured wool seems very, very high, indeed.

Mr. GOODING. I understand the Government sold that wool as low as 12 cents, and even 7 cents, a pound. If the fashion should change to-morrow in favor of Scotch tweed or cheviot goods, of which the Senator from Utah has spoken, it would be the highest wool in America, and it is essential to the life of the industry if we are going to let it live.

Mr. BURSUM. Mr. President, I desire to call the attention of the Senate to certain facts. In nearly every flock of sheep, no matter how it may be graded up, there will be a small percentage of coarse wool produced from the flock. The duty which has been reported by the Committee on Finance on wool is based upon the average price of wool. If there were to be any separate classification covering the small percentage of braid or coarser wools, that would increase the cost of production here and would require a higher duty on the higher-grade wools. It seems to me that the percentage is so small that the country as a whole will obtain a greater benefit by the average flat rate of 33 cents than it would should we undertake to classify these wools and grant a much higher duty upon the finer grades of wool.

Mr. GOODING. At this point I wish to say, as to these low wools, as they are called, practically all of them are raised on the farm and are on the farm. Ohio, West Virginia, and Michigan have a large percentage of the merino wools, although the greater proportion of Ohio wools are to-day half blood and lower. West Virginia has the highest percentage of merino wool; then comes Ohio; and then Michigan, if I remember correctly; but Indiana and practically all the remainder of the States produce to a large extent the lower-grade wools which we are now discussing and which are so cheap. Some of that class of wool is produced in the West, but not a great quantity.

Mr. LENROOT. That can not be; that is impossible, if the Senator's other statement is true as to the percentage of the total production.

Mr. GOODING. I say the larger percentage of that class of wool is on the farms. I am talking about half bloods in connection with the matter and three-eighths bloods.

Mr. LENROOT. That is all right.

Mr. SMOOT. Mr. President, I wish again to emphasize the fact that the equivalent ad valorems mentioned by the Senator were upon abnormal prices. On page 20 of a late publication of the United States Tariff Commission, entitled "Recent tendencies in the wool trade with special reference to their tariff aspects, 1920–1922," it is stated:

> Since the figures in Table 12, as compared with Table 11, indicate a marked curtailment in ad valorem equivalent on foreign valuation for the same duties, it is of interest to compare the ad valorem equivalents of these duties on a pre-war foreign valuation. As formerly stated by the commission, the pre-war valuation is a fair basis to use, since the abnormally low prices for crossbred wools are steadily being corrected.

I can not say any more than I have said. I have explained how the condition was brought about. It could not have been otherwise. The wool was thrown upon the market by our own Government, though I do not blame the Government. When Government officials spoke to me about the matter, I said, "I do not know when there will be a demand for these wools; I can not tell. The demand may be in one year, in two years, or it may be longer. No one can tell."

Mr. BURSUM. But, Mr. President, may I call the Senator's attention to the fact that at that time wool was bringing less than 25 per cent of its actual cost to the grower?

Mr. SMOOT. Some of the wool was sold by our Government for as low as 12 cents, and I have understood as low as 7 cents in some cases. It was included in the purchase of a whole clip, and of course every Senator knows that few sheepmen have all of just one grade. We have in the West a mixed grade; we have no clip of wool but what has to be sorted.

Mr. BURSUM. Mr. President, on that very point the growers had borrowed as much as 40 cents a pound on the wool, that amount being advanced by the wool dealers.

Mr. SMOOT. Yes; and if it had not been for the emergency tariff act there would not have been a woolgrower of any importance in the United States who would not have been ruined financially.

Mr. WADSWORTH. Mr. President, will the Senator yield now?

Mr. SMOOT. Yes; I yield.

Mr. WADSWORTH. The Senator referred to me—I think he must have been referring to me—as having quoted abnormal figures.

Mr. SMOOT. I know the Senator quoted the values that were given at the time.

Mr. WADSWORTH. There is where the Senator made a mistake. The values that I quoted were of June 15, 1922. I have them here.

Mr. SMOOT. They are the abnormal figures of which I speak.

Mr. WADSWORTH. Let us see if they are abnormal.

Mr. SMOOT. Very well.

Mr. WADSWORTH. As to fine foreign wool in the grease the valuation is 45½ cents in the grease and 95 cents scoured.

Mr. BURSUM. Ninety-five cents scoured?

Mr. WADSWORTH. Yes.

Mr. BURSUM. How does the Senator figure out 150 per cent on that?

Mr. WADSWORTH. I did not figure it on that; I figured on the low. The other figures are: one-half blood, in the grease, 42¾ cents; scoured, 75 cents; three-eighths blood, in the grease, 36½ cents; scoured, 59 cents; one-quarter blood, in the grease, 29 cents; scoured, 43 cents; low, in the grease, 17¼ cents; scoured, 24 cents. I gave what I estimated would be the equivalent ad valorem on the scoured low.

Mr. SMOOT. I have not denied that. All I did say was that those prices on coarse wools are abnormally low to-day. I have here the London prices.

Mr. GOODING. The prices the Senator from New York is quoting are London prices.

Mr. SMOOT. I have the London prices for July, 1914, and of May 19 of this year.

Mr. WADSWORTH. Does the Senator deny that these wools were imported at the prices I have given?

Mr. SMOOT. No; I am not denying that.

Mr. WADSWORTH. Then the ad valorem duty should be figured on those prices, should it not?

Mr. SMOOT. Taking into consideration the shrinkage.

Mr. WADSWORTH. I will give the Senator the average of the shrinkage. The figures are as follows: Fine, 52 per cent shrunk, 48 per cent yield; half blood, 43 per cent shrunk and 57 per cent yield; three-eighths blood, 38 per cent shrunk, 62 per cent yield; one-fourth blood, 33 per cent shrunk and 67 per cent yield.

Mr. SMOOT. For quarter blood?

Mr. WADSWORTH. Yes; and low 28 per cent shrunk and 72 per cent yield.

Mr. SMOOT. That is, of course, Australian wool.

Mr. WADSWORTH. Certainly, these are wools that are coming in and I am trying to estimate what the equivalent ad valorem duty would be on those wools under the prices given for June 15, 1922.

Mr. SMOOT. If we are going to allow those wools to come in here skirted and all the dirt that is possible taken out of them, the Senator is right. Here is the last quotation from London.

Mr. GOODING. I have here some prices for July.

Mr. SMOOT. I have the last ones the commission has furnished.

Mr. LENROOT. From what is the Senator from Utah about to read?

Mr. SMOOT. From the compilation entitled "Recent tendencies in the wool trade," issued by the United States Tariff Commission.

Mr. WADSWORTH. What page?

Mr. SMOOT. Page 12. The prices are given on the London market on May 19, 1922, as follows:

Seventies superfleeces, in pence, 60, which is equivalent to $1.20.

Mr. WADSWORTH. Is that for wool in the grease?

Mr. SMOOT. That is the clean content.

Mr. WADSWORTH. That is scoured?

Mr. SMOOT. That is scoured wool.

64/67's good medium fleeces, $1.04 a pound; 60/64's good medium fleeces, 92 cents a pound; 64's good pieces, 90 cents a pound; 58/60's good medium fleeces, 80 cents a pound; 56's fine crossbred fleeces, 56 cents a pound; 46/50's crossbred fleeces, 36 cents a pound; 44's crossbred fleeces, 26 cents a pound; 36/40's crossbred fleeces, 22 cents a pound, scoured.

Mr. WADSWORTH. And my minimum figure is 25 cents. We do not differ materially. That is perfectly evident.

Mr. SMOOT. I will now, from the same report, give the prices in July, 1914, so that we may see what the normal prices were. For 46's crossbred fleeces the price was 17 pence in July, 1914, which is equivalent to 34 cents a pound, and now 46's are only 30 cents. In 1914, 44's crossbred fleeces were 32 cents, and now they are only 26 cents. In 1914 the 36/40's crossbred fleeces were 31 cents, while they are only 22 cents to-day. That is why I say that to-day's prices are abnormal.

Mr. WADSWORTH. I thought the Senator said I had read from prices during the slump, and that they were abnormal.

Mr. SMOOT. They were abnormal during the slump.

Mr. WADSWORTH. But we are not in a slump now.

Mr. SMOOT. Yes; we are in a slump now so far as the coarse wools are concerned. On the London market the demand is for fine wools, and they are up to $1.20 a pound as against 22 cents a pound for coarse wools.

Mr. WADSWORTH. That does not indicate a slump.

Mr. SMOOT. It indicates that there is no demand for the coarse wools to speak of, and they are being thrown upon the market at almost any price they can bring. It means they are only getting 22 cents for coarse wools cleaned, and $1.20 for the fine.

Mr. GOODING. Mr. President, I might say that I know of a line of clips that was held in Boston for three years, a low-grade wool, that could not be sold for any price at all. So the condition is not normal by any means, so far as low-grade wools are concerned. I do not know whether they are sold to-day or not.

Mr. KENDRICK. Mr. President——

Mr. SMOOT. I yield to the Senator from Wyoming.

Mr. KENDRICK. The Senator from Utah comes from a State which is a heavy producer of wool, as are a number of other Western States. I want to ask the Senator if it is not true as to the application of protection that as the industry is stabilized and production placed upon a sound basis the invariable result has been ultimately to reduce the price to the consumers of the country?

Mr. SMOOT. There is no doubt about that; and the very fact that we only have 36,000,000 sheep in the United States now as compared with 57,000,000 a few years ago demonstrates the condition of the sheep business.

Mr. WALSH of Montana. The same decline is found all over the world.

Mr. SMOOT. It is not so great a percentage in all the world, I will say to the Senator.

Mr. WALSH of Montana. Production has diminished by at least 33⅓ per cent.

Mr. SMOOT. In what country?

Mr. WALSH of Montana. In the whole world.

Mr. SMOOT. Our sheep have diminished about 50 per cent.

Mr. WALSH of Montana. The same reduction is going on all over the world.

Mr. SMOOT. There has been a general reduction, but not anything like what we have had here.

Mr. WALSH of Montana. The figures are available; but, if the Senator will pardon me, I should like to make an inquiry of the Senator from Idaho. I understood him to say that the present prices of wool were abnormal.

Mr. GOODING. Very low for low-grade wool.

Mr. WALSH of Montana. That is what I wanted to inquire—whether the Senator considered them abnormally high or abnormally low.

Mr. GOODING. Very low so far as the low-grade wool is concerned. I have here the Boston and London prices for July, and if the Senator will yield for just a minute I should like to put them in the RECORD.

Mr. SMOOT. Yes; I yield.

Mr. GOODING. These are wools of the same grade, and it is agreed by the Department of Agriculture that the figures are correct after having had them checked up.

At that time Ohio fine unwashed delaine was selling in Boston, scoured, for $1.31 a pound. Australian wool comparable to Ohio fine delaine was selling in London for 96 cents a pound, or a difference of 35 cents a pound.

Mr. POMERENE. Scoured content?

Mr. GOODING. Yes; scoured content. This is the point I want to make clear. As far as the woolgrower is concerned, he never did get the full amount of the duty. He is not getting it now, and he never will. The manufacturer, who is his only market, will not pay it to him. Let me say to the Senators who are shedding tears that at the present time there is only 19 cents a pound difference between the low-grade wools, the 40s selling for 25 cents a pound in London and 44 cents in Boston. In other words, there is a difference of 19 cents, or 26 cents less than the real tariff. There is a tariff on that same wool in the emergency bill of 45 cents a pound. In other words, the woolgrower is getting less than half of the duty that the emergency tariff bill gives him; so I do not think there is any need of worrying about that.

Mr. SMOOT. That is because of the fact it is on the grease basis, and only pays 15 cents a pound.

Mr. GOODING. That is because of the fact, as far as our own market is concerned, that only last summer the Government sold something like 56,000,000 pounds of this low-grade wool that we brought here and did not use at all and forced it onto the market. That is the reason that that class of wool is so low, and the same condition prevails all over the world. There is no use made of this low-grade wool at present; but of course it is coming back. There is no doubt about that.

Mr. WALSH of Montana. Mr. President, I did not get from the Senator exactly the information which I sought. I was desirous of ascertaining from the Senator whether his statement to the effect that the present prices of wool were abnormal applied to the ordinary western product?

Mr. GOODING. Yes. They are higher than they have been outside of the period during the war when the Government fixed the price.

Mr. WALSH of Montana. What the Senator means, then, is that the price of the ordinary western product is abnormally high?

Mr. GOODING. It is higher than it has been for a number of years; that is true.

Mr. WALSH of Montana. And with respect to the low-grade wools, the Senator informs us that the price is abnormally low?

Mr. GOODING. Very much lower, because I have grown both grades of wool, and a few years ago I think I had the largest flock in the West of what we call the English blood sheep, and they used to help sell my merino clip; but the reverse is true to-day, and if you have low-grade wools it is almost impossible for you to dispose of your clip at all at any price.

Mr. SMOOT. Mr. President, I do not know whether or not the Senator was in the Chamber at the time I made the statement that in London they were worth in July, 1914, 31 cents a pound. In London on May 19 of this year they were worth only 22 cents a pound. They are abnormally low, and that is the world market.

Mr. BURSUM. Those are the coarse wools?

Mr. SMOOT. Those are the coarse wools.

Mr. GOODING. Mr. President I should like to put the rest of this statement into the RECORD.

Mr. POMERENE. Mr. President, before the Senator does that will the Senator from Utah yield just for a question?

Mr. SMOOT. Yes.

Mr. POMERENE. I am not quite sure that I have correctly in my mind the figures which the Senator from Idaho gave; but as I understood him he said that this merino wool, scoured, was worth 49 cents in Boston——

Mr. GOODING. No.

Mr. POMERENE. And in London 25 cents.

Mr. GOODING. That was the low grade. If the Senator will let me read the whole of the figures, then he will have them correct.

Mr. POMERENE. I know; but I want the Senator to straighten me out if I am wrong about it. The duty was 45 cents?

Mr. GOODING. The duty was 45 cents.

Mr. POMERENE. Now, the question I wanted to ask was this: If the price here was 49 cents and the price in London

was 25 cents and the duty was 45 cents, how and to what extent has that actually benefited the flockmaster?

Mr. GOODING. If there were not a duty on the wool, he would have the London prices.

Mr. BURSUM. Mr. President——

Mr. GOODING. If the Senator will permit me, I should like to put this table in the RECORD, so as to give the different prices. I remember when wool was on the free list seeing it sell for 4 cents a pound, and during the first year that it was on the free list it sold for an average of 6¼ cents a pound in the West. There is not any question about the fact that the manufacturer drives the sharpest bargain that he can all the time, and he will never give us the full amount of the duty under the system that we have at the present time—not until we have a law in this country that permits his compensatory duty to be the difference between a pound of wool in Boston and a pound of wool in London. If I may be permitted to put in these figures, however, I will show the Senator the different prices of the wool.

Mr. POMERENE. I shall be very glad to have that done; but the duty seems to be twice the difference between the London market and the Boston market. That is one of the things I did not quite understand.

Mr. SMOOT. I will say to the Senator that this is how that happened: It is 15 cents a pound, and that wool is imported into the United States in the grease, and the shrinkage is very low, and therefore they do not pay on the wool content but they pay, upon this class of goods, on the wool in the grease.

Mr. POMERENE. But the fact, nevertheless, remains that there have been very great variations in price when we had a high protective duty, and there have also been very great variations of price when there was a comparatively low duty. That is the truth about it; and there are many things that enter into the price of wool other than the mere statutory duty that may be fixed by the Congress.

Mr. SMOOT. I will say to the Senator that with a scoured-content duty they will not get around it.

Mr. POMERENE. I think that is an improvement on the old system. I have not any doubt about that myself.

Mr. SMOOT. Nobody is going to get away from that.

Mr. GOODING. In reply to the Senator from New York, who thinks there is importation of this lower-grade wool, I wish to say that it hardly seems possible that they would import that wool at the present time even and hold it in bond, when it is selling in this country for 44 cents a pound on the Boston market; but I should like to finish this statement for the RECORD, so that it will all be in the RECORD together.

Territory fine staple is selling in Boston for $1.26 a pound. The same class of wool in London is selling for 90 cents. There is a difference of 36 cents, although there is a tariff of 45 cents a pound. This is the scoured content.

Ohio half bloods are selling in London at 83 cents and in Boston for $1.08, a difference of 25 cents.

Mr. POMERENE. As of what date?

Mr. GOODING. This is the 1st of July. So there is 15 cents difference between the pound of Ohio fine wool, when you add the duty to the London price, as against the price that they pay for it in Boston. In other words, the woolgrower is getting 15 cents a pound less than the 45 cents, or he is getting 30 cents protection instead of 45.

Mr. POMERENE. I do not want to interrupt the Senator, but he spoke of Ohio wools in the London market. Did I understand him to say that?

Mr. GOODING. These are comparable wools that I am quoting.

Mr. POMERENE. Then the Senator wants to correct himself, does he? As I understood him, he said "Ohio wools in the London market." He means simply comparable wools of foreign origin. Is that it?

Mr. GOODING. Yes. It should be properly styled Australian superwarp spinning 60s, which is comparable to Ohio half bloods. That will make it clear, of course.

Australian good top making, 60s to 64s, selling in London for 83 cents and in Boston for $1.15. In this case the Ohio woolgrower is getting 32 cents protection on a pound of scoured wool.

Australian good styles, 56—same as Territories, three-eighths blood, in this country—selling in London for 66 cents, in Boston for 89 cents, or a duty of 23 cents a pound, as against 45, which the emergency tariff bill provides for.

Australian good styles, 46, selling in London for 33 cents, selling in Boston for 56 cents, or a protection of 23 cents a pound.

Australian good styles, 40 to 46, territory braids—that is, the English blood—selling in London for 25 cents, in Boston for 44 cents. The grower of what we call braid wool in this country is getting a duty of 19 cents a pound instead of 45, as the emergency bill gives him.

So I can hardly believe that there is any of that kind of wool imported in bond, because there is a surplus of it in America at the present time. I think the Senator from New York must be mistaken in that respect.

Mr. SMOOT. Just one word more, and then I will yield the floor.

I know that it will be pointed to time and again during the discussion of this schedule that on these low-shrinkage wools the equivalent ad valorem will be exceedingly high. I want to emphasize again the fact that only 4½ per cent of all of the wool consumed in the United States is of that class, and we raise in the United States only 20 per cent of that amount, or, in other words, less than 1 per cent of the wool used in the United States is of the character which has been referred to to-day.

Mr. POMERENE. I should like to ask the Senator a question, because this is a matter which has disturbed me a good deal. I think I heard the Senator from Utah say, within six months, or such a matter—in any event it was said by some one on the floor of the Senate—that we had at that time a two-year stock of wool here in the United States, and very recently the statement has been made that the supply was very meager.

Mr. SMOOT. I did not say in the United States. I said in the world.

Mr. POMERENE. What does the Senator mean by that?

Mr. SMOOT. I said here upon one occasion, as I remember, that there was an overproduction of wool in the world.

Mr. POMERENE. I can not refer to the page of the RECORD now, but, as I recall the Senator's statement, he was speaking of the supply in the United States.

Mr. SMOOT. I called attention to the fact that the testimony given before the committee—and I think it was sustained by the Tariff Commission—was that there was a greater quantity of wool at that date in the world, for that season of the year, than at any other time in the history of the world.

Mr. POMERENE. Of course, in the last two years, I take it, there has been a smaller consumption of wool.

Mr. SMOOT. Before that there was.

Mr. POMERENE. Throughout the world there has been less wool used, because in Europe particularly they have not been able to make the purchases which they normally would, because of the economic and financial conditions.

Mr. SMOOT. That naturally results in a backing up of the wool.

Mr. POMERENE. Undoubtedly so.

Mr. SMOOT. In a short statement made by the Tariff Commission in relation to the clean content I find this statement——

Mr. POMERENE. From what page is the Senator reading?

Mr. SMOOT. Page 22:

> From the foregoing it is evident that specific clean-content duties remove the tariff discrimination against imports of heavy-shrinking wools which has characterized specific grease-pound duties.

I want to emphasize again the fact that if the woolgrower is to receive a protection upon wool it has to be on the scoured content, and never again upon the wool in the grease.

I do not want to repeat what I have said, but I want to emphasize the fact that while in the Payne-Aldrich law the woolgrower was ostensibly given a duty of 11 cents a pound he never received more than 7.6 cents a pound, and on the average between 5 and 6 cents a pound upon wools imported into the United States.

Mr. POMERENE. Whatever may be done here, I feel that whatever duty we vote upon the scoured content it will be an improvement upon the other, and avoids the possibility of deception.

STRIKE CONDITIONS IN CONNECTICUT.

Mr. KING. Mr. President, I regret that the able junior Senator from Connecticut [Mr. MCLEAN] is not in the Chamber, because during a discussion of the tariff bill some days ago reference was made by me to the State of Connecticut. It grew out of the fact that the able Senator from Connecticut is a member of the Finance Committee and has been active in securing high duties upon textile manufactures.

I alluded to what I understood to be the facts, that there had been a number of strikes in Connecticut; that the wages in the textile mills were low, and then I stated, by way of generalization, that in many of the industries where high tariff duties were imposed wages were lower than in many of the industries where there was no tariff, or if there were a tariff, the rates were comparatively low.

The able Senator from New York [Mr. WADSWORTH] asked a number of questions during the discussion and expressed sur-

prise, as I understood him, at the statement that there had been strikes in the State of Connecticut. I called attention at that time to a letter which I had received from Mr. O'Meara, the president of the Federation of Labor of the State of Connecticut. After the colloquy I sent a copy of the RECORD to Mr. O'Meara and asked him to send me such information as he cared to relating to the questions raised in the discussion between the Senator from Connecticut, the Senator from New York, and myself.

I am in receipt of a letter from him under date of July 20. It is somewhat long, but I take the liberty of reading it, because of the facts which he states in this letter. After addressing me, he says:

Supplementing my statements made in letter of May 15, 1922—

That is the letter excerpts from which I put into the RECORD.

I wish to state that my comment made in that letter was prompted by your able statements in the Senate of the United States under date of Thursday, May 11, 1922, and which statements appeared in the CONGRESSIONAL RECORD, on page 6562, which read as follows in part: "Mr. President, I repeat what I said a moment ago, that a large part of the population working in the mills in the State of Connecticut were foreign. There were strikes in the mills and factories because of the injustice which the mill owners perpetrated upon the laborers whom they employed, etc."

Now, in relation to that part of my letter which referred to the system of slavery practiced in this State, even of this date, I desire to state the following:

I am inclosing to you an application card for employment at the plant of the Columbia Graphophone Co., situated in the city of Bridgeport, Conn., which I have marked "Exhibit A."

The card is here. I shall not ask that it be inserted in the RECORD, for the reason that I think the subsequent statements of the writer substantially state the important features in the card.

Referring to the card, he continues:

Please note the inquiry, "Are you union or nonunion?"

Please note the inquiry, "Rate of wages you expect?"

Please note the agreement that they ask a man or woman to sign without first knowing what they are to abide by after signing.

I am inclosing to you an application card copy such as is used by the Employers' Association of New Haven, Conn., through their metal trades division, which I have marked "Exhibit B."

I have that here, but I shall not ask that it go in the RECORD. I continue reading:

When an employee desires to seek work in any of the plants controlled by this system, and there are very few that are not working it, or when he ceases his or her employment at any of these plants, you will note that when the employment ceases the card is sent to a central office with all of the information wanted thereon, and upon seeking a new position he is told, generally speaking, to come around the next day, and in the interim the central office gives out the information so desired, and you can readily understand just what chance a poor fellow would have to get employment with another employer if his former one did not wish to let go of him. A perusal of this card copy will, I am sure, give you an idea of the system that the factory worker is up against in Connecticut.

And to still further strengthen this blacklist system, employers of this State saw fit to present in the form of a bill at the legislative session of 1919 that called for a severe penalty upon anyone that, who in seeking employment in Connecticut, and was found out giving another name other than his legal one, which had to be resorted to and is to-day by men in order to get work.

But thanks to divine justice, due to severe factional differences in the committee of the judiciary at that time, the bill was not reported out.

Relative to my statement of the bringing into the city of New Britain, Conn., numbers of foreigners, I am inclosing to you, Mr. Senator, a newspaper article under date of April 17, 1921, and which I have marked "Exhibit C."

The article is from the Hartford-New Britain News, under date of April 17, 1921, and in large letters these words appear:

New Britain Spaniards threaten to burn factory of big company which brought them from Spain. Foreigners imported to compete with American labor indignant that they can not get work. New Britain has 850 Spaniards, Bridgeport 1,000, and Meriden has a colony. Cities must feed laborers brought into America. Interview with "King" of New Britain Spaniards incriminates great hardware concern.

There is a long statement showing the importation of these poor people from abroad; and I will not say the persecutions but the hardships to which they are exposed after being brought to the United States to work in these highly protected industries. Without reading the article, I ask that it may be inserted at this point in the reading of this letter.

The PRESIDING OFFICER (Mr. BROUSSARD in the chair). Is there objection? The Chair hears none, and it is so ordered.

The article is as follows:

What is Connecticut going to do with its Spaniards imported into the State for the purpose of competing with American labor during the war and stranded now, with little to eat, in a strange land after they were brought here to help the manufacturing interests make money?

New Britain has 850 Spaniards on its hands. Bridgeport has 1,000. Meriden has a small colony which went to the city hall in a body last week and demanded food and got it.

The Meriden group of about 40 was stranded in the Silver City after having been brought there by the Aberthaw Construction Co., which was building a factory.

The New Britain colony came to work in the factories there, especially at the plant of Landers, Frary & Clark.

IMPORTED BY AMERICANIZATION WORKERS.

The president of Landers, Frary & Clark is Charles F. Smith, prominent member of the State board of education, which body is spending a lot of money in its Americanization campaign.

The Landers people do not like to be reminded of it, but there is pretty good evidence that they aided in bringing the Spaniards to New Britain, and this subsequent to the time when Governor Holcomb warned of foreign agitators secretly meeting and subsequent to the time when the State board of education became interested in preserving American institutions by teaching foreigners English.

The number of Spaniards who can talk English is slim, as they have not been in this country more than two years. They were not brought here to help win the war. They were brought here to supply the demand for labor after the war.

Coming from a country where economic conditions are not much better than they were in Russia under the rule of the Czar, they lead a communistic form of life, which is out of sympathy with the prevailing form of existence in America, and a Spaniard is not proverbially meek and mild.

A FIREBRAND LETTER.

The temper of some of the New Britain Spaniards is revealed by the following letter, written in Spanish, to Landers, Frary & Clark. Its publication last week, much to the disgust of the Landers officials, was the sensation of the Hardware City.

The letter, dated January 31, 1921, was on a cheap grade of paper. At the top of the sheet was written the words "Span" and "New Britain" and the date in English.

The letter as translated follows:

"LANDERS, FRARY & CLARK:

"You will give work to the Spaniards, or within two days they will come together to the factory and set fire to it. And this promptly, for it is not right to turn the Spaniards out into the street and keep the others. I repeat, turn the Spaniards out into the street and all those who come to the labor bureau and are not employed will do damage to the factory unless you pay for their voyage back to Spain. If you do not do this, you will suffer. 'Don't take it as a joke.'"

OFFICIALS SHOCKED.

It is hard to say who were shocked the most, the people of New Britain when they read of this remarkable threat or the officials of the company when they learned that a New Britain newspaper had the audacity to print such a letter.

The company and the Spanish-American Mutual Benefit Association have been at work for two months trying to discover who wrote the anonymous letter. The police conducted an investigation with secrecy. The news was obtained through the mutual benefit association, which was not "on" to the American way of keeping the public in the dark about what is going on and which passed resolutions promising to do all in its power to find out who wrote the letter.

TEAR DOWN GATES.

Together with news of the letter came the information that a few weeks ago a crowd of Spaniards went to one of the gates of Landers, Frary & Clark and gesticulated wildly, speaking Spanish. It is even said that they tore down one of the gates. It is not known what they were excited about.

NO MEANS OF SUPPORT.

New Britain's mayor inaugurated a census of the unemployed at City Hall one day last week. The very first day 1,500 men came to City Hall, and the building was scarcely big enough to hold them.

One of the Spaniards, who filled out a questionnaire, said that he had been in New Britain five months, had been out of work five months, and had never received a cent of wages since landing. He arrived just as the unemployment wave struck the State.

In view of the fact that hundreds of men are without visible means of support, which, according to American civilization, is a misdemeanor unless the victim sits still in one place, people of New Britain, who will have to pay the bills and support the non-English-speaking foreigners, are wondering who brought these Spaniards over and how it came about that they were allowed to get into this country.

There is a feeling among some of the taxpayers that if the factories brought the Spaniards over they ought to help them out financially instead of letting them come onto the city for support. The Mutual Benefit Association has only $500 left, and hundreds of Spaniards are practically without funds.

"KING FERDINAND."

In order to find out how the Spaniards came to New Britain, and to ascertain whether there was any truth to the supposition that the Landers, Frary & Clark factory had broken the United States laws against importing foreigner laborers, the Herald reporter, with a friend, visited the home of Fernando Faragoza in the block at 35 Chestnut Street, directly opposite the car barns.

Ferdinand is popularly supposed to be the king-pin among the Spaniards, and it did not take long to find out that this was so.

A COMMUNIST LIFE.

Ferdinand was ready to talk and made himself agreeable. The brick block houses 80 Spaniards. They are crowded into the building as close as they can get. The many rooms are crowded with beds and the cellar is the dining room, where all of the roomers dine as one large family, according to the communist plan.

All help in doing the work, although most of them are too poor to contribute much to maintaining the larder, the burden of which comes upon Ferdinand.

There are women in the crowd as well as men. The sanitary conditions are not of the best, but such can not be expected when 80 Spaniards are crowded into one building.

BROUGHT 700 TO TOWN.

Ferdinand, in response to questioning, said:

"I have been in New Britain 16 months and have brought 700 Spaniards to the city in that time.

"I was working for the Union Construction Co. of Boston. We had a big job at Egypt on the Massachusetts shore, and finally I was working for the company on a big dam in New York State.

"It was while on the dam job in New York State that the Landers people got in touch with me. The arrangements were made through a Mr. Hubert at the employment office. I was to bring 59 men to the Landers factory from the dam, and I was to have a job as foreman at the factory.

"This arrangement was satisfactory, and I brought the 59 men and became an assistant foreman. Later I got other Spaniards to come to work for Landers.

"I wrote letters to Spain. I got 30 men at one time for the city. 'Mike,' of the street department, wanted 30 men and I got them for him.

STARTED RESTAURANT.

"I worked at the Landers factory for a while and then started the Spanish restaurant on Commercial Street. I kept getting more men from Spain. All told, I have brought 700 Spaniards to New Britain. There were none here before I came 16 months ago.

"I had five different pieces of property, but now all I keep is this block on Chestnut Street. I lease it for two years for $4,800, or $200 a month.

"The Landers factory is not helping me out now. It is a big expense to keep this crowd together. The Corbin screw factory has hired a few men."

A MAN OF MEANS.

Questioning as to how much he was worth did not bring a definite answer from Ferdinand.

It was noticeable that anybody in the block when questioned where Ferdinand was dropped everything and hastened to find him. It is apparent that he holds the economic position of advantage.

Rumor is that Ferdinand, besides whatever benefit may have accrued to him as procuring help for Landers, Frary & Clark, extracted liberal sums from the Spaniards whom he brought to this country in return for getting them jobs.

It is also apparent that the colony is living off his money at the present time, and that he has money or he wouldn't be able to keep up the establishment.

Mr. KING. Referring to the efforts made by the Spaniards to secure work, and their threats to burn certain plants if they did not get work, the writer says:

Please note the fact that on the dates of these occurrences that the president of this great and influential concern was a member of the State board of education, and that this said board was then and at this date is spending large sums of money on Americanization work.

From reliable information it appears that this gentleman is not now a member of the State board.

I am inclosing a book photo, taken from a report of the department of labor of the State of Connecticut, which I have marked "Exhibit D."

While the notation underneath the picture might convey the information that this scene was only during the war days, still facts remain that these same class of people are working in the mills and factories that you see in the picture, and is not it true of your words stated in the Senate under date of May 11: "Mr. President, I repeat what I said a moment ago, that a large part of the population working in the mills and factories in the State of Connecticut were foreign."

The photograph which is forwarded to me shows a large number of men, and an examination of the photograph clearly indicates the foreign nationality of the hundreds of persons shown in the photograph. Of course, I shall not ask that the photograph be inserted in the RECORD. Mr. O'Meara continues:

I am inclosing a book photo, taken from a report of the department of labor of the State of Connecticut, which I have marked "Exhibit E."

The book photo referred to shows a number of little children, I should judge from their appearance, from a year to 3 years old, who the letter indicates are maintained in the houses or in the rooms attached to the factories, brought there by their mothers while their mothers are at work in the factories. I continue reading:

You can easily see, Mr. Senator, what a condition this is; little babies in factory welfare rooms while mothers are working; no parental care to have the baby feel that it should be in a home instead of reared in a factory. Please note how they are dressed up in order to correspond to the setting of the Christmas tree.

I wish to state that there was in the year 1913 factory workers in the State of Connecticut to the number of 169,677, which increased in numbers, when in 1918 the total reached approximately 355,994. These numbers in 1918 included approximately 100,000 females.

I made the charge that many women worked in these textile mills, and that children likewise worked in many of the textile mills. This corroborates the statement which I made.

This number of factory workers are represented through some 54 nationalities, as follows:

Albanian, American, Armenian, Australian, Austrian, Bakonian, Belgian, Bohemian, Brazilian, Bulgarian, Canadian, Croatian, Cuban, Czecho-Slovak, Danish, Dutch, Egyptian, English, Finnish, French, Galician, German, Greek, Hebrew, Hindu, Hungarian, Indian, Irish, Italian, Japanese, Lettish, Lithuanian, Livonian, Mexican, Norwegian, Persian, Polish, Portuguese, Porto Rican, Rumanian, Ruthenian, Scotch, Serbian, Slovak, Slavish, South Americans, Spanish, Swedish, Swiss, Syrian, Turkish, Welsh, West Indian, Ukranian.

In the year 1910, Mr. Senator, there were within the State of Connecticut persons of foreign birth to the number of 328,759.

There were in the same year engaged in gainful occupations 200,000 foreign-born persons.

There was in the same year an approximate estimate made of foreign-born employees in Connecticut, and the figures were placed at 50 per cent.

My charge was that many foreigners were employed in the protective industries of the United States, and this letter indicates that 50 per cent of the persons employed in Connecticut mills were foreign born.

There were in the same year 67,327 foreign-born people who were unable to speak the English language.

There were in the same year 49,202 foreign-born people who were unable to read or write in any language.

There were in the same year an approximate of 85,000 males of military age (18 to 45) that were unnaturalized, and who could not be required under existing treaties to fight for the United States when an emergency would come.

I wish to state that Connecticut is one of the three smaller States of the Union, having an approximate of 5,004 square miles, or, in other words, you can ride on a train in a direction from east to west in three and one-half hours' time and from a northerly direction to the south in approximately one and one-half hours.

During the years enumerated below the State of Connecticut has had a most shameful record for industrial fighting, and the two main causes of these disturbances are given according to written history as being caused by unrest and demands for more wages.

Now, if the Senator from New York is interested, and I stated that I did not think he would be interested in the number of strikes, he will listen with attention to this record of strikes:

In the year ending October, 1901, there were 11,250 persons engaged in strike difficulties, with a loss of 250,168 days' time.

In the year ending October, 1902, there were 104 strikes, 10,141 persons engaged in strike difficulties, with a loss of 235,453 days' time.

And by the way, these two years were the ones that Senator GEORGE P. MCLEAN was governor of the State of Connecticut.

In the year ending October, 1903, there were 99 strikes, 9,217 persons engaged in strike difficulties, with a loss of 270,449 days' time.

In the year ending October, 1904, there were 36 strikes, 2,699 persons engaged in strike difficulties, with a loss of 61,218 days' time.

In the year ending November 30, 1905, there were 2,948 persons engaged in strike difficulties, with a loss of 51,682 days' time.

In the year ending October, 1906, there were 62 strikes, 6,604 persons engaged in strike difficulties, with a loss of 160,344 days' time.

In the year ending March, 1907—no record of the number of strikes, no record of the number of persons engaged—with a loss of 101,000 days' time.

In the year ending October 30, 1908, there were 3,460 persons engaged in strike difficulties, with a loss of 34,194 days' time.

In the year ending October 30, 1909, there were 5,828 persons engaged in strike difficulties, with a loss of 569,457 days' time.

In the year ending November 30, 1910, there were 51 strikes, 3,367 persons engaged in strike difficulties, with a loss of 65,395 days' time.

In the year ending October 31, 1911, there were 2,602 persons engaged in strike difficulties, with a loss of 29,240 days' time.

In the years ending 1912 and 1913 there are no available records.

In the years ending November 30, 1914, November 30, 1915, November 30, 1916, there were 422 strikes—68,000 persons engaged in strike difficulties, with a loss of 650,000 days' time.

In the years ending November 30, 1917, and November 30, 1918, there were 183 strikes—33,400 persons engaged in strike difficulties, with a loss of 509,432 days' time.

In the years ending November 30, 1919, and November 30, 1920, there were 280 strikes—75,943 persons engaged in strike difficulties, with a loss of 1,307,508 days' time.

But the Senator from New York said, as I understood him, that he had not heard of any strikes in Connecticut.

The reports for the years 1921 and 1922, ending June 30, 1922, are now in the compiling form and are not ready for publication.

In other words, there have been in these years in the State of Connecticut 235,459 wage earners engaged in industrial strife, which total a loss in days time to society of 4,295,540 days, and in these troubles human life was sacrificed, especially those that were engaged in the metal industry.

Some of the principal industrial difficulties took place at the following plants:

American Brass Co., Waterbury and Ansonia, metal industry.
Rock Manufacturing Co., Rockville, textile industry.
Benedict & Burnham Co., Waterbury, metal industry.
Randolph & Clowes, Waterbury, metal industry.
Chase Rolling Mills, Waterbury, metal industry.
Scovill Manufacturing Co., Waterbury, metal industry.
Plume & Atwood Co., Waterbury, metal industry.
Waterbury Manufacturing Co., Waterbury, metal industry.
Aldrich Mills, Moosup, textile industry; this strike is still on, July, 1922.
Mattatuck Manufacturing Co., Waterbury, metal industry.
Waterbury Clock Co., Waterbury, metal industry.
Farrell Foundry Co., Waterbury and Ansonia, metal industry.
Osborn & Cheesman Co., Ansonia, metal industry.
Yale & Towne Co., Stamford, metal industry.
Warner Bros. Co., Bridgeport, textile industry.
Geo. C. Batchelder Co., Bridgeport, textile industry.
La Resista Co., Bridgeport, textile industry.
Columbia Graphophone Co., Bridgeport, metal industry.
International Silver Co., Meriden, metal industry.
Miamus Manufacturing Co., Miamus, textile industry.
Underwood Manufacturing Co., Hartford, metal industry.
Belding Manufacturing Co., Rockville, textile industry.
Stafford Worsted Co., Stafford, textile industry.
Sperry & Barnes, New Haven, Conn., packing industry.
New Haven Clock Co., New Haven, Conn., metal industry.
Goodyear Metallic Co., Naugatuck, rubber industry.
Glastonbury Manufacturing Co., Glastonbury, textile industry.
Warren Woolen Co., Stafford Springs, textile industry.
Riverside Woolen Co., Stafford Springs, textile industry.
Winchester Repeating Arms Co., New Haven, Conn., metal industry.
Joseph Loth Co., Norwalk, Conn., textile industry.
Rhode Island Woolen Co., Stafford Springs, textile industry.
Bigelow-Hartford Co., Thompsonville, textile industry.
E. J. Manville Co., Waterbury, Conn., metal industry.

It might not be amiss at this part of my supplemental letter to state that two concerns mentioned in the above list—namely, the Scoville Manufacturing Co., of Waterbury, Conn., and the American Brass Co., which controls the brass industry, what is termed the Naugatuck Valley, which runs from Derby, Ansonia, and Shelton, three cities on the south of the valley, up to Torrington, Conn., on the north—have made immense profits of recent years, some of which I am pleased to report.

There is one specially interesting point to which I wish to call particular attention:

The Scovill Manufacturing Co. increased its profits from an average of $523,158 during the pre-war years to an increase of over $8,000,000 for the years 1916, 1917, and 1918; this meant an increase in the rate on capital stock from 10.5 per cent to 164.9 per cent. In the year 1916 it took a profit of over $13,000,000 on $5,000,000 worth of capital stock, equivalent to 268 per cent on investment.

That is one of the evils of the tariff system. It builds up by tariff legislation great corporations which pay small wages to their employees and enormous profits to the stockholders. Here was one company paying during those two years $13,000,000 profits on a capital stock of $5,000,000.

The American Brass Co., with three times as much capital stock, increased its profits from an average of $1,880,897, or 12.5 per cent, prior to the war to an average of over $7,000,000, or nearly 73.3 per cent, for the war years. In 1916 it took profits equivalent to 73.3 per cent on $15,000,000 capital stock.

And in June, 1920, when the employees of the unskilled class asked for an increase of wages that would average $4.50 per day at the Scovill Manufacturing Co., one of the most severe industrial wars broke out by the refusal of the company to give these people a little more, and during a riot outside the plant of this company during this war death ensued and many of the police officers were badly injured.

The population of the State of Connecticut, according to the 1920 census, was 1,380,631.

On September 30, 1921, there were 353,684 children in the State of Connecticut between the ages of 4 years and 16 years.

On the conclusion of the year 1919 there was 340,404 employees in the mills and factories of the State of Connecticut—256,192 males and 84,212 females.

There was paid to this number of employees in the year 1920 the sum of $420,955,341, leaving an average wage slightly over $3 per diem.

Government and State taxes, railroad and trolley rates, house rents, and many of the things that the wage earners got to have to exist have gone up in leaps since then, and severe industrial troubles have existed since 1920 and are now existing at this date against reductions in wages in this State.

There is no record reliable in form that will give the numbers of wage earners that own their own homes, but the company-owned system of homes is still in operation in the mill towns of Connecticut.

I wish to state that a commission was named by the Legislature of Connecticut—I mean provided for—that had to do with the investigating of the conditions of the wage-earning women and minors, and this commission was appointed in the year 1911 by the governor of the State under special act No. 276.

This commission consisted of the following persons:

Dr. James W. McLane, Miss Alice Hill Chittenden, Mrs. Fannie Burke, James P. Woodruff, and Patrick H. Connolley.

The commission met for the first time October 3, 1911, at the city of Hartford, Conn., and elected Dr. James W. McLane as the chairman.

Doctor McLane plunged into the work of this commission with so much energy that his health failed him, and he was relieved by his own request in August, 1912; the governor then appointed Dr. Charles E. Brayton as his successor, and with great regret do I state that in the midst of his work for this important commission Doctor Brayton died suddenly on December 2, 1912, and the work was finished by the remaining four members of the commission naming the Hon. James P. Woodruff as chairman and Miss Alice Hill Chittenden as the secretary.

The commission investigated the cotton, silk, metal, rubber, and ready-made corset industries.

The commission had for its aids some of the most enlightened and well-versed people of the United States.

The commission in its final report made special mention of the valuable services rendered to it by none other than that very learned gentleman, Hon. Henry W. Farnum, of Yale University.

I wish to give some of the statements as picked from various paragraphs of the report of the commission bearing on the wages paid to employees.

On page 16, subdivision of the compiled Connecticut documents, appears the following:

"A close study of the table shows that in the cotton industry 29.28 per cent of the women employed earned less than $7; in silk 58.15 per cent earned less than that; in metal the number falls to 48.99 per cent; in corsets to 50.14 per cent; in rubber to 49.43 per cent; while the earnings of 48.40 per cent of all those employed in these industries fall below the $7 wage scale. It is, therefore, evident that practically one-half of the women employed in these factories earn less than a living wage."

On page 31 appears the following:

"No children were found employed on night work in the industries investigated, but in the cotton and silk mills children between 14 and 16 years of age were employed 10 and more hours a day, and in one silk mill they were found working 11 hours a day.

"In cotton mills children under 16 were found employed in roving and drawing in the same room in which carding was done. The lint was very bad and the humidity extremely high in these rooms."

On page 35 appears the following:

"Hours of labor in all factories were too long according to the standards of more advanced States. Ten and a half or eleven hours a day is far too long for any woman to work under factory conditions, especially when these hours are often extended far beyond even legal excess by overtime work.

"The very large percentage of young girls in Connecticut factories probably accounts for the low wages which were found in the investigation of the five industries investigated."

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER (Mr. BROUSSARD in the chair). Does the Senator from Utah yield to the Senator from Massachusetts?

Mr. KING. I yield.

Mr. WALSH of Massachusetts. Will the Senator state what year the report was written?

Mr. KING. The commission was appointed in 1911. I do not know when the commission reported.

Mr. WALSH of Massachusetts. It was probably shortly after that time?

Mr. KING. The report states that the commission met for the first time October 3, 1911; that the chairman of the commission, because of ill health, was relieved at his own request in August, 1912. I presume the report was made in 1912 or 1913.

Mr. WALSH of Massachusetts. The report refers to the State of Connecticut?

Mr. KING. Oh, yes. The commission was appointed by the Legislature of the State of Connecticut.

Mr. WALSH of Massachusetts. No such conditions prevail in the cotton mills of Massachusetts.

Mr. KING. I am very glad to know that.

Mr. WALSH of Massachusetts. I think there has been a general improvement since that period in the State of Connecticut.

Mr. KING. I think the Senator is right. I am not reading this for the purpose of indicating that conditions now are as they were in 1911 and 1912. The statement which I made during the debate referred to the protected industries, and I stated in a general way that following the Civil War the Republicans inaugurated a policy of giving bounties and subsidies in the shape of tariffs to certain protected industries, and that those industries had imported labor from abroad, crowding out the American workingman and forcing down the prices of labor. As I understood, the able Senator from Connecticut [Mr. McLEAN] did not quite assent to the statements which I made and the conclusions which I drew from what I believed to be the facts. I also called attention to the letter of Mr. O'Meara, the president of the State federation of labor, and the Senator from Connecticut read that letter or portions of it, and I understood from his attitude that he did not quite assent to the statements made by Mr. O'Meara.

I continue reading:

On page 57 appears the following:

"The following gives the earnings of all females and males in 11 selected occupations employing women and children in the eight cotton mills visited; wages were copied directly from the pay rolls for a recent and normal period. The employees from whom such information was gathered number 757 males and 1,184 females. In weaving, largest per cent are in the $10 and $10.99 group for both men and women. A greater number of men than women, however, earned over the $10. Only 33.76 per cent of the men employed earned under the $10 and 51.18 per cent of the women. In ring spinning all of the men earned less than $10, and 96.45 per cent of the women. The largest per cent of men were in the $8 and $8.99 group. In roving, 52.09 per cent of the men earned under $10 and 63.02 per cent of the women; in spooling, 76.93 per cent of the men and all of the women."

On page 219 appears the following:

"The three rubber factories investigated ran on a schedule of 54, 58, and 59 hours a week, as reported by them. The 59-hour schedule throughout the year is, of course, illegal, although this factory seemed unaware of it. The factory which reported 58 hours a week ran 60 hours a week practically every week for the 12 months copied from the pay rolls, and violated the summer schedule completely.

"Especial provisions for the health of women in rubber factories ought to be made by means of mechanical ventilating systems and separate wash and lunch rooms because of the naphtha fumes and talcum dust to which they are exposed. In none of the factories visited was such provision made, and the women ate their lunches at their benches."

On page 188 appears the following:

"An investigation of safety conditions in a number of factories was made for the commission by Mr. William Newell; Mr. Newell visited five of the supposedly best factories in the State. Mr. Newell's report shows a decided lack of provision for the safety of employees in Connecticut."

On page 18 appears the following:

"Connecticut has a large percentage of married women among its wage-earning women. Of the women in the factories investigated by the commission, 20.39 per cent were married. This high percentage is accounted for by the fact that so many foreigners are employed in the metal and textile trades, and the foreign woman usually remains in industry after marriage."

Please note, Mr. Senator, where the report relates to the employment of so many foreigners.

I wish to state that wages paid in the American Thread Co.'s extensive establishment in Willimantic, Conn., were as follows:

In the year 1914, inspecting room, $11 per week of 54 hours.
In the year 1916, inspecting room, $12 per week of 54 hours.
In the year 1922, inspecting room, $15 per week of 48 hours.
In the year 1916, dye room, $16 per week of 54 hours.
In the year 1922, dye room, $26 per week of 48 hours.
In the year 1916, packing rooms, $14.
In the year 1922, packing rooms, $18.

I wish to state that in the metal industries that the scale of wages for the years 1914, 1919, and 1922 are as follows:

	1914	1919	1922
	Cents.	*Cents.*	*Cents.*
Machinists	40	75	58
Toolmakers	45	80	63
Millwrights	35	65	50
Machinists' helpers	28	55	42
Machine operators (gun parts)	23	42	23
Machine operators (clock parts)	23	40	23
Assemblers (gun parts)	27	45	30
Assemblers (clock parts)	27	45	27
Lock assemblers	30	50	35
Machine operators (lock operators)	25	40	27
General shop labor	20	40	22

These rates, Mr. Senator, are on the hourly basis, and have been obtained by the writer during the past week from various parts of the State of Connecticut.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Connecticut?

Mr. KING. I yield.

Mr. McLEAN. I have been out of the Chamber while the Senator has been reading from the report, but I am informed that it refers to industrial conditions in the State of Connecticut.

Mr. KING. Yes.

Mr. McLEAN. What is the date of the report?

Mr. KING. I am sorry that the Senator was not present when I began my speech, though I sent for him as soon as I came into the Chamber in order that he might be advised that I intended in part to reply to statements made by him the other day. I said that I would call attention first to a letter which I had received under date of July 20 of this year from Mr. Patrick H. O'Meara, president of the Connecticut Federation of Labor. Mr. O'Meara has sworn to the letter, so that it is in the nature of an affidavit. He quotes from a report made by the commission which was created by the act of the Legislature of Connecticut.

Mr. McLEAN. In what year?

Mr. KING. The commission was appointed in 1911, and I presume reported in 1912.

However, let me say to the Senator that I am just reading now from Mr. O'Meara's statement as to the wages paid in Connecticut in 1914 and various years up to the present time. I shall read the entire letter, which is in the shape of an affidavit, and I shall be glad to have the Senator then examine it in the RECORD.

In the report coming from the labor commissioner's office for the year ending 1918 there appears, on page 124, the following:

"In 1916 the number of certificates issued to child workers between 14 and 16 in all occupations was 13,750, up to and including October 31, 1916; from November 1, 1916, to November 1, 1917, 11,502 regular permits and 3,224 vacation were given out, amounting to 14,837; from November 1, 1917, to November 1, 1918, the regular permits were 13,715 and 4,003 vacation; from August 1, 1918, to November 1, 1918, 3,943 regular and 251 vacation were certified, a total of 4,194. It is easy to figure from this the proportion in which child labor increased in the State in the epochal period of the war."

Mr. McLEAN. If the Senator will pardon an interruption—and I shall not interrupt him unless he is willing that I should do so——

Mr. KING. I have no objection to the Senator interrupting me.

Mr. McLEAN. Of course, the Senator from Utah knows that we have a very stringent child labor law in Connecticut, and I presume that the permits to which Mr. O'Meara has referred were granted during the harvesting season, when children could get employment, especially in the tobacco fields, picking tobacco, and in other employments out of doors. I do not know whether or not there is any explanation of that in the report from which the Senator is reading.

Mr. KING. I do not see any, I will say to the Senator. Mr. O'Meara proceeds:

There appears on page 7 of the same issue, the following:

"The year 1915 was remarkable for a widespread dissatisfaction in the laboring and producing classes with wages and hours as then prevailing, this dissatisfaction spread almost simultaneously all over the country, and had an outlet in a series of strikes in many related and totally distinct industries, which for stubborness and length has never been paralleled in Connecticut, whatever the experience of other States."

I wish to state, Mr. Senator, that during the past 21 years in the State of Connecticut, that with the exception of 4 years the political destinies of the State have been with the Republican Party, and for the past 25 years with the exception of 8 years that the same conditions have prevailed from a national standpoint, and it can be easily observed what the average wage earner has received and what he can expect from the party that yells for protection—it means protection of their own pockets, and not those of the wage earner—that has been established for years, still the voter blindly keeps on voting into office men of a party that never will entertain a semblance of sympathy for the wage earner. And when Senator McLEAN states that Connecticut employers are paying wages of a better level than elsewhere, he has not taken the trouble to investigate into living conditions in the cities where these poorly paid wage earners live; we can bring him around my home city into localities where now two families are compelled to house themselves in order to exist; let him drop in here and we will show him where in an ordinary bedroom in a tenement flat, the parents sleep in one bed, there are in some beds four and five children therein in the same room, measuring 9 by 11 feet, and the other family existing in the same way in an adjoining room of the same size.

The many social agencies are continually reporting that conditions are worse than ever dreamed of, and something is urged to be done to stop it, and in all fairness how can it be done with the head of the home coming in with a wage that can not but keep him and his family in this bad condition.

Might I state, also, Mr. Senator, that the most authentic report obtainable that there is in the State of Connecicut, the astounding fact that there are 280 millionaires in Connecticut, 52 of whom possess more than $2,000,000, one being credited with $8,000,000, or, in other words, the people of Connecticut have a millionaire for each 4,300 inhabitants.

I wish to state, also, Mr. Senator, that the statement made on page 7121 of the CONGRESSIONAL RECORD, date of May 17, 1922, on the right-side top, by Senator MOSES, of New Hampshire, to the effect that there are some 717,000 depositors in the savings banks of Connecticut; that his inference being that all of these depositors are people in the wage-earning class, is far from the truth, for I would like to ask him, through you, Mr. Senator, if he would please inquire as to who deposited during the past year the sum of approximately $52,000,000 in the savings banks of Connecticut, this transaction taking place after the merger of the famous copper deal in this State? I was wondering if he classed the people that deposited this great sum in many of the banks; that if they were wage earners, and from very reliable sources this vast deposit was a welcome thing to some of the banks at that time.

I wish to state that according to figures published September, 1921, that the amount of money invested in manufacturing in Connecticut was $1,343,900,000.

Personally appeared Patrick F. O'Meara, president of the Connecticut Federation of Labor, residing at 122 Grafton Street, New Haven, Conn., and affirms that the foregoing statements to be true to the best of his knowledge and belief before me, this 20th day of July, A. D. 1922.

[SEAL] FRANK S. BERGIN.
Notary Public.

Mr. President, in May, 1920, the Bureau of Labor Statistics of the Department of Labor published Bulletin No. 265 on wages and hours of labor, compiled from an industrial survey in selected industries in the United States for 1919. It must be observed that this year was a very active one in the industries of the country and wages reached the highest levels known. The average wages per hour, as reported in this survey, give a fair indication of the relation which then existed between wages in the different trades.

This survey indicates that the lowest wages in the particular trades and industries covered were generally paid in the factories and industries of Connecticut, notwithstanding the boom which the war gave to Connecticut industries and which was in force without diminution in the year 1919 covered by the survey.

I have gone through the records and I have compiled a large number of statistics showing the wages paid per hour in Connecticut and in various other States in the Union, and the results, as I now recall them, in every instance were as I have indicated, namely, that Connecticut paid lower wages than other States.

The survey shows that in the paper-box industry cutters and creasers were paid in Connecticut 38.6 cents per hour as against 49.8 cents paid in New Jersey, and that cutters, scorers, and corner cutters were paid in Connecticut 39.5 cents per hour as against 45.6 cents paid in Michigan; that die makers and pressmen were paid in Connecticut 50.2 cents per hour as against 61.8 cents paid in New York; that laborers were paid in Connecticut 35 cents per hour as against 41.4 cents paid in Illinois; that scrappers were paid in Connecticut 32.8 cents per hour as against 44.6 cents paid in New Jersey; that coverers were paid in Connecticut 29.3 cents per hour as against 31.2 in Massachusetts; that cutters, scorers, and corner cutters were paid 21.4 cents per hour as against 26.8 in New York; that gluers-off were paid in Connecticut 21.5 cents per hour as against 23.7 in Ohio; that glueing-machine operators were paid in Connecticut 27.8 cents per hour as against 30.3 paid in Illinois; and that female table workers were paid in Connecticut 25.4 cents per hour as against 27.5 in Illinois.

That in the chemical industry foremen of mechanical operations were paid in Connecticut 50.9 cents per hour, as against 72 cents per hour paid in Kansas.

That in the electrical machinery and apparatus industry machine setters were paid in Connecticut 42.5 cents, as against 55.8 cents paid in New Jersey; that machinists were paid in Connecticut 51.8 cents per hour, as against 66.9 cents per hour paid in Illinois; that metal finishers were paid in Connecticut 37.8 cents per hour, as against 42.1 cents paid in New York; that milling-machine hands and operators were paid in Connecticut 43 cents per hour, as against 49.8 cents per hour paid in New York; that polishers and buffers were paid in Connecticut 42.1 cents per hour, as against 55.1 cents per hour paid in Pennsylvania; that punch-press hands and operators were paid in Connecticut 38.8 cents per hour, as against 63.8 cents per hour in Indiana; that screw-machine hands and operators were paid in Connecticut 42.6 cents per hour, as against 63.6 cents per hour paid in New Jersey; that coil winders were paid in Connecticut 27.4 cents per hour, as against 31.1 cents per hour paid in New York; that connectors and insulators were paid in Connecticut 27.4 cents per hour, as against 30.3 cents per hour paid in New York; that drill-press hands and operators were paid in Connecticut 27.5 cents per hour, as against 36.7 cents per hour paid in New York.

That in foundries chippers and grinders were paid in Connecticut 49.1 cents per hour, as against 64.5 cents per hour paid in Iowa; that first-class core makers were paid in Connecticut 66.3 cents per hour, as against 84.6 cents per hour paid in Oregon; that core makers were paid in Connecticut 42.1 cents per hour, as against 64.7 cents per hour paid in Michigan; that crane operators were paid in Connecticut 50.8 cents per hour, as against 85.7 cents per hour paid in Washington; that cupola

tenders were paid in Connecticut 53.3 cents per hour, as against 79.3 cents per hour paid in Oregon; that handy men in Connecticut were paid 53.2 cents per hour, as against 71.7 cents per hour paid in Missouri; that laborers were paid in Connecticut 43.7 cents per hour, as against 58.1 cents per hour paid in Oregon; that bench molders were paid in Connecticut 58 cents per hour, as against 73.4 cents per hour paid in Michigan; that floor molders were paid in Connecticut 64 cents per hour, as against 83.2 cents per hour paid in California; that machine molders were paid in Connecticut 43.6 cents per hour, as against 68.2 cents per hour paid in Iowa; that molders' helpers were paid in Connecticut 44 cents per hour, as against 50.3 cents per hour paid in Missouri; that pattern makers were paid in Connecticut 59.4 cents per hour, as against 90.1 cents per hour paid in Ohio.

That in the hosiery and underwear industry boarders were paid in Connecticut 41.1 cents per hour as against 56.9 cents per hour paid in Pennsylvania; that machine fixers were paid in Connecticut 49.9 cents per hour as against 57.8 cents per hour in Ohio; that pressers were paid in Connecticut 34.2 cents per hour as against 55.8 cents per hour paid in Wisconsin; that buttonhole makers were paid in Connecticut 25.6 cents per hour as against 36.1 cents per hour paid in Wisconsin; that button sewers were paid in Connecticut 28 cents per hour as against 33 cents per hour paid in North Carolina; that hand cutters were paid in Connecticut 43.9 cents per hour as against 27.4 cents per hour paid in Wisconsin; that finishers were paid in Connecticut 24.8 cents per hour as against 31.6 cents per hour paid in North Carolina.

That in the machine industry blacksmiths were paid in Connecticut 66.5 cents per hour as against 81 cents per hour paid in Oregon; that blacksmiths' helpers were paid in Connecticut 48.2 cents per hour as against 51.6 cents per hour paid in Missouri; that drill-press men were paid in Connecticut 51.2 cents per hour as against 63.7 cents per hour paid in Minnesota; that fitters were paid in Connecticut 60.9 cents per hour as against 70.5 cents per hour paid in Missouri; that gear cutters were paid in Connecticut 57.2 cents per hour as against 71.9 cents per hour paid in New York; that grinders were paid in Connecticut 54.7 cents per hour as against 66.7 cents per hour paid in New York; that handy men, hookers on, and painters were paid in Connecticut 47.6 cents per hour as against 64.7 cents per hour paid in California; that laborers were paid in Connecticut 41.9 cents per hour as against 58.7 cents per hour paid in California; that lathe men were paid in Connecticut 54.2 cents per hour as against 71.3 cents per hour paid in Pennsylvania; that machinists were paid in Connecticut 55.7 cents per hour as against 90.8 cents per hour in California; that milling-machine men were paid in Connecticut 51.6 cents per hour as against 69.2 cents per hour paid in Missouri; that millwrights were paid in Connecticut 55.9 cents per hour as against 68.2 cents per hour paid in New York; that planer and shaper men were paid in Connecticut 60.9 cents per hour as against 69 cents per hour paid in Oregon.

That in the paper and pulp industry back tenders were paid in Connecticut 41.2 cents per hour as against 67.7 cents per hour paid in Minnesota; that beater men were paid in Connecticut 46.2 cents per hour as against 62.6 cents per hour in Minnesota; that machine tenders were paid in Connecticut 56.7 cents per hour as against 80.5 cents per hour paid in Minnesota; packers were paid in Connecticut 36.1 cents per hour as against 50.8 cents per hour paid in Pennsylvania; third hands were paid in Connecticut 35.1 cents per hour as against 53.1 cents per hour paid in Minnesota.

In the typewriter, computing-machine, and cash-register industries aligners are paid in Connecticut 59.9 cents per hour as against 69.8 cents per hour paid in New York; that assemblers and welders were paid in Connecticut 36.1 cents per hour as against 48.5 cents per hour paid in New York; that drill-press men and operators were paid in Connecticut 43.2 cents per hour as against 55.8 cents per hour paid in Michigan; that fitters and filers were paid in Connecticut 43.6 cents per hour as against 48.2 cents per hour paid in New York; that gear cutters and lathe operators were paid in Connecticut 58.2 cents per hour as against 61.5 cents per hour paid in Michigan; that grinder hands were paid in Connecticut 45 cents per hour as against 59.7 cents per hour paid in New York; that handy men were paid in Connecticut 38.6 cents per hour as against 48.9 cents per hour paid in New York; that case hardeners and annealers were paid 45.2 cents per hour in Connecticut as against 67.9 cents per hour paid in Indiana; that inspectors—final—were paid 59.3 cents per hour in Connecticut as against 73.7 cents per hour paid in New Jersey; that japanners and annealers were paid in Connecticut 47 cents per hour as against 57.4 cents per hour paid in Michigan; that laborers were paid in Connecticut 35.2 cents per hour as against 43.3 cents per hour paid in Michigan; that machine setters were paid in Connecticut 49.8 cents per hour as against 55.2 cents per hour paid in New York; that machinists were paid in Connecticut 59.7 cents per hour as against 68 cents per hour in Michigan; that milling-machine operators were paid in Connecticut 43.9 cents per hour as against 50.1 cents per hour paid in New York; that electro and nickel platers were paid in Connecticut 52.5 cents per hour as against 59.5 cents per hour paid in New York; that polishers and buffers were paid in Connecticut 53.9 cents per hour as against 54.7 cents per hour paid in New York; that rough polishers were paid in Connecticut 41.9 cents per hour as against 58.9 cents per hour paid in New York; that punch-press hands were paid in Connecticut 38.5 cents per hour as against 58.2 cents per hour paid in Michigan; that screw-machine hands and operators were paid in Connecticut 46.8 cents per hour as against 54.1 cents per hour paid in Michigan; and that toolmakers, die makers and sinkers were paid in Connecticut 66 cents per hour as against 81.6 cents paid in Indiana.

PRE-WAR WAGES IN THE TEXTILE INDUSTRY.

It is well known that wages paid in the cotton and woolen manufacturing industry in this country are, generally speaking, the lowest for any of the American industries. Textile manufacturing has been the special object of protectionist solicitude and legislation; indeed, the textile interest has been the dominent interest in the framing of tariff legislation. The textile industry is a typical protected industry, and the obvious fact is that in this industry wage rates are at much lower levels than in the nonprotected industries such as the railroad occupations and crafts, the building and construction trades, and the telephone and electrical trades. This fact is so well known as to not require a demonstration.

This condition was also well known in pre-war years, as was clearly brought out in a study of wages in the United States in 1908 to 1910 by Scott Nearing, a professor in the Wharton school of the University of Pennsylvania, which was published in 1911 under the title "Wages in the United States, 1908–1910"—"A study of Federal and State wage statistics."

Professor Nearing found that the State of Massachusetts had collected and published the most complete wage statistics then available, and he makes a particular examination of these Massachusetts statistics. On page 31 of his book he says:

> These industries are really divisible, according to the numbers employed, into two groups, those industries employing more than 40,000 persons, and those employing less than 15,000 persons. Between these two extremes not a single industry appears. A study of the above table shows that wages range much lower in the textile industries. Thus in cotton goods, worsteds, woolens, and dyeing and finishing, there are respectively 31, 21, 25, and 21 per cent of the employees paid under $8 a week. In the other industries these percentages are much lower, with a maximum in furniture of 15 per cent, and a minimum in foundry and machine shop of 6 per cent.
>
> Similar deductions may be made from an analysis of the higher-wage group. In the textile industries (cotton, worsteds, woolens, and dyeing and finishing) there are, respectively, 9, 17, 10, and 12 per cent of employees receiving more than $15 per week, while in the other industries the percentages above $15 per week are:

	Per cent.
Boots and shoes	42
Foundry and machine shop	32
Leather	16
Paper	18
Furniture	17
Jewelry	47

> The proportion of wage earners receiving above $15 per week is therefore considerably higher in the nontextile than in the textile industries.

The textile industry is notable for the large proportion of women and children employed, and it is common experience that the presence of a large number of women in the industry is a sure sign of a low-paid industry. In 1908 nearly one-half of the number of minors employed in Massachusetts were employed in the cotton-manufacturing industry, and the number of women employed in the cotton-manufacturing industry is nearly as high as the number of men employed in the industry.

Mr. Nearing, on page 44 of his book, says:

> Seven-tenths of all adult males receive weekly wages running from $9 to $20, while more than four-fifths of the adult females receive from $5 to $12 per week. The classified weekly wages of the adult males of Massachusetts are therefore almost twice as high as the wage of the adult females.

And on page 45 Mr. Nearing says:

> Cotton goods, the largest Massachusetts industry in so far as the number of employees is concerned, pays the lowest wages of any of the leading industries. Of the adult males (over 21 years) nearly one-third receive under $8 per week, while four-fifths of the total adult males receive less than $12 per week, leaving only one-tenth of the entire number of adult males with weekly incomes of over $15. The wages of the adult females (over 21 years of age) are lower than the wages of adult males, but not lower in the proportion that they are in other industries. Half of the adult females receive less than $8 per week, nearly a half receive wages ranging from $8 to $12, leaving only one-twentieth of the adult females with weekly wages over $12 and none with weekly wages over $15.

* * * * * * *

From these two industries the conclusion is obvious; that, for a man settling in Massachusetts, a boot and shoe town is infinitely preferable to a cotton mill town, in so far as wages are concerned. The work may be harder or more technical, but the difference in wage between the two industries is very considerable.

* * * * * * *

Thus the boot and shoe industry paid by far the best wages to adult males, while the lowest wages were paid in the cotton industry.

And, on page 57, Professor Nearing says:

In cotton goods, the leading Massachusetts industry, the wages are very much lower than in the State at large, nearly three-fifths of all the adult male employees receiving less than $459 in 1918.

It is notorious that the cotton-mill towns of New England have a working population containing a large number of persons of foreign birth, and that in these towns are paid the lowest wages paid in the United States, and are also to be found the most undesirable living conditions encountered anywhere in the country. The pretense that the tariff on textiles is laid for the purpose of protecting the wages of the American workingman is hardly made good in the fact that the wages in this most protected of all American industries are the lowest paid in any American industry, and that the condition of the employees in this industry approach more nearly the status of servitude than in any other industry in the country. Not only are the wages low but thousands of women and children are practically chained to their daily tasks by the drivings of hunger and the inexorable demands of nature for food, clothing, and shelter. The textile industry which has called the loudest for protection upon the score of Americanism presents the most un-American conditions to be found in any quarter of the land. On this point, Professor Nearing says, on page 75, of his book:

The contrast is marked between Massachusetts and New Jersey, with tens of thousands of women and thousands of children at work, and Kansas, with 3,600 women and 600 children. In Massachusetts the women formed 30 per cent of the total wage earners; in New Jersey, they formed 25 per cent; but in Kansas less than 7 per cent of the total wageworkers are women.

To compare the wages received by women in a free American industry, such as the wages paid to operators on telephone exchanges, with the wages paid to women in the textile industry, will give us a clear picture of the distinction between the free industries and the protected industries in this country as respects the wages and welfare of their employees.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Connecticut?

Mr. KING. I do.

Mr. McLEAN. To what industry is the Senator referring now?

Mr. KING. The nonprotected industries. I am speaking now of telephone operators.

Mr. McLEAN. The Senator calls those "nonprotected." Of course, he knows that we do not import telephone operators. There is an absolute embargo against competition in that line.

Mr. KING. The Senator can make such deductions as he pleases. My contention is that the reactionary Republicans in the past and now have been imposing upon the American people exorbitant taxes in the form of tariffs, upon the pretense that those duties were essential for the protection of the wages of the American employees; and I have contended that the wages paid in the most highly protected industries were lower than those paid in the industries that had no protection.

Mr. McLEAN. The Senator knows that there are about 33 per cent of our people engaged in agriculture and about 33 per cent in manufacturing pursuits, and the other third in other occupations, and that the other third have an absolute embargo. We do not import hotels and hospitals and schoolhouses and colleges. Consequently, our masons and painters and carpenters and other tradesmen have an absolute embargo against competition. They do not need any protection, and that is the reason why their wages are very much higher than the wages in the industries where they have to meet severe foreign competition.

The fact is that in the cotton industry and most of the textile industries the competition from abroad is so fierce that the American producer has had to cut his wages; and the Senator also knows that competition in the South in many lines of cotton goods is very severe and that the wages in the South are much lower than they are in New England. That was made clear by a statement presented to the Senate the other day by the Senator from Massachusetts [Mr. LODGE].

If the Senator will permit me, I was not here, and am not familiar with the different industries to which the Senator has called the attention of the Senate at this time; but the statement which I put into the RECORD the other day was taken from the census reports, and it was to the effect that the average wage in Connecticut in 1919 was $3.56 a day; and the fact is that to-day, probably, we are working about from 40 to 50 per cent of capacity, perhaps 60 per cent. We will call it 60 per cent. That means a reduction in our pay roll in Connecticut of $140,000,000 a year; and the Senator can realize that under those conditions we must do one of two things—we must either cut wages or else we must have adequate protection.

The fact that some of these rates may seem to be high signifies nothing, because if they are not high enough to equalize the difference in the cost of production here and abroad, of course, they are ineffective; and as a result in these industries where the competition is fierce, and against which Germany has made a special drive, there is only one of two things for us to do—we must cut wages or go out of business.

Mr. KING. Mr. President, the Senator has stated now what he has heretofore stated in various forms, perhaps in different phraseology; but the whole burden of the able Senator's position has been that protection is the panacea for all the ills to which our industrial system is heir.

Mr. McLEAN. If the Senator will permit one more interruption, I want to say to him that I am not opposed to any criticism or any investigation that is just and founded on fact, and no one regrets more deeply than I do the necessity for paying low wages. I believe in good wages. For that reason, I want protection that will enable the manufacturer to pay good wages; and I call the Senator's attention to the most recent resolution adopted by the American Federation of Labor on the tariff question.

Mr. KING. I wish the Senator would put that in in his own time.

Mr. McLEAN. It is only 7 or 8 lines, and then I shall have concluded, if the Senator will pardon me, because I do not want to take the time of the Senate in discussing this matter.

Mr. KING. All right; I yield.

Mr. McLEAN. It is as follows:

That this convention go on record in favor of the policy of industrial preparedness and the enactment of laws by Congress that will adequately protect all wage earners of our country against the loss of employment through any industrial invasion on the part of the products of any of the other nations.

I want to say to the Senator that Mr. O'Meara may be opposed to a protective tariff, but the secretary of the Federation of Labor in the State of Connecticut has recently signed a statement in favor of protection, and the Senator knows that representatives of the American Federation of Labor have appeared before the Committee on Finance on many of these schedules demanding adequate protection. The only hope of the American wage earner, the only possible way in which our standard of living can be maintained, is to give adequate protection to these industries which meet foreign competition.

Mr. KING. Mr. President, the able Senator from Connecticut, in my time, has delivered two admirable addresses from his standpoint, and has restated the arguments which he has adduced so often in the Senate—the arguments of the protectionists who believe that the prosperity of the American people is dependent upon raising to the skies the tariff rates so that the United States may be excluded from trade and commerce with the world.

It was not my purpose to-day to enter into any general discussion of the question of tariff or the relation of tariff to wages. I brought these matters to the attention of the Senate only because of the apparent challenge of the Senator from Connecticut and the Senator from New York the other day of some observations which I submitted, and of the letter which I offered for the RECORD, written by the president of the Federation of Labor of the State of Connecticut.

If I had the time to-day—and I apologize to the committee for trespassing upon the time of the Senate when they are discussing another important measure—I should be glad to analyze some of the statements made by my able friend, and review the arguments which he has again presented in favor of protection. I have no doubt that there are many men, members of the Federation of Labor, who are inoculated with the same virus of protectionism that has taken possession of my learned friend, and which guides his conduct here in the formulation of tariff legislation. Of course there are many people in the United States who follow the heresies that are so eloquently and ably championed by the able Senator from Connecticut. He states over and over again that the condition of wages depends upon the tariff, that the condition of American industry is related to the tariff, and depends upon inordinately high tariff duties. We discussed that question several weeks ago, and I do not care to enter into it now, as I am anxious to conclude in order that we may resume the discussion of

the schedule which is now under consideration. There are other members of the Federation of Labor, though, who do not see in this tariff bill which the Senator is so ably defending the beneficent results which are prognosticated for it by my friend. I believe that the laboring people of the United States more generally now than in the past appreciate the fact that the Republican Party's financial policies have never been in the interest of the great consuming public, including the laboring men, but that many of the financial policies of the Republican Party have been dictated by selfishness, by a determination upon the part of large manufacturers and certain interests to exploit the American people, buttressed behind enormous tariff walls which prevent legitimate and proper competition. But this bill, with its enormities, being made known to the people, will disillusion my friend from Connecticut, and he will discover that the laboring men of the United States are not by any means a unit in their support of it. I repeat that as its schedules become known, and when the bill shall have passed and been put into operation, the American people will challenge the wisdom of the measure and condemn those who have driven through under the party lash a bill containing schedules so high that they have never been paralleled in any of the tariff legislation of the past.

Mr. President, recurring to the matter to which I have directed the attention of the Senate, in 1910 telephone operators were paid $34.84 per week in Salt Lake City; $35.84 per week in San Francisco; $27.32 per week in Dallas, Tex.; $29.52 per week in Omaha, Nebr.; $29.44 per week in St. Louis, Mo.; $27.09 per week in Washington, D. C.; $29.16 per week in Philadelphia, Pa.; and $36.96 per week in New York; whereas the mill women of Massachusetts were in the same year only paid from $8 to $12 per week, half of the number receiving less than $8 per week; nearly half receiving from $8 to $12 per week; but only one-twentieth receiving more than $12 per week, and none receiving more than $15 per week as wages for service in the cotton mills.

The pretense that the tariff is laid for the promotion and protection for American wages and American conditions in industries is thus revealed as a bald and fictitious assumption. The facts indicate that avarice for money has been the dominating motive in the writing of the textile tariff and that the purpose of these tariffs has been not the protection of wages but the protection of profits. Some persons have contended that there is no advantage in transporting great numbers of foreign wage seekers to our mill towns over admitting to our ports the manufactures of foreign production. They claim that if our people may be engaged in more profitable and healthful pursuits than working in the textile mills, there is no reason why legislation should be passed to foster an industry which demands the services of depressed men and of women and children who have no business working in factories at all—at least not in this great and free country.

I want to read briefly from a letter written by Mr. Thomas F. McMahon, international president of the United Textile Workers of America, under date of July 19, 1922. He states that—

> More than six or seven years ago we had a strike in New London at the Armstrong Thread Co. Five years ago we had a strike in the Salts Textile Co. in Bridgeport. We had two strikes in Stonington, one or two in Mystic, one or two in Moosup, and a big strike in Willimantic.

I have called attention in the affidavits submitted by Mr. O'Meara to the large number of strikes that have occurred in Connecticut for a number of years last past.

> The loom fixers and mule spinners, the highest type of cotton-mill workers, receive in Connecticut about $26 per week for 55 hours. The average weaver, running 12 looms, makes about $22.
>
> Spinning room help and girls running 8 or 10 sides, of 116 spindles each side, receive $17 per week of 55 hours. Doffers in the same department received about $15. Carding room and picker room of a cotton mill average about $14 for men for 55 hours.

He is speaking of the present year.

> The foregoing shows conclusively that necessity compels the wife and mother to go to work in order that the offspring may at least receive some of the rough and coarse necessities of life, as luxuries are unknown in the homes of the cotton workers to-day. Children are compelled to go to work by the employers of their fathers and mothers under penalty in many cases of losing their own employment or being turned out of the company's tenements. Nice, easy jobs are made for the children by the employers so as to keep them off the street and that their parents will know where they are, and, as a matter of fact, the father and mother with a large family will find that they have the key to open the mill door of any mill in New England because of the fact that they are responsible for so many thousands of dollars to be taken out of the lives of those who compose this young brood.
>
> There is no man or woman living to-day who can describe conditions inside of a cotton mill, particularly during the warm weather. The natural heat and the artificial heat that is necessary for production leaves the room where human beings toil in nearly an unbearable condition. Men and women just cover their nakedness in these rooms; otherwise they could not stand it.
>
> Women and children predominate in a cotton mill, and it is common now to see the $8 or $9 a week job. All the data and all the statistics in the United States would not be as valuable as one visit from the honorable Senator into a cotton mill in Baltimore, Md., about 30 miles from Washington, and if he but walks through each department and notes the physical condition of the operatives he will fully appreciate that not only are the textile workers underpaid but that the rate of pay to-day is forcing them into slow death through the starvation method.
>
> Trusting that the above will assist you, and with best wishes I am,
>
> Fraternally yours,
>
> THOMAS F. MCMAHON,
> *International President United Textile Workers of America.*

I have here an excerpt from the Washington Post, under date of July 17, an Associated Press dispatch, giving a statement of the New England textile strike, which is now in its seventh month with 50,000 operatives idle and more than 40 plants affected. I ask leave to have this printed in the RECORD without reading.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TEXTILE STRIKE GROWS—LOWELL MILLS CLOSED—10,000 ADDITIONAL OPERATIVES CALLED OUT BECAUSE OF WAGE REDUCTIONS.

BOSTON, July 17 (by the Associated Press).—The New England textile strike, which is now in its seventh month with 50,000 operatives idle and more than 40 plants affected, spread to-day in force to Lowell, Mass. Strikes have been called against 3 plants in Lowell which reduced wages 20 per cent. These plants employ more than 10,000 operatives.

Beginning late in January in the Pawtuxet Valley of Rhode Island, textile strikes have been in progress in three main areas—Rhode Island, New Hampshire, and Lawrence, Mass. Announcements of wage reductions of 20 per cent, held by the mill owners to be made necessary by the competition of southern mills, preceded all the strikes. In Rhode Island and New Hampshire an increase in working hours from 48 to 54 weekly was also a factor.

Most New England mills affected by the strike have continued open, but many have curtailed operations. Antipicketing injunctions have been obtained by many manufacturers.

Mr. KING. I have with great care gone through United States Department of Labor Bulletin 265 and assembled the various classes of employees in a large number of the industries, together with the wages paid. The statement is so voluminous, comprising 33 pages of typewritten matter, that I shall not ask to place it in the RECORD, but I will state generally that the wages paid in the textile mills, as shown by this record, are less than the wages paid in other industries, protected or nonprotected.

I regret having consumed so much time this morning, but I felt, in view of the attitude of the able Senator from Connecticut and the able Senator from New York, that it was only proper that I should present to the Senate facts which would support the contentions which I made and the statement made by Mr. O'Meara in his letter, which was placed in the RECORD.

A review of the situation in the State of Connecticut brings into the picture the great contrast in the condition of the people. On the one hand we have great factories and the palaces of the manufacturers, which rise like the castles of the feudal barons as a reflection of the number of their retainers and serfs. And on the other hand we have the thousands of repressed men, women, and children whose toil yields daily tribute to the wealth and profits of their masters, but who themselves live in want and penury, in tenements which can not be denominated by the name of homes, but which exist in the shadow of the mills and palaces of Connecticut, but do not reflect any of the glory or prosperity which Connecticut manufacturers take unto themselves from the labor of these poor people. On the one hand there are 280 millionaires, whose plants and factories represent an investment of $1,343,900,000, and on the other hand there are these 340,404 men and women who in 1919 toiled at an average wage of $3 per day, which since that time has been decreased, with an accentuation of the poverty which seems to be the common inheritance of those who labor in the protected industries of Connecticut. Protection for profits and protection for poverty and protection for the process which produces profits and poverty are constant concomitants in the progress of the policies for which the Republican Party stands and which have received their consummate expression in the iniquitous provisions of the pending tariff bill.

Mr. McLEAN. Mr. President, I was not here when the Senator from Utah began to read the information which I understand is embodied in a report prepared some years ago with regard to conditions in certain localities of the State of Connecticut. For that reason I am not able to reply, and, probably, if I had been present I could not have replied, since the information referred to matters about which I have no personal knowledge. The conditions to which he refers might have been caused by the Underwood bill.

I have no desire now to occupy the time of the Senate in replying to the Senator's position on the tariff question. In so far as the effect of protective-tariff duties upon the wages of men and women employed in the manufacturing industries in this country is concerned, I will let the representatives of the American Federation of Labor speak for themselves. Everyone who has kept track of the hearings before the Finance Committee and the discussion of this subject generally since the tariff bill was brought up knows that representatives of the American Federation of Labor have frequently expressed their views upon this subject, and all in favor of protection. I have here a statement published in May last, signed by Mr. I. N. Ornburn, secretary of the Connecticut State Federation of Labor, and others. I ask to have this statement printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

[From the Labor News, New Haven, Conn., Friday, May 5, 1922.]

PRINTING TRADES PROTEST CHEAP FOREIGN PRINTING—"PATRIOTIC" AMERICAN FIRMS HELPING CRIPPLE INDUSTRY HERE BY PURCHASES ABROAD.

The printing tradesmen of America, many thousands of whom have been idle for months, will soon have an opportunity of returning to their trade if the promise made by Hon. Elmer Dover, Assistant Secretary of the Treasury, to representatives of the organized printing trades is fulfilled.

Early last fall an investigation on the part of the New York State Allied Printing Trades Council, headed by its president, Peter J. Brady, assisted by Stephen G. Kelly, secretary of the Allied Printing Trades Council of Greater New York; Walter N. Reddick, president, and Felix J. Belair, secretary of the International Brotherhood of Bookbinders, disclosed the fact that during the year 1920 there was an increase of more than 400 per cent in the imports of printed matter. It was also learned that some "patriotic" American employers were placing their printing orders with representatives of foreign printing concerns because of the low quotations, quotations so low, in fact, that many of the "rat" shops of our own country could not even compete.

The names of many of these "patriotic" American concerns, who are looking to the workers of this country for their support and patronage, and consequent profits, will soon be compiled and made public and we hope that our workers and those of our employers who believe in "America first" will bear this fact in mind when placing their orders for merchandise by the concerns we refer to.

The House Ways and Means Committee, the House of Representatives, and the Senate Finance Committee answered the request of labor and placed a small additional duty on the imports of printed matter from foreign countries. The additional duties, however, are small.

These duties, if the recommendations of the Senate Finance Committee are adopted, will be based on the foreign value of these imports. Such a law at this time will give us but little relief.

The books, booklets, post cards, cigar labels, circulars, and other printed matter which Americans are asked to purchase with American money are sold on value in America. Why not place reasonable import tax on these goods on their value in America?

American labor has spent thousands of dollars during the last two years preparing material for Congress and for the President showing why, if American labor is to obtain employment, the imports which compete with our labor should be taxed on the value of the imports in this country.

We may succeed in getting this through, but at the present time it seems as though the international bankers and other financial interests, many of them holding fortunes in the depleted currencies of central European countries, will be able to defeat the wishes of real Americans.

At the present time it looks as though months may pass before any definite action is taken on the tariff bill.

It was because of this fact that representatives of the printing trades, headed by Matthew Woll, called upon Hon. Elmer Dover, Assistant Secretary of the Treasury in charge of customs, and asked that he issue a ruling that hereafter all goods printed in foreign countries imported for sale in our country, have the name of the country where made printed in a conspicuous place. They also asked that the Treasury Department make an investigation of the imports of printed matter, the prices at which the imports were valued, and the prices which the importers and bankers receive when they dispose of these goods in America.

We have reason to believe that some of these goods are offered for sale in Europe at prices which are less than the cost of material in America. Of course, this is possible at the present time on account of the depreciated value of the currency of some of the European countries.

We at least ought to have the privilege of knowing where the goods we purchase were made and then it is up to our own people, if they prefer to patronize the goods printed in countries other than America. We may soon be able to list some of those who are Americans when it is profitable to be so and anti-Americans when they profit themselves even by so doing they help to impoverish the workers of America.

The delegation which called upon Hon. Elmer Dover consisted of Matthew Woll, president of the International Printing Trades Associations and vice president of the American Federation of Labor; I. M. Ornburn, secretary of the Connecticut State Federation of Labor; Walter N. Reddick, president of the International Brotherhood of Bookbinders; Daniel J. Ahearn, president of the Allied Printing Trades Council of Greater New York; and Edward F. McGrady, legislative representative of the American Federation of Labor.

Mr. McLEAN. I also have a very brief statement prepared by Mr. William A. Nealey, president of the Massachusetts State branch of the American Federation of Labor, in which he discusses the necessity of adequate protection for American employees, and the unfortunate results which will come unless they are given adequate protection. I ask to have that printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

LABOR'S OBJECTION TO FREE TRADE—OPPOSED TO THE REMOVAL OF ECONOMIC BARRIERS AND INSISTS UPON INDUSTRIAL PREPAREDNESS.

(By William A. Nealey, president of the Massachusetts State branch of the American Federation of Labor.)

After the war had been in progress about a year British labor realized the handicap that free trade had been to England. High protection had enabled Germany to overcome England's lead in many industries and to threaten the existence of trades necessary to the maintenance of Great Britain's prestige in war or peace. Imports from Germany, prior to the war, were flooding the British markets and Germany had overcome England's lead in the steel industry and had surpassed England in the vitally important industry of dye and chemical manufacturing. England's agriculture had declined under free trade and Great Britain was dependent upon other countries for its food supplies. This weakness on England's part was the underlying reason of Germany's submarine campaign. If enough British ships could be sunk the food supplies would be cut off and England would be starved to death.

British labor was the first to see the danger of the situation, and at a great meeting of labor representatives declared in favor of the adoption of a protective tariff policy by a vote of 2,500,000 labor unionists. At Ford Hall, Boston, on Sunday evening, October 20, Arthur Gleason explained the after-war program of British labor, and one of the chief elements of that program was a high tariff.

England can no longer be called a free-trade country. In fact, England never was wholly a free-trade nation. It had free trade in food supplies, and it soon fell into a position where it could not feed its people. It had free trade in certain manufactured goods, and soon found its market overrun by goods "made in Germany." But it never abolished protection for its shipping. It built the greatest navy in the world to protect its merchant marine and paid enormous subsidies to its steamship lines to keep the flag of England on every sea. It was England's enormous navy and its protected merchant marine that saved the British Empire from collapse.

British labor was wise enough to see the significance of this. It was keen enough to interpret the weakness due to free trade and the strength that resulted from protection; and so it demanded protection for the industries of England, as well as for the shipping of England. Great Britain will be a protective-tariff nation as long as Englishmen remember the lessons of this war. And it will be a long time before they will forget them.

While this was going on in England, American labor was not asleep. Many of us saw that we were unprepared in a military sense when we entered this war. We had only a small Army and a Navy of 50,000 or 60,000 men. It was not that Army or Navy that Germany feared. It was the great body of American labor, trained, skillful, and intelligent that would, after a short period of training, make the best soldiers and sailors in the world, and it was the great industries of the United States, built up by over a hundred years of protection, that Germany knew we could depend upon to supply our soldiers and sailors with the supplies and equipment of war. American labor knew what these industries meant to us in the prosecution of the war, and what they would mean to us when peace was restored. We were determined that these industries should not perish and at our convention in Buffalo, in November, 1917, attended by the delegates of the American Federation of Labor, we declared—

"That this convention go on record in favor of a policy of industrial preparedness and the enactment of laws by Congress that will adequately protect all wage earners of our country against the loss of employment through any industrial invasion on the part of the products of any of the other nations."

I appeal to you if that is not the American spirit? I appeal to you if that is not the American policy? I appeal to you if that is not the voice of the American people?

We do not propose to fight for the liberty of the world and lose our own right to life, liberty, and the pursuit of happiness. We are not going to safeguard the independence of other nations and lose our own industrial independence. We are not going to lick Germany on those bloody fields of France and Belgium and then let Germany loot our markets. We are not going to send our sons across the sea to conquer the brutal Hun and then make Germany the master of our trade and commerce.

But, my friends, that is just what is going to happen if we do not prepare for our industrial defense.

There are candidates in this State running for high office who voted for the Underwood tariff bill that reduced our tariff protection so low that Germany and all the other countries began to flood our markets with their goods. When Woodrow Wilson signed the Underwood tariff he rose and expressed great satisfaction with the provisions of that law. "The feeling that I have," he said, "is that we have done the rank and file of the country a great service." Mr. Underwood, one of the foremost leaders of the Democratic Party and at that time chairman of the Ways and Means Committee, said: "I am absolutely confident that this law will reduce the cost of living in the United States, and it will provide ample revenue for the Government." It reduced the employment of American labor, but it did not reduce the cost of living, and the revenue obtained from the tariff was cut down many millions. That tariff law, which was signed with so much satisfaction in the White House, led straight to the bread line and the soup houses and to the army of unemployed, in which from four to five millions of "the rank and file of the country" were soon enrolled. That was a draft law in which there was no patriotism and no element of public service. The soldiers in that army were not clothed in khaki; they were clothed in rags. There were no honors and promotion; there was only the pitiful and profitless search for work. The Red Cross was not organized for comfort and for aid, but there were volunteer organizations of relief in all our cities. The National Government did not come to your rescue, but State, city, and private charity was called upon to save the unemployed from starvation. There were no barracks nor cantonments built for the army of the unemployed, but they found shelter from the storms of winter in wharves, warehouses, and police stations.

An official canvass in Philadelphia showed 200,000 men unemployed. Labor organizations in New York City estimated that 472,000 men and women were either out of work or on part time. In Chicago there were 190,000 out of work. In New England the mills were forced to close and thousands walked the streets in idleness. In New York emergency workshops were opened and thousands flocked to them, eager to work for 50 cents and 60 cents a day, while thousands were

turned away. In Lawrence the city government appropriated $35,000 to relieve the distress of the unemployed. In Lynn the great factories of that city were working on part time or closed entirely. In a small western city the officials, under the stress of the critical unemployment there, arranged to put a rock crusher into operation. It could employ only 25, but 1,000 applied for work.

Cincinnati, Philadelphia, Pittsburgh, Boston, Providence, and a long list of other cities made appropriations to provide work for the unemployed. Massachusetts, true to her traditions, acted in a practical way. She appropriated $100,000 and work was provided through the forestry department. But the national administration, whose leader had signed the Underwood law with so much confidence and satisfaction, met the appeal for a program of employment exchanges, public works, and loans with an order that a census be taken to prove the need, and then refused an appropriation of $10,000 to have the census made. The Federal Government did make one contribution toward relieving the distress. It opened the immigration buildings on Ellis Island as a shelter to homeless men and permitted the use of Government blankets, cots, and floors for the housing of 800 men each day. Five million men were out of work and the President opened Ellis Island to accommodate 800 of them. Was that rendering much of a service to "the rank and file of the country"?

The Democratic tariff policy is the greatest menace that there is to the workingmen of this country. Men who voted for the Democratic tariff of disaster and distress are asking you to vote to return them to Congress. If you have the interests of American labor at heart, you will vote to have them remain at home.

Free trade closes our factories, multiplies failures, and produces unemployment. A protective tariff opens the idle factories and provides work and a pay envelope for American labor. You can not give away the American market and keep the workingmen of the country employed. You can not abolish a protective tariff and keep our industries or our labor prosperous. You can not import the articles which supply the needs of our people and at the same time provide our people with work. When you send our orders for goods to the mills of Europe you empty the mills of the United States. When you give employment to European labor you drive our workingmen to the street.

It was only when the war stopped the importation of foreign goods that business began to pick up in this country. It was only because the workingmen of Europe were called from their workshops to mobilize great armies that our workingmen got a chance to go back to work. The Underwood law brought loss and unemployment. The war brought work and high wages.

But, thank God, the brave boys of the American Army, recruited from our farms and our workshops, will soon bring this war to an end and force Germany to an unconditional surrender. But if the free traders still control our Congress the Underwood tariff law, or one even worse, will remain in force and the agony and distress of 1914 will return.

President Wilson demands, as one of the conditions of peace, the "removal of all economic barriers." That, gentlemen, means free trade; and free trade means unemployment, bread lines, and starvation.

The only way to prevent "the removal of all economic barriers" is for American labor to insist on its right to the American market and safeguard that market by a protective tariff. To do this you must elect protectionists to the House and to the Senate; you must elect men who will vote for protection to American labor.

* * * * * * *

ADMINISTRATION BY COLLECTIVE AUTHORITY.

Mr. KING. Mr. President, various matters have been placed in the RECORD by Senators bearing upon the Smith-Towner bill. If that had not been done by the proponents of the measure I should not ask the indulgence of the Senate to have placed in the RECORD a number of editorials and extracts from publications which I have here.

I ask unanimous consent to have printed in the RECORD, in 8-point type, a part of the report of President Butler, of Columbia University. It appears on pages 20, 21, 22, and 23 of his annual report as president for the year 1921. It is an able discussion of the functions of the State and of the evils of the academic wit once defined good administration as the doing uniformity craze which seems to have permeated the land.

There being no objection, the matter referred to was ordered to be printed in the RECORD, in 8-point type, as follows:

"One of the most noteworthy of recent developments in American life is the zeal with which machinery is designed and built ostensibly to serve various public interests and undertakings, but in reality to control them. Perhaps in no other way is the decline of faith in liberty so clearly marked. An extremely well of that which should not be done at all. If this clever phrase is to be applied to public administration, it would have to be altered so as to read, the doing ill of that which should not be done at all, for public administration—administration by collective authority—is almost uniformly inefficient, and for an obvious reason. In such case artificial choice takes the place of natural selection in the designation of agents, and since nature is wiser than man, particularly political man, efficiency at once declines. In the United States we are, in flat defiance of all our proclaimed principles and ideals, building a series of bureaucracies that will put to shame the best efforts of the Government of the Czar of all the Russias when in the heyday of its glory. We are surrounded by agents, special agents, inspectors, and spies, and the people are called upon to support through their taxes, in harmful and un-American activities, whole armies of individuals who should be engaged in productive industry. When anything appears to go wrong, or when any desirable movement seems to lag, a cry goes up for the creation of some new board or commission, and for an appropriation of public funds to maintain it in reasonable comfort. An infinite number of blank forms must be filled and an infinite number of records must be kept, classified, and audited at steadily mounting cost.

"For a long time the excellent limitations of the American form of Federal Government held these movements in check, so far as the National Government itself was concerned. When, however, the ingenious discovery was made that the National Government might aid the States to do what lay within their province but was denied to the National Government itself, the door was opened to a host of schemes. These have followed each other in rapid succession, all urged with a certain amount of plausibility and with an appeal to kindly sentiment, usually supported by vigorous propaganda and zealous paid agents.

"So far as education is concerned, there has been overorganization for a long time past. Too many persons are engaged in supervising, in inspecting, and in recording the work of other persons. There is too much machinery and, in consequence, a steady temptation to lay more stress upon the form of education than upon its content. Statistics displace scholarships. There are, in addition, too many laws and too precise laws and not enough opportunity for those mistakes and failures, due to individual initiative and experiment, which are the foundation for great and lasting success.

"It is now proposed to bureaucratize and to bring into uniformity the educational system of the whole United States, while making the most solemn assurance that nothing of the kind is intended. The glory and the successes of education in the United States are due to its freedom, to its unevenness, to its reflection of the needs and ambitions and capacities of local communities, and to its being kept in close and constant touch with the people themselves. There is not money enough in the United States, even if every dollar of it were expended on education, to produce by Federal authority or through what is naïvely called cooperation between the Federal Government and the several States, educational results that would be at all comparable with those that have already been reached under the free and natural system that has grown up among us. If tax-supported education be first encouraged and inspected and then little by little completely controlled by central authority, European experience shows precisely what will happen. In so far as the schools of France are controlled from the ministry of education, in Paris, they tend to harden into uniform machines, and it is only when freedom is given to different types of school or to different localities that any real progress is made. Anything worse than the system which has prevailed in Prussia would be difficult to imagine. It is universally acknowledged that the unhappy decline in German university freedom and effectiveness and the equally unhappy subjection of the educated classes to the dictates of the political and military ruling groups were the direct result of the highly centralized and efficient control from Berlin of the nation's schools and universities. For Americans now to accept oversight and direction of their tax-supported schools and colleges from Washington would mean that they had failed to learn one of the plainest and most weighty lessons of the war. It is true that education is a national problem and a national responsibility; it is also true that it has been characteristic of the American people to solve their most difficult national problems and to bear their heaviest national responsibilities through their own action in the field of liberty rather than through the agency of organized Government. Once more to tap the Federal Treasury under the guise of aiding the States and once more to establish an army of bureaucrats in Washington and another army of inspectors roaming at large throughout the land will not only fail to accomplish any permanent improvement in the education of our people, but it will assist in effecting so great a revolution in our American form of government as one day to endanger its perpetuity.

"Illiteracy will not be sensibly diminished, if at all, by Federal appropriations, nor will the physical health of the people be thereby improved. The major portion of any appropriation that may be made will certainly be swallowed up in meeting the cost of doing ill that which should not be done at all. The true path of advance in education is to be found in the direction of keeping the people's schools closely in touch with the people themselves. Bureaucrats and experts will speedily take the life out of even the best schools and reduce them to dried and mounted specimens of pedagogic fatuity. Unless the school is both the work and the pride of the community which it serves, it is nothing. A school system that grows naturally in response to the needs and ambitions of a hundred thousand different localities will be a better school system than any which can be imposed upon those localities by the aid of grants of public money from the Federal Treasury, accompanied by Fed-

eral regulations, Federal inspections, Federal reports, and Federal uniformities.

"It is fortunate that Columbia University, a public institution, was founded and is supported by the State in the field of liberty, and that it is free to carry on its work beyond the reach of the deadening hand of Government."

EXPENDITURES OF STATE SCHOOL SYSTEMS.

Mr. KING. Mr. President, I have here a statement from the Bureau of Education showing the amount of money expended by the various States for education during the year 1920. It is a very illuminating tabulation and emphasizes the fact, which everyone knows, that the States are expending very large amounts annually for public-school purposes. I ask unanimous consent that the table may be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Expenditures of State school systems, 1920.

States.	Total expenditures (not including debt service).	Outlays—new buildings, sites, and new equipment.	Payments for textbooks	Salaries for teachers, principals, and supervisors in day schools.
Alabama	$9,118,691	$1,399,328	$19,471	$6,092,240
Arizona	6,339,288	1,502,689	84,760	2,551,290
Arkansas	7,706,621	1,716,545	.....	5,216,575

[4] Included with expenditures for compulsory attendance and school census.
[5] Figures for 1919.
[6] Figures for 1918.

Mr. KING. Mr. President, I have here several editorials from the Boston Herald, the Boston Transcript, and the Springfield Union relating to the Federal control of education and cognate questions. I ask that they may likewise be printed in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD as follows:

[From the Boston Herald, July 2, 1922.]

NO POLITICS, NO SECT IN THE PUBLIC SCHOOLS.

The National Education Association, which honors Boston this week with its presence, has it in its power to be a national beneficence. It also has it in its power to be a national peril. It can be of tremendous service to the future of the United States if it continues to devote itself to the discussion of methods for the educational development of American youth along broad and liberal lines. It can be a destructive influence to American ideals if it yields to the persuasive arguments of the propaganda so active already around Boston meeting places looking toward the centralization in Washington of all educational activities.

Should the National Association for any reason either adopt resolutions favoring the Towner-Sterling education bill, or send out from Boston its members poisoned with the virus of socialism and bureaucracy emanating from that bill and proposed legislation of similar purport, it will have done a wrong to the cause of real education from which perhaps there will never be recovery. More than that, it will have stirred into virulent activity all the sectarian animosities which follow invariably upon attempts to control by government the character of teaching in American schools.

Should the Towner-Sterling bill become a law and should it be accepted by the States, it would be a deadly blow at the Federal Constitution. It would be another step toward the subordination of the governments of the States to the activities of partisan and sectarian bureaus located at the Federal Capital, where they can not be in close touch with conditions in local communities. It will be a step toward tyranny through socialism—a long step toward the distintegration of our federated Republic.

The Sheppard-Towner bill was a baneful thing. Massachusetts has refused to accept the bribe offered by Congress as a price for subordinating its own State freedom to the dictates of a Federal bureau. It was probably unconstitutional. Its constitutionality will have to be decided by the Supreme Court. It is probable also that the Towner-Sterling bill is unconstitutional. That question also must come before the Supreme Court before the bill can go into effect, even should it be passed by Congress.

We earnestly hope that the National Education Association will serve notice on the Towner-Sterling propagandists, as well as on all other propagandists, that they are not wanted in the association's meetings. The teachers of the United States owe it to the people of the United States, whose children will some time determine the destiny of the United States, to make sure that insidious doctrine fatal to the perpetuation of our Federal form of government shall not be inculcated through any agency of theirs.

The Towner-Sterling bill will poison education with politics and sectarianism. Our schools must be kept free of both.

—

[From the Boston Herald, July 6, 1922.]

WHY WE OPPOSE FEDERAL CONTROL OF EDUCATION.

The Herald commends to every delegate in attendance upon the sessions of the National Education Association a careful perusal of the Faneuil Hall address on the Fourth of July by Mr. Jeremiah E. Burke, superintendent of Boston public schools. It was peculiarly appropriate that he should have spoken as he did on that day in that place. He showed himself to be a sentinel of the Republic, just as every schoolteacher now in Boston should consider himself or herself a sentinel of the Republic, guarding constantly against the perils which lurk in the attempt to centralize in Washington, through schemes for Federal aid, all educational activities.

"Prussian militarists," said Mr. Burke, "disregarded the lessons of Alexander, Hannibal, Caesar, and Napoleon. They would establish an absolute State. Bismarck proclaimed that the schoolmaster was abroad in the land, but the schoolmaster was not free. He was an officer of the State, obedient to the State, compelled to do the bidding of the State. What he should teach and how he should teach was prescribed by the State. All the agencies within the State became subservient to the military clique. Government existed for the favored few. In 50 years the thought of the people was distorted and malformed in conformity with despotic theories. The State was apotheosized. The German people came to associate the Kaiser with Deity; they were led to believe that militarism was a blessing, that the hands of all the world were raised against them, and that Germany was justified on patriotic grounds in committing outrageous acts of sacrilege and brutality. All of this willful perversion of a people mentally and morally was manifestly the result of a system of false education."

These are words which every American should take to heart. The Towner educational bills under consideration, however modified, propose to bring within the scope of the Federal Government all educational activities through the allurement of great appropriations for Federal aid to States; however innocent they may seem in purpose, however progressive they may look to those who advocate them, however modified they may be in the process of transition through the legislative body, they contain within themselves the germ of supreme governmental control just as truly as the system which in 50 years lured Germany into a condition where her entire people were convinced that the welfare of the world depended on the universal acceptance of Prussian ideals. There is no such thing as compromise or middle ground. Either the individual States must determine their own educational methods or the Federal Government must control the States—the two systems can not be combined. When the States begin to look to Washington for funds with which to stimulate their public schools they will inevitably look to Washington for guidance as to how those funds shall be expended. Even though a bill which might be adopted tomorrow should in words prohibit "Federal control," there is nothing in the system which the Towner-Sterling bill inaugurates to prevent the growth of bureaucratic despotism later.

The Herald has been criticized for saying that the Towner-Sterling bill leads to sectarianism. There is nothing in the bill to indicate that one sect or another would control the educational machinery of the United States, and yet if it were understood that the first head of the educational bureau established by the bill should be a communicant of any one of several churches which might be named, how many of those who now are crying for the passage of the bill would still support it?

We have been criticized for saying that this Federal interference or assistance—it makes no difference which word is used—would mean the injection of partisanship into public education. Does any advocate of the Towner-Sterling bill believe that a Republican administration would place any other than a Republican in charge of the educational bureau, with its limitless opportunities for political propaganda, or that any Democratic administration would place a Republican in such a post of partisan advantage? If the creation of such a bureau in Washington, with initial appropriation of $50,000,000 to be distributed among the States in accordance with the preference of the

bureaucrats, does not incite to tyranny, then human nature has been transformed. Tyranny will be no less obnoxious because the tyrants have been multiplied.

We have been asked to specify how the enactment of such a measure as the Towner-Sterling bill would be a long step toward the disintegration of our federated Republic. If it is not a step toward the disintegration of the Republic through the concentration in Washington of an education propaganda, then there can be no reasonable excuse for the experiment. If the backward States feel that they need assistance in advancing the cause of education they will be generously aided by the friends of education in States like Massachusetts, which has always led in educational endeavor; but they must not expect the State of Massachusetts or any other forward-looking State to sacrifice her independence at the behest of socialistic theorists.

—

[From the Boston Transcript, July 8, 1922.]

MILLIONS FOR AID BUT NOT ONE CENT FOR BRIBERY.

With most of the arguments advanced against the Towner-Sterling bill to Europeanize our public school system, which brings it under the yoke of a Federal bureaucracy at Washington and expose it to the meddlesome influence of an international and for the most part imperial bureaucracy at Geneva, we heartily sympathize. An exception to this rule, however, is the argument based upon the fact that the bill would provide for the distribution among the poorer and less populous States of the Union public money raised by taxation in Massachusetts and the other richer and more populous States. This argument is based upon fact, but the argument is none the less an appeal to sectionalism in its most sordid form, an appeal to the belly of the State when the freedom of the State is at stake.

Millions of dollars raised by taxation in Massachusetts have been spent by the Federal Government in other parts of the Union to defray the cost of public improvements that were properly matters of Federal concern. The people of Massachusetts have never begrudged this expenditure whenever they could be shown that it benefited not merely the State where it was spent but the Union as a whole. Massachusetts has been contributing to the welfare and greater glory of the Nation in peace and in war, in blood and treasure, by toil and thrift and sacrifice, from the day the Nation was set up, and it will not be merely the privilege but the duty of the Commonwealth to continue cheerfully that practice as long as we remain a Nation and refuse to return to the status of a colony or to disintegrate into a "polyglot boarding house" or a picnic ground for hyphenates from far and near.

The objection to the Towner-Sterling bill on the score of expense, which will find sympathy and support not only on this page but among the plain people throughout Massachusetts, is to be found in the fact that money raised by taxation in Massachusetts would be offered by the Federal Government to the people of the smaller and less populous States of the Union in the form of a bribe and in return for the surrender of the birthright of the State, which under the Constitution is intrusted with safeguarding the freedom of education within its borders.
